PREFACE.

It has been the aim of the Author to render "The Manual of Dates" a concise and trustworthy compendium of the principal events of Ancient and Modern times. As the value of a work of reference must necessarily depend upon the character of the sources whence information is derived, the best authorities have in all cases been consulted, and their statements have been carefully examined and compared. On disputed points, conflicting accounts have been subjected to rigid scrutiny, and the view supported by the best evidence has been invariably adopted.

Biographies, with the exception of short notices, are not included in the alphabetical arrangement, though much information respecting the lives of great men of every age and country will be found in various articles.

In so large a collection of facts—the number of articles, alphabetically arranged, being nearly double that contained in any similar work, in one volume*—certain errors and inaccuracies must occur. The critical reader and the student, who can form some idea of the amount of labour involved in the extensive researches required for a work of this kind, will make due allowance for the same. The Author will feel greatly obliged for suggestions or corrections for future editions.

A carefully prepared index to subjects which do not come under the alphabetical arrangement, and a list of some of the principal authorities, have been inserted.

The Second Edition, now presented to the Public, has undergone thorough revision, and is in many respects a new work. Every date has been verified, the original authorities for each subject have been again consulted, many articles have been re-written, much additional matter has been introduced into those which appeared in the first edition, and a large number† (3,662) of entirely new ones has been

* The statement made in the preface to the first edition of Haydn's Dictionary of Dates, and repeated in every edition to the twelfth inclusive, published in 1866, to the effect that it contains "upwards of Fifteen Thousand Articles, alphabetically arranged," is altogether inaccurate. The tenth edition of Haydn's Dictionary of Dates, published in 1861, contains 5,034 articles, alphabetically arranged, and the first edition of Townsend's Manual of Dates, published in 1862, contains 7,383 articles, alphabetically arranged. The twelfth edition of Haydn's Dictionary of Dates, published in 1866, contains 5,743 articles, alphabetically arranged, and the second edition of Townsend's Manual of Dates (1867) contains 11,045 articles, alphabetically arranged. These figures, based not upon an estimate, but upon actual calculation, require no comment. It will be seen that neither work contains upwards of Fifteen Thousand Articles, alphabetically arranged, though Haydn's Dictionary contains above Five Thousand, and Townsend's Manual above Eleven Thousand Articles.

† First Edition, 1862, 7,383 articles. Second Edition, 1867, 11,045 articles.

added. Though the columns in this edition are much broader than those in the first, one hundred and fifty additional pages have been inserted.*

The Author believes that, on some points, he has brought together in this Manual information only to be found by consulting different authorities and a large number of books, and refers, as an instance of this, to the account of each Administration, which contains the principal changes that occurred during its tenure of office.

In conclusion, the Author begs to express his acknowledgments for the favour with which the first edition of this Manual has been received, and to add that he has laboured diligently to render it a store-house of "the memorials and the things of fame" of the past. It is only by frequent revision that a book of general reference can, considering the increased facilities and the higher requirements of these days, keep pace with the rapid advances which are being made in every department of knowledge. In too many cases the version which has been handed down from generation to generation, as a true account of some bygone transaction, cannot endure the sharp ordeal of modern investigation. The consequence is that not authentic history, but that which has long usurped its place, is being entirely recast. The wonderful precision with which fiction is being separated from fact, the clear light thrown upon characters and events by the stores of original documents that are daily becoming accessible to the inquirer, the student, and the scholar, and the severer tests to which all historical narratives are subjected, though they may lead to the reversal of many time-honoured judgments, conduce to the elucidation of the truth, declared by Lord Bacon to be "the sovereign good of human nature." In this Second Edition, the Author has endeavoured to record much of the progress made, and to embody many of the results achieved since the first edition appeared, and (anxious to give honour where honour is due) has sought to point out the source whence the information was obtained, because, though his own labour has been great, it is the labour of others, in every department of literature, science, and art, that gives value to his work.

LONDON, *May*, 1867.

LIST OF AUTHORITIES.

Amongst the numerous Works which have been consulted in the compilation of this Manual the following may be mentioned:—

ADOLPHUS's History of England, from the Accession to the Decease of George III. 1840–45.
Allibone's Dictionary of British and American Authors. Vol. I. 1859.
Alison's History of Europe, from the Commencement of the French Revolution in 1789 to the Restoration of the Bourbons in 1815. 9th edit. 1853–55.
Alison's History of Europe, from the Fall of Napoleon in 1815 to the Accession of Louis Napoleon in 1853. 1852–59.
Almanac de Gotha. 1787 to 1867.
Anderson's History of the Colonial Church. 1856.
Andrews's History of British Journalism.
Annals of England: an Epitome of English History. 1855–57.
Annals of the Kingdom of Ireland. By the Four Masters.
Annual Register. 1758—1867.
Arnold's History of Rome. 1838–43.
Asiatic Annual Register. 1799—1810.
Baker's Chronicle of the Kings of England, with a Continuation by E. Phillips. 1730.
Bayle's Historical and Critical Dictionary. 1734–7.
Berry's Dictionary of Heraldry.
Bingham's Antiquities of the Christian Church. 1840.
Biographie Universelle.
Biographia Britannica. Enlarged by Dr. Kippis. 1777–93.
Birch's and Marryat's History of Pottery and Porcelain.
Blackie's Imperial Gazetteer. New edition.
Blakey's History of Literature.
Bohn's Antiquarian Library. Various Works.
Bohn's Classical Library. Various Works.
Bohn's Scientific Library. Various Works.
Bohn's Standard Library. Various Works.
Bouillet, Dictionnaire d'Histoire et de Géographie.
Bower's History of the Popes. 1748–66.
Brady's Clavis Calendaria.
Braude's Dictionary of Science, Literature, and Art.
Brandt's History of the Reformation in the Low Countries. 1720–3.
British Almanac and Companion. 1829–67.
Broughton's Historical Dictionary of all Religions, from the Creation of the World to this Present Time. 1756.
Bryce's Holy Roman Empire.
Buckingham, Duke of, Court and Cabinets of George III.
Buckingham, Duke of, Memoirs of the Court of the Regency.
Buckingham, Duke of, Memoirs of the Court of George IV.
Buckingham, Duke of, Memoirs of the Court of William IV. and Victoria.
Burn's Ecclesiastical Law, by Robert Phillimore. 1842.
Buckle's History of Civilization in Europe.
Burnet's History of His Own Times. 1833.
Burnet's History of the Reformation. Edited by the Rev. N. Pocock.
Burnet's History of James II. 1852.
Burney's History of Music. 1776–89.
Burney's Chronological History of the Discoveries in the South Sea or Pacific Ocean, &c. 1776–89.
Calendars of State Papers.
Camden's Britannia. By Richard Gough. 1806.
Carlisle's Foreign Orders of Knighthood.
Carlyle's History of Frederic II. (the Great) of Prussia.
Carte's History of England. 1747–55.
Cave's Antiquitates Apostolicæ. 1675.
Chalmers's Biographical Dictionary. 1813–17.
Chambers's Handbook of Astronomy.
Chambers's Encyclopædia.
Chevalier's Mexico, Ancient and Modern.
Clarendon's History of the Rebellion. 1849.
Clark's Concise History of Knighthood.

UNIV. OF CALIFORNIA

A NEW

MANUAL OF DATES.

AALBORG (Jutland).—The capital of the peninsula, almost entirely destroyed by fire in 1530, was taken by storm in 1534, during a rebellion of the Jutlanders, when 2,000 of the male inhabitants were put to the sword. It was captured by the Swedes in 1643, and again early in 1658; but was restored to Denmark by the peace of Roskild, Feb. 25, 1658. The bishopric, founded in the 11th century at Burglau, was transferred to this city in 1540. Aalborg, occupied by the Prussians May 5, 1864, was visited by Christian IX. of Denmark Nov. 29, 1864.

AARAU (Switzerland).—This ancient town of Aargau formed, in the 10th century, part of the possessions of the counts of Rohr. In 1333 it entered into an alliance with the chief cities of Switzerland, and in 1415 it was captured by the Bernese. Aarau became the place of meeting for the Protestant cantons in 1528, and was the scene of many subsequent diets. In 1798 Aarau was declared the capital of the Helvetian Republic, established by the French.

AARAU (Treaty).—The third and last of the religious wars that devastated Switzerland was terminated in Aug., 1712, by a treaty concluded at this place. The Roman Catholics, who had sustained severe losses, surrendered Baden, Bremgarten, Mellingen, and other bailiwicks, to Zurich and Berne, and admitted the latter canton to the co-sovereignty of Thurgau, Rheinthal, and Sargans.

AARGAU, or ARGOVIA (Switzerland).—This province was invaded, in 1415, by all the Swiss cantons, except Uri, and divided among the conquerors, Berne retaining the largest territory. It was made an independent canton by the Act of Mediation, promulgated Feb. 19, 1803. Part of the Frickthal, which Austria, by the sixth secret article of the treaty of Campo Formio, Oct. 17, 1797, had relinquished, was incorporated with it, in consequence of which a treaty between Argovia and Baden was signed at Aarau, Sep. 17, 1808. By the constitution, finally settled in 1815, Aargau ranked among the 22 Swiss cantons. An insurrection occurred in Aargau, Jan. 10, 11, and 12, 1841; and in 1844 the people demanded the expulsion of the Jesuits. The castle of Habsburg, the seat of the ancestors of the imperial family of Austria, is situated in this canton.

AARHUS (Denmark).—Gustavus Vasa was imprisoned in the castle of Kalö, near this town, in 1518. Aarhus was nearly destroyed by fire in 1541 and 1556. The plague committed great ravages in 1578. The spire of the cathedral, 600 feet high, originally erected in the 13th century, which was destroyed by lightning in 1642, was replaced by a smaller tower, which met with a similar fate in 1822. Here the Danes gained a victory over the Prussians May 31, 1849. Aarhus was occupied by the allied Austrian and Prussian forces, March 13, and April 28, 1864.

AATH, AETH, or ATH (Belgium).—The "Tour de Burbard" was erected in this city in 1150, and the town hall towards the close of the 16th century. Aath, taken by the French in 1667, and strongly fortified by Vauban, was lost by them in 1678, and recovered in 1697. The allies, under General Owerkirke, seized it, Oct. 4, 1706, and in 1716 it was taken by the Dutch, who surrendered it to Louis XV., Sep. 28, 1745. Captured by the army of the French Republic under General Berneron, in 1792, it was finally lost by France in 1814. The fortifications have since been considerably strengthened. The church of St. Julien, erected in 1393, was nearly destroyed by lightning in 1817.

ABACOT.—Mention of the cap of state worn by some of our kings occurs in the Chronicle of Fabyan, who includes amongst the spoils that fell into the hands of Edward IV., after the battle of Hexham (*q. v.*) Henry the Sixth's "bycoket, garnysshed with ii. crownes of golde, and fret with perle and ryche stone." This account is repeated by later authors. Grafton uses the term "abococket," and Camden says: "In that fatal battle fought here, 1463, on the plains called *the Levels*, was taken the cap of state called *Abacot*, adorned with two rich crowns."

ABACUS, in architecture, is the uppermost part of the capital of a column, often erroneously represented as the capital itself, to which, as well as the column, it serves as a kind of crown. Bailey says: "The abacus, according to Vitruvius, was originally designed to represent a square tile laid over an urn or basket. The rise of this first regular order of architecture is said to have been as follows:—An old woman of Athens having placed a basket covered with a tile over the root of an acanthus, the plant, shooting forth the following spring, encompassed the basket all round, till, having met the tile, it curled back in a kind of scrolls, which being observed by an ingenious sculptor, he formed a capital upon the plan; representing the tile by the *abacus*, the basket by the vase or body of the capital, and the leaves by the volutes." The form of the abacus varies in the different orders.—This term is also applied to a board with counters, sometimes in grooves, and sometimes on wires, used for facilitating calculation. These instruments, fashioned in different ways, were com-

men amongst the Greeks, the Romans, and other nations of antiquity, by whom the invention was ascribed to Pythagoras. Herodotus, for the purpose of making a distinction between the customs of the Greeks and the Egyptians, says the latter, in calculating with counters, moved the hand from right to left, instead of, as the Greeks, from left to right. These counters were made of various materials, and, as nations lapsed into luxury, of the choicest kind. Ivory, and even silver and gold, were employed. The swan-pan, or computing table of the Chinese, was of similar construction to the abacus. It is said to have been in use amongst them from remote ages. The abacus, or modification of the same, was in general use amongst European nations until the 16th century. Shakespeare makes the clown in the Winter's Tale allude to the practice, when he gives up the attempt at a calculation, with the remark: "I cannot do it without counters."—An instrument, consisting of a frame with cross-wires and beads, and styled a *chemical abacus*, was introduced by Dr. Reid in 1839, to facilitate the study of chemical compounds.

ABANCAY (Battle).—At this place, in Peru, during the civil war amongst its Spanish conquerors, Almagro gained a complete victory over Alvarado, July 12, 1537.

ABATTOIR.—By 4 & 5 Hen. VII. c. 3 (1490), butchers were made subject to a fine for slaughtering beasts within the walls of the city of London. The act extended to all towns of England except Berwick and Carlisle. The butchers, having constructed drains to carry off the filth, &c., petitioned to be relieved from its operation, and this was done by 24 Hen. VIII. c. 16 (1533). Stow (Survey, b. v. ch. 12) relates that, on the visitation of the plague in the reign of Elizabeth, an ingenious Italian gentleman and physician assigned one great cause of it to be the killing of cattle within the city, and proposed that slaughter-houses should be erected in the suburbs of London and other cities. By a decree of Napoleon I., dated Feb. 9, 1810, it was ordered that five abattoirs, or public slaughter-houses, should be erected in the vicinity of Paris. They were opened in 1818. Roule and Villejuif each contained 32 slaughter-houses; Grenelle 48; and Menilmontant and Montmartre each 64; making in all 240 slaughter-houses. Similar establishments have been erected in the precincts of all large towns in France. The abattoir erected in Edinburgh in 1851 was the first introduced into the United Kingdom. Petitions for the removal of Smithfield market, and the substitution of these useful establishments, were presented to Parliament April 23, 1833; and abattoirs form part of the new cattle-market in Copenhagen-fields, opened June 13, 1855.

ABBACOMITES.—Lay-abbots, who, during the Middle Ages, obtained from the sovereign certain monasteries in the way of benefices, became very numerous in France, and several decrees on the subject are found in the records of the period. Fosbroke (British Monachism, c. vii. p. 83) states that "there were anciently lay-abbots, which, it seems, was owing to the laity seizing the church lands, and leaving only the altar and tithes to the clergy. Lay-abbots were also called *Abbacomites*, and *Abbates milites*,—'noble abbots,' and 'knightly abbots.' They were great persons, under whose protection the monasteries voluntarily placed themselves; but these protectors became their oppressors. They had another title, that of 'Commendatory Abbots,' and often filled the first offices in the court and army." Bernard, the youngest of Charles Martel's six sons, was lay-abbot of the monastery of Sithin, or St. Quentin, in the middle of the 8th century; and Prince Eugène, when he made his first campaign (1683), was commendatory abbot of two ancient monasteries.

ABBASSABAD.—This Persian fortress was captured by the Russians July 31, 1827, a battle having been fought here June 20; and another, called the battle of Djevan-Boulak (*q. v.*), July 18.

ABBASSIDES.—This race wrested the sceptre of the Saracens from the house of the Ommiades, and occupied the caliphate for more than five centuries. They were descendants of Abbas-Ben-Abul-Motalleb, uncle of the Prophet. Gibbon remarks: "In the visible separation of parties, *green* was consecrated to the Fatimites; the Ommiades were distinguished by the *white;* and the *black*, as the most adverse, was naturally adopted by the Abbassides. Their turbans and garments were stained with that gloomy colour: two black standards, on pikestaves nine cubits long, were borne aloft in the van of Abu Moslem; and their allegorical names of the *night* and the *shadow* obscurely represented the indissoluble union and perpetual succession of the line of Hashem." They rebelled against the Ommiades in 746, and gained several victories. Merwan II., the fourteenth and last caliph of the Ommiades, having suffered a terrible defeat on the banks of the Zab, fled into Egypt, and was slain in a mosque at Busiris (*q. v.*), on the banks of the Nile (Feb. 10, 750). Abul Abbas, or Al Saffah (the Sanguinary), became the first caliph of the Abbassides; and their empire lasted until Feb. 20, 1258, when the Mongol leader, Holagou Khan, stormed Bagdad, and put Mostasem, the last of the race, to death. The Abbassides removed the seat of empire from Damascus to Bagdad in 762. The following is a complete list of these caliphs, with the date of their elevation to power:—

	A.D.		A.D.
Abul Abbas	750	Al Radhi	934
Al Mansur	754	Al Motaki	940
Al Mahdi	775	Al Mostakfi	944
Al Hadi	785	Al Moti	945
Haroun Al Rashid	786	Al Tai	974
Al Amin	809	Al Kader	991
Al Mamun	813	Al Kaim	1031
Al Motasem	833	Al Moktadi	1075
Al Wathek	841	Al Mortader	1094
Al Motawakkel	847	Al Mostarshed	1118
Al Mostanser	861	Al Rashid	1135
Al Mostain	862	Al Moktafi	1136
Al Motaz	866	Al Mostanjed	1160
Al Mohtadi	869	Al Mostadhi	1170
Al Motamed	870	Al Naser	1180
Al Motadhed	892	Al Zaher	1225
Al Moktafi	902	Al Mostanser	1226
Al Moktader	908	Al Mostasem	1240
Al Kaher	932		

ABBAYE (Prison of).—Among the fearful

scenes enacted under the rule of Danton, Robespierre, and their associates, were the massacres at the prisons of Paris, in 1792. The prison of the Abbaye was the first assailed. The attack commenced at three o'clock in the morning of Sep. 3, when many of the prisoners were put to death, under circumstances of unparalleled atrocity. A mock tribunal was formed for the trial of the unfortunate captives.

ABBESS, the lady superior of a religious house of females. The first of these societies for females was founded by Pachomius, who died in 348. Martene says that the abbesses, in early times, exercised some of the spiritual functions belonging to the priesthood, and even confessed their nuns. This practice, having led to various inconveniences, was suppressed. Bingham (Antiq. b. vii. c. 3, s. 13), referring to the statement in the Saxon Chronicle, that abbesses were present at the council held at Becanceldc (*q. v.*), or Baccancelde, in 694, remarks: "It is justly noted by learned men as a new thing, to find abbesses, as well as abbots, subscribing in the Council of Becancelde, in Kent, anno 694, and that before both presbyters and temporal lords, as the author of the Saxon Chronicle reports it. For this is the first time we meet with any such thing in the records of the ancient church."

ABBEVILLE (Treaties).—Though finally settled in Paris, the treaty concluded between Henry III. of England and Louis IX. of France, May 20, 1259, has, from the meeting of the two monarchs at Abbeville, been named after this town. The former renounced all claim to the provinces of Normandy, Anjou, Touraine, Maine, and Poitou, receiving 300 small pounds of Tours, and being guaranteed in the possession of some other provinces in France, which he was to hold as fiefs. Henry III. was to sit among the peers of France as Duke of Guienne, and he soon after dropped the titles of "Duke of Normandy and Count of Anjou." The cognisance on his seal was changed, a sceptre taking the place of the sword, which circumstance furnished a theme for an olden rhyme:—

"Peace marks the year, on which may fortune shine,
One thousand, hundreds two, and fifty-nine.
Then Anjou, Poitou, Normandy—the boast
Of England's warlike kings, resigned and lost,
Were the rich trophies of the power of France;
And Henry changed his seal and cognisance,—
Assumed the sceptre for the conqueror's sword,—
Though still a king, no longer Neustria's lord."

Wolsey arrived here in July, 1527, having been sent by Henry VIII. to conclude a treaty with Francis I. Wolsey, who travelled in great state, was kept waiting at Abbeville, and it was not until Aug. 3 that Francis I. met the cardinal, and they entered Amiens together, where the negotiations were concluded, Aug. 18.

ABBEY, a religious house, presided over by an abbot or abbess, into which persons retired, dwelling in seclusion from the world. In times of persecution, the primitive Christians took refuge in mountains, caves, and desert places, and were afterwards collected together and formed into religious communities. Mosheim says that, long before the Christian æra, this mode of life prevailed in Egypt, Syria, India, and Mesopotamia. It was probably first practised by Christians during the Decian persecution, in the middle of the 3rd century. Paul of Alexandria, the first Christian hermit, retired to the desert in 251. Antony shut himself up in a tomb in 285, and formed his cell at Phaim, in Upper Egypt, between the Red Sea and the Nile, in 305. Hilarion, about the same period, according to Mosheim, introduced the system into Syria and Palestine. Pachomius was the first to introduce regular monasteries. He built several in the Thebais, in Egypt, during the 4th century. Bingham says (Antiq. b. vii. c. 1, s. 4), "Till the year 250 there were no monks, but only ascetics, in the Church; from that time to the age of Constantine monachism was confined to the anchorets living in private cells in the wilderness: but when Pachomius had erected monasteries in Egypt, other countries presently followed the example, and so the monastic life came to its full maturity in the Church." By some decrees of the Council of Saragossa, in Spain, 381, prohibiting clerks from leaving their ministry to take monastic vows, and also specifying the age at which virgins might take the veil, it is evident that in this part of Europe monastic institutions were established at an early period. Martin, Bishop of Tours, built a monastery at Poitiers in the 4th century. Cassian founded two, one for monks and the other for nuns, at Marseilles, about 409. Twelve religious houses were established in Italy, within 40 miles of Rome, by Benedict, in 529, that of Monte Casino, erected on the site of an ancient temple of Apollo, in Campania, being the chief. Benedict was the first to institute monastic vows and rules. One founded in the isle of Bardsey at the end of the 5th, and another at Bangor-Iscoed in the beginning of the 6th century, are supposed to have been the first monasteries in Britain. An establishment of the kind was founded at Banchor, in Ireland, about 520. St. Columba founded one in the isle of Huy, or Iona (*q. v.*), in 565; and the abbey of Old Melrose was founded before the end of the 7th century. By 27 Hen. VIII. c. 28 (1536), all monasteries and religious houses not possessing more than £200 per annum were suppressed; and by 31 Hen. VIII. c. 13 (1539), all institutions of the kind were abolished. They amounted to 186 greater and 374 lesser monasteries, besides 48 houses of the Knights Templars; making a total of 608. The income was estimated at £137,000 per annum.

ABBOT, or ABBAT.—The term is derived from the Syriac *abba* and the Hebrew *ab*, the Greek form being *abbas*, a father. When hermits, or holy men, formed themselves into religious societies, one of their number was chosen as a chief. The monks must not, however, be confounded with ascetics, for, as Bingham states, "there were always ascetics in the Church, but not always monks retiring to the deserts and mountains, or living in monasteries and cells, as in after ages." The practice of dwelling together in communities, and under a chief, arose with Pachomius, in the reign of Constantine I. They were first styled Archimandrites, and the use of the term "abbot" commenced in 472. The custom for an abbot to be in orders

originated in the 6th century. Abbots gradually grew important, were called to councils, and aspired to an ascendancy over bishops. In order to check this tendency, the Council of Chalcedon (451) enacted that "all monks, whether in city or country, shall be subject to the bishop, and concern themselves in no business, sacred or civil, out of their own monastery, except they have his license and permission upon urgent occasion so to do." In spite of this, and other stringent laws, the abbots managed to engross power. Hence arose mitred abbots, who wore a mitre, and had absolute authority. They were exempt from diocesan jurisdiction, having episcopal authority within their precincts. In England, they had a seat in parliament, and were called abbots sovereign, or general, to distinguish them from other abbots. At the Reformation, according to some authorities, there were 26 abbots and two priors. Fuller mentions 27 parliamentary abbots and two priors. There were also crosiered abbots, from the crosier or pastoral staff, which they bore in the right hand, and not, as the bishops, in the left. Abbots ruling over establishments having several branches were styled cardinal abbots, and, on the continent, the titles of prince-abbots, field-abbots, and abbot-counts were used. (*See* ABRACOMITES). In olden times, instead of the benediction since employed at what is called the consecration, the abbot was invested with the cowl, the pastoral staff was placed in his hand, and the shoes on his feet.

ABBOT OF FOOLS, or MISRULE, called in Scotland the "Abbot of Unreason," was a master appointed during the Middle Ages, to preside over the Christmas festivities. This mock prince was frequently crowned, and attended with all the paraphernalia of royalty. A similar custom prevailed in many parts of France, and is evidently derived, as Prynne declares, from the ancient Saturnalia. The Abbot of Unreason was suppressed by the Scotch legislature in 1555. The allowance granted to an Abbot of Misrule by a nobleman early in the 16th century, according to an entry in the Earl of Northumberland's Household Book, was one pound. The "Abbot of Misrule" was changed into "Lord of Misrule" at the Reformation. (*See* BOY BISHOP.)

ABBOT OF HUY, or IONA, also Icolumnkill, an island on the west coast of Scotland. This island, Bede (b. iii. c. 4), writing at the commencement of the 8th century, says, "was always governed by a presbyter-abbot, under whose power the whole province, and the bishops also, were subjected, after an unusual manner, pursuant to the example of the first founder, who was not a bishop, but only a presbyter and a monk." This statement gave rise to a controversy on church government, in the 17th century. Bingham (b. vii. c. 3, s. 14), referring to Bishop Lloyd on Church Government, contends that Bede speaks of "only one small part of Scotland;" and this subjection was not in spirituals. Indeed, it seems to have been "an acknowledgment of some civil jurisdiction over the bishops, which may very well consist with their superiority in spirituals." (*See* ABBEY.)

ABBOTSFORD (Scotland) stands near the abbot's ford on the river Tweed, between two and three miles from Melrose, and 30 from Edinburgh. Sir Walter Scott purchased the property, consisting of a small farm called Cartley Hole, in 1811, and the present residence was completed in 1824.

ABBOTSFORD CLUB.—This society, for the publication of miscellaneous works, illustrative of history, literature, and antiquities, was established at Edinburgh in 1834, in honour of Sir Walter Scott. It has issued no publication since 1859.

ABBREVIATORS.—These officers of the pontifical court, 72 in number, employed in preparing the letters and minutes issued by the Pope, were divided into several orders, one of which was secular, and the remainder ecclesiastical. Pope Paul II. suppressed the order of Abbreviators in 1466, in consequence of the corruptions practised by its members.

ABDERA (Greece).—According to the mythological account, this city of Thrace was founded by Hercules, in honour of his favourite Abderus; but history ascribes its establishment to Timesius or Timesius of Clazomenæ, B.C. 656. The original inhabitants having been expelled by the Thracians, a new settlement was made by some colonists from Teos, B.C. 541, and the city rapidly attained considerable importance. It succumbed to the power of Athens, B.C. 468, and suffered considerably during a war with the Triballi, B.C. 376. During the Middle Ages, Abdera is said to have been called Polystylus. No remains of the ancient city are extant.

ABDERA (Spain).—This ancient city, situated on the southern coast of Spain, and founded by the Carthaginians, was the seat of a bishopric, which was transferred to Almeria by Alphonso II. of Castile, in 1147.

ABDICATION.—The most remarkable instances of the abdication, by rulers, of supreme power, are those which have occurred, not under the pressure of political exigencies, but from the promptings of purely personal motives. The act of abdication committed by James II. of England was not formal, but constructive: he had deserted the throne, and parliament declared it vacant. The abdications of Napoleon I., of Louis Philippe, and of many other rulers, were compulsory; and it is only by a perversion of the meaning of the word that it can be applied to such transactions.

B.C.
665. Tirhakah, King of Ethiopia, defeated in a great battle by Asshur-bani-pul, King of Assyria, abdicated in disgust.
79. Abdication of Sylla, the dictator.

A.D.
305. May 1. The Emperor Diocletian, called by Gibbon "the first example." Maximian abdicated at the same time, but re-assumed the purple in 306.
747. Carloman, eldest son of Charles Martel, abdicated and became a monk.
1294. Peter Morone, the hermit Pope, elevated to the papa chair as Cœlestine V., July 5, abdicated Dec. 13, and retired to his old mountain hermitage, above the pleasant valley of Sulmona, in the Abruzzi.
1555. Oct. 25. Charles V. resigned the Imperial dignity. He abdicated the Spanish throne Jan. 16, 1556.
1654. June 16. Queen Christina of Sweden abdicated
1730. Sept. 3, Victor Amadeus I., Sardinia.

1808, March 19. Charles IV., Spain. (*See* ARANJUEZ.)
1809, March 13. Gustavus IV., Sweden.
1814, April 4. Napoleon I., France.
1830, August 2. Charles X., France.
1848, Feb. 24. Louis Philippe, France.
1848, March 21. Louis Charles, Bavaria.
1848, Dec. 2. Ferdinand I., Austria.
1849, March 23. Charles Albert, Sardinia.

ABECEDARIANS.—This branch of the Anabaptists was founded, in the 16th century, by Nicholas Stork, a disciple of Luther. Stork, who died at Munich in 1530, maintained that all knowledge only prevented men from attending to the divine instruction inwardly communicated, and refused to learn anything, even the alphabet: hence their peculiar designation.

ABELITES, sometimes called Abelians, a sect of heretics that sprang up at Hippo, in Africa, about the year 370. They married, but abstained from matrimonial intercourse, following, as they pretended, the example of Abel, because no mention is made in Scripture of his children. When a man and a woman entered this society they adopted a boy and a girl. The heresy was not of long duration. It is generally supposed to have commenced just before the final separation of the Eastern and Western empires, under Arcadius (395), and to have terminated during the reign of Theodosius II. (the Younger, 408—450).

ABENCERRAGES and ZEGRIS, two Moorish families, whose quarrels are said, by some writers, to have deluged Granada with blood (1478—1490).

ABENSBERG (Battle), fought April 20, 1809, between the Austrians and the French. "The Austrians," says Alison, "were not routed at any point, and no artillery was taken; nevertheless, they had to lament the loss of 8,000 men; the Archduke Charles's communications with Landshut were thrown open to the enemy; they had been deprived of the advantages of the initiative; and, what is of incalculable importance, had been unsuccessful in the first considerable action of the campaign."

ABEOKUTA (Africa).—This independent town of Yoruba, in Guinea, has arisen within the last 50 years around a huge rock, called "Olumo," which was long the haunt of a band of robbers. They retired in 1825, and it became the retreat of fugitives from the slave-hunting expeditions of the King of Dahomey. These were joined by other exiles from the surrounding country, who gave to the little tracts of land on which they settled the names of the districts whence they had fled, the entire settlement receiving the title of "Abeokuta," or "Understone," from the rock which formed its centre. In 1829 these districts were united and organized by a chief, named Shodeke, and in 1839 the rising colony was enabled to commence an independent trade with the surrounding tribes. An English mission, established in 1846 under the Rev. H. Townsend, materially aided in the advancement of Christianity and civilization. In 1848 the inhabitants, who had been taken under British protection, were attacked by the King of Dahomey, and one of the invader's Amazonian regiments (*see* AMAZONS) was entirely destroyed. The King of Dahomey made another attempt, March 3, 1851, and was again defeated. A third attack, which took place March 16, 1864, was repulsed with a loss to the invaders of 1,000 killed and 2,000 prisoners.

ABERDEEN, in Scotland, is supposed to have formed the seat of a settlement during the 3rd century, and is said to have been erected into a city about the year 893. The episcopal see was transferred hither from Mortlach (*q. v.*), Banffshire, by David I., in 1139. The cathedral was commenced in 1357. George Haliburton, promoted in 1682, was the last bishop. The see was restored after the Revolution, James Gadderar being consecrated Bishop of Aberdeen at London, Feb. 24, 1712; and an assembly of the bishops of the church in Scotland was held here April 24, 1788, when it was unanimously resolved to submit to the House of Hanover. Old Aberdeen was made a free royal burgh in 1154. In 1296 Edward I. passed through this city, after defeating and deposing John Baliol. The castle was taken, and the fortifications were levelled, in 1308; and the city was burned by the English in 1336. New Aberdeen was then erected, and became an important seat of commerce during the Middle Ages, but suffered greatly from the wars between England and Scotland. In 1497 a block-house was erected, to protect the entrance of the harbour against the English; and in 1514, 1546, and 1647, many lives were destroyed by the plague. The inauguration of the memorial statue of Prince Albert took place in presence of Queen Victoria and several members of the royal family, Oct. 13, 1863.

ABERDEEN (King's College) was chartered by papal bull Feb. 10, 1494, and completed in 1500. It is an extensive building, containing a chapel, library, and museum. Marischal College, in the new town, was founded April 2, 1593, by George Keith, fifth Earl Marischal. The two colleges were united by a deed of union in the reign of Charles I. It was repealed in 1661.

ABERDEEN ADMINISTRATION, known as the "Coalition Ministry," and formed soon after the resignation of Lord Derby's first administration, Dec. 17, 1852, was presided over by the fourth Earl of Aberdeen. The feeble prosecution of the war against Russia by this cabinet rendered it unpopular, and its resignation followed the motion for inquiry into the state of the army before Sebastopol, carried in the House of Commons Jan. 29, 1855, by a majority of 157. The cabinet was thus constituted:—

Treasury	Earl of Aberdeen.
Lord Chancellor	Lord Cranworth.
President of the Council	Earl Granville.
Privy Seal	Duke of Argyle.
Chancellor of Exchequer	Mr. Gladstone.
Home Secretary	Lord Palmerston.
Foreign Secretary	Lord John Russell.
Colonial Secretary	Duke of Newcastle.
Admiralty	Sir James Graham, Bart.
Board of Control	Sir C. Wood, Bart.
Secretary at War	Mr. Sidney Herbert.
Public Works	Sir W. Molesworth, Bart.
Without Office	Marquis of Lansdowne.

The following changes occurred:—The Earl of Clarendon became Foreign Secretary Feb. 21

1853, in place of Lord John Russell, who retained a seat in the cabinet, without office. He became President of the Council in the place of Earl Granville, who was made Chancellor of the Duchy of Lancaster, with a seat in the cabinet, June 9, 1854. The War Department was separated from the Colonies June 8, 1854. The Duke of Newcastle retained the former, and Sir George Grey acceded to the Colonial Secretaryship. Lord John Russell resigned office Jan. 23, 1855; but as the ministry retired Feb. 1, the vacancy was not filled up. (*See* PALMERSTON [First] ADMINISTRATION.)

ABERLEMNO (Scotland).—The churchyard of this parish, in Forfarshire, contains a curious antique cross, supposed to commemorate the defeat of a division of Sweyn's Danish army, by Malcolm II., at Mortlach (*q. v.*), in Banffshire, in 1010.

ABHORRERS.—The elections of 1679 having proved unfavourable to the court party, Charles II., by repeated prorogations, prevented the assembling of the new parliament. Petitions praying for the immediate commencement of the session poured in from various parts of the kingdom. The church and court party encountered these demonstrations by addresses to the king, abounding in loyal expressions, supporting the prerogative, and declaring the deepest abhorrence of those who sought to interfere with the same by dictating to him with respect to the meeting of parliament (1680). Hence the rival parties were called "Addressers, or Petitioners," and "Abhorrers." These appellations afterwards gave place to the well-known terms Whig and Tory.

ABILENE (Syria).—This district of Cœle, Syria, called also Abila, passed, about B.C. 40, from the government of Ptolemæus, son of Mennæus, to his son Lysanias, who was put to death by order of Cleopatra, B.C. 33, when his territories were transferred to Zenodorus. Herod the Great having acquired possession of Abilene, B.C. 31, on his death, A.D. 3, it was divided between his son Philip and Lysanias, mentioned as tetrarch of the province by St. Luke (iii. 1), A.D. 29. On the death of Tiberius, A.D. 37, the province was reunited and bestowed by Caligula upon Herod Agrippa, who was confirmed in this possession on the accession of Claudius in 41. Placidius, a general in Vespasian's army, captured Abilene, A.D. 69 or 70, when it was incorporated with the Roman province of Syria.

ABINGDON (Berkshire).—A monastery said to have been founded at this ancient town by Lucius, King of the Britons, who reigned about the year 181, is alleged by monastic chroniclers to have been the scene of the education of the Emperor Constantine I. Having fallen into decay, it was restored in 675 by Cissa, Viceroy of Kentwin, King of Wessex, and after being ravaged by the Danes during the reign of Alfred the Great, it was restored by Abbot Ethelwold in 954. The last abbot surrendered Feb. 9, 1538. Geffrey Barbar, who died in 1417, founded the Hospital of St. Helen, which was refounded under the name of Christ's Hospital by Sir John Mason, May 19, 1553. The free grammar school was instituted by John Roysse, citizen and mercer of London, in 1563. The market house was erected in 1678.

ABINGDON LAW.—On the capture of this town by the Earl of Essex, May 25, 1644, a garrison was placed in it by the Parliamentarians. During the various attempts made by the Royalists to regain this important place, a singular custom is said to have prevailed; and from this the term "Abingdon Law" arose. The cruel practice of the garrison was to hang all the Irish prisoners without trial; and many Englishmen suffered, either by design or from accident.

ABIPONIANS.—This warlike aboriginal tribe of South American Indians, who formerly inhabited the province of Chaco, in the centre of Paraguay, have since been driven southwards by the Spaniards. The Jesuits appear to have made attempts for their conversion as early as 1610, but little is known of them until 1641, when they are mentioned in the annals of Paraguay as a nation remarkable for skill in horsemanship, whereby they carried on successful warfare with the Spaniards, and the native American tribes. A peace, concluded in 1747, put an end to these incursions for a time, but their hatred of their European oppressors continually broke through every restraint, and led to ceaseless quarrels. In 1749 they received a missionary visit from Martin Dobrizhoffer, a German Jesuit, who laboured among them or in the adjacent country for 18 years, and established the colony of San Carlos and the Rosary, Nov. 24, 1763. This settlement was attacked by 600 savages, Aug. 2, 1765, when its founder received some severe wounds in defending his house and church. In 1767 Dobrizhoffer returned to Europe, and published an account of his mission in 1784. After his departure the bulk of the tribe migrated eastward, and established the colony of Las Garzas in 1770.

ABJURATION OATH.—The last act (13 and 14 Will. III. c. 6) to which the royal assent was given by William III. on his deathbed, March 2, 1702, required all persons in office, members of the universities above 18, members of the legal profession, and schoolmasters, peers, and members of parliament, to take the oath abjuring the claims of the Stuarts. The oath was altered in the reign of Queen Anne, and put into a new form by 6 Geo. III. c. 53 (1766). It was changed for Roman Catholics by 31 Geo. III. c. 32 (1791), and by the Roman Catholic Relief Act, 10 Geo. IV. c. 7 (April 13, 1829). By the statute 21 & 22 Vict. c. 48 (July 23, 1858), one oath was substituted for the three oaths of Abjuration, Allegiance, and Supremacy.

ABJURATION OF THE REALM was an engagement, on oath, to quit the realm, and never return to it without the king's license. The ancient common law of England allowed a person who had committed any felony, except treason and sacrilege, to make such an oath before the coroner within 40 days after taking sanctuary, under the penalty of death by hanging if he broke it, unless he was a clerk; in which case he was allowed benefit of clergy. Abjuration underwent several modifications in the reign of Henry VIII., and was

abolished as a privilege, together with that of sanctuary (*q. v.*), by 21 James I. c. 28, s. 7, (1624). By 35 Eliz. cc. 1 and 2 (1593) Roman Catholics and Protestant Dissenters convicted of having refused to attend the service of the Church of England, or of having been present at any assemblies, conventicles, or meetings, under colour or pretence of any exercise of religion, were to be imprisoned until they conformed, and if they failed to do so in three months might be required to abjure the realm. From these acts Protestant Dissenters were exempted in 1689 (*see* ACT OF TOLERATION), but Popish recusants not until 1791, by 31 Geo. III. c. 32.

ABO (Finland.)—This city, built by Eric X., King of Sweden, 1157, was taken from the Swedes by the Russians in 1713 and 1808; and was, with the whole of Finland, to the Tornea, finally ceded to Russia by the treaty of Fredrickshamn (*q. v.*), Sep. 17, 1809. A fire occurred here Aug. 22, 1775, by which above 200 houses and 15 mills were consumed, and some lives lost; and another Sep. 4, 1827, destroyed 780 buildings, with the university, founded in 1640. Abo, made a bishopric in 1158, became an archbishopric July 20, 1817.

ABO (Treaty) between Russia and Sweden, Aug. 17 (O.S. 6), 1743, terminated the war commenced in 1741. Sweden confirmed in perpetuity to Russia the territory ceded by the 4th & 8th articles of the treaty of Nystadt (Aug. 30, 1721), consisting of Livonia, Esthonia, Ingria, part of Carelia, together with the eastern portion of Finland, making the river Kymmene the boundary between the two states; whilst Russia relinquished to Sweden the remainder of her conquests in Finland.

ABOLITIONISTS.—A party in the northern portion of the United States opposed to slavery. The "American Anti-Slavery Association," having for its object the unconditional emancipation of the slaves, established at Philadelphia, grew out of a smaller society formed at Boston, Jan. 1, 1832. A new association arose in 1839, called the American and Foreign Anti-Slavery Society, and a congress of abolitionists from various countries assembled at a meeting of the "Society for the Extinction of the Slave Trade, and for the Civilization of Africa," held at Exeter Hall under the presidency of Prince Albert, June 1, 1840. The Christian Anti-Slavery Association was established at Chicago, in July, 1851.

ABOMEY (Africa).—This town, the capital of the kingdom of Dahomey, was besieged by Jacoodonon, King of the Foys, who captured and murdered its king, Da, about 1625. It was visited by Norris in 1772 and by Duncan in 1845.

ABORIGINES, or ABERRIGINES.—Some writers consider the term to represent a colony of Greeks, who settled in Italy long before the Trojan war. Niebuhr states that the name means the inhabitants of the country from the beginning, answering to the Greek *autochthones;* and Sir G. C. Lewis declares the obvious Latin etymology of *aborigines* to be the true one, adding, "The name was applied to a primitive Italian race, at a comparatively early date; but there is no ground for adopting the view of Dionysius, which makes it a national appellation, and identifies it with the people having an historical existence." Hence the later application of the term to the primitive inhabitants of any country.

ABOUKIR (Egypt).—The Turks were defeated here by the French, under Napoleon I., July 25, 1799. An English army, under Abercrombie, effected a landing near this place, March 8, 1801, and compelled the French to retreat. (*See* NILE.)

ABRAHAM (Æra), so called from the Patriarch Abram, commenced, according to the best authorities, Oct. 1, 2016 B.C.

ABRAHAM, HEIGHTS OF (Battle).—(*See* QUEBEC.)

ABRAHAM-MEN, beggars, who roamed about the country, on the dissolution of the religious houses in the 16th century. They were also called "Tom of Bedlam's Men." The term "to sham Abraham" is supposed to have been derived from the tricks of these vagrants.

ABRAHAMITES, ABRAHAMIANS, or IBRAHIMIAH.—A sect of heretics, the followers of one Abraham of Antioch, called by the Arabs Ibrahim, who attempted to revive, towards the close of the 8th century, the errors of the Paulicians (*q.v.*). Several Syrians were seduced; but Cyriacus, Patriarch of Antioch, vigorously opposed the new heresy, and it was extinguished at the commencement of the 9th century.

ABRAHAMITES.—An order of monks were thus named. They rose in the 9th century, and were exterminated, on account of their idolatry, by the Emperor Theophilus (circ. 835.) —A modern sect of Abrahamites was discovered in Bohemia in 1782. They professed the religion of Abraham before his circumcision, and held various peculiar opinions: some were Jews by birth, others Protestants, and a few Roman Catholics. They are said to have been called Abrahamites from their doctrine, and Adamites from their real or supposed practices. Joseph II., Emperor of Germany, in 1783, banished a large number of these sectaries to Transylvania and Temeswar, on account of their obstinate refusal to incorporate themselves with one of the religions tolerated by law. These Abrahamites are sometimes called Deists, or Nihilists.

ABRANTES (Treaty).—Disgusted at the provisions of the treaty of Badajos (*q. v.*), concluded between Portugal and Spain, June 6, and ratified June 16, 1801, Napoleon I. overran the former kingdom. The war was brought to a close by the treaty of Abrantes, signed Sep. 29, 1801, by which Portugal agreed to shut its ports against England, relinquished one half of Guiana to France, making the river Carapanatuba the boundary between the possessions of the two states in that part of the world. The commerce of France was to be placed on the same footing as that of the most favoured nations; and, by a secret article, Portugal agreed to pay £800,000 for the immediate evacuation of the country by the French troops. This treaty having been ratified at Madrid, is sometimes named after that city.

ABRUTUM (Battle).—(*See* FORUM TREBONII.)

ABSENTEE TAX.—Parry (Parliaments, &c., of England, p. 142) notices a petition on Irish absenteeism presented to Parliament in 1380,

during the reign of Richard II. Complaints were frequently made on this subject; and, in the reign of Henry VIII., the estates of several non-resident landlords were seized. A curious debate occurred in Parliament (Saturday, Dec. 12, 1601) respecting a proposal to fine absentees from church 12 pence every Sunday. It was to be levied by a distress warrant from a justice of the peace. The proposal was rejected, the numbers being, ayes 105, noes 106. Some member called on the Speaker to give his vote for the bill; but Cecil said, "The Speaker hath no voice; and, though I am sorry for it, the bill is lost, and farewell to it." A bill, entitled "An Act whereby certain of the Nobility of this kingdom of *Ireland*, dwelling within *England*, or elsewhere out of this realm, are made liable unto certain charges within this kingdom," was read a third time in the Irish Parliament, and passed into law, Feb. 17, 1634. In 1715 a tax of 4*s.* in the pound was levied on all profits, fees, pensions, &c., derived from Ireland, in all cases where the recipients did not reside in that country six months in the year. The crown reserved the right of giving leave of absence. The tax ceased in 1753, and attempts at its reimposition were tried, but without success, in 1773 and in 1783. By the Irish Act of Parliament, 40 Geo. III., c. 4 (March 24, 1800), a similar tax was imposed, but it was removed by the English Act, 41 Geo. III. c. 100 (July 2, 1801).

ABSENTEES (Parliament of), held at Dublin, May 10, 1517 (8 Hen. VIII.), is mentioned in letters patent, dated 29 Hen. VIII.

ABSOLUTION, in the early Christian Church, simply signified reconciliation with the Church and restoration to its communion. During the 2nd century it was granted by bishops in presence of the whole congregation, after the penitent had publicly entreated for pardon, and it was never permitted to those who had lapsed a second time into crime. The doctrine of the priest's authority to pronounce absolution on the part of God dates from the 3rd century, and the elevation of the ordinance into the list of sacraments is first mentioned by Otho, Bishop of Bamberg, in 1124. Absolution *ad cautelam*, or conditional absolution granted to an excommunicated person during his appeal against the sentence, was first granted by Cœlestine III. in 1195. The indicative form, "I absolve thee," instead of "Christ absolve thee," was first used in the 12th or 13th century, and was warmly defended by Thomas Aquinas about the year 1250. The Council of Trent, Dec. 13, 1545 to 1563, directed the use of the form "I absolve thee from all thy sins in the name of the Father, and of the Son, and of the Holy Ghost. Amen."

ABSTINENCE.—Many cases of extraordinary cures effected, and of a great age attained, by use of spare diet, are mentioned by different writers. Abstinence from particular meats was enjoined upon the Jews by the Divine law, and many of the early Christians adopted a similar practice. The Roman Catholic Church has selected special seasons and days on which particular kinds of abstinence are strictly enforced. Among the primitive Christians in the East, several hermits, who retired to the deserts, and lived upon bread and water, and even roots, are said to have attained an extraordinary age. (*See* LONGEVITY.)

ABSTINENTS, ABSTINENTES, or ABSTAINERS, heretics who appeared in France and Spain at the end of the 3rd or early in the 4th century, during the persecutions of Diocletian and Maximian. They condemned marriage, and the use of flesh and wine: some of their opinions were borrowed from the Gnostics and Manichæans. Baronius believes these heretics to have been identical with an Egyptian sect called the Hieracians (*q. v.*) or Hieracites, that arose at the same period, and held similar opinions.

ABYDOS, an ancient town on the Asiatic shore of the Hellespont, or Dardanelles, is said to have become the seat of a Milesian colony B.C. 715. Xerxes constructed a bridge of boats from this place to the European side of the Hellespont, over which his immense army passed into Greece, B.C. 480. It is celebrated from the story of Leander, who, being in the habit of swimming from Abydos to the other side of the Hellespont to visit Hero, was at last drowned. Lord Byron, who frequently performed this feat, ridicules the story. This town must not be confounded with another of the same name in Egypt.

ABYDOS (Sea-fight), between the Athenian and the Peloponnesian fleets, in Aug. 411, B.C. The former were victorious.

ABYDOS (Tablet of), containing a genealogy of the early kings of Egypt, was found, in 1818, by Mr. W. Bankes, on an interior wall of a building at Abydos, an ancient city of Upper Egypt. The tablet, which has been deposited in the British Museum, consists of three compartments, and contains 26 shields of the predecessors of Rameses the Great.

ABYSSINIA (Africa), part of the ancient Ethiopia, of which the capital was Auxume, or Axum (*q.v.*). The Abyssinians had a tradition that Cush, Noah's grandson, was their progenitor, and that Axum was built in the time of Abraham. The fragments of statues collected by Bruce (Travels, vol. ii. p. 303) are regarded as proofs that the Abyssinians embraced Sabaism, or the worship of the heavenly bodies, a superstition into which Noah's descendants fell. The Abyssinians were powerful in the 6th century, about which period Yemen was subjugated by them. In 925 a Jewess, named Sague, subverted the native dynasty, and destroyed Axum. The kingdom was restored in 1255 by the Emperor Iquon Amlaq. Little is known of its subsequent state until the 16th century, when the Portuguese assisted the Abyssinians against a powerful enemy. The introduction of Roman Catholicism, and the various struggles to which it led, are related under ABYSSINIAN CHURCH. The country was visited by Bruce during his exploration of the source of the Nile in 1769. In 1805 Lord Valentia and Mr. Salt travelled in the country, and in 1810 Mr. Salt arrived there as an envoy of the British Government. The Rev. S. Gobat and the Rev. C. Kugler, despatched by the Church Missionary Society, landed at Massowa in 1829. The following year Mr. Gobat visited Gondar, the capital, which had

not been entered by a European since the time of Bruce. Dr. Rüppell, the eminent German naturalist, who arrived at Massowa in Sep., 1831, and made two journeys into Abyssinia, added much to European knowledge of the resources of the country, which was explored by Combes and Tamisier from April, 1835, to June, 1836. Subsequent expeditions were made by Dufey and Aubert in 1837, by the brothers D'Abaddie, Antoine, and Arnault in 1838, and by Lefevre, Dillon, and Petit, and M. Blondeel von Koelmbroeck, the Belgian consul in Egypt, in 1839. Isenberg and Krapf, missionaries from the Church of England, visited the country from the south in 1839, and remained till April, 1843, when they were expelled by the King of Shoa, and the mission was abandoned. Rochet also entered from the south in Sep., 1839, and was followed by Airston and Lieut. Kielmaier, who both died in 1840. Dr. Beke, who visited Abyssinia in Nov., 1840, and Sir W. C. Harris, who was despatched on a political mission in 1841, remained till Feb., 1843, and made many important geographical discoveries. Other expeditions were made by Johnston and by Even in 1841, by De Goutin, the French consul at Massowa, who visited Gondar in 1842 to ascertain the possibility of establishing a trade between that place and France, and by Bell and Plowden in May, 1843. Plowden, the British consul at Massowa, concluded a treaty of friendship and commerce with Ras Ali at Gondar, Nov. 2, 1849, by which it was agreed that ambassadors should be mutually sent and received by the English and Abyssinian courts. Ras Ali was deposed in 1854 by one of his sons-in-law, who was subsequently crowned emperor under the name of Theodore, and refused to carry out the provisions of the treaty of 1849. Mr. Plowden, having been wounded and made prisoner by the rebels, died immediately after his release, and was avenged by King Theodore, who defeated 3,000 of his opponents under their leader Gerat, on the banks of the Taccazy, Oct. 31, 1860, and, in requital, massacred in cold blood 1,500 prisoners, whose wives and children he sold into slavery. Capt. Cameron, appointed consul in the place of Mr. Plowden in 1861, proceeded in 1862 to Massowa, bearing presents from Queen Victoria to Theodore, who replied by a letter which was received in England Feb. 12, 1863. No notice having been taken of this despatch, the king, towards the end of 1863, arrested Capt. Cameron, with several other Englishmen, whom he kept in cruel bondage. A reply to his letter, sent May 26, 1864, failed in procuring their release, because it was transmitted through Mr. Rassam, the assistant English resident at Aden, and a subject of Turkey, with which country Abyssinia was at variance. A debate upon the subject took place in the House of Commons, June 30, 1865. Dr. Beke left London on a mission to procure the release of the captives, Nov. 4, 1865.

ABYSSINIAN ÆRA.—(*See* MUNDANE ÆRA OF ALEXANDRIA.)

ABYSSINIAN CHURCH, had its origin, according to the best authorities, about 330, when Frumentius was ordained Bishop of Axum, by Athanasius, Patriarch of Alexandria. Some writers are of opinion that the Abyssinians were first converted in the apostolic age, by the eunuch of Queen Candace, Sep., 37. (Acts viii. 27—39.) The Abyssinians formed a branch of the Jacobite or Coptic Church, holding the Monophysite doctrine of one incarnate nature; into which heresy they fell in the 6th century. Pope Eugenius IV. signed a decree for the union of the Abyssinian Church with that of Rome, at the Synod of Florence, Feb. 4, 1441. This was not carried out, and Abyssinia continued almost entirely unknown to Europeans until 1484, when Diego Cam ascended the Zaire, and learned from the people of Congo that the country to the south of Upper Egypt was inhabited by a Christian nation. On his return to Portugal, he communicated this intelligence to John II., who resolved to establish a Roman Catholic mission; but it failed, the missionaries being ignorant of the African languages. He afterwards sent Pedro Cavilham, who entered Abyssinia in 1490. Two more envoys arrived in 1507; and in 1509 the Empress Helena, regent during the minority of the infant Emperor David, wrote letters, soliciting the alliance and friendship of the King of Portugal. These overtures were received at Lisbon in 1513, and resulted in a special embassy, which reached Abyssinia in 1520. Zaga Zaba arrived in Portugal, as ambassador from the court of Abyssinia, in 1527, bearing letters to the king and to the Pope. After a delay of five years, he proceeded to Rome, and had an audience with the pontiff, Jan. 29, 1533, after which he returned to Lisbon, and wrote a statement of the religious and political state of his country, dated April 24, 1534. Meanwhile King David of Abyssinia, being pressed by neighbouring Mohammedan nations, had caused John Bermudes, a Portuguese, resident at his court, to receive consecration as a bishop from the abuna or patriarch of the National Church, and had despatched him to Europe to entreat the aid of the Christian princes. Bermudes arrived at Rome in 1538, and, after proceeding to Lisbon, returned to his own country in 1539. A Portuguese force of 400 men, under Don Christopher de Gama, son of the famous Vasco, entered the country to assist the sovereign, July 9, 1541, and, after some reverses, their leader having been captured and executed, eventually established him firmly on his throne. Disputes soon arose, however, in consequence of the emperor's refusal to adopt the Romish faith and worship, and Bermudes, whose importunities had become distasteful, was ejected from his office, and imprisoned. A Jesuit mission, under Father Rodrigues, arrived at the emperor's court May 26, 1555. A series of religious disputes ensued, which resulted in the excommunication of the entire nation, by Andrew Oviedo, the Jesuit Bishop of Hierapolis, Feb. 2, 1559. The mission having failed in establishing Romanism, was recalled by a bull, dated Feb. 1, 1560. A second Jesuit mission was established in 1603, by Peter Pays, who intrigued with all the parties that successively attained influence, until the emperor was induced to make a

formal statement of submission to the Pope, Dec. 11, 1624. This concession, however, was exceedingly unpopular with the nation, who compelled the Roman patriarch to retire, in 1633. In 1646 the Propaganda Society sent a mission of Capuchins, who were all murdered by order of the emperor. No further effort was made till 1750, when the same body sent three Franciscan friars, who were also expelled by the popular voice. In 1809 Mr. Salt, having travelled in Abyssinia, in behalf of the English Government, recommended the establishment of a Protestant mission, which was at length effected, in 1827, by Dr. Gobat, who was, however, compelled to withdraw, in 1842, in consequence of the opposition of the natives and Roman Catholic priesthood. Mosheim states that the Ethiopic Church continues to receive her bishop from Alexandria, and is dependent upon it. The religion of the Abyssinians is represented as a compound of Christianity, Judaism, and Heathenism. They practise circumcision, believe in sorcery and evil spirits, and make use of amulets. They pray to the Virgin Mary, and for the dead, though not holding the Romish doctrine of purgatory, and do not in general believe in transubstantiation. They acknowledge their emperor as the head of the church, but the abuna, or patriarch, is the controlling power. They agree with the Greek Church in maintaining the procession of the Holy Ghost from the Father alone.

ACACIANS.—The followers of Acacius, surnamed Luscus, or Monophthalmus, because he had but one eye, Bishop of Cæsarea, 340—365; and the followers of Acacius, Patriarch of Constantinople, 471—489, were known by this name. The former neither held, with the Arians (*q. v.*), that Christ was a created being, nor with the Semi-Arians (*q. v.*), that he was of like substance, but simply that he was like the Father. His doctrines were condemned at the Council of Sardica, 347, and at the Council of Seleucia, Sep. 27, 359.—Acacius, Patriarch of Constantinople, sided with the Emperor Zeno, whose Henoticon (*q. v.*), or Edict of Union, intended to appease the feud between the rival churches of Constantinople and Alexandria, was issued in 482, and was drawn up, it is supposed, by Acacius himself. The edict was rejected by Felix III., in 483, and Acacius himself was excommunicated for obstinate communion with heretics (July 28, 484). Acacius in his turn ordered that Felix III., Bishop of Rome, should be erased from the list of bishops in communion with the East (Aug. 1, 484). "The ban of Rome," as Milman says, "was encountered by the ban of Constantinople." Acacius persisted in his refusal to submit to Rome, and died in 489. His supporters were called Acacians. Other sects of heretics were thus designated.

ACADEMIA (Athens), described by Diogenes Laërtius as a suburban place of exercise planted like a grove, and said to be thus called from an ancient hero, named Hecademus. In this place Plato formed his school (B.C. 388), and was succeeded by his nephew Speusippus (B.C. 347). The trees composing the grove were cut down by Sylla, during the siege of Athens, (B.C. 86). Others were subsequently planted, and the Academia preserved something of its ancient repute, as late as the reign of the Emperor Julian (A.D. 193—211). From this term the modern word academy is derived.

ACADEMY.—The custom for learned men to form themselves into associations called, after the ancient schools, academies, originated in Italy in the 14th century, and gradually extended over Europe. The Society of St. Luke, founded at Florence by the Venetian painters, in 1345, is the earliest. Hallam says (Lit. Hist. vol. i. pt. i. ch. ix.), "Italy in the 16th century was remarkable for the number of her literary academies; institutions which, though by no means peculiar to her, have in no other country been so general or so conspicuous." The Italian academies of that period are remarkable for the ridiculous titles, or, as Hallam terms them, "names humorously quaint," by which they were known. Florence had its academy of "Bran," or "the Sieve;" Perugia, of "the Insensate;" Genoa, of "the Sleepy;" Sienna, of "the Blockheads;" and Viterbo, of "the Obstinates." Disraeli's theory (Curiosities of Lit. ii. 489) is, that "the invention of these ridiculous titles for literary societies was an attempt to throw a sportive veil over meetings which had alarmed the papal and the other petty courts of Italy, and to quiet their fears and turn aside their political wrath. They implied the innocence of their pursuits by the jocularity with which the members treated themselves, and were willing that others should treat them." The date of the establishment of the most celebrated academies is given under the names of the places in which they flourished. Many Italian towns possessed several, and Tiraboschi furnishes full details on the academies of that part of Europe.

ACADIA (North America).—Discovered by John Cabot, in 1497. The French settled here in 1604, and came into frequent collision with the English settlers in Virginia. In 1621 Acadia was granted by charter to Sir William Alexander, and its name changed to NOVA SCOTIA (*q.v.*).

ACAPULCO (Mexico).—During the Spanish rule in America, a galleon, laden with specie, &c., was sent every spring from Acapulco to Manilla, returning in the autumn with a costly freight of a different kind. Commodore, afterwards Lord Anson, intercepted one of these vessels, worth £313,000, July 1 (O. S. June 20), 1743. Capt. Hyde Parker captured another, valued at half a million, Oct. 31, 1762, during the siege of Manilla. An earthquake that took place here Dec. 4, 1852, overthrew the greater part of the town, with most of the chief buildings.

ACARNANIA.—This province of ancient Greece, according to tradition, received its name from Acarnan, son of Alcmæon, who settled at the mouth of the Achelous. The Corinthians are said to have founded several towns on the coast in the middle of the 7th century B.C. The Acarnanians lived in villages which were united in a political league. Little, however, is known respecting its constitution. The Acarnanians first came into prominent notice about the time of the Peloponnesian war.

They espoused the cause of the Amphilochians expelled from Argos Amphilochicum by the Ambraciots, B.C. 432, and both applied to the Athenians for aid.

B.C.
432. The Athenians defeat the Ambraciots and drive them from Argos Amphilochicum.
430. The Ambraciots are foiled in an attempt to recover Argos Amphilochicum.
429. The Ambraciots induce the Spartans to aid them in an attack upon Acarnania, but are defeated.
426. The Acarnanians defeat the Ambraciots and their allies at Olpæ and Idomene. Peace for a hundred years is concluded between Acarnania and Ambracia.
391. Agesilaus, King of Sparta, invades Acarnania.
390. The Acarnanians submit to the terms imposed by Agesilaus.
343. The Athenians send an expedition against the Acarnanians, who support the cause of Philip II. of Macedon.
243. The Acarnanians invade Ætolia, and are compelled to retire.
239. The Ætolians invade Acarnania.
218. The Ætolians, who had conquered a considerable portion of Acarnania, cede it to Philip V., in order to obtain peace.
200. The Acarnanians support Philip V. against Rome.
197. The Acarnanians submit to Rome.
145. Acarnania subject to Rome.

ACBATALBACAR (Battle).—Mohammed Ben Hixem, at the head of a united Moslem and Christian force, defeated Suleiman Ben Alkahem and his Africans at this place, near Cordova, in 1009.

ACCENTS were introduced about B.C. 200, by Aristophanes, a grammarian of Byzantium. Burney states that they were principally confined to prosody, only being used in music occasionally. The practice of using accents in the texts of the old Greek writers was declared to be a modern innovation during a discussion at a meeting of the Philological Society of London, held May 25, 1855.

ACCEPTANTS, or CONSTITUTIONISTS.—In 1713 Clement XI. issued his famous constitution or bull Unigenitus (*q. v.*) condemning as heretical 101 propositions selected from the commentary of Quesnel. This triumph of the Jesuits over the Jansenists caused great agitation in France, and the two parties were called, the *Constitutionists* or *Acceptants*, and the *Appellants* or *Recusants*. The latter, who appealed to a general council, were imprisoned, and suffered persecution. The death of Louis XIV. caused a temporary cessation of the strife, and the Duke of Orleans, as regent, induced the Recusant bishops to accept the bull, with certain modifications. Most of them consented to do so for the sake of peace (1720); but the Appellants were again oppressed and persecuted (1723). The Unigenitus was made national law (1730), and the Appellants continued their resistance.

ACCLIMATISATION SOCIETY.—This association, for the "acclimatisation of animals, birds, fishes, insects, and vegetables, within the United Kingdom," was established at a meeting held June 26, 1860. Similar societies have since been established in New South Wales, New Zealand, and other parts. The French Société Impériale d'Acclimatation was founded by Geoffroy de St. Hilaire in 1854. The "Jardin Zoologique d'Acclimatation" was opened in 1860.

ACCORDION.—This musical instrument was first introduced into England from Germany about 1828.

ACCOUNTANT-GENERAL.—This officer of the Court of Chancery was first appointed by 12 Geo. I. c. 32 (1726)—an "Act for securing the moneys and effects of the suitors;" and the office was abolished by 5 Vict. c. 5, s. 15 (Oct. 15, 1841).

ACCUSERS, FALSE.—The ancient Romans punished false accusers by casting them headlong from the Tarpeian rock; and by a subsequent law (Lex Remmia), they were ordered to be burned in the face. By the law of Valentinian and Gratian, in the Theodosian code (*q. v.*), offenders of this kind, "against men's fame and reputation, against their fortunes, and against their lives," were condemned to the same punishment as that to which the person falsely accused would have been subjected had he been convicted. Those who endeavoured by false accusation to deprive other men of their property, were ordered to be prosecuted to the last degree, with confiscation and death. The early ecclesiastical laws were severe on this point. The Councils of Vannes (465) and Agda, in France (Sep. 11, 506), imposed a penance upon them, and the first Council of Arles (314) obliged them to do penance all their lives. In the earlier periods of English, as well as of German history, the accuser was obliged to prove the crime, or suffer the same punishment the accused would have undergone had he been convicted; and a similar law was in force in the time of Henry III. They were also branded in the time of Henry VIII., and many severe punishments are recorded in our statute-book.

ACEPHALI.—The term was first employed by ecclesiastical writers, and applied to those who followed neither Cyril, nor John of Antioch, in the disputes at the Council of Ephesus (third General), June 22 to July 31, 431. As a natural consequence, it was used to describe the various divisions of the Eutychians, who denied the property of two substances in Christ, and contended that there is but one nature in his person. They resisted the decision of the Council of Chalcedon (fourth General), in 451, and were, as Bingham says, "called *Acephali*, that is, *without head*, because the first authors of the sect at Alexandria separated from their bishop and held conventicles, and gave baptisms in private houses." The heresy, revived in 463, was condemned at the Council of Constantinople, in 536. The term has been applied to various sects, the members of which followed no particular leader, and came to be applied to a body of levellers in this country, in the time of Henry I. Cowel, with reference to these men, remarks, "Those are called acephali who were the levellers of that age, and acknowledged no head or superior."

ACHÆAN LEAGUE.—This celebrated confederacy, originally formed between twelve cities of Achaia, was dissolved by the factions that prevailed soon after the death of Alexander III., B.C. 323. Four of the principal cities of Achaia,—Dyme, Patræ, Tritæa, and Pharæ, united for its restoration, B.C. 280; Ægium and Bura joined B.C. 275; Cerynea B.C. 274; and Leontium, Pellene, and Ægira soon after. Aratus formed the idea of extending it to the other Grecian states, and, having liberated

Sicyon, persuaded his fellow-citizens to join the League, B.C. 251.

B.C.
246. Aratus first appointed general of the League.
243. Aratus takes Corinth, and annexes it to the League.
242. Megara and other Grecian cities join the League.
239. Megalopolis joins the League.
235. Ægina joins the League.
229. Argos joins the League.
227. A struggle, called by Polybius the Cleomenic war, breaks out between the Achæan League and Sparta.
226. The Achæans are defeated by Cleomenes III., at Ladocea.
221. Cleomenes III. is defeated by the Achæans, assisted by Antigonus Doron of Macedon, to whom they had applied for aid, at the battle of Sellasia (*q. v.*).
220. A contest called the Social War breaks out between the Ætolian and the Achæan Leagues.
217. Peace is concluded at Naupactus.
213. Death of Aratus.
208. Philopœmen general of the League.
207. Philopœmen effects important reforms in the League, and defeats the Spartans at Mantinea (*q. v.*).
198. The League concludes an alliance with Rome.
192. Philopœmen unites Sparta to the League.
191. The whole of the Peloponnesus is included in the Achæan League.
183. The Messenians separate from the League, but again submit. (*See* MESSENIA.)
167. One thousand Achæans are carried off to Rome.
150. Rome declares war against the Achæan League.
147. Mummius defeats the Achæans at the battle of Leucopetra.
146. The Achæan League is destroyed, and the whole of Southern Greece made a Roman province under the name of Achaia (*q. v.*).

Freeman (History of Federal Government, vol. i. p. 713) gives the following list of the cities of the Achæan League, with the dates of their accession :—

B.C.	
280	Patræ.
280	Dymê.
CIRC. 279...	Tritæa.
CIRC. 279...	Pharæ.
275	Aigion.
275	Boura.
275	Keryneia.
—	Leontion.
—	Aigeira.

ACHAIA, or ACHÆA, an ancient Grecian state, comprising a narrow district of the northern Peloponnesus. According to tradition, it was first peopled by a Pelasgian tribe, expelled by the Ionians. Soon after the Dorian migration, the Achæans, driven from Argos and Lacedæmon, settled in this part of Greece, which, after them, was called Achaia (circ. B.C. 1104). Monarchical institutions are said to have prevailed for some time, and upon their abolition the territory of Achaia was divided amongst twelve cities. The Achæans kept aloof from the other Grecian states, and formed a league, which met first at Helice, and after this city had been swallowed up by the sea, B.C. 373, at Ægium. They fought with the Athenians and the Bœotians against Philip II. at the battle of Chæronea (*q. v.*), Aug. 7, 338 B.C., and were allied with the Spartans against Macedon, B.C. 330. Four cities, Patræ, Dyme, Tritæa, and Pharæ, renewed the ancient league B.C. 280. (*See* ACHÆAN LEAGUE.) The whole of Greece received the name of Achaia when it was made a Roman province, B.C. 146.

ACHAIA (Principality), founded in 1205 by William of Champlitte, who, with his band of followers, subdued one half of the Peloponnesus before 1208. He left it in charge of Geffrey Villehardoin, his bailly, who succeeded to the throne in 1210. He was followed by Geffrey II. in 1218, and William in 1246. Achaia then became a fief of the crown of Naples, and after undergoing a variety of vicissitudes, terminated under Centurione, in 1430, having existed 225 years. The succession was, however, several times broken before that date. Finlay (Mediæval Greece and Trebizond, p. 502) gives the following chronological list of the princes of Achaia and Morea :—

A.D.
1205. William of Champlitte.
1210. Geffrey I. Villehardoin.
1218. Geffrey II.
1246. William.
1277. Isabella, married thrice.
1. Philip, son of Charles of Anjou, King of Naples died 1278.
2. Florent of Hainault, 1291–1297.
3. Philip of Savoy, 1301–1311.
1311. Maud of Hainault, married thrice.
1. Guy II., Duke of Athens, who died 1308.
2. Louis of Burgundy, 1313–1315.
3. Hugh de la Palisse, 1316.

Claimants of the Principality :—

1317—1324. John, Count of Gravina, pretended husband of Maud of Hainault.
Eudes IV., Duke of Burgundy, under his brother's will.
1324—1332. Philip of Tarentum, as lord-paramount, in virtue of the forfeiture of Maud, and by purchase from Eudes IV.
1332—1364. Robert, titular Emperor of Romania.
1364—1387. Mary of Bourbon, widow of Robert.
Louis, Duke of Bourbon, her nephew, died in 1410.

Suzerains or Lords-paramount of Achaia :—

The Latin Emperors of Romania, until Baldwin II. ceded his rights to Charles of Anjou, King of Naples, in 1267.
1267—1285. Charles of Anjou.
1285—1294. Charles II., King of Naples.
Charles II. ceded his rights to his son, Philip of Tarentum, who married Catherine of Valois, titular empress.
1294—1332. Philip of Tarentum.
1332—1346. Catherine of Valois, by grant from her husband.
1346—1364. Robert, titular emperor and reigning prince of Achaia.
1364—1373. Philip III., titular emperor.
1373—1383. James de Baux.

* Corinth was out of the League from 223 to 196, and Megara from 223 to 204.

ACHEEN, or ATCHEEN.—This kingdom, in Sumatra, was first visited by the Portuguese in 1509, and by the English in 1602. A factory was established here by the East India Company in 1659, and a commercial treaty was concluded by Sir Stamford Raffles in 1819.

ACHONRY (Sligo).—The seat of an Irish bishopric, one of the most ancient in that country, formerly called Achad-Chaoin and Achad-Conair. The church is said to have been founded by St. Finian, Bishop of Clonard (*See* MEATH, Bishopric), about 530, on a site granted by the Lord of Leney, or Luigny, by which name the bishops are known in the earlier accounts. St. Finian's friend and disciple, Nathy, was the first bishop. In 1607 the Archbishop of Cashel held this see *in commendam*, and it was held with Killala from 1623. According to the provisions of 3 & 4 Will. IV. c. 37 (Aug. 14, 1833), Achonry and Killala were united with Tuam.

ACHROMATIC TELESCOPES. — Invented by John Dollond, of London, in 1758. Newton himself despaired of constructing these glasses. The right of priority is by some said to belong to a man whom Humboldt terms "the mysterious Chester Moore, of Moore Hall, Essex." He is supposed to have invented them in 1729.

ACLEA (Battle), now OCKLEY, or OAK-PLAIN, in Surrey, where Ethelwulph, King of Wessex, and his son, Ethelbald, defeated the Danes, in 851.

ACÆMETÆ, or Sleepless, sometimes called Watchers.—An order of monks established at Constantinople in the beginning of the 5th century. They performed divine service day and night without intermission, for which purpose they were divided into three classes, each of which took its share of duty. They were greatly venerated, and founded many monasteries. A Roman noble, named Studius, joined this fraternity, and erected a famous monastery, called after him, *Studium*, and the monks Studitæ. Afterwards becoming favourers of Nestorius, their credit declined.

ACOUSTICS, or the science of sound, was known, though imperfectly, at a very early period. Pythagoras, B.C. 540, and Aristotle, B.C. 342, understood the mode in which sound was transmitted through the air. Kircher was the first to show, says Beckmann (vol. i. p. 94), that "Alexander the Great had a prodigious large horn, with which he could assemble his army at the distance of 100 stadia, or eight Italian miles." Roger Bacon, in the 13th century, was the first who investigated this science experimentally. He was followed by Galileo, in the 17th century, and others. Newton completed his mathematical demonstrations in 1700. The velocity of sound was ascertained by Cassini and Maraldi, whose experiments were conducted during the winter of 1738 and 1739. Other experiments made by Euler, and by Lagrange, in 1759, added greatly to the knowledge of this science, which was placed on an independent basis by Chladni, who published his discoveries on vibrations in 1809. The investigations of Moll and Van Beek into the velocity of sound were made in 1823.

ACRE (Syria) or ST. JEAN D'ACRE, anciently Accho, called by the Greeks Ptolemais, a fortified city and seaport, famous for the sieges it has sustained, belonged originally to the Phœnicians, and, after changing masters several times, fell under the Roman yoke in the time of Claudius. It was taken by the Saracens in 638; by Baldwin I., after a siege of 20 days, in 1104; and by Saladin in 1187. Its capture by Richard I. was the great achievement of the first crusade. The siege commenced in August, 1189, and terminated with the fall of the city, Friday, July 12, 1191; soon after which it received the name of St. Jean d'Acre, and was given to the Knights Hospitallers (*See* CRUSADES). The Mamelukes gained possession May 18, 1291, and the Turks in 1517. Sir Sidney Smith defended it against Napoleon I., and compelled him to retreat, after a siege of 61 days, May 20, 1799. Ibrahim Pasha captured it May 27, 1832; it was retaken by an English and Austrian fleet Nov. 3, 1840; and it has since remained in the possession of the Turks.

ACRE OF LAND.—This measure existed from a very early period, although from a passage in the Battle Abbey Register, compiled by order of William I. soon after the battle of Hastings, it appears to have expressed no uniform quantity. It was defined by the "Statutum de Admensuratione Terrarum," 33 Edw. I., stat. 6 (1305); which ordered the acre, when 10 perches in length, to be 16 in breadth, and when 80 perches in length to be 2 in breadth, the elementary acre being 40 perches long by 4 wide. By the act for establishing uniformity of weights and measures, 5 Geo. IV. c. 74 (June 17, 1824), the acre was fixed by law at 4,840 square yards, but its dimensions still vary in different parts of the kingdom.

ACROPOLIS.—The principal Grecian cities contained a kind of stronghold or citadel, situated, as the term acropolis indicates, on the highest point.—That of Athens, of which the ruins still remain, was the most celebrated. It consisted of several public buildings, and was encircled by a strong wall, said to have been built by the Pelasgians, B.C. 1057. On the taking of Athens by the Venetians, 1687, the roof of the Parthenon, one portion of the Acropolis, was demolished by a bomb. In the Greek war of independence, the Acropolis, captured from the Turks June 21, 1822, was retaken by them May 17, 1827.

ACROSTICS. — These compositions were known to the Greeks, although their invention is usually attributed to Porphyrius Optatianus, who was living in 328. Eusebius, Bishop of Cæsarea (315—340) gives, in his Life of Constantine I., an illustration of an acrostic, the initial letters of which form the words "Jesus Christ, the Son of God, the Saviour." Athanasius states that in his time (326—373) a mode of psalmody was introduced called singing acrostics, but the expression appears to imply only that the congregation joined their voices at the end of every verse uttered by the priest. Acrostics were in much repute in France about the 15th and 16th centuries. Sir John Davies, who died Dec. 7, 1626, wrote 26 short

poems, entitled "Hymns to Astrea," each of which is an acrostic on the words "Elizabetha Regina," which are regarded as the most elegant examples of this species of composition. Addison commented with playful severity on the false taste displayed in acrostical verses, in the *Spectator* for May 9, 1711.

ACT OF SETTLEMENT.—The death of the Duke of Gloucester (July 29, 1700), son and last surviving child of the Princess Anne, afterwards queen, rendered a new settlement of the crown necessary, it being unprovided for after the death of William III. and of Anne. Accordingly, a measure was introduced during the session of 1701, to supply matters of great importance, omitted in the Bill of Rights. This statute (12 & 13 Will. III. c. 2), passed June 12, provided that in case of default of issue of William III., and also of the Princess Anne respectively, the crown should devolve upon the next Protestant in succession, Sophia, married to the Elector of Hanover, and the heirs of her body, being Protestants. It was further enacted, that the occupant of the throne "shall join in communion with the Church of England as by law established;" that if a foreigner succeeded, the nation should not be required to defend any foreign dominions without the consent of Parliament; that the sovereign should not leave the country without permission of Parliament; that all matters cognizable in the Privy Council should be transacted there, and all resolutions taken thereupon signed by such of the Privy Council as should consent to them; that only those born of English parents should be eligible to a seat at the Privy Council, in either house of Parliament, or to hold any office or receive any grant under the crown; that no person serving under, or receiving a pension from the crown, should be capable of serving as a member of the House of Commons; that the judges should hold upon good behaviour, and not be removed except upon the address of both houses of Parliament; and that no pardon under the great seal of England should be pleaded to an impeachment by the Commons. The provision against the sovereign quitting the kingdom without consent of Parliament was repealed by 1 Geo. I. stat. 2, c. 51 (1715). The provision respecting matters to be transacted in the Privy Council was repealed by 4 Anne, c. 8, s. 24 (1705), and the general disqualification of pensioners and placemen, having been found inconvenient, was repealed by 4 Anne, c. 8, s. 25, which statute was re-enacted by 6 Anne, c. 7 (1707), at the union between England and Scotland. Section 25 of 6 Anne, c. 7, decreed that the holders of certain offices, therein specified, and of all new offices or places of profit under the crown, created at any time since Oct. 25, 1705, should not be allowed to sit in the House of Commons; and section 26 provided that any member accepting any office of profit from the crown should vacate his seat, being eligible to stand again. So numerous are the special disqualifications that they have to be collected from at least 116 statutes.

ACT OF SUPREMACY.—By 26 Hen. VIII. c. 1 (1534), the king was declared "the only supreme head in earth of the Church of England," and he formally assumed that title Jan. 15, 1535. All beneficed ecclesiastics, and all laymen holding office under the crown, were obliged by this act to take the oath abjuring the spiritual as well as the temporal jurisdiction of the Pope. By 1 & 2 Phil. & Mary, c. 8, s. 12 (1554), this law was repealed, but it was restored by 1 Eliz. c. 1 (1559). The denial of the king's supremacy was declared treasonable by 1 Edw. VI. c. 12, s. 7 (1547).

ACT OF TOLERATION (1 Will. & Mary, st. 1, c. 18), for the relief from certain penalties of Dissenters from the Church of England, except Papists and persons denying the Trinity, was passed May 24, 1689, and confirmed by 10 Anne, c. 2 (1711). The clause excepting persons denying the Trinity was repealed by 53 Geo. III. c. 160 (July 21, 1813), and Roman Catholics were relieved by 10 Geo. IV. c. 7 (April 13, 1829).

ACT OF UNIFORMITY.—By 2 & 3 Edw. VI. c. 1 (Jan. 15, 1549), it was enacted that the order of divine worship contained in the book drawn up by the commissioners, "by the aid of the Holy Ghost," should be the only one used after the next Whitsuntide. Those who refused to use it, or who spoke or wrote against it, were fined for the first or second offence, and rendered subject to forfeiture of goods and imprisonment for life for the third. This statute was confirmed by 5 & 6 Edw. VI. c. 1 (1552), repealed by 1 Mary, sess. 2, c. 2 (1553), and restored by 1 Eliz. c. 2 (1559). It formed the basis of the Act of Uniformity, commonly so called (13 & 14 Charles II. c. 4), which contained stringent regulations with respect to the use of the Book of Common Prayer; received the royal assent May 19, came into operation Aug. 24, 1662, and was made perpetual as to the establishment of the church by 5 Anne, c. 5 (1706), and by the Act of Union, 5 Anne, c. 7. A similar act was passed by the Irish parliament (17 & 18 Charles II. c. 6) in 1665.

ACTA DIURNA.—(*See* NEWSPAPERS).

ACTIAN GAMES were instituted by Augustus in commemoration of his victory over Antony off Actium, Sep. 2, B.C. 31, and celebrated every fifth year. They were probably a revival of an ancient festival, as there was a temple of Apollo at Actium, mentioned by Thucydides (i. 29) and by Strabo (vii.), which was enlarged by Augustus.

ACTIATIC, or ACTIAN ÆRA, so called from the battle of Actium, which secured Augustus in possession of the Roman empire. This æra dated amongst the Romans from Jan. 1, B.C. 30; in Egypt, where it prevailed till the reign of Diocletian, it dated from Aug. 29, B.C. 30; and amongst the Greeks of Antioch, by whom it was used as late as the 9th century, from Sep. 1, B.C. 30.

ACTINOMETER.—Literally, a *measurer of solar rays*, an instrument employed for the purpose of ascertaining the intensity of the heat in the direct rays of the sun, invented by Sir John Herschel about the year 1820.

ACTIUM (Sea-fight).—This decisive engagement between the fleets of Augustus and Antony took place off Actium, a promontory in

Acarnania, Sep. 2, B.C. 31. After the battle had lasted some time, Cleopatra fled; Antony followed, and Augustus obtained a complete victory, which rendered him master of the Roman world.

ACTON BURNEL, or SHREWSBURY (Statute of), sometimes called the Statute of Merchants, was passed in a parliament held by Edward I. at Shrewsbury, Sep. 30, 1283. It is dated Oct. 12, 1283, and enacted that a debtor's chattels and devisable burgages might be sold to pay his debts. This enactment was confirmed, and its provisions were enlarged, by another Statute of Merchants, passed at Westminster, March 25, 1285.

ACTRESSES.—The appearance of females on the stage is altogether a modern custom, which originated on the continent, and was not generally adopted in this country until the reign of Charles II. Anne of Denmark, wife of James I., Henrietta, wife of Charles I., and ladies of noble family, sometimes filled parts in the masques and other dramatic entertainments of the time; but they were not professional actresses. Prynne denounces the attempt made in 1629 to introduce, according to continental custom, Frenchwomen at the Blackfriars theatre. This was the first appearance of professional females on the English stage. They were, however, foreigners; and much difference of opinion prevails as to the first English actress. Mrs. Colman, wife of Mr. Edward Colman, appeared as Ianthe in the "Siege of Rhodes," in 1656; and Mrs. Mary Saunderson, afterwards married to the celebrated Betterton, performed the same character at the opening of Betterton's theatre, in April, 1662. The last-mentioned was decidedly the first English actress of celebrity that appeared on our stage. Pepys saw women on the stage for the first time, Jan. 13, 1662. The Duke of Bolton married Lavinia Fenton, and the eccentric Earl of Peterborough, after the death of his first wife, married Lavinia Robinson, "the nightingale." Amongst actresses who have, in later times, been ennobled, may be mentioned Miss Farren, who became Countess of Derby, May 8, 1797; Miss Mellon, left a widow by Mr. Coutts, who became Duchess of St. Albans in June, 1827; and Miss Stephens, married to the Earl of Essex, April 19, 1838.

ACTS OF THE APOSTLES.—The fifth and last of the historical books of the New Testament, composed by St. Luke, and inscribed to Theophilus, is said by the best critics to have been written A.D. 63. The apostolic fathers in the 1st century, and Irenæus and Tertullian in the 2nd, ascribed this book to St. Luke. This evidence is corroborated by that of Origen, Jerome, Augustine, Eusebius, and other ecclesiastical writers.

ACTS OF PARLIAMENT.—Sir Harris Nicolas declares "that the distinction between a statute, act, and ordinance of parliament is still involved in such obscurity that no positive conclusion can be drawn from the various statements which have been published." At the present day, bills which have passed through both houses, and received the royal assent, become acts of parliament. (*See* PARLIAMENT, STATUTES, &c.)

ACTS OF SEDERUNT.—Ordinances made by the judges of the Court of Session (Scotland), by virtue of a Scottish act of parliament passed in 1540, frequently dealt with curious local and fiscal regulations; such as fixing the price of ale in Edinburgh in 1725; the sale of bread in 1736 and 1743; of butchers' meat in 1682, 1717, and 1736; and of fowls in 1669. A tax for cleaning the streets of Edinburgh was imposed in 1687 and in 1691; and an act relative to the cleanliness of the premises within the session-house or parliament close, was passed in 1663.

ACTUARIES OF GREAT BRITAIN AND IRELAND.—The Institute was established in London in 1848.

ACTUARIES IN SCOTLAND.—The Faculty was established in Edinburgh in 1856.

ACYRON.—This place, near Nicomedia, was celebrated as the place at which Constantine I. (the Great) expired, May 22, 337.

ACZ, or ACS (Battle).—At this place the Austrians and Russians retrieved (July 2, 1849) their reverse of the previous day between Raab and Waitzen, and, after a hard-fought battle, compelled Georgey and the Hungarians to retire.

ADAMITES, or ADAMIANS, termed by Bayle "a ridiculous sect," are said to have arisen during the 2nd century, one Prodicus being their founder. In their religious assemblies they appeared naked, in imitation of our first parents in their state of innocence. They made a profession of continency, and condemned marriage, because it was not known in Paradise, of which they reckoned their church an emblem, and themselves imitators of Adam and Eve. After carefully examining the authorities, Leland declares that no such sect existed in the early church. Evagrius mentions certain male and female ascetics living in Palestine during the 5th century, who always exposed their bodies to the extremes of heat and cold, wearing nothing but a small girdle. Attempts to revive some of these reputed practices of the Adamites have frequently been made in modern times, although it is an error to suppose that Tandemus or Tanchelin, who committed various excesses at Antwerp in 1124, and led many persons astray, was an Adamite. This man, instead of going naked, was richly apparelled, and fared most sumptuously. Some fanatics, seduced by Picard, a Fleming, created much commotion in Germany in 1415. Picard declared himself to be the son of God, and that he was sent into the world as a new Adam, to restore the law of nature. Having penetrated into Bohemia, this fanatic and his followers were attacked and almost exterminated by Ziska in 1420. The author of Cosmo's Travels (in 1669) says there were many Adamites in England. (*See* ABRAHAMITES.)

ADARE.—This ancient town in Limerick is celebrated for the ruins of a monastery founded in 1279 by John, Earl of Kildare. A lofty square steeple is all that remains of a grey friary, founded in 1465 by Thomas, Earl of Kildare.

ADDA (Combats).—Pressed by the Russian and Austrian forces, Moreau withdrew the French and Italian army behind the line of this river in the spring of 1799. His antagonists, after

some sharp encounters, succeeded in passing the river, April 27, 1799.

ADDINGTON ADMINISTRATION (Geo. III.)—The arrangements for this ministry commenced Feb. 10, 1801, and were not completed until July 30. It was thus constituted:—

First Lord of the Treasury and Chancellor of the Exchequer	Mr. Henry Addington, created Visc. Sidmouth Jan. 12, 1805
Lord Chancellor	Lord Eldon.
President of Council	Duke of Portland.
Privy Seal	Earl of Westmoreland.
Principal Secretaries of State	Lords Pelham and Hobart, and Mr. R. B. Jenkinson, who was created Lord Hawkesbury Nov. 16, 1803, and succeeded to the Earldom of Liverpool Dec. 17, 1808.
Admiralty	Earl St. Vincent.
Board of Control	Visc. Lewisham.
Secretary at War	Mr. Charles Yorke.
Ordnance	Earl of Chatham.

Viscount Castlereagh went to the Board of Control July 6, 1802. Mr. Charles Yorke became (Aug. 17, 1803) one of the principal secretaries of state, in place of Lord Pelham, who took the chancellorship of the Duchy of Lancaster, on the resignation of Lord Hawkesbury. It was dissolved May 10, 1804. (*See* PITT'S SECOND ADMINISTRATION.)

ADDISCOMBE HOUSE, near Croydon, once the residence of the Earl of Liverpool, was purchased, in 1809, by the East India Company, and opened by them in 1825, as a collegiate institution for the reception of cadets for the whole of their military service, except the cavalry.

ADDITIONAL ACT.—The settlement of a new constitution for France during the Hundred Days, March 21—June 17, 1815, was entrusted by Napoleon I. to a commission, of which Benjamin Constant was president. The constitution embodied in the "Additional Act," the work of Constant Regnaud and St. Jean d'Angely, was published April 25, and was adopted by the Assembly June 1, 1815. On the restoration of Louis XVIII., in the royal ordinance changing the modes and rules of election, dated July 12, 1815, the Additional Act of Napoleon I. was made the basis of the election laws.

ADDLED PARLIAMENT met Tuesday, April 5, 1614. The Commons refused to grant supplies until grievances were redressed, and sought to abridge the power of the Crown. James I. dismissed them in anger, and imprisoned several members, June 7. Not a single act was passed during the short session, and it was therefore nicknamed "the Addled Parliament."

ADDRESSERS.—(*See* ABHORRERS.)

ADELAIDE South Australia), the capital, was founded by settlers who arrived in the colony July 27, 1836; but it was not until March, 1837, that its site was fixed and the town lands were surveyed. In 1845 it was made a free port to vessels of all nations. Port Adelaide, one of its harbours, is about seven miles distant from the town. Gold was discovered in the neighbourhood, and an assay office established at Adelaide in 1852. Its bishopric was founded in 1847, Dr. A. Short being the first bishop.

ADELAIDE ISLAND (Antarctic) was discovered by Capt. Biscoe, Feb. 16, 1832.

ADELPHI THEATRE, in the Strand, London, was built in 1806. A new façade was erected in less than three weeks in 1840. The old edifice was pulled down, and another, called the New Adelphi theatre, erected on its site, in 1858.

ADEN, the Gibraltar of the East, an Arabian town and seaport, to the east of the Straits of Babelmandeb. Marco Polo (b. iii. ch. 40) mentions it as a place of importance in the 13th century. The Portuguese seized it in the 16th century, and the Turks obtained possession by treachery in 1533. They soon after erected extensive fortifications, and an aqueduct eight miles in length. It was, however, governed by a native prince in 1708. It was bombarded and taken Jan. 19, 1839, by the troops of the East India Company.

ADIGE (Battles).—Near this river, in Italy, the ancient Athesis, the Cimbri defeated the Roman army under Quintus Catulus B.C. 101. Terrible inundations occurred in 1721 and 1724. Combats occurred here March 26 and 30, 1799, between the French and the Austrian armies. The former gained some advantages on the first day, but were defeated on the second, leaving 2,000 prisoners in the hands of the Austrians. The French withdrew from the line of the Adige April 1, and in an attempt to regain their position, April 5, were once more defeated.

ADMINISTRATIONS OF GREAT BRITAIN.—Hallam (Eng. iii. ch. 15) states: "According to the original constitution of our monarchy, the king had his Privy Council, composed of the great officers of state, and of such others as he should summon to it, bound by an oath of fidelity and secrecy, by whom all affairs of weight, whether as to domestic or exterior policy, were debated, for the most part in his presence, and determined, subordinately of course to his pleasure, by the vote of the major part. It could not happen but that some councillors, more eminent than the rest, should form juntos or cabals, for more close and private management, or be selected as more confidential advisers of their sovereign; and the very name of a Cabinet Council, as distinguished from the larger body, may be found as far back as the reign of Charles I. But the resolutions of the crown, whether as to foreign alliances or the issuing of proclamations and orders at home, or any other overt act of government, were not finally taken without the deliberation and assent of that body whom the law recognized as its sworn and notorious councillors. This was first broken in upon after the Restoration . . . . . Thus by degrees it became usual for the ministry or cabinet to obtain the king's final approbation of their measures before they were laid, for a merely formal ratification, before the Council . . . . . During the reign of William III., this distinction of the cabinet from the Privy Council, and the exclusion of the latter from all business of state, became more fully established." Thus it was not until after the Revolution that the Cabinet Council, as distinguished from the Privy Council, was formed. Monarchs had, indeed, before that time, been in the habit of seeking advice from particular members of the Privy Council, and too frequently from favour-

ites. In the earlier days of cabinets, ministers were only accountable for their own departments, and did not necessarily retire when their leaders or colleagues were dismissed. Nor did the minister, who was considered the chief, always preside over the Treasury. The office of Prime Minister is of more recent date. The practice for ministers presiding over particular departments of the government to form themselves into what is now termed an administration, under the control of a chief, cannot be said to have been established until the reign of Queen Anne. The following is a list of the administrations that have held office from the commencement of her reign, each ministry being more fully described under its title, to be found in its place in the alphabetical arrangement :—

Godolphin	1702	North	1770
Harley	1710	Rockingham (*second*)	1782
Shrewsbury	1714	Shelburne	1782
Halifax	1714	Coalition	1783
Carlisle	1715	Pitt (*first*)	1783
Walpole (*first*)	1715	Addington	1801
Stanhope	1717	Pitt (*second*)	1804
Sunderland	1718	"All the Talents"	1806
Walpole (*second*)	1721	Portland	1807
Wilmington	1742	Perceval	1809
Pelham	1743	Liverpool	1812
Broad-Bottom Administration	1744	Canning	1827
Long-Lived Administration	1746	Goderich	1827
Broad-Bottom Administration restored	1746	Wellington	1828
Newcastle	1754	Grey	1830
Devonshire	1756	Melbourne (*first*)	1834
Newcastle and Pitt, afterwards Lord Chatham (*first*)	1757	Peel (*first*)	1834
Bute	1762	Melbourne (*second*)	1835
Grenville	1763	Peel (*second*)	1841
Rockingham (*first*)	1765	Russell (*first*)	1846
Chatham (*second*)	1766	Derby (*first*)	1852
Grafton	1767	Aberdeen	1852
		Palmerston (*first*)	1855
		Derby (*second*)	1858
		Palmerston (*second*)	1859
		Russell (*second*)	1865

ADMINISTRATIVE REFORM ASSOCIATION was called into existence for the assumed object of insuring a better administration of affairs in the different government departments, attention having been directed to the subject by the mismanagement that caused so many sacrifices of life and property in the Crimea during the winter of 1854 and 1855. Meetings were held in the Guildhall and at the London Tavern, May 6, 1855, when the association was formed. A large gathering of the Administrative Reformers took place at Drury-lane theatre, June 13. The association did not, however, flourish, and an attempt at its re-organization in 1856 proved a failure.

ADMINISTRATOR.—In ancient times, the king was entitled to seize the goods of all persons who died intestate. This prerogative was even granted as a franchise to lords of manors and others, and afterwards the Crown conferred this right on the Church, when the Ordinary took possession of the goods. The 32nd article of Magna Charta (1215) provided against abuses of this prerogative; but this article was not included in the subsequent charter of Henry III. The great abuse of this power led to a change, and the Statute of Westminster II. (13 Edw. I. st. i. c. 19), 1285, enacted that the Ordinary was bound to pay the debts of the intestate, as far as his goods extended. Flagrant abuses continued, and by 31 Edw. III., st. i. c. 11 (1357), it was enacted that the "Ordinaries shall depute the next and most lawful friends of the dead person intestate to administer his goods." Another statute (21 Hen. VIII. c. 5), in 1529, enlarged the power of the ecclesiastical judge, who was authorized to grant administration *either* to the widow *or* the next of kin, *or* to both of them, at his discretion. By 20 & 21 Vict. c. 77 (Aug. 25, 1857), which came into operation Jan. 1, 1858, the whole of this jurisdiction was transferred to the "Court of Probate," before a single judge, with an appeal to the House of Lords.

ADMIRAL.—This title, which was originally written *ammiral*, or *amiral*, as it still is in French, was imported into Europe during the Crusades, being a corruption of the Arabic word *amir*, or *emir*. The Sicilians and the Genoese borrowed it from the Saracens about the year 1149. This title is said to have been first used in France in 1270, and in this country later in the same century. Nicolas (Hist. of the Royal Navy, vol. i. p. 390), says, "It will have been seen that at an early period of English history the commanders of fleets were styled 'leaders and governors, or justices,' or 'leaders and constables' of fleets; and that in the reign of Henry III., and until the latter part of that of Edward I., their usual designation was 'keepers of the sea-coast,' or 'captains and keepers of the sea.'" In a covenant executed at Bruges, March 8, 1297, Sir William Leybourne was styled "Admiral of the sea of the King of England." In the wardrobe accounts of Edward I. for the year 1300, Gervase Alard is termed "Admiral of the fleet of the Cinque Ports;" and the first commission to an admiral of which there is any record was granted by Edward I. to Gervase Alard, and is dated Feb. 4, 1303. The "Liber Munerum Publicorum Hiberniæ" contains an order for the payment of 40*s.* to John de Athy for expenses he had incurred, Dec. 7, 1335, as admiral of the king's fleet in Ireland; and from the same authority we learn that Wm. Spalding was created admiral in Ireland by patent dated May 26, 1382. (*See* LORD HIGH ADMIRAL.)

ADMIRAL OF THE FLEET.—Until 1851 this honorary title, which gives increase of half-pay, but no command, was conferred only upon one officer at a time; but in that year it was borne simultaneously by Sir Thomas Byam Martin and Sir George Cockburn.

ADMIRAL OF THE RED.—Admirals take rank and command in the order of their respective squadrons, which are distinguished by different-coloured flags; as the red, the white, and the blue squadrons. For nearly a century after the union between England and Scotland, in 1707, there was no admiral of the red, the Union Jack having superseded the red flag; but the latter was resumed at the naval promotion which took place in 1805, after the battle of Trafalgar.

ADMIRALTY.—The chief of the board or commission which has supplied the place of the extinct office of Lord High Admiral since the year 1709, is styled the First Lord of the Admiralty. The holders of this office, which changes hands with each change of ministry,

will be found under the successive administrations. (*See* HIGH COURT OF ADMIRALTY.)

ADMIRALTY HOUSE (London).—Pennant says, "The Admiralty office stood originally in Duke-street, Westminster; but, in the reign of King William, was removed to the present spot, to the house then called Wallingford, I believe, from its having been inhabited by the Knollys, viscounts Wallingford." From the roof of this building Archbishop Usher took a farewell view of Charles I. going to execution, and swooned at the sight. It was rebuilt by Ripley in 1726, and the screen was erected by Adams in 1776.

ADMIRALTY ISLANDS (Pacific) were discovered by the Dutch in 1616. Carteret landed on them in 1767, and D'Entrecasteaux in 1793.

ADMONITION TO THE PARLIAMENT.—This treatise, setting forth the extreme views of the Puritans in somewhat intemperate language, was presented to the House of Commons in 1572. It was the joint production of the more active Puritans, and was presented to Parliament by two of their number, Field and Wilcox, preachers. For this offence they were committed to Newgate, and afterwards sentenced to a year's imprisonment. Four editions appeared in a very short space of time. A second admonition was drawn up by Thomas Cartwright, and both were answered by Whitgift. Cartwright replied, and the controversy raged for some time. These bitter attacks upon the Established Church were suppressed by proclamation, June 11, 1573.

ADOPTIANS, or ADOPTIONISTS.—The name of a sect which, in 787, revived the Oriental heresy of Nestorianism in a new form in the West. Its authors were two Spanish prelates, Elipand, Archbishop of Toledo, and Felix, Bishop of Urgel. They firmly maintained the co-equality of the Son as to his divine nature, but asserted that, as to his humanity, Christ was only the adopted son of the Father. These doctrines were condemned at the Councils of Narbonne, June 27, 791; of Friuli in 791; at the Diet and Council of Ratisbon in August, 792; and at the Council of Frankfort-on-the-Maine in 794. A conference, which lasted seven days, took place between Felix and Alcuin at the Council of Aix-la-Chapelle in 799, when the former made a full recantation. The strange theory obtained many supporters.

ADORNO and FREGOSI.—Factions, called by Hallam (Middle Ages, i. ch. iii.) "equal and eternal rivals," by which Genoa was distracted during the 14th and 15th centuries. They belonged to the plebeian and commercial aristocracy, who obtained power when the old nobility were excluded from authority. The Ghibellines sided with the Adorno, and the Guelphs with the Fregosi. One great struggle between these factions commenced in the elevation of Gabriel Adorno to the ducal throne, in 1363. The Fregosi put the French in possession of Genoa in 1513, and in the same year (Robertson, Charles V. b. xi.) the Adorno again wrested Genoa from the Fregosi, and placed it under the power of the emperor.

ADRIAN'S WALL.—(*See* HADRIAN'S WALL.)

ADRIANISTS.—The term is applied to two different sects. Theodoric (l. i. c. 4, p. 193) is the only author who refers to the first sect of Adrianists, who were followers of Simon Magus, and arose about A.D. 34. The disciples of Adrian Hamstead, an Anabaptist of the 16th century, also bore this designation. He taught first in Zealand, and afterwards in England.

ADRIANOPLE.—(*See* HADRIANOPLE.)

ADRIATIC.—Herodotus (i. 163) states that this inland sea, named from the once flourishing Etruscan city of Adria or Atria, was discovered by the Phocæans, but there is little doubt that it was known to the Phœnicians at a much earlier period. The navigation of the Adriatic was regarded as very perilous by the Greeks and Romans, and is frequently referred to on this account by Horace, B.C. 65 to B.C. 8. (*See* ILLYRIA, VENICE, WEDDING OF THE ADRIATIC, &c.)

ADUATICI.—This people of Belgic Gaul was descended from about 6,000 Teutones and Cimbri, who, being left behind to guard the national property during the invasion of Italy by those tribes, maintained their position after the defeat of their countrymen by Marius, at Aix, B.C. 102. Julius Cæsar seized their stronghold B.C. 57, killing 4,000 of the defenders, and selling the remainder, to the number of 53,000, into captivity.

ADULTERATION.—Many laws inflicting penalties for the admixture of improper ingredients in articles of consumption are found in the statute-book. By 51 Hen. III. st. vi. (1267) bakers were condemned to stand in the pillory for offences relating to the assize of bread, and brewers to stand in the tumbrel, or to undergo some other kind of correction. By 23 Eliz. c. 8, s. 4 (1581), persons adulterating honey with "any deceyptfull myxture," were to forfeit the same. A similar penalty was attached to the adulteration of wax. By 1 James I. c. 18 (1604), any person having in his possession adulterated hops was to forfeit them, and any brewer using them in brewing ale or beer was to forfeit the value of the hops so used. By 17 Geo. III. c. 29 (1776), the penalty for the adulteration of tea was a fine of £5, or six months' imprisonment. Other statutes dealing with adulteration in various forms have been passed during the present century. The Act 6 and 7 Wm. IV. c. 37 (1836), repealed former acts for regulating the sale of bread sold beyond the city of London and 10 miles of the Royal Exchange. It inflicted a fine of not less than £5, or more than £10, or imprisonment not exceeding six months, for mixing materials other than those specified in the act, in the preparation of bread. Hard labour was added to imprisonment by 14 and 15 Vict. c. 100, s. 29 (Aug. 7, 1851).

ADULTERY.—The Jewish law inflicted the punishment of death for this offence (Lev. xx. 10; Deut. xxii. 22). The Roman punishment was mutilation. Augustus, after imposing heavy fines and forfeitures on the guilty parties, condemned them to long or even perpetual exile. Constantine I. made the crime capital, but Justinian mitigated this severity of the punishment. The northern nations punished the crime with great severity, and the ancient Germans empowered the husband to inflict immediate punishment. Among

the Saxons, a pecuniary fine was exacted, according to the rank of the female. In Alfred's reign it was punished according to the rank of the husband. Canute (1016) adjudged the man to exile, the woman to have her nose and ears cut off. Prescott (Peru, i. Introd. c. ii.) says it was treated as a capital offence by the Peruvians. The Japanese, early in the 17th century, cut off the heads of both the offending parties, and hewed their bodies in pieces. Adultery was punished with death by an act of the Scottish Parliament, in 1563. In the time of the Commonwealth (1650) adultery was made a capital offence; but the law was repealed at the Restoration. In later times, redress was usually sought by action in the civil courts, until the passing of the new act 20 and 21 Vict. c. 85 (Aug. 28, 1857), by which the "Court for Divorce and Matrimonial Causes" was established.

ADVENT.—The period of four weeks before Christmas. It is not known when this season was first consecrated by the Church. The earliest notice of Advent is found in a homily by Maximus Taurinensis, in 450. At the Council of Linda, in 524, the celebration of marriages between Advent and Christmas was interdicted. The Council of Maçon, in 581, ordered a fast to be observed from Advent to Christmas. Advent Sunday is the Sunday, whether before or after, which comes nearest to St. Andrew's day (Nov. 30).

ADVENTURE BAY (Australasia) was discovered by Capt. Furneaux, in 1773, and named after his ship, the *Adventure*, belonging to Capt. Cook's expedition. It was visited by Capt. Cook, on his third voyage, Jan. 26, 1777, and by Capt. Bligh in 1788 and 1792.

ADVENTURERS.—(*See* MERCHANT ADVENTURERS.)

ADVERTISEMENTS.—The Parliamentary newspaper, the *Mercurius Politicus*, for Jan., 1652, contains an advertisement, probably the first published in England. It announces the publication of the "Irenodia Gratulatoria, an Heroick Poem," printed by Thos. Newcourt, in 1652. This effusion is a panegyric on Cromwell's Irish campaign. Advertisements were first subjected to a duty by 10 Anne, c. 19 (1712), and it was charged according to length. Some change took place, and the duty, which had been reduced from 3*s.* 6*d.* to 1*s.* 6*d.* in Great Britain, and from 2*s.* 6*d.* to 1*s.* in Ireland, by 3 and 4 Wm. IV. c. 23 (June 28, 1833), was entirely repealed by 16 and 17 Vict. c. 63, s. 5 (Aug. 4, 1853.)

ADVERTISING VANS.—This ingenious device for obtaining publicity led to the introduction of so many showy vehicles into the streets of the metropolis as to constitute a nuisance, and the use of these vans was accordingly prohibited from Oct. 1, 1853, by 16 and 17 Vict. c. 33, s. 16 (June 28, 1853).

ADVOCATE.—Foss states that the first instance of an advocate being regularly employed in the king's affairs occurs in the reign of Henry III. During 14 years, from 38 to 52 Hen. III. (1253—1267), between 30 and 40 cases in the court are recorded, in which Lawrence del Brok pleaded for the king,—"sequitur pro rege." (*See* BARRISTER.) An assembly of German advocates was held at Mayence in 1844, and at Hamburg in 1846. (*See* LORD ADVOCATE.)

ADVOCATES' LIBRARY, founded in Edinburgh, by Sir George Mackenzie, about the year 1682. In 1700 great havoc was committed by a fire. It obtained the privilege, under the Copyright law of 1709, of receiving a copy of every new book. (*See* FACULTY OF ADVOCATES.)

ÆDILES.—Roman magistrates, whose duty it was to superintend public buildings, highways, weights and measures, &c. Two chosen from the plebeians were first created B.C. 494. Two patrician ædiles (*curules*) were added B.C. 365; and Julius Cæsar established two more plebeian ædiles (*cereales*) B.C. 45, whose business was to look after the supply of corn.

ÆDUI, or HEDUI.—This Celtic people, inhabiting part of the modern territory of Burgundy, after being reduced to subjection by the Sequani, were restored to independence by Julius Cæsar, B.C. 58. They subsequently joined the other Gallic tribes in rebellion against their benefactor, by whom they were subdued B.C. 52. A second insurrection, stirred up by Julius Sacrovir, a Gaul, A.D. 21, was suppressed by C. Silius.

ÆGATES (Sea-fight).—C. Lutatius Catulus defeated the Carthaginian fleet, under Hanno, off these islands, near the western extremity of Sicily, B.C. 241. This battle, in which the Romans destroyed 50 ships and captured nearly 10,000 prisoners and 70 ships, put an end to the first Punic war.

ÆGINA, an island in the Gulf of Ægina, with chief town of the same name, celebrated for its naval supremacy. Homer says it was occupied by the Achæi, and afterwards by Dorians from Argos. It became subject to Pheidon, tyrant of Argos, B.C. 748. Ægina was a general emporium of commerce, had a factory in Egypt B.C. 563, and carried on an active trade in corn with the countries in the Black Sea. The Æginetans were considered the earliest navigators of the Ægean Sea.

B.C.
595. The Thebans apply for aid to the Æginetans, who declare war against Athens.
500. Ægina mistress of the sea.
487. War between Athens and Ægina.
481. Termination of the struggle.
480. The Æginetans send 30 ships to Salamis (*q. v.*).
479. A Greek fleet assembles at Ægina.
460. Athens makes war upon Ægina, and defeats her fleet.
459. Ægina is besieged by the Athenians.
455. Ægina is captured by the Athenians, its fortifications are destroyed, and its ships of war surrendered.
431. The Athenians expel the inhabitants, and send colonists to the island.
404. Lysander, having collected some of the former inhabitants, restores them to Ægina.
388. Incited by Sparta, the restored Æginetans declare war against Athens.
387. The war is brought to a close by the peace of Antalcidas (*q. v.*).
233. Ægina joins the Achæan League.
210. Publius Sulpicius having taken Ægina, reduces the inhabitants to slavery, and bestows their territory upon the Ætolians, who sell it to Attalus I. of Pergamus for 30 talents.

A.D.
1811. Several statues are discovered, which were eventually removed to Munich, casts being preserved at the British Museum.

ÆGIRA (Greece).—This city of Achaia, supposed by Pausanias to be identical with the Hyperesia of Homer, the name having been changed during the Ionian supremacy, joined the Achæan League (*q. v.*) soon after the annexation of Corynea, B.C. 274, and successfully resisted an attack by the Ætolians, B.C. 220.

ÆGIUM (Greece).—This city of Achaia, mentioned by Homer, attained importance upon the destruction of Helice (*q. v.*) by earthquake, B.C. 373. The people rose in insurrection, B.C. 275, and, having expelled the garrison, united their city to the Achæan League (*q. v.*), of which it speedily became an important member. The site of the ancient Ægium is occupied by the modern town of Vostitza, the greater portion of which was destroyed by an earthquake in 1819.

ÆGOSPOTAMI, or the "Goat River" (Sea-fight).—In the Thracian Chersonesus, off the mouth of which the Athenian fleet was signally defeated by the Spartans under Lysander, B.C. 405. This victory led to the capture of Athens, and the termination of the Peloponnesian war.

ÆLIA CAPITOLINA.—Jerusalem, when rebuilt by the Emperor Hadrian, A.D. 130, received this name, the former portion of which was derived from the prænomen of the emperor, while the latter was used in honour of Jupiter Capitolinus, to whom a temple was erected on the site of the Jewish sanctuary.

ÆNIGMA.—The earliest recorded ænigma is that proposed by Samson (Judges xiv. 14), B.C. 1136. The Queen of Sheba announced her intention of trying Solomon with hard questions (1 Kings x. 1), B.C. 990, or, as the passage is rendered in the Vulgate, "to try him in ænigmas." The practice prevailed amongst the Egyptians, and the famous legend of Œdipus and the Sphinx is supposed to have been current amongst the Greeks in the 13th century before Christ. Athenæus states that riddles were proposed at the feasts of the ancients, who rewarded successful competitors with choice viands, and compelled those who failed in their answers to drink salt and water. The ænigma was known amongst all ancient nations, and was deemed of such importance by Eastern monarchs that they sent ambassadors to foreign courts for the purpose of obtaining answers. During the 17th century this custom was very common in France.

ÆOLIAN or BŒOTIAN MIGRATION.—The Achæans, a people closely allied to the Æolians, were, by the great Dorian invasion, driven from the Peloponnesus, and, with some of the original inhabitants of Bœotia, induced to settle in Asia Minor. This happened B.C. 1104, according to some authorities, or B.C. 884 according to Newton.

ÆOLIAN HARP.—This musical instrument was probably known at a very early period, as the Talmud states that David's harp sounded when blown by the north wind. The invention is attributed to Kircher, who describes it in his "Musurgia Universalis," published in 1650. In 1785 a remarkable Æolian harp was constructed at Como, by Gattoni. He stretched 15 iron wires of different dimensions from his house to the top of a tower 90 feet high, and about 150 paces distant, and he is said to have used this gigantic instrument to foretell changes in the weather. An invention for playing the Æolian harp by means of heat was described in 1857.

ÆOLIPILE.—This instrument, for demonstrating the convertibility of water into steam, was known to the ancients, and is mentioned by Vitruvius about B.C. 20. An ancient bronze æolipile, representing a rough figure of a man kneeling, was found at Basingstoke towards the end of the last century, and is described and engraved in the "Archæologia" for 1800.

ÆQUI, an ancient people of Italy, inhabiting the upper valley of the Anio. In league with the Volsci, they waged war against the Romans (B.C. 471—302). They invaded the territory of the Latins B.C. 494, encamped on Mount Algidus B.C. 463, and captured many Latin towns. Cincinnatus defeated them B.C. 458, A. Postumius Tubertius almost annihilated them B.C. 428, and they were driven from Mount Algidus B.C. 415. They were finally subdued, and their territory was annexed to Rome B.C. 302.

ÆRA, or ERA, a fixed point of time from which any number of years is counted, the zero, as it were, of the chronological scale. The following is a list of those æras which have been most in use, with the year of the Christian æra to which each of them corresponds:—

1.	A.M., *anno Mundi*, "in the year of the world." This æra, the date of the world's creation, according to the reckoning of Constantinople, which was used in Russia till the beginning of the 19th century, and is still employed by the Greek Church, commences Sep. 1	B.C. 5508
2.	——— The year of the world as reckoned at Antioch (and by the Church of Alexandria since A.D. 285, when it discarded 10 years from its previous reckoning), commences Sep. 1	5493
3.	——— The year of the world is commonly assumed by chronologists to commence	4004
4.	——— The year of the world, according to the Jews, commences	3761
5.	The Calíyuga, the last of the four yugas or great periods of time reckoned by the Hindus. The first three are purely mythological; the last commences	3102
6.	The Olympiads commence July 1	776
7.	A.U.C., *anno urbis conditæ*, "in the year from the foundation of the city," *i.e.* of Rome, which event is placed by Varro in the year	753
	——— By Cato the Elder in the year	752
8.	The æra of Vicramadítya, in common use throughout Hindostan	57
9.	The Spanish æra, that of the conquest of Spain by Augustus. It was employed in the Peninsula, the south of France, and Africa, and was in use in some provinces until the middle of the 15th century. It commences Jan. 1	38
10.	The Æra of Martyrs, or of Diocletian. Much used by the early Christians, and still employed in the churches of the East, commences Aug. 29	A.D. 284
11.	A.H., *anno Hegiræ*. The Hegira, or flight of Mohammed to Medina: the æra used by all Mohammedans, commences July 16	622
12.	A.D., *anno Domini*, "in the year of our Lord." The Christian æra is the date of the birth of Christ.	

AËRATED WATERS.—Venel pointed out the existence of fixed air in the waters of Seltzer, Spa, and Pyrmont, in 1755, and Lane taught the art of imitating chalybeate springs in 1769. Dr. Priestley's directions for impregnating water with fixed air were published in 1772. Henry Thompson, of Tottenham, patented an invention for impregnating mineral waters with one or more aëriform fluids, Oct.

30, 1807. An improved apparatus was introduced by F. C. Bakewell in 1832, and C. Searle patented a new description of aërated water May 24, 1838. Baker introduced further improvements Nov. 11, 1847. F. M. Lanoa, of Paris, patented a process for filling bottles with such liquids, Nov. 3, 1851; and T. Masters introduced an invention for a similar purpose, Dec. 11, 1851.

AËRIANS.—A branch of the Arians, followers of Aërius, a presbyter and monk, native of Pontus. This sect arose 342, and spread rapidly through Cappadocia, Armenia, and Pontus. Aërius, disappointed at not obtaining the bishopric of Sebaste, in Armenia, maintained that there was no difference between bishops and presbyters. He disapproved of prayers for the dead, stated fasts, the celebration of Easter, and attempted to restore religion to its primitive simplicity. Exposed to persecution, his followers assembled in woods and caves. The sect was still in existence in the time of St. Augustine.

AËROLITES.—Livy states that a shower of stones fell about B.C. 654, on the Alban Mount, near Rome. Plutarch mentions one, recorded in the Parian Chronicle, that fell at Ægospotami, B.C. 467. In modern times a stone, weighing 2 cwt., fell at Ensisheim, in Alsace, Nov. 17, 1492. A shower of stones fell near Benares, Dec. 19, 1798. A similar occurrence took place in Normandy, some of the stones weighing 16 or 17 lb., April 26, 1803; and near Bonn several fell July 19, 1816, one of them weighing nearly 100 lb. The list might be extended almost indefinitely.

AËRONAUTICS.—Archytas, of Tarentum, who flourished about B.C. 400, constructed the figure of a dove in wood, which was enabled by internal machinery to soar into the air; and Strabo (B.C. 60 to A.D. 21) states that the Scythian tribe the Capnobatæ raised themselves above the earth by means of smoke. Friar Bacon (1270) affirmed the existence of a flying machine; and the Jesuit Francis Lana, in 1670, described a machine, of his own invention, to be raised by metal balls exhausted of the air. Wilkins, Bishop of Chester, in his "Discovery of a New World," published in 1638, endeavoured to prove that it is possible to construct a flying machine or an aërial carriage, to be propelled by the air acting on sails similar to those of a windmill, to make a voyage to the moon. The aërial machine of Mr. Henson, patented in 1842, and the Archedon, or flying chariot, introduced by Lord Carlingford in 1857, are among the most noteworthy of modern attempts to solve the problem of aërial navigation. The "Aëronautical Society" of Great Britain was established Jan. 12, 1866. (*See* BALLOON).

AËROSTATION.—(*See* AËRONAUTICS and BALLOONS.)

ÆS UXORIUM.—A tax paid by unmarried men at the census or review of the people of Rome. It appears to have been first imposed B.C. 403.

AETH.—(*See* AATH.)

ÆTHIOPIA.—(*See* ETHIOPIA.)

AËTIANS.—This heretical branch of the Arians was founded by Aëtius, a native of Antioch, surnamed from his doctrines the Atheist. Left fatherless in early childhood, he became successively a slave to a vine-dresser, a travelling tinker, and a student of medicine. In 331 he studied theology under Paulinus II., the Arian bishop of his native town. Being compelled by public odium to remove from Antioch, he found refuge in Cilicia, but, after various wanderings, he was permitted to return in 348, and was ordained deacon in 350. In 351 he first manifested his dissent from the ordinary dogmas of Arius, in a dispute with Basil, the Arian Bishop of Ancyra, and in 354 he was again compelled to quit Antioch, where he had endangered his safety by taking part in the murder of the Oriental præfect Domitian. His doctrines were condemned at the Council of Seleucia, Sep. 27, 359, and he was banished to Amblada, in Pisidia, where he remained until the death of Constantius, in 361, when he was recalled by Julian. Shortly afterwards he was ordained bishop at Constantinople, where he remained for the most part till his death in 366. Aëtius taught that the Saviour possessed a mere creaturely nature, essentially inferior to that of the Father. He also maintained that faith without works is sufficient to salvation, and that no sin, however grievous, can be imputed to the faithful. The Aëtians are also called Anomœans and Eunomians.

ÆTNA, MOUNT (Sicily).—Thucydides mentions an eruption of this volcano B.C. 475, and states that there had been one previously, of which he does not give the date. He also refers to a third, which took place B.C. 425, and is spoken of by Æschylus and Pindar. The next of importance, which occurred B.C. 396, arrested the march of the Carthaginian army from Messina to Syracuse. Ætna burst forth with extraordinary activity B.C. 140, B.C. 135, B.C. 126, and B.C. 121, destroying on the last occasion great part of the city of Catania. The volcano was again active B.C. 49, B.C. 44, B.C. 38, and B.C. 32. During the Roman empire only two eruptions are recorded, in A.D. 70 and 251. Another took place in 812, and again Feb. 4, 1169, when Catania was again overwhelmed and 15,000 lives destroyed. Subsequent eruptions occurred in 1284; June 28, 1329; in 1333; Nov. 9, 1408; in 1445; 1446; in Sep., 1447; in March, 1535; in 1566; 1578; in July, 1603; 1607; in Feb., 1610; July 2, 1614; in 1619; 1624; Feb. 22, 1633: in Nov., 1645; and in 1654. The city of Catania (*q. v.*) was a third time destroyed, March 8, 1669, when the lava formed a promontory in the sea, which serves as a natural breakwater. Eruptions occurred in Dec., 1682; 1688; March 14, 1689; March to Dec., 1694, on which occasion only ashes were thrown up; March 8, 1702; in Nov., 1723; in Oct., 1735; and in Sep., 1747. Torrents of hot water were poured forth March 2, 1755. Ordinary eruptions recommenced in 1759, and continued June 19, 1763; April 2, 1766; May 18, 1780; April 24, 1781; July 28, 1787; in March, 1792; in June, 1798; in June, 1799; Feb. 27, 1800; 1802; March 27, 1809; Oct. 28, 1811; May 29, 1819; and May 20, 1830. The volcano resumed activity Feb. 17, and July 13, 1831, when a new island appeared at a little distance from the coast. Another eruption, by which the town

of Bronte was destroyed, commenced Oct. 31, 1832, one of less violence, in Dec., 1842, and another broke out Aug. 20, 1852, and continued for several weeks, but without resulting in any serious injuries. The Rev. J. F. Hardy ascended Mount Ætna May 1, 1858. A slight shock of an earthquake occurred Dec. 31, 1864, and an eruption broke out during a thunderstorm in the night of Jan. 31, 1865, and continued for several months.

ÆTOLIA (Greece).—"Renowned as are the names of their earliest heroes," says Heeren, "Ætolus, Peneus, Meleager, Diomede, the nation has no place in the history of the flourishing times of Greece. Nor did they acquire any celebrity until the Macedo-Roman period, when the various insignificant tribes of which they were composed gathered themselves together and chose one common leader, for the purpose of carrying on a war with the Achæans." The Ætolians are said to have sent 40 ships, under the command of Thoas, to the Trojan war; but from this period, until the formation of their league, they are seldom noticed. The Ætolians are said to have taken Elis B.C. 1104.

ÆTOLIAN LEAGUE, composed of tribes instead of cities, was an imitation of the Achæan League. Its origin is involved in obscurity, though some assert that it was formed B.C. 914. It is known to have existed in the time of Alexander III. (the Great), if not in that of his father, Philip II. The great council of the nation, called the Panætolicon, met every autumn at Thermum; and there was another deliberative body, called the Apocleti, which is supposed to have been a kind of permanent committee.

B.C.
343. The Ætolian League joins the Greek confederacy against Macedon in the Lamian war.
322, Aug. 7. The Greeks are defeated at Crannon, and the Greek confederacy is dissolved. Craterus and Antipater invade Ætolia, and after some success are compelled to withdraw.
321. The Acarnanians, who had invaded Ætolia, are expelled.
289. Demetrius ravages Ætolia.
279. The Ætolian League joins the struggle against Brennus and the Gauls, who are expelled from Greece.
220. The Social war between the Ætolian and the Achæan Leagues commences.
219. Philip V. supports the Achæans and invades Ætolia.
218. Philip V. surprises Thermum, sets fire to the sacred building and the spoil he could not carry away.
217. The treaty of Naupactus terminates the Social war.
211. Offensive and defensive alliance between Rome and the Ætolian League.
205. Philip V. invades Ætolia, sacks Thermum a second time, and the Ætolians, deserted by the Romans, make peace with him.
200. The Ætolian League declares war against Philip V.
197. The Romans and Ætolians defeat Philip V. at the battle of Cynoscephalæ.
196. General peace.
192. The Ætolian League joins Antiochus in a war against Rome.
191. After the defeat of Antiochus at Thermopylæ, the Ætolians sue for peace and obtain a truce.
189. The Ætolians make a humiliating peace with Rome.
167. The Ætolian League is dissolved.

AFFGHANISTAN (Asia).—An extensive kingdom, which, as part of the old Persian empire, passed under the yoke of Alexander III. (the Great) B.C. 330. Seleucus Nicator annexed it (B.C. 305) to his Syrian empire, with which it remained incorporated till it recovered its independence, B.C. 255. It was conquered successively by the Scythians, Persians, and Saracens, falling to a Tartar dynasty A.D. 997. Zingis Khan and Tamerlane subdued it; Baboor, or Baber, the fifth in descent from the last-mentioned, established the great Mongol empire, of which Delhi was the capital, 1525. After his death, portions of Affghanistan fell to Persia and Hindostan, whilst many Affghan tribes remained independent. Nadir Shah once more brought the whole country into subjection to Persia, in 1737, and after his death, in 1747, Ahmed Khan united all the Affghan tribes, and founded the present kingdom of Affghanistan. Various revolutions have since occurred. The Shah Dost Mohammed seized the town of Herat, May 26, 1863, and died May 29, after nominating his son Shir-Ali-Khan as his successor. (*See* AFFGHAN WAR.)

AFFGHAN WAR.—During the revolution in Affghanistan, England declared in favour of Shah Shooja, and on the refusal of Dost Mohammed Khan to submit, Lord Auckland declared war, Oct. 1, 1838. The Anglo-Indian army quitted Shirkapore early in March, 1839, took possession of Kandahar April 20, and Shah Shooja was crowned there May 8. Ghuznee was captured July 23, and Cabul August 7. Part of the army remained to support Shah Shooja. Dost Mohammed Khan himself surrendered Nov. 4, 1840. A revolt against the English broke out at Cabul Nov. 2, 1841, when Sir A. Burnes and several officers and soldiers were assassinated. Sir W. H. McNaghten was ruthlessly murdered during a conference, by Akbar Khan, son of Dost Mohammed, on Christmas-day in the same year. The remainder of the force stationed in this country concluded a treaty with the Affghan chiefs for its immediate evacuation. The order for departure was given Jan. 5, 1842; but such was the treachery practised on the occasion, and the fury with which, in spite of promises of safe conduct, they were assailed, that only three natives and one European, out of an army of 5,000 men and a large number of camp-followers, including women and children, reached Jellalabad. Lady Sale, and some English ladies who had surrendered to Akbar Khan, were afterwards restored. Jellalabad, besieged by Akbar Khan Jan. 18, 1842, was successfully defended by General Sale. General Pollock came to his aid April 5; General Nott recovered Ghuznee Sep. 9; Cabul was partially destroyed Oct. 9; and, having accomplished the objects in view, the British forces evacuated the country in October, 1842.

AFFINITY.—In the book of Leviticus (chap. xviii.) certain regulations are laid down respecting unlawful marriages; and most ancient nations legislated on this subject. An act passed in 1534 (25 Hen. VIII. c. 22) decreed that none should marry within the Levitical degrees, and Archbishop Parker drew up a "Table of kindred and affinity, wherein whosoever are related are forbidden in Scripture and our laws to marry together." This he ordered to be printed and set up in the churches. The degrees of affinity or relation-

ship by marriage within which persons are forbidden to marry, were fixed by the Constitutions and Canons Ecclesiastical, made in 1603, during the reign of James I. Marriages within the prohibited degrees could only be annulled by the Ecclesiastical Courts, and in case a decree did not issue during the lifetime of the parents, the offspring was considered legitimate; but by the 5 & 6 Will. IV. c. 54 (Aug. 31, 1835), all such marriages celebrated after the passing of that act were declared to be absolutely null and void. This act did not extend to Scotland.

AFFIRMATION.—The solemn affirmation of Quakers in a court of justice was accepted instead of an oath by 7 & 8 Will. III. c. 34 (1696). This statute was extended by 8 Geo. I. c. 6 (1722), and by 22 Geo. II. c. 46, s. 36 (1749); but a clause was inserted, prohibiting Quakers from giving evidence in this manner in criminal cases. This exception was, however, removed by 9 Geo. IV. c. 32 (June 27, 1828). A similar privilege was granted to Separatists, and by 1 & 2 Vict. c. 77 (Aug. 10, 1838), to any person who shall have been a Quaker or a Moravian.

AFRICA.—The ancient Greeks applied the term Libya (*q. v.*) to the portion of this quarter of the globe known to them, and the Romans called their first colony in this continent, consisting of Carthage and the adjoining district, Africa. The name of the Roman colony was afterwards applied to the entire continent. The Romans obtained possession of Carthage B.C. 146. Other portions were speedily added, until the number of provinces reached five. The Africans revolted A.D. 296, were subdued by Diocletian; rebelled again in 372, and Theodosius restored the Roman authority in 373. Genseric, King of the Vandals, landed in Africa in May, 429, and had overrun a considerable part by the year 439. Belisarius wrested Africa from the Vandals in 534. It revolted again in 535, and, after a series of struggles, was again reduced to subjection. The Saracens invaded it in 643, and by the year 709 had completed its conquest. The Arabs and the Normans are said to have visited the W. of Africa in early times, and the French claim for some Dieppe mariners in 1364 the priority of discovery in this direction. It has, however, been proved that the French had no commercial relations with Africa before 1664, and no commercial treaty with any African ruler previous to 1785. The Portuguese, in the 15th century, were the first to obtain more definite information respecting the form and dimensions of Africa. They ascertained the correctness of the assertion of Herodotus, that it was, except at the Isthmus of Suez, surrounded by water. They were followed by the English, the French, the Dutch, and other nations. During the earlier portion of the 15th century, several efforts were made to obtain further knowledge of this vast continent, but nothing important was accomplished until 1444, when a number of individuals at Lagos formed themselves into a company for the prosecution of African discovery and colonization. (*See* ABYSSINIA, EGYPT, ETHIOPIA, and various settlements in Africa.)

A.D.

1330-4. A French ship is driven by tempest amongst the Canary Islands.

1344. The Count of Clermont receives from Clement VI., at Avignon, investiture of the crown of the Canary Islands. He does not, however, take possession.

1402. Bethencourt's expedition sails to the Canary Isles.

1405. Bethencourt quits the colony.

1415. King John I. of Portugal takes Ceuta, and bestows it upon his son Prince Henry.

1418. The Portuguese navigators, Zarco and Tristam Vaz, double Cape Bojador, and discover Porto Santo.

1419. Madeira is discovered by Zarco and Tristam Vaz.

1432. Gillianez doubles Cape Bojador, and explores the coast beyond.

1440. Gonzalvez reaches Cape Blanco.

1441. Martin V. grants to the Portuguese crown all lands that it shall discover from Cape Bojador to the Indies.

1442. The trade in gold dust is commenced.

1443. Tristam doubles Cape Blanco. Ten slaves brought to Seville by Gonzalvez were the first that appeared in Europe. The Portuguese form an Association for carrying on trade in gold and in slaves.

1444. Association for the prosecution of African discovery is formed at Lagos.

1445. Senegal is discovered by Dyas or Dinis Fernandez, who sails as far as Cape Verde.

1447. Lançarote explores the coast as far as the river Gambia.

1448. The Portuguese take possession of the Azores.

1449. Noli discovers the Cape Verde Islands. This discovery is said, according to different accounts, to have been made in 1450, 1460, and 1462.

1450. About this time Arguim, the first Portuguese establishment on the African coast, was founded.

1454. A trade in slaves is carried on at Arguim.

1456. Ca da Mosto, a Genoese, lands on the Cape Verde Islands and visits the river Gambia.

1462. Pedro de Cintra discovers Sierra Leone.

1469. Fernando Gomez obtains a monopoly of the gold trade to the coast of Guinea.

1471. The Gold Coast is discovered by Santarem and Escobar.

1481. El Mina fort is erected by the Portuguese on the coast of Ashantee.

1484. Diego Cam discovers the river Congo.

1486. Covilham goes from Fez to Arabia, and thence to India.

1487. Bartholomew Diaz discovers the Cape of Good Hope, which he names Cape Stormy.

1490. Portuguese missionaries penetrate to Congo.

1497. Nov. 19. Vasco de Gama doubles the Cape of Good Hope, and explores the coast beyond it. He touches at Mozambique, &c.

1502. Vasco de Gama, with a fleet of 20 ships, sails for Quiloa, and compels its king to pay tribute to Portugal.

1505. Almeda takes Quiloa and Mombaz. The King of Spain, in a letter dated Sep. 15, promises to send Ovando 100 negro slaves.

1506. The Portuguese explore Madagascar.

1508. The Spaniards import negroes into Hispaniola from Guinea.

1536. Some merchants of Bristol trade to the Canary Islands.

1530. An English ship sails to Guinea.

1562. Three English ships are sent to Guinea.

1569. A Portuguese expedition reaches Zimbao, and the gold-mines of Manica.

1572. A treaty is made between England and Portugal for the better regulation of their trade with the coast of Guinea.

1577. Queen Elizabeth sends an ambassador to the Emperor of Morocco, and English merchants settle in the country.

1585. A company is formed, by letters patent from Queen Elizabeth, for the management of the trade with Barbary and Morocco.

1588. Queen Elizabeth grants a patent to a company. A ship and pinnace make the first voyage from London to Benin.

1591. An English expedition is sent to the Gold Coast.

1597. Queen Elizabeth addresses a letter to the King of the Abyssinians, the mighty Emperor of Ethiopia.

1618. The African Company is formed in London. They send Thomson on an expedition to explore the Gambia.

A.D.
1619. Thomson is killed whilst ascending the river Gambia.
1641. His successor Jobson explores the Gambia as far as Tenda.
1626. The French settlement of St. Louis is founded.
1631. The second African Company is formed by Charles I. for the purpose of trading to the coasts of Guinea, Benin, and Angola. The people of Mombas expel the Europeans.
1637. El Mina is wrested from the Portuguese by the Dutch, who had gradually stripped them of their possessions in Africa.
1638. Jannequin visits the French possessions in Africa.
1650. The Dutch establish their first colony at the Cape of Good Hope.
1663. The third African Company is formed by Charles II., with the privilege of the sole trade to Guinea.
1665. Vermuyden ascends the Gambia in search of gold.
1672, Sep. 27. The third African Company surrenders its charter, and a fourth, the last, is established.
1697. Brue starts from Senegal on an expedition into the interior.
1724. Stubbs is sent by the African Company to the Upper Gambia.
1772. Norris travels through Dahomey and reaches Abomey.
1787. An English settlement, composed partly of negroes, is established in Sierra Leone.
1788. The African Association is formed in London, and sends Ledyard to Africa.
1789. Ledyard dies at Cairo.
1791. Houghton fails in an attempt to reach Timbuctoo.
1794. Watt and Winterbottom visit Foota Jallo.
1795. Mungo Park starts from the Gambia. He traces the Niger to Silla, explores the intervening countries, and returns in 1797.
1797. Barrow makes a tour through the districts at the Cape of Good Hope.
1798. Hornemann sets out from Cairo on a tour, in which he perished.
1801. Trotter and Somerville reach the Orange River, and penetrate to Lattakoo.
1805. Mungo Park sets out on his second expedition, from which he never returned.
1813. Campbell founds a Christian mission at Lattakoo.
1816. Tuckey explores the river Congo, and Peddie penetrates to Kakundy.
1817. Campbell reaches the Panietta. James, Bowdich, and Hutchinson proceed on a mission to Coomassie, the capital of Ashantee.
1819. Lyon and Ritchie reach Mourzouk. The latter died Nov. 20, and Lyon penetrated to Fezzan.
1820. Dupuis goes on a mission to Coomassie.
1822. Clapperton, Denham, and Oudeney cross the Great Desert and visit Bornou. Major Denham reaches Lake Tsad in 1824, and Clapperton and Oudeney penetrate to Sackatoo. The three travellers reach Tripoli in Jan., 1825.
1825, Dec. 7. Clapperton quits Badagry on his second mission into Central Africa.
1826. Laing sets out from Tripoli, crosses the desert, and reaches Timbuctoo Aug. 18; and having set out on another journey is murdered.
1827. Caillié travels from Kakundy to Timbuctoo, and, after crossing the desert, reached Tangier Aug. 18, 1828.
1830. Richard and John Lander trace the Niger to its mouth, in the Bight of Benin.
1832. An expedition, provided with two small steamers, leaves Liverpool with the view of ascending the Niger.
1836. Alexander explores S. Africa.
1845. Duncan reaches Adafoodia, in the interior of Africa.
1849. Livingstone, Oswell, and Murray set out from Kolobeng, travel through the desert of Kalahari, and trace the river Zouga to the Lake Ngami.
1850. Richardson, Barth, and Overweg start on their expedition, and Livingstone goes on a second journey to Lake Ngami.
1851. Livingstone and Oswell proceed on another expedition and make further discoveries.
1855. Livingstone discovers the Victoria Falls of the Zambesi River towards the close of this year.
1856, Dec. 10. Livingstone reaches London after having traversed 11,000 miles in S. Africa.—Dec. 15. He receives the gold medal of the Royal Geographical Society.
1856 to 1859. Paul B. Du Chaillu, the gorilla hunter, explores Equatorial Africa.

A.D.
1857, Sep. 18. Capt. Richard Francis Burton crosses the East African Ghauts.
1858, March 10. An expedition to Africa, under the direction of Dr. Livingstone, sails from Liverpool.—April 26. Capt. Burton reaches Uvira, the limit of his African explorations.—July 30. Capt. J. H. Speke discovers the Victoria Nyanza, or lake.
1860, April 27. Capt. Speke embarks from England on a second expedition of discovery, in company with Capt. Grant.—Oct. 1. They quit the East African coast, and commence their inland journey of exploration.
1861, Sep. 2. Dr Livingstone enters Lake Nyassa.
1862, April 27. Mrs. Livingstone dies of fever at Shupanga.—July 28. Capt. Speke discovers a river issuing from the Victoria Nyanza at Ripon Falls, which he believes to be the Nile. (*See* NILE.)
1863, July 2. The Zambesi expedition is recalled.
1864, July 20. Dr. Livingstone reaches London.—Sep. 15. Capt. Speke is accidentally killed while shooting near Bath.
1865, April. Dr. Livingstone leaves England.—Nov. "The Narrative of an Expedition to the Zambesi and its Tributaries; and of the Discoveries of Lakes Shirwa and Nyassa, 1858-1864," by David and Charles Livingstone, is published by Murray.

AFRICAN ASSOCIATION, formed in London June 9, 1788, was incorporated with the Royal Geographical Society July 23, 1831.

AFRICAN CHURCH, was probably founded in the 2nd century, as Optatus was Bishop of Carthage about the year 200, and a council of bishops was assembled by Agrippinus, Bishop of Carthage, about 215. In the 3rd century the African Church was rendered illustrious by Tertullian, Cyprian, and Lactantius; in the 3rd and 4th centuries it resolutely maintained its independence against Rome. In the 5th century this Church suffered much from the Vandal invasion under Genseric. It was also severely tried by the Donatist, Arian, Manichæan, and Pelagian heresies, and it furnished many martyrs to the cause of Christianity. The early African Church was overthrown by the Saracens, who, in the 7th and 8th centuries, made themselves masters of the whole of the north of Africa. In addition to the diocese of Africa, divided in the time of Constantine I. into six provinces, with about 466 bishoprics, this quarter of the globe contained the patriarchate of Alexandria, or the diocese of Egypt. Numerous missions have been sent from England during the 18th and 19th centuries, for the purpose of disseminating Christianity in different parts of Africa. The Rev. T. Thompson, who went from New Jersey to the coast of Guinea in 1751, was the first missionary. Philip Quaque, a native sent to England to be educated, was ordained in 1765, and returned to Africa in 1766, where he laboured for upwards of half a century. Several councils held at different places in this quarter of the globe are known as African councils. The principal were in 217, 256, 257, 380, 414, 553, and 646. The other African councils will be found under CARTHAGE, HIPPO, &c.

AFRICAN COMPANY.—In 1585 a patent was granted by Elizabeth to private adventurers to trade to Barbary; in 1588 to others to trade to Guinea; and in 1592 to the south of Sierra Leone. Companies were formed in the reigns of James I. and Charles I., and the Royal African or Guinea Company of Merchants was incorporated by Charles II., Jan. 20, 1663. Under this charter, the company received the

exclusive right of trading from Salee to the Cape of Good Hope. They surrendered their charter, and the Royal African Company of England, with extensive privileges, was established by patent, Sep. 27, 1672; but in 1698 an act was passed leaving the trade, comparatively speaking, free. Various methods were devised for supporting the trade and remodelling the company, until, by 1 & 2 Geo. IV. c. 28 (May 7, 1821), the company was abolished, the Crown took possession of all forts and settlements in Africa, and the trade was thrown open.

AFRICAN INSTITUTION, was established in London in April, 1807, to collect accurate information respecting the African continent, and introduce the arts of civilization among its people.

AGAPÆ, or love feasts, were instituted in the time of the Apostles, and continued in use among the primitive Christians for three centuries. They sometimes preceded, but more usually followed, the Eucharist, from which they were afterwards altogether disconnected. Robertson (Hist. of the Christian Church to the Pontificate of Gregory the Great, p. 320), says the word was afterwards used to designate festivals held by churches at the tombs of martyrs, or by families at those of their relatives, and took the place of the heathen Parentalia. The abuses committed in them became so notorious that they were solemnly condemned, first by the Council of Laodicea (366), and afterwards by the second Council of Carthage (390).

AGAPÆMONE.—This establishment, a retreat for the followers of Brother Prince, was founded at Charlynch, near Bridgewater, in 1845. They are a branch of the Lampeters, and affect to believe that the day of grace and prayer is past, and the time of judgment arrived. A meeting, called at Hanover Square, Sep. 26, 1856, for the promulgation of their views, proved a failure. These sectaries are called Agapæmonians. A sect, with similar aims and views, called the "Family of Love," was founded by Henry Nicholas, a Westphalian, in 1540. He came to England, and towards the latter end of the reign of Edward VI. made several converts. Five members of this sect, called Familists, stood at Paul's Cross, and renounced their errors, June 12, 1575. Queen Elizabeth issued a severe proclamation against them Oct. 3, 1580. Fuller quaintly terms the sect "The Family of Love, or Lust rather." The Familists presented a petition to James I. in 1604, and, though their numbers declined, they were not extinct in 1645.

AGDA or AGDE (France).—A council on discipline, convened by Alaric, King of the Visigoths, was held here, Sep. 11, 506, when 47 canons were drawn up.

AGE.—In the later periods of Greece and Rome, 25 was considered the full age for both sexes. In Rome, 43 was the legal age for consuls, and 30 for tribunes. Augustus fixed 30 instead of 35 for judges. That of puberty was 14 for males and 12 for females. By the feudal law, the moment a youth was knighted, he was considered of age, and at 16 this honour was frequently conferred. The kings of France were considered majors at 15. Henry III., the first minor, after the Conquest, who obtained the English crown, was declared a major at 16, though he did not assume his right until he was nearly 20, in Feb. 1227. Edward III., the next minor who mounted the throne, took the government in his own hands before he was 18; Richard II. was considered a minor till he was 22; and Henry VI. till he was between 23 and 24. Henry VIII. made a law for his own children, that if his son succeeded, he was to be eligible for sovereign authority at 17, and if a daughter, at 15; but he afterwards fixed 18 as the age at which Edward VI. was to assume the government, and he was actually constituted eligible for sovereign authority at that age. By 18 & 19 Vict. c. 43 (July 2, 1855), any male infant of 20, or any female of 17, may, with the sanction of the Court of Chancery, make a valid and binding settlement of either his or her real or personal estate, in contemplation of marriage. A male at 12 may take the oath of allegiance, at 14 is at years of discretion, and subject to punishment by death. A female at 12 is considered to have arrived at years of maturity, may, with permission of her guardians, enter into a binding marriage, or consent or disagree to one previously contracted. Formerly, a male of 14 could make a will disposing of his personal estate, if his discretion were satisfactorily proved; but by 1 Vict. c. 26, s. 7 (July 3, 1837), no will is valid if made by a person under the age of 21. By 7 & 8 Will. III. c. 25, s. 8 (1696), a minor was disqualified to be elected to Parliament. Before that act passed, several members were under age. Minors, however, sometimes sit "by connivance." Charles James Fox was elected for Midhurst soon after he had attained his 19th year.

AGEN (France).—The ancient Agennum, or Aginnum, of the Nitiobriges, came into the possession of England with the rest of Guienne, in 1151, by the marriage of Henry II., then Duke of Normandy, with Eleanor of Guienne, the divorced wife of Louis VII. of France. These possessions led to frequent wars between France and England. Agen was captured by the French in 1322, regained by the English in 1330; again lost, and restored to England by the treaty of Bretigny (May 8, 1360). It was finally incorporated with France in 1453. In 1561 it was taken by the Huguenots, who lost it the following year, but regained possession in 1591, and in 1592 it surrendered to Henry IV.

AGENHINE, or HOGENHINE.—In England, by a law of Edward the Confessor (1043—1066), any one who partook of hospitalities in a house, and remained till the third night, was reckoned under the jurisdiction and protection of the host, in the same manner as if he had been regularly enrolled as one of the family or domestics. Such a one, on the first night of his sojourn, could only be termed *uncuth*, that is, a stranger; on the second, *gust*, that is, a guest; and on the third, *agenhine* or *hogenehune*, that is, a friend or domestic servant.

AGHADOE (Bishopric). — Dionysius was bishop of this Irish diocese in 1266, but the see is usually mentioned in conjunction with that of Ardfert (*q. v.*) and has since given title to an archdeacon. The church, which was in a

ruinous condition in 1662, has since fallen into decay.

AGINCOURT, or AZINCOUR (Battle).—At this village, in the Pas-de-Calais, France, 10,000 English, under Henry V., defeated from 50,000 to 60,000 French, with great slaughter, Friday, Oct. 25, being St. Crispin's day, 1415.

AGISTMENT, a small tithe on cattle, or the other produce of grazing lands, payable in England by the occupier to the vicar or rector. In Ireland, while the lands were chiefly in the hands of Roman Catholics, the clergy thankfully received whatever they could get. It was, however, formally demanded by the Protestant clergy in 1720, but was vehemently resisted by the landlords. The Irish House of Commons resolved, March 18, 1735, "that any lawyer assisting in a prosecution for tithes of agistment should be considered as an enemy to his country." This tithe was abolished in Ireland by the Act of Union.

AGITATORS, or ADJUTATORS, a term applied in English history to the two privates or inferior officers elected in 1647 by each troop or company of the army. These, with a council of the principal officers, after the model of the House of Peers, formed what Hume terms "a terrible court." Thus, at the instigation of Cromwell, Skippon, Ireton, and Fleetwood, a military parliament, in opposition to the Parliament at Westminster, was called into existence. The agitators seized the person of the king (June 4), and, after committing various excesses, were suppressed. In later times, demagogues who have endeavoured to excite disaffection amongst the people, or to obtain changes in the laws by inflammatory appeals, have been styled agitators.

AGLABITES, an African dynasty, the successors of Ibrahim Ben Aglab, governor of Africa B.C. 797. Zeyadatala was the last of this dynasty, the duration of which was 112 years.

AGNADEL, or AGNADELLO (Battle), fought on the banks of the Adda, May 14, 1509, between the French, commanded by Louis XII., and the Venetians. The latter were defeated with great loss. It is called by the Italians the battle of Vaila, or of the Ghiara d'Adda. Each army consisted of about 40,000 combatants.

AGNOETÆ, a sect of the Monophysites, so called from the ignorance they attributed to our Lord with reference to his human nature, was founded by Theodosius, Patriarch of Alexandria, who retired to Constantinople between 538 and 540, and founded the Agnoetæ.

AGNOITES, or AGNOËTÆ.—This name was applied to two sects, branches of the Monophysites, viz., the followers of Theophronius of Cappadocia, about 370, and the followers of Themistius, a deacon of the Church of Alexandria, in 535. They both held peculiar notions respecting the prescience of the Almighty. The latter sect were also called Themistians from their leader.

AGNUS DEI, wax medals, stamped with the figure of a lamb bearing a cross, intended to represent the Lamb of God, were, in the early Church, distributed amongst candidates for baptism. The practice originated in the 7th or 8th century. The Popes have, since the 14th century, been in the habit of consecrating similar medals, made sometimes of the precious metals, for distribution the first Sunday after Easter. By 13 Eliz. c. 2, s. 7 (1571), any person bringing into the realm any token or thing called by the name of Agnus Dei, incurred the penalty of a præmunire.

AGONISTICI, disciples of Donatus, Bishop of Carthage, sent by him in 342 into different parts of Africa, to preach his peculiar doctrines at fairs, markets, and places of public resort, whence they were called Circutores, Circumcelliones or Circeliones, and Catropitæ. They styled themselves *agonistici* (combatants), under the pretence that they were combating and triumphing over the devil; and they were called *circumcelliones*, or vagrants, from the *cellæ*, cottages of the peasants, where, having no fixed residence, they sought a retreat. Having committed various excesses, they were punished with great severity.

AGONYCLITÆ.—Certain Christians in the 7th century, who, considering it unlawful to bend the knee in prayer, remained in a standing posture.

AGRA (Hindostan).—By 3 & 4 Will. IV. c. 85, s. 38 (Aug. 28, 1833), it was enacted that the Bengal presidency should be divided. The north-western country was to be erected into a fourth presidency, that of Agra; but the legislature afterwards ordered the measure to be suspended.

AGRA (Hindostan), the capital of the north-west provinces of Bengal, was founded by Akbar in 1566, and continued the seat of the Mongol emperors till 1647, when Delhi was made their capital. It was taken by Scindia in 1784, and surrendered to Lord Lake Oct. 17, 1803. Among the spoils on that occasion was a cannon, made to throw cast-iron balls of 1,500 lb. It was 14 feet 2 inches long, and weighed 96,000 lb. It is said to have been wantonly blown to pieces by some artillery officers in 1833. Nearly all the European buildings in Agra were destroyed during the mutiny of 1857; but their owners were preserved in the large and strongly defended fort. The native troops were disarmed June 1, 1857. The Europeans attacked the Neemuch force and the Kotah contingent, July 5, 1857, but were compelled to retreat. Greathed gained a signal victory here over the rebel forces, Oct. 10, 1857.

AGRAMONTS and BEAUMONTS.—These rival factions, which originated in a personal quarrel between two of the most powerful families in Navarre, adopted opposite sides in the dispute between John II. of Aragon and his son Don Carlos, Prince of Viana. The king, who inherited Navarre in right of his first wife, Blanche, continued to exercise sovereignty after her death, which took place April 3, 1441, disregarding the right of his son, Carlos, to whom the throne should lineally have descended, but who was satisfied with the dignity of viceroy. John, however, having contracted a second marriage, in 1447, with Joan Henriquez, of Castille, sent her, in 1452, into Navarre to divide with her step-son the viceregal authority. The result was an appeal to arms, in which the queen was supported by

the Agramonts, and the prince by the Beaumonts, and which terminated in the defeat of the latter party at the battle of Aibar (*q. v.*).

AGRARIAN LAWS.—Niebuhr has shown that the agrarian laws of the Romans did not interfere with or affect private property in land, but related exclusively to the public domain. Portions of the territory of conquered states were divided, and these laws provided for their proper distribution. The first proposal of an agrarian law in Rome, made by the consul Spurius Cassius (B.C. 484), failed. Cassius was condemned and executed on a false charge of treasonable designs (B.C. 483), and Livy observes that no measure of the kind was ever proposed up to his time (the reign of Augustus) without exciting the greatest commotion. An agrarian law, which served as a model for all subsequent measures of the kind, was carried by the tribune C. Licinius Stolo (B.C. 365), and called the Licinian law. It provided that no person should occupy more than 500 jugera of public land, nor have more than 100 large and 500 small cattle grazing on the public pastures. Tiberius Sempronius Gracchus, who attempted to amend this law (B.C. 133), was killed. His law for appointing three commissioners, to be chosen annually by the 35 tribes, who were to decide all disputes on the subject, was virtually suspended B. C. 129, until B. C. 123, when Caius Gracchus, his brother, put it in force. He lost his life B.C. 121. Some irregularities afterwards ensued, and the tribune Spurius Borius carried a law to prevent further divisions of the public land, provided that the proceeds of the sale thereof should be formed into a fund for the relief of the poor. This was repealed by a law proposed by another tribune, Spurius Thorius (B.C. 111). M. Livius Drusus, who proposed the division of all the public land in Italy, was killed B.C. 91, and civil war ensued B.C. 90. P. Servilius Rullus failed in recommending some changes (B.C. 63), and the tribune Flavius proposed a law for providing Pompey's soldiers with lands (B.C. 60), which was reproduced and carried, with some alterations, by C. Julius Cæsar (B.C. 59).

AGRICOLA'S VICTORY.—(*See* ARDOCH.)

AGRICOLA'S WALL.—The remains of two Roman walls exist in this country. One of these fortifications extended from the Solway Frith to the mouth of the Tyne, being the southern (*See* HADRIAN'S WALL); the other from the Clyde to the Frith of Forth, being the northern fortification. The latter, called the Wall of Agricola, of Lollius Urbicus, or of Antoninus, is an earthen intrenchment, familiarly known as Grime's or Graham's Dyke. Tacitus states that Agricola constructed a chain of forts from the Clyde to the Forth A.D. 81, and Capitolinus asserts that Lollius Urbicus, during the reign of Antoninus Pius, erected a rampart of turf A.D. 140. This is the fortification that is now known under the various names of the Wall of Agricola, of Antoninus, or of Lollius Urbicus. (*See* ROMAN WALLS.)

AGRICULTURAL DISTRESS.—A select committee, appointed to inquire into the state of the agricultural interests and the causes of its depression, Feb. 8, 1836, sat some time, but made no report.

AGRICULTURAL HALL.—The first stone of this building, situated in the north of London, was laid by Lord Berners, president of the Royal Agricultural Society, Nov. 5, 1861, and the hall, in an unfinished state, was opened for the purposes of a dog show June 24, 1862. The annual cattle show of the Smithfield Club first took place here Dec. 6, 1862, and has been held in the same place each succeeding year. A fête in honour of the tercentenary of Shakespeare's birthday was celebrated in the hall, April 23, 1864. The first horse-show took place July 1, 1864, and an Industrial Exhibition of the productions of the North London Working Classes was opened Oct. 17, 1864. A Reformatories' Industrial Exhibition was opened here, by the Prince of Wales, May 19, 1865. An Exhibition of the Arts and Manufactures of East London commenced Aug. 8, 1865.

AGRICULTURAL SOCIETIES.—The "Board of Agriculture," established in 1793, received an annual grant from Parliament, and was dissolved in 1816. The "Royal Agricultural Society of England" was established in 1838, celebrated its first anniversary in May, 1839, and was incorporated March 26, 1840. Its country meetings are held in the month of July. The "Royal Agricultural Improvement Society of Ireland" was established in 1841. A "Society of Improvers in the Knowledge of Agriculture in Scotland" was instituted in 1723. This became extinct, and another was established in 1755. The present society arose in 1784, under the name of the "Highland and Agricultural Society of Scotland." The university of Oxford maintains a Sibthorpian professorship of rural economy. Professorships of agriculture and agricultural chemistry are attached to the university of Edinburgh, while the university of Aberdeen provides lectures on agriculture. There are above 600 agricultural societies in the United Kingdom.

AGRICULTURE, in a rude form, was known from the earliest period (Gen. iii. 17—19). Cain (B.C. 3979) is described as a tiller of the ground (Gen. iv. 2). The Egyptians excelled in agriculture. Abraham, when there was a famine in Canaan, repaired to their country in search of food (Gen. xii. 10) B.C. 1920; and Jacob sent his 10 sons to purchase corn there (Gen. xlii. 1—4) B.C. 1706. An ancient Babylonian work, called "The Book on Nabathæan Agriculture," still preserved, is a cyclopædia of agriculture. Cecrops is said to have carried the knowledge of agriculture from Egypt to Greece, when he settled in Attica (B.C. 1556). Pliny gives Baxyges credit for imparting a knowledge of tillage to the Greeks. Homer, who flourished about B.C. 962—B.C. 927, describes agriculture as an honourable pursuit with kings and princes; and Hesiod, about B.C. 859—B.C. 824, speaks in its praise. The Romans esteemed it highly, and the Georgics (composed B.C. 30) of the poet Virgil contain the most elaborate and eloquent instructions ever written on this subject. The Persians cultivated the art of agriculture, and Xenophon, who

wrote a treatise on it, declared that Cyrus the Younger paid much attention to it. Gelon of Sicily (B.C. 479), sought to render it an honourable occupation. Amid the various wars and struggles in the earlier part of the Middle Ages, agriculture necessarily declined. It was revived by the Saracens, and has spread over Europe, until at length carried, by modern discoveries and the aid of science, to its present advanced state.

AGRIGENTUM (Sicily). — This powerful Greek city, founded by a colony from Gela (B.C. 582), appears to have fallen under the yoke of the tyrant Phalaris about B.C. 570. He was killed in an insurrection, and Alcamenes succeeded B.C. 534. Theron ruled from B.C. 488 to B.C. 472. Aided by Gelon of Syracuse, he routed the Carthaginian invading army, B.C. 480, and subdued Himera. Soon after, a democratic form of government was adopted. It was again invaded (B.C. 406) by the Carthaginians, who destroyed the town. Agrigentum scarcely recovered from this blow, and it was captured by the Romans, after a siege of seven months' duration, B.C. 262. The Carthaginians recovered possession B.C. 255, when the city was burned and its walls were razed to the ground. It was restored and betrayed into the hands of Lævinus B.C. 210. Its modern name is Girgenti (*q. v.*).

AGYNIANS.—Aginani, or Agynenses, a sect that arose about A.D. 664. They denounced the use of flesh and of marriage, declaring it to be an ordinance of Satan.

AHMEDABAD, or AMEDABAD (Hindostan). —This city, once the Mohammedan capital, built on the site of a more ancient town, in 1412, by Ahmed Shah, was captured by the Mahrattas early in the 18th century. The British stormed it in 1780, and it came into their possession by treaty Nov. 6, 1817. It suffered from an earthquake in 1819. The city walls, built in 1485, were repaired in 1834.

AHMEDNUGGER, or AMEDNUGGER (Hindostan).—This fortified city, in the presidency of Bombay, was founded by Ahmed Nizam Shah, in 1493, and became the capital of a kingdom of the same name. It was annexed to the Delhi empire in 1634. The Mahrattas seized it in 1707, and it remained in their possession until 1797, when it was captured by Scindia. Wellington took it, after a siege of four days, Aug. 12, 1803, and though temporarily restored to the Mahrattas, it was annexed to the British possessions in India, by treaty, June 13, 1817. The first English factory was established here in 1612.

AHWAZ (Persia).—A favourite place of resort of Artabanes IV., the last of the Parthian kings, whose empire was subverted by Artaxerxes, or Adshir, King of Persia, A.D. 226. The English took possession of this town during the Persian war, April 1, 1857.

AIBAR, or AYBAR (Battle).—At this place, in Spain, the Moors, in 882, defeated the Spaniards, led by their King Garcia, who fell in the encounter. Here Don Carlos, Prince of Viana, was defeated and made prisoner by his father, John II., of Aragon, Oct. 23, 1452. (*See* AGRAMONTS and BEAUMONTS.)

AIDS.—Under the feudal system, aids were claims of the lord on the vassal, originally granted by way of benevolence, but afterwards exacted as a matter of right. Our early monarchs used them as a means of extorting money from their subjects. So onerous did they become, that a clause in Magna Charta (1215) declared that no aid should be imposed without the consent of the great council of the nation, except on three occasions: 1. The ransom of the king's person; 2. The making his eldest son a knight; and 3. The marriage of his eldest daughter. The clause, omitted in Henry III.'s charter (1224), was revived in that of Edward I., in 1297. This method of levying money was abolished by 12 Charles II. c. 24 (1660). (*See* BENEVOLENCE, REVENUE, &c.)

AIGUES-MORTES (France).—From this place Louis IX. embarked, Aug. 25, 1248, on the seventh crusade, and again, July 4, 1270, on the eighth and last crusade. It is also celebrated as the scene of the interview between Charles V. and Francis I. in 1538. The emperor, on concluding the truce of Nice, having set sail to Barcelona, was driven on the island of St. Margaret, on the coast of Provence. Francis I. invited him to a personal interview, and Charles V. accepted the invitation. Francis I., without ceremony, visited the emperor in his galley, and the latter visited Francis I. at Aigues-Mortes.

AIJALON, or AJALON (Palestine), now called Yâlo, the valley in which Joshua commanded the moon to stand still during his contest with the Amorites at Beth-horon (Josh. x. 12—14), B.C. 1451. (*See* BETH-HORON, battle.)

AIR.—(*See* ATMOSPHERE.)

AIR-GUN.—The first account of an air-gun is found in David Rivault's "Elémens d'Artillerie." He was preceptor to Louis XIII. of France, and he ascribes the invention to a certain Marin, a burgher of Lisieux, who presented one to Henry IV., towards the end of the 16th century.

AIR-PUMP.—Otto von Guericke, a German, made the first attempt, in 1654, at this invention, which was greatly improved by Robert Boyle a few years later. Further improvements were effected by Robert Hook in 1658 or 1659.

AIRE (France), a fortified town in the Pas de Calais, founded by Lidoric, Count of Flanders, in 630; was ravaged by the Danes in 881. In 1641 the French took it from the Spaniards, who soon regained possession. Louis XIV. captured it in 1641, and it was ceded to France by the treaty of Utrecht (1713). It was taken by the allies Nov. 9, 1710. Lord Hill captured the town and its magazines, after a severe combat, March 2, 1814. — Another town in Landes, the ancient Vicus Julii, or Atures, once the capital of the Visigoths, said to have been founded by Honorius, became the seat of a bishopric about 506. The see, suppressed in 1803, was re-established by the concordat of 1817. This was not executed, but the bishopric was restored in 1823.

AIX (France), the seat of the first Roman colony in Gaul, said to have been founded by C. Sextius Calvinus B.C. 122, and called Aquæ Sextiæ. Caius Marius routed the Teutones and Cimbri at this place B.C. 102. It was destroyed

by the Saracens in the 8th century, and rebuilt in 796. Charles V. captured it in 1535, and here he was crowned King of Arles. It is an archiepiscopal see, and councils were held here in 1112, 1374, 1409, 1416, 1585, and 1612. The cathedral was built in the 11th century; its choir was erected in 1285; the university, suppressed at the Revolution, was founded by Pope Alexander V. in 1409; and the court-house, commenced in 1787, was finished in 1831. It occupies the site of the palace of the counts of Provence, destroyed in 1782. The bath-house was erected in 1600.

AIX-LA-CHAPELLE, or AACHEN.—This ancient Prussian city, said to have been founded by the Romans A.D. 124, was the birthplace and favourite residence of Charlemagne, who made it the capital of all his dominions north of the Alps in 795. Here he died and was buried in 814. The vault was opened in 997, when the body of the emperor was found on a throne of state. It was reopened in 1165 and in 1215. The city was ravaged, and Charlemagne's palace destroyed, by the Danes, in 882. During the Middle Ages it was made a free and imperial city, at which the German emperors were crowned from 813 to 1531. It suffered severely from a fire in 1656. Aix-la-Chapelle was taken by the French Dec. 8, 1792, retaken by the Austrians March 8, 1793; but the French regained possession Sep. 22, 1794. By the treaty of Luneville (Feb. 9, 1801) it was ceded to France, but it reverted to Prussia in 1814. The town-hall was erected in 1353. Councils were held here in 799, 803, 809, 813, 816, 817, 825, 831, 836, 842, 860, 862, 992, and 1165.

AIX-LA-CHAPELLE (Congress).—The King of Prussia, the Emperor of Austria, and the Emperor of Russia, assembled at Aix-la-Chapelle Sep. 29, 1818, and soon after a congress, attended by these sovereigns, their ministers, and the English plenipotentiaries, met. They addressed a note (Nov. 4, 1818) to the French minister, the Duke of Richelieu, stating their determination to put an end to the military occupation of the French territory, and calling upon him to take part "in their present and future deliberations." France accepted the offer, the Duke of Richelieu repaired to Aix-la-Chapelle, a convention for the withdrawal of the British troops from France was signed Oct. 9, and the congress separated Nov. 21, 1818.

AIX-LA-CHAPELLE (Treaties).—The first, May 12 (O.S. 2), 1668, was the result of the triple league between England, Holland, and Sweden, for the purpose of putting a stop to the war between France and Spain. After some negotiations, the plenipotentiaries of England, Sweden, Holland, France, and Spain, met at Aix-la-Chapelle, the treaty being concluded and signed in a fortnight. France obtained all the places she had conquered in Flanders, and restored Franche-Comté to Spain. Though permitted to retain some of his conquests, a check was given to the ambition of Louis XIV.—The second treaty of Aix-la-Chapelle, confirming the treaties of Westphalia, Oct. 24, 1648; Nimeguen, 1678, 1679; Ryswick, Sep. 10, 1697; Utrecht, April 11, 1713; Baden, Sep. 7, 1714; the Triple Alliance, 1717; and the Quadruple Alliance, 1718, was concluded Oct. 18 (O. S. 7), 1748. The contracting parties were Great Britain, France, Holland, Hungary, Spain, and some Italian states. The basis of the pacification was a general restitution of conquests, prisoners being released without ransom. England gave up all she had acquired in the East and West Indies. The Assiento contract, with the article of the annual ship, was confirmed to England for four years. Milan was annexed to Austria, and France restored her conquests in Italy.

AIZNADIN, or AJNADIN (Battle).—The Saracens gained a great victory in this plain, in Palestine, over the imperial forces, in the reign of Heraclius, July 13, 633. According to some authorities, the battle was fought July 30, 634. Gibbon, speaking of the imperial forces defeated on this occasion, says they might be "indifferently styled either Syrians, or Greeks, or Romans: *Syrians*, from the place of their birth or warfare; *Greeks*, from the religion and language of their sovereign; and *Romans*, from the proud appellation which was still profaned by the successors of Constantine."

AJACCIO (Corsica).—The chief town of the island, celebrated as the birthplace of Napoleon I., Feb. 5, 1768.

AJALON.—*See* AIJALON.)

AJMEER (Hindostan).—This city, the ancient capital of the province of Ajmeer of Rajpootana, was visited by Sir T. Row in 1616, when a factory was established by the East India Company. In 1818 it was acquired by the British. Its population had increased more than threefold by 1823.

AKERMANN (Bessarabia) was taken by the Russians in 1770, restored in 1774; taken again in 1789, restored in 1792; and ceded to Russia by Turkey in 1812. A treaty was concluded here Sep. 4, 1826, between Russia and Turkey, by which the treaty of Bucharest (May 28, 1812) was confirmed. Turkey recognised the independence of Wallachia and Moldavia; restored the privileges of the Servians; agreed to pay the Russian claims for losses inflicted by the Barbary corsairs; and granted to Russia the free navigation of the Black Sea, and a passage through the Dardanelles. Russia, on her part, restored her conquests in Asia, and made a few trifling concessions.

AKHALZIKH (Armenia).—The Russians, under Prince Paskewitch Erivanski, defeated the Turks near this place Aug. 24, 1828, and took possession of the city and fortress Aug. 27. The Turks made an effort to regain possession in Feb., 1829, but were compelled to retire March 16, and Akhalzikh was ceded to Russia by the treaty of Hadrianople, Sep. 14, 1829.

AKYAB (E. Indies), a town and seaport of Arracan, ceded, with other places, to the British by the treaty of Yandaboo, Feb. 24, 1826.

ALABAMA (N. America).—This state originally formed part of Georgia. In 1798 the country, including the present states of Mississippi and Alabama, was formed into a territory. Alabama was detached in 1817 from Mississippi, and admitted into the Union as a separate state March 3, 1819. It seceded Jan. 11, 1861.

ALABAMA SCREW-STEAMER.—This celebrated sloop-of-war was built at Birkenhead, by

Messrs. Laird and Son, in the spring of 1862. Capt. R. Semmes, well known by his exploits, from Feb. 14, 1861, to Feb. 24, 1862, in the cruiser *Sumter* was appointed to the command by the Naval Government at Richmond, May 2, 1862. The Federal Consul at Liverpool having communicated to Mr. Adams, the United States Minister in London, his suspicions as to the character of the vessel, that gentleman addressed a despatch to the Foreign Office, praying for her detention, June 23. Other communications took place, the result being that orders were sent to the Customs' authorities at Liverpool to detain the *Alabama*, which left the Mersey under pretence of making a trial trip, July 29, the very day on which they were received. Capt. Semmes, who went on board at Terceira, Aug. 20, hoisted the Confederate flag, Aug. 24, and declared that the object of the vessel was to cripple the commerce of the Federal states. This object she accomplished with perfect success, having captured and burnt 10 trading vessels by Sep. 16. Much indignation was expressed by the United States Government in consequence of her construction, and alleged equipment, in an English port, and an animated debate upon the subject took place in the House of Commons, March 27, 1863. The capture by the *Alabama* of the barque *Conrad*, June 21, 1863, led to further difficulties with the United States. (*See* TUSCALOOSA). During two years the *Alabama* scoured the seas, and captured no less than 66 vessels, of which 52 were burned and one sunk, the remainder being released on bond. She entered Cherbourg for the purpose of taking in coal, and undergoing repairs, June 11, 1864. The United States ship-of-war *Kearsage*, Capt. Winslow, appeared at the entrance to the port, June 14. Capt. Semmes steamed from the harbour, Sunday, June 19, and, in sight of the people of Cherbourg, opened fire upon the enemy. The engagement, which was fought entirely with the guns, the belligerents never coming within boarding distance, lasted upwards of an hour. Capt. Semmes, finding that the *Alabama* was sinking, was consequently compelled to strike his colours. The captain and several of the crew were picked up by the English yacht *Deerhound*. Nineteen, including the English surgeon, Mr. D. H. Llewellyn, were drowned, making, with 7 killed and 21 wounded, a total loss of 47 out of the crew of the *Alabama*.

ALAND ISLES (Gulf of Bothnia).—The group, consisting of 80 inhabited and 200 uninhabited islands, formerly belonged to Sweden, but was seized by Russia, and ceded to her by Sweden in 1809. A naval engagement between the Swedes and Russians, in which the latter were victorious, was fought here in 1714. A congress assembled here May 23 (O.S. 12), 1718, but was abruptly terminated by the Russians Sep. 24, 1719. The Russian fortifications were captured and destroyed by a joint expedition of English and French troops in the autumn of 1854. The victors took 2,235 prisoners, 72 unmounted guns, 7 field-pieces, and 3 mortars. They afterwards abandoned the islands, which were re-occupied by the Russians. By a separate convention between England, France, and Russia, annexed to the treaty of Paris (April 27, 1856), the Emperor of Russia agreed "that the Aland Isles should not be fortified, and that no military or naval establishment shall be maintained or created there."

ALANI, or ALANS, one of the Tartar or nomadic races of Asia, which, at the time they first came in contact with the Romans, during Pompey's expedition to the Caucasus, B.C. 65, inhabited some portion of the mountainous regions to the north of the Euxine. Gibbon (chap. xxvi.) says, "a naked scimitar, fixed in the ground, was the only object of their religious worship." Having been conquered by the Huns, the Alani joined them in their incursions into Europe. They invaded the Gothic kingdom of Hermanric in 375. Theodosius defeated them, as allies of the Goths, in the war in 379—382. They joined the Vandals in the invasion of Gaul in 406, and of Spain in 409; and in 428 they received Lusitania, Carthagena, and other parts of Spain, as their share of the conquest. Many of them served under Genseric, in his African war of 429; whilst the Alani of the Caucasus followed Attila in his attack upon the Eastern empire in 441. Their defection at the battle of Châlons, in 451, during Attila's invasion of Gaul, led to their conquest by Torismond, King of the Visigoths, in 452, after which they ceased to be an independent people.

ALARCOS (Battle).—Fought near Alarcos, in Spain, Wednesday, July 19, 1195, between the Moors and the Spaniards. The former were victorious, and the town itself and 20,000 prisoners fell into their hands.

ALASCANI.—The followers of John Alasco, a Polish divine, uncle to the king of Poland. He left the Roman Catholic Church at the Reformation, and at the invitation of Cranmer came to England in 1551. He held peculiar opinions respecting the Eucharist, applying the words "this is my body" to both the elements. He was a friend of Erasmus and Melancthon, and, after officiating at the Dutch church in Austin Friars, quitted England during the reign of Mary, and retired to his own country, where he died in 1560.

ALBA (Italy).—This ancient city of central Italy, one of the oldest strongholds of the Æquians, was, upon the subjugation of that people by the Romans, colonized by about 6,000 of the victors. Its inhabitants sent a strong body of men to assist the Romans against Hannibal, B.C. 211, but incurred severe penalties from their refusal to supply further reinforcements, B.C. 209.

ALBA LONGA (Latium), or "White Longtown."—Of the history of this ancient city, about 15 miles S.E. of Rome, little is known previous to its conquest by the Romans B.C. 665. According to the traditional account, it was founded by Ascanius, son of Æneas, B.C. 1152. It was called "Longa" from its situation upon a steep hill, with a narrow summit; and "Alba," in allusion to the milk-white sow which Æneas, in obedience to the oracle, is said to have followed on his landing in Italy. Alba was for some time the centre of the league, consisting of 30 Latin cities. It is

difficult, however, to separate the authentic from the fabulous in its history, of which the following is a summary :—

B.C.
1143. Ascanius succeeded by Sylvius Posthumus.
1114. Æneas Sylvius king.
1043. Latinus king.
1038. Alba succeeds.
1002. Capetus, or Atys, king.
976. Capys king.
916. Calpetus king.
903. Tiberinus king.
895. Tiberinus is defeated, and drowns himself in the Albula, thenceforth called the Tiber (*q. v.*). He was succeeded on the throne by Agrippa.
864. Romulus king.
845. Aventinus king.
808. Procas king.
795. Numitor king.
794. Amulius usurps the throne of his brother Numitor, condemning his niece Ilia to a life of celibacy.
770. Ilia having been forced to break her vow, and given birth to twins, is buried alive. The children having been thrown into the Tiber, are rescued near Mount Aventine by the shepherd Faustulus. They are suckled by his wife Acca Larentia, surnamed Lupa, and are named Romulus and Remus.
754. Romulus put Amulius to death, and restored his grandfather Numitor to the throne.
753. Rome (*q. v.*) is founded by Romulus.
671. Cluilius sends ambassadors to Rome to complain to Tullus Hostilius of a trespass by the Romans on the Alban territory.
670. Combat between the Horatii (*q. v.*) and the Curiatii. The Albans submit to Rome.
664. The Albans rebel, and incite the Veientes and the Fidenæans to make war against Rome.
665. The Alban general Mettius is defeated, Alba Longa destroyed, and its inhabitants are transferred to Rome.

ALBA DE TORMES (Spain).—This fortified town was captured by Kellermann, Nov. 25, 1809, and became the scene of several struggles during the Peninsular war.

ALBANIA (Asia).—This country, washed by the Caspian Sea, first became known to the ancient world through Pompey's expedition into the Caucasus in pursuit of Mithridates, B.C. 65. One legend represented the inhabitants as the descendants of Jason and his companions in the Argonautic expedition. Its rulers did homage to Trajan when he invaded Albania, A.D. 116. Little is known concerning this country, which forms part of the modern Georgia. It was the seat of a bishopric in the early Church.

ALBANIA (European Turkey) comprises part of the ancient Epirus, Illyria, and Chaonia. Its early history is obscure. The Albanians, a sturdy and valiant race, termed by Gibbon "a vagrant tribe of shepherds and robbers," long maintained their independence. Their country was invaded by Robert Guiscard in 1081, and a portion of it conquered by Amurath I. in 1388. From these reverses the Albanians recovered, and, under their leader, George Castriot, called by the Turks Scanderbeg, in 1443, resisted the conqueror of Constantinople, Mohammed II. The Albanians overran the Morea in 1460, but were vanquished in 1478. Another struggle with Turkey commenced in 1809, and was carried on with varied success until 1822, when the Albanians were subdued. The insurrection of 1843, excited by the Tanzimat, or law of enlistment, was suppressed by Omar Pasha.

ALBANS, ST.—This town in Hertfordshire, near the site of the ancient Verulam, is supposed, on good authority, to be the place which Cæsar stormed B.C. 54. The Britons, under Boadicea, Queen of the Iceni, took it A.D. 61, and slaughtered many of the inhabitants. It received its present name from Alban, the proto-martyr of Britain, who suffered in 304. The spot where the relics of the saint had been interred was said to have been miraculously discovered by King Offa, who, in 795, founded the monastery, exempting it from the payment of Peter's pence, and from episcopal jurisdiction. The town itself was built at the instigation of Ulsig, the sixth Abbot of St. Albans, in 950. Adrian IV., a native of St. Albans, granted further privileges to the abbey in 1154. The Abbot of St. Albans had a seat in Parliament, and took precedence of all other abbots. Edward II. visited the place, and investigated the relics of the saint, in 1313. The barons assembled here, and demanded the banishment of the Despensers, in 1321. The abbey was granted *in commendam* to Cardinal Wolsey in 1521. The town, incorporated by Edward VI. in 1553, was disfranchised for bribery by 15 Vict. c. 9 (1852).

ALBANS, ST. (Battles).—The first fought Thursday, May 22, 1455, between the houses of York and Lancaster, was the first victory in the wars of the Roses. The Duke of York gained the day, and the Duke of Somerset, who led the Lancastrians, was slain. Henry VI. was wounded by an arrow and taken prisoner.—The second battle was fought between Barnet and St. Albans, on Shrove Tuesday, Feb. 17, 1461. The Lancastrians were commanded by Queen Margaret, who gained a complete victory over the Yorkists, led by the Earl of Warwick, and rescued Henry VI., who was a prisoner in their hands.

ALBAYDA (Spain), taken from its founders, the Moors, and peopled with Christians, by James I., King of Aragon, in 1258.

ALBERT MAUSOLEUM.—Queen Victoria laid the first stone of this building at Frogmore, intended to receive the remains of Prince Albert, March 15, 1862. The coffin containing the body was removed from St. George's Chapel to the Mausoleum Dec. 18, 1862.

ALBERT MEMORIAL.—Prince Albert, Consort of Queen Victoria, died at Windsor Castle, Dec. 14, 1861, and was buried Dec. 23. A meeting to consider the propriety of erecting a suitable memorial was held at the Mansion House under the presidency of Lord Mayor Cubitt, Jan. 14, 1862, when £4,000 were subscribed, which sum had increased, at a meeting held Jan. 22, to £11,680. The Queen having been consulted with respect to the proposed memorial, a letter was received by the committee, Feb. 21, in which General Grey stated that an obelisk erected in Hyde Park, on the site of the Great Exhibition of 1851, would, if of sufficiently grand proportions, best accord with the Royal wishes. The Earls of Derby and Clarendon, Sir Charles Eastlake, and the Lord Mayor, formed a committee, Feb. 26, for carrying this suggestion into effect, and great efforts were made to procure a block of stone large enough for the purpose. These efforts, however, proving fruitless, a committee of architects was appointed, who recommended that a space of 1,200 feet by 340 should be appropriated on

the north side of the Kensington Road for entrances to Hyde Park, fountains, &c., and that the memorial, consisting of bronze or marble statuary, should occupy the centre of this area. It was further resolved to erect a spacious hall as a place for general art-meetings, or other assemblies in London connected with social science and its kindred pursuits, and the leading architects of the kingdom were invited to send in their designs by Jan. 1, 1863. The design selected was that of Mr. G. G. Scott, and comprised "a colossal statue of the prince, placed beneath a vast and magnificent shrine or tabernacle, and surrounded by works of sculpture illustrating those arts and sciences which he fostered, and the great undertakings which he originated." The works for the national memorial in Hyde Park were commenced May 13, 1864. (*See* HORTICULTURAL GARDENS.) Albert Memorials have been erected in other places. (*See* ABERDEEN, COBURG, EXETER, PERTH, TENBY, &c.)

ALBI (France), the ancient Albiga, was ravaged by the Saracens in 730. The Albigenses (*q. v.*) are said to have derived their name from this place, where large numbers of them dwelt. Albi was long governed by its own counts. It was a great stronghold of the Protestants during the wars of religion in France. Albi was the seat of a bishopric at an early period, and Louis XIV. erected it into a metropolitan see in 1676. Its cathedral, commenced in 1282, was completed in 1512. Councils were held here in 1176 and 1255.

ALBICI.—This Gallic tribe, inhabitants of the mountains above Massilia, the modern Marseilles, fought with considerable bravery in a sea-fight between the people of that place and the fleet of Julius Cæsar, commanded by D. Brutus, B.C. 49.

ALBIGENSES.—Of these early opponents of the Church of Rome, the Paulicians, who arose in the 7th century, appear, as Faber states, to have been "the theological ancestors." The Paulicians, wearied by persecution, quitted Asia, and sought refuge in Europe, some of them settling in the south of France. In Italy they were called Paterini and Cathari, and in France Albigenses, from the town Albi, where they dwelt in great numbers. The term was, however, applied to other sects. The first congregation of the Albigenses is said to have been discovered at Orleans in 1017; and they began to attract the notice of the dominant church before the end of the 11th century. They were condemned by a council held at Tours May 19, 1163. About the year 1200, the Albigenses, and other anti-Roman sects, which were loosely included under the same denomination, had become so numerous that they were in possession of Toulouse and 18 of the principal towns in Languedoc, Provence, and Dauphiné, which then constituted an independent sovereignty under Raymond VI. A crusade was proclaimed against him and his subjects by Pope Innocent III. (1207 and 1208), and an army of 500,000 men was led against them by Simon de Montfort, Earl of Leicester, in 1209. A merciless war was waged for four years, until Pedro of Aragon, Raymond's kinsman and ally, was killed in battle, Sep. 12, 1213, and De Montfort was supreme. He was slain in an insurrection at Toulouse in 1218. The war was renewed, but with little success, until, in 1225, Louis VIII. took the cross and marched into Languedoc. He died in a few months, but the war was continued in the name of the young king, Louis IX. In April, 1229, Raymond VIII. abdicated, and was brought to Paris and scourged by the priests in the church of Notre Dame. In the beginning of the crusade against the Albigenses, the tribunal of the Inquisition was first opened, about the year 1210. The Albigenses were condemned by several councils. Much controversy has been excited, even of late years, respecting the Albigenses, their history, and doctrines. The subject has been fully discussed by Dr. Gilly, in his "Waldensian Researches;" in the Rev. George S. Faber's "Inquiry into the History and Theology of the Ancient Vallenses and Albigenses;" and in Maitland's "Vallenses and Albigenses." The latter writer contends that the name was not used as the title of a particular religious sect until long after the Council of Albi (1255).

ALBINOS, or white negroes, so called by the Portuguese, are found amongst the African races, as well as in Central Spanish America. Cortes noticed them in Mexico in 1560, and Lionel Wafer in Darien, towards the end of the 17th century.

ALBIOLA (Battles).—In 809 Pepin advanced against the Venetians, and, after capturing several places, penetrated as far as Albiola with his fleet. The shallowness of the water rendered it impossible to reach the central island without throwing a bridge across the narrow channel between Albiola and Rialto. This was done; but the rude structure broke down under the weight of the invaders, who were precipitated into the lagoon. The tide meanwhile had ebbed, and their vessels were stranded; so that those Franks who escaped a watery grave fell a prey to the Venetians. This victory secured the deliverance of Venice.—Near the same place the Huns were defeated in 906. The Venetians, under the command of their chief magistrate, completely destroyed their vessels, and but few of the enemy managed to escape.

ALBION.—Aristotle (B.C. 384—B.C. 322) is the first who speaks of England by this name. He says (De Mundo, c. 3), "In the ocean beyond the Pillars of Hercules are two large islands, called Bretannic, Albion and Ierne." The notion that the name is derived either from its white roses, or its white cliffs, as many writers represent, is discussed in *Notes and Queries*, 3rd Series, Vol. IV., pages 193 and 274. (*See* BRITANNIA.)

ALBION CLUB (London) established early in the century, was dissolved in 1841.

ALBUERA (Battles).—Alphonso V., of Portugal, was defeated here Feb. 24, 1479; upon which he made peace with Castile.—Lord Beresford, having been compelled, by the approach of Soult with the French army, to raise the siege of Badajos, resolved to make a stand at the village of Albuera, between Badajos and Seville. His army amounted to 30,000 infantry and 2,000 cavalry; but of these three-fourths

were Spanish, Portuguese, and German troops. They had 38 guns. Soult had under his command nearly 20,000 infantry and 4,000 cavalry, veteran troops, supported by 50 pieces of artillery. The battle commenced early in the morning, May 16, 1811, and after a terrific contest, in which victory wavered from one side to the other, the French were defeated. They lost 8,000, whilst the allied army had to deplore a loss of nearly 7,000 men. The brunt of the action was borne by the English, who had only 1,500 unwounded men left, "the remnant of 6,000 unconquerable British soldiers."

ALBUFERA (Battle).—Fought near the lake of this name, in Valencia, in Spain, Jan. 4, 1812, between the French and Spaniards. The former were victorious, and Marshal Suchet, their commander, was made Duke of Albufera in honour of his triumph.

ALBUM, amongst the Romans, meant a tablet containing anything of a public nature, and was so called either because it was made of white material, or because the inscription was in white. The term was applied to the blank book kept at monasteries to register the names of benefactors, and Bede (673-735) informs Bishop Gadfrith that his name was registered in the album of Lindisfarne. The modern album is said to have originated in Germany, in the 16th century. Strype mentions that he had seen one belonging to Emanuel Demetrius, the Dutchman, in the Stranger's Church at St. Austin Friars.

ALCALA (Spain), rebuilt near the site of the Roman town of Complutum, in 1083, was wrested from the Moors towards the close of the 12th century, and was surrounded by walls by Tenorio, Archbishop of Toledo, in 1389. At the University, founded by Ximenes in 1500, and opened in 1508, the celebrated Complutensian Bible (*q. v.*) was printed in 1514 and 1515. Cervantes was born here in 1547.

ALCANTARA.—This town in Spain, the Norba Cæsarea of the Romans, is celebrated for its magnificent bridge over the Tagus, built by Trajan in 104. It had six arches, one of which was destroyed by the English in 1809; and during the same year the structure was more seriously injured by the French general Victor, and was burned in 1836. In 1580 a Spanish and Italian force, under the command of the Duke of Alva, sent against the Portuguese, gained a victory over Antonio, who had been proclaimed King of Portugal at Santarem, June 24, 1580. The Earl of Galway captured this town, after a short siege, April 25 (O.S. 14), 1706.

ALCANTARA (Order).—One of the five military orders of Spain, founded in 1156, and confirmed by Pope Alexander III. in 1177. It was subject to the order of Calatrava until 1411. The grand mastership was annexed to the crown in 1495. The knights obtained permission to marry in 1540.

ALCAZAR, or ALCAZARQUIVER (Battle).—Fought between the Moors and the Portuguese, under Sebastian, Aug. 4, 1578. The latter were completely defeated, and their monarch was slain.

ALCHEMY.—In a vain search for the philosopher's stone, supposed to possess the property of transmuting the baser metals into gold, the elixir of life, &c., valuable facts were collected, by which the science of chemistry was greatly advanced. The origin of alchemy has formed the subject of much discussion. Gibbon, in commenting upon the destruction, by Diocletian, in his conquest of Egypt, in 296, of all ancient books that treated upon the art of making gold and silver, remarks, "These ancient books, so liberally ascribed to Pythagoras, to Solomon, or to Hermes, were the pious frauds of more recent adepts. The Greeks were inattentive either to the use or to the abuse of chemistry. In that immense register, where Pliny has deposited the discoveries, the arts, and the errors of mankind, there is not the least mention of the transmutation of metals; and the persecution of Diocletian is the first authentic event in the history of alchemy. The conquest of Egypt by the Arabs diffused that vain science over the globe. Congenial to the avarice of the human heart, it was studied in China, as in Europe, with equal eagerness and with equal success. The darkness of the Middle Ages insured a favourable reception to every tale of wonder, and the revival of learning gave new vigour to hope, and suggested more specious arts of deception." Alchemy passed from the Egyptians to the Arabians. Geber, who wrote a celebrated work on the subject in the 9th century, declares that he derived most of his knowledge on the transmutation of metals from the ancient sages. Sharpe (Hist. of Egypt, ii. 119) says: "The later Arabs called chemistry *Alchemia*, or *the Egyptian art:* and hence our words alchemy and chemistry." Alchemy became a favourite pursuit in many European countries during the Middle Ages; and various enactments on the subject are found in our statute book. Edward I. and Edward III. were believers in alchemy, and a proclamation of the last-mentioned monarch was issued in 1329, for the apprehension of two famous men who knew how to make silver by the art of alchemy, and who "may be profitable to us and our kingdom." The craft of multiplication was declared felony by 5 Henry IV. c. 4 (1404), alchemists being at that period termed multipliers. Although Henry VI., about 1456, published a patent permitting the search after the philosopher's stone, the statute of Henry IV. was not repealed until 1689. Amongst the most celebrated alchemists of the Middle Ages, may be mentioned Albertus Magnus, born 1193; Roger Bacon, 1214; Arnoldus de Villa Nova, about 1235; Raymond Lully, 1234; the Isaacs of Holland, in the 13th century; Paracelsus, 1493; and Van Helmont, called the last of the alchemists, in 1577. Some experiments were made at Guildford in May, 1782, by one Dr. Price, who was afterwards proved to be an impostor. The elder Disraeli states that Sir Humphry Davy assured him that "making gold might be no impossible thing, though, publicly divulged, a very useless discovery."

ALCORAZA (Battle), fought Nov. 18, 1096, between the Moors and the Christians under Pedro I., during the siege of Huesca, in Spain. The struggle was long and desperate; both

armies encamped on the field of battle, and the Moors withdrew during the night. Huesca (*q. v.*) capitulated Nov. 25. (*See* ARAGON.)

ALDENHOVEN (Battles).—The French republican army sustained two defeats near this town, in the Netherlands, Feb. 28 and March 1, 1793.

ALDERMAN, in Saxon ealdorman, a term applied to a person appointed to exercise authority on account of his age and experience, was a dignity of the highest rank, both hereditary and official, nearly synonymous with that of king. Camden says the word answered to the Latin word *senator;* and Sharon Turner styles the alderman "the highest officer in the kingdom." In the Laws of Ina (693) an alderman ranked with the wise men of the witan. The title seems at different periods to have corresponded to those of earl, count, duke, nobleman, &c. Thus, Elfric, Duke of Mercia, is styled in Ethelred's laws (978—1016) ealdorman. The same thing occurs in the Saxon Chronicle. There was the alderman of all England, the king's alderman, and the aldermen of counties, cities, boroughs, hospitals, &c. According to the "Liber Albus," it appears that the three offices of mayor, alderman, and sheriff have existed in the city of London since 1066, and that aldermen were interred with baronial honours from 1350, although the custom afterwards ceased. Grafton says that aldermen, as city officers, were first chosen in the city of London in the reign of Henry III., about the year 1241. The title of alderman of the hundred was introduced in the reign of Henry I.

ALDERNEY (English Channel).—This island was united to the English dominions by the first Norman princes. On the Caskets, a dangerous reef near the island, William, Duke of Normandy, only son of Henry I., was wrecked on his return from Normandy, Nov. 25, 1120. About 140 young noblemen perished with him. Through the narrow channel separating the island from France, and called the Race of Alderney, the remnant of the French fleet escaped after their defeat at La Hogue, by the English and Dutch, May 22, 1692. Here also the *Victory*, of 110 guns, commanded by Admiral Balchen, was wrecked, Oct. 5, 1744, when all on board perished. Extensive fortifications and a breakwater have been in course of erection at Alderney since 1850.

ALDERSHOT.—This camp is situated between Farnborough and Farnham, in Hampshire, about 36 miles from London. In 1854 £100,000 was granted for the purpose of obtaining land to form a permanent camp for the proper training of our troops. A portion of a large moor, named Aldershot, was immediately purchased. The camp thus formed, seven square miles in extent, was divided into the north and south camps, the former capable of accommodating 8,000, and the latter 12,000 men. Further purchases of land were made, and, in 1856, 7,062 acres having been obtained, at a cost of £135,445, 28,181 men were stationed there. The camp was inaugurated by Queen Victoria, April 18, 1856.

ALDINE PRESS was established at Venice in 1494, by Aldo Manuzio, or Aldus Manutius, according to the Latin. Aldo left Venice in 1506, but returned and reopened his press in 1512, when he published highly-esteemed editions of the classics, &c. The printers of Lyons and Florence began to issue counterfeit Aldines about the year 1502.

ALE and BEER were manufactured at a very early period. Herodotus states that the Egyptians prepared a beverage, which he terms wine, from fermented barley; Pliny the Elder asserts that the Western nations made intoxicating drinks from steeped grain; and Tacitus describes a fermented liquor extracted from grain, the common beverage of the ancient Germans. Mead, or metheglin, was in use amongst the early inhabitants of northern Europe; and amongst the pleasures which the Scandinavian heroes were promised after death, was that of drinking ale out of carved horns, in their Valhalla, or palace of the gods. Some preparation of this kind was the favourite beverage of the Anglo-Saxons. Measures of Welsh ale are mentioned in the laws of King Ina. The price of ale was regulated by the early Norman princes, and the preamble of 51 Hen. III. st. i. (1267), which established a graduated scale for the price of ale, alludes to earlier ordinances on the same subject. By 23 Hen. VIII. c. 4, s. 5 (1532), brewers were allowed greater latitude with respect to the prices at which they sold their ale. From this period various laws on the subject are found in the statute-book. Hops were not used when ale or beer was first made, as they were not known in this country until the 15th century, and are first noticed in the statute-book in 1552. Ale was one of the first articles on which the excise duty was laid. By a parliamentary ordinance, dated May 16, 1643, duties were levied on ale or beer, and by 12 Charles II., cc. 23 & 24 (1660), the excise was continued. These enactments were confirmed by several subsequent statutes. The duties were repealed by 1 Will. IV. c. 51 (July 16, 1830), from Oct. 10 in that year. Sir Henry Ellis, in his edition of "Brand's Popular Antiquities" (vol. i. p. 279), says, that the word ale means nothing more than a feast or merry-making. Hence the Bride-ale, Church-ale, Clerk-ale, Lamb-ale, Leet-ale, Midsummer-ale, Whitsun-ale, &c., feasts celebrated by our forefathers.

ALE-CONNER, or ALE-FOUNDER, an officer appointed in every court leet, to taste ale or beer, to see that it was wholesome, and that it was sold at the regulated price. The "Liber Albus" contains the oath taken by the city ale-conners in the time of Henry V.

ALE-HOUSE, or SHOP, is mentioned in the laws of King Ethelred. Malpractices arose, and the then existing regulations not being sufficient, 11 Hen. VII. c. 2, s. 5 (1495), an act against vagabonds and beggars, placed alehouses under the jurisdiction of justices of the peace. In consequence of abuses and disorders in "common ale-houses and tippling-houses," a more stringent enactment was made by 4 & 5 Edw. VI. c. 25 (1552), and this statute furnished the basis of future legislation on the subject. Various changes in the licensing laws ensued, and by 1 Will. IV. c. 64 (July 23,

1830), greater facilities were afforded for the sale of ale and beer. This act has been amended. The sale of ale and beer, &c., on Sunday, has frequently been a subject of legislation, and a very stringent law, 17 & 18 Vict. c. 86 (Aug 10, 1854), was repealed by 18 & 19 Vict. c. 118 (Aug. 14, 1855), by which statute it is regulated.

ALEMANNI, or ALLMEN, a mixed body of Suevi, who, in the reign of the Emperor Caracalla (211—217) hovered round the Roman provinces in pursuit of plunder. Their territories were invaded and they were defeated by the emperor in 214. They invaded Gaul and Italy, penetrating to Ravenna in 259; but withdrew at the approach of an army levied by the Roman senate. They were defeated by Aurelian in 270; by Julian in 357; and by Jovinus in July, 368. They obtained settlements in the country on both sides of the Rhine, from its source to its junction with the Maine and the Moselle, and were checked in their pursuit of further conquests, whilst their last king was slain at the battle on the plain of Tolbiac, near Cologne, gained by Clovis I. in 496, at which period their history as an independent people ends.

ALENCON (France).—This town, situated at the confluence of the rivers Sarthe and Briante, gave title to a count as early as 942. In 1026 a castle was erected, round which the present town was subsequently formed. Alençon was seized by William I. (the Conqueror) in 1048, and by Henry II. in 1135, when its counts became vassals of the English crown. It was restored to France by Philip II. (Augustus) in 1219, and was again made the seat of a count by Louis IX., in favour of his son Peter, in 1268. On the death of Peter, in 1282, it reverted to the crown, but was separated in March, 1284, when Philip the Bold conferred it, with the title of count, upon his son, Charles. Count John II. procured its erection into a dukedom, in 1414, the year before his death at Agincourt, after which, as his son, John IV., was prisoner to the English from 1424 till 1429, Alençon remained under English control till 1450, when they were finally expelled. Duke John IV. was condemned to death in 1458 for intriguing against the French king. He was pardoned by Louis XI., but repeated the offence, 1470, and died in prison in 1476. Duke Charles IV. died of chagrin in 1525, in consequence of the defeat at Pavia, and, having no issue, his estate was again added to the royal possession. In 1559 Catherine de Medicis received Alençon as part of her marriage dowry, and in 1566 it was conferred by Charles IX. upon his brother Francis. It reverted to the crown in 1584, was seized by the army of the League in 1589, but was soon retaken by Henry IV., who sold it, in 1605, to the Duke of Würtemburg, from whom it was purchased, in 1612, by Marie de Medicis. Alençon has undergone several subsequent changes. Its last duke was Louis, afterwards Louis XVIII. of France. The lofty spire of the cathedral church of Notre Dame was destroyed by lightning in 1744. The town-hall was erected on the site of the old ducal castle in 1783.

ALEPPO (Syria).—This town, situated midway between Antioch and Hierapolis, occupies the site of the ancient Chaleb, or Haleb. It received the name of Berœa from Seleucus Nicator, about B.C. 299. Julian halted here, March 5, 363, on his expedition against the Persians. It was taken by Chosroes I. in 540; by Chosroes II. in 611; and by the Saracens under Abu Obeidah in 638, when it resumed its ancient name Chaleb, or Haleb. Zimisces wrested it from the dynasty of Hamadan about 972. It was plundered by the Mongols in 1260; Timour sacked it Nov. 11, 1400, and on his return from Damascus, early in 1401, delivered it to the flames. The town was restored, and the Mamelukes were defeated near it by Selim I., Aug. 24, 1516, and it has since that time, with the exception of a short interval in 1840, remained under the rule of the Turks. The Levant Company opened a house here to trade with Persia and India in 1581. Aleppo was nearly reduced to ruins by an earthquake, Aug. 13—16, 1822, when 9,000 inhabitants perished. It has suffered greatly at different times from plagues and earthquakes. The Christians were massacred here, and their churches and houses burned, Oct. 16 and 17, 1850; and further outrages of the same kind were repeated by the Druses in 1860.

ALERIA, or ALALIA (Corsica).—The Phocæans of Ionia founded a colony in this part of the island, B.C. 564. Having been defeated in a severe naval engagement with the Tyrrhenians and Carthaginians, the colonists abandoned the island about B.C. 536. It was captured by a Roman fleet during the first Punic war, B.C. 259. A Roman colony was planted in Aleria during the dictatorship of Sylla. Paschal I. sent missionaries to the island, and established five bishoprics, A.D. 820. The see of Aleria was erected at the close of the 11th century by Urban II.

ALESIA.—*See* ALISE.)

ALESSANDRIA (Italy), near the confluence of the Bormida and Tanaro, a fortress of enormous size, and one of the strongest in Europe, was built in 1168, to guard the passage of the rivers. The town is the capital of a province of the same name. It was at first called Cæsarea, and received the name of Alessandria from Pope Alexander III., who made it an episcopal see, and united it to that of Aqui in 1175. The sees were separated by Innocent III. in 1405. Alessandria was captured and plundered by Duke Sforza in 1522; besieged ineffectually by the French, under the Prince of Conti, in 1657; and taken, after an obstinate resistance, by Prince Eugène in 1707. Bonaparte captured it in 1796, and Suwarrow wrested it from the French July 21, 1799. By the armistice of Alessandria, concluded after the battle of Marengo, June 14, 1800, this fortress was surrendered to Bonaparte, by whom its fortifications were extended. By the treaty of Paris, May 30, 1814, it was restored to Sardinia. Alessandria was captured by the Austrians April 19, 1821.

ALEUTIAN ISLANDS (Pacific), a numerous chain, extending from Kamtschatka to Cape Alaska, in North America, were partially discovered by Behring in 1741. Capt. Cook visited them in 1778; and a survey was made

by the Russians between the years 1781 and 1798. The Russian American Company, in 1785, formed an establishment on the islands. It has continued since 1790 to receive aid and protection from their government. A volcanic island rose from the sea in the middle of the chain in 1795, and in 1807 it was found to be enlarged to about 20 miles in circuit, and lava was then flowing down its sides.

ALEXANDER (Æra).—Two epochs were named by the Greeks after Alexander III. (the Great). The first dates from his death, Nov. 12, B.C. 324, but does not appear to have been generally used; the second commenced B.C. 311, and is better known as the æra of the Seleucidæ, or of the Greeks.

ALEXANDER NEWSKY, ST. (Order).—Instituted in Russia by Peter the Great, in 1722, and confirmed by the Empress Catherine I. April 8, 1725.

"ALEXANDRA" CASE.—The three-masted wooden vessel *Alexandra*, built at Liverpool, was seized for an alleged breach of the seventh section of the Foreign Enlistment Act, 59 Geo. III. c. 69 (July 3, 1819), by the commissioners of customs, April 6, 1863, while in dock preparing for the first voyage. A debate took place in the House of Commons relative to the grounds for this proceeding April 24, and a trial in the Court of Exchequer, which commenced June 22, terminated June 24 in favour of the defendants, and against the seizure. A motion for a new trial was made Nov. 5, and the case came on Nov. 17, and occupied the court for six days. Judgment was given Jan. 11, 1864, and the rule refused. From this decision an appeal was made to the Court of Error, the Exchequer Chamber. It was argued Feb. 6, 1864, and judgment, that the court had no jurisdiction, was delivered Feb. 8. Thence the case was carried to the House of Lords, and the appeal was dismissed with costs, April 6, 1864.

ALEXANDRA THEATRE, in connection with the Highbury Barn Tavern and Pleasure Grounds, London, was opened by Mr. E. Giovannelli, Saturday, May 20, 1865.

ALEXANDRIA Battles). — The first, in which Bonaparte defeated the Arabs and captured the town, was fought July 3, 1798; the second and third, in which the English, with an inferior force, defeated the French, took place March 13 and 21, 1801. In the latter the British general, Sir Ralph Abercrombie, received a severe wound, which caused his death Sep. 2. The French lost 3,000 and the English 1,400 men.

ALEXANDRIA (Egypt) was founded by Alexander III. (the Great), in the autumn B.C. 332, and was the residence of the Greek kings of Egypt. The Ptolemies made it one of the most magnificent cities of the ancient world, and under their rule it became the seat of civilization and learning. It was almost totally depopulated by a general massacre by Ptolemy Physcon, about B.C. 141; suffered greatly during its occupation by Julius Cæsar, after the defeat and death of Pompey, B.C. 48; and was, with the remainder of Egypt, made a Roman province B.C. 30. Several thousand Jews were massacred here A.D. 67. Having fallen into decay, it was partially restored by Hadrian in 122. Caracalla, on a visit to the city in 215, in revenge for some foolish satires, ordered a general massacre of the inhabitants. Diocletian having cut off the aqueducts which conveyed the waters of the Nile to the city, captured it after a siege of eight months, in 297: A terrible earthquake occurred July 21, 365, when 50,000 persons are said to have perished. The Christians overthrew the temples of the pagan deities, and did much damage to the temple of Serapis, in 389. Chosroes II. took it in 616. Amrou, the general of Omar I., captured it after a siege of 14 months' duration, Friday, Dec. 22, 640, or, according to other authorities, in Dec., 641. The victorious general described the city to his sovereign in these terms: "It is impossible for me to enumerate the variety of its riches and beauty; and I shall content myself with observing that it contains 4,000 palaces, 4,000 baths, 400 theatres or places of amusement, 12,000 shops for the sale of vegetable food, and 40,000 tributary Jews." On this occasion its valuable and extensive library was destroyed, and Gibbon states that "six months were barely sufficient for the consumption of this precious fuel." The Greeks recovered it in 644, but Amrou regained possession the same year, and it remained under the sway of the Arabian caliphs until the Fatimites seized Egypt (958—972) and founded New Cairo. Christianity was introduced by St. Mark in the 1st century, and it formed one of the five great patriarchates of the ancient world. It possessed at one time no less than nine dioceses. Seventeen councils were held here, in 231, 235, 301, 321, 324, Dec. 27, 330, 340, 362, 363, 370, 399, 430, 457, 477, 581, 589, and 633. From its ruins a modern town has been constructed near the former site, and its importance has, in some measure, revived, on account of its convenient situation for communication, overland, with the East Indies. The British took it Sep. 2, 1801, and again, March 21, when they held it till Sep. 23, 1807. The sultan Abdul-Aziz landed at Alexandria April 7, 1863, and was received by the inhabitants with great demonstrations of joy. (*See* EGYPT). This city was devastated by the cholera in the summer of 1865.

ALEXANDRIA (United States). — Immediately after the capture of Washington by the British forces, Alexandria capitulated (Aug. 29, 1814).

ALEXANDRIAN CODEX or MS.—A copy of the Scriptures in Greek, written in capital letters, without being divided into chapters, verses, or words, said to be the most ancient in existence, belonged, as early as 1098, to the library of the Patriarch of Alexandria. It was sent as a present to Charles I. of England, about the year 1628, by Cyrillus Lucaris, Patriarch of Constantinople, who asserted that it was written "by the hand of Thecla, a noble Egyptian lady, about 1300 years previously, a little after the Council of Nicæa" (325). The learned are much divided in opinion respecting its date. After remaining in the royal library for many years, the MS. was, in 1753, removed, with the rest of the royal collection, to the British Museum. Editions were published in 1717—20 and in 1816—28.

ALEXANDRIAN LIBRARY.—There were two libraries in this city, the larger one in the Bruchium, and the smaller in the Serapeum. The former was destroyed during the occupation of Alexandria by Julius Cæsar, B.C. 48, and was probably restored by Antony, and again destroyed by Aurelian A.D. 273. The latter, founded by Ptolemy Soter, about B.C. 298, was not, as some writers suppose, involved in the destruction of the temple of Serapis, A.D. 389, when, by the edicts of Theodosius, the pagan rites were abolished, and the pagan temples overthrown. This valuable collection was destroyed by command of Omar I, after the capture of the city, Dec. 22, 640. Though Gibbon throws doubt upon this statement, it is now established beyond dispute.

ALEXANDRIAN SCHOOL.—A writer in the "Encyclopædia Britannica" says, "The term 'Alexandrian School' is applied, in a loose sense, to the whole body of eminent men who, in all the departments of knowledge, conferred lustre on the capital of the Ptolemies; but, as a characteristic designation, it is more strictly confined to that particular section of its philosophers known as the Neo-Platonists." The celebrity of Alexandria as a seat of letters commenced under Ptolemy Soter, B.C. 312, and continued, under his successors, till the commencement of the Christian æra; but that celebrated philosophy, known under the name of Neo-Platonism, originated towards the end of the 3rd century, and flourished, with certain modifications, until the 5th century, when it rapidly declined.

ALEXANDRINE WAR.—After the defeat of Pompey, at Pharsalia (*q. v.*), Julius Cæsar landed at Alexandria, to assist Cleopatra against her brother Ptolemy XI. The war that ensued, during which Alexandria and its magnificent library were almost destroyed by fire, was concluded in January B.C. 47, and resulted in the complete victory of the Romans.

ALEXANDRINES.—The Alexandrine verse, of 12 syllables, is supposed to derive its origin from the trimeter iambic, or the pentameter, of the classic poets. It was used at an early period by the poets of Spain, and is said to have been popularized in the 12th century by Alexander of Paris, from whom it may have taken its name. Some authorities refer its title to a poem on the life of Alexander the Great, of which it formed the metre, written in France during the 12th century. Pierre Rousard, a French poet, who died in 1586, wrote in this metre, which has been retained by his countrymen since his time as the verse for epic and dramatic poetry. Spenser used the Alexandrine measure for the closing line of his stanzas; and Michael Drayton's "Polyolbion," the first part of which was published in 1613, and the second in 1622, "a poetical description of England, in 30 songs or books," containing 30,000 lines, is the longest English poem in this measure. Pope, in his "Essay on Criticism," alludes to this verse,—

"A needless Alexandrine ends the song,
Which, like a wounded snake, drags its slow length along."

ALFORD (Battle).—The Duke of Montrose gained a complete victory here over the Scottish Covenanters, July 2, 1645.

ALFRED (surnamed the Great) was born at Wannating, or Wanading, a royal residence in Berkshire, probably in the month of January, 849. He was the youngest son and last child of Ethelwuph and Osburgha, the daughter of his cup-bearer, Oslac, married about 830. Alfred visited Rome in 853, and again in 855. He married Elswitha in 868. She was descended from the royal family of Mercia. On the death of his brother Ethelred, April 23, 871, Alfred became King of Wessex. In spite of his numerous battles with the Danes, he devoted much of his time to study, and laboured zealously to obtain proper means of education for his subjects. Alfred died Oct. 28, 901, and was buried at Winchester. His wife, Elswitha, survived him. They had several children, of whom some died young. Amongst those that survived were Ethelfleda, his eldest daughter, "the lady of the Mercians," who married King Ethelred, and died July 12, 919; Edward, afterwards Edward I., born in 870, ascended the throne Oct. 28, 901, and died in 925; Ethelgina, Abbess of Shaftesbury; Elfrida, who married Count Baldwin of Flanders, and died in 929; and their youngest son Ethelward, who was a zealous scholar, and died Oct. 16, 922.

ALFRED CLUB (London).—This club, established in 1808, was frequented by Lord Byron, who describes it as "pleasant; a little too sober and literary." It was dissolved in 1851, when the premises, in Albemarle Street, were occupied by the Westminster Club (*q. v.*)

ALGEBRA.—A Greek treatise by Diophantus of Alexandria, written in the 5th century of the Christian æra, is the earliest work on Algebra, or, as Newton terms it, "Universal Arithmetic." This treatise dealt with only one branch of the science,—indeterminate analysis. Europeans obtained their first knowledge of algebra from the Arabs, who probably derived their information from the Hindoos. The earliest Arabian writer on Algebra is Mohammed Ben Musa, who wrote at the command of the Caliph Al Mamun (813—833). A copy of this work in the original, transcribed in 1342, is in the Bodleian Library at Oxford. Dr. Rosen published it, with an English translation, in 1831. Leonard Fibonacci, a merchant of Pisa, nicknamed by his countrymen Bigollone, or the Fool, who had travelled much in the East, put forth a treatise on arithmetic and algebra in 1220, and it was re-written, with improvements, in 1228. Thus, two centuries before the invention of printing, this science was introduced into Italy. This treatise had been long forgotten, until, about the middle of the 18th century, it was discovered in the Magliabecchian Library at Florence. Luca Pacioli di Borgo, a Franciscan, who taught mathematics in the university of Milan, published the first printed treatise on algebra at Venice, in 1494. Another edition appeared in 1523. Scipio Ferreo, of Bologna, discovered the solution of one case of equations in 1505; and Nicolas Tartaglia, of Brescia, that of two other forms in 1535. Jerome Car-

dan extended these discoveries, and published in his "Ars Magna," in 1545, his rule for the solution of cubic equations, still known as "Cardan's rule." His coadjutor, Ludovico Ferrari, discovered a general method of solving biquadratic equations. Michael Stifel, in his "Arithmetica Integra," published at Nuremberg in 1544, is supposed to have first employed the signs + and −, and numeral exponents of powers. Francis Viète, or, as he is generally called, Vieta, whose works were published after 1600, made such important improvements that he altogether changed the character of the science. He was the first to apply algebra to geometry, and in this was followed by Descartes and Newton. Albert Girard, a Dutchman, in his "Invention Nouvelle en Algèbre," published in 1629, "conceived," as Hallam remarks, "a better notion of negative roots than his predecessors." John Harriott, in his "Artis Analyticæ Praxis," published in 1631, 10 years after the death of the author, made, says Hallam, "the last great discovery in the pure science of algebra. He arrived at a complete theory of the genesis of equations, which Cardan and Vieta had but partially conceived." He is said to have been the first to use small letters instead of capitals; to have employed vowels for unknown, and consonants for known quantities (according to present practice, known quantities are represented by a, b, c, &c., and unknown by x, y, z), and joined them to express their product. Descartes applied algebra to curves, though he is suspected of having taken the theory from Harriott.

ALGERIA (Africa).—The French having, on account of interference with their trade, declared war against Algiers, despatched a fleet from Toulon, May 25, 1830, carrying above 30,000 troops, and a landing was commenced in the neighbourhood of Algiers, June 14. A battle was fought June 19, in which the French, with difficulty, defeated a large Algerine force. Skirmishes ensued June 24 and 25; the trenches before Algiers were commenced June 29, and fire opened July 4 with such effect, that on the same evening a treaty was concluded, by which Algiers, its forts and harbour, with some of the adjoining districts, were surrendered to the French, who have since established a colony, divided into three provinces,—Algiers, Oran, and Constantina.

A.D.
1830. Nov. Medeah is conquered.—Dec. 10. Oran occupied.
1834. May. Bona is occupied.
1833. The French declare their intention of colonizing the country.—Sep. 3. Abd-el-Kader, having raised an insurrection, is defeated at Tamojenat.—Sep. 29. Bugia is taken.—Oct. 10. Ain-Beda is taken.
1834. Jan. A treaty is concluded between Gen. Desmichels and Abd-el-Kader.
1835. War breaks out again.—Oct. The French take Harchgoun.—Dec. 5. Mascara (*q. v.*) and Tlemsen (*q. v.*) are taken after some severe fighting.
1836. April 25. The Algerines defeated at Taafna.—July 6. Bugeaud defeats Abd-el-Kader in a great battle near Tlemsen.
1837. May 30. Bugeaud concludes the treaty of Taafna with Abd-el-Kader.—Oct. 13. Achmet Bey defeated, and Constantina taken.
1838. Foundation of Philippeville.
1839. Dec. 14. Abd-el-Kader defeats the French at Metidja, and advances to the walls of the city of Algiers.
1840. War is resumed with Abd-el-Kader.
1841. The French gain several actions.
1843. The French surprise Abd-el-Kader, who escapes.
1845. June 12. Pelissier and St. Arnaud destroy 700 Arabs, men, women, and children, who had taken refuge in the cave of Khartani, by lighting a fire at the entrance.
1847. April 13. Bou-Maza surrenders at Orleansville.—May. Bugeaud's expedition to Great Kabylia. Dec. 23. Abd-el-Kader surrenders at Nemours.
1849. The Saharians revolt.—Nov. Zaatcha is taken and destroyed.
1850. Dec. 2. Pelissier defeats the Saharians at Laghouat, which is destroyed.
1857. An insurrection is suppressed by the French.
1858. Prince Napoleon Minister of Algeria.
1861. Napoleon III. and the Empress Eugénie visit the colony.
1864. April 8. Several Arab tribes revolt in the province of Oran, and kill in battle Col. Beauprêtre, the French leader sent against them.—May 22. Death of the Governor-General, Marshal Pelissier, Duke of Malakoff.—June 27. The insurgent tribes are reduced to subjection.—Aug. The Arabs again rise in insurrection.—Sep. 8. Marshal McMahon, Duke of Magenta, is appointed Governor-General.—Oct. The French Government commences military operations against the insurrectionists.—Dec. 14. General Youssouff, having subdued the rebels in the south of the province of Oran, returns to Algiers.
1865. Feb. General Deligny carries on military operations against the disaffected Arabs.—May 3. The Emperor Napoleon III. visits Algeria, arriving at Algiers.—June 10. The Emperor returns to Toulon.

ALGESIRAS (Spain).—This stronghold, considered by the Moors the key of Spain, was founded by Tarik, on the first invasion of the peninsula, in 713. Alphonso XI., of Castile, wrested it from the Moors March 24, 1344, after a siege of 20 months' duration. He destroyed the town and fortifications, which were rebuilt by Charles III. in 1760. In the bay of Algesiras, Sir James Saumarez attacked, July 7, 1801, the united French and Spanish fleets, under Admiral Linois. The English lost the *Hannibal*, 74, which had grounded. The enemy, who fought under the shelter of the Spanish batteries, having suffered severely, retired from the action. Having been reinforced, they put to sea July 9, and were immediately chased by Sir James Saumarez, whose squadron consisted of five ships of the line, one 32-gun frigate, a sloop, and a Portuguese frigate, while the enemy had nine line-of-battle ships, three frigates, and a lugger. Only two of the English ships were engaged in this action, which took place July 12, when the *St. Antoine* was captured. The *Don Carlos*, a Spanish ship of 112 guns, having suffered from broadsides of the *Superb*, caught fire, and in this condition was attacked by mistake about midnight by another Spanish 112-gun ship, the *Hermenegildo*. They ran foul of each other, the *Hermenegildo* was soon in flames, and both ships blew up, with all on board.

ALGIERS (Africa).—This country, the ancient Mauretania and Numidia, fell under the power of the Romans B.C. 161, and remained in their possession till it was seized by the Vandals, A.D. 439, from whom it was recovered by Belisarius in 534. In 667 it was overrun and conquered by the Saracens; after which period it was divided into several minor kingdoms. About 935, Jusuf Zeri, an Arabian chief, founded the town of Algiers. Ferdinand of Spain, having driven the Moors from Europe, followed them into Africa, and in 1509 captured Algiers. The natives

called to their assistance the corsair Aroudj Barbarossa, who expelled the Spaniards, and established himself in their stead, in 1516. The place then became the head-quarters of the Barbary pirates, their chief receiving, in 1520, the title of Dey. In 1541 Charles V. made an unsuccessful attempt to destroy the power of the Algerine corsairs, who were the terror of the neighbouring states. They had 25,000 Christians in bondage in the year 1576. In 1655 Blake compelled the Dey to give up his slaves and to desist from piracy, and in 1665, 1670, exacted similar engagements. Louis XIV. bombarded Algiers June, 1682, and again in 1683, and the Dey submitted in April, 1684. The town was bombarded and reduced to submission by the English, under Lord Exmouth, Aug. 27, 1816. In 1830 the French took the city and deposed the Dey. (*See* ALGERIA.)

ALHAMA (Spain).—This stronghold of the Moors, in Granada, was captured by the Spaniards Feb. 28, 1482. The Moors besieged it March 5, retired March 29, and returned in April. It was, however, relieved by Ferdinand May 14, in the same year.

ALHAMBRA (Spain).—The fortress and palace of the Moors, in Granada, was commenced 1248, and completed about 1313. It capitulated to the Spaniards Nov. 25, 1491, and Ferdinand and Isabella entered it in triumph Jan. 2, 1492. The French occupied Granada from Jan., 1810, to Sep., 1812, during which period the Alhambra sustained much injury.

ALHAMBRA (London).—(*See* PANOPTICON.)

ALI (Sect of).—(*See* SHIITES.)

ALID (Spain).—This strong fortress, taken by the Christians from the Moors in 1086, was besieged by the Moors in 1088, but resisted all their efforts, and was at length relieved by Alphonso VI. of Leon, and I. of Castile, in 1089.

ALIEN ACT.—A measure (33 Geo. III. c. 4) passed in 1793, on account of the great influx of foreigners caused by the French Revolution, was distinguished by this name from the various statutes having reference to aliens. It contained several exceptional regulations on the subject, and was continued for another year by 34 Geo. III. c 82 (July 7, 1794).

ALIEN PRIORIES.—"The Priories abroad," says Ellis (Introd. to Domesday Book, ii. 330), "for the better management of their estates and rents in England, established cells subordinate to their respective houses. These were called Alien Priories." Domesday Book contains several entries of foreign monasteries holding possessions in England, both as tenants *in capite* and sub-tenants. These lands were the gift of William I., or his principal followers. Their revenues were frequently seized during the wars between France and England. In the reign of Edward III. there were 110 establishments of this kind in England, in addition to others in Ireland, Aquitaine, and Normandy. A law was passed in the reign of Henry V. (1414), by which all alien priories, not conventual, were dissolved, and granted to the Crown. Though this law does not appear in the statute-book, it is found amongst the Patent Rolls.

ALIENS were formerly placed under disabilities, both by the common and statute law. Some authorities declare that aliens first became subject to such interference in the reign of Henry II., when the Flemings and Picards, brought into the kingdom during the wars of Stephen, were expelled. Others contend that it commenced at a much more ancient period, maintaining that it forms a branch of the feudal law. The 48th article of Magna Charta (1215) provides that merchants shall have safe and secure conduct to go out and to come into England, and to stay there, and to pass as well by land as by water; to buy and sell, by the ancient and allowed customs, without any evil tolls, except in time of war, or when they are of any nation at war with us. Alien merchants were first allowed to rent houses and to buy and sell their own commodities about the year 1284. Before that time they hired lodgings, and their landlords acted as brokers for the sale of their goods. In 1290 the citizens of London petitioned Edward I. to expel foreign merchants; but the king refused to comply with this request. Edward III. granted many privileges to aliens; Richard II. and his immediate successors dealt more severely with them. By 15 Charles II. c. 15 (1663), aliens, occupying themselves in certain trades and manufactures specified in the act, were, on taking the oaths of supremacy and allegiance, admitted to all the privileges of native subjects. By 6 Anne, c. 37 (1707), foreign sailors who had served two years on board an English merchant vessel or ship-of-war, were naturalized. The laws affecting aliens have of late years undergone considerable modification, by 7 & 8 Vict. c. 66 (1844), and by 10 & 11 Vict. c. 83 (1847). An alien cannot sit in either house of Parliament, be a member of the Privy Council, or even vote at an election.

ALISE (France).—Vercingetorix, the Gallic chieftain, having been defeated by Julius Cæsar, in a great battle in the high country of the Upper Saone, B.C. 52, retreated into a fortified camp, at this town, said to be the ancient Alesia, in Burgundy. Here, having defended himself for seven months, he was defeated and made prisoner by Julius Cæsar, B.C. 52. A colossal statue of Vercingetorix, who was put to death at Rome, was erected on the site of the camp, by the Emperor Napoleon III., in 1865.

ALISO, or ALISUM (Germany).—This fortified citadel, erected by Drusus B.C. 11, was seized by the native tribes A.D. 9. The Romans regained possession A.D. 15, and successfully opposed an attempt of the Germans to effect a second conquest A.D. 16, when the garrison was relieved by Germanicus.

ALIWAL (Battle).—Fought between the Sikhs and the British army, commanded by Sir Harry Smith, Jan. 28, 1846. The former, posted at Aliwal, near Loodiana, under the command of Sirdar Runjoor Singh, consisted of 19,000 men and 68 guns, and the latter of 12,000 men and 32 pieces of cannon. The Sikhs were driven across the Sutlej, and left 52 guns in the hands of the victors.

ALJUBAROTA (Battle).—The Castilians were defeated with great slaughter at this place, in Estremadura, in Portugal, by the

Portuguese, assisted by the English, Aug. 14, 1385.

ALKALIES.—The Egyptians were acquainted with the art of making the mineral, vegetable, and volatile alkalies, which they combined with oil, and used for scouring cloth, and as ointment, but they had no knowledge of the composition of soap. From them the art appears to have been handed by the Arabians to the Spaniards. Sertuerner discovered the first alkaloid in 1804, and Sir Humphry Davy decomposed the alkalies by voltaic electricity in 1807. The art of alkalimetry, or the measurement of the quantity of alkali contained in soda and potashes, was first carried out in England by Dr. Lewis in 1767, and in France by Decroizilles, in 1806.

ALKALI WORKS ACT.—Much inconvenience having resulted from the noisome fumes evolved in the alkali manufacture, it was ordered by 26 & 27 Vict. c. 124 (July 28, 1863), that all alkali works should condense at least 95 per cent. of the muriatic acid gas which they produced, and that such establishments should be subjected to examination by an inspector appointed by the Board of Trade. This act took effect Jan. 1, 1864.

ALKMAAR (Holland).—Notice of this town occurs as early as 924. In 1491 it was seized by insurgents during the "Bread and Cheese War" (*q. v.*). The town-hall was built in 1509. The Spaniards under Alva besieged it in 1573, and encountered such resistance that they raised the siege after it had lasted nearly eight weeks, Oct. 7. A capitulation for the re-embarkation of the British expedition, sent to the Helder to act against the Dutch and French republican forces, was concluded at this place Oct. 18, 1799. The last portion of the troops re-embarked Nov. 19. It is sometimes written Alemaer.

ALL FOOLS' DAY.—The origin of this curious custom, April 1, has been attributed to the mockery of Our Saviour just before the crucifixion, to the rape of the Sabine women, and to the mistake made by Noah in sending the dove out of the ark before the waters of the flood had abated. It has also been supposed that the Roman Feast of Fools, originally held on the 1st of January, may have been transferred to the 1st of April. It is in all probability derived from some ancient pagan festival. A similar practice has been common amongst the Hindoos, at their Huli festival, from a very early period.

ALL SAINTS, or ALL-HALLOW.—A festival celebrated Nov. 1. A day for the general commemoration of all the martyrs not long after Whit-Sunday was set apart in the early Church. Boniface IV. established a festival in the Latin Church in 611, and this was converted into the festival of All Saints by Gregory IV., in 830. It was introduced into England in 870. The superfluous and superstitious ringing of bells at Allhallow-tide was prohibited at the Reformation.

ALL SOULS.—This festival, held Nov. 2, in commemoration of all the faithful deceased, was, according to some authorities, instituted at Clugny in 993, and, according to others, in Sicily in 998. Palgrave states that this well-known festival for the dead was not formally adopted until the 11th century, and that the earliest community by which it was commemorated was the monastery of St. Gall, in 741.

ALL SOULS COLLEGE (Oxford), founded in 1437, by Henry Chicheley, Archbishop of Canterbury, was not completed until 1444.

"ALL THE TALENTS," or the Fox and Grenville Coalition Ministry.—The refusal of Lord Hawkesbury, afterwards Earl of Liverpool, to form an administration, on the death of Mr. Pitt (Jan. 23, 1806), induced George III. to send for Lord Grenville (Jan. 26), who, in conjunction with Mr. Fox, undertook the task. This ministry acceded to office Feb. 5, and received the nickname of "All the Talents," from the boast of its supporters that it combined, as Mr. Canning said, "all the talents, all the abilities, and all the experience and wisdom of the country." It was thus constituted :—

Treasury	Lord Grenville.
Lord Chancellor	Lord Erskine.
President of the Council	Earl Fitzwilliam.
Privy Seal	Viscount Sidmouth.
Chancellor of the Exchequer	Lord H. Petty, afterwards Marquis of Lansdowne.
Home Secretary	Earl Spencer.
Foreign Secretary	Mr. Fox.
Ordnance	Earl of Moira.
Admiralty	Lord Howick.
Secretary at War	Mr. Windham.
Lord Chief Justice, with a seat in the Cabinet	Lord Ellenborough.

After the death of Mr. Fox (Sep. 13, 1806), Lord Howick became Foreign Secretary Sep. 24, and Mr. Thomas Grenville First Lord of the Admiralty Sep. 27. Earl Fitzwilliam retired on account of ill-health, and Lord Sidmouth became President of the Council in his place, Oct. 8, and Lord Holland Privy Seal, Oct. 15, 1806. This ministry was never very strong; a dissolution towards the end of 1806 did not improve its position, and George III. availed himself of some difference of opinion on the Roman Catholic question to make a change, March 25, 1807. (*See* PORTLAND ADMINISTRATION.)

ALLAHABAD (Hindostan).—Sultan Mahmood, of Ghuznee, invaded this province in 1020 and 1023, but made no permanent settlement. The emperors of Delhi subdued it, but it became independent during the 15th century. After various changes, it fell under the power of the rulers of Oudh, who seized it in 1758, and it was ceded by them to Shah Alum, the titular sovereign of Delhi, in 1764. The capital of the province, also called Allahabad, seated at the junction of the rivers Ganges and Jumna, was founded by the Emperor Akbar, in 1583. The English captured it in Feb. 1765, and in 1772 the province of Allahabad reverted to the Oudh sovereigns. Part of the province was ceded to the East India Company in 1775. Allahabad, with some of the territory, was ceded Nov. 14, 1801, and the remainder was secured by treaty Dec. 30, 1803. The mutiny, which commenced at Meerut, May 10, 1857, extended to Allahabad June 6, when the English retired into the fort, which they held securely.

ALLEGIANCE (Oath).—Burn (Ecc. Law, iii. 22) says, this oath "is very ancient; and by the common law, every freeman, at the age of 12 years, was required, in the leet (if he were in any leet), or in the tourn (if he were not in any leet), to take the oath of allegiance."

As administered, says Blackstone, for upwards of 600 years, it contained a promise "to be true and faithful to the king and his heirs, and truth and faith to bear of life and limb and terrene honour, and not to know or hear of any ill or damage intended him, without defending him therefrom." After the Gunpowder Plot, an act was passed (3 James I. c. 4, 1605), for the better discovering and repressing of Popish recusants, which, in addition to other provisions, required from those that conformed an oath of allegiance renouncing the Pope's authority in the most explicit terms. This was repealed, and a new oath of allegiance framed at the Revolution, by 1 Will. & M. c. 8 (1689). A single oath was by 21 & 22 Vict. c. 48 (July 23, 1858), substituted for the former oaths of allegiance, supremacy, and abjuration.

ALLEGORISTS.—Some early Christians, and even the Jews themselves, before the Christian æra, interpreted the scripture according to what is termed the allegorical mode, and were called allegorists. Origen, who flourished at Alexandria early in the 3rd century, is considered by many as the originator of this method of expounding the scriptures. Nepos, an Egyptian bishop, about 260, designated Origen and the opposers of the Millennium, allegorists.

ALLEGORY abounds in the Bible. Egypt is regarded as the cradle of allegory, as the entire system of writing in that country possessed a pictorial or representative character. (*See* HIEROGLYPHICS.) From Egypt it appears to have passed into Greece, where it gave a powerful tinge to poetry and mythology, and has been supposed by some critics to underlie the entire narrative of the Iliad, (B.C. 927.) It also characterized negotiations between the nations of antiquity, who frequently signified their intentions in a symbolic or allegorical manner. Thus Darius, B.C. 491, demanded earth and water from the Greeks, as tokens of their submission. Philo Judæus, born at Alexandria, B.C. 20, attempted to show the harmony of the religious systems of Plato, Aristotle, and Moses, by explaining their doctrines allegorically; and the Neo-Platonists (*q. v.*) adopted similar opinions. During the Middle Ages allegory became the great staple of imaginative writers, and on the revival of literature in Western Europe it was adopted by many poets in the treatment of metaphysical subjects. Thus Dante (1265 to 1321), Ariosto (1474 to 1533), Tasso (1544 to 1595), and Spenser (1553 to 1599), represented abstract qualities under personified forms. John Bunyan (1628 to 1688) was a successful allegorist; his "Pilgrim's Progress" was published in 1678. Emanuel Swedenborg (1689 to 1772) taught that the inspired volume is a divine allegory in which spiritual truths are represented by material types, and that this representation has its origin in a correspondence or mutual relationship existing between all things in the natural and spiritual worlds. (*See* SWEDENBORGIANS.)

ALLELUJAH.—(*See* HALLELUJAH.)

ALLENITES.—Followers of Henry Allen, of Nova Scotia, who taught, about 1778, that all human souls are parts of the one Great Spirit, and that they were present in Paradise and participated in the sin of Adam. He died in 1783, having made many proselytes.

ALLERSHEIM (Battle).—The French, under the great Condé, Duke of Enghien, defeated the Bavarians, led by General Mercy, at this town on the Ries, Aug. 3, 1645. Mercy was killed by a cannon-ball, and Condé, who had three horses shot under him, received several wounds.

ALLIA (Battles).—Near the confluence of this small river with the Tiber, into which it falls about 11 miles north of Rome, the Romans were defeated, with great slaughter, by the Gauls, under Brennus, July 16, B.C. 390. The barbarians captured the city, destroying large portions of the same. The disastrous day was afterwards marked by the Romans, in their calendar, as one of the most unfortunate in the whole year. The dictator Cincinnatus defeated the Prænestines and their allies, on the banks of the Allia, B.C. 377.

ALLIANCES.—The most important alliances between different states are given under their respective titles. (*See* GRAND ALLIANCE, HOLY ALLIANCE, QUADRUPLE ALLIANCE, TRIPLE ALLIANCE, HANOVER ALLIANCE, TREATIES, &c.)

ALLIED POWERS (Declaration).—The Emperors of Russia and Austria, the King of Prussia, and several German sovereigns, met at Frankfort in Nov., 1813, where they drew up the celebrated "Declaration," issued Dec. 1. In this document the allied sovereigns stated that they did not make war against France, but against the preponderance claimed by Napoleon I.; and asserted that they desired France to be "great, powerful, and happy, because the French power, in a state of greatness and strength, is one of the foundations of the social edifice of Europe."

ALLIFÆ.—This Samnite city was taken by the Romans under Q. Fabius Maximus B.C. 326, at the commencement of the second Samnite war. It was soon after recovered by the Samnites, and retaken B.C. 310 by the Romans, who gained another victory under its walls B.C. 307. Sylvester I. is said to have erected it into a bishopric A.D. 314. This, however, is doubtful, though it is known to have been the seat of a bishopric in the 5th century.

ALLOBROGES.—This Gallic tribe first appears in history as allies of Hannibal in his invasion of Italy, B.C. 218. They were defeated by Q. Fabius Maximus, afterwards surnamed Allobrogicus, near the junction of the Rhone and the Saone, B.C. 121, but refused to contract a lasting friendship with their Roman conquerors. Julius Cæsar protected the Allobroges against the Helvetii during his governorship of Gaul, B.C. 58.

ALLYGHUR (Hindostan).—Near this fortress, in the district of Allyghur, Lake defeated the Mahrattas and the French, under M. Perron, Aug. 29, 1803; and the fortress itself was stormed by Lake, Sep. 24. The native troops mutinied here, May 20, 1857. The Europeans effected their escape, and the place was retaken by Col. Greathed, Oct. 5, 1857.

ALMA (Battle).—Fought between the allied English and French, and the Russian armies, Sep. 20, 1854. The allied army consisted of 57,000 men, viz., 26,000 English, commanded

by Lord Raglan; 24,000 French, commanded by the Marshal St. Arnaud; and 7,000 Turks, with 124 guns. Early on the morning of Sep. 20, the force came in sight of the Russian army, amounting to between 50,000 and 60,000 men, strongly posted on some heights beyond the river Alma. The position was deemed impregnable; every precaution had been taken to obstruct the advance of an assailant. In spite, however, of formidable obstacles, the Russians were driven from their intrenchments, after a fearful struggle of three hours' duration. The English lost 2,000, and the French 1,400 men in killed and wounded, whilst 7,000 of the Russians fell.

ALMACKS.—The famous assembly rooms, built by Robert Myine, were opened Feb. 12, 1765, and were patronized by the highest aristocracy. Almack, the original proprietor (whose name is said to have been M'Call), died Jan. 3, 1781. The rooms, situated in King-street, St. James's, are now known as Willis's Rooms. Almack's Club was opened in 1714. (*See* GOOSETREE'S CLUB.)

ALMADEN (Spain).—This place, celebrated for its quicksilver mines, marks the site of the ancient Sisapore. The Iberians, and after them the Romans, worked these mines, from which large quantities of quicksilver are still procured every year. The Fuggers of Antwerp rented them in the 16th century. They were worked by the Spanish Government from 1645 to 1843, when the firm of Rothschild obtained the contract.

ALMAGRO (Spain), a fortified city, built by Roderic, Archbishop of Toledo, and completed in 1214. Diego d' Almagro, the associate of Pizarro in the conquest of Peru, being a foundling, received in baptism the name of this town, near which he was found, 1464. The University dates from 1552.

ALMANACK.—Porphyry states that almanacks were known to the Egyptians before the Arabs. Montfaucon has engraved an Egyptian calendar. They were constructed by the Alexandrine Greeks, about the time of Ptolemy. Instruments of wood or other material, inscribed with various symbolical figures and characters, to serve the purpose of an almanack, were used in early times by the northern nations, especially the Danes, who introduced them into England. The Anglo-Saxons calculated by the increase of the moon, set down on square pieces of wood, about a foot long, and these they called Almonaught, or almoon-heed. They were also designated cloga, bacculi-annales, primstocks, primstaries, primstaffs, runstocks, &c. The celebrated astronomer Purbach, or Puerbach, published a series of almanacks between 1450 and 1461, but the first printed was in 1457. Muller, or Regiomontanus, published the first that contained eclipses, about 1475. The first almanack printed in England was by Wynkyn de Worde, in the reign of Henry VII. James I. granted the exclusive right of printing almanacks, by letters patent, to the two universities and the Stationers' Company. This was declared to be illegal, by a decision of the Court of Common Pleas, in 1775. Moore's almanack was first printed in 1698. The first almanack printed in Scotland was in 1677. A duty was first levied on almanacks by 9 Anne, c. 23 (1710). It was abolished by 3 and 4 Will. IV., c. 57 (Aug. 13, 1834).

ALMANACK (Nautical), published by the Admiralty for the use of astronomers and sailors, was projected by Dr. Maskelyne, astronomer royal, and first appeared in 1767. It declined so much after his death, that, in 1830, the Government consulted the Astronomical Society on the subject. The alterations proposed by them were adopted, and the first improved almanack appeared in 1834.

ALMANZA (Battle).—Fought at this place, in Spain, Easter Monday, April 25 (O.S. 14), 1707, between an army of English, Portuguese, Dutch, and Spanish troops, amounting to 12,000 infantry and 5,000 cavalry, commanded by the Earl of Galway, and the French and Spaniards, 25,000 strong, with a large cavalry force, led by the Duke of Berwick. The English, having been deserted by many of the foreign troops, were defeated, and it is somewhat remarkable, as Lord Stanhope remarks, that the English army was commanded by a French, and the French army by an English general. The Duke of Berwick, who commanded the French, was the natural son of James II.

ALMAREZ (Spain).—The celebrated bridge over the Tagus, at this place, was built by Charles V., in 1552. The principal outworks of Almarez were taken from the French by Gen. [afterwards Lord] Hill, May 19, 1812.

ALMAZAN (Treaty), between Castile and Aragon, was signed April 12, 1375. The principal condition was a contract of marriage between the Infanta Leonora of Aragon, and the Infant, John of Castile.

ALMEIDA (Portugal).—This fortified town, about 16 miles from Ciudad Rodrigo, was captured by the Spaniards during their invasion of Portugal, after a long and bloody siege, Aug. 25, 1762. During the struggle in the Peninsula, it was surrendered to the English in Oct. 1808; and taken from the Portuguese by the French, Aug. 27, 1810. Wellington, who re-invested it April 7, 1811, took it after a brilliant victory at Fuentes d'Onor (*q. v.*), May 11, 1811.

ALMENARA (Battle).—Fought July 28 (O.S. 17), 1710, when the English and Germans, under Gen. Stanhope and the Archduke, afterwards the Emperor Charles VI., completely routed the Spanish army, commanded by Philip V. of Spain.

ALMERIA (Spain).—This city, the capital of a province of the same name, was, says Prescott (Ferdinand and Isabella, vol. i. pt. i. ch. 14), "one of the most precious jewels in the diadem of Granada. It had amassed great wealth by its extensive commerce with Syria, Egypt, and Africa; and its corsairs had for ages been the terror of the Catalan and Pisan marine." The Almoravides captured it in 1091, and it was retaken by the Spaniards in 1147. It was frequently assailed, and at length the Moors finally surrendered it, by treaty, to Ferdinand and Isabella, who made their entry into the town Dec. 7, 1489. Alphonso II. of Castile removed the ancient bishopric of Abdera

to this town in 1147. When the Moors seized Almeria the see was suppressed, but Ferdinand re-established it in 1490.

ALMOGAVAREZ.—A company of Portuguese adventurers who sailed from Lisbon in 1014, for the purpose of seeking new lands in the Atlantic.—A tribe of military adventurers, who assisted the Christian sovereigns of Spain in their conflicts with the Moors, were also called "almogavares," or adventurers.

ALMOHADES, or ALMOHEDES, termed by Gibbon "the fanatic princes of Morocco," a Mohammedan dynasty, that grew out of a religious sect formed by Mohammed Ben Abdallah, surnamed El Mehedi, the guide, or teacher. He was the son of a lamplighter in a mosque, and, having collected a number of followers, was foiled in an attempt to found his dynasty in Morocco, in 1121. His death occurred in 1130, and his successor, Abdelmumen, captured Morocco in 1132, and established the dynasty of the Almohades, in Africa, in 1146. The next year he invaded Spain, won several battles, and established the dynasty in that country and in Portugal. The Almohades ceased to rule in Spain and Portugal in 1257, and in Africa in 1269. They reigned 150 years, and had 14 kings. The Arabic word signifies "Unitarians."

ALMONACID (Battle).—In a severe battle fought at this place in Spain, Aug. 11, 1809, between the French and the Spaniards, the latter were defeated.

ALMONER.—An officer, whose duty it was to distribute alms, was attached in former times to the households of sovereigns, princes, prelates, and men of high station. The great abbeys and monasteries had their almoners. The date when this office was first appointed has not been ascertained. Fosbroke (Antiq. 588) says, "When our Anglo-Saxon kings dined, the poor sat in the streets, expecting the broken meat, &c., which was collected by the almoner."

ALMONER, GRAND.—(*See* HEREDITARY GRAND ALMONER.)

ALMONER, HIGH.—(*See* LORD HIGH ALMONER OF ENGLAND.)

ALMORAH (India).—In the Ghoorka war, the enemy were defeated near this place April 23, 1815, and the town itself was captured by the British April 25.

ALMORAVIDES.—An Arab dynasty, founded in the N.W. of Africa by Abdallah Ben Yassim, who died in 1058. His immediate successor, Abu Bekar Ben Omar, seized Fez, and founded the city of Morocco, in 1070. Yussef Ben Taxfin, the third of the dynasty, conquered a large portion of Spain. A long struggle followed between them and the Almohades, by whom they were driven from Africa in 1146, and from Spain in 1147.

ALMS-HOUSES.—These useful institutions were not known in this country until the Reformation. Previous to that date the poor obtained relief at the monasteries, and the houses of the wealthy. (*See* the latest editions of "The Charities of London," by Sampson Low, Jun., and Herbert Fry's Shilling Guide to London Charities.)

ALNEY, or OLNEY (Battle).—During the struggle between Edmund Ironside and Canute for the English crown, and after many sanguinary battles had been fought, the rival armies met at Olanege, or the Isle of Olney, near Deerhurst in Gloucestershire, in 1016. There it was proposed, according to Henry of Huntingdon, to decide the matter by single combat. The proposal was accepted, and after the two kings had contended for some time, the advantage being with Edmund, Canute offered to divide the kingdom. This offer was accordingly accepted, and the kiss of peace was given. Wessex was allotted to Edmund, and Mercia to Canute. The former died, or, as some chroniclers say, was treasonably killed, a few days afterwards, and Canute obtained possession of the whole kingdom. William of Malmesbury states that the division was agreed to without a combat; and the Anglo-Saxon Chronicle does not mention the duel.

ALNWICK.—This castle, on the river Aln, in Northumberland, was besieged, in 1093, by Malcolm III., King of Scotland, who, with his eldest son, was killed by the Earl of Northumberland Nov. 13. David I. captured it in 1136. William the Lion of Scotland, with 80,000 men, laid siege to it in 1174, and was taken prisoner after sustaining a most disastrous defeat. It was burned by King John in 1216.

ALOGIANS, or ALOGI.—A sect of heretics who sprang up soon after the death of John the Evangelist, A.D. 100. They denied that Jesus Christ was the Logos, and rejected St. John's Gospel and the Apocalypse. Augustine opposed them, and they were condemned at the Council of Toledo, Dec. 9, 633. Robertson (Hist. of Christian Church to the Pontificate of Gregory the Great, p. 72n), says they "were styled *Alogi*—a name of double meaning—signifying their rejection of the writings in which the *Logos* is mentioned, and also that they were *without reason*."

ALOST (Belgium).—This town—the old capital of East Flanders—was besieged in 1128. The town-hall was built in 1210. Thierry Martens, who introduced the art of printing in 1475, was born here. It was taken by the French under Turenne in 1667, and retaken in 1706.

ALPACA.—The wool of this animal has long been in use among the Indians of the Andes; but it was not until 1829 that it became an article of commerce in this country. Alpacas have been introduced into Australia, and the first wool was obtained in 1859.

ALPHABET.—The origin of alphabetical characters is a subject that has excited much controversy among the learned. For a long time it was believed that hieroglyphical writing gave rise to the invention of alphabetical writing, by contraction of the hieroglyphic symbols into alphabetical letters. Hales (Chronology, i. 370) combats this theory, showing that the art of alphabetical writing preceded the establishment of hieroglyphic. "Some Jewish and Oriental traditions," says this author, "ascribe the invention of writing to Seth, the son of Adam; others to Enoch, the seventh from Adam; whether well founded or not, it proves the prevailing opinion that letters were of antediluvian date." Western tradition supports this view, and both Pliny and

Cicero asserted that letters were always found amongst the Assyrians. From Egypt they were probably introduced into Canaan by Moses, and were carried by the Phœnicians into Greece. Herodotus states that they were brought into Greece by Cadmus. This took place B.C. 1493; according to Hales, B.C. 1494; and to Clinton B.C. 1313. The Greek alphabet consisted at first of only 11, or at most 16 letters; but the number was eventually increased to 22. Cicero and Quintilian assert that Simonides, who flourished about B.C. 540, added the two long vowels η and ω, and the two double consonants ξ and ψ; while Aristotle and Pliny say that Epicharmus, who flourished about B.C. 450, added the two letters χ and θ to the Greek alphabet. Sharon Turner is of opinion that the Anglo-Saxons were not unacquainted with alphabetical characters when they came into England, though they laid aside their ancient letters, with the exception of two, on their conversion to Christianity.

ALPHONSINE, or ALFONSINE, TABLES.—These astronomical tables are said to have been constructed by certain Jews of Toledo, in 1252. Other authorities attribute them to the king's preceptors, under the direction of Alphonso X. (whence their name), King of Castile and Leon, surnamed the Wise. They were first printed at Venice in 1483.

ALPINE CLUB (London).—This society, for the promotion of Alpine discovery, was formed early in the year 1858, and published the first volume of "Peaks, Passes, and Glaciers" in 1859. Lord Francis Douglas, Mr. Haddo, and Mr. C. Hudson, members of this club, perished with their guide in the descent of Mont Cervin, or Matterhorn, July 14, 1865. They had accomplished the ascent in safety, but on the return journey one of the party made a false step, and fell over a precipice 4,000 feet deep, dragging his companions after him.

ALPS.—Bellovesus is said to have led an army of Gauls across the Alps into Northern Italy B.C. 620. Hannibal crossed with the Carthaginian army B.C. 218. The Roman army effected the passage in the expedition against the Ligurians B.C. 173. Pompey discovered a new route in his march into Spain B.C. 77. Suwarrow, with the Russian army, crossed at the St. Gothard pass in September, 1799, and Napoleon I., with the French army, effected the passage at the Great St. Bernard pass, May 16—20, 1800.

ALPS (Tunnel).—A government commission having reported favourably respecting the invention of Messrs. Sommeiller, Grandis, and Grattoni, for boring tunnels through the Alps by machinery, it was forthwith applied, in 1857, to the excavation of a tunnel under Mont Cenis, required to complete the direct communication by the Victor Emmanuel Railway between France and Italy. The distance is about seven miles and a half.

ALRESFORD (Battle).—Fought between the Parliamentary forces and the Royalists, March 29, 1644. The latter, though worsted, withdrew in good order to Reading.

ALSACE (France).—In German, "Der Elsass," meaning "*Ell settlement*, or *seat*," having been abandoned by the Romans in the 5th century, was overrun by the various hordes that crossed the Rhine, until it was annexed to Gaul by Clovis I., and was included in Charlemagne's empire. It was connected with Germany, having for a time constituted a duchy, afterwards joined to Swabia, from 955 till 1648, when, by the treaties of Münster, Jan. 30, and of Westphalia, Oct. 24, a portion was ceded to France. Louis XIV. seized Strasburg in 1681, and this city, with the remainder of Alsace, was secured to France by the peace of Ryswick, Oct. 30, 1697.

ALSATIA.—The sanctuary of Whitefriars was so called in 1623 by Thomas Powel, and gave its name in 1688 to Shadwell's "Squire of Alsatia." Owing to the disgraceful abuses of the privilege of sanctuary, it was abolished by 8 & 9 Will. III. c. 27 (1697), after the passing of which act Alsatia was deserted, and is described as being in ruins in the "Tattler" for Sep. 10, 1709.

ALSEN (Denmark).—This island, situated in the Little Belt, was, for nearly 17 years, the prison of Christian II. of Denmark, who was deposed in 1523. The fortifications were attacked by the Prussians June 26, 1864, and the island surrendered June 29.

ALTAKU (Battle).—Fought B.C. 700 near this small town, which Rawlinson believes to be the Eltekeh (Josh. xix. 44) of the Jews, between Sennacherib, King of Assyria, and the combined Egyptian and Ethiopian forces. The latter were defeated with great slaughter.

ALTARS. — The first altar mentioned in Scripture was erected by Noah after the flood (Gen. viii. 20), B.C. 2343, according to Calmet; B.C. 3154, according to Hales; and B.C. 2481, according to Clinton. Abraham erected altars in different places (Gen. xii. 8, and xiii. 18); and God commanded Moses to raise them. The Jews also imitated the custom of pagan nations, who built high places, and images, and groves, on every high hill and under every green tree (1 Kings xiv. 23), B.C. 960. The Greeks and Romans built altars on which they sacrificed to their heroes, and a similar custom prevailed amongst most ancient nations. The altars used in the early ages of Christianity were made of wood and in the form of a table, and it was not until the 5th century that stone was employed. Eventually they assumed the form of a tomb, as of the Sepulchre of the Martyrs, whence they derive their name. The proceedings of the Council of Agda, Sep. 11, 506, contain the first public record in connection with their consecration. The general belief in purgatory in the 9th century led to the erection of additional altars in churches. They had been introduced into England, but they were ordered to be removed and replaced by communion tables at the Reformation. Ridley, Bishop of London, at a visitation, held in consequence of a letter in the king's name, setting forth that previous orders for the removal of stone altars had not been duly complied with, directed the clergy of his diocese to substitute wooden tables (1550). Stone altars, again erected in the reign of Queen Mary, were removed in that of Elizabeth. In the stone-altar case, decided in the Arches Court, Jan. 31, 1845, Sir H. Jenner Fust decreed, on

appeal, reversing the decision of the Chancellor of Ely, that a stone altar could not be legally erected in any church belonging to the Establishment.

ALTENKIRCHEN (Battle).—In a combat at this town, in Prussia, June 4, 1796, the French compelled the Austrians to retire, but in a battle fought Sep. 19, 1796, between the French republican army, under Gen. Marceau, and the Austrians, led by the Archduke Charles, the latter gained a complete victory, and Gen. Marceau was mortally wounded.

ALTMARK.—At the village of Altmark, or Starygrow, in Prussia, Sep. 25, 1629, a truce for six years was concluded between Sweden and Poland.

ALTON (Battle.)—Fought between the Danes and the Anglo-Saxons in 1001. The contest was severe, and many were slain on both sides, the Danes retaining possession of the field of battle. The authorities do not agree respecting the place where this encounter occurred.

ALTONA, or ALTENA (Holstein), on the Elbe, was a mere village until it came into the possession of the Danes in 1660, who erected the city in 1664. A treaty of peace between Holstein and Denmark was concluded here June 20, 1689. It was destroyed by the Swedes Jan. 10, 1773, and occupied by the Austrians Feb., 1851. The army acting for the German Federal Diet entered this town Dec. 24, 1863. It was occupied by the Prussians Feb. 12, 1864.

ALT-RANSTÄDT (Treaties).—Two treaties of peace were concluded here during the 18th century, the first signed Oct. 5 (O.S. Sep. 24), 1706, and dictated by Charles XII. of Sweden to Augustus, Elector of Saxony, who formally renounced the claim he had put forth to Poland, acknowledging Stanislaus Lescinsky as king. He also renounced the treaty with Russia, and agreed, by secret articles, to provide winter quarters in Saxony for the Swedish troops. Traitors and deserters were to be given up. The second treaty, between Louis XIV. and the Emperor Charles VI., who had refused to join in the treaty of Utrecht in 1713, was signed March 17 (O.S. 6), 1714. The latter was preliminary to the peace of Baden (*q. v.*).

ALUM.—It is not known when the process of making alum was discovered. Beckmann (Hist. of Invent. &c. i. 186) states that at an early period alum works existed at Roccha, the ancient Edessa, in Mesopotamia, whence the name Rock alum. Several works had been established in the neighbourhood of Constantinople previous to its capture by the Turks in 1453. The Genoese and other Italians introduced the manufacture into Europe, and amongst the earliest Italian works of the kind were those erected at Volterra in 1458. Alum was made at Hesse, in Germany, in 1554, in Bohemia in 1558, and at Glatz in 1563. It was introduced into England by Sir Thomas Chaloner, and works were built at Guisborough, in Yorkshire, according to some authorities, during the reign of Elizabeth, and, according to others, in that of James I., about 1608.

ALUM-BAGH, a domain containing a palace, a mosque, and a private temple, bounded by a garden, situated in a beautiful park, about four miles from Lucknow, was converted into a fortress by the rebels in 1857. It was captured by the British, under Outram and Havelock, Sep. 23, 1857, and a small garrison placed in it, which was not relieved until Nov. 14, in the same year. Sir Henry Havelock died here Nov. 25. Sir James Outram held the place with 3,500 men until Lucknow was taken, March 21, 1858, having in the meanwhile repulsed an attack of 30,000 men, Jan. 12, and one of 20,000, Feb. 21.

ALUMINIUM, one of the most abundant metals in nature, being the metallic basis of alumina, or pure clay, was first discovered in 1828, by Wöhler, who freed it from its combination with oxygen by electric means, and obtained it in 1846 by decomposing chloride of alumina by means of sodium. Deville and others made some interesting experiments in 1855 and 1856, and in 1855 Rose announced that Aluminium could be prepared at a cheap rate from a mineral named cryolite or "Mineral Soda." Aluminium works were erected at Battersea, near London, in 1860.

AMALEKITES.—This tribe of Edomite Arabs, descendants of Amalek, grandson of Esau (Gen. xxxvi. 12), were the first amongst the Canaanites to oppose the Israelites after the passage of the Red Sea (Exod. xvii. 8—16), at the battle at Rephidim, B.C. 1491. Saul overcame them (1 Sam. xv. 8) B.C. 1093; David (1 Sam. xxvii. 8, 9, and xxx.), B.C. 1055; and their descendants were exterminated by the Simeonites, about B.C. 725 (1 Chron. iv. 42, 43).

AMALPHI (Italy), a small republic in the Gulf of Salerno, that attained considerable eminence in the Middle Ages. It was the seat of a bishop at an early period, and in 987 John XV. erected it into an archbishopric. Gibbon says, "Its industrious citizens, by the invention of the mariner's compass, have unveiled the face of the globe." Flavio Gioja, said to have invented the mariner's compass (*q. v.*) in 1302, was born here. It flourished entirely by its commerce, from about 750 to its conquest by Robert Guiscard, in 1077. It regained its independence in 1096, submitted to the King of Sicily in 1131, and was sacked by the Pisans in 1135. Masaniello was born here in 1623.

AMALPHI (Pandects).—The story of the discovery at Amalphi, in 1137, of a unique copy of the Pandects of Justinian, which led to a revival of the study of jurisprudence in the West, though at one time generally believed, is now rejected as fabulous.

AMALRICIANS.—The followers of Amalricus, or Amaury, of Bene, the Paris dialectician and theologian. He denounced several Roman Catholic doctrines, and is said to have believed in a speedy reformation, and purification of the Church by the sword. He has also been accused of Pantheism. Milman (Lat. Christ. vi. b. xiv. ch. 3) says, "All kinds of incongruous charges were heaped upon the memory of Amaury de Bene: he was an Albigensian, believed in the Eternal Gospel." Whilst commenting upon the doctrines of Aristotle, he advanced his peculiar views. Innocent III. launched a bull of condemnation against his chief work, "The Physion," in 1204. Amalricus retracted, and died soon after. His remains were disinterred and burned, and several of his followers were put to death, by order of

the Council of Paris, in Oct., 1210. David of Dinant was one of his followers, but the sect speedily disappeared.

AMAND, St. (French Flanders).—Taken by the Prince of Nassau, June 27, 1709. Near this place the English first met the French republican troops, May 8, 1793. The Duke of York commanded the English and their allies, who, after a hotly-contested battle, defeated the French.

AMARANTA (Order).—This female order of knighthood, instituted in Sweden by Queen Christina, in 1645, became extinct soon after her death.

AMAZON, MARANON, or ORELLANA (South America), the largest river in the world, was discovered in 1500 by Vincent Yanez Pinzon, though little was known of it until the Spanish adventurer Orellana, having embarked on the Rio Napo, one of its remote tributaries, was carried down the stream to its embouchure, reaching the sea in August, 1541. In consequence of his report that armed women had been seen on its banks, the river obtained its popular name of Amazon. The river was first accurately described in 1745 by M. de la Condamine, who had embarked upon it in 1743, near Jaen, and followed its current to its mouth.

AMAZON, West India mail steamer, destroyed by fire, in the bay of Biscay, Jan. 4, 1852. Out of 161 persons on board at the time, only 59 were saved. Eliot B. G. Warburton, born in 1810, author of "The Crescent and the Cross," and other works, perished on the occasion.

AMAZONS.—A race of female warriors, of Scythian origin, dwelling, according to ancient tradition, on the banks of the Thermodon, in Cappadocia. They are mentioned by Homer and Herodotus. In order to use their weapons with greater force and precision, their right breasts were burned off or destroyed at an early age. The Abbé Guyon wrote a short history of the Amazons, of which Dr. Johnson published a translation in the "Gentleman's Magazine" for 1741. These accounts have been rejected as fabulous, although repeated by many authors. Mill (Crusades, vol. i. ch. ix. p. 377), speaking of Conrad's army of crusaders in 1147, says, "A considerable troop of women rode among the Germans; they were arrayed with the spear and shield; but some love of usual delights had mingled itself with the desire of great exploits, for they were remarkable for the splendour of their dress, and the bold leader was called 'the golden-footed dame.'" Alvarez, who visited Abyssinia in 1520, speaks of Amazons in that country. The figure of an Amazon is found on many ancient coins. The fact of the existence of a regiment of Amazons in the present century is proved by Commander Forbes, who met with one at Dahomey during a visit in 1849 and 1850. The author says: "It is rarely that Europeans are called upon to believe in the existence of Amazons—fighting women prepared to do battle on all around, the terror of the neighbouring tribes, dressed in the attire of male soldiers, armed with muskets and swords. These sable ladies perform prodigies of valour, and not unfrequently, by a fortunate charge, save the honour of the male soldiers, by bearing down all before them, discovering themselves to the astonished and abashed prisoners to be women, exceeding their male coadjutors in cruelty and all the stronger passions."

AMBASSADORS, as representative agents or envoys, were employed in very ancient times. Moses sent messengers to the King of Edom to request a passage through his territories (Numbers xx. 14—21), B.C. 1452; and David made war upon the Ammonites because their king ill-used his messengers and treated them as spies (2 Sam. x.), B.C. 1038. The custom of sending ambassadors prevailed amongst most ancient nations. Malmesbury, in his Chronicle, speaks of three ambassadors sent from England to Constantinople in 1056. Wicquefort (The Ambassador and his Functions, translated by Digby, 1716) declares, "There is not any kingdom or state that does not make use of them." In another place he says, "The *Marshalless* of *Guebriant* was the first lady, and the only one, if I mistake not, that has had this quality annexed to her own person, and she may perhaps be the last." Resident ambassadors are said to have been introduced by Ferdinand V. of Spain, but the practice did not become common till the 16th century. In England, even in the time of Henry VIII., they were called orators. By our laws of England, ambassadors enjoy many privileges. They are free from arrest by 7 Anne, c. 12 (April 21, 1708). This law was occasioned by the arrest of Andrew Artemonowitz Matueof, ambassador to Peter the Great, July 21, 1708. He was taken out of his coach in London for a debt of £50, at the suit of Thomas Morton, laceman. Their goods are also free from distraint by the same statute.

AMBER, found on the coasts of the Baltic Sea, is also obtained by mining. This substance has been known from the earliest times (Ezekiel i. 4—27, and viii. 2), and its electric property was first observed by Thales, born B.C. 640. It was used for ornament as well as medicinal purposes before the Christian æra. Sophocles, who flourished B.C. 495—B.C. 405; Herodotus, born B.C. 484; Pliny the Younger, A.D. 61—105; and other ancient writers, allude to it. That the ancient Britons employed it for ornament is proved from the fact of its frequent occurrence in barrows. It was also used as an amulet or charm against disease. In 1576 a mass weighing 11 lb. was found in Prussia. It occurs in Sicily and the Adriatic.

AMBERG (Battle).—The French republican army, under Jourdan, was defeated near this town, in Bavaria, by the Austrians, led by the Archduke Charles, Aug. 24, 1796.

AMBERGRIS, *ambre gris*, or grey amber, to which it was long supposed to bear some affinity, is generated by the large-headed spermaceti whale. It is found floating at sea, and on the coasts of Greenland, China, Japan, Ireland, &c. The largest piece on record weighed 182 lb.

AMBIANI.—This Belgic people, occupying the country round Amiens, opposed Julius Cæsar with 10,000 armed men, B.C. 67, but ultimately submitted to him. They united

with the rest of the Gallic tribes in the great rebellion against the Romans, B.C. 52.

AMBLEF (Battle).—Gained at this place, near the abbey of Stavel, in the Ardennes, in 716, by Charles Martel over the Neustrians, led by Chilperic II. and Ragenfroy, who were returning to their own territories after having ravaged Austrasia.

AMBLETEUSE (France).—A small seaport between Calais and Boulogne, at which Cæsar embarked his cavalry for the invasion of England, B.C. 54; and James II. landed, Dec. 23, 1688, on deserting the English throne.

AMBOISE (France).—A pacification, known as the Edict of Amboise, between the Roman Catholics and the Protestants, was promulgated at Amboise, March 19, 1563, by which a general amnesty was granted for the past and free toleration of Protestant worship in particular places in France. The term "Huguenot" was first applied to the French Protestants at this town. Charles VIII., born here, June 30, 1470, died here, April 7, 1498. Abd-el-Kader was kept prisoner in the castle from 1848 to 1852.

AMBOISE (League).—Formed in 1560, by the leaders of the Christaudins, as the French Calvinists were then called, to seize Francis II. and the Guises at Blois, to overthrow the power of the latter, and to compel the king to grant them protection. The plot was disclosed, and the court removed from Blois to the castle of Amboise, which was entrusted to Condé.

AMBOYNA (Indian Archipelago), the chief of the Molucca Islands, was discovered in 1511 by the Portuguese, who established a factory in 1521, but did not obtain full possession until 1580. The Dutch expelled the Portuguese in 1605; the English made an unsuccessful attempt to form a settlement upon the island in 1615, and subsequently established a factory, the members of which were all treacherously murdered by the Dutch governor in Feb., 1623. The Dutch agreed to pay £270,000 compensation, part of which was to go to the heirs of the sufferers, by the treaty of peace of April 5, 1654. Amboyna fell into the hands of the English, Feb. 16, 1796; was restored to the Dutch by the treaty of Amiens, March 25, 1802; recaptured Feb. 17, 1810; and was given up again by the treaty of Paris, concluded May 30, 1814.

AMBRACIA (Greece).—This ancient city of Epirus, colonized by a party of Corinthians, about B.C. 635, soon rose to maritime importance, and contributed seven ships to the Greek armament against Xerxes, B.C. 480, and 27 to the Corinthians in their contest with Corcyra, B.C. 432. During the Peloponnesian war the Ambraciots seized Argos, which was retaken by the Athenians B.C. 432, who successfully resisted a second attack by the Ambraciots, B.C. 430. In conjunction with the Lacedæmonians they sustained a severe defeat from the Acarnanians at Stratus, B.C. 429, and were nearly annihilated in a third attack upon Argos, B.C. 426. Ambracia was subsequently seized by the Macedonians, whose garrison was expelled by the inhabitants B.C. 336. It afterwards fell into the hands of Pyrrhus, King of Epirus, who made it the seat of his government, and adorned it with many choice works of art, which were removed by the Romans on their capture of the city, B.C. 189. The site of this city is occupied by the modern Arta, which rose to importance, as the chief town of Acarnania, about the 14th century.

AMBROSIAN CHANT.—St. Ambrose, Bishop of Milan (374—397), introduced the choral music of the Eastern into the Western Church, and it afterwards bore his name. It was superseded by the Gregorian chant about the year 600.

AMBROSIAN LIBRARY.—This library, named after St. Ambrose, the patron saint of the city, was founded at Milan by Cardinal Borromeo in 1602, and opened in 1609. It contains 60,000 books, and 15,000 MSS.

AMBROSIAN RITUAL.—The name given to the office used in the church of Milan. It receives its name from St. Ambrose, Bishop of Milan (374—397), because it was either introduced into Milan, or at any rate altered, by him.

AMBULANCE CORPS.—Some Chelsea pensioners were, at the commencement of the war against Russia, in 1854, formed into an ambulance corps, which was superseded by the Land Transport Corps (*q. v.*)

AMEDIANS, or AMEDIEU.—This order of monks, so called because they claimed to be *lovers of God*, or *beloved by God*, originated in Italy in 1400, and subsequently possessed 28 convents, which were annexed by Pius V. (1566—1572) to those of the Cistercians and Soccolanti.

AMEN.—The use in Christian worship of this Hebrew word, signifying affirmation or assent, is as ancient as the times of the Apostles, being referred to by St. Paul A.D. 55 (1 Cor. xiv. 16). It had previously been frequently used in the writings of the Old Testament, and is the word so often translated "verily" in the English version of the sermons and exhortations of our Saviour.

AMERCEMENT, or AMERCIAMENT.—The difference between amerciaments and fines is this: fines are said to be punishments certain, and grow expressly from some statute; but amerciaments are such as are arbitrarily imposed. Magna Charta (c. 14) provides that a freeman is not to be amerced for a small fault, but proportionable to the offence, and that by his peers. The statute 9 Hen. III. c. 14 (1225), provides how men of all sorts shall be amerced, and by whom; and by Statute of Westminster I. (3 Edw. I. c. 6), 1275, it was enacted that amercements should be reasonable; and the scale for various classes of the community was regulated by 25 Edw. I. c. 14. (1297).

AMERGAU MYSTERY.—(*See* AMMERGAU MYSTERY.)

AMERICA, or the NEW WORLD.—The existence of this continent was known to the Scandinavians, or Northmen, who discovered Iceland (*q. v.*) and Greenland (*q. v.*) in the 9th century, forming settlements in these countries. One of the sailors, on a voyage from Iceland to Greenland, was driven by a storm on the coast of America in 986, and the account which he gave of his adventure induced Leif,

son of Eric the Red, to undertake a voyage of discovery in 1000. Having touched at places supposed to be the modern Newfoundland, Nova Scotia, and the neighbouring coast, the expedition came, in 1001, to a part of the country which received the name of Vinland, from its wild vines. It is supposed to have comprised Rhode Island, and parts of the coast between Boston and New York; and it became the seat of a settlement; for in 1121 Eric Upsi, an Icelander, the first Bishop of Greenland, undertook a mission to the new colony of Vinland. The intercourse between the Northmen and America was carried on until the middle of the 14th century. It was, however, reserved for the enterprising navigators of the 15th century to give a knowledge of the New World to the inhabitants of the Old, and to establish that connection between these two distant portions of the globe that has produced such wonderful results. Christopher Columbus, a Genoese navigator, supplied by Ferdinand and Isabella with three small ships, sailed from Palos, in Andalusia, Friday, Aug. 3, 1492, and landed at St. Salvador (Guanahani), one of the Bahama Islands, Friday, Oct. 12. Columbus then sailed on, and discovered Cuba (*q. v.*) Oct. 28, and Hispaniola, or Hayti, now St. Domingo, where he left a settlement, La Navidad, or Nativity. He set sail from this place Jan. 4, 1493, and reached Palos March 15. The American continent was not discovered until June 24, 1497, when John Gaboto, or Cabot (a Venetian settled in England, who, with his son, Sebastian, sailed in ships furnished by Henry VII. and some Bristol merchants), landed in North America, and explored a part of the coast. Columbus discovered Paria, on the continent of South America, in 1498; and thus both divisions of the New World were known before the 16th century. The early navigators, imagining that these countries formed part of India, gave them the name of the West Indies. Amerigo Vespucci, a Florentine traveller, who sailed in several expeditions, is said to have inserted the words *Tierra de Amerigo* in a map published by him early in the 16th century. Though this account is denied, from him came the name of America, by which that portion of the globe is now known. Further information respecting America is given under its various political divisions. The following chronological table contains some of the chief points in the early history of its discovery and colonization :—

A.D.

1493, Sep. 25. Columbus, with 17 ships, carrying 1,500 men, sails from Cadiz on his second voyage.—Nov. 2. Discovers Dominica (*q. v.*).

1494, April 24. Columbus explores the West India Islands.—May 3. He discovers Jamaica (*q. v.*).—Sep. 29. The expedition returns to Isabella, a city founded in Hayti by Columbus, the fort La Navidad having been destroyed.

1495, Feb. 24. Columbus despatches four ships laden with slaves, &c., to Europe.—Oct. A commissioner sent by Ferdinand and Isabella to examine into alleged grounds of complaint against Columbus arrives at Isabella, in Hayti.

1496, March 5. John Cabot and his three sons receive from Henry VII. letters patent authorizing their expedition to America.—March 10. Columbus embarks for Spain.—June 11. He lands at Cadiz.

1497, June 24. John Cabot discovers St. John's and the coast of N. America. (*See* CANADA.) St. Domingo is founded.

1498, Feb. 3. Henry VII. grants a second patent to John Cabot.—May 30. Columbus embarks on his third voyage at St. Lucar de Barrameda, with six vessels and 200 men.—June 27. He reaches the Cape Verde Islands.—July 31. He discovers Trinidad (*q. v.*).—Aug. 1. He lands near Point Alcatraz, whence, for the first time, he perceives the mainland of the American continent. Entering the gulf of Paria, he goes on shore.—Aug. 30. He returns to Isabella, in Hayti.

1499, May 21. Francis de Bobadilla is appointed by the sovereigns of Spain governor of the American colonies.—Oct. Columbus despatches two vessels to Spain, in which some of his associates convey slaves. This gives offence to Isabella, who had not sanctioned the subjection of the natives. Ojeda lands at Surinam, sails to the gulf of Paria, and thence to Venezuela.

1500, July. Bobadilla sails from Spain.—Aug. 23. He lands in Hayti.—Oct. Sends Columbus to Europe in chains. Gasper Corterral, a Portuguese, lands in Labrador. Pinzon discovers Brazil (*q. v.*), and reaches the mouth of the Amazon.

1501, March 19. Henry VII. grants a patent for an expedition to America, to three English and three Portuguese navigators. Bastidas explores the coast from Cape Vela to the gulf of Darien.

1502, May 9. Columbus embarks on his fourth voyage from Cadiz, with four vessels and 150 men, intending to explore the isthmus of Darien, in hopes of discovering a passage to the East Indies.—May 20. He reaches the Grand Canary.—June 15. He stays at one of the Caribbee Islands.—July 14. He leaves Port Brazil.—July 30. He discovers the island of Guanaga or Bonacca, near the bay of Honduras.—Sep. 25. He reaches Cariay or Cariari.—Nov. 2. He discovers Porto Bello.—Dec. 5. He is compelled by repeated failures to abandon his hopes of discovering a passage to India.

1503, June 24. Columbus anchors at Jamaica.—Aug. 13. He arrives at Hayti.

1504, Sep. 12. Columbus re-embarks for Europe.—Nov. 7. He lands at San Lucar on his return from his fourth and last voyage.

1508. Pinzon and Solis discover Yutachan, and Aubert, a Frenchman, the St. Lawrence.

1510. Ojeda builds St. Sebastian, the first settlement on the mainland at Darien.

1511 and 1512. Velasquez conquers Cuba. Vasco Nunez de Balboa obtains information respecting Peru.

1512, Easter Day. Ponce de Leon discovers the coast of Florida.

1513. Vasco Nunez de Balboa crosses the isthmus of Darien, where he established a small settlement.—Sep. He discovers the S. Pacific Ocean.

1515. Solis discovers the La Plata.

1517. Cordova discovers Campeachy, and penetrates into Mexico.

1518. Grijalva explores the shores of the Mexican Gulf, and gives his discoveries the name of New Spain.

1519, Feb. 18. Cortes sails from the Havana for the conquest of Mexico.

1520. Magellan passes through the straits that bear his name.

1521, Aug 13. Cortes completes the conquest of Mexico, by the capture of its capital.

1522. Gil Gonzalez de Avila explores the west coast of Mexico, from Cape Blanco to Cape de Fonseca.

1524. A French expedition, under Verazzano, surveys the coast of N. America.

1526. Pizarro discovers Quito.

1527. Pizarro visits Tumbez, in Peru, and sails along the coast to the port of Santa.

1531, Jan. Pizarro sails on his third and last expedition for the conquest of Peru.

1532. Pizarro attacks Peru.

1533. Pizarro enters Cuzco, the capital of Peru.

1534. Cartier circumnavigates Newfoundland, and enters the gulf of St. Lawrence. Grijalva discovers California (*q. v.*).

1535. Cartier ascends the St. Lawrence to Hochelaga, now Montreal. The city of Buenos Ayres is founded by Mendoza.

1536. Hore attempts to found an English settlement at Newfoundland.

1539. Ulloa enters the gulf of California.

1540. Alarcon explores the Colorado River. Cartier, having been despatched by Francis I. to prosecute discoveries in Canada, explores the district of Hochelaga, to which he gives the name of Montreal.
1541. Orellana sails down the Maranon, or Amazon, and reaches the sea in August. Chili is conquered.
1546. The Spanish conquest of Peru is completed.
1549. Martines de Yrala ascends the Paraguay to the 17th deg. of S. latitude. Roberval embarks for the St. Lawrence, and is never heard of afterwards.
1555. An expedition despatched by Admiral Coligny, under the Chevalier de Villagagnon, lands on the river Janeiro, in S. America, and founds a settlement.
1562. A French settlement is formed in Florida.
1564. Carolina settled by the French, who are expelled by the Spaniards.
1567. Hawkins sails to the Spanish main, and discovers the Falkland Islands.
1573. Sir Francis Drake reaches Panama, and is the first Englishman who sees the Pacific Ocean.
1574. John Cortereal attempts to discover the north-west passage of America.
1575. Oxenham sails for S. America.
1576. Martin Frobisher goes on a voyage of discovery to the north-west.
1577. Dec. 13. Drake sails and reaches La Plata April 14, 1578. He doubles Cape Horn, and, sailing as far as Vancouver Island, discovers New Albion, and reaches England Sep. 26, 1580.
1583. Sir Humphrey Gilbert's expedition to Newfoundland proves a failure.
1584. Raleigh's expedition discovers Virginia.
1585. Davis sails to Greenland, and discovers the straits that bear his name. Sir Francis Drake sails from England to the West Indies with a fleet of 25 ships. The first English settlement in Virginia is formed at Roanoke.
1586. The settlement at Roanoke is destroyed.
1587. Cavendish sails to the N. Pacific.
1604. The French settlement of Acadia is formed.
1607. The first permanent English settlement in America is made in Virginia, and called James-town. Hudson's first voyage.
1608. Quebec is founded by the French.
1610. A patent is granted to Lord Bacon and others for a plantation in Newfoundland. Hudson discovers the bay that bears his name.
1614. First Dutch settlement on the Hudson.
1616. The cultivation of tobacco is commenced in Virginia.
1620. Plymouth, in New England, is settled by the Puritans. The first negroes are imported into Virginia in a Dutch ship.
1621. Sir William Alexander obtains a charter for Nova Scotia.
1625. The French form a settlement at St. Christopher's. The English land upon that island in the same year.
1627. A Swedish settlement is formed on the Delaware.
1628. An English settlement is formed at Naumkeag, since called Salem, in Massachusetts Bay.
1633. Lord Baltimore's settlement is formed in Maryland.
1635. Fenwick establishes a colony on the Connecticut, and the French found a settlement in Guiana.
1663. A settlement is made by the English in Carolina. St. John's (afterwards Prince Edward's Island) is granted to Doublet.
1669. An English settlement is made in S. Carolina.
1671. A settlement is formed at Rupert's River.
1674. A settlement is formed at Moose River.
1680. Albany settlement is formed.
1682. Penn founds the settlement which is named after him.
1685. The Nelson and Severn settlements are formed.
1698, Nov. 2. The Scotch form a settlement at Darien, and erect Fort Andrew. It was abandoned in 1699. A second and third expedition followed.
1700, March 30. The Scottish settlers surrender to the Spaniards, and the enterprise is abandoned.

AMERICA CENTRAL.—(*See* CENTRAL AMERICA.)

AMERICA (North). — (*See* AMERICA, CALIFORNIA, CANADA, GREENLAND, MEXICO, NOVA SCOTIA, UNITED STATES, &c., &c.)

AMERICA (South).—(*See* SOUTH AMERICA.)

AMERICAN CHURCH.—The first recorded baptism of a native American took place at Virginia, Aug. 13, 1587. In the letters patent granted by James I. for the plantation of Virginia, April 10, 1606, the duty of a Christian nation to communicate through her colonies the knowledge of the truth which she possesses is duly recognized. Robert Hunt, the first clergyman appointed to the colony of Virginia, sailed with the expedition, Dec. 19, 1606. The first marriage celebrated in the colony is said to have been solemnized by Robert Hunt in 1608. Such was the humble origin of the Episcopal Church in America. During the Great Rebellion, the colonists of Virginia, in 1643, ordered that no clergyman should preach or teach, publicly or privately, except in conformity to the Church of England. The Episcopalians suffered severely during the war of independence, but at its close, in 1784, the clergy of Connecticut elected the Rev. Samuel Seabury bishop, and he was consecrated by the bishops of the Episcopal Church of Scotland, having met with a refusal at Lambeth. He was the first colonial bishop. An address was sent from the General Convention, held at Philadelphia, Oct. 5, 1785, to the English archbishops and bishops, begging them to confer the episcopal character on such as should be recommended to them. A reply was returned Feb. 24, 1786, and three colonial bishops were consecrated at Lambeth, Feb. 4, 1787, under the authority of an act of Parliament passed for that purpose. Dr. Madison was consecrated first Bishop of Virginia in 1790. Since 1842 the American clergy have been allowed to officiate for a period not exceeding two Sundays in succession, in English churches. There are 24 bishops belonging to this branch of the Episcopal Church.

AMERICAN CONGRESS. — The delegates from 12 colonies, amounting to 55 in number, assembled at Philadelphia Sep. 5, 1774. They passed a declaration of rights, and other measures, and separated Oct. 26. The second Congress met May 10, 1775, and issued the Declaration of Independence July 4, 1776. The Congress removed to Baltimore towards the end of 1776. The first Congress of the United States met at New York in 1789. Its sittings were transferred to Philadelphia in 1790, and were removed to Washington, where they have since been held, in 1800.

AMERICAN STAMP ACT.—(*See* STAMP ACT.)

AMETHYST.—This stone was the ninth in order on the breastplate of the Jewish high-priests, and was consequently known as early as B.C 1491. It is found in India, the Brazils, Persia, and various parts of Europe. Near Kerry (Ireland) there is said to be a fine vein. Emanuel (Hist. of Diamonds, &c.) states that in 1652 an amethyst was worth as much as a diamond of equal weight. Its name is derived from the Greek, and means "not to inebriate," in allusion to the superstition that it had the power of dissipating drunkenness.

AMHERST (Hindostan).—This seaport town of Tenasserim was founded on the cession of the province by the Burmese in 1826, and

was named after Lord Amherst, then Governor-General.

AMID, AMIDA, or AMIDI (Asia).—This city was wrested from the Romans by the Persians, under Sapor, after a memorable siege that lasted from July 27 to Oct. 7, 359 A.D. The Persians captured it again, after a long siege, in 502; but the Romans soon regained possession. In the 7th century it received the Arabic name of Diarbekr (*q. v.*), meaning "the country of Bekhr."

AMIENS (France).—This city of Picardy, anciently called Samarobriva, was selected by Julius Cæsar for his winter quarters, B.C. 54. A bishop's see was established here about A.D. 303, and in 444 it was seized by Clodion, King of the Salian Franks, who made it the seat of his government, and died here in 448. In 1185 it was ceded by Philip of Alsace to Philip II. (Augustus), King of France, by whom it was annexed to the territories of the French Crown. The fine old cathedral, commenced by Robert de Luzarches in 1220, was continued in 1269 by Thomas and Regnault de Cormont, and was completed in 1288. In this building Edward III. of England did homage to Philip VI. for Guienne, in 1329. Amiens, pledged to Burgundy for 400,000 gold crowns in 1435 by Charles VII., was redeemed by Louis XI. in 1463. In 1529 the lofty spire of the cathedral was completed. Amiens embraced the cause of the League in 1588, and was captured by Henry IV. in 1592. The Spaniards took it by surprise, March 10, 1597, but it was retaken by Henry IV., after an arduous siege, the following September. The Hotel de Ville was erected in 1600, the Grand Seminary in 1739, and the town-hall in 1760. In 1773 the cotton manufacture was introduced into this city, which soon became its chief seat. The Musée Napoleon was erected in 1855.

AMIENS (Treaties). — A treaty, sometimes called the Peace of Picquigny, between Louis XI. of France and Edward IV. of England, was concluded here, in four acts, Aug. 29, 1475. Edward IV. agreed to retire with his army, on the payment by Louis XI. of 75,000 crowns. A truce of seven years was agreed to by the two kings. They were to assist each other in case of need. Edward IV. agreed to give his daughter Elizabeth in marriage to Prince Charles, son of Louis XI., who also engaged to pay 50,000 crowns annually during Edward's lifetime. The kings met at the castle of Picquigny, about 12 miles from Amiens. Philip of Commines remarks: "And certainly, as I have said before, the English do not manage their treaties and capitulations with so much cunning and policy as the French do, let people say what they will, but proceed more ingenuously, and with greater straightforwardness in their affairs; yet a man must be cautious, and have a care not to affront them, for it is dangerous meddling with them."—Cardinal Wolsey, on the part of Henry VIII., concluded three treaties with Francis I. at Amiens, Aug. 18, 1527. (*See* ABBEVILLE.)—The preliminaries of the more celebrated treaty of Amiens were signed in London, Oct. 1, 1801; the ratification was brought from Paris to London in 11 days; and the definitive treaty, containing 22 articles, was concluded at Amiens March 25, 1802, a supplementary article being added March 27. It was ratified in the following month, and peace was proclaimed in the cities of London and Westminster April 29. The contracting parties were France, Holland, and Spain, on the one hand, and Great Britain on the other. England gave up to their former owners all the conquests made during the war, except Trinidad, wrested from Spain, and a portion of Ceylon, taken from the Dutch. It was stipulated that within three months after the exchange of the ratifications, the English troops should evacuate Malta, Gozo, and Comino, which were to be restored to the Knights of St. John; and the independence of these islands was guaranteed by France, Great Britain, Austria, Spain, Russia, and Prussia. The French agreed to evacuate Naples, and all the ports and islands which they occupied in the Mediterranean or the Adriatic. Egypt was restored to Turkey, and Pondicherry to France. This treaty terminated a war of 10 years' duration; but peace scarcely lasted 13 months. The interference of Napoleon I. in Holland, Italy, and Switzerland, and his extraordinary annexations, induced the English Government to maintain their garrison at Malta, and the war was renewed May 17, 1803.

AMMERGAU MYSTERY. — The periodical representation of this sacred drama at the little village of Ober Ammergau, in Bavaria, originated in a vow made by the inhabitants in 1633, on their deliverance from a plague, communicated a few years previously by the army of Gustavus Vasa, to celebrate the Passion Tragedy every tenth year. The first representation took place in 1634, and the custom has been observed ever since, the only irregularity being that in 1680 the year was changed to match the decennial periods of each century. Attempts were made to suppress the performances in 1779 and 1810, and they were omitted on the last occasion by the personal permission of King Maximilian Joseph I. The mysteries, which were represented in the churchyard previously to 1830, have since been held in a spacious wooden theatre, without a roof, but capable of accommodating between 4,000 and 5,000 spectators, and with a large stage and abundance of rooms for dressing, &c. The last performances, each lasting from eight in the morning till four in the afternoon, with an hour's interval at midday, took place July 15, Aug. 26, Sep. 9, and Sep. 16, 1860. The circumstances of the Saviour's entry into Jerusalem, the Last Supper, and the Trial, Crucifixion, and Resurrection, were represented in 17 scenes, with great magnificence and an amount of detail that appears profane when described, but which seems to have awakened none but feelings of reverence and awe among the simple people who formed the actors and audience.

AMMONIA.—This volatile alkali is said to have been first manufactured in Egypt, near the temple of Jupiter Ammon, whence its name. The discovery of the existence of muriate of ammonia in sea-water was made in 1822.

AMMONITES.—Descendants of Ammon, the son of Lot (Gen. xix. 38), born about B.C. 1897. They occupied territory at one time in the pos-

session of the Zamzummims, "a people great, and many, and tall as the Anakims." (Deut. ii. 19—21.) Although the Israelites were commanded not to molest them, several wars ensued between the two nations, with varying success. They oppressed the Israelites B.C. 1206 (Hales, B.C. 1263; and Clinton, B.C. 1256); and were defeated by Jephthah with great slaughter (Judges xi. 32, 33), B.C. 1188 (Hales, 1245, and Clinton, 1238); and by Saul (1 Sam. xi.), B.C. 1094 (Hales, B.C. 1110). David subdued them B.C. 1038. Judas Maccabæus fought many battles with them, and they leagued against Judæa B.C. 164. They gradually merged in the tribes of Arabia.

AMNESTY, or public act of pardon or oblivion for political and other offences, was common amongst the Greeks and Romans. Amnesties were granted in England after the Great Rebellion and the Jacobite insurrections: the latest act of Parliament of the kind being 20 Geo. II. c. 52 (1747), entitled "An Act for the king's most gracious general and free pardon." In France frequent revolutions have rendered such acts of grace necessary during the present century. The Queen granted a free pardon May 3, 1856, to several political offenders who were concerned in the Chartist outbreaks and the insurrection in Ireland.

AMORITES.—These descendants of Canaan (Gen. x. 16) became a powerful people, and by this designation all the Canaanite tribes were at one time described. They took part in the struggle narrated in the 14th chapter of Genesis, about B.C. 1912, and were engaged in several contests with the Israelites, who were instructed to utterly destroy their cities (Deut. xx. 16, 17), B.C. 1451.

AMOUR or AMUR.—This river of Chinese Tartary first became known to the Russians in 1639. After a struggle of 50 years, with the view of annexing the territory through which it flows, they concluded a treaty with the Chinese, in 1689, by virtue of which the Russians remained wholly excluded from the river. In 1847 its navigation was again opened to them by treaty; and another, concluded in 1854, has made the Amour a Russian river.

AMOY (China).—Europeans were allowed to trade from 1675 to 1681. The fort of Amoy was destroyed by the British July 3, 1840, and the town itself was taken Aug. 26, 1841. It was one of the five Chinese ports opened to the British by the treaty of Aug. 26, 1842. This town was taken by the Chinese insurgents May 29, 1853, and recaptured by the imperial forces Nov. 11, 1853.

AMPHICTYONIC COUNCIL was one of the earliest institutions in Greece. Grote says: "The belief of Æschines (perhaps also the general belief in his time) was, that it commenced simultaneously with the first foundation of the Delphian temple, an event of which we have no historical knowledge." Twelve tribes sent sacred deputies, called Amphictyons, to this association, which held two meetings every year, one at the Temple of Apollo, at Delphi, in the spring, and the other at the Temple of Ceres, at Thermopylæ, in the autumn. The interference of the Amphictyons led to the first sacred war, B.C. 595—B.C. 586. At the instigation of Philip II. of Macedon, the Phocians were expelled from the Council B.C. 346; but they were re-admitted, for their valour in expelling the Gauls under Brennus, B.C. 279. This Council underwent various changes and vicissitudes, although it survived the independence of the country; and so late as the battle of Actium, B.C. 31, it retained enough of its ancient dignity to induce Augustus to claim a place in it for his new city of Nicopolis. Pausanias states that it existed in the 2nd century of our æra.

AMPHION FRIGATE.—Destroyed in Plymouth Sound by an accidental explosion, Sep. 22, 1796. Capt. Pellew, and 15 others, on shore at the time, were the only persons that escaped out of a crew of 220 men.

AMPHIPOLIS (Greece). — Aristagoras, of Miletus, was defeated by the Edonians, in an attempt to colonize this city of Macedon, B.C. 497. A second effort was made by the Athenians. They sent a body of 10,000 colonists, who were attacked by the Thracians at Drabescus, and put to the sword, B.C. 465. A third attempt, made by Agnon, the son of Nicias, resulted in the expulsion of the Thracians, and the foundation of the Athenian colony of Amphipolis, B.C. 437. The Lacedæmonian general Brasidas seized the city B.C. 424, and repulsed an attempted recapture by the Athenians B.C. 422, when both he and the hostile general Cleon perished in the conflict. Although surrendered to the Athenians by treaty, B.C. 421, the inhabitants refused to acknowledge their former sovereigns, and successfully resisted an expedition sent against them under Timotheus, B.C. 360. Philip II., of Macedon, declared Amphipolis a free city on his accession, B.C. 359, but took it by storm B.C. 358, and added it to his dominions, of which it formed a part till B.C. 168, when its freedom was restored by the Romans.

AMPHITHEATRE.—The Romans delighted in exhibitions of the hunting of wild animals, of combats between gladiators and wild beasts, and other cruel spectacles; and these, which at first took place in the forum and the circus (*q. v.*), were afterwards performed in buildings devoted to such displays, and called Amphitheatres. The first was constructed by C. Scribonius Curio, consul, B.C. 76. The next, and probably the first called an amphitheatre, was constructed by Julius Cæsar, B.C. 46. This was of wood; and a more durable one in stone was erected in the Campus Martius, by Statilius Taurus, during the fourth consulship of Augustus, B.C. 30. It was destroyed by fire in the time of Nero. Several amphitheatres were afterwards built. The most remarkable, known as the Coliseum, of which the ruins exist, was commenced by Vespasian A.D. 70, and completed A.D. 80, by Titus, who opened it with magnificent spectacles. The ruins of several buildings of the kind are still found in Italy and France. (*See* COLISEUM.)

AMPHITRITE.—This ship, having on board 103 female convicts, 12 children, and a crew of 16 men, was wrecked off Boulogne Aug. 31, 1833, when all perished, excepting three of the crew.

AMPUTATION was practised by the sur-

geons of ancient Greece, Rome, and Arabia, and is described in the writings of Celsus, who flourished at the beginning of the Christian æra; and of Archigenes, who practised at Rome in the time of Trajan, A.D. 98 to 117. The methods adopted by these old practitioners continued in use, with little modification, till the revival of learning, in the 15th century, when anatomical science became better understood, and surgical practice was consequently improved. In 1560 Botalli invented a sort of guillotine, by which a diseased member was at once removed from the body; and in 1582 Ambrose Paré advocated the use of the needle and ligature, instead of the cauterizing method of preventing hæmorrhage. The tourniquet, invented by Morell, in 1674, was greatly improved by J. L. Petit, in 1718. The flap operation, by which the recovery of the patient was much accelerated, was invented by Lowdham, of Exeter, in 1679.

AMSTERDAM, or AMSTELDAM (Holland).—This great commercial emporium, on the river Amstel, founded in 1203, remained a small fishing village until the middle of the 13th century, when it was made a town. William III., Count of Holland, took it in 1296; and William IV. gave it municipal institutions in 1340. It was walled in 1482; joined the confederation of the Netherlands Feb. 8, 1578, and received additional privileges from the Prince of Holland in 1581. From that time its prosperity increased rapidly, and it received an additional impulse from the closing of the Scheldt, in 1648. It was captured by the French, Jan. 20, 1795, and remained under their rule until 1813. Its town-hall, erected on piles, commenced in 1648, and completed in 1655, narrowly escaped destruction by fire in 1762 and 1806, and was made a royal palace in 1808. The celebrated Bank of Amsterdam was founded in 1609, and ceased in 1796. The Bank of the Netherlands, on the model of the Bank of England, was established here in 1841.

AMSTERDAM (Treaty), concluded between France, Russia, and Prussia, Aug. 4, 1717. The Czar and the King of Prussia accepted the mediation of France between them and Sweden. Russia abandoned her invasion of Mecklenburg, and France agreed not to renew a treaty of subsidies with Sweden.

AMSTERDAM ISLAND (Indian Ocean), called by the natives *Tonga-tabu*, one of the group known as the Friendly Isles (*q. v.*), was discovered by Tasman, Jan. 19, 1643, and was visited by Capt. Cook in 1773. (*See* TONGA.)

AMULET.—Amulets, of various kinds, were in use among the Jews (Gen. xxxv. 4, and Hosea ii. 13). The Persians and the Egyptians used them; the Greeks and Romans made them of gems of various kinds. Homer mentions them as charms. Pericles, who died B.C. 429, wore an amulet. The Emperor Caracalla, about A.D. 216, prohibited the use of them. Amulets made of the wood of the Cross, or of riband with texts of scripture upon them, as preservatives against diseases and other calamities, were adopted by Christians in the 4th century. The Council of Laodicea, in 366, condemned the practice. Epiphanius, Bishop of Salamis (367), Chrysostom (400), and St. Basil, Patriarch of Constantinople (970), and many others, censured this superstition. The ancient Druids used them, and both necklaces and beads, intended as charms, are frequently found in their barrows.

AMYLENE.—This inflammable, colourless, and exceedingly light liquid, distilled from fusel oil (the oil of potatoes), by M. Balard, of Paris, in 1844, was first employed as an anæsthetic substitute for chloroform, by Dr. Snow, Nov. 10, 1856. M. Duvoy published a full account of this substance April 9, 1857.

ANABAPTISTS.—The term was first applied to the followers of Thomas Münzer and Storck, who began to preach in Saxony in 1521. Owing to their inflammatory harangues, a rebellion broke out in Swabia, Thuringia, Franconia, Saxony, and other parts of Germany, in 1525. These sectaries were routed, May 15, 1525, and their leaders put to death. Their doctrines, however, had not been extirpated, and another rising of the Anabaptists occurred in Westphalia in 1534. John Bockelsohn, a tailor of Leyden, afterwards called John of Leyden, was made king. They captured Münster, which was to be their New Jerusalem, Feb. 27, 1534, and the city was not retaken until June 24, 1535, when John of Leyden and many of his associates were put to death. About this time severe laws were enacted against the Anabaptists by different European governments. Their doctrines found supporters in England. Fourteen were burned in London and in other towns, May 25, 1535, and four Dutch Anabaptists suffered the same punishment in 1538. Three were burned at Southwark, April 29, 1540; and Elizabeth by proclamation ordered them to quit the kingdom within one-and-twenty days, in 1560. Some enthusiasts of this kind attempted to effect a rising in London April 9, 1657. Thomas Venner, an Anabaptist preacher, with about 80 of his followers, appeared in arms in London, Jan. 6, 1661. They fought desperately with the troops, but were at last overcome, and Venner and 16 of his associates perished on the scaffold, Jan. 19 and 21.

ANACHORETS, or ANCHORETS, arose in Egypt and Syria in the 3rd century. Paul the Hermit, who retired into the deserts of Egypt to avoid the Decian persecution, A.D. 250, and St Antony, born 251, are considered the first anchorets. Bingham (Antiq. b. vii. c. ii. s. 2) says, the first sort of monks "were commonly known by the name of Anchorets, from their retiring from society, and living in private cells in the wilderness. Such were Paul and Antony, and Hilarion, the first founders of the monastic life in Egypt and Palestine; from whom other monks took their model." Fosbroke points out the distinction between anchorets and hermits, the former never quitting their cells, whilst the latter roamed at large. The Church assumed jurisdiction over these voluntary exiles from the world in the 7th century, and enacted rules and regulations for their direction. Towards the end of the 9th century, the custom arose of erecting their cells at the porches of churches, and even at the gates of towns. The ceremony of consecration was performed by the bishop.

St. Dunstan's cell at Glastonbury (950) was so small that he could neither stand erect in it nor stretch his limbs to their full length. In 1325 an anchoress resided upon a piece of ground in St. Peter's, Cornhill; and in the "Privy Purse expenses of Elizabeth of York," entries are made of gifts to an anchoress at Gloucester, Nov. 25, 1502, and to another near St. Alban's in March 1503. (*See* ABBEY.)

ANACREONTIC VERSE.—This "gay, luxurious, and festive style" of verse was carried to its highest degree of excellence by Anacreon of Teos, a Greek lyric poet, who died about B.C. 478. Amongst his various imitators and translators, Thomas Moore, called "Anacreon Moore," who published his translation of "Anacreon" in 1800, was the most successful. Religious Anacreontics were written by the monks in the Middle Ages.

ANÆSTHETICS.—Opium and other narcotic drugs, which were employed from a very early period for the purpose of relieving pain, were apparently first used to deaden the sensibilities of patients while undergoing surgical operations during the Roman Empire. Pliny the Elder, A.D. 23 to 79, Dioscorides, who flourished in the 1st or 2nd century, and Apuleius, whose period is uncertain, all mention the use of mandragora for this purpose, and give rules for its proper employment. The Chinese physician, Hod-tho, rendered his patients insensible to the surgeon's knife by means of the Indian hemp plant, about 225, and the Italian practitioner, Theodoric, who wrote during the latter part of the 13th century, describes a compound infusion, by the fumes of which he produced similar results. John Baptista Porta, of Naples, in his book on Natural Magic, published in 1597, described an apparatus for inhaling the fumes of narcotic drugs, but does not mention its application to medical purposes. Nitrous oxide gas, which was successfully used by H. Wells, a dentist, of Hartford, Connecticut, Dec. 11, 1844, was subsequently pronounced too uncertain in its effects to be of practical value; but the discovery and application of the properties of chloroform and other similar substances following soon after, the use of anæsthetic agents rapidly became general in all cases of severe operations. (*See* AMYLENE, CHLOROFORM, and ETHER.)

ANAGRAM.—Camden says, "Good anagrams yield a delightful comfort and pleasant motion in honest minds," and refers their origin to the time of Moses. They were classed by the Hebrews among the cabalistic sciences. The Greeks took the practice, and Lycophron, about B.C. 280, has left some on record. They were very common on the continent in the 16th and 17th centuries; and in the latter Louis XIII. appointed Thomas Billon royal anagrammist, with a salary of 12,000 livres. Calvin, in his "Institutions," published at Strasburg in 1539, styles himself Alcuinus, which, in addition to being the name of an old writer, is the anagram of Calvinus. They prevailed in England at a somewhat later period. In 1613, W. Cheke published a collection of Anagrams and Chronograms.

ANAHUAC.—(*See* MEXICO.)

ANAM, or ANNAM (Asia).—This extensive tract of country, comprising Cochin-China, and Tonquin, Camboja, or Cambodia, and some small islands, is said to have been colonized by the Chinese B.C. 234. The inhabitants appear to have regained their independence, though they continued nominally subject to China, A.D. 263. In 1406 the Chinese once more captured the country, which they retained until 1428. (*See* COCHIN-CHINA, TONQUIN, &c.)

ANAPA (Circassia).—Founded by the Turks in 1784, and captured by the Russians in 1791. It was restored to Turkey, recaptured by Russia in 1807 and 1809, and restored in 1812. The Russians took possession June 23, 1828, but abandoned it to the French and English forces June 5, 1855. It reverted to the Russians on the conclusion of peace in 1856.

ANAQUITO (Battle).—Fought near Quito between Gonzalo Pizarro and the Peruvian Viceroy, Nuñez Vela, Jan. 18, 1546. The Viceroy was slain and his army defeated.

ANASTATIC PRINTING.—This process for producing copies of manuscripts, or printed documents, or engravings, that can with difficulty be detected from the originals, was invented by M. Baldermus at Erfurt. The discovery was communicated to a few persons in London in 1841. It was soon after made public, and Faraday explained the process at the Royal Institution April 25, 1845. It has since transpired that a similar process had been employed in England some time before M. Baldermus's invention was made known. The invention was improved and extended by Strickland and Delamotte in 1848.

ANATHEMA "is a word," says Bingham (Antiq. b. xvi. ch. ii. s. 16), "that occurs frequently in the ancient canons, and the condemnation of all heretics." It is found in 1 Cor. xvi. 22, and in Gal. i. 8; and upon its use in the latter text the authorities of the early Church grounded their justification of its employment in ecclesiastical censures. The Council of Gangra, A.D. 365 or 375, closes every one of its canons thus:—"Let him be anathema, or accursed!" In ecclesiastical language, it is generally understood as the sentence of major excommunication from the Church, pronounced with execration and malediction by a pope, bishop, or council. During the disorders occasioned by the violence of banditti in France in the 9th and 10th centuries, when the ecclesiastical jurisdiction was appealed to in aid of the civil, anathemas were decreed against robbers by councils, in presence of holy relics brought in for the occasion. One of these, issued in 988, affords a very curious specimen of style and diction. (*See* EXCOMMUNICATION.)

ANATOLIA (Asia Minor).—The Lydians dispute with the Phrygians the honour of being the first settlers. It was the seat of empire of the wealthy Crœsus, who was defeated and his capital taken by Cyrus, B.C. 546 (*See* LYDIA); and it remained under the Persian yoke until conquered by Alexander III., the Great, B.C. 333. At his death it was divided into several small states. They gradually fell before the Roman legions, and the whole country was reduced to the form of a Roman province, B.C. 50. Christianity flourished, and several councils were held in different parts. Here were

the seven churches of Asia, to which St. John wrote his Revelation (ch. i. 4 and 11), A.D. 96 or 97. The Persians, under Chosroes II., overran the country in 616, and were defeated by Heraclius in 627. The Turks obtained possession 1074—1084. The Mongols committed great devastations 1242—1272. In 1300 Anatolia was divided amongst the Turkish emirs. Another Mongol invasion spread ruin and destruction in 1402, but the Turks regained possession, and Anatolia has since remained under their sway. The Byzantines applied the term Anatolia to the country to the east of Constantinople, and it received the name of Asia Minor in the 4th century. Anatolia, or Anadol, in a more restricted sense, is now applied to only a portion of Asia Minor.

ANATOMY.—Some authorities pretend that this science was practised at a very early period, and that the Jews and other ancient nations from their sacrifices, and the Egyptians from their process of embalming, obtained a certain amount of knowledge on the subject. A writer in the Encyclopedia Britannica remarks:—"Amidst the general obscurity in which the early history of anatomy is involved, only two leading facts may be admitted with certainty. The first is, that previous to the time of Aristotle there was no accurate knowledge of anatomy; and the second, that all that was known was derived from the dissection of the lower animals only." Aristotle (B.C. 384—322) laid the basis of the science, but it was not until the 3rd century that the human body was dissected at Alexandria by Erasistratus, who obtained the bodies of criminals. Pliny states that the study was encouraged by the Ptolemies. Celsus, at the commencement of the Christian æra, gave some account of the progress of anatomy; and Galen, in the 2nd century, collected all that was known, and made great advances in the science. It flourished in Sicily in the 13th century, when Frederick II. enacted that no person who had not acquired a knowledge of anatomy should be allowed to practise surgery. Pope Boniface VIII. prohibited it in Bologna in 1297. Mundinus, between 1315—18, publicly dissected three human bodies at Bologna, and wrote a work on the subject that became a text-book in the Italian universities. The greatest anatomist of the Middle Ages was Vesalius, who operated extensively on human subjects. He became professor at Pavia in 1540; and published his great work on anatomy, the first containing anatomical plates, at Basel, in 1543. Michael Angelo, Raphael, and Leonardo da Vinci had, previous to that time, been permitted by Julius II. and Leo X. to study the muscles in the human body, for purposes of painting and sculpture. Thomas Vicary, in 1548, was the first Englishman who wrote upon the subject: he has been followed by Harvey, the two Hunters, and a number of eminent men.

ANATOMY LAWS.—By 32 Hen. VIII. c. 43, s. 2 (1540), the barbers and surgeons of London were authorized to take, yearly, the bodies of four malefactors, executed for felony, for purposes of dissection. Several enactments have appeared in the statute-book since that time. Great difficulty having been experienced in obtaining subjects for dissection, and bad practices having arisen, the "Act for Regulating Schools of Anatomy" (2 & 3 Will. IV. c. 75) was passed Aug. 1, 1832. It authorized the granting of licenses to practise anatomy, and gave facilities for procuring the necessary subjects; whilst the 16th section repealed 9 Geo. IV. c. 31, s. 4 (June 27, 1828), by which the body of a person executed for murder was ordered to be dissected.

ANCENIS (Treaty). — Concluded between Louis XI. and the Dukes of Britanny and Normandy. It was ratified by the king and the Duke of Britanny Sep. 18, and by the Duke of Normandy June 21, 1470. Philip of Commines says (book ii. ch. 5):—"The dukes renounced all their alliances, and particularly his (Duke of Burgundy); and that, in satisfaction of all his demands, the Duke of Normandy was to receive a pension of 60,000 livres per annum, for which he was to relinquish the interest which had been lately conferred upon him in Normandy."

ANCHORITES, or ANCHORETS.—(*See* ANACHORETS.)

ANCHORS, which were unknown to the Greeks till after the Trojan war, are stated by Pliny to have been invented by the Etruscans. They were at first made of stone, with only one fluke, the second being added by Anacharsis the Scythian, the contemporary of Solon, B.C. 594. The earliest anchors forged in England are said to have been constructed A.D. 578, from which period little or no change took place in their manufacture until Lieut. Rodger, R.N., patented his improvements in 1828 and 1829. Lenox patented a new anchor in 1832, and Meggitts introduced further improvements in 1836. Porter's swivel anchor, patented in 1838, was tested by government in 1840 with satisfactory results. Trotman's improvements were patented in the early part of 1852; and a trial of anchors that took place (July) established their superiority to those of any other maker. Firmin's improvements were patented in 1854, Scott's in 1855, and Hunter's in 1856. The anchors employed during the launch of the "Great Eastern," in the spring of 1858, were the largest ever forged. By 17 & 18 Vict. c. 104, s. 483 (Aug. 10, 1854), manufacturers are required to stamp their name on each anchor sent out.

ANCIENT LIGHTS.—By 2 & 3 Will. IV. c. 71, s. 3 (Aug. 1, 1832), when the access and use of light to any building have been enjoyed for 20 years without interruption, the right is deemed absolute, unless enjoyed by consent or agreement in writing.

ANCIENTS (Council of).—The National Convention in 1795 divided the legislative power in France between two councils, that of the Ancients and that of the Five Hundred. To the former was entrusted the power of passing or rejecting the laws that originated in the latter branch of the legislature. Their sittings were transferred to St. Cloud Nov. 9, 1799, and a new constitution soon after suppressed the council altogether.

ANCONA (Italy) is said by Strabo to have been founded by a colony of Syracusans in the

time of Dionysius, about B.C. 380. Juvenal calls it a Doric colony. The Romans occupied it B.C. 178, and eventually made it one of their chief naval stations on the Adriatic. Trajan improved the town and constructed the mole A.D. 107; and a triumphal arch in white marble was erected in honour of him A.D. 112. The Lombards occupied it in 592, and the Saracens took it in 839. The town adhered to the Greek emperors, and was besieged by Frederick I. in 1167; and again by the Germans and Venetians in 1174. Innocent III. expelled the Germans in 1198. Pius II. collected an army here for a crusade against the Turks in 1464, but died before he could embark in the expedition. The March of Ancona remained for a long period under the protection of the Popes, though at intervals the connection was severed, until the papal general Gonzaga seized it, and placed it under the absolute dominion of Clement VII., in 1532. Ancona was declared a free port in 1732. The French captured it Feb. 9, 1797; surrendered it Nov. 13, 1799; regained it by the armistice of Treviso, Jan. 16, 1801; and restored it to the Pope in 1802. A French expedition landed at Ancona and took possession of the citadel, Feb. 23, 1832. They held it until Dec. 4, 1838, when, upon the withdrawal of the Austrians from the papal dominions, they retired. The Austrians captured it June 14, 1849; and the Sardinians Sep. 29, 1860, when Gen. Lamoricière, who had reorganized the papal army, was made prisoner. An episcopal see was established at Ancona at an early period.

ANCYRA (Asia Minor).—An important town in Galatia, on the route from Byzantium to Armenia and Syria. It originally belonged to Phrygia. According to Strabo, it became the chief town of the Tectosages, a Gallic tribe, about B.C. 277. It was taken by the Romans B.C. 189; was formally annexed to Rome B.C. 25; and soon after took the name of Sebaste, and was sometimes called Metropolis. A Christian Church was established here in the time of the apostles; and it was made an episcopal see. Councils were held at Ancyra A.D. 314, 358, and 375; Chosroes II. captured the city in 616; the Saracens took it in 1085; and it was carried by assault, by the Crusaders, in 1102. (*See* ANGORA.)

ANDALUCIA (Spain), anciently VANDALUCIA, a large province, that at one time formed part of the Roman colony of Bætica. The Vandals conquered it early in the 5th century, and on their passing over to Africa, A.D. 429, the Visigoths obtained possession. They were expelled, in 711, by the Moors, who, in spite of various reverses, did not finally relax their hold until 1492, when their last possessions in Andalucia reverted to the Spaniards. An independent race of caliphs governed Andalucia from 756 to 1036. Andalucia was divided into two departments, containing eight provinces, by a royal decree, Nov. 30, 1833. Its four ancient provinces were Cadiz, Cordova, Jaen, and Seville.

ANDAMAN ISLANDS (Bay of Bengal) were explored by Peyraud in 1607, and the English attempted to form a settlement on one of the four in 1791. It was removed to Port Cornwallis in 1793, and abandoned, on account of the climate, in 1796. The British expedition against the Burmese touched here in 1824, and another visit was made in 1825, on both of which occasions the inhabitants evinced great hostility.

ANDERNACH (Prussia).—The ancient Antunacum, near which Cæsar constructed a bridge across the Rhine, B.C. 55, for the passage of his army into Germany. Charles the Bald was defeated here Oct. 8, 876, by his nephew, Louis II. of Saxony. It was made an imperial city during the Middle Ages, but was reduced to the rank of a municipal town by the Elector of Cologne in 1496.

ANDES (Italy).—This little village, situated about two miles from Mantua, was the birthplace of the poet Virgil, Oct. 15, B.C. 70.

ANDORRA.—This republic, in the Pyrenees, consists of neutral territory between France and Spain. It was formed by Charlemagne, during his wars against the Moors, and has preserved the same frontiers and mode of government which it then received. By two diplomas, issued under the authority of Charlemagne, in 778 and 801, Andorra was constituted an independent state. The Counts of Foix were nominated protectors; but a dispute having arisen, in 860, on this point, a contest ensued, which lasted until 1278, when a co-protectorate was vested in the Bishops of Urgel and the Counts of Foix. The rights of the latter merged in the house of the Bourbon, and, in consequence, the joint protectorate is now exercised by the Emperor of the French and the Spanish Bishop of Urgel. Andorra is the oldest free republic in existence.

ANDREW, ST.—The Russian order of St. Andrew was founded by Peter the Great in 1698. (For order of St. Andrew, *see* THISTLE.)

ANDREWS, ST. (Scotland).—This town was made a royal burgh by David I., in 1140. Its university was founded in 1411, by Bishop Wardlaw, and confirmed by a papal bull in the following year. It consisted of three colleges, namely, those of St. Salvator, founded in 1458; St. Leonard, in 1512; and New, or St. Mary's College, in 1552. The two former were united in 1747, and the buildings of St. Leonard pulled down. St. Mary's was remodelled in 1579. The cathedral of St. Andrews, founded in 1159, and completed in 1318, was nearly destroyed by a mob, excited by the preaching of John Knox, in June, 1559. St. Andrews, made an episcopal see about 800, an archbishopric in 1477, was suppressed in 1689. The name of the see of Fife was changed to that of St. Andrews Sep. 5, 1844.

ANDROS (Archipelago), one of the Cyclades, colonized by Ionians. Xerxes compelled the Andrians to join his fleet in the invasion of Greece, B.C. 480. The island, which became subject to the Athenians, and afterwards to the Macedonians, was taken by the Romans B.C. 200. It was captured by the Venetians A.D. 1124.

ANDRUSSOW (Treaty).—By this treaty, concluded at the village of Andrussow, on the Gorodnia, Jan. 30, 1667, the Czar Alexis ceded part of Livonia, the Ukraine, and the towns of Polocz, Witepsk, Dunebourg, &c., to John II., King of Poland. Conferences were held between

plenipotentiaries of the same states at Andrussow, in 1684.

ANEMOMETER.—The earliest instrument of this kind was invented by Croune, in 1667. It was improved by Wolfius, in the beginning of the 18th century; and by Dr. Lind, in 1775.

ANEROID.—This form of barometer, invented by Vidi, of Paris, in 1847, was introduced to scientific men in this country by Professor Lloyd, at the meeting of the British Association at Swansea, in 1848. A metallic modification of the aneroid was introduced in 1850.

ANGEL.—This gold coin was introduced from France into England, by Edward IV., in 1465. Stow speaks of angelets at 6*s.* 8*d.*; half-angels at 5*s.*, and at 3*s.* 4*d.* The value of the angel was raised, by proclamation, to 7*s.* 4*d.*, Sep. 6, 1526; to 7*s.* 6*d.*, Nov. 5, 1526; and in 1544 it was raised to 8*s.* Mary fixed it at 10*s.* Charles I. was the last king in whose reign angels were coined.

ANGELIC KNIGHTS OF ST. GEORGE.—This, which is reputed the first order of chivalry, is alleged to have been founded by the Emperor Constantine I. (306—337), who established the grand mastership in the imperial family. On the extinction of the Eastern empire, the knights are said to have removed into Italy, where they enjoyed many apocryphal honours and privileges. Modern historians regard the order as entirely fabulous.

ANGERS (France), the ancient JULIOMAGUS, afterwards called Andegavia, was frequently assailed. Odoacer wrested it from the Romans, A.D. 464; Charles Martel captured it in 724; and the Danes, after having pillaged it several times, fortified it in 860. It was formerly the capital of Anjou. King John burned it in Sep., 1206; and the Vendeans were driven from it in 1793. In 1585 the Huguenots seized the celebrated castle built by St. Louis. It was made the seat of a bishopric in the 4th century, and its university was founded in 1246. Councils were held at Angers in 453, 529, 1055 or 1062, 1157, 1161, 1269, 1279, 1365, 1448, and 1583.

ANGERSTEIN GALLERY.—This collection, which formed the commencement of the National Gallery, consisting of 38 pictures, was purchased by the English Government for £57,000, March 26, 1824.

ANGLES.—Tacitus (A.D. 61—117) speaks of the Angli as a branch of the Suevi. The Britons having sought their aid against the Picts in 443, a force invaded the country, under Hengist and Horsa, in 449, and, after subduing the northern marauders, turned their arms against the Britons, by whom they had been invited. These Angles, said to be a detached part of the Angrivarii, or people of the Angles, are supposed to have come from the district of Angeln, in Schleswig, and to have conferred upon Britain its modern name of Angle-land, or England.

ANGLESEY, or ANGLESEA, anciently MONA.—This island was in early times the chief seat of the Druids in Wales. Suetonius Paulinus, who captured it after a desperate resistance, A.D. 61, cut down the sacred groves, and butchered the priests and their people, though its subjugation was not completed until the year 78. Anglesey was captured by the Normans in 1090. The inhabitants having regained possession, 1094, were again conquered in 1096. Magnus III., King of Norway, assailed it, committing great ravages, in 1098. After several contests, it was subjugated, with the rest of Wales, by Edward I., and it was annexed to England by 12 Edw. I. (March 19, 1284). The Mona and Parys mines were discovered in 1768; the Menai Suspension Bridge, connecting the island with the mainland, was constructed between 1818 and 1825; and the Britannia Tubular Railway Bridge was opened March 6, 1850.

ANGLING. — This art is of very ancient origin, and is even said to have been invented by Seth, about B.C. 3800. It is frequently mentioned in the Old Testament, and allusions to it occur in Job, one of the most ancient books of the Bible. The Greeks and Romans practised it. Izaak Walton's delightful work, entitled "The Compleat Angler; or, the Contemplative Man's Recreation: being a Discourse of Fish and Fishing, not unworthy the perusal of most Anglers," appeared in 1653. There is a text of Scripture (John xxi. 3) on the title-page. It was not, however, the first English book on the subject. This honour belongs to "The Treatyse of Fysshinge with an Angle," by Dame Juliana Barnes, Bernes, or Berners, published by Wynkyn de Worde in 1496.

ANGLO-SAXONS.—A name given to several tribes, most of which were of Scandinavian origin. The Northmen having settled in Germany, from time to time invaded and possessed themselves of portions of Britain. The date of their first invasion is uncertain, some authorities placing it A.D. 368, and others in 449. They established themselves in the southern part of the island, and gradually extended their settlements in other directions.

ANGOLA (Africa).—This territory, on the west coast of Africa, called Donga by the natives, was discovered by Diego Cam, a Portuguese, in 1484. Settlements were soon formed, though it was not until 1578 that Loando, its capital, was commenced. The Dutch captured Loando in 1640, but the Portuguese regained possession in 1648.

ANGORA (Asia Minor).—In a battle fought at this place, the ancient Ancyra (*q. v.*), July 28, 1402, Timour, or Tamerlane, utterly routed the Turks, and took Sultan Bajazet prisoner. The story of Bajazet's confinement in an iron cage is denounced by many writers as a fable. Gibbon, who weighed the evidence of the story carefully, believes it is too well attested to be without foundation. His conclusion is, that Timour intended to lead "his royal captive in triumph to Samarcand. An attempt to facilitate his escape, by digging a mine under the tent, provoked the Mongol emperor to impose a harsher restraint; and in his perpetual marches an iron cage on a waggon might be invented, not as a wanton insult, but as a rigorous precaution." The Turks recovered Angora in 1415, and it has since remained in their possession.

ANGOULÊME (France), the ancient ICULISMA, was the chief town of Angoumois. It was made the seat of a bishopric A.D. 260, conquered by the Visigoths in 451; regained by Clovis I. in 507; taken by the Saracens in 731;

and plundered by the Danes in 856. Afterwards it remained independent under a succession of counts, until annexed to France in 1303. It was made a duchy in 1515, and reunited to France in 1710. Its cathedral, built in 1120, was destroyed by the Huguenots, and rebuilt in 1628. Councils were held here in 1117, 1118, and 1170.

ANGRA (Azores).—This seaport town, the capital of the Island of Terceira, was erected into a bishop's see by Pope Paul III. in 1534, and in 1668 was the prison of Alphonso VI. of Portugal, who had been deposed by his brother, Don Pedro, in the preceding year. In 1766, Angra was made the seat of government for the Azores, and in 1830 it became the residence of the Portuguese regency, until the capture of Lisbon by Don Pedro, in July, 1833.

ANGUILLA.—(*See* SNAKE ISLAND.)

ANHALT.—This house, one of the most ancient in Germany, ranks amongst its members a long succession of princes and dukes, one of the former, Bernhard, having rejected the imperial sceptre offered to him in 1198. The family enjoyed the greatest prosperity in the Middle Ages, when they ruled over a large portion of Northern Germany. In 1252 Anhalt was divided into three parts; again reunited in 1570; and once more divided amongst the four sons of Ernest Joachim I., in 1586,—Dessau, Bernburg, Cöthen, or Köthen, and Zerbst. The latter branch died out in 1793, and their possessions were divided amongst the other three. The Cöthen line became extinct in 1847, and that duchy, according to the family compact of June 22, 1665, is now ruled by the Duke of Anhalt-Dessau. The Princes of Anhalt took the title of dukes in the Confederation of the Rhine in 1806. Many of them greatly distinguished themselves by their defence of the Protestant cause.

ANHOLT (Baltic Sea).—This small Danish island, in the Cattegat, was taken by the British May 18, 1809. The Danes were defeated in an attempt to recapture it March 27, 1811.

ANILINE.—From this substance, originally obtained from indigo by Unverdorben in 1826, W. H. Perkin extracted a beautiful dye, for which he obtained a patent in 1856, and which was largely adopted in 1859 to produce the mauve tints then fashionable. Its nature has been carefully investigated by Dr. Hofmann, who in January, 1863, obtained from the refuse left by the distillations of aniline two new substances called by him paraniline, and xenylamine.

ANIMAL MAGNETISM, artificial somnambulism, and kindred sciences, are supposed to have been practised from time immemorial in India and China, and to have been known to the ancient Assyrians and Egyptians, whose sculptures bear frequent representations of figures apparently engaged in mesmeric manipulation. Robert Fludd, surnamed the "Searcher," taught the magnetism of the human body in his "Philosophia Moysaica," published in 1638, and Kircher, in 1641, wrote of animal, vegetable, and mineral magnetism. (*See* ELECTRO-PHYSIOLOGY and MESMERISM.)

ANIMALS.—(*See* CRUELTY TO ANIMALS.)

ANJAR (Hindostan).—This fortified town, not far from Cutch, was captured by the English in 1815. The town and district, ceded to England in 1816, were restored to the native government in 1822. It suffered from an earthquake in 1819.

ANJOU.—This part of France, afterwards included in Aquitaine (*q. v.*), was occupied by the Andegavi. Charles II. (the Bald), about 870, is said to have bestowed it upon one of his followers, from whom the first line of the counts of Anjou was descended. In 1127 Geoffrey, afterwards Geoffrey V., son of Fulke, Count of Anjou, married Maud or Matilda, widow of the Emperor Henry V., and daughter as well as heiress of Henry I. of England. Their son, Henry II., the first of the Plantagenets, succeeded to the English throne in 1154, and in 1156 he deprived his brother, Geoffrey VI., of Anjou. It was soon after annexed to England, and the first line of its counts ceased. Philip II. (Augustus) obtained possession of Anjou in 1204, and his successor, Louis VIII., bestowed it upon his fourth son, Charles, who founded the second line. By his marriage with the daughter of Berenger, the last Count of Provence, that important fief was annexed to Anjou. Charles mounted the throne of Sicily in 1266, and Queen Joanna I. was dethroned in 1382. (*See* NAPLES.) The possession of Anjou became a frequent cause of strife between France and England; and Edward III., who had conquered it, by the 9th article of the treaty of Bretigny (May 8th, 1360), relinquished his claim. In that year the French king, John II., raised it into a duchy, and bestowed it upon his second son Louis, who became the founder of the third line, and the first duke. This prince and his successors made several unsuccessful efforts to obtain the crown of Naples. His grandson Regnier, called the "good king René," gave his daughter Margaret in marriage to Henry VI. of England, April 22, 1445; and in 1448 he received Anjou, which had been seized by the English. René was dispossessed by Louis XI. in 1474, and Anjou was united to France. The title has been revived since that time, and the duchy, for a short interval, passed under the sway of its own dukes. Francis, Duke of Alençon, afterwards Duke of Anjou, entered into a convention with the people of the Netherlands, Aug. 20, 1578, by which he was to aid them against the Spaniards, the States conferring upon him the title of "Defender of the Liberty of the Netherlands against the Spaniards and their adherents." He visited England in 1581, and made proposals to Queen Elizabeth. His suit, in spite of an interchange of rings between the lovers, was rejected. He returned to the Netherlands early in 1582, and was formally installed sovereign of the States Feb. 17, in the same year. He was expelled in 1583, and died in 1584, being the last Duke of Anjou that played a prominent part in history.

ANJOU (Battle), fought at Baugé, or Beaugé, near Anjou, between the French and the English, on Easter eve, Saturday, March 22, 1421. The former were victorious, and the Duke of Clarence was slain. It is sometimes called the battle of Baugé.

ANN, or ANNAT.—The Scotch Parliament, in 1672, passed an act granting to the family or next of kin of a clergyman deceased the payment of the stipend (called Ann, or Annat) for the next six months after his death.

ANNAMABOE (Africa).—The inhabitants of this town, on the Gold Coast, having assisted the Fantees against the Ashantees, were attacked by the latter in 1808, and about 10,000, or nearly two-thirds of their entire number, put to the sword.

ANNAN (Scotland).—Edward Baliol was surprised at night, when encamped at this place, by the Earl of Moray, Dec. 25, 1332. The attack was so sudden that little resistance was made, and his brother Henry and others having been slain, Baliol fled, and escaped with difficulty to England. Annan was created a royal burgh in 1538.

ANNAPOLIS (N. America), formerly the capital of Acadia, or Nova Scotia, is the oldest European settlement in North America, and was founded by the French in 1604, under the name of Port Royal. It was seized by the English in 1710, and upon the cession of Acadia to Great Britain, in 1713, the name was changed to Annapolis in honour of Queen Anne, the reigning sovereign. In 1750 the seat of government was transferred to Halifax, which had been founded the year before, and it has since declined in importance.—The chief town of Maryland, originally termed Severn, received its present name from the Princess, afterwards Queen Anne, in 1694, when it became a port town. It was made the capital of the state in 1699, but in size and importance is much inferior to Baltimore (*q. v.*). St. John's College was founded in 1784 by the Roman Catholics. The United States naval academy was established in 1845.

ANNATES, or FIRST-FRUITS, were the first year's whole profits, first of a bishopric, and afterwards of any benefice, claimed by the Pope. The tax was introduced in the see of Norwich by Pandulph, the Pope's legate, in the reigns of King John and Hen. III. Clement V. and John XXII. endeavoured to make these payments universal in their application, at the commencement of the 14th century. The claims met with much resistance; and in 1404 an act (6 Hen. IV. c. 1) was passed for their regulation. The Council of Basel, June 9, 1435, condemned these payments, which were suspended by 23 Hen. VIII. c. 20 (1532). By 25 Hen. VIII. c. 20 (1534), it was forbidden to pay them to Rome; and by 26 Hen. VIII. c. 3 (1534), they were granted to the king. They were restored to the Church by 2 & 3 Phil. & Mary, c. 4 (1555), and again vested in the Crown by 1 Eliz. c. 4 (1559). By letters patent, Nov. 3, 1703, Queen Anne restored first-fruits and tenths to the Church. "An Act for the Consolidation of the Offices of First-Fruits, Tenths, and Queen Anne's Bounty" (1 Vict. c. 20) was passed April 11, 1838. (*See* QUEEN ANNE'S BOUNTY.)

ANNE, Queen of England, the second daughter of James II. by his first wife, Anne Hyde, daughter of Lord Clarendon, was born at Twickenham, Feb. 6, 1665. She was married to Prince George of Denmark July 28, 1683, and ascended the English throne March 8, 1702. Her husband, Prince George, died Oct. 28, 1708, and Anne herself Aug. 1, 1714. They had four daughters and one son, who died in infancy, and another son, William, born July 24, 1689, and created Duke of Gloucester by William III. He died July 30, 1700; and on his death a new settlement of the crown was made.

ANNEAU (Battle).—Henry of Navarre's German allies were defeated here by the Duke of Guise, Nov. 24, 1587.

ANNO DOMINI, or the year of our Lord, commenced January 1, in the middle of the fourth year of the 194th Olympiad, the 753rd from the building of Rome, and in the 4714th of the Julian period. Dionysius, surnamed "Exiguus," also known as "Denys le Petit," a monk of Scythia and a Roman abbot, first used it, about 527. It was introduced into Italy in the 6th century; into France in the 7th, though it was not generally established there until the 8th century; into Spain in the 11th, and it was uniformly used there in the 14th; into Portugal in 1415, and into the Eastern empire and Greece in the 15th century. The first recorded instance of its employment in England is in the year 680, and it was generally adopted in the 8th century. The Council of Chelsea, July 27, 816, decreed that all bishops should date their acts from the year of the incarnation of the Saviour. The actual date of the birth of Christ is Friday, April 5, B.C. 4, or the fourth year of the 193rd Olympiad, the 4709th of the Julian period, or the 749th from the building of Rome.

ANNOBON (Gulf of Guinea), an island discovered by the Portuguese in 1471, and ceded to Spain by a treaty concluded March 24, 1778. It is sometimes called Annabona.

ANNUAL REGISTER.—The first volume of this work, for the year 1758, appeared in June, 1759. It was projected by Robert Dodsley and Edmund Burke, and the latter was for many years editor and principal contributor. Several works of the kind have appeared for a short time. Boyer's "Political State of Europe" was published monthly from 1711 to 1740; the "Historical Register" from 1714 to 1738; the "New Annual Register" from 1780 to 1825; and the "Edinburgh Annual Register" from 1808 to 1827. The "Annuaire Historique" appeared in Paris from 1818 to 1849. An American "Annual Register" is published at New York.

ANNUALS.—These elegant, and at one time fashionable, collections of short poems or tales, published every year, were introduced by Mr. R. Ackerman, whose "Forget Me Not" for 1823 appeared in Nov., 1822. This was succeeded, in 1825, by the "Literary Souvenir," edited by Alaric A. Watts. The "Keepsake," established in 1827, appeared for the last time in 1856, and was the last of the annuals.

ANNUITIES.—John de Witt published a treatise on "Life Annuities," in Dutch, in 1671, and Dr. Halley contributed an essay on the same subject to the "Philosophical Transactions" for 1693. In 1724 M. de Moivre published his tract, "Annuities on Lives;" and in 1742 Mr. Simpson gave to the world his "Doctrine of Annuities and Reversions," containing

valuable directions for the construction of accurate tables for determining the probable duration of human life. In 1779 Mr. Morgan and M. de Saint-Cyran added materially to the right understanding of the subject, and in 1808 the Government began to grant life annuities. Annuities were regulated by 53 Geo. III., c. 141 (July 14, 1813), the provisions of which act were superseded by 17 & 18 Vict. c. 90 (Aug. 10. 1854).

ANNUNCIADA, known originally as the "Order of the Necklace or Collar," was instituted in 1355, by Amadeus VI., Duke of Savoy. It was intended to commemorate the exploits of his valiant predecessor, Amadeus V., who had distinguished himself by his victory over the Turks at the siege of Rhodes, in 1310. It received its statutes in 1409, and was renewed under the name of the Holy Annunciation in 1518. Victor Amadeus, in 1720, raised it to the first order of the kingdom of Sardinia, the king being grand master.

ANNUNCIADA.—A society founded at Rome by Cardinal Jurrecremata in 1460, to endow poor brides, annually bestows, March 25, gifts on more than 400 recipients. (*See* HOLY SPIRIT and TEN VIRTUES OF OUR LADY.)

ANNUNCIATION.—This festival, in commemoration of the tidings brought by the Angel Gabriel to the Virgin Mary (Luke i., 26—37), is of very ancient date. Basil of Seleucia, who died A.D. 445, and Proclus, Patriarch of Constantinople, who died in 447, left discourses on the festival. It is celebrated March 25, which day, before the alteration of the calendar in 1752, was the commencement of the Legal year in England.

ANOINTING.—This ceremony was employed at the coronation of kings and the institution of bishops and other dignitaries, in very early times. Moses anointed Aaron and his sons (Lev. viii.), B.C. 1496; Samuel anointed Saul (1 Sam. x. 1), B.C. 1095; and David (1 Sam. xvi. 1—13), B.C. 1063. Anointing was also practised amongst our early kings. Leo IV. anointed Alfred in 871; and this, Rapin says, was probably the first time the ceremony of crowning and anointing was used by an English king. The custom was kept up, and Richard III. and his queen Anne were anointed at their coronation, July 6, 1483. Taylor (Glory of Regality, p. 347) states that one of the principal changes which our ceremonial has undergone is the omission of the practice of anointing with chrism, after the unction of the consecrated oil. Till the time of Elizabeth, or perhaps of James I., it was usual for the king to be anointed on the palms of his hands, on his breast between his shoulders, on his elbows, and on his head, with the holy oil, *in formâ crucis*, and afterwards with the chrism, in the same form, upon his forehead. Anointing, in early theological writings, has reference to baptism and confirmation. It was practised in exorcism and baptism by the Gnostics in the 2nd and 3rd centuries, in the Alexandrian Church. The Marcosians, a branch of the Gnostics and the Ophites, anointed their dead. The anointing in Extreme Unction, practised by the Church of Rome, is a late invention.

ANOMŒANS.—Pure Arians, followers of Aetius of Antioch, who denied the likeness of the Word to the Father, as well as his consubstantiality. Their opinions were adopted by the Council of Sirmich in 358, and rejected by that of Ancyra in the same year. They were also condemned by the Semi-Arians at the Council of Seleucia, Sep. 27, 359. (*See* AETIANS and ARIANS.)

ANONYMOUS LETTERS.—By 9 Geo. I., c. 22 (1722), called the Black Act (*q. v.*), the sending a letter without a name, or with a fictitious name, demanding "money, venison, or other valuable thing," was made felony, the delinquent to suffer death without benefit of clergy. Later enactments refer to threatening letters without being anonymous.

ANSAIREEH, ANSAREYS, ANSARIANS, or ANSAYRII, a Syrian sect, founded by Nusair, about A.D. 891, at the village of Nazaria, and extended by Il Khaseebee, who taught about 900 to 920. In 1020 they formed a distinct sect, and in 1099 their existence was noticed by the crusaders. The Assassins (*q. v.*) seized several of their strongholds in 1107, and exercised tyranny over them until 1280, when both were subjected by the Mameluke sultan of Egypt. In 1317 the Ansairech having rebelled and seized the town of Djebileh, 20,000 men of the tribe were massacred by the Emir Il Umara, the residue being spared only because they were employed by the Mussulmans in tilling the land. At present the sect numbers about 60,000 souls, possessing a religion compounded of Christianity, Mohammedanism, and Paganism, and at constant variance with the surrounding Moslem population.

ANTALCIDAS (Treaty), named after Antalcidas, the Spartan, by whom it was negotiated, was forced upon the states of Greece by Artaxerxes, King of Persia, B.C. 387. The terms were, that the Greek cities in Asia, and the islands of Clazomenæ and Cyprus, should be subject to Artaxerxes, and that all the other Greek cities should be left independent, except Lemnos, Imbros, and Scyros, which were to remain subject to Athens.

ANTARCTIC REGIONS.—The adventurous Capt. Cook, in 1773, endeavoured to complete the circle round the South Pole, in a high latitude, but his progress was arrested by the ice. He was the pioneer of modern discovery in these regions. On the evening of Dec. 6, Capt. Cook and his comrades calculated that they were at the antipodes of London, being the first Europeans who had gone so far. They reached the highest southern latitude that had then been attained by any discoverer, Jan. 30, 1744. It was not until Feb. 20, 1822, that Capt. Weddel penetrated farther. Capt. Biscoe discovered land in this direction Feb. 27, 1831; and went on shore on Graham's Land, Feb. 21, 1832. Balleny and Freeman discovered the Balleny Isles, Feb. 9, 1839; D'Urville, Adelie Land, in 1840; and Sir James Ross, in 1841, discovered a continent which he named Victoria Land.

ANTEDILUVIANS.—The antediluvian period consisted of 1656 years, according to the general chronology, and of 2256 years according to Hales. All that is known respecting this period of the world's history is contained

in portions of Gen. iv., v., and vi. Many authorities contend that the antediluvians were highly civilized, and it is evident that they built cities (Gen. iv. 17), were acquainted with music (Gen. iv. 21), and some useful arts (Gen. iv. 22). (*See* LONGEVITY.)

ANTHEMS, known in the ancient Church as *antiphonæ*, or pieces of music sung alternately by different members of the choir, are stated to have been introduced at Antioch by St. Ignatius about 101. St. Ambrose adopted them in the services of the Latin Church about 374, and Gregory the Great, who was Pope from 590 to 604, composed a collection containing one antiphona for each day in the year. Anthems were introduced into the worship of the English Reformed Church during the reign of Elizabeth, several being contained in John Day's "Certaine notes set forth in foure and three parts, to be song at the morning, communion, and evening praier, very necessarie for the Church of Christe to be frequented and used," published in 1560. T. Tallis and R. Farrant, who both died in 1585, W. Bird in 1623, and O. Gibbons in 1625, are among the earliest and most successful of English anthem composers.

ANTHROPOGLOSSUS.—(*See* AUTOMATON.)

ANTHROPOLOGICAL SOCIETY was founded in London by Dr. J. Hunt in 1863.

ANTHROPOMORPHITES.—This sect of heretics, who taught that the Deity existed in a human shape, was founded about 338 by Audæus, a Syrian. In 399 their views were adopted by Theophilus, Bishop of Alexandria. He persecuted the monks of his diocese who refused to concur in his opinions, and banished Chrysostom for befriending them, in 403. Ratherius, Bishop of Verona, carried on a controversy with the Anthropomorphites of Vicenza in 939. (*See* AUDIANS.)

ANTIBES or ANTIPOLIS (France).—This ancient seaport of Gallia Narbonensis, seated on the Var, was founded by the Greeks of Massalia about B.C. 340, and subsequently became the chief town of the Deciates. It was the seat of a bishopric founded in the 6th century, and transferred in 1252 to Grasse. The Saracens destroyed it in the 9th century, and it was fortified in the 16th. The Imperialists besieged Antibes Nov. 20, and the English fleet attacked it Nov. 26, 1746, but it was not taken.

ANTI-BURGHERS.—(*See* BURGHERS.)

ANTICHRIST.—This expression, used by the Apostles and St. John (1 John ii. 18, and Rev. xvii. 8) to signify the great enemy of mankind, was applied by the early Christians to the Emperor Nero during his first persecution, A.D. 64, and by Irenæus, Bishop of Lyons, to the whole Roman empire in 177. Mohammed was regarded as antichrist by the Eastern Church during the 7th century. The Pope and Roman Catholic Church frequently received the same title from the early Reformers, and were formally denounced as antichrist by the national synod held by the French Protestants at Gap in 1603. Some commentators applied the prophecies relative to antichrist to Napoleon I., whose name they deciphered anagrammatically from Apollyon.

ANTI-CORN-LAW LEAGUE was formed at Manchester, at a public dinner, Sep. 18, 1838. Deputies assembled in London Feb. 8, 1842, and from that time its operations were carried on with activity until Sir Robert Peel passed a bill for the repeal of the corn laws (June 26, 1846). The League was dissolved July 2, 1846.

ANTIETAM (Battle).—(*See* SHARPSBURG.)

ANTIGUA (West Indies), the largest of the Leeward Islands, was discovered by Columbus in 1493. It was, with other islands, granted to James, Earl of Carlisle, July 2, 1627, to be colonized under the name of Carlisle Province. The first settlement appears to have been made in 1632. The French invaded the island in 1666, and committed much havoc. An earthquake destroyed a large number of the churches, sugar-mills, and principal buildings on the island, to the value of £100,000, Feb. 8, 1843; and great destruction of property was caused by hurricanes Aug. 12 and 13, 1835, and in 1848. It was made the seat of a colonial bishopric in 1842; and a cathedral was erected at its chief town, St. John's, in 1847. Some riots occurred at this town among the blacks in March, 1858, but they were speedily suppressed.

ANTILLES, or CARIBBEE ISLANDS.—The term Antilles is erroneously applied to all the West India Islands, which some authorities divide into the Greater and Lesser Antilles. The Bahamas are not included in this arrangement. The French gave the name to the Caribbee (*q. v.*) or Windward Islands.

ANTIMONY.—This term was formerly applied to an ore in which antimony was combined with sulphur. Tersulphuret of antimony is found in great quantities at Sarawak, in Borneo. This preparation was used by the Jewish women for dyeing the eyelashes black. Jezebel used it (2 Kings ix. 30), about B.C. 884. The Greek and the Turkish ladies employ it in this manner. Preparations of antimony were only introduced into medical practice in the 15th century. Its virtues in this respect were first discovered by Basil Valentine, a Benedictine monk of Erfurt, in 1490.

ANTINOMIANS.—This is not the designation of a separate sect, but of members of various sects who hold that Christians are free from the restraints both of the ceremonial and the moral law of Moses. They often, however, differed greatly in their views on this question. The theory existed in the time of St. Paul, for he alludes to it in Romans iii., but the name was first applied to the followers of John Agricola, of Eisleben, who had a controversy with Luther between the years 1538 and 1540. These modern Antinomians held, moreover, that the law should be wholly excluded from the Church. The Antinomians became a strong political party in England, equally troublesome to Charles I., the Parliament, and Cromwell. In 1643 the Assembly of Divines condemned several writings which appeared to them Antinomian; and in 1648 the Parliament enacted that any one convicted of maintaining that doctrine should be imprisoned until he found sureties that he would not offend again. Hallam (Hist. of Lit. vol. i. pt. 1, ch. 4) says that Antinomianism prevails in the early writings of Luther.

ANTIOCH (Syria), now ANTAKIEH, was founded by Seleucus Nicator B.C. 300, who named it after his father; and it remained the capital of the dynasty till Syria was conquered by Pompey, and was made a Roman province B.C. 64. Christianity was planted in Antioch by Paul and Barnabas, and here the disciples were first called Christians, A.D. 42 (Acts, xi. 26). This city, long known as "the Queen of the East," was captured by the Persian King Nushirvan, or Chosroes I., in 540; and Chosroes II. wrested it from the empire in 611. Heraclius expelled the Persians, but it fell into the power of the Saracens in 638 (according to Clinton, Tuesday, July 21); and they degraded it to the rank of a provincial town. Nicephorus Phocas recovered it in 966. It was betrayed to the Turks in 1084. The crusaders laid siege to it in 1097, and captured it Thursday, June 3, 1098.* The citadel held out, but the Saracens, who made an effort to regain the prize, were defeated in a great battle under the walls of Antioch, Monday, June 28, 1098; and Antioch became the capital of a Christian principality. Bibars, Sultan of Egypt, captured it, destroyed its churches, and completely ruined it, June 12, 1268. It was annexed to the Ottoman empire in 1516. Ibrahim Pasha seized it Aug. 1, 1832, but it was afterwards restored to the Porte. Antioch has frequently suffered from earthquakes; the most disastrous occurred in 115, 340, 394, 396, 458, 526, and 588. St. Jerome says that St. Peter was its first bishop, and that he was translated thence to Rome. Antioch was a patriarchate, and, according to the Council of Nice, ranked third after Rome and Alexandria. The Council of Constantinople, in 382, gives Constantinople the next place after Rome, and makes Antioch the fourth. This was confirmed by the Council of Chalcedon, in 451. Thirty-one councils were held at Antioch, the first in 252, and the last in 1141. It was called by Strabo Tetrapolis.

ANTIOCH (Æras).—The Cæsarean æra of Antioch was instituted at that city in consequence of Cæsar's victory at Pharsalia, Aug. 9, B.C. 48. The Syrians computed it from Oct. 1, B.C. 48; and the Greeks from Sep. B.C. 49. By the mundane æra of Antioch, the creation of the world was assigned to B.C. 5492, or 10 years later than by the mundane æra of Alexandria. Ten years were, however, subtracted from the latter A.D. 285, and from that time the two æras coincided.

ANTIOCHIAN SECT, or SCHOOL.—The school founded by Antiochus of Ascalon, at Athens, which was the scene of Cicero's studies during six months, B.C. 79, constituted the fifth of the classic academies, and appears to have united some characteristics of the Stoic and Eclectic philosophies. The name is also applied to a Christian school, founded at Antioch by the Presbyter Dorotheus, A.D. 292, and celebrated for its strict adherence to the literal and historical interpretation of the sacred Scriptures.

ANTIPAROS (Archipelago). — This small island, the ancient Olearos, or Oliaros, was originally colonized by the Phœnicians. It is celebrated for its immense grotto, the extent of which is unknown. The date of the discovery of this cave is uncertain, but it was known to the ancients, and bears a Greek inscription upwards of 2,000 years old. It is not known by whom it was re-discovered in modern times, but it first became generally celebrated by the visit paid at Christmas, 1673, by M. de Nointel, French Ambassador at the Porte. The old Greek inscription was deciphered by Col. Leake, in 1806, and proved to be merely a list of visitors.

ANTIPODES.—Plato, B.C. 388, taught that some inhabitants of the earth lived diametrically opposite to each other, to whom he gave the name of "Antipodes." St. Augustine (354 to 430) strongly ridiculed this statement, and, in the 8th century, Boniface, Archbishop of Mentz, declared Bishop Virgilius heretical, solely because he believed in the existence of the antipodes. Capt. Cook reached the antipodes of London Dec. 6, 1773.

ANTIPOLIS.—(*See* ANTIBES.)

ANTI-POPES, or rival popes, were, at different periods in the history of the Church of Rome, elected by contending parties. Even before Rome claimed supremacy over other churches, Novatian appeared as a rival Bishop of Rome to Cornelius, in 251. Authorities differ respecting some of the Anti-popes, which are as follows:—

356. Felix II.	974 and 984. Boniface VII.
367. Ursinus, or Ursicinus.	997. John XVI.
418. Eulalius.	1012. Gregory.
498. Laurentius, or St. Lawrence.	1044. Sylvester III., Gregory VI., and Benedict IX.
530. Dioscorus.	1046. Clement II.
687. Theodorus and Paschal.	1058. Benedict X.
757. Theophilactus.	1061. Honorius II.
767. Constantine.	1080. Clement III.
768. Philip.	1118. Gregory VIII.
824. Zinzinnus.	1121. Celestine II.
855. Anastasius.	1130. Anacletus II.
891. Sergius.	1138 and 1159. Victor IV.
896. Boniface VI.	1164. Paschal III.
903. Leo VIII.	1168. Calixtus III.
964. Benedict V.	1178. Innocent III.

The great schism of the West, when rival popes struggled to attain the supremacy, commenced in 1378, and lasted above half a century. A demand was made for the election of a Roman pontiff, and, although the French interest was in the ascendant in the conclave, Urban VI., an Italian, was elected, April 9, 1378. The French cardinals at Anagni declared the election void, Aug. 9; and Clement VII., who soon after repaired to Avignon, was elected in his place, Sep. 20. Then commenced the schism, and the following were the Anti-popes:—

1378. Clement VII.	1424. Clement VIII.
1394. Benedict XIII.	1439. Felix V.
1409. Gregory XII.	

Clement VIII. abdicated July 26, 1429, which some authorities regard as the end of the schism, though others fix it at the election of Martin V., at the Council of Constance (*q. v.*), Nov. 11, 1417. (*See* PAPAL SCHISM.)

ANTIQUARIES.—A Society of Antiquaries was formed in London in 1572, under the auspices of Archbishop Parker and Sir Robert Cotton, and was dissolved by James I., about

* Ordericus Vitalis mentions Wednesday, and the editor of Bohn's edition (iii. 125) corrects what he terms a mistake, by inserting Tuesday. Both, however, are wrong; for June 3, 1098, fell upon a Thursday.

1604. It was revived in 1707, was reconstituted in 1717, and its minutes date from Jan. 1, 1718. It was incorporated by royal charter, Nov. 2, 1751, and received the name of "Society of Antiquaries of London;" and in 1780 George III. granted to the members the use of apartments in Somerset House, where it continues to hold its meetings.—The Society of Antiquaries of Scotland was instituted at Edinburgh in 1780.

ANTI-SABBATARIAN CONTROVERSY arose in the 16th century. Dr. Bound, a Puritan, explained the peculiar views of his party in a publication entitled, "Treatise of the Sabbath," in 1595. This gave rise to the controversy, which was carried on with considerable animosity between the High Churchmen and the Puritans.

ANTI-SACERDOTALISTS.—A sect which originated in Flanders about 1115, according to Mosheim, and in 1122 according to Milman. Tanchelin, or Tanquelin, a layman of Antwerp, was their founder. Milman says (Lat. Christ. iv. book ix. ch. 8), "He rejected pope, archbishops, bishops, the whole priesthood. His sect was the one true Church. The Sacraments (he denied transubstantiation) depended for their validity on the holiness of him that administered them. He declared war against tithes and the possessions of the Church. He was encircled by a body-guard of 3,000 armed men, he was worshipped by the people as an angel, or something higher; they drank the water in which he had bathed. He is accused of the grossest license." He went from Utrecht to Rome, Bruges, and Antwerp, where he ruled with "the power and state of a king," and was killed by a priest in 1124 or 1125. The schism was extinguished by St. Norbert, who founded the Præmonstratensians (*q. v.*). Other Sacerdotalists appeared in France at a later date.

ANTI-TRIBONIANS.—The name given to the opponents of the celebrated Tribonian, the minister of Justinian, and the chief compiler of the Justinian Code, the Pandects, and Institutes. He flourished from A.D. 527 to 546. Gibbon says, "His genius, like that of Bacon, embraced, as his own, all the business and knowledge of the age." He was regarded as an opponent of Christianity, and to this must his unpopularity be attributed.

ANTI-TRINITARIANS.—Opposition to the doctrines of the Trinity commenced in the Apostolic period, with the rise of the Judaizing Christians (Gal. i.). The Ebionites A.D. 66, the Nazarenes about the same time, Cerinthus and his followers A.D. 96, held peculiar notions respecting the nature of Christ. Sect after sect followed in quick succession, until Arianism arose A.D. 319. The doctrines of Arius spread over Europe and parts of Africa, creating a great war of opinions, which began to decline in the 7th century. By an ordinance passed May 2, 1648, denial of the Trinity was made felony in England. Erasmus was accused of Arianism in 1536. Many of the German neologists of the present day are anti-Trinitarians.

ANTIUM (Italy).—This ancient Latian city was rendered subject to Rome by the treaty with Carthage, B.C. 509. The Volscians afterwards obtained possession, but were expelled, B.C. 468, by the Romans, who planted a colony. It revolted B.C. 459, and remained independent for more than a century. The people of Antium were at war with Rome B.C. 406; and another contest followed, that lasted from B.C. 386 to B.C. 374, when peace was concluded. It joined in the Latin war which commenced B.C. 340, and was compelled to admit a Roman colony B.C. 338. Coriolanus retired to Antium B.C. 488. Its site is now occupied by Porto d'Anzo.

ANTOINE, ST. (Battle).—This struggle, in which Condé, during the war of the Fronde, defeated Turenne, July 2, 1652, took place in the faubourg of St. Antoine at Paris.

ANTONINUS, WALL OF.—(*See* AGRICOLA.)

ANTONY, ST. (Order).—Albert, Duke of Bavaria, instituted this military order in 1382.

ANTOSIANDRIANS.—This sect of Lutherans originated in 1549, in a strenuous contest with Osiander respecting justification, which continued till 1556, when their leader, Funk, was compelled to retract his opinions.

ANTRIM (Battle).—A victory was gained at this town in Ireland by the royal forces over the United Irishmen, June 7, 1798.

ANTWERP (Belgium).—Called by the French Anvers, was in the 11th century a small republic, and became in the 16th the richest commercial city in Europe. The citadel, commenced by the Duke of Alva in 1567, was completed in 1568, and extended in 1701. Antwerp has been frequently besieged. It was pillaged and burned by the Spaniards Nov. 4, 1576. This massacre was called the Spanish Fury. The Duke of Anjou attempted to carry the city by a surprise, Jan. 17 (O.S. 7), 1583. The whole of his force was either killed or taken captive in less than an hour. This affair was called the French Fury. The Duke of Parma besieged it in 1584, and it capitulated after a siege of 14 months, Aug. 17, 1585. Its commerce suffered greatly from the closing of the Scheldt by the treaty of Westphalia in 1648. Marlborough obtained possession of Antwerp June 6, 1706; and Marshal Saxe May 9, 1746. The French republicans captured it Nov. 29, 1792. They retired in 1793, but regained possession July 23, 1794. It was relinquished by the French in 1814, and formed part of the kingdom of the Netherlands until 1830. The King of Holland having refused to give up the citadel, the French began to bombard it Dec. 4, 1832; and it surrendered Dec. 23. Antwerp was made the seat of a bishopric in 1559. The town-hall was rebuilt in 1581; and the exchange, founded in 1531, was destroyed by fire Aug. 2, 1858. Another great fire, which destroyed several lives and an immense amount of property, broke out Dec. 2, 1861. The new fortifications, commenced in 1860, were completed, on a scale of great cost and magnitude, in 1865.

ANTWERP (Truce), for 12 years, was concluded between Spain and the United Provinces, March, 29, 1609.

AOSTA (Italy).—Appius Claudius, on his march into Gaul, B.C. 134, contended with its ancient inhabitants, the Salassi, who were

subdued by Varro, B.C. 25, and Augustus established a Roman colony at this place, then called Augusta Prætoria. Aosta is now the chief town of the province of the same name. The gospel is said to have been preached at Aosta by the disciples of St. Barnabas, and its bishopric was established at an early period.

APAMEA (Syria), was fortified and enlarged by Seleucus Nicator. He named it after his wife Apama, who died B.C. 281. It was a stronghold of the rebel Q. Cæcilius Bassus, who held it for three years until the arrival of Cassius, B.C. 46. The Saracen town of Famieh, which was seized by Tancred during the first crusade, occupied the site of the ancient Apamea, of which all traces are now lost.

APENNINES were crossed by the Gallic hordes B.C. 390, and by Moreau in May, 1799. A decree of Napoleon I., published June 9, 1805, incorporated part of the Ligurian republic with the French empire under the title of the department of the Apennines. This division ceased in 1814. A railway tunnel under these mountains, connecting Tuscany with Bologna, was completed Sep. 8, 1864.

APOCALYPSE.—(*See* REVELATION OF ST. JOHN.)

APOCRYPHA.—The 14 Apocryphal books of the Old Testament, which were mentioned neither by Philo nor Josephus, both of whom flourished in the 1st century, and were rejected by Athanasius, in whose time they were not allowed to be read in all churches, were excluded from the canon of scripture by the Council of Laodicea in 366. The Latin Church accepted them at the Council of Carthage, in 397, and they appear in the Strasburg edition of the Septuagint in 1526, in Luther's German bible in 1534, and in Lord Cromwell's great folio bible in 1539, where they are styled the books of the Hagiographa. The Roman Catholic Church adopted them as authentic at the Council of Trent in 1546, and in 1563 they were admitted into the services of the Church of England by the sixth Article, as books which "the Church doth read for example of life, and instruction of manners; but yet it doth not apply them to establish any doctrine." In 1826 the British and Foreign Bible Society determined not to include them in their bibles, and in 1850 the question of their authenticity was warmly discussed in Germany.

APOLLINARIAN GAMES, in honour of Apollo, were instituted by the Romans four years after their defeat at Cannæ, B.C. 212, to propitiate the god and secure his assistance against the Carthaginians. The period of celebration was at first movable, but it was afterwards fixed July 6.

APOLLINARIANS, or APOLLINARISTS.—The followers of Apollinaris, Bishop of Laodicea, A.D. 366, who denied the perfect humanity of Christ, held other peculiar doctrines, which were condemned by the Council of Rome in 374, and by that of Constantinople in 381, being the second general council.

APOLLO, reputed the son of Zeus and Leto, was from a very remote period the favourite deity of the Greeks, his temple at Delphi having been founded B.C. 1263. (*See* DELPHI.) He was first worshipped in Rome during the plague that occurred B.C. 433, when a temple was raised to propitiate him. (*See* APOLLINARIAN GAMES.)

APOLLO BELVEDERE.—This statue of Apollo, so called from the Belvedere of the Vatican, at Rome, on which it was placed by Pope Julius II. (1503—13), was found in the ruins of the ancient Antium in 1503. The French carried it off in 1797, but it was restored to the Vatican at the peace of 1815.

APOLLONICON.—This immense automatic organ, built by Flight and Robson, was exhibited at their manufactory in St. Martin's Lane, London, in 1817. The instrument, which had been five years in preparation, combined the effects of an entire orchestra, and could either be played by a performer, or by self-acting mechanism; in the latter instance, the selection of tunes being of course limited. After remaining a public exhibition for some time, the elaborate works fell into disorder.

APOLOGIES, or vindications of Christianity from the calumnies of the pagans, who opposed its introduction, were written by several eminent fathers of the Church. Quadratus and Aristides presented two to Hadrian at Athens, A.D. 126, and Justin Martyr, who died in 166, addressed similar works to Antoninus Pius and Marcus Aurelius.

APOSTATES.—Many of the African bishops refused to administer the communion to apostates in the beginning of the 3rd century. The Novatians (*q.v.*) about the same time advocated the most rigorous treatment towards them, and questioned the right of the Church to grant them reconciliation. They were denied the privilege of Roman subjects by the Theodosian code (438). The Council of Arles, in 452, established penance for them. The Nestorians, in the 11th century, passed canons declaring that the guilt of apostates could only be washed out by their blood.

APOSTLES.—The 12 disciples sent forth by our Lord to preach the gospel, A.D. 27, were Simon called Peter, and Andrew his brother; James, the son of Zebedee, and John his brother; Philip and Bartholomew; Thomas, and Matthew the publican; James, the son of Alphæus, and Lebbæus, whose surname was Thaddæus; Simon the Canaanite, and Judas Iscariot (Matt. x. 2—4). After the suicide of the last-mentioned, consequent upon his betrayal of his Lord and Master, A.D. 30, Matthias was elected by lot to supply his place (Acts i. 15—26). Paul, the apostle of the Gentiles, and Barnabas, were selected for the work of the ministry A.D. 44 (Acts xiii. 2). (*See* ACTS OF THE APOSTLES, AND APOSTLES' CREED.)

APOSTLES' CREED.—Bingham (Antiq. b. x. ch. 3, s. 5) says, "Some have thought that the 12 apostles, in a full meeting, composed the Creed in the very same form of words as now it is used in the Church; and others have gone so far as to pretend to tell what article was composed by every particular apostle." This view the learned author shows to be erroneous. Ruffinus first mentioned it A.D. 390, when it was known as the Roman Creed. It may be considered as an exposition of the apostolical faith; and different parts were

probably composed at different times. Irenæus, A.D. 177, made use of a form in some respects similar.

APOSTOLIANS, APOSTOLICI, or APOTACTICI.—They arose in the 3rd century, and called themselves *Apostolici*, says Bingham, "from a vain pretence of being the only men who lead their lives *according to the example of the Apostles:* and *Apotactici*, from a show of *renouncing the world more than other men.*" Another sect arose in the 12th century, and a third, sometimes called the Apostolic Brethren, was founded by Gerhard Segarelli, who was burned alive at Parma in 1300. A crusade was preached against them in 1305. It was continued by Dulcinus, who suffered in 1307. Their followers in France and Germany were not finally extirpated until the time of Boniface IX. (1389—1404). They wandered about in white garments, renounced all kinds of property, and denounced the corruptions of Rome.

APOTHECARY.—The keeper of any warehouse or magazine was formerly termed an apothecary; and during the 13th and 14th centuries a person who, at courts, or in the houses of the nobility, prepared preserves and confectionary, was also known by this name. Apothecaries, as preparers of medicines, were first legally established in Italy, by the well-known medical edict issued for the kingdom of Naples by Frederick II. in the 13th century. Edward III., in 1345, conferred a pension of sixpence a day upon Coursus de Gangeland, an apothecary of London, in recognition of his care in attending upon him during his illness in Scotland; and this is the first notice of an apothecary in our annals. A patent was granted for the establishment of an apothecary's shop in Stuttgard in 1457. Apothecaries are first mentioned in France as receiving their statutes from Charles VIII. in Aug. 1484. It was not until 1511 (3 Hen. VIII. c. 2) that any attempt was made in this country to distinguish between the different branches of the profession of physic, and to define their position by law. By 32 Hen. VIII. c. 40 (1540), four physicians were ordered to be chosen yearly to search and examine all "wares, drugs, and stuffs," sold by the apothecaries, and to destroy any they found corrupted or defective. The apothecaries of London were incorporated by James I., April 9, 1606, being united with the grocers, from whom they were separated by a new charter from James I., Dec. 16, 1617. The character of the society has been considerably changed by many subsequent statutes. Their authority was confined to London and its immediate neighbourhood until, by the third section of 55 Geo. III. c. 194 (July 12, 1815), it was extended to England and Wales.

APPEAL.—(*See* TRIAL BY BATTEL.)

APPEALS.—During the occupation of Great Britain by the Romans, the final appeal was made to the emperor. In Anglo-Saxon times, the county court, and, lastly, the witenagemot, or the king in council, were courts of appeal. After the Norman conquest, in 1066, there were two supreme courts,—the Exchequer Court, a Norman institution, and the supreme court of justice for greater causes. The Court of Exchequer was first constituted a court of appeal by 31 Edw. III. c. 12 (1357). A second Court of Exchequer, in which appeals from the King's Bench were tried, was instituted by 27 Eliz. c. 8 (1585). These are superseded by 1 Will. IV. c. 70 (July 23, 1830). Criminal appeals are ruled by 11 & 12 Vict. c. 78 (Aug. 31, 1848). Appeals from the colonial courts are regulated by the judicial committee of the privy council, constituted by 3 & 4 Will. IV. c. 41 (Aug. 14. 1833); and were reorganized by 14 & 15 Vict. c. 83 (Aug. 7, 1851).

APPEALS TO ROME.—Ecclesiastical matters were at first regulated by the bishop, in his court, from which an appeal was made to the metropolitan, who might refer to the provincial synod. The appeal was then carried to the patriarch, and thence to a general council. There were no appeals to Rome during the first three centuries. The African Church resisted this pretension, and the Council of Milevis, in Mauritania (416), decreed that if any presumed to "appeal beyond seas (meaning Rome), he should be excluded from all communion in the African churches." The earliest case of such an appeal on record is that of Apiarius, a rebellious priest of Sicca, whom Pope Zosimus restored to communion after he had been deposed by an African council. The French synods did not allow any appeals from their decrees to Rome for 800 years. In England the first attempt to introduce the system was made by Wilfrid, about 694; but the claim was zealously resisted. The practice was, however, introduced into this country, together with the civil and canon law, by the papal legate, Henry of Blois, Bishop of Winchester, in 1151. The inconvenience of the practice soon became apparent, and the eighth article of the Constitutions of Clarendon, passed during the reign of Henry II., Jan. 25, 1164, decreed that all appeals in ecclesiastical causes should be from the archdeacon to the diocesan; from the diocesan to the archbishop, and from the archbishop to the king; and that they were to go no further without the king's consent. Appeals to Rome were, however, made, and were finally abolished by 24 Hen. VIII. c. 12 (1533), and 25 Hen. VIII. c. 19 (1534). The penalty incurred for infraction of the law was a præmunire. These acts, repealed by 1 & 2 Phil. & Mary, c. 8 (1554), were revived by 1 Eliz. c. 1 (1559).

APPELLANTS.—(*See* ACCEPTANTS.)

APPENZEL became a Swiss canton in 1513, and was the last of the original confederation consisting of 13. The abbey of St. Gall (*q. v.*) acquired jurisdiction over the adjoining districts in the 8th century, and this was confirmed by the Emperor Adolphus of Nassau in 1292. The people rebelled against their spiritual rulers in 1411, and after a long struggle achieved their independence. It separated into two divisions, the one occupied by Protestants and the other by Roman Catholics, in 1597.

APPIAN WAY.—(*See* ROADS.)

APPLES are mentioned in the Bible, Solomon (B.C. 1015—975) stating (Prov. xxv. 11) that "a word fitly spoken *is like* apples of gold in pictures of silver;" but it is doubtful whether the fruit referred to is that with which we are acquainted. Herodotus and Theophras-

tus speak of the apple-tree, which was much cultivated at Rome, and, according to some authorities, was brought thence into this country. Other writers are of opinion that inferior varieties are indigenous to England, and that the Romans merely introduced an improved method of culture. William of Malmesbury mentions the wild apple-tree as growing in England in 973, and Fuller states that pippins were brought from beyond seas by Leonard Maschal, about 1525. Parkinson enumerated 57 native varieties, in 1629, and the catalogue of fruits published by the Horticultural Society in 1831 mentions 1,400 different sorts. The custard apple was introduced into England in 1736, the Chinese apple in 1780, and the Osage apple in 1818.

APPOMATOX COURT-HOUSE.—The Confederate Gen. Lee surrendered, with his entire army, consisting of about 26,000 men, to Gen. Grant, at this place, in Virginia, April 9, 1865. The terms of surrender required all officers to give their individual parole not to bear arms against the Federal Government till exchanged; all commanders of companies to sign a like parole for the men. Munitions of war, except the officers' side arms, private horses and luggage, were claimed by the Federals, and all officers and men were permitted to return home, and to remain unmolested during their observance of these conditions.

APPRAISERS.—By the Statute of Merchants, or of Acton Burnel (11 Edw. I. s. 13), Oct. 12, 1283, appraisers valuing goods at too high a rate were compelled to take them at their own valuation. The cost of the annual license for appraisers, fixed by 55 Geo. III. c. 184 (July 11, 1815), at 10*s.*, was by 8 and 9 Vict. c. 76, s. 1 (Aug. 4, 1845), raised to £2.

APPRENTICES (Tumults).—(*See* EVIL MAY DAY.)

APPRENTICESHIP.—Adam Smith says that "apprenticeships were altogether unknown to the ancients. The reciprocal duties of master and apprentice make a considerable article in every modern code." The system originated with the guilds and companies of tradesmen formed in the 12th century. In an account given in the "Liber Albus," of the ancient usages, proclaimed throughout London every year, in the reign of Edward I., the following article occurs: "That no apprentices shall be received for a less term than seven years, according to the ancient and established usage." Apprenticeship is first incidentally noticed in our statute-book in 12 Rich. II. c. 5 (1388). It was enacted by 7 Hen. IV. c. 17 (1406), that no person should bind his son or daughter apprentice unless he had either in land or rent 20*s.* per annum. This was repealed by 8 Hen. VI. c. 11 (1426), in which act the custom of putting and taking apprentices is said to have existed in London "time out of mind." By 5 Eliz. c. 4, s. 27 (1563), the parent of an apprentice was required to possess a 40*s.* freehold. Our statute-book contains many laws upon the subject. Apprentices wore blue cloaks in the summer, and blue gowns in the winter, in the time of Mary and Elizabeth; but during the latter reign they indulged in such extravagance of dress that a proclamation was issued May 21, 1582, laying down stringent regulations with respect to their apparel, and prohibiting the use of jewellery and weapons. The term of apprenticeship required by 5 Eliz. c. 4, s. 26 (1563), was seven years at the least, and this clause was repealed by 54 Geo. III. c. 96 (July 18, 1814). For apprentices in the hemp and flax manufactures in Ireland the term required was five years by 8 Anne c. 12 (1709). It was reduced to four by 10 Geo. I. c. 2, ss. 7 and 8 (1723); and for Scotland the ordinary term is three years. A duty was first laid upon the indentures of apprentices by 8 Anne c. 9 (1709), and it was made perpetual by 9 Anne c. 21, s. 7 (1710). An act (14 Vict. c. 11) was passed May 20, 1851, for the better protection of apprentices, &c.

APPROPRIATION CLAUSE.—This clause in the Irish Tithe Bill occasioned several remarkable political contests. The House of Commons having, April 3, 1835, resolved itself into a committee on the Church Establishment of Ireland, Lord John Russell proposed that any surplus revenue, not required for the spiritual care of its members, should be applied to the education of all classes of the people. The resolution was carried April 6, by 262 to 237 votes. On the bringing up of the report, April 7, Lord John Russell moved another resolution affirming the principle. This was also carried, by 285 to 258 votes, and the Peel and Wellington cabinet resigned office April 8. Lord John Russell and his party acceded to power, and, having failed in their efforts to induce Parliament to sanction the principle for which they contended, abandoned it altogether, in the Irish Tithe Composition Act, 1 and 2 Vict. c. 109 (Aug. 15, 1838).

APPROPRIATIONS.—The period of the introduction of this system into the Church cannot be fixed with precision, though it was doubtless about the time of the Norman conquest. The early Norman kings, for the purpose of enriching the monasteries, conferred upon them not only manors, but advowsons, glebes, and titles of parishes; so that in the space of 300 years above a third, and those for the most part the richest of the benefices in England, were appropriated. At the dissolution of the alien priories, in 1414, and of the monasteries and religious houses, in 1536 and 1539, appropriations and revenues were vested in the crown. Many of the former passed by degrees to subjects, who thus became *appropriators*, or, as they were more frequently termed, lay-appropriators. Previous to the reign of Henry VIII. no right or precedent existed for a layman to be an impropriator.

APRICOT.—A Persian or Armenian fruit, introduced into Italy by the Romans. Authorities differ respecting the date of its introduction into England, some attributing it to the time of the Roman occupation; others to 1524; others to 1562; and others to 1578.

APULIA (Italy).—This province of south-eastern Italy appears to have been peopled at a very early period by the Apuli, the Daunians, and the Peucetians. Its inhabitants concluded

an alliance with Rome B.C. 326, but war shortly commenced, which ended in the subjection of the country, B.C. 317. The Apulians assisted the Samnites, B.C. 297, and several of their cities were captured by Pyrrhus, King of Epirus, B.C. 279. Apulia was the scene of most of the contests of the second Punic war. Many of the cities assisted Hannibal, who occupied the province until B.C. 207, when it was abandoned to the Romans, who exacted severe retribution for the favour shown to their adversary. The country was subdued by C. Cosconius, B.C. 89, and never regained an independent place in history. On the dissolution of the Western empire, the Byzantine emperors, the Goths, the Lombards, and the Saracens, waged repeated contests for the possession of Apulia, which was seized by the Normans during the 11th century.

AQUARIANS, Christians in the early Church who used water instead of wine in the Eucharist. They appeared in various places, and under different designations. Bingham speaks of some Aquarians who would not take wine in their morning assemblies, lest the smell should discover them to the heathen. They are first mentioned in the 2nd century. (*See* ENCRATITES.)

AQUATINTA ENGRAVING was invented by a German artist, named Le Prince, born at Metz, in 1723.

AQUA TOFANA.—(*See* WATER TOFANA.)

AQUAVIVARIUM, or AQUARIUM.—The invention of the aquavivarium for collections of plants and animals in water is of recent date. In 1842, Dr. Johnston kept sea-weeds and marine animals alive for some weeks in a glass jar without changing the water; and in 1849, Mr. Ward announced that he had grown sea-weeds in sea-water both natural and artificially made. Mr. R. Warington read a paper before the Chemical Society, in March, 1850, giving an account of the manner in which he had grown plants and kept living animals in jars. Several persons pursued experiments of the kind about the same period. A small collection of zoophytes and annelides, brought to London in the autumn of 1852 by Mr. Gosse, was soon afterwards transferred to one of the tanks in the fish-house at the Zoological Gardens, Regent's Park. It was opened in the spring of 1853, and was the first public aquavivarium in London. It is also called aquarium. Water-aviary, and water-show, have been suggested as names more adapted to the analogy of our language.

AQUEDUCTS.—These structures, for the purpose of conveying water to large cities, were erected at a very early date. Pocock mentions an aqueduct from the pools of Bethlehem to Jerusalem, built by Solomon, about B.C. 1000; and Herodotus speaks of another erected at Samos. The Romans constructed them on an extended scale. The first at Rome is said to have been erected by Appius Claudius, B.C. 312. Others were built by Dentatus, B.C. 273; by the prætor Q. Marcius Rex, B.C. 145; by Agrippa, B.C. 34; by Caligula, and completed by Claudius, A.D. 51; besides several of less note, and many in the provinces. Sixtus V. immortalized his name by the colossal aqueducts which he caused to be erected. Prescott and Humboldt notice the Peruvian aqueducts. The Popes erected aqueducts in the Middle Ages. The Maintenon aqueduct, near Versailles, constructed by Louis XIV. in 1684, is one of the most magnificent in Europe. The aqueducts erected in India by the British; the Croton aqueduct at New York, completed in 1842; and the works at Edinburgh, are the most remarkable works of the kind constructed of late years.

AQUILA.—This town of Italy was founded in 1240, by the Emperor Frederick II., who removed hither the inhabitants of the ancient Sabine city of Amiternum. In 1257, Pope Alexander IV. transferred the see of Forconio to Aquila, which rapidly increased in importance in consequence. The façade of the church of St. Bernardino da Siena, begun in 1525 and completed in 1542, and the citadel, erected in 1534, are among the chief architectural glories of Aquila, and have escaped injury from the terrible earthquakes of 1703 and 1706, which devastated great part of the city. The royal college, established at Sulmona in 1807, was removed hither in 1816. The theatre was erected in 1832.

AQUILA (Battle.)—The united Neapolitan, Milanese, and Papal forces, under the command of Jacopo Caldora, defeated a very much smaller army of Aragonese, under the renowned condottiere Braccio Fortebraccio da Montone, between the city of Aquila, in Naples, and the hill of San Lorenzo, June 2, 1424. Braccio, who failed in securing the victory from the miscomprehension of his signals by his reserve, was only slightly wounded in the fight, but, being resolved not to survive his defeat, he persistently refused food and comfort, and expired June 5.

AQUILEIA (Italy).—This city, called Roma Secunda, also Aglar, the ancient Velia, was founded by the Romans B.C. 181. At a very early period it was made a bishopric; became a metropolitan see in the 4th, and a patriarchate in the 6th century. Maximin besieged Aquileia A.D. 238, during his contest with the senate, and under its walls he was, with his son, assassinated by his own soldiers. The younger Constantine was defeated and slain near this city in 340, and in 452 it was stormed and destroyed by the Huns under Attila. Its ruins could scarcely be discovered; yet it remained the residence of a bishop until the invasion of the Lombards under Alboin (568—570), when the patriarch removed to Grado (*q. v.*), denominated from this circumstance New Aquileia. Richard I. was shipwrecked near Aquileia, in 1192. The authority of the patriarchs lasted until 1758, when the patriarchate was abolished by the Pope, and the diocese divided into two sees,—those of Udine and Gorizia. Councils were held here in 381, 556, 698, 1307, and 1409.

AQUITAINE (France), the ancient Aquitania, one of the four provinces into which Augustus divided Gaul, B.C. 27. It was not completely subjected to the Romans until B.C. 28. The Visigoths, under Wallia, conquered it A.D. 419. It submitted to Clovis I., and was united to his kingdom in 508. It comprised Guienne, Poitou, Gascony, and Anjou.

A.D.
637. Aquitaine is made an hereditary duchy.
718. It is invaded by the Saracens, who subdue a large portion.
732. Charles Martel repels the Saracens.
768. Waifar, Duke of Aquitaine, is defeated and slain by Pepin, who re-unites Aquitaine to France.
781. Louis, son of Charlemagne, is crowned King of Aquitaine, by Pope Adrian I.
817. Louis I. bestows Aquitaine upon his son Pepin.
838. Pepin dies, and the Empress Judith claims Aquitaine for her son Charles.
843. Treaty of Verdun (*q. v.*), by which the rights of Pepin's sons are sacrificed.
846—849. Danish invasions.
867. Aquitaine is reunited to France by Louis II., the Stammerer.
880. Raimulfe II. attempts to re-erect Aquitaine into a kingdom.
955. It is given by Lothaire to Hugh, Count of Paris.
1137. Death of William X., Duke of Aquitaine, when his duchy passes to his daughter Eleanor, afterwards queen of Louis VII. of France.
1151. Henry of Anjou, afterwards Henry II. of England, obtains Aquitaine by his marriage with Eleanor, the divorced wife of Louis VII.
1169. Aquitaine devolves upon Richard, eldest son of Henry II. of England.
1204. Philip II. (Augustus) reunites Aquitaine to France, which causes a long war with England.
1259. Aquitaine is restored to the English under Henry III., since which period it has been called "Guienne." (*See* GUIENNE.)

ARABIA (Asia).—The south-western peninsula of Asia has, both in ancient and modern times, been known under this designation, though the term is sometimes applied to all the countries frequented by the tribes of wandering Arabs. The term Arabia does not, however, appear to have been used by the Hebrews until after the time of Solomon. Ptolemy is said to have been the first to institute the three divisions of Arabia Petræa, Felix, and Deserta, *i.e.*, the Rocky, the Happy or Fruitful, and the Desert or Sandy. The Arabs believed themselves to be descended from Joktan, the son of Eber (Gen. x. 26—30), and from Ishmael, the son of Abraham, by his bondwoman, Hagar, born B.C. 1910 (Gen. xvi. 15, 16); the posterity of the former, by way of distinction, calling themselves pure Arabs. The direct, as well as the indirect, testimony of Scripture proves the Arabs to be descended from Ishmael. In the time of Moses, about B.C. 1530, the Arabians had grown up into "twelve princes according to their nations," and "they dwelt from Havilah unto Shur, that is before Egypt, as thou goest toward Assyria" (Gen. xxv. 16, 18, &c.). Though assailed by the Egyptians, the Assyrians, the Medes and Persians, and other ancient nations, the Arabians were never subdued. Herodotus, the first, after the inspired writers, who notices Arabia, states (iii. 88) that it was never subjected to the Persian empire. Little is known of the general history of Arabia previous to the time of Mohammed, the accounts given by the Arabian writers being altogether unworthy of credit.

B.C.
24. Augustus sends an expedition into Arabia Felix. It is unsuccessful.
A.D.
105. A portion of Arabia is formed into a Roman province.
195. Septimius Severus obtains additional territory in Arabia.
570. Birth of Mohammed. (*See* MOHAMMEDANISM.)
622. The Hegira (*q. v.*).
632. Abu Beker succeeds Mohammed, taking the title of "Caliph."
634. Battles of Aiznadin and Yermuk (*q. v.*).
695. Abdalmelik commences the Arabian coinage.
754. Al Manaur introduces learning into Arabia.
786. Haroun Al Rashid's caliphate commences.
1504. The King of Portugal assumes the title, but does not gain the power, of "Lord of the Navigation, Conquest, and Commerce of Arabia."
1518. Arabia is conquered by the Ottoman, Selim I.
1539. Soliman II. completes the conquest.
1611. An edict is issued which unites all the Arabian tribes under one head, as Getanos or Egipcios (Egyptians), and prohibits the use of their native languages.
1762. Niebuhr travels in Arabia.

ARABIANS, or ARABICI.—This sect arose in Arabia A.D. 207. They held that the soul dies with the body, with which it will rise again at the resurrection. Eusebius states that at a council, called the "Council of Arabia," held in 247 or 248, to discuss the question, Origen argued so eloquently that he induced these heretics to renounce their errors.

ARABIC NUMERALS.—According to some authorities, Gerbert, afterwards Pope Sylvester II., learned the decimal system of notation from the Moors in Spain, and introduced it into France about the end of the 10th century. Another account is, that Leonard Filbonnacci of Pisa introduced it in 1220, in a work entitled "Liber Abbaci," &c.; and some have supposed that the Alphonsine Tables, constructed chiefly by Moors at the court of Alphonso X., must have been the first document in which the system appeared. It is certain that before the 12th century, and most probably as early as the 9th, this system had been in the hands of the Persians and Arabs, who ascribe it to the Hindoos, and call it by a name which signifies "Hindoo science." The Hindoos themselves have long used it, and it is easy to trace the manner in which our numerical symbols have been derived from those of the Sanscrit. The steps by which the new notation made its way through Europe cannot be very clearly defined. Montfaucon found it in an Italian manuscript which was finished in 1317; and it has been traced in many manuscripts of the works of authors a century older; it was, however, usual to substitute the new figures for the old in recopying. The library of Corpus Christi College, Cambridge, possesses a catalogue of eclipses from 1300 to 1348, to which Arabic numerals are subjoined. Inscriptions with graven dates in these numerals have been given by Wallis and others as old as 1330; but, upon examination, reason has been found to suspect that 5 has been mistaken for 3. There does not seem to be evidence of any general use of the Arabic numerals before the invention of printing; and even the works of Caxton do not contain them, except in a woodcut. Merchants continued down to the 16th century to keep their accounts in Roman figures.

ARAGON (Spain) passed in the 6th century B.C. under the rule of the Carthaginians, who rebuilt Gades, now Cadiz, about B.C. 350. The Romans expelled the Carthaginians between the years B.C. 210—200, and in the redistribution of the peninsula into

three provinces, made by Augustus, B.C. 27, Aragon formed part of Tarraconensis. It was overrun by the Visigoths at the commencement of the 5th century. They established their power, and were in turn overwhelmed by the Saracens, who landed in the peninsula A.D. 711, and had subdued the greater portion by 713. Fierce struggles followed between the infidel invaders and the Christian inhabitants. The latter succeeded in maintaining small but independent states, and at the death of Sancho III., the sovereign of Christian Spain, in 1035, his dominions were divided amongst his four sons, and Aragon was formed into a kingdom. Ramiro I., Sancho's youngest son, being its first king.

A.D.
1096. Nov. 18. Battle of Alcoraza (*q. v.*), which destroys the Mohammedan power between the Ebro, the Cinca, and the Pyrenees.
1118. Saragossa is wrested from the Moors by Alphonso I.
1134. Battle of Fraga (*q. v.*).
1137. Ramiro II. abdicates the throne in favour of his daughter Petronilla, and retires to a monastery. Catalonia is united to Aragon by Petronilla's marriage with Don Raymond.
1203. Pedro II. engages that Aragon shall for ever remain a fief of the Holy See.
1213. Accession of James I.
1246. The *Fueros*, or old laws of Aragon, are digested into a code by Vital, Bishop of Huesca, and confirmed by James I.
1283. Pope Martin IV. excommunicates the Aragonese, and endeavours to transfer the kingdom from Pedro III. to Charles of Valois.
1291. Withdrawal of the papal ban, and renunciation by Charles of Valois of all claim to Aragon.
1347. Confederation against Pedro IV. to insure the adoption of the Salic law and confirmation of privileges.
1359. Pope Innocent VI. seeks to restore peace between Castile and Aragon.
1412. June. Ferdinand I. is elected King of Aragon.
1458. Death of Alphonso V., surnamed the Wise.
1463. The Aragonese nobles invite Pedro, Infante of Portugal, to take the throne from John II.
1479. It is united to Castile under Ferdinand and Isabella.
1591. The ancient Aragonese constitution is suppressed.

SOVEREIGNS OF ARAGON.

A.D.		A.D.	
1035.	Ramiro I.	1291.	Jayme II. (James).
1063.	Sancho I.	1327.	Alphonso IV.
1094.	Pedro I. (Peter).	1336.	Pedro IV. (Peter).
1104.	Alphonso I.	1387.	Juan I. (John).
1134.	Ramiro II.	1395.	Martin I.
1137.	Petronilla and Raymond.		Interregnum, 1 year.
1162.	Alphonso II.	1414.	Fernando I. (Ferdinand).
1196.	Pedro II. (Peter).	1416.	Alphonso V.
1213.	Jayme I. (James).	1458.	Juan II. (John).
1276.	Pedro III. (Peter).	1479.	Fernando II.
1285.	Alphonso III.		United to Castile.

ARAGUA (Battle).—During the revolutionary war in South America, a sanguinary battle was fought in the valley of Aragua, June 18, 1814, when the royalists obtained a complete victory, and entered the city of Caracas, July 7. This is erroneously styled the Battle of *Arazua*.

ARANIE, or ARNEE (Battle), between the French and Indians, and the English, led by Clive, was fought Dec. 3, 1751. The latter were victorious.

ARANJUEZ (Spain).—The ancient Ara Jovis is celebrated for its palace, commenced by Philip II. A treaty of alliance was concluded here, May 1, 1745, between Genoa, France, Spain, and Naples, for the prosecution of the war against Sardinia and the Germans. Another treaty, between Maria Theresa and the Kings of Spain and Sardinia, for the maintenance of the peace of Italy, was concluded, June 14, 1752, the preliminaries having been signed at Madrid, April 14. By a treaty signed here, April 12, 1772, France and Spain agreed to unite in opposing the English in America. A convention between Great Britain and Spain was signed at Aranjuez May 25, 1793, by which the former agreed not to make peace with France till the Spaniards had obtained full restitution for all places and territories captured by the French from the commencement of the revolutionary war. An insurrection occurred here March 18, 1808, which led to the abdication of Charles IV. in favour of his son, Ferdinand VII., March 19.

ARAUCANIA (S. America).—This territory, which, though nominally subject to Chili, is virtually an independent state, has waged almost uninterrupted war against the Spaniards since their first appearance in 1537. In 1568 the inhabitants employed cavalry against their invaders, and in 1602 they destroyed the new settlements of Imperial, Villarica, Valdivia, and Angol. Peace was restored in 1641, but war recommenced in 1655. The Jesuits established a mission, which was destroyed during a general revolt of the inhabitants in 1720. War continued till 1773, when Spain acknowledged Araucanian independence, and permitted the establishment of a residency at Santiago. The inhabitants have held much more intercourse with surrounding nations since the declaration of Chilian independence in 1818, and of late years Christianity has made some progress.

ARAZUA.—(*See* ARAGUA.)

ARBALIST.—(*See* CROSS-BOW.)

ARBELA (Battle).—Near this town, now called Arbil, Alexander III. (the Great) gained a decisive victory over Darius, Oct. 1, B.C. 331. The latter was slain, and the Persian empire subverted. The actual contest occurred near the village of Gaugamela, about 30 miles from Arbela, where the pursuit terminated.

ARBITRATION.—Courts of arbitration, or conciliation, established in Denmark in 1795, rapidly increased in numbers, and were soon after introduced into Norway. Napoleon I., in 1806, issued a decree, by which numerous Conseils de Prud'hommes (*q. v.*) were established in the various departments of France, though they were not adopted in Paris until 1844. Arbitration was recognized by the law of England, by 9 & 10 Will. III. c. 15 (1698), which introduced some important regulations on this subject, making corrupt awards null and void. The power of arbitrators was greatly extended by 3 & 4 Will. IV. c. 42, ss. 39, 40, 41 (Aug. 14, 1833), the award being made a rule of court. By the Common Law Procedure Act, 17 and 18 Vict. c. 125, s. 3 (Aug. 12, 1854), the judges of the superior courts have power, in certain cases, to order compulsory arbitration. The House of Commons appointed a select committee (Feb. 19, 1856) to inquire into the expediency of establishing Arbitration Courts on a more extended basis, and a report in favour of the principle was issued.

ARBOGA (Sweden).— Church assemblies were held at this ancient city in 1396, 1412, 1417, 1423, 1474, and diets in 1435, 1440, 1471, 1529, and 1561. The Arboga articles were passed at the last mentioned. Gustavus Adolphus, in 1625, issued an edict here respecting the copper coinage.

ARBUTUS. — This evergreen shrub was known to the Greeks and Romans, by whom its fruit was used as an article of diet. The bearberry, a variety of this plant, which became a fashionable medicinal remedy in 1673 and 1674, has not maintained its repute, and is at present regarded only as an ordinary astringent.

ARCADES were employed by the Roman architects in the construction of triumphal arches, aqueducts, temples, and theatres: they were also frequently used by the Gothic builders of the Middle Ages. The Burlington Arcade (*q. v.*), opened in 1819; the Lowther Arcade, in 1831; and the arcade in New Oxford-street, in 1851, are the principal arcades in London.

ARCADIA (Peloponnesus), designated, from its mountainous character, "the Switzerland of Greece." The Arcadians claimed to be the earliest inhabitants of Greece, calling themselves Proseleni, *i. e.*, "before the moon." Pan was their tutelary deity, and they delighted in music. "They were scarcely," says a writer in the "Encyclopædia Metropolitana," "an Hellenic race; hence we are not surprised that they retained their pastoral habits and rugged manners." Herodotus (viii. 73) admits that they were indigenous, and Pausanias gives a long list of their early kings, descendants of Arcas, from whom, according to some accounts, the country received its name. Clinton says the Arcadians were an aboriginal tribe of the Pelasgic race. The first well-established fact with respect to the Arcadians is that they maintained their independence when the Dorians invaded the Peloponnesus, B.C. 1104. The following is a summary of the events, legendary and authentic, given by historians:—

B.C.
1710. A colony of Arcadians enter Italy (*q. v.*).
1521. Pelasgus is king of Arcadia.
1514. Arcas king, from whom the country takes its name.
1193. Agapenor leads the Arcadians to the Trojan war.
1174. Ephytus is king.
1102. The Arcadian women defeat the Lacedæmonians, who had invaded their country.
848. War with Sparta.
715. Aristocrates I., of Arcadia, is put to death for having offered violence to the priestess of Diana.
681. Aristocrates II. is stoned to death for treason, and Arcadia becomes a republic.
370. Agesilaus invades Arcadia.
367. The Arcadians and their allies are defeated by Sparta.
365. War with Elis (*q. v.*). (*See* OLYMPIA.)
364. Arcadia is invaded by Archidamus. The Arcadians seize the Olympian treasury.

After the death of Alexander III., several of the Arcadian cities joined the Achæan League, and the country ultimately fell under the Roman yoke.

ARCADIOPOLIS (Battle).— The Bulgarians defeated the Emperor Isaac II. near this city in 1194.

ARCH.—Layard discovered at Nimroud a vaulted chamber, a proof that the ancient Assyrians were acquainted with the principle of the arch. Many authorities have asserted, with great confidence, that neither the ancient Assyrians nor the ancient Egyptians employed the arch. Wilkinson shows that the arch in brick and stone was known to the ancient Egyptians, remains of the former, bearing date B.C. 1540, and of the latter B.C. 600, having been discovered at Memphis and Thebes. The Chinese are said to have constructed arches on a very extensive scale, at an early period. The Greeks did not use them. The Cloaca Maxima, the most ancient Roman arch, was built in the reign of Tarquinius Priscus, about B.C. 600. The semicircular arch was one of the characteristics of the architecture of the early Britons. The pointed arch formed part of a mosque at Jerusalem, rebuilt A.D. 780; of the Nilometer at Cairo, erected in 848; and existed in other Saracenic buildings of the 10th century. In Christian edifices it appears in the 12th century.

ARCHÆOLOGICAL INSTITUTE. — The Archæological Institute of Great Britain and Ireland, established in London in Dec., 1843, held its 22nd annual congress at Dorchester, Aug. 1 to 8, 1865. (*See* BRITISH ARCHÆOLOGICAL ASSOCIATION.)

ARCHANGEL (Russia).—Founded in 1584, and named after the convent of St. Michael the Archangel. The passage by sea was discovered by Richard Chancellor, in 1553. An English factory was established here during the reign of Mary (1553—1558). Archangel was for many years the only port in Russia. An extensive fire occurred here Oct. 17, 1762, and another June 26, 1793, which destroyed the cathedral and about 3,000 buildings. Archangel was blockaded by the English fleet in 1854.

ARCHBISHOP.—Burn (Ecclesiastical Law, vol. i. 194) says, the "title of archbishop was one of honour, but brought with it no authority, and was at first very rarely bestowed, and only on the most distinguished bishops." The name is not to be met with during the first three centuries. It occurs for the first time in the 4th century, and St. Athanasius appears to have been among the earliest who were distinguished by this title (326—373). In the 5th century it was conferred on the bishops of Rome, Antioch, Alexandria, Constantinople, Jerusalem, Ephesus, and Thessalonica. It gradually grew more common, and was bestowed upon all metropolitans. The ancient Britons had at least one archiepiscopal see, that of Caerleon, before Augustine arrived. He was made Archbishop of Canterbury (*q. v.*) by Ethelbert, in 598, and he fixed his seat there in 602. Paulinus, appointed by King Edwin in 627, was the first Archbishop of York (*q. v.*). The Archbishop of Canterbury was Primate of Ireland, as well as of England, until 1152, and York had metropolitan jurisdiction over all bishops of Scotland until 1466.

ARCHDEACON. — Towards the end of the 3rd century, one of the deacons, whose duty it was to attend on the bishop in church affairs, was selected from the rest and made an archdeacon. Frankish dioceses are said to have

been divided into archdeaconries in the 8th century. Wulfred is the first English archdeacon whose name is found in any document, and he became Archbishop of Canterbury in 803. In the early times archdeacons had no jurisdiction in this country. It was not until after the Norman conquest that the English dioceses were divided into archdeaconries. From the "Valor Ecclesiasticus" of Henry VIII. it appears the number of English archdeacons amounted to 54, but by 6 & 7 Will. IV. c. 77 (Aug. 13, 1836), and subsequent acts, the number has been increased.

ARCHERY.—Bows and arrows were used by the Israelites (Gen. xxi. 20, 1 Sam. xxxi. 3, and 2 Sam. i. 18), and from the representations of battles on the walls of Medinet-Abou, at Thebes, it is evident that the ancient Egyptians employed these weapons. Procopius states that they were in high repute amongst the ancient Persians; and Homer not only speaks of skilful archers, but describes the attempts made by the suitors of Penelope to bend the bow of the absent Ulysses. Archers composed a portion of the light-armed troops amongst the Greeks and Romans. Pyrrhus employed 2,000 archers at the battle of Pandosia, near Heraclea, B.C. 280. The Romans frequently retained the Cretan bowmen as mercenaries. Bows and arrows were used by the early inhabitants of Britain, and Asser relates that Alfred was preparing such instruments when he offended the cowherd's wife, by allowing her cakes to burn, A.D. 878. The cross-bow is said to have been used by the Normans at the battle of Hastings, was common in the armies of Henry III., and the long-bow was in general use in England in the time of Edward II. The skill of the English archers is a favourite theme with the old chroniclers, and English bows and arrows were in great request. In 1363, Edward III. enjoined the practice of archery on Sundays and festivals, and the same was done by Richard II. In 1405, a statute was passed against persons using bad materials in the manufacture of bows and arrows. At Crecy (1346), the English archers proved more expert than the Genoese crossbow-men. Poitiers (1356) and Agincourt (1415) were won by this weapon. Edward IV., by statutes passed in 1478 and 1483, encouraged archery in Ireland. The archers of the king's guard, raised by Edward III. in 1356, consisted of 120 men selected from the mounted corps of archers. Henry VII., in 1485, instituted the yeomen of the guard (*q. v.*), who were then all archers. James I., in 1610, appointed a commission to stop the enclosure of the ground used for archery practice. Charles II. reviewed the Finsbury archers in 1682; and so late as 1753 targets for archery practice were set up in Finsbury Fields.

ARCHES (Court).—The court of appeal for all the inferior ecclesiastical courts within the province of Canterbury received this name from having been held formerly in the church of St. Mary-le-Bow (Sancta Maria de Arcubus). It was removed thence (1567) to the Common Hall of Doctors' Commons, where it is still held. The appeal from this court to the Court of Delegates, or the king in Chancery, as constituted by 25 Hen. VIII. c. 19 (1534), was transferred by 3 & 4 Will. IV. c. 9 (1832), to the king in council.

ARCHITECTURAL SOCIETIES.—The Architects' Club met in London Oct. 20, 1791, and in 1792 appointed a committee of inquiry into the causes and prevention of the frequent fires that had taken place about that time. The London Architectural Society was established in 1806, and the Architectural Society in 1831. The Institute of British Architects, founded in 1834, was incorporated by Royal Charter Jan. 11, 1837, when the term Royal was prefixed to the title, and it was united in 1842 with the Architectural Society. An Association of Architectural Draughtsmen, founded about 1846, was the origin of the present Architectural Association. The Architectural Publication Society was established in 1848.

ARCHITECTURE.—The earliest monuments of architectural skill are found in the land of Egypt, where the art appears to have originated in the use of caves as dwelling-places, and consequently retained a massive and heavy character. The Egyptians were expert architects B.C. 1740, and used brick vaults and arches as early as B.C. 1540. Next in point of antiquity probably ranks the Cyclopean or Pelasgian architecture of Greece and Italy, which dates from a period long antecedent to the classic history of those countries, and which is still rich in remains, remarkable for the wonderful massiveness and strength of the masonry. The art was also cultivated at a very early period in China and India, where it appears to have remained stationary in style and perfection to the present day; and it attained great and characteristic excellence in the chief kingdoms of Western Asia, as Assyria, Babylon, and Persia. Greek architecture, which, from its neglect of the arch and frequent employment of pillars and horizontal beams, is believed to be founded upon the use of timber dwellings, is thought by some authorities to have been a development of national skill, while others regard it as an importation from Egypt. It is, however, certain that it originated at a period subsequent to the Pelasgian age, and that it was distinguished by the three great orders, the Doric, the Ionic, and the Corinthian, to which were afterwards added the Tuscan and Composite. From Greece the art extended itself to Rome, where it was modified by Pelasgian traditions and Phœnician influences, and became especially characterized by the frequent use of the round arch. Roman architecture reached its culminating point about A.D. 80, when Titus completed the Coliseum (*q. v.*). The rise of Christianity led to further departures from the ancient classic model, and the foundation of Constantinople, and the removal of the seat of government to that city, where the existing heathen temples were altered to meet the requirements of Christian worship, gave rise to the Basilican and Byzantine schools. The destruction of the Western empire and the supremacy of the Teutonic element, introduced still further changes, leading in the 12th century to the rise of Gothic architecture (*q. v.*), and the mediæval cathedrals which are its exemplars. The most eminent architects have been Vitruvius, who flourished B.C. 40,

Michael Angelo Buonarotti (1474—1564), Inigo Jones (1572—July 21, 1652), Sir Christopher Wren (Oct. 20, 1632—Feb. 25, 1723), Sir William Chambers (1726—March 8, 1796), and Sir Charles Barry (1795—May 12, 1860). (*See* ARCH, ARCHITECTURAL SOCIETIES, COLISEUM, CORINTHIAN ORDER, DORIC ORDER, GOTHIC ARCHITECTURE, NEW HOUSES OF PARLIAMENT, PAUL'S (ST.) CATHEDRAL, PYRAMIDS, TUSCAN ORDER, WESTMINSTER ABBEY, &c., &c., &c.).

ARCHONS.—On the abolition of kingly government in Athens, at the death of Codrus, B.C. 1069 or B.C. 1045, the chief authority was vested in officers styled archons, appointed for life. Twelve, called the Medontidæ, of the family of Codrus, succeeded, when (B.C. 752) the tenure of office was limited to 10 years. Seven archons were appointed for this term, and (B.C. 684) the office was made elective and to be held for one year only.

ARCIS-SUR-AUBE (Battle).—Fought near this small town in France, March 21, 1814, between the Allies and the French army commanded by Napoleon I. The latter, after a severe struggle, retreated to Vitry.

ARCOLA (Battle).—At this village, 15 miles from Verona, on the Alpone, an affluent of the Adige, Bonaparte, in his fourth Italian campaign, defeated the Austrians under Alvinzi, in a battle extending over three days, Nov. 14, 16, and 17, 1796.

ARCOT (Hindostan), the capital of the northern district of Arcot, in the presidency of Madras, was founded in 1716. Clive captured it Aug. 31, 1751. He was assailed by a strong native and French force Sep. 23, 1751; from which day till Nov. 14, when the final assault was delivered and repulsed, he defended the place with extraordinary heroism. Having fallen into the hands of the French, Oct. 4, 1758, it was retaken by Coote, Feb. 10, 1760. Hyder Ali stormed it Oct. 31, 1780, but did not hold it long. Arcot came into the possession of the East India Company in 1801.

ARCTIC CIRCLE.—Numerous attempts, with widely different objects, have been made by the mariners of various countries to penetrate the regions of frost and snow around the North Pole. The Scandinavians, in the 9th, 10th, and 11th centuries, and the Venetian, Spanish, and Portuguese navigators, at a later period, prosecuted their researches in this direction. (*See* AMERICA, GREENLAND, and ICELAND.)

A.D.
1496. Sebastian Cabot reaches the Arctic regions.
1517. His second voyage in the same direction.
1527. Robert Thorne, a merchant of Bristol, writes to induce Henry VIII. to sanction a polar expedition; and two ships, the *Sampson* and the *Mary of Guildford*, are sent out.
1553. Sir Hugh Willoughby discovers Nova Zembla (*q. v.*). He returns, and sails to Lapland, where he and his crew perish from hunger, in Jan., 1554.
1576. June 7. Frobisher starts on his first voyage.
1580. Pet and Jackman sail in search of a north-eastern passage, but are compelled by the ice to return.
1585. June 7. John Davis leaves Dartmouth on his first voyage, and after making several discoveries on the N.E. coast of America, returns to England Sep. 30, 1586.
1586. Davis's second voyage.
1587. Davis's third voyage.
1594. The Dutch send an expedition to seek a northern passage, under William Barentsz.
A.D.
1595. Barentsz's second voyage.
1596. Barentsz's third voyage.
1602. George Waymouth sails in a fruitless search of the north-west passage.
1607. May 1. Hudson starts on his first voyage.
1608. Hudson's second voyage.
1609. Hudson's third voyage.
1610. Hudson starts on his fourth voyage, and discovers Hudson's Bay (*q. v.*); his crew mutiny, and leave him to perish of cold and hunger.
1615. Bylot's voyage, in which Baffin acted as mate.
1616. Bylot and Baffin discover Baffin's Bay (*q. v.*).
1631. James's disastrous voyage.
1676. Capt. Wood sails in search of a north-east passage.
1728. Behring leaves Kamtschatka (*q. v.*) on his first voyage, during which he explores Behring's Straits (*q. v.*).
1729. Behring's second voyage.
1741. Behring's third voyage, and death.
1743. The English Government offer a reward of £20,000 to any person discovering a north-west passage by Hudson's Strait.
1773. Phipps and Lutwidge sail. Horatio (afterwards Lord) Nelson accompanies the expedition.
1776. Cook and Clerke's voyage.

The following list of the Arctic expeditions sent out during the present century is extracted from Simmonds's "Arctic Regions:"—

A.D.
1818. John Ross, *Isabella* and *Alexander*.
1818. Buchan and Franklin, *Dorothea* and *Trent*.
1819-21. Franklin, first land expedition.
1819-20. Parry, *Hecla* and *Griper*.
1821-23. Parry, *Fury* and *Hecla*.
1824. Lyon, *Griper*.
1824-25. Parry, *Hecla* and *Fury*.
1825-27. Franklin, second land expedition.
1826-28. Buchan, *Blossom*.
1829-33. John Ross, *Victory*.
1833-35. Back, land expedition.
1836-37. Back, *Terror*.
1836-39. Dean and Simpson, boat expedition.
1846-47. Rae, boat expedition.
1845-46. Franklin, *Erebus* and *Terror*.
1848-49. James Ross, *Enterprise* and *Investigator*.
1848-49. Richardson, boat expedition.
1848-53. Moore, *Plover*.
1849-51. Pullen, boat expedition.
1849-50. Hooper, boat expedition.
1849-50. Saunders, *North Star*.
1850. Forsyth, *Prince Albert*.
1850-55. Collinson, *Enterprise*.
1850-54. M'Clure, *Investigator*.
1850-51. Austin, *Resolute*, *Assistance*, *Intrepid*, and *Pioneer*.
1850-51. John Ross, *Felix*.
1850-51. Penny, *Lady Franklin* and *Sophia*.
1850-51. De Haven and Kane, *Advance* and *Rescue*.
1851-52. Kennedy (Bellot), *Prince Albert*.
1851-54. Rae, land expedition.
1852-54. Maguire, *Plover*.
1852-54. Belcher, *Assistance* and *Pioneer*.
1852-54. Kellett, *Resolute* and *Intrepid*.
1852-54. Pullen, *North Star*.
1853-55. Kane, *Advance*.
1857-59. M'Clintock, *Fox*.

(*See* FRANKLIN'S EXPEDITIONS, and NORTH-WEST PASSAGE.)

ARDAGH (Bishopric).—This see, one of the earliest established in Ireland, is said to have been founded by St. Patrick, who appointed his nephew, St. Mell or Mael, first bishop in 454. St. Mell, described as abbot and bishop, died in 488. Ardagh was united to Kilmore Feb. 24, 1660, but was separated from it for a short time Sep. 8, 1692. In 1742 it was severed from Kilmore and united to Tuam. By the Church Temporalities Act, 3 & 4 Will. IV. c. 37 (Aug. 14, 1833), other arrangements were made, by which the bishopric of Ardagh was, in 1839, separated from Tuam and joined to Kilmore.

In 1841 Kilmore, Elphin, and Ardagh formed one bishopric.

ARDEE (Ireland).—This town was sacked by Edward Bruce in 1315. It surrendered to the rebels during the insurrection of Oct., 1641, when it was delivered up to pillage.

ARDEN.—This forest in Warwickshire, situated between and around the towns of Henley-in-Arden and Hampton-in-Arden, formed, during the Roman period, the country of the Cornavii, and afterwards constituted part of the Saxon kingdom of Mercia. In 1016, in common with the rest of the county, it was ravaged by the Danish army of Canute, and, after the conquest, its inhabitants were much harassed by the oppressive forest laws of their Norman rulers. Some critics believe it to be the scene of Shakespeare's comedy of "As You Like It."

ARDFERT.—This Irish bishopric, called in ancient records the bishopric of Kerry, was founded in the 5th century, Cerpain being mentioned as bishop in 500. Edward Synge, Bishop of Limerick in 1660, held the sees of Ardfert and Aghadoe *in commendam*; and they were both united to Limerick in 1663.

ARDOCH (Battle).—Fought between the Romans, led by Agricola, and the Caledonians under Galgacus, on a moor at the foot of the Grampians, A.D. 84 or 85. The latter were routed with great slaughter. This is called Agricola's Victory, and the battle of the Grampians.

ARDRES (France).—The interview in the "Field of the Cloth of Gold" (*q. v.*), took place near this town, June 7, 1520. The treaty for the meeting had been concluded Oct. 14, 1518. Ardres was captured by the Spaniards in 1596.

ARENENBERG (Switzerland).—This chateau, situated in the canton of Thurgau, was purchased in 1817 by Queen Hortense, mother of the Emperor Louis Napoleon III., who there passed several years of his youth. In 1843 it was sold to a gentleman of Neuchatel, but it was afterwards repurchased by the emperor, who visited the spot in the summer of 1865.

AREOPAGUS (Court).—This institution is attributed to Cecrops, the founder of Athens, B.C. 1556. It is known to have existed before the time of Solon, B.C. 594. He extended its jurisdiction. The guardianship of the laws and the power of enforcing them were entrusted by Solon to this court. Religion and the education of youth were placed under its control. Its constitution was preserved inviolate until Pericles, B.C. 461, caused himself to be elected without having previously received the appointment of archon. St. Paul was brought before this court A.D. 51 (Acts xvii., 19, &c.).

ARGAUM (Battle).—Wellington defeated the Mahratta chiefs at this village, in Hyderabad, Nov. 29, 1803.

ARGENTARIA (Battle).—Argentaria, now Colmar, in Alsace, was the scene of Gratian's signal victory over the Alemanni, in May, A.D. 378. Gibbon says, "It secured the peace of Gaul and asserted the honour of the Roman arms."

ARGENTEUS CODEX.—(*See* SILVER BOOK.)

ARGENTINE CONFEDERATION, or REPUBLIC (S. America).—These provinces threw off the yoke of Spain in 1810, remaining in a very unsettled state until 1816, when a republic was first established. The basis of the Argentine Confederation was, however, laid in 1834, Buenos Ayres and three other states forming a confederacy, which was afterwards joined by other states to the number of 13:—

Buenos Ayres.	Salta.
Catamarca.	San Juan.
Cordova.	San Luis.
Corrientes.	Santa Fé.
Entre Rios.	Santiago.
La Rioja.	Tucuman.
Mendoza.	

Buenos Ayres separated from the confederacy in 1853, and other secessions occurred. War was declared against Buenos Ayres in August, 1861, which lasted till the beginning of the following year, and resulted in the solemn installation of Gen. Mitre and Col. Paz, as president and vice-president of the republic, Oct. 12, 1862. The fleet of Paraguay seized two Argentine war-steamers at Corrientes, and occupied the city, April 13 and 14, 1865, and war was declared against Paraguay (*q. v.*). A treaty of alliance against Paraguay was concluded at Buenos Ayres, with Brazil and Uruguay, May 4. (*See* BUENOS AYRES and PLATA, LA.)

ARGINUSÆ (Sea-fight).—The Athenian fleet defeated the Spartan armament under Callicratidas, among the islands of Arginusæ, near Lesbos, B.C. 406.

ARGONAUTIC EXPEDITION.—This voyage, the first naval expedition on record, was, according to the traditional account, conducted by Jason, son of Æson, King of Thessaly, "to bring back the golden fleece of the ram which had carried away Phryxus and Helle." The celebrated *Argo* was built, which, after various adventures, reached Æa, the capital of Colchis, B.C. 1263, or, according to Newton, B.C. 937. Æetes, King of Colchis, promised Jason the fleece on certain conditions difficult of accomplishment. These, by the magical aid of Medea, were performed, and the enterprise was ultimately achieved. Grote (vol. i., 333) remarks on this fable:—"Not only are we unable to assign the date, or identify the crew, or decipher the log-book of the *Argo*, but we have no means of settling even the preliminary question, whether the voyage be matter of fact badly reported, or legend from the beginning."

ARGONAUTS OF ST. NICHOLAS, a military order of knights established by Charles III. of Naples, in 1382. From their collar of shells, inclosed in a silver crescent, with the motto "Non credo tempori," they were called knights of the shell.

ARGOS (Peloponnesus).—The origin of this, the earliest Grecian state, is involved in obscurity. Various writers represent it as having been founded by Inachus, by his son Phoroneus, and by his grandson Argus. The Achæans, having expelled the original inhabitants, gave place in turn to the Dorians. It was a powerful state, and became the head of a league of Doric cities, until Sparta obtained the ascendancy, B.C. 495. The following are

the chief points, legendary and authentic, in its history :—

B.C.
1856. Argos is founded by Inachus.
1753. Phoroneus founds it, according to other authorities.
1711. Called Argos, after a king of that name, the fourth of the Inachidæ.
1500. Danaus, an Egyptian, enters Argos.
1475. Danaus deposes and succeeds Gelanor, King of Argos.
1457. Perseus of Argos founds Mycenæ (*q. v.*).
1193. Agamemnon King of Argos during the Trojan war.
1104. The Heraclidæ overrun Argos.
783. Pheidon of Argos endeavours to take Corinth.
748. Pheidon establishes the supremacy of Argos, and celebrates the 8th Olympic games.
747. Conflict with Sparta.
669. Battle of Hysiæ (*q. v.*).
547. The Argives endeavour to regain Thyrea from the Spartans, but are defeated.
514. Argos fines Sicyon and Ægina 500 talents each for having furnished Sparta with ships to operate against her territory.
496. War with Sparta, which is victorious the following year.
471. Themistocles, banished from Athens, retires to Argos.
468. The Argives destroy Mycenæ (*q. v.*).
431. Argos forms a league against Sparta.
420. Argos enters into a treaty with Athens.
418. Battle of Mantinea (*q. v.*).
417. Argos concludes peace with Sparta.
395. Argos joins Athens, Corinth, and Thebes against Sparta. (*See* CORINTHIAN WAR.)
228. Argos joins the Achæan League.

ARGOVIA.—(*See* AARGAU.)

ARGUIM (Africa). — This little island is supposed to be identical with the Cerne, discovered by Hanno, the Carthaginian, during his voyage of exploration, which took place between the years B.C. 521 and B.C. 264. In 1444 it was rediscovered by Nunez Tristan, and it became the seat of the first Portuguese settlement in Africa, about the year 1450, and in 1454 was a depôt for the slave trade, to protect which, and the other commercial interests of the colony, a fort was erected in 1461. In 1638 the Portuguese were expelled by the Dutch, from whom it was wrested by the English in 1665. In 1666 it was recaptured, and became the source of frequent disputes with the French, who finally drove out the Dutch in 1725, but, owing to the decline of trade, the settlement was abandoned, and the fortifications were destroyed, soon after 1763. The French frigate *La Méduse* was wrecked off Arguim July 2, 1816.

ARGYLE (Scotland).— This bishopric was founded by Innocent III., who separated it from the see of Dunkeld about the year 1200, when Evaldus became first bishop. Lismore was made the residence of the bishops; hence they were sometimes called bishops of Lismore. Alexander II. made several grants to the new see, the last of them bearing date July 8, 1249. It was suppressed in 1688, but in 1847 it was restored under the title of Argyle and the Isles.

ARIANISM.—The denial of the divinity of Christ, the distinctive feature of Arianism, first appeared in the heresies of the Ebionites, of Artemon, and of Theodotus. Robertson considers that although Alexandria was the birthplace of Arianism, its origin may be traced to the other great Churches of the East. Arius, a presbyter of Alexandria, from whom the heresy is named, appears to have first boldly maintained the opinion about 319. His views were condemned by Alexander, Bishop of Alexandria, and he was, with his followers, excommunicated in 321. Constantine I. took up the matter, and summoned a general council at Nicæa, to settle the controversy. The emperor presided, and the council sat from June 19 to Aug. 25, 325, when Arius was excommunicated and banished into Illyria, and his heresy was condemned. Arius, however, managed to obtain the favour of Constantine I., who gave him a rescript commanding his readmission into the Church. On the eve of the day on which it was to take place, Arius, who was parading the streets with his adherents, was compelled to withdraw for a few moments, and he was afterwards found dead (336). Arianism did not long remain a single sect. There were the Anomœans (*q. v.*) or pure Arians, the Semi-Arians (*q. v.*), and the Acacians (*q. v.*), during the lifetime of Constantine I., and these soon separated into other parties. Theodosius I. issued edicts against the Arians (381—395). When extirpated at Constantinople and the civilized portions of the empire, the heresy spread amongst the Goths and other barbarian nations.

ARIKERA, or ARKARY (Battle). — Lord Cornwallis completely routed Tippoo's army at this place, about nine miles from Seringapatam, May 14, 1791.

ARIMINUM (Italy).—Conquered and made a Roman colony, B.C. 268, it became important as a military post. The Via Flaminia, from this city to Rome, was opened B.C. 221; and the Via Æmilia, to Placentia, B.C. 187. Cæsar took Ariminum B.C. 49. (*See* RIMINI.)

ARITHMETIC.—Computation by means of counters, the earliest form of this science, was practised by the Egyptians. The Chinese made use of the swan-pan, or abacus (*q. v.*), at a very early period. Certain letters of the alphabet, divided and arranged according to a particular method, preceded the use of numerals. (*See* ARABIC NUMERALS.) Decimal notation arose from the facility of counting on the fingers, and was introduced into Europe in the 13th century.

ARIZONA (N. America), the name of which is said to be derived from the Aztec word *Arizuma*, or "silver-bearing," was first explored in 1687, by the Jesuits, who established a mission that increased in the course of a century to 40 towns and villages, but was at length expelled by the Indian population. In 1741 Philip V. of Spain published a decree declaring this district royal property. Mr. Mowry, a Federal officer at Fort Yuma, has carefully explored this territory since 1855, and found it rich in gold, silver, copper, and iron. A plumbago mine was discovered in 1859. Arizona was separated from New Mexico, and organized as a distinct territory of the United States, in March, 1863. (*See* SONORA.)

ARK.—Noah's Ark, built, according to divine instructions, of gopher, or cypress wood, having rooms in it, and "pitched within and without with pitch," was 300 cubits in length, 50 in breadth, and 30 in height, with a door and window, and 3 stories (Gen. vi. 14—16). In the 600th year of Noah's life, the 2nd month, and the 17th day of the month, he and his family entered the ark (Gen. vii. 11—16),

which rested upon the mountains of Ararat in the 7th month, on the 17th day of the month (Gen. viii. 4). In the 601st year of his life, and the 1st day of the month, he removed the covering of the ark (Gen. viii. 13), and in the 2nd month, on the 27th day of the month (Gen. viii. 14—20), the earth was dry, and he and his family quitted the vessel, and performed a sacrifice in gratitude for their deliverance. (For the dates assigned by different chronologists to these events, *see* DELUGE.)—Jochebed preserved her son Moses from the cruel edict of Pharaoh, decreeing the destruction of all Israelitish male children, by concealing him in an ark of bulrushes amidst the flags on the brink of the Nile, B.C. 1571 (Exod. ii. 1—10).—The ark of the covenant constructed by Moses in the wilderness in obedience to the divine command, as a depository for the two tables of the law, B.C. 1491, which was formed of shittim, or acacia wood, and measured two cubits and a half in length, a cubit and a half in breadth, and a cubit and a half in height (Exod. xxv. 10), having accompanied the Israelites in all their wanderings, was placed by David in a tabernacle specially erected for the purpose, at Jerusalem, B.C. 1045 (2 Sam. vi. 1—17), whence it was ultimately removed, B.C. 1004 (1 Kings viii. 1—9), to Solomon's Temple.

ARKANSAS (U. States), colonized by the French in 1685, was ceded to Spain by France by the treaty of Paris, Feb. 10, 1763, and restored to France by Spain in 1800. The United States Government purchased it from France in 1803. It was erected into a separate territory in 1819, having previously formed part of Louisiana, and was admitted into the Union in 1836. It seceded May 6, 1861.

ARKLOW (Battle).—A small body of the royal troops defeated the Irish rebels, 27,000 in number, led by a priest named Michael Murphy, near Arklow Bridge, June 10, 1798.

ARLES, ARELATE, or ARELAS.—This town in France fell under the Roman yoke B.C. 123, and became a Roman colony in the time of Augustus. It was pillaged A.D. 270, and restored and enlarged by Constantine I.; hence it was sometimes called Constantia. His son, afterwards Constantine II., was born here. Constantine I. presided at the celebrated council held at Arles against the Donatists in 314. (*See* ACCUSERS, FALSE.) Three English bishops took part in the proceedings; which fact proves the important position occupied by the English Church in the beginning of the 4th century. In 418 Arles was appointed as the place for the annual meeting of the assembly of the seven provinces of Gaul. It was besieged by the Visigoths in 425, 429, 452, and 457; and captured by Euric in 466. The Saracens defeated Eudes, Duke of Aquitaine, near Arles, in 731; but he joined his forces with those of Charles Martel and expelled the Saracens in 732. Arles was plundered by the Saracens in 850, and was frequently invaded. In addition to the celebrated council in 314, others were held here in 353, 442, 452, 455, 463, 475, 524, 554, 813, 1059, 1205, 1211, 1234, 1260 or 1261, and 1275. The republican form of government was adopted in Arles in 1240. After various changes, it was annexed to France in 1486. Arles was an archiepiscopal see, suppressed by the concordat of 1801, but re-established and united to Aix in 1817. The bridge of boats and much property was destroyed by a sudden rising of the Rhone Oct. 31, 1864.

ARLES, or ARELATE (Kingdom).—Count Boso, expelled from Lombardy, was elected King of Provence, by the Synod of Mantaille, in Oct., 879 A.D. He died about 887; and his son Louis was acknowledged king by the Council of Valence in 890. Louis, who claimed the crown of Italy, was blinded, and died about 928. In 888 Rodolph or Raoul, the Guelph, erected the kingdom of Transjurane Burgundy, consisting of territory that nearly corresponds to Switzerland, with some neighbouring districts. Rodolph I. died in 911, and was succeeded by his son Rodolph II.; who, on the death of Louis, in 928, united Provence to Transjurane Burgundy, making Arles his capital; and, by a treaty with Hugh, King of Italy, he was, in 933, confirmed in the possession. This constituted what is known in history as the kingdom of Arles. Rodolph III., who died in 1032, bequeathed it to the Emperor Conrad II.; and subsequent attempts made to revive the kingdom of Arles did not prove successful. Raymond, Count of Barcelona, seized Provence in 1146, and Alphonso II., of Aragon, in 1167. Arles became a republic in 1240; afterwards fell under the rule of the Angevin family; and was permanently annexed to France by letters patent of Charles VIII. in 1486.

A.D.	KINGS OF ARLES.
933	Rodolph II., of Transjurane Burgundy.
937	Conrad I., the Pacific.
993	Rodolph III.
1034	Conrad II., the Emperor, received it on the death of Rodolph III.

ARMADA.—(*See* SPANISH ARMADA.)

ARMAGH (Ireland), formerly the metropolis, enjoyed considerable reputation as a seat of learning from the 5th to the 9th centuries. The bishopric is said to have been founded by St. Patrick, A.D. 445. Gelasius, bishop in 1136, became its first archbishop, and took the title of "Primate of all Ireland," in 1152. Armagh was frequently ravaged by the Danes, who were ultimately expelled in 1004. Its cathedral, founded by St. Patrick in 450, was destroyed in 1564, rebuilt in 1616, again destroyed in 1642, and rebuilt in 1675. The town itself was burned by Shane O'Neal in 1564.

ARMAGNACS.—Soon after the murder of the Duke of Orleans, in 1407, France became a prey to two rival factions, the Bourguignons, or Burgundians, and the Armagnacs. The latter received this name from their leader, Bernard, Count of Armagnac, father-in-law to the Duke of Orleans. Poitiers was the head quarters of the Armagnacs, and Paris of the Burgundians. The Armagnacs, in May, 1412, entered into negotiations with Henry IV. of England. Their leader and 4,000 of his adherents were massacred by the Burgundians and the citizens of Paris, June 12, 1418. Louis XI., before he came to the French throne, put himself at the head of a body of ruffians, called Armagnacs, the disbanded mercenaries of the English war, and invaded

Switzerland, where he was defeated in 1444. The Armagnacs were almost exterminated by Louis XI. in 1473.

ARMED NEUTRALITY.—Russia, Sweden, and Denmark, instigated by France, and believing England to be hard pressed by the fleets of France and Spain, at the close of the American war, leagued together to establish a new code of maritime laws. This confederacy, known as the Armed Neutrality, was formed in 1780, and Catherine II. issued a declaration, Feb. 26, announcing that free ships make free goods, that the flag covers the merchandise, and that a port is understood to be blockaded only when such a force is stationed at its entrance as to render it dangerous to approach. These principles she professed her intention of maintaining by force of arms. Denmark signed the convention, July 30; Sweden, Aug. 1, in the same year; and Holland, Jan. 16, 1781. Prussia followed, May 8, and the Emperor of Germany, Oct. 9, 1781. England declared war against the Dutch; but the cessation of hostilities soon after caused the dissolution of the confederacy. It was, however, revived in 1800, and Russia, Denmark, and Sweden signed another treaty, Dec. 16, to which Prussia acceded, Dec. 19. England, after remonstrating, replied by a proclamation laying an embargo on all Russian, Swedish, and Danish vessels (Jan. 14, 1801). Nelson was speedily sent to Copenhagen, which he captured, together with the Danish fleet, April 2, 1801. He then set sail for Cronstadt. Peace was concluded with Russia June 17, 1801. Sweden and Denmark abandoned their pretensions, Prussia followed their example, and the Armed Neutrality was dissolved.

ARMENIA (Asia), according to Armenian tradition, was settled by Haik, son of Togarmah, and grandson of Japhet (Gen. x. 3); and it is noticed in Scripture under the names Togarmah and Ararat. The country, afterwards divided into Lesser and Greater Armenia, was frequently invaded by the Assyrians, the Babylonians, the Medes and Persians, and for many years remained in subjection to one or other of these empires. The accounts given by the Greek and Roman writers are in many points at variance with those of the Armenian historians. M. St. Martin has investigated the subject with great diligence, and upon his valuable work the following chronological table is based:—

B.C.
2107. Haik, fleeing from the tyranny of Belus, King of Assyria, settles in Armenia, and becomes its first ruler.
1827. Accession of Aram, who enters Asia Minor, and founds Cæsarea in Cappadocia (*q. v.*).
1725. Armenia becomes subject to Assyria.
743. Bardir renders Armenia independent of Assyria.
565. Accession of Tigranes, who restores Armenia to its ancient position.
323. On the death of Alexander III. Armenia falls under the sway of Greek governors.
317. The Armenians, under Ardoates, throw off the Grecian yoke.
149. Valarsaces, or Wagharshag I., founds the dynasty of the Arsacidæ (*q. v.*).
34. Antony leads the Armenian sovereign captive to Alexandria.
30. On the death of Antony, Artaxes II. expels the Romans, and is crowned king.

A.D.
16. Vonones, King of the Parthians, seeks shelter with the Armenians, and is made king.
115. Invaded by the Emperor Trajan, who annexes both the Armenias to Rome.
117. Hadrian relinquishes the sovereignty of Armenia.
166. M. Aurelius having rescued Armenia from the aggressions of the Parthians, assumes the title of Armeniacus.
232. Armenia is subjected by Ardashir, King of Persia.
276. Tiridates II. is converted by St. Gregory, and Armenia thus becomes the first country in which Christianity is adopted as the national religion.
369. The Persians conquer Armenia.
387. Armenia is divided between the Romans and the Persians.
442. Armenia is invaded by the Persians, who seek to abolish Christianity, and substitute the rites of Zoroaster.
515. Pourzan rules Armenia, which is ravaged by the Huns during his administration.
637. Invaded by the Arab Abd-errahim, who seeks to establish Mohammedanism.
830. Invaded by Theophilus, Emperor of the East.
850. Sempad the Confessor, King of Armenia, suffers martyrdom at Bagdad for his adherence to Christianity.
859. Aschod I., son of Sempad, receives the title of Prince of Princes from the caliph.
914. Armenia is ravaged by the Arabs.
1045. Constantine XII., Emperor of the East, gains important possessions in Armenia.
1079. Extinction of the dynasty of the Pagratides, and entire submission of Armenia to the Seljukian sultans.
1124. David II. recovers great part of Armenia from the Turks.
1234. The Mongols encamp on the confines of Armenia, which they overrun for several years.
1375. Leon VI., King of Armenia, is made prisoner by the infidels, and carried to Egypt.
1393. Leon VI. dies at Paris, and the kingdom of Armenia becomes extinct.
1583. Armenia is overrun by the Turks.
1604. The Persians, under Shah Abbas, invade Armenia, and reduce it to complete subjection.
1828. The Russians, in their operations against Turkey, overrun Armenia.
1829, July 9. Erzeroum surrenders to the Russians.

Sovereigns of Armenia.

According to St. Martin.

Elder Branch of the Arsacidæ in Greater Armenia.

B.C.
149. Valarsaces, or Wagharshag I., brother of Mithridates I., King of Parthia.
127. Arsaces, or Arshag I.
114. Artaxes, or Arshashes I.
89. Tigranes, or Dikran I.
55. His son, Artavasdes, reigns with him.
36. Artavasdes, or Artawats I.
30. Artaxes II.
20. Tigranes II.
— Tigranes III., dethroned by the Romans.
6. Artavasdes II.
5. Tigranes III. re-established.
2. Queen Erato, widow of Tigranes III. She is forced to abdicate.

A.D.
2. Ariobarzanes, a Parthian, placed on the throne by the Romans.
4. Artavasdes III.
5. Queen Erato re-established.—Interregnum.
16. Vonones.
17. Interregnum.
18. Zeno of Pontus, called Artaxias.
— Tigranes IV.
35. Arsaces II.
— Mithridates of Iberia.
51. Rhadamistus.
52. Tiridates I.
60. Tigranes V.
62. Tiridates I. re-established on the throne.

Younger Branch of the Arsacidæ rules at first at Edessa.

B.C.
34. Arsham or Ardsham.
10. Manu.
5. Abgarus, said to have written a letter to our Saviour.
A.D.
32. Ananc, or Ananus.
36. Sanadrug, or Sanatruces.
58. Erowant, an Arsacid by the female line, usurps the throne, and conquers the whole of Armenia.
78. Ardashes, or Artaxes III., reigns over the whole of Armenia.
120. Artawatz, or Artavasdes IV.
121. Diran, or Tiranus I.
142. Tikran, or Tigranes VI.
178. Wagharsh, or Vologeses.
198. Chosroes, or Khosrew I., surnamed Medz, or the Great.
232. Ardashir, or Artaxerxes, the first Sassanid of Persia.
253. Dertad, or Tiridates II., established by the Romans.
314. Interregnum.—Sanadrug takes northern, and Pagur southern, Armenia.
316. Chosroes, or Khosrew II.
325. Diran, or Tiranus II.
341. Arsaces, or Arshag III.
370. Bab, or Para.
377. Waraztad.
382. Arsaces IV. and Valarsaces, or Wagharshag II.
383. Arsaces IV. alone.
387. Armenia divided between the Romans and Persians.
389. Arsaces IV. dies. Cazavon rules, followed by Chosroes, or Khosrew III.
392. Bahram Shapur (Sapor).
414. Chosroes III. re-established.
415. Shapur, or Sapor.
419. Interregnum.
422. Ardashes, or Artaxes IV.
428. End of the kingdom of the Arsacidæ.

ARMENIAN ÆRA commenced Tuesday, July 9, 552, when the Council of Tiben, or of the Armenians, confirmed the condemnation passed on the Council of Chalcedon in 536. The Armenians were reconciled to the Latin Church about 1330, and they then adopted the form of the Julian year.

ARMENIAN CHURCH is said to have been founded by Bartholomew or Thaddæus, one of the Seventy. The Gospel does not, however, appear to have flourished, and it was not until the beginning of the 4th century that it was embraced by king, nobles, and people. Armenia thus became the first country in which Christianity was adopted as the national religion. The Persians, who had subdued Armenia by 369, having failed in their endeavours to force the Magian religion upon the people, permitted them to follow the faith of their fathers. They adopted the Monophysite doctrine in the 6th century. At a council held at Tiben, in Armenia, July 9, 552, the Armenian bishops condemned the General Council of Chalcedon (451), which had proscribed the Eutychian heresy, and they separated from the Orthodox Church.

ARMENIAN VERSION.—This translation of the Scriptures, of which the Old Testament is based upon the Septuagint, was commenced, A.D. 410, by Miesrob, who invented for the purpose the Armenian alphabet, consisting of 36 letters. This alphabet, with two additional letters, is the one still in use. Some authorities are of opinion that this version, completed about 431, was interpolated in the 6th century from the Syriac Peschito, and in the 13th from the Vulgate. It was first printed at Amsterdam, in 1666.

ARMINIANS, the followers of James Arminius, or Harmensen, a Dutch divine, born at Oudewater, in 1560. He was made pastor at Amsterdam in 1588, and soon after opposed what is termed the Supralapsarian doctrine of Calvin. In 1604 he obtained the divinity chair at Leyden, and died Oct. 19, 1609. His followers were also called Remonstrants, from the petition or remonstrance, containing their doctrines, set forth in five articles presented to the States of Holland, in 1610. Their opposition to the Calvinists, or Gomarists (*q.v.*), as they were then called, referred principally to their views respecting original sin, free will, and predestination. The Synod of Dort, assembled Nov. 13, 1618, and closed May 9, 1619, condemned the "five articles," and 200 of the Arminian preachers were afterwards deprived. Many pastors and their followers went into exile, until the proclamation of religious liberty in Holland, in 625. Hallam (Lit. Hist. vol. ii. pt. 3, ch. ii.) remarks, "The Arminian doctrine spread, as is well known, in despite of obloquy and persecution, over much of the Protestant region of Europe." The Arminians still exist in Holland, and their tenets in a modified form are held by several Christian sects.

ARMORIAL BEARINGS.—"There is no doubt that emblems somewhat similar have," says Hallam (Middle Ages, vol. i. ch. ii. pt. 2), "been immemorially used both in war and peace. The shields of ancient warriors, and devices upon coins or seals, bear no distant resemblance to modern blazonry. But the general introduction of such bearings, as hereditary distinctions, has been sometimes attributed to tournaments, wherein the champions were distinguished by fanciful devices; sometimes to the Crusades, where a multitude of all nations and languages stood in need of some visible token to denote the banners of their respective chiefs. In fact, the peculiar symbols of heraldry point to both these sources, and have been borrowed in part from each. Hereditary arms were perhaps scarcely used by private families before the beginning of the 13th century. From that time, however, they became very general, and have contributed to elucidate that branch of history which regards the descent of illustrious families." At the end of the 12th century, warriors bore escutcheons, suspended from the belt, decorated with their arms. William I. introduced into England the arms of Normandy, having two lions on his shield, to which another lion was added, as is generally supposed, for Aquitaine, by Henry II. The earliest display of arms on a seal is of the date 1187.

ARMORICA (Gaul).—This seat of the Veneti, a Celtic tribe, conquered by Cæsar B.C. 56, threw off the Roman yoke A.D. 409, and their independence was recognized by Honorius. Clovis I. annexed it to his empire A.D. 497. Many of the early Britons, assailed on every side, took refuge in the western part of Armorica, called after them Cornwall and the Lesser Britain. The first immigration is believed to have occurred in the 4th century. The term Armorica, from the Celtic words *ar*, near, and *mor*, the sea, was at one time applied to nearly all the maritime districts between the Seine and the Loire, occupied by Celtic tribes.

It was afterwards limited to Britanny, which designation, even in its restricted application, had quite superseded that of Armorica by the time of Charlemagne. (*See* BRITANNY.)

ARMOUR.—The use of helmets, shields, breastplates, and greaves for the legs, is mentioned in the wars recorded in the Bible. The giant Goliath (1 Sam. xvii. 5 and 6), about B.C. 1063, was armed at all points. Armour was used by most ancient nations, the earliest representations extant being found in the monuments of ancient Egypt. Helmets (*q. v.*) were not common amongst the Teutonic tribes, though they were occasionally worn by the Franks in the 7th, and had become general amongst them in the 8th century. Shields (*q. v.*) were borne by the Northmen about this time. Breastplates were much worn in the 12th century. In the 13th century armour of chain mail was worn by knights. Metal greaves appeared at the end of the same century. Chain mail was replaced by armour of plate early in the 15th century, and black armour was often used for mourning.

ARMOUR-PLATED SHIPS.—Chain-netting of iron was suspended to the sides of men-of-war, which were also strengthened by plates in the time of Henry VIII. and Elizabeth. The following list of iron-plated vessels built for the English navy, with the date when they were launched, is compiled from a Parliamentary return ordered to be printed June 14, 1865:—

1860, Dec. 29—Warrior.	1863, Dec. 12—Minotaur.
1861, Feb. 27—Black Prince.	Dec. 24—Achilles.
April 11—Resistance.	1864, Feb. 9—Enterprise.
April 24—Defence.	Mar. 7—Zealous.
1862, June 26—Prince Consort.	Mar. 8—Royal Sovereign.
Sep. 10—Royal Oak.	May 23—Prince Albert.
Sep. 26—Hector.	July 5—Favorite.
Oct. 24—Caledonia.	Oct. 13—Lord Clyde.
1863, Mar. 19—Ocean.	Oct. 15—Royal Alfred.
July 4—Scorpion.	1865, Mar. 14—Pallas.
Aug. 15—Research.	Mar. 27—Agincourt.
Aug. 29—Wivern.	April 26—Bellerophon.
Oct. 14—Valiant.	May 27—Lord Warden.

ARMS.—The club, the sling (*q. v.*), bow and arrow (*see* ARCHERY) were the most ancient weapons. Esau, at the command of Isaac, took his quiver and bow, and went to procure venison, about B.C. 1760 (Gen. xxvii. 3). Spears of various kinds, javelins, swords (*q. v.*), daggers (*q. v.*), the battle-axe (*q. v.*) and mace (*q. v.*), followed. The cross-bow (*q. v.*), and the long-bow were the chief offensive weapons previous to the invention of gunpowder in the 13th century.

ARMS BILL.—Regulations "to prevent improper persons from having arms in Ireland" were imposed by 47 Geo. III. sess. 2 c. 54 (Aug. 13, 1807), which was amended and continued by 50 Geo. III. c. 109 (June 20, 1810), 4 Geo. IV. c. 14 (March 24, 1823), 10 Geo. IV. c. 47 (June 19, 1829), and 1 & 2 Will. IV. c. 47 (Oct. 15, 1831). The new Arms Bill, 6 & 7 Vict. c. 74 (Aug. 22, 1843), required all owners of fire-arms in Ireland to procure licenses under a penalty of £10 for a first offence, to be increased, in case of repetition, to £20, with forfeiture of the arms illegally held.

ARMSTRONG GUN.—Mr., afterwards Sir, W. G. Armstrong, was induced to turn his attention to the construction of cannon by the effect of two 18-pounder guns against the Russians at the battle of Inkermann, Nov. 5, 1854. These guns, owing to their weight of nearly two tons each, not being available for service till a late period of the battle, Mr. Armstrong directed his efforts towards the invention of a lighter cannon with longer range, and at once submitted a design to the Duke of Newcastle, then Minister of War. His first gun, completed in accordance with an order from the Government, in April, 1855, was not made public by the inventor until perfected by a course of experiments ranging over three years. It was patented Feb. 11, 1857. The Government committee on rifled cannon having recommended the immediate introduction of the Armstrong gun for special service in the field, Nov. 16, 1858, extensive supplies were ordered, and Mr. Armstrong, in recognition of his generosity in having declined all special remuneration for his invention, Jan. 15, 1859, received the honour of knighthood, with the title of C.B., and the appointment of engineer of rifled ordnance at the Royal Gun Factory, which he resigned in Feb., 1863. The great 300-pounder Armstrong gun burst during an experimental firing at the Minotaur target at Shoeburyness, July 7, 1862. A competitive trial of the Armstrong and Whitworth guns commenced at Shoeburyness April 4, 1864.

ARMY.—The numerical force of armies in ancient times, as may be seen from Josh. xi. 4, B.C. 1445; 1 Sam. xiii. 5, about B.C. 1093; and 2 Sam. xxiv. 9, B.C. 1017, was very great. Diodorus Siculus describes the army of Ninus as amounting to 1,700,000 foot and 200,000 horse. Xerxes, B.C. 480, assembled 1,700,000 foot and 80,000 horse for the invasion of Greece. Gibbon calculates that the peace establishment of Hadrian and his successors amounted to 375,000 men, and this number was doubled under the successors of Constantine I. With reference to more modern times, Hallam (Middle Ages, i. ch. ii. pt. 2) says, "In public national history, I am aware of no instance of what may be called a regular army more ancient than the body-guards, or huscarles, of Canute the Great. These select troops amounted to 6,000 men, on whom he probably relied to ensure the subjection of England." Charles VII. of France, advised by the estates at Orleans in 1439, established the first standing army in Europe, levying a poll-tax, in 1444, to defray the expenditure. During the Great Rebellion large armies were raised; and an army was maintained whilst the Commonwealth lasted. In 1662, a force of 5,000 men excited alarm; and the levy by Charles II., in 1678, of 25,000 or 30,000 troops, created dissatisfaction. By the fourth clause of the Declaration of Rights (1689), James II. was accused of having raised and maintained a standing army in time of peace without the consent of Parliament. William III. showed great reluctance in obeying the orders of Parliament with reference to disbanding the troops, and from his reign a standing army has been regularly maintained in this country.

ARMY AND NAVY CLUB (London).—The idea of establishing a military club originated in

1837 with Sir Edward Barnes and a few Indian officers, who had then recently returned from India. The Duke of Wellington became patron on condition that the club should be opened to the navy and marines, and it was established in a house at the corner of King-street, St. James's-square, at the commencement of 1838. The first stone of the club-house in Pall Mall was laid May 13, 1848, and the building was thrown open to members Feb. 25, 1851.

ARNHEIM (Holland), the capital of Guelderland, is noticed in a charter of Otho, in 996. The counts and dukes of Guelderland resided here. The Spaniards took it in 1585; the French in 1672. It was fortified in 1702, and, having again fallen into the power of the French, was retaken in 1813.

ARNOLDISTS. — This sect comprised the followers of Arnold of Brescia, an ecclesiastic who commenced in 1134 to condemn the wealth and ostentation of the Papal system, teaching that the clergy should subsist entirely upon voluntary contributions, and that their extensive revenues should be abandoned to the civil rulers. His opinions were condemned by the Lateran Council of 1139, which compelled him to retire to Zurich. In 1145 he returned to Rome, where his followers raised several tumults, and, being again compelled to take flight, he was surrendered to the Pope by the Emperor Frederick I., in 1155, and was hanged and his body burned.

AROER (Battle).—Sargon, King of Assyria, defeated and slew his rebellious vassal Yahu-bid, or Ilu-bid, King of Hamath, at Karkar, or Gargar, in Syria, supposed to be identical with one of the many Aroers of Scripture, about B.C. 720.

AROMATICS.—(*See* SPICES.)

ARPAD DYNASTY was founded in Hungary A.D. 889, by Arpad the Magyar. He died in 907, and the line ended with Andrew III. in 1301.

ARPINUM (Italy). — This ancient city of Naples, after forming part of the possessions of the Volscians and Samnites, was seized by the Romans B.C. 305, and elevated into a Roman mancipium B.C. 302, though its inhabitants did not receive the suffrage until B.C. 188. Arpinum was the birthplace of Caius Marius, B.C. 157, and of Cicero, Jan. 3, B.C. 106. Its modern name is Arpino.

ARQUEBUS, or HARQUEBUSS.—The hand gun, with the addition of a trigger, received this appellation. The invention is assigned to about 1470, a corps of arquebusiers having existed as early as 1476. Philip of Commines speaks of it as a weapon used at the battle of Morat (*q. v.*) in 1476; and half of the English yeomen of the guard were armed with it in 1485. Mounted arquebusiers are mentioned in 1495. The arquebus, considerably improved in construction, became the ordinary weapon in the 16th century. In 1580 John the Almain recommended to the favourable notice of Walsingham one of his countrymen, who had invented "an harquebuse, that shall contain 10 balls or pellotes of lead, all the which shall goe off one after another, having once given fire, so that with one harquebuse one may kill 10 theeves, or other enemies, without recharging." Thus was the modern revolver anticipated.

ARQUES (Battle).— Henry IV. of France defeated the army of the League, under the Duke of Mayenne, at this place, near Dieppe, Sep. 21, 1589.

ARRACAN (India). — According to native traditions, this country was ruled by independent princes from about A.D. 700. It was frequently overrun by the inhabitants of neighbouring states. The Portuguese formed an establishment in Arracan in the 17th century. The province was conquered in 1783 by the Burmese, who ceded it to the English in 1826 by the treaty of Yandaboo (*q. v.*).

ARRAIGNMENT.—This is the form of criminal law of calling a prisoner to the bar of the court, to plead to an indictment. By ancient law and usage he was entitled to appear without irons or other bonds. Formerly, if the prisoner remained mute, instead of pleading, in cases of treason, his silence was held equivalent to conviction. In other cases of felony he was subjected to the barbarous punishment of *peine forte et dure* (*q. v.*). By 12 Geo. III. c. 20 (1772), standing mute in cases of felony was held equivalent to conviction; but by 7 & 8 Geo. IV. c. 28, s. 3 (June 21, 1827), the court was empowered, if it thought fit, to order the proper officer to enter a plea of "not guilty" on behalf of the accused.

ARRAS (France).—Supposed to be the ancient Nemetacum or Nemetocenna, where Cæsar wintered, B.C. 50. It afterwards took the name of Atrebates, from the people of the province of which it was the chief town. The Vandals captured it A.D. 407, and the Northmen in 880. Arras was made a bishopric about 500. Louis XI. took the town May 4, 1477, and it came into the possession of Maximilian in 1493. Louis XIII. captured it in 1640. Arras was finally secured to France by the treaty of the Pyrenees, Nov. 7, 1659. Lebon committed great atrocities here in 1794.

ARRAS (Treaties).—A congress was opened at this town Aug. 20, 1435, at which envoys from England, France, and Burgundy attended. A treaty was concluded between the two latter powers Sep. 21, 1435; the English commissioners, disgusted with the terms proposed, having retired Sep. 6. This treaty was, with others, confirmed at Crotoy, Oct. 3, 1472. — Another treaty, between Maximilian, then Duke of Austria, and Louis XI., was concluded at Arras Dec. 23, 1482. Margaret, infant daughter of Maximilian, was affianced to the dauphin, and was to receive as her dowry Burgundy, Artois, and other territories, whilst Louis XI. engaged to restore some places he had captured in Luxemburg, &c.

ARRAY (Commissions of).—Hallam (Eng. ii. ch. ix.) says, "In seasons of public danger, threatening invasion from the side of Scotland or France, it became customary to issue commissions of array, empowering those to whom they were addressed to muster and train all men capable of bearing arms in the counties to which their commission extended, and hold them in readiness to defend the kingdom. The earliest of these commissions that I find in Rymer is of 1324, and the

latest of 1557." Charles I. attempted to revive this practice in 1642; but the exercise of this ancient prerogative, from long disuse, was received as an innovation. A very early precedent is that of the 16th Edward II. (1323), in which year a commission issued out of the exchequer to Geoffrey de St. Quyntyn and John de Hasthorp, to the effect that they were to raise, in the Wapentake of Dykryng, all the defensible men between the ages of 16 and 60, and to lead them properly armed to the king at York to act against the Scots.

ARREST.—Malicious arrest on mesne process, in the name of a person not assenting, was declared an indictable offence by 8 Eliz. c. 2, s. 4 (1566). Ambassadors were released from liability to arrest by 7 Anne, c. 12 (1708), and members of Parliament by 10 Geo. III. c. 50, s. 2 (1770). Persons found in the act of larceny may be arrested without warrant by any peace officer, or owner of property concerned, by 7 & 8 Geo. IV. c. 29, s. 63 (June 21, 1827), which was re-enacted by 24 & 25 Vict. c. 96 (Aug. 6, 1861). Persons loitering at night with the supposed object of committing injuries by explosive substances may be arrested by any constable without a warrant by 9 & 10 Vict. c. 25, s. 13 (June 26, 1846), the provisions of which were embodied in the Larceny Consolidation Act, 24 & 25 Vict. c. 96, s. 104 (Aug. 6, 1861), the Malicious Injuries to Property Act, 24 & 25 Vict. c. 97, s. 57 (Aug. 6, 1861), and the Offences against the Person Act, 24 & 25 Vict. c. 100, s. 66 (Aug. 6, 1861). The Prevention of Offences Act, 14 & 15 Vict. c. 19 (July 3, 1851), authorizes the apprehension of any one violating its provisions or committing any indictable offence during the night. (*See* IMPRISONMENT FOR DEBT, MESNE PROCESS, &c.)

ARRETIUM (Italy), also called ARETINUS.—This very ancient city is said, with four other Etruscan cities, to have joined the Latins and Sabines against Rome, B.C. 616. It concluded a peace of 30 years with Rome, B.C. 308. Arretium ultimately became subject to Rome, and a Roman army under Metellus, that advanced to defend it against the Senones, was defeated B.C. 283. Julius Cæsar occupied the city B.C. 49. It has been stated that the modern Arezzo occupies the site of the ancient city: this, however, is a mistake, as Arretium was about three miles to the S.E. It was one of the earliest Italian cities to receive the Christian faith, and for many years its bishops were feudal counts. In the 11th century Arezzo became a republic. It was taken in 1384 by De Coucy, who sold it to Florence. Having revolted, it was retaken in 1502, and made part of Tuscany in 1531. The French took it Oct. 19, 1800.

ARSACIDÆ.—A dynasty of this name ruled in Armenia (*q. v.*) from B.C. 149 to A.D. 428. The name is also applied to the family of Arsaces, the founder of the Parthian monarchy, which occupied the throne of that kingdom from B.C. 250 to A.D. 226, when Artaxerxes established the dynasty of the Sassanides. (*See* PARTHIA and SASSANIDES.)

ARSENIAN SCHISM.—Arsenius was made Patriarch of Constantinople by Theodore Lascaris II., in 1255. The Emperor Lascaris died in 1259, having first committed his son to the care of the patriarch. His successor, Michael Palæologus, deposed Arsenius, but recalled him in 1260, and was himself crowned joint emperor with the young John Lascaris. Michael put out the young prince's eyes in 1261; whereupon Arsenius excommunicated the emperor, and resolutely refused to grant him penance or absolution. A synod was summoned at Constantinople in May, 1264, and Arsenius, having been thrice cited and refusing to appear, was deposed. A powerful party supported the cause of Arsenius; they received the name of Arsenites, and Gibbon declares that they persevered above 48 years in what was termed the Arsenian Schism.

ARSENIC.—This mineral poison was known at an early period, and is believed to have been understood by Paracelsus, who was born about the year 1493. During the 16th century it was employed in the construction of amulets against pestilence. Schroeder describes a method for producing it in his Pharmacopœia, published in 1649, and it entered into the composition of the celebrated Water Tofana (*q. v.*). It was first examined minutely by Brandt in 1733. Owing to its deadly properties it was enacted by 14 Vict. c. 13 (June 5, 1851), that no sale of arsenic should take place unless full particulars of the quantity sold and the purpose for which it was required were entered in a book kept for the purpose by the seller, and also unless the poison had been previously coloured. The danger arising from the use of arsenic in paper-hangings formed a subject of inquiry before the select committee of the House of Lords on the Sale of Poisons Bill in 1857. (*See* BRADFORD.)

ARSON.—The punishment of death was awarded for this offence by the ancient Saxon laws, and the same penalty was attached to it in the reign of Edward I. By 8 Hen. VI. c. 6 (1430), the burning of houses under particular circumstances was made high treason. The perpetrators of the crime were denied benefit of clergy by 23 Hen. VIII. c. 1 (1532), which was repealed by 1 Edw. VI c. 12 (1547). The crime was made felony by the general acts of Edw. VI. and Mary. The punishment, after having undergone various modifications, is penal servitude for not more than seven years; or, in some cases, imprisonment not exceeding two years in duration. The principal acts bearing on the subject are 7 & 8 Geo. IV. c. 28 (June 21, 1827); 16 & 17 Vict. c. 99 (Aug. 20, 1853); and 20 & 21 Vict. c. 3 (June 26, 1857).

ARSOOF, ARSOUF, ARSUF, or ARSUR (Battle).—The Saracens under Saladin were defeated, Sep. 6, 1191, by the crusaders under Richard I. at this town in Palestine, which it is believed was anciently named Apollonia. The sultan lost 8,000 men and 32 emirs; and the crusaders 1,000 men, with the renowned leader James of Avennes, who was buried "in the Church of Our Lady the Queen of Heaven," at Arsoof, Sep. 7. Richard I. himself was slightly wounded.

ART EXHIBITIONS.—In 1673 the French Academy commenced a course of exhibitions of works of art, which, made biennial in 1745, became annual in 1796. The earliest art exhi-

bition in England took place in 1760, the movement receiving much vigour in 1769 by the institution of the annual display of the Royal Academy (*q. v.*). The exhibition of the Scottish Academy commenced in 1826. The South Kensington Museum (*q. v.*), the Art-Treasures Exhibition, opened in 1857 at Manchester (*q. v.*), and the International Exhibition (*q. v.*) of 1862 are the most celebrated art exhibitions.

ARTAXATA (Armenia).—This ancient city, built under the superintendence of Hannibal during his exile at the court of Armenia, B.C. 186, became the capital of the country. Lucullus defeated Mithridates and Tigranes near this city B.C. 68, and it was destroyed by Corbulo A.D. 58. It was rebuilt by Tiridates under the name of Neronia.

ARTEMISIUM (Sea-fight).—Fought between the Persians and the Greeks off this promontory of Eubœa, B.C. 480, without any decisive result. It was renewed two days later, on which occasion the Greeks suffered so much that they were compelled to retreat.

ARTESIAN WELLS.—The Chinese are said to have been long acquainted with the principle on which they are made, and they are found in parts of Africa and Asia, in Italy, Germany, and France. The monastery of St. André, near Aire, possessed one in 1749. Another, in the ancient convent of Chartreux, at Lillier, is said to be 700 years old. The name is derived from Artois, in France, the ancient Artesium. An artesian well was sunk at Sheerness in 1781; another in London in 1794; two at Portsmouth in 1828 and 1829. In 1852 an artesian well was opened at Kissengen, in Bavaria, the borings of which are 2,000 feet below the surface. A bill for establishing a company to supply London with water by means of artesian wells was rejected by the House of Commons, June 2, 1835.

ARTHUR'S CLUB (London), mentioned by Lady Hervey as "the resort of old and young" in 1756, took its name from its proprietor, Mr. Arthur, master of White's chocolate house, who died in June, 1761. The club-house in St. James's-street, erected in 1811, was rebuilt in 1827.

ARTICHOKE.—This vegetable was brought from the Levant into Italy in the 15th century, from Naples to Florence in 1466, and was first seen at Venice in 1473. Artichokes were introduced into France in the 16th century, and into England from Holland in 1602.

ARTICLES OF PERTH.—Adopted by the General Assembly of Scotland held at Perth, Aug. 25, 1618. They were five in number. Firstly, it was ordered that the Lord's supper should be received kneeling; secondly, the communion of the sick was allowed; thirdly, private baptism in cases of apparent necessity: fourthly, confirmation; and fifthly, the observance of Christmas and other holy seasons. They were ratified by the Parliament in Edinburgh, July 25, 1621.

ARTICLES OF RELIGION.—(*See* THIRTY-NINE ARTICLES.)

ARTIFICERS.—Any artificer taking more than the usual rate of wage was subject to imprisonment by the Statute of Labourers, 23 Edw. III. c. 5 (1349), and the wages of several sorts of artificers were fixed by another statute of labourers, 25 Edw. III. st. 1, c. 3 (1350). By 13 Rich. II. st. 1, c. 8 (1389), the rates were to be assessed and proclaimed by the justices of peace. By 34 Edw. III. c. 10 (1360), artificers were liable to punishment for departing into other lands. Conspiring to raise wages was, by 2 & 3 Edw. VI. c. 15 (1549), punished by a fine of £10, or 20 days' imprisonment for the first offence. The above acts were repealed by 5 Eliz. c. 4 (1562), when the assessment of their wages was placed under the direction of justices of the peace, sheriffs, mayors, &c. By one clause of this statute they were compelled, on pain of imprisonment in case of refusal, to assist in agricultural operations during haytime and harvest. Several changes in the law ensued. Persons convicted of enticing artificers in certain branches of industry to go abroad were, by 5 Geo. I. c. 27 (1718), subject to a fine of £100 and imprisonment for three months, with additional penalties for a second offence; and artificers thus offending were treated as aliens, and forfeited all property if they did not return within six months. The fine was increased to £500, and the imprisonment to 12 months, both being doubled for a second offence, by 23 Geo. II. c. 13 (1750). So much of Elizabeth's act as related to the fixing of wages by justices of the peace was repealed by 53 Geo. III. c. 40 (April 15, 1813), and portions of the latter were repealed by 5 Geo. IV. c. 97 (June 21, 1824).

ARTILLERY.—This term was originally applied to all heavy missile weapons, and is used by Vegetius, author of the "Epitome Rei Militaris," which is dedicated to the Emperor Valentinian (A.D. 364—375), to signify the balistæ, scorpiones, arcubalistæ, and other engines of war employed by the Roman armies.

B.C.
810. Uzziah uses military engines at Jerusalem, "invented by cunning men, to be on the towers, and upon the bulwarks, to shoot arrows and great stones withal." (2 Chron. xxvi. 15.)
618. The Chinese profess to have used a cannon this year, bearing the inscription, "I hurl death to the traitor, and extermination to the rebel."
300. Engines for throwing heavy stones against an enemy are used in Sicily about this period.

A.D.
85. Gunpowder artillery is used in China.
200. Koung-ming employs "terrestrial thunder," or gunpowder, for the destruction of his enemies.
757. Li-Kouang-pi constructs cannon to throw stones of 12 lb. weight to the distance of 300 paces.
1118. The Moors use artillery in an attack upon Saragossa.
1132. A culverin of 4 lb. calibre is made in Spain, and called Salamonica.
1196. Abdelmumen, the Moorish King of Cordova, takes Mahadia from the Sicilians by means of artillery.
1157. The Moors defend Niebla against the Spaniards by engines which throw stones and darts by means of fire.
1234. The Chinese use cannon to throw round stone shot against the Mongol besiegers of Cai-fong-fou.
1280. Cordova is attacked by artillery.
1291. A mortar for destroying houses, &c., is described by the Arab historian, Al Maïlla.
1308. Guzman el Bueno takes Gibraltar from the Moors by means of artillery.
1312. Cannon are used by the Arabians.
1327. Edward III. uses "crakeys of war" in his expedition against Scotland.
1323. A cannon exists in the arsenal of Bamberg.
1331. Ibn Nason Ben Bia mentions that balls of iron, thrown by means of fire, were military weapons of the Moors.

A.D.
1338. The French use artillery at the siege of Puy Guillaume.
1339. The Chevalier Cardaillac prepares 10 cannon for the siege of Cambray.
1340. Quesnoy is successfully defended against the Duke of Normandy by means of artillery.
1343. The Moorish defenders of Algesiras oppose Alphonso XI. of Castile by mortar guns.
1346. An iron gun with a square bore, for discharging a cubical shot of 11lb. weight, is constructed at Bruges. The alleged use of artillery by Edw. rd III. at the battle of Crecy this year, is of very doubtful authenticity.
1347. Edward III. uses espringals and bombards at the siege of Calais.
1356. Edward the Black Prince employs cannon and bombards to reduce the castle of Romorantin.
1364. Small hand-cannon are constructed in large numbers at Perouse.
1366. The Venetians first use artillery at the siege of Chioggia.
1368. Mohammed Shah Bahmiani captures 300 gun-carriages in India.
1378. John of Gaunt uses 400 cannon night and day in a fruitless attack upon St. Malo.
1381. Eleven pieces of ordnance are mentioned as existing at the Hotel de Ville, Bologna.
1382. Portable bombards, subsequently called culverines, are introduced in France. Field-guns are employed by the people of Ghent against Bruges.
1386. The English capture two French vessels armed with heavy artillery.
1394. The Turks use artillery at the siege of Constantinople.
1418. The English, under the Duke of Gloucester, fire red-hot balls at the siege of Cherbourg.
1420. Artillery is employed at the sieges of Bourges, Melun, and Etampes.
1422. It is used at the siege of Meaux.
1428. Orleans is attacked by artillery.
1444. Artillery is employed against Zurich.
1453. An immense bombard of 1200 lb. calibre is employed at the siege of Constantinople.
1460. James II. is killed by the accidental bursting of a cannon at the siege of Roxburgh Castle.
1477. Louis XI. causes 12 portable cannon to be cast, to throw metal shot, and to be used as a siege train.
1482. The Shah of Guzerat despatches artillery against the pirates of Bulsor.
1489. Gun-carriages of greatly improved construction are made in France.
1491. Charles VIII. of France attacks Rennes with an artillery force drawn by 3,000 horses.
1498. The Portuguese find artillery much in use in India.
1500. Louis XII. transports a force of artillery from Pisa to Rome, a distance of 240 miles, in five days.
1515. Owing to the superiority of his artillery, Francis I. defeats the Swiss at Marignano.
1521. Brass cannon are first cast in England. Pigafetta, the secretary of Magellan, states that the walls of the town of Borneo are defended by 6 iron and 96 brass cannon.
1543. Large mortars, to fire shells, are made in England by Peter Bawd.
1545. The *Mary Rose* man-of-war sinks off the coast of France, with 600 men on board, owing to the weight of her artillery. Breech-loading cannon have been recovered from the wreck.
1547. Iron cannon are first cast in England about this year.
1554. At the battle of Remi Charles V. employs light guns with limbers, drawn by two horses, and called the emperor's pistols.
1556. The Emperor Ferdinand I., in his march against the Turks, separates the light from the heavy artillery.
1580. Petards are first used by the Huguenots at the siege of Cahors.
1631. Light cannon of copper, covered with cords and boiled leather, are used by Gustavus Adolphus at the battle of Leipsic.
1686. The colossal brass gun "Malick é Meidan," or "lord of the plain," cast at Bejapore, in commemoration of the capture of the city, this year, by the Emperor Aurungzebe, is the largest cast cannon in existence, measuring 14 feet 1 inch in length, with a bore of 2 feet 4 inches, and requiring an iron shot weighing 1,600 lb.
1697. Howitzers are first used, at the siege of Aath.
1749. Maritz, a founder of Geneva, invents a method of boring guns and mortars that had been cast solid.
A.D.
1779. Carronades are invented by Gen. Robert Melville about this year.
1824. Mr. Perkins introduces the steam-gun (*q. v.*).
1847. Rifled breech-loading cannon are introduced by Major Cavalli, of the Sardinian army, and Baron Wahrendorff, of the Swedish service, about this time.
1854. Mr. (afterwards Sir William) Armstrong, proposes his improvements in the construction of cannon to the Duke of Newcastle, Minister of War. (*See* ARMSTRONG GUN).—Dec. Mr. Whitworth patents an improved cannon.
1855, Feb. 27. Capt. Blakely patents his rifled hooped cannon. Mr. Whitworth commences his experiments in gun-making. A monster 80-pounder cannon is made by the Mersey Steel and Iron Company.
1856. The Horsfall gun is constructed.
1858, Aug. 30. A committee is appointed by Government to examine and report upon the different sorts of rifled ordnance.—Nov. 16. The committee reports in favour of the Armstrong gun.
1860, Feb. 15—23. Mr. Whitworth's rifled artillery is tested with much success at South port.—Aug. 28. The great American Floyd gun, throwing a 360-lb. shell, is fired for the first time at Old Point Comfort.
1862, June 20. A select committee on ordnance is appointed by the House of Commons.
1863, July 23. The select committee is dissolved.
1864. The Mackay gun is tested at Liverpool.
(*See* BREECH-LOADING GUNS.)

ARTILLERY COMPANY OF LONDON is said to have sprung from a voluntary association formed for the encouragement of archery, during the reign of Henry VIII., who granted a charter to the fraternity of artillery in great and small ordnance in 1537. The Artillery Company was established in 1585, during the dread of an invasion by the Spaniards, by citizens who voluntarily exercised themselves and trained up others to the use of war. They assembled every Thursday. The exercises were discontinued after the excitement respecting the Spanish Armada had subsided. A new company was, however, formed in 1610. In 1636 Charles II., then Prince of Wales, and his brother the Duke of York, belonged to the company. The exercising ground was removed from Bishopsgate to the Artillery-ground, Finsbury, in 1622. A set of new colours was formally presented to this company by the Princess of Wales June 29, 1864.

ARTOIS (France).—This province, anciently peopled by the Atrebates, was conquered in the 5th century by the Franks. In 863 it was bestowed by Charles II. (the Bald), as the dowry of his daughter Judith, upon Baldwin, Count of Flanders, by whose successors it was held till 1180, when it reverted to the French crown. Louis IX. erected it into a county in favour of his brother Robert in 1237, and on the marriage of Mary of Burgundy with Maximilian in 1477 it passed into the possession of the house of Austria. Restored to France in 1482 by the treaty of Arras (*q. v.*), it was again abandoned to Maximilian by the peace of Senlis, May 23, 1493, and formed part of the empire till its conquest by Louis XIII. in 1640. It was subsequently confirmed to France by the treaties of the Pyrenees (*q. v.*), Nov. 7, 1659; and of Nimeguen (*q. v.*), Aug. 10, 1678.

ARTS (Degrees in).—(*See* UNIVERSITY DEGREES.)

ARTS (Society of).—(*See* ROYAL SOCIETY.)

ART-UNIONS.—Associations for the extension of the fine arts originated in France early in the 19th century, and were soon afterwards

introduced into Germany. The first society of the kind known in England was the London Art-Union, established Feb. 14, 1837, and incorporated by royal charter Dec. 1, 1846. Doubts having been expressed respecting the legality of art-unions, temporary acts were passed in 1844 and 1845 to relieve their promoters from the penalties to which they were supposed to be liable, and they were legalized under certain conditions by 9 & 10 Vict. c. 48 (Aug. 13, 1846). The Art-Union of Ireland was established in 1858. The following list is given in the almanack issued by the Art-Union of London :—

1610, July 19. Bodleian Library founded.
1679, May 16. Ashmolean Museum founded.
1753, April 5. British Museum founded.
1759, Jan. 15. British Museum opened.
1760, April 21. Artists' First Exhibition open free.
1765, Jan. 26. Artists' First Society instituted.
1769, Jan. 2. Royal Academy opened.
1772, March 20. Hamilton's, Sir W., Collection bought.
1804, Nov. 30. Society of Water Colours instituted.
1806, Jan. 18. British Institution opened.
1810, March 22. Artists' Annuity Fund established.
1810, Dec. 20. Dulwich Gallery founded.
1816, June 9. Elgin marbles bought.
1824, March 23. National Gallery founded.
1824, April 14. Society of British Artists instituted.
1827, Aug. 2. Artists' Benevolent Fund established.
1833, March 9. Graphic Society founded.
1834, July 23. Institute of Painters in Water Colours.
1837, Feb. 14. Art-Union of London instituted.
1837, June 1. School of Design opened.
1841, Nov. 22. Commission on Fine Arts issued.
1846, Dec. 1. Art-Union of London Charter granted.

ARUNDEL (Sussex).—Camden says he has not met with the name before the time of Alfred, and adds, "All its renown is derived from the castle, which flourished in the Saxon times, and was rebuilt immediately after the arrival of the Normans, by Roger de Montgomery, thence called Earl of Arundel." In his introduction to "Domesday Book," Ellis speaks of it as existing in the days of Edward the Confessor. In 1433 it was decided that the tenure of Arundel Castle, without any creation, patent, or investiture, constituted its possessor Earl of Arundel. It was garrisoned by the Parliament during the Civil War; was captured by Lord Hopton in 1643, and retaken in 1644.

ARUNDEL CLUB (London), was established, for literary and scientific purposes, in 1860.

ARUNDEL CONSTITUTION. — Archbishop Arundel, at his visitation in London, in 1397, revived an old constitution, originated by Simon Niger, Bishop of London (1229—1241), by which the inhabitants of the respective parishes were compelled to pay their rector one halfpenny in the pound out of the rent of their houses. Hence its name.

ARUNDEL SOCIETY (London). — This society, named from Thomas Howard, Earl of Arundel, who flourished at the commencement of the 17th century, and was called "the father of *vertu* in England," and "the Mæcenas of all politer arts," was instituted in 1849, with the secondary title of the "Society for Promoting the Knowledge of Art."

ARUNDELIAN MARBLES. — (*See* OXFORD MARBLES.)

ARUSPICES.—(*See* HARUSPICES.)

ARVERNI.—This powerful nation of Celtic Gaul first came into collision with the Romans B.C. 121, when they sustained a defeat from Q. Fabius Maximus, on the banks of the Isere. They participated in the general revolt of the Gauls against Rome, B.C. 52, at which time they held the neighbouring states in subjection.

ARZILLA (Africa), taken from the Moors by Alphonso V., King of Portugal, in 1471. The King of Fez wrested it from the Christians in 1506.

ASAPH, ST. (Wales).—Tradition states that Kentigern, being expelled from the see of Glasgow, came into Wales about 550, and established a bishopric at this ancient city of Flintshire. The original wooden cathedral was destroyed by fire in 1282. It was rebuilt in 1284, but was again burned by Owen Glendower in 1402. Bishop Redman, who held the see from 1471 to 1495, erected the present building, which received important repairs and additions in 1833. Geoffrey of Monmouth, the historian of the mythical and early periods of Britain, was bishop of this diocese from 1152 to 1154.

ASCALON (Syria) is mentioned as a city of the Philistines, Josh. xiii. 3, and 1 Sam. vi. 17. The tribe of Judah captured it B.C. 1425 (Judges i. 18), but it was retaken by the Philistines, and is frequently denounced by the prophets. It fell successively into the hands of the Egyptians, the Greeks, and the Romans. It became a bishop's see in the 4th century. Owing to the attacks and occupation, in the 7th century, of the Saracens, who held it for many years, the succession of its bishops was interrupted. It was besieged by the Crusaders in 1100, and again in 1148, without success. Baldwin III. captured it in 1157. Saladin re-took it in 1187, and burned it in 1191. Richard I. of England obtained possession the same year, and restored the fortifications in 1192. Sultan Bibars destroyed its fortifications and filled up its harbour in 1270.

ASCALON (Battle).—Fought during the second crusade, between the Fatimite army, led by the Caliph of Egypt, and the Crusaders, under the command of Godfrey of Bouillon, Friday, Aug. 12, 1099. The former were defeated, leaving 30,000 killed upon the field of battle, with immense booty.

ASCENSION ÆRA, supposed, says Nicolas, to have been used only by the author of the "Chronicle of Alexandria," who dates the year of the martyrdom of St. Menas of Cotys. It corresponds with Nov. 12, 295.

ASCENSION DAY, formerly called Holy Thursday, a movable feast, to commemorate the Ascension of our Saviour, appointed, according to some authorities, in the apostolical times. It was not, however, generally celebrated until the 4th century. King John dated a charter on the Monday next before the Ascension, May 20, 1191.

ASCENSION ISLAND (Atlantic), discovered by the Portuguese mariner Galego, on Ascension-day, Thursday, May 20, 1501. It remained uninhabited till the English took possession Oct. 15, 1815, and formed a military station.

ASCOLI (Battle).—Fought at this place, the ancient Asculum Picenum, during the struggle for the crown of Sicily, between the Emperor

Henry VI. and Tancred, in 1190. The emperor's army was defeated. Ascoli was annexed to the Papal states in 1426. It was made a bishopric in the 4th century.

ASCOT RACES.—The race-course at Ascot Heath, in Berkshire, was established by William, Duke of Cumberland, uncle to George III. In 1722 the manor of Ascot was purchased by Mr. R. Foster, and in 1787 it passed into the possession of Mr. D. Agace. William IV. gave a handsome piece of plate, containing the hoof of the celebrated horse "Eclipse," to be run for at these races in May, 1832. The new grand stand was opened in 1839.

ASCULUM (Battle).—Fought at this place in Apulia, between Pyrrhus and the Romans, B.C. 279. It was hotly contested, and terminated in favour of Pyrrhus. It is often mistaken for a place of the same name in Picenum. The modern name of both places is Ascoli.

ASCULUM PICENUM (Italy).—Captured by Sempronius Sophus, B.C. 268, when the whole nation of the Picni submitted to Rome. The conspiracy and revolt of its inhabitants, and the massacre of the Romans dwelling in the city, B.C. 91, led to the Social or Marsian war, and the siege and capture of Asculum by the Romans, B.C. 90.

ASHANTEE, or ASIENTE (Africa).—Information of this country was first obtained at the commencement of the 18th century. It is inhabited by a warlike people, who, by making continual aggressions on their neighbours, have largely increased their territory. The Ashantees gained a victory over the English in 1807, the latter having assisted the Fantees; and in another struggle, in 1816, the Ashantees had the advantage. War was renewed in 1823, and Sir C. M'Carthy, Governor of Cape Coast, was killed, and his army defeated by the Ashantees Jan. 21, 1824. The English drove them from Cape Coast Castle, July 22 in the same year. The Ashantees suffered a terrible defeat, when their king was glad to purchase peace, and sent his son as a hostage to Cape Coast Castle, Aug. 7, 1826. In consequence of an attack made by the King of Ashantee upon the Fantees, Governor Pine, the British resident at Cape Coast, ordered a force to proceed against him, Feb. 12, 1864. The expedition was, however, smitten by fever, and returned, after suffering terrible losses from disease, without exchanging a blow with the enemy.

ASHBURTON (Treaty). — Concluded at Washington, Aug. 9, 1842, between England and the United States; Lord Ashburton and Mr. Webster being the respective plenipotentiaries. It settled the boundary-line between the British possessions in North America and the United States.

ASHDOD (Palestine), now ESDUD, a city assigned to Judah in the division of the Promised Land (Josh. xv. 46, 47), about B.C. 1444. It was the chief seat of the worship of the idol Dagon, which fell on its face before the ark of the Lord, captured by the Philistines about B.C. 1116 (1 Sam. v.). Uzziah took Ashdod, B.C. 810 (2 Chron. xxvi. 6); and the Assyrians, B.C. 711 (Isaiah xx. 1). Herodotus (ii. 157) speaks of it as having been captured by the Egyptians, after sustaining a siege of 29 years, the longest on record (B.C. 630). Nehemiah, about B.C. 428, denounced the marriages contracted by the Jews with the women of Ashdod (Neh. xiii. 23). It was called by the Greeks and the Romans *Azotus*, and under that name was known during the Crusades.

ASHDUNE (Battle), was fought A.D. 871, between the Danes and the English. The latter, commanded by Ethelred and his brother Alfred, were victorious. In the ancient chronicles the place is called Æscesdune, or Eschendun, and signifies "hill of the ash." Some writers believe Aston, in Berkshire, and others Ashendon, in Bucks, to have been the scene of this victory.

ASHMOLEAN MUSEUM (Oxford). — This repository of manuscripts, books, coins, curiosities, and antiquities, was founded Thursday, May 15 (O.S.), 1679, and opened May 24 (O.S.), 1682. The collection was formed and given to the university by Elias Ashmole, an eminent antiquary, who died May 18, 1692.—The Ashmolean Society was established at Oxford in 1828.

ASH WEDNESDAY. — Among the early Christians, Lent commenced on the Sunday now called the first in Lent. Ash Wednesday and the three following days, making the fast to continue 40 days, were afterwards added. "Some say it was the work," Bingham (Antiq. b. xxi. ch. i. s. 5) remarks, "of Gregory the Great (590—604); but others ascribe it to Gregory II., who lived above an hundred years after, in the beginning of the 8th century." Other authorities attribute it to Felix III., in 487. It received its name from the Roman Catholic practice of sprinkling ashes on the heads of penitents, in remembrance of Gen. iii. 19.

ASIA, the cradle of the human race, and the earliest seat of empire, civilization, and commerce, is said by some Greek writers to have been named from the nymph Asia, one of the Oceanides. The term was, however, applied by the Greeks to a portion only of this extensive continent. The overthrow of the Lydian empire by Cyrus, B.C. 546, first brought it under their notice; and the victories of Alexander III., the Great, B.C. 334—B.C. 323, led to a further acquaintance. Ptolemy, A.D. 139—161, asserts that not more than one-fourth part of Asia was known to the ancients. The progress of discovery in this quarter of the globe was accelerated by the invasion of Europe by the Saracens, and the Crusades. Marco Polo, the account of whose travels was circulated in 1208, is the pioneer of modern discovery in this direction. He obtained information respecting China, Japan, and parts of India. Little was, however, effected until the invention of the mariner's compass, and the discovery of the passage round the Cape of Good Hope enabled the navigators of Europe in the 15th and 16th centuries to prosecute their researches by sea:—

A.D.
1497. Vasco de Gama doubles the Cape of Good Hope (q. v.), and arrives at Calicut (q. v.) in the summer of the following year.

A.D.
1498. The Portuguese explore Malabar (*q. v.*).
1503. The Portuguese obtain a footing in Cochin (Hindostan).
1506. Almeida discovers Ceylon (*q. v.*), and Soarez the Maldives.
1507. Martin Baumgarten travels in Palestine.
1503. Several Portuguese settlements are planted in Asia.
1511. The Portuguese establish themselves at Malacca (*q. v.*), visit Siam (*q. v.*), and reach the Moluccas or Spice Islands.
1517. The Portuguese reach China (*q. v.*), and form a settlement at Macao (*q. v.*). They erect the fortress of Colombo (*q. v.*).
1518. The Portuguese visit Bengal, Borneo (*q. v.*), and Chittagong (*q. v.*).
1542. Discovery of Japan (*q. v.*).
1558. Jenkinson explores the Caspian, and reaches Bokhara (*q. v.*).
1579. Siberia (*q. v.*) is entered and seized by the Russians.
1607. The Jesuit, Father Goez, travels from India to the Great Wall of China.
1639. The river Amour is discovered by the Russians, who also reach Kamtschatka (*q. v.*).
1656. Grueber travels in China.
1714. Desideri crosses the Himalaya Mountains, and visits Cashmere and Thibet.
1762. Niebuhr explores Arabia.
1790. The north-eastern coasts of Siberia are examined by the Russians.
1796. Thibet is explored by Capt. Hardwicke.
1804. Krusenstern explores the gulf of Tartary, the Kurile Archipelago, and the coasts of Japan and Yesso.
1808. The Himalaya is ascended by Lieut. Webb, in order to determine the source of the Ganges.

ASIA MINOR.—This name was first applied in the 4th century to the north-western peninsula of the Asiatic continent. It is also called Anatolia, although the latter term is more correctly used for a particular portion. A writer in the "Encyclopædia Britannica" (iii. 758) remarks:—"Asia Minor was the theatre of the earliest remarkable events recorded in profane history; as the Argonautic expedition, the Trojan war, in which the gods are said to have descended from Olympus and joined battle with mortals; the conquests of the Persians, the overthrow of their empire by Alexander, and the settlement in this part of Asia of his successors. It subsequently fell under the Roman sway, and suffered severely in after-ages in the wars of the Saracens, Turks, Tartars, &c. It is also intimately connected with the early history of Christianity, and the first Christian churches were planted here." Its chief political divisions in ancient times were Bithynia, Cappadocia, Caria, Cilicia, Galatia, Isauria, Lycaonia, Lycia, Lydia, Mysia, Pamphylia, Paphlagonia, Phrygia, Pisidia, and Pontus.

ASIATIC SOCIETIES.—The first society of the kind was established by the Dutch at Batavia, in 1780; the next was the Royal Asiatic Society of Bengal, founded at Calcutta by Sir W. Jones, in 1784; and this was followed by the Société Asiatique, at Paris, in 1822. The Royal Asiatic Society of Great Britain and Ireland, for the investigation and encouragement of arts, sciences, and literature in relation to Asia, was founded in London in March, 1823, and received its charter in 1824. The Oriental Translation Committee, established in 1828, is in connection with this society. The Literary Society of Bombay, founded in 1804, joined it as a branch in 1829. The Literary Society of Madras, the Asiatic Society of Ceylon, instituted in 1845; that of China, founded at Hong Kong in 1847; and that of Shanghai, established in 1858, are also branches.

ASPERN and ESSLING (Battle).—Napoleon I., after a series of encounters in the plain of the Marchfield (*q. v.*), near Vienna, between the villages of Aspern and Essling, on the Danube, extending over two days, May 21 and 22, 1809, was compelled to take refuge in the island of Lobau (*q. v.*). He lost 30,000 men in these actions. The Austrians, who were commanded by the Archduke Charles, were greatly inferior in point of numbers to the French. Marshal Lannes, wounded in the battle of May 22, lingered till May 31, when he expired. These encounters are sometimes called the battle of the Marchfield.

ASPHALT, used for embalming by the ancient Egyptians, was first employed for pavements, &c., by Claridge, about 1837.

ASPROMONTE (Battle).—Garibaldi was defeated, wounded, and taken prisoner by the Sardinian troops at the plateau of Aspromonte, in Calabria, Aug. 29, 1862.

ASSAM (Asia).—The early history of this country is involved in obscurity. Its inhabitants waged many contests with the Mohammedan conquerors of India, and long maintained their independence. In 1638 they invaded Bengal, but were repulsed with great slaughter. The country fell under the sway of the Burmese, who were expelled by the English in 1825, and by the second article of the treaty of Yandaboo (*q. v.*), concluded Feb. 24, 1826, renounced all claim to Assam and its dependencies. A part of the country remained independent until 1838, when the whole was annexed to British India. Mr. Bruce discovered the tea-plant in Assam in 1823. Further researches were made, cultivation was encouraged, and the first 12 chests of tea reached England in 1838. In 1839 an association was formed for the cultivation of the tea-plant.

ASSANDUN (Battle).—(*See* ASSINGDON.)

ASSASSINATION.—The Council of Constance (*q. v.*), which sat from 1414 to 1418, having by its fifteenth decree anathematized only such assassins as had not previously procured an ecclesiastical mandate for the deed, the order of Jesuits (*q. v.*), founded in 1534, deduced therefrom the doctrine that assassination is laudable when perpetrated by direction of an ecclesiastical tribunal. The Parliament of Paris condemned a book of the Jesuit Suarez to be burned in 1614, on the ground of its advocating the assassination of sovereigns.

A.D.
979. March 18. Assassination of Edward the Martyr. (*See* ENGLAND.)
1588, Dec. 23. The Duke of Guise is assassinated at Blois.
1589, Aug. 1. Henry III. of France is stabbed by Jacques Clement.
1610, May 14. Henry IV. of France is assassinated by Ravaillac.
1628, Aug. 23. Assassination of the Duke of Buckingham by John Felton.
1757, Jan. 5. Damiens attempts the life of Louis XIV. (*See* FRANCE.)
1786, Aug. 2. Margaret Nicholson attempts the life of George III.
1793, July 13. Marat is assassinated by Charlotte Corday.
1800, May 15. James Hadfield attempts the life of George III.

A.D.
1801, March 23. Assassination of Paul I. (*See* RUSSIA.)
1812, May 11. Assassination of Mr. Perceval. (*See* PERCEVAL ADMINISTRATION.)
1840, June 10. Queen Victoria's life is attempted by Edward Oxford.
1842, May 30. John Francis fires at Queen Victoria.—July 3. John William Bean presents a pistol at Queen Victoria.
1849, May 19. William Hamilton fires at Queen Victoria.
1850, May 12. Frederick William IV. of Prussia is wounded by Sofelage.—May 27. Robert Pate assaults Queen Victoria with a stick.
1852, Feb. 2. Martin Merino attempts the life of the Queen of Spain.
1853, Feb. 18. Francis Joseph I. of Austria is stabbed by Libeny.
1854, March 20. Assassination of Ferdinand-Charles III., Duke of Parma, by an unknown person, who effected his escape.
1855, April 28. Pianori fires at the Emperor Napoleon III.
1856, May 28. Queen Isabella of Spain is attacked by Raymond Fuentes.—Dec. 8. Agésiras Milano strikes Ferdinand II. of Naples with a bayonet.
1857, Jan. 3. Assassination of the Archbishop of Paris.
1858, Jan. 14. The Orsini conspiracy (*q. v.*). An attempt is made this year upon the life of Victor Emanuel II. of Sardinia.
1861, July 14. William I. of Prussia is shot at by Oscar Becker.
1862, Sep. 18. Aristide Dousios fires upon the Queen of Greece.
1865, April 14. Assassination of President Lincoln. (*See* UNITED STATES.)

ASSASSINATION PLOT.—Several persons leagued together for the purpose of assassinating William III., Feb. 15 (N.S. 25), 1696, between Brentford and Turnham Green, through which places he passed on Saturdays to hunt in Richmond Park. The plot was revealed by one of the conspirators, and William III. remained at home. The execution of the plan was consequently deferred till the following Saturday, Feb. 22 (N.S. March 3), and was again frustrated. Some of the conspirators were captured and executed. Their chief object was to restore James II. to the throne.

ASSASSINS, or ISMAELIANS, a military and religious order sprung from the Carmatians, a Mohammedan sect that settled in Persia in the 11th century. Hassan-ben-Sahib, having obtained possession of the hill-fort of Alamoot, or "Vulture's Nest," in Casvin, Persia, established the order there, about 1090. The leader, called Sheikh-el-Jebelz, was known in Europe as the Old Man of the Mountain. The assassins gained other strongholds and spread into Syria. (*See* ANSAIREEH.) Hassan died in 1124. The Persian branch of the Assassins was exterminated by Holagou Khan in 1258; and the Syrian by the Mameluke sultans of Egypt in 1270, or, according to Gibbon, in 1280. Gibbon says of them:—"With the fanaticism of the Koran the Ismaelians had blended the Indian transmigration and the visions of their own prophets; and it was their first duty to devote their souls and bodies in blind obedience to the vicar of God. The daggers of his missionaries were felt both in the East and West: the Christians and the Moslems enumerate, and perhaps multiply, the illustrious victims that were sacrificed to the zeal, avarice, or resentment of *the Old Man* (as he was corruptly styled) *of the Mountain*. But these daggers, his only arms, were broken by the sword of Holagou, and not a vestige is left of the enemies of mankind, except the word *assassin*, which, in the most odious sense, has been adopted in the languages of Europe."

ASSAY of gold and silver originated with the Bishop of Salisbury, treasurer to Henry I. Richard de Luci, sheriff of Essex, is mentioned as receiving certain sums for making the assay or combustion, as it was termed, of silver money, in 1157. Assay of gold is not mentioned earlier than 1199, when Nigell Ruffus and Odo le Petit received payment for assaying the gold employed for the crown and other regal ornaments used at the coronation of King John. The first statute for its regulation was passed in 1238. The first public assay of metals employed in coinage, called the trial of the pix, took place Feb. 24, 1248, when the mayor and citizens of London were commanded to elect 12 citizens to act conjointly with 12 skilful goldsmiths in the examination. Henry III. ordered a general proof and assay of the coins throughout the kingdom in 1270, the assayer having authority to confiscate to the royal use all money proved to be corrupt. In 1300 the privilege of assay was granted to the Goldsmiths' Company. The first regular public trial of the pix took place in 1281, and in 1344 rules were laid down for its performance, which directed trial to be made every three months in presence of the privy council and the authorities of the mint. The earliest instance of the trial of the pix in other countries appears to have taken place in France during the reign of Philip V. (1316—1322). James I. presided in person at an assay made May 9, 1611, and in 1643 a committee of lords and commons was appointed by Parliament to superintend the trial. The assay, touching, and marking with the leopard's head of gold and silver plate by the Goldsmiths' Company, was first ordered by 28 Edw. I. c. 20 (1300), but is believed to have been vested in their hands for many years previously. Assay of plate at York, Exeter, Bristol, Chester, and Norwich, was provided by 12 & 13 Will. III. c. 4 (1700); at Newcastle-upon-Tyne by 1 Anne, st. 1, c. 9, s. 3 (1701); at Sheffield and Birmingham by 13 Geo. III. c. 52 (1773), which was amended by 24 Geo. III. sess. 2, c. 20 (1784), and 5 Geo. IV. c. 52, local and personal (1824). Provisions for the assay of foreign imported plate were made by 5 & 6 Vict. c. 47, ss. 59 and 60 (July 9, 1842), which was amended by 5 & 6 Vict. c. 56, s. 6 (July 30, 1842). The assaying laws were also amended by 17 & 18 Vict. c. 96 (Aug. 10, 1854), and by 18 & 19 Vict. c. 60 (July 23, 1855).

ASSAYE (India).—This battle was fought Sep. 23, 1803, when Wellington, with 4,500 troops, of whom only 2,000 were British, defeated the combined forces of the Mahratta chief, Scindiah, and the Rajah of Berar, amounting to 50,000 men.

ASSEMBLY OF DIVINES.—This body, consisting of 130 divines, with 30 lay assessors, was constituted by an ordinance dated June 12, 1643, and appointed to meet July 1, 1643, in Henry the Seventh's chapel at Westminster, for the purpose of consulting and advising both houses of Parliament relative to the liturgy, discipline, and government of the Church of England. They were divided into three parties, the Independents, the Erastians,

and the Presbyterians, the latter being in a majority. Charles I. issued a proclamation, June 22, declaring the assembly illegal, and prohibiting the meeting. In spite of this, they assembled on the appointed day. They presented a petition to both houses of Parliament for a fast, sent letters to the Protestant communities on the continent, drew up a confession of faith, and a larger and shorter catechism. This assembly sat at intervals until Feb. 22, 1649; and, somewhat modified in character, it held meetings every Thursday until the dissolution of the Long Parliament in 1653. It was also called the Westminster Assembly.

ASSENS (Battle).—Christian III., King of Denmark and Norway, defeated the rebellious Danes at this place in 1535. This victory, with other naval successes, restored the island to its allegiance.

ASSESSED TAXES.—So called because they are assessed and charged upon persons in respect of articles in their use or keeping, as land, houses, servants, carriages, &c., originated, according to some authorities, in 991, with the imposition of the Danegeld (*q. v.*). (*See* Dogs, House Duty, Land Tax, Windows, &c., &c., &c.). The numerous statutes relative to the assessed taxes were amended by 45 Geo. III. c. 71 (June 27, 1805), 48 Geo. III. c. 141 (July 2, 1808), 3 Geo. IV. c. 88 (July 29, 1822), 16 & 17 Vict. c. 90 (Aug. 20, 1853), 17 Vict. c. 1 (Feb. 7, 1854), 17 & 18 Vict. c. 85 (Aug. 10, 1854), 19 & 20 Vict. c. 80 (July 29, 1856).

ASSIENTO or ASIENTO.—Charles V. entered into a contract with the Flemings, who agreed to supply a certain number of negroes yearly to the Spanish colonies in South America. In 1532 the Spaniards withdrew the contract, and in 1580 Philip II. granted it to the Genoese. Philip V., on his accession, transferred it to France; and, by a treaty concluded between France and Spain, at Madrid, Aug. 27, 1701, the former agreed to furnish annually, for 10 years, 4,800 negroes, or 3,000 in time of war. By a treaty between England and Spain, signed at Madrid March 26, 1713, England agreed to take it for 30 years, from May 1, 1713, on the same terms as France had done; and this agreement was confirmed by the 12th article of the treaty of Utrecht, July 13, 1713. The war of 1740 caused its suspension; but, by the 16th article of the treaty of Aix-la-Chapelle, Oct. 7, 1748, England was to resume it for four years. A treaty was, however, signed at Madrid, between England and Spain, Oct. 5, 1750, by which Great Britain gave up the Assiento contract and the annual vessel during the remainder of four years, Spain agreeing to pay £100,000 in liquidation of all claims.

ASSIGNATS.—State notes or paper money issued on the security of the Church lands seized during the French Revolution. The first issue, made in 1790, was to the amount of 400,000,000 of francs, bearing interest, and in Sep. 800,000,000 in addition were issued, but without the liability to pay interest. Further sums were raised in this manner on the lands of the emigrants and other confiscated property. To these assignats a forced currency was given; but they soon became almost valueless. Various experiments to prop up this paper currency were tried without success, and the system was virtually abandoned in 1796.

ASSINGDON (Battle), or ASSANDUN.—A desperate conflict between Canute and Edmund Ironside took place here in 1016. Edmund lost several of his most valiant leaders, and withdrew during the night. A writer in "Notes and Queries," 3rd Series, I., 407, conjectures that the scene of this conflict was the modern parish of Essendine in Rutland, where traces of some early contest are still extant. Others fix the site at Ashdown, near Saffron Walden.

ASSIZE COURTS.—Itinerant justices were appointed for every part of the kingdom, by the Parliament held at Northampton in 1176. The judges were invested with a delegated authority from the *aula regia*, or the king's court, and they made their circuit round the kingdom for trying causes once in seven years. The 12th article of Magna Charta (1215) provided that they should be sent into each county once a year, and this was repeated in the charter of Henry III. (9 Hen. III. c. 12, 1225). It was not until the year 1285 that these courts were presided over by judges of the superior courts. By 13 Edw. I. st. 1, c. 30 (1285), they were appointed to go into every shire at the most three times a year. Assizes were first allowed to be held during Advent and Lent, by the consent of the bishops, at the king's special request, as set forth in the statute of Westminster I. (3 Edw. I. c. 51), in 1275.

ASSIZE OF BATTEL.—(*See* Trial by Combat.)

ASSIZE OF BREAD.—Littleton designates the word assize *nomen equivocum*, on account of its application, especially in English law, to a great variety of subjects. In some cases, as in the present, it is equivalent to an assessment. The first notice of an assize of bread is to be found in a proclamation made in 1203, during the reign of King John, enforcing the legal assize. By 51 Hen. III. st. 1 (1266), called the "Assisa et Panis et Cervisiæ," or the assize of bread and ale, the prices of these articles were regulated by those of corn, and by 51 Hen. III. st. 6 (1266), a baker was fined for transgressing the law, and in case of a grievous offence was to suffer punishment of body in the pillory, or some other correction. The latter statute was repealed by 9 Anne, c. 18 (1710), which fixed a new assize. Other alterations were made in the law, and the statute Assisa, &c., was repealed by 5 Geo. IV. c. 74, s. 23 (June 17, 1824). Bread has since been sold by weight in the metropolis, and the system was extended to the country by 6 & 7 Will. IV. c. 37 (1836), which came into operation Oct. 1, 1836. The law requires bakers, when delivering bread, to be provided with weights and scales. By 1 Vict. c. 38 (July 4, 1838), all former acts relating to the sale of bread in Ireland were repealed, and a new assize was established for that country.

ASSIZE OF JERUSALEM.—This code was compiled in 1100, under the auspices of Godfrey of Bouillon, the first sovereign of the Latin kingdom of Jerusalem, founded July 23, 1099. Godfrey sought the advice of the Latin pilgrims best skilled in the statutes and customs of Europe. With their aid the code, which

Gibbon terms "a precious monument of feudal jurisprudence, was drawn up. The new code, attested by the seals of the King, the Patriarch, and the Viscount of Jerusalem, was deposited in the holy sepulchre, enriched with the improvements of succeeding times, and respectfully consulted as often as any doubtful question arose in the tribunals of Palestine." It was restored for the use of the Latin kingdom of Cyprus in 1369. An Italian version appeared in 1535, at Venice, and a French one at Paris in 1690.

ASSIZE OF WOOD AND COAL.—On account of the frauds practised, a law was passed in 1543 (34 & 35 Hen. VIII. c. 3), regulating the measure for coal and wood. In consequence of the scarcity of wood and the impossibility of enforcing the regulations of this statute, it was amended by 7 Edw. VI. c. 7 (1553). The latter act was altered by 43 Eliz. c. 14 (1601). The law was enforced by 9 Anne c. 15 (1710), and an exemption granted in favour of billets made of beech wood only, by 10 Anne c. 6 (1711). These acts were repealed by 5 Geo. IV. c. 74, s. 23 (June 17, 1824). The sale of coal in the metropolis is regulated by 1 & 2 Will. IV. c. 76 (Oct. 5, 1831).

ASSUMPTION.—This Roman Catholic festival, celebrated Aug. 15, in honour of the alleged assumption of the Virgin Mary into heaven, was instituted, according to some authorities, in the 4th, and according to others in the 7th century. The early Church commemorated her death, but the festival of the Assumption is a Romish innovation. It was originally observed Jan. 18, which was afterwards changed to Aug. 15. The Greek and Russian Churches on the latter day observe the festival of "the Day of Rest of the Most Holy Mother of God," but do not hold the doctrine of the Assumption.

ASSUNDUN (Battle.)—(*See* ASHDUNE and ASSINDON, both of which battles are known under the name of Assandun or Assundun.)

ASSURANCE.—(*See* INSURANCE.)

ASSYRIA (Asia).—The narrow tract of country enclosed between Mesopotamia, Babylonia, Armenia, Susiana, and Media, called by the ancients Assyria, or Asturia, was the original seat of that extended dominion known as the Assyrian empire. According to the 10th chapter of Genesis, Nimrod, leaving Babylon, which he had founded, went forth into Assyria, where he built Nineveh, Rhehoboth, Calah, and Resen, about B.C. 2218. Such is the interpretation given in the margin of the Bible, though some authors prefer the reading that Asshur went forth and built these cities. The next notice of this empire that occurs in the Old Testament is the invasion of Palestine in the reign of Uzziah by Pul (2 Kings, xv. 19), King of Assyria, B.C. 769. The sacred historian relates that Menahem, King of Israel, induced him to retire by a bribe of 1,000 talents. Tiglath-Pileser II., the successor of Pul, at the solicitation of Ahaz, King of Judah, invaded Syria, and took many of its people away captive (2 Kings, xvi. 5—9). B.C. 738. Shalmaneser, having besieged Samaria three years, captured it, and put an end to the kingdom of Israel B.C. 722 (2 Kings, xvii. 5, 6), and carried away its people into captivity. Another king, Sennacherib, came up against all the fenced cities of Judah, and took them (2 Kings, xviii. 13, and 2 Chron. xxxii.), B.C. 714, but failed in an attack upon Jerusalem, the angel of the Lord having slain 185,000 men in one night, B.C. 712 (2 Kings, xviii. 13, xix. 35, 36, and 2 Chron. xxxii. 21). On his return to Nineveh, Sennacherib was slain by two of his own sons, and another king, named Esarhaddon, assumed the Assyrian sceptre, B.C. 711 (2 Kings, xix. 37). The last King of Assyria mentioned in Scripture is Nebuchadnezzar, who is supposed to have ascended the throne B.C. 650. The ancient authors who treat of the history of Assyria are Herodotus, who died B.C. 408, Ctesias, who was living B.C. 398, and Berosus, a native of Babylonia, who flourished B.C. 250. The theory of an Assyrian empire that terminated at the revolt of the Medes, about B.C. 711, followed by an Assyrian monarchy that continued till the destruction of Nineveh, B.C. 606, though supported by high authorities, is now generally rejected. Clinton (Fasti Hellenici, i. 268) remarks, with reference to the duration of the Assyrian monarchy: "The period delivered by Ctesias seems to have been 1,306 years. He placed its commencement 1,000 years before the Trojan war, and its termination at B.C. 876. But in assigning the termination of the Assyrian monarchy, Ctesias, and those that followed him, confounded two events,—the revolt of the Medes and the destruction of Nineveh; which they made to happen together. These two events, however, were divided by a considerable interval of time, and the conclusion of the term of 1,306 years assigned to that monarchy did not occur at the Median revolt, but at the final capture of Nineveh. The date of this event we are enabled to fix with precision, on the concurrent authority of Scripture and Herodotus" (B.C. 606). Clinton gives the following summary:—

	Yrs.	B.C.
Ninus, B.C. 2182.		
Assyrian monarchy, 1306 years before the empire	675	1912
During the empire, 24 kings	526	1237
Sardanapalus, B.C. 876.		
After the empire, 6 kings	105	711
	1306	
Capture of Nineveh		606

Vaux (Nineveh and Persepolis, p. 508) gives, on the authority of Col. Rawlinson, the following list of Assyrian monarchs:—

FIRST ASSYRIAN EMPIRE.

B.C.		B.C.	
1273.	Belukh.	950.	Asshur-adan-akhi
1255.	Pudil.	925.	Asshur-danin-il.
1240.	Phulukh I.	900.	Phulukh II.
1220.	Sillima-Rish I.	880.	Tiglti-Sanda.
1200.	Sanda-pal-imat.	850.	Sardanapalus.
1185.	Asshur-dapal-il.	815.	Sillima-Rish II. (Asshur-danin-pal).
1165.	Mutaggil Nebo.	780.	Shamasphul.
1140.	Asshur-Rish-ipan	760.	Phulukh III. (Pul) and Semiramis
1120.	Tiglath-Pileser I.		
1100.	Asshur-bani-pal I.		

SECOND ASSYRIAN EMPIRE.

B.C.		B.C.	
747.	Tiglath-Pileser II.	660.	Asshur-bani-pal II.
730.	Shalmaneser.	640.	Asshur-Emit-Ilut.
721.	Sargon.	625.	Final overthrow of Nineveh.
703.	Sennacherib.		
680.	Esarhaddon.		

The subject has been investigated with great care and ability by the Rev. G. Rawlinson (The Five Great Monarchies of the Ancient World), who is of opinion that this, the second great monarchy of the ancient eastern world, was situated in the "upper portion of the Mesopotamian valley. The cities which successively formed its capitals lay, all of them, upon the Middle Tigris, and the heart of the country was a district on either side that river, enclosed within the 35th and 37th parallels. By degrees these limits were enlarged; and the term Assyria came to be used, in a loose and vague way, of a vast and ill-defined tract extending on all sides from this central region." Its earliest known inhabitants migrated from Shinar, whence "went forth Asshur, and builded Nineveh" (Gen. x. 11). His descendants, after submitting to the empire of Chaldæa (*q. v.*), removed farther to the north, where they made a permanent settlement before B.C. 1600. The following summary of its history is taken from Rawlinson's elaborate and exhaustive work:—

B.C.

1841. Shamas-Vul, son of Ismi-dagon, King of Chaldæa (*q. v.*), builds a temple at Kileh-Shergat, the capital during the Chaldæan supremacy.

1600. The migration of the Assyrians from a more southern district is effected before this year.

1290. Accession of Shalmaneser I., who founds Nimrud, or Calah (*q. v.*).

1130—1125. Tiglath-Pileser I., during the first five years of his reign, suppresses a rebellion of the Moschians, who had seized the Assyrian dependency of Qummukh,—wages war against the Hittites,—subdues the Nairi, after an obstinate resistance,—attacks Syria, where he captures and burns six cities,—and ravages the mountainous district of Musr, in Kurdistan, with the neighbouring territory of the Comani; the whole being narrated on two duplicate cylinders of stone, deposited in the British Museum, in which the monarch states that, "There fell into my hands altogether, between the commencement of my reign and my fifth year, 42 countries with their kings, from the banks of the river Zab to the banks of the river Euphrates, the country of the Khatti, and the upper ocean of the setting sun. I brought them under one government. I took hostages from them, and I imposed on them tribute and offerings."

1112. Tiglath-Pileser is defeated by Merodach-iddin-akhi, King of Babylon, who carries away several Assyrian idols.

990. Assyrian names appear for the first time in the Egyptian dynastic lists.

884—878. Asshur-idanni-pal, during the first six years of his reign, invades Kurdistan,—subdues the regions west and north-west of Assyria,—suppresses rebellions at Assura and Tela,—forces the kings of the Nairi to pay him heavy tribute,—extends his arms far to the south-east, where he founds the city of Dur-Asshur,—again passes northward, receiving tribute of the Qummukh, and overthrowing 250 fenced cities of the Nairi,—invades the country of the Shuhites and Chaldæa,—defeats the allied Shuhites and Laki in a great battle fought on the banks of the Euphrates, where 6,500 of his enemies fell,—besieges and burns Kabrata, the capital city of Beth-Adina, removing 2,500 of the inhabitants as colonists to Calah,—invades Syria, ravaging the country about Antioch and Aleppo, and after crossing Lebanon and arriving at the Mediterranean, receives tribute from Tyre and Sidon,—and invades the Upper Tigris, seizing the town of Amida or Diarbekir (*q. v.*).

851, 850. Shalmaneser II. invades Babylon and Chaldæa.

850—840. Judæa submits to Assyria about this time.

848. Shalmaneser II. fails in an attack upon Ben-hadad, King of Syria and the Hittites.

845. He defeats Ben-hadad, and a large force of Hamathites and Hittites.

844. He defeats Hazael, the successor of Ben-hadad, kills 10,000 of his army, and seizes 1,121 chariots.

841. He enters and ravages all the chief cities of Syria.

829. Asshur-danin-pal rebels about this time against his father Shalmaneser, and is subdued, and, probably, put to death.

820. Shamas-Iva invades Babylon, attacking in his road to the capital a fortified place, where he slays 18,000 men, and captures 3,000. He subsequently attacks Merodach-belatzu-ikbi, King of Babylon, on the Daban river, where he kills 5,000 of the enemy, and captures 2,000 prisoners, 100 chariots, and 200 tents.

810—781. Reign of Iva-lush IV., whose queen, Sammuramit, is believed by Rawlinson (ii. 383) to be the mythical Semiramis of the Greeks and Romans.

760—750. According to Rawlinson (ii. 330, *note*), Jonah's visits to Nineveh took place between these years.

751—745. Pul, "King of Assyria," invades Israel, and exacts from King Menahem 1,000 talents of silver (2 Kings, xv. 19). Rawlinson (Ancient Monarchies, ii. 388) regards this prince, whose name is not mentioned in any Assyrian records, as "a pretender to the Assyrian crown, never acknowledged at Nineveh, but established in the western (and southern) provinces so firmly, that he could venture to conduct an expedition into Lower Syria, and to claim there the fealty of Assyria's vassals." Different dates are assigned for this invasion by different chronologists. (*See* ISRAEL.)

744. Tiglath-Pileser II. invades Babylon.

741. He attacks Syria, subduing Damascus, Samaria, and Tyre.

733. He invades the northern portions of Palestine.

730 (about). Ahaz submits Judæa to Tiglath-Pileser II., who, in return, assists him against the kings of Damascus and Samaria.

723—721. Shalmaneser IV. besieges and takes Samaria. (*See* ISRAEL.)

721. Sargon usurps the throne. (*See* AROER.)

720. Battle of Rapikh or Raphia (*q. v.*).

715. Sargon subdues Arabia, and exacts tribute from the native wandering tribes.

709. He invades Babylon, which he conquers and places under an Assyrian viceroy.

708 or 7. The Kings of Cyprus and of Asmun, an island in the Persian Gulf, send embassies offering homage to Sargon.

702. Sennacherib invades Babylon, and plunders 76 large towns and 420 villages.

701. He annexes many cities in Zagros to Assyria.

700. He attacks Luliya, King of Sidon, marches into Egypt (*see* ALTAKU, battle), and invades the territories of Hezekiah, King of Judah, whom he compels to pay him heavy tribute, amassed by the spoliation of the temple at Jerusalem.

699. He again invades Babylon, where he establishes a viceroy.

698. He invades Palestine for the second time, and his army is miraculously destroyed (2 Kings, xix. 35).

695. Soon after this year Sennacherib wages war against the Greeks in Cilicia, and founds Tarsus.

680. Sennacherib is murdered while worshipping in a temple, by his sons Adrammelech and Sharezer, who are compelled to flee into Armenia, while their brother Esar-haddon succeeds to the throne.

634. The Medes fail in an attack upon Nineveh.

634. Cyaxares, King of Media, enters Assyria, and defeats the army of Asshur-emid-lilu, or Saracus. Shortly after this year Assyria and the other nations of Western Asia are devastated by the Scythians.

627. Assyria is simultaneously attacked, on the east by Cyaxares the Mede, and on the south by the Susianians.

625. Saracus (Sardanapalus), betrayed by his general Nabopolassar, and hard pressed by the forces of Cyaxares, burns himself in his palace at Nineveh. With him ends the line of monarchs, and the existence of Assyria as an independent nation.

Rawlinson (Ancient Monarchies, ii, 291), gives the following table of the

KINGS OF ASSYRIA.

B.C.	B.C.	
Circ. 1650 to 1550....		Asshur-bel-nisis. Bazur-Asshur. Asshur-yatila.

* * * * *

	B.C.	B.C.	
Circ	1450 (?)	.....	Bel-sumili-kapi.
	•	•	• • •
—	1350 to	1330....	Bel-lush.
—	1330 to	1310....	Pud-il (his son).
—	13 0 to	1490....	Iva-lush I. (his son).
—	1290 to	12 0....	Shalmaneser I. (his son).
—	12 0 to	1250....	Tiglathi-Nin (his son).
—	1250 to	1230....	Iva-lush II. (his son).
	•	•	• • •
—	12 0 to	1190....	Nin-pala-zira.
—	1190 to	1170....	Asshur-dah-il (his son).
—	1170 to	1150....	Mutaggil-Nebo (his son).
—	1150 to	1130....	Asshur-ris-ilim (his son).

—	680 to	667....	Esar-haddon (his son).
—	667 to	647 (?)	Asshur bani-pal (his son).
—	647 (?) to	625.	Asshur-emid-ilin.

ASTA, now ASTI, in Piedmont, was captured by the Gauls about B.C. 400. Alaric besieged it A.D. 403. It was taken and retaken several times during the struggles with the barbarians. It was made a bishop s see at an early period. Evasius, supposed to be the first bishop, suffered martyrdom Dec. 1, 265. The Emperor Frederick I. captured it A.D. 1154. The French obtained possession in 1387, and, after holding it nearly a century and a half, relinquished it to the Emperor Charles V., by the treaty of Cambray, 1529. Charles bestowed it upon Beatrice of Portugal, and by her marriage with Charles III. of Savoy it passed into the possession of that house.

ASTEROIDS.—(*See* PLANETS.)

ASTLEY S AMPHITHEATRE (London), a temporary building in 1774, was, in 1780, converted into a roofed amphitheatre, which, opened as the Amphitheatre Riding House, was destroyed by fire Aug. 17, 1794. Having been rebuilt and reopened in 1795, it was burned Sep. 2, 1803; and again June 8, 1841. The circus was removed and the building was converted into an ordinary theatre by D. Boucicault, and opened by him as the "New Westminster Theatre" in 1862. The old name was restored in 1864.

ASTON.—(*See* ASHDUNE.)

ASTORGA (Spain), "the city of priests," built on the site of the Asturica Augusta of the Romans, was taken by Almansor in 990, and recovered by Alphonso V. in 1010. The King of Navarre took it in 1033; and the French, after a desperate encounter, obtained possession April 12, 1810, when they dismantled the fortifications and committed great havoc. It was made the seat of a bishopric in the 3rd century. A council on discipline was held here Sep. 1, 946.

ASTRACAN (Russia), formerly the capital of a Tartar state, was taken by Ivan IV. in 1554. The Turks besieged it in 1569; and a rebellion broke out here in 1670. It is the seat of an archbishopric.

ASTROLABE.—This instrument for the observation of the stars is believed to have been first used by Hipparchus, who *fl.* B.C. 160—145, and it was also employed by his disciple Ptolemy, *fl.* A.D. 139—161. The modern astrolabe, called also a "Jacob's staff" (*q. v.*), from its similarity in form to the heads of the staves borne by pilgrims, was invented at Lisbon by two Jewish physicians, named Rotheric and Joseph, during the reign of John II. of Portugal (1481—1495), by whom it was first applied to maritime purposes. The term occurs in the "Margarita Philosophica," printed in 1496, and the first elaborate work on the subject is "Elucidatio Fabricæ Ususque Astrolabii," published in 1513. During the 16th and 17th centuries the term astrolabe was used to express the projection of a sphere upon a plane.

ASTROLOGY.—The Chaldæans, the Egyptians, the Hindoos, and the Persians cultivated this "illusory science;" and with the former it is supposed to have originated. By an edict issued at Rome, B.C. 139, the Chaldæans, or mathematicians, as the astrologers were then called, were banished from the city. The senate, in the reign of Augustus, expelled them from Italy A.D. 16. Sharpe (Hist. of Egypt, ii. 179), writing of the reign of Antoninus Pius (138—161), when Egypt was a Roman province, remarks on astrology:—"The poor Jews took to it as a trade. In Alexandria the Jewess, half beggar half fortune-teller, would stop people in the streets and interpret dreams by the help of the Bible, or sit under a sacred tree like a sibyl, and promise wealth to those who consulted her, duly proportioned to the size of the coin by which she was paid." Constantius (July 13, 358) made a law declaring astrologers to be the enemies of mankind. The Arabians were great astrologers. Prescott says, with reference to the Aztecs, "In no country, not even in ancient Egypt, were the dreams of the astrologer more implicitly deferred to. On the birth of a child he was instantly summoned. The time of the event was accurately ascertained; and the family hung in trembling suspense, as the minister of heaven cast the horoscope of the infant, and unrolled the dark volume of destiny." During the Middle Ages the practice became general. In the 13th and 14th centuries, astrology was taught in the Italian universities, whilst at Padua and Bologna professors of astrology were appointed. Many of our own early philosophers and men of science were captivated by this study. (*See* JUDICIAL ASTROLOGY).

ASTRONOMICAL SOCIETY.—(*See* ROYAL ASTRONOMICAL SOCIETY OF LONDON.)

ASTRONOMY.—This science was cultivated, before the Christian æra, by the Chaldæans, the Egyptians, the Hindoos, the Chinese, the Phœnicians, and the Greeks; and to each of the four first mentioned has its invention been attributed, whilst Josephus claims it for the Jews. There can be no doubt that it was

practised amongst the Chaldæans as early as the reign of King Urukh (B.C. 2093—B.C. 2070), as the position and construction of the numerous buildings he erected manifest an intimate knowledge of astronomical calculation. It was also cultivated by the Egyptians; and the great antiquity of the Hindoo observations is acknowledged by all astronomers. The claims of the Chinese on this point are not supported by satisfactory evidence. In Greece, Thales, born B.C. 636, who predicted an eclipse, was the earliest astronomer. He was followed by Anaximander, born B.C. 610; Anaximenes, fl. B.C. 556; and Anaxagoras, born B.C. 500. Pythagoras, born B.C. 580, greatly advanced the science. Meton and Euctemon introduced the Metonic cycle, B.C. 433. Aristotle, born B.C. 384, wrote a treatise on the subject; and Autolycus two books, the most ancient astronomical works that have come down to us. Hipparchus (B.C. 160—145) reduced it to a systematic form, and is the father of true astronomy. Ptolemy, called the "prince of astronomers," fl. A.D. 139—161, was the last astronomer of the Greek school. The science was revived by the Arabians, "who," says Hallam (Lit. Hist. vol. i. pt. i. ch. 2), "understood astronomy well, and their science was transfused more or less into Europe." The Caliph Al Mansur is said to have encouraged the study of this science; and Albategnius is the most celebrated of the Arabian astronomers. Alphonso X., of Castile, produced the Alphonsine tables in 1252. Little was accomplished until the appearance of Copernicus, who is justly termed the founder of modern astronomy. He was born at Thorn, in 1473, and published his celebrated treatise on the "Revolutions of the Heavenly Bodies," just before his death, in 1543. It was issued at Nuremberg, and the treatise, consisting of six books, is said to have been completed by the astronomer about 1530. Tycho Brahe (1546—1601), Hallam admits, "did far more in this essential department of the astronomer than any of his predecessors." He was the first to make a catalogue of the stars, and his new mundane system paved the way for the important discoveries of the 17th century. In 1582 Gregory XIII., by the aid of Lilius and Clavius, reformed the calendar. It is impossible in a small compass to explain even the chief results of the wonderful progress made in astronomical science since the commencement of the 17th century; but some of the more important are given in the following summary:—

A.D.
1581. Galileo remarks the isochronism of the pendulum.
1603. Bayer's maps, in which the stars are distinguished by letters.
1609. Galileo makes his telescope. Kepler publishes his work on Mars, containing what are called his *First and Second Laws*.
1610. Galileo announces discoveries of Jupiter's satellites; of spots on the moon; of nebulæ; of new phenomena in Saturn, which prove to proceed from the ring; and phases of Venus.
1611. Galileo observes spots on the sun.
1616. The Copernican theory is prohibited by the court of Rome.
1618. Kepler's *Third Law*.
1631. Gassendi observes the transit and measures the diameter of Mercury.
A.D.
1639. Transit of Venus is first observed by Horrox and Crabtree, and her diameter measured.
1654. Discovery of Saturn's ring by Huygheus.
1665. Cassini determines the time of rotation of Jupiter.
1666. Newton first turns his attention to gravitation.
1671. Richer observes the shortening of the seconds' pendulum on nearing the equator.
1675. Roemer announces his discovery of the velocity of light by means of Jupiter's satellites.
1687. Newton publishes the "Principia."
1705. Halley first predicted the return of a comet; viz., that of 1758.
1727. Bradley discovers aberration.—March 20. Death of Newton.
1731. Hadley's quadrant is invented.
1732. Maupertuis introduces the Newtonian theory into France.
1765. Harrison gains the Parliamentary reward for his chronometer.
1767. The first nautical almanack is published.
1781. Herschel discovers Uranus. (*See* GEORGIUM SIDUS.)
1784. Laplace's researches on the stability of the Solar System, &c.
1795. Separation of the Milky Way into stars by Herschel.
1806. Herschel suspects the motion of the whole Solar System towards the constellation Hercules.
1814. Piazzi's catalogue of 7,646 stars.
1820. Astronomical Society of London is founded.
1830-32. Sir J. Herschel's investigations of double stars.
1845. Lord Rosse completes his telescope.
1846. The planet Neptune (*q. v.*) is discovered by Adams and Le Verrier, who conducted their researches quite independently of each other.
1847. Herschel publishes the "Results of Astronomical Observations made at the Cape of Good Hope."
1850. Nebulæ are observed by Lord Rosse.
1853. Airy makes investigations respecting ancient eclipses.
1857. Photography is successfully applied to astronomical purposes.
1858. Annular eclipse of the sun is visible in England. Donati's comet appears with great splendour for several weeks.

(*See* PLANETS, &c.)

ASTURIAS (Spain).—An ancient province, to which, in 1833, the name of Oviedo, its chief town, was given. In its mountains the Gothic fugitives sought refuge on the invasion of Spain by the Saracens in the 8th century. The independence of the country was maintained by a race of native rulers, commencing with Pelayo, A.D. 716. Henry, eldest son of John I., assumed the title of Prince of Asturias in 1388; and from that period the heir apparent to the Spanish throne has been thus styled. The insurrection against the French (1808) commenced in the fastnesses of the Asturian mountains, which became the scene of many severe struggles. Its junta was the first organized in Spain, and thus, as Alison remarks, its inhabitants had "a second time the honour of having taken the lead in the deliverance of the peninsula."

ASUNDEN LAKE (Battle).—Sten Sture the younger, Protector of Sweden, was defeated and wounded by the Danes under Otho Krumpe, on the ice of this lake, near Bogesund, early in 1520. He died in his sledge on lake Malar while hastening to the defence of Stockholm, Feb. 3, 1520.

ASYLUM.—The earliest notice of a place of refuge for criminals is found in the command to Moses for the Jews to build six cities of refuge, for the manslayer, B.C. 1451 (Numbers xxxv. 6). A similar order was given to Joshua, B.C. 1444 (ch. xx.), on the entrance of the Jews into Canaan. Cadmus is said to have erected one at Thebes, B.C. 1493, and Rome at

its foundation was a general place of refuge. Some place of sanctuary existed amongst all ancient nations of which we have any record. On the introduction of Christianity, the custom was retained. Milman (Latin Christianity, vol. i. b. iii. ch. 5) states:—"The privilege of asylum within the Church is recognized in most barbaric codes. It is asserted in the strongest terms, and in terms impregnated with true Christian humanity, that there is no crime which may not be pardoned from the fear of God and reverence for the saints." It became a privilege of churches from the time of Constantine I. The altar was at first the sanctuary, until the privilege was extended to the other parts of the church. Theodosius regulated asylum by law, A.D. 392. When Alaric captured Rome, in 410, he ordered that all who took refuge in the churches should be spared. During the Middle Ages even convents, the dwellings of the bishops, the precincts of these places, the graves of the dead, hospitals, &c., were privileged in this respect. The canon law of Gratian and the Pope's Decretals granted protection to all except night and highway robbers, and offenders against the Church. The practice gave rise to various abuses, and many attempts were made to find a remedy. At the Reformation the system, as far as criminals were concerned, was abolished, though it continued to exist in a modified form, for the benefit of debtors, until abolished by 8 & 9 Will. III. c. 27 (1697). (*See* SANCTUARY.)

ATELIERS NATIONAUX.—(*See* NATIONAL WORKSHOPS.)

ATELLA (Italy) was the seat of a bishopric, which was transferred to Aversa about 1050. The French army, under Montpensier, capitulated to the Spaniards and Italians at this town, July 21, 1496. Philip of Commines denounces this surrender as ignominious, and compares it to the capitulation of the Romans at the Caudine Forks.

ATH.—(*See* AATH.)

ATHANASIAN CREED.—A confession of faith, so called because it was supposed to have been composed by Athanasius, Bishop of Alexandria, A.D. 326. The latest critics have, however, shown that it was not the work of Athanasius. By some it is ascribed to Vigilius Tapsensis, "an African bishop, who lived in the latter part of the 5th century, in the time of the Vandalic Arian persecution;" and by Dr. Waterland (Hist. of Athanasian Creed) it is attributed to Hilary, Bishop of Arles, in the 5th century. It was written chiefly against the Arians; and to the fact that Athanasius was their vigorous opponent may its peculiar designation be attributed.

ATHEISM.—Disbelief in the existence of a God has, apparently, existed to a greater or less extent since the antediluvian period, and is referred to by David, who states that, "the fool hath said in his heart there is no God." (Psalm xiv.) Atheism was professed by many of the Greek philosophers, especially by Epicurus (B.C. 342—B.C. 270), who taught that happiness is the sole end of life, and rejected all religious doctrines as antagonistic to the sensual pleasure in which he supposed it to consist. From Greece atheistic principles spread to Rome, where the poet Lucretius became their best known exponent and champion (B.C. 95 — B.C. 52). The early Christians were condemned as atheists by the Roman tribunals, because they denied the prevalent polytheism, and the term has been frequently applied in reproach to those whose opinions on theological subjects were unintelligible to the mass of mankind. During the Middle Ages atheistic principles became very general among speculative philosophers, and were attributed to Popes John XXII. or XXIII. (1410—1416), Alexander VI. (1492—1503), and Leo X. (1513—1522). Machiavelli (1469—1527), Lucilius Vanini, who suffered death for heresy at Toulouse in 1619, Thomas Hobbes (1588—1679), and Benedict Spinoza (1632—1677), are also charged with having professed atheistical opinions, which became so prevalent that it was alleged that no fewer than 50,000 atheists were living in Paris in the year 1623. In 1774 Dr. Priestley declared that all the philosophers and men of letters whom he met during a visit to France were absolute infidels, and in 1781 a Mr. William Hammon, of Liverpool, publicly declared himself an atheist. Atheism was established by the republican government in France from 1794, when Robespierre celebrated the festival of the God of Nature, to 1801, when the Roman Catholic religion was restored. (*See* DEISTS.)

ATHENÆA.—The sacred games celebrated annually at Athens, in honour of Athena or Minerva, the tutelary divinity of the city, when instituted by Erichthonius, B.C. 1495, or by Orpheus B.C. 1397, were called Athenæa, but after the union of the peoples of Attica by Theseus, B.C. 1234, they received the title of Panathenæa. (*See* PANATHENÆAN GAMES.)

ATHENÆUM CLUB (London) was founded in 1823. The club-house in Pall Mall was built in 1829 and opened in Nov., 1830.

ATHENREE (Battle).—The Irish were defeated here with great slaughter, Aug. 10, 1316.

ATHENS, the capital of Attica and the most celebrated city of ancient Greece, is said to have been first called Cecropia, from Cecrops, an Egyptian who built the original city on the Acropolis (*q. v.*), according to Hales, B.C. 1558; Usher, B.C. 1556; and Clinton, B.C. 1433. It received the name of Athens from the worship of Athena or Minerva, said to have been established by Erichthonius B.C. 1495. The legendary accounts give a succession of kings from Cecrops to Theseus, and with the latter the history of Athens as a state is declared by some writers to commence. Theseus ascended the throne, according to Hales, B.C. 1236; Usher, B.C. 1235; and Clinton, B.C. 1234. He united into one political body the 12 states into which Cecrops had divided Attica, and made Athens the capital. Codrus, the last king of the dynasty, sacrificed himself for the safety of Athens, B.C. 1070 according to Hales, or B.C. 1044 according to Clinton. Seventeen kings reigned during the monarchical period, and they were followed first by perpetual, then by decennial, and finally by annual archons (*q. v.*). Homer speaks of Athens as a place

of importance during the Trojan war (B.C. 1183).

B.C.
1069. Medon is made perpetual archon.
754. Alcmæon the last of the perpetual archons.
752. Charops the first decennial archon.
684. Eryxias, the seventh and last of the decennial archons, dies.
683. Nine annual archons are appointed, the title of archon being given only to the first. Creon first annual archon.
621. Compilation of Draco's Code (*q. v.*).
612. Cylon attempts to make himself master of Athens.
594. Solon remodels the constitution, and gives a new code to Athens.
562. Introduction of Comedy (*q. v.*).
560. Pisistratus usurps the government. Death of Solon.
554. Pisistratus is expelled.
535. Thespis first exhibits tragedy at Athens.
527. Death of Pisistratus.
514. Assassination of Hipparchus by Harmodius and Aristogiton.
510. Establishment of Ostracism (*q. v.*).
505. War between Athens and Sparta.
490. Battle of Marathon (*q. v.*).
487. War between Athens and Ægina (*q. v.*).
483. Banishment of Aristides.
481. A fleet of 200 ships is built at Athens. Ascendancy of Themistocles.
480. Athens is taken by Xerxes.
479. Mardonius burns Athens.
478. Themistocles rebuilds the city.
477. Commencement of the Athenian supremacy.
471. Banishment of Themistocles.
461. Ostracism of Cymon.
459. Athens asserts her supremacy over the other states of Greece.
457. The "Long Walls" of Athens are commenced.
456. Battle of Œnophyta (*q. v.*).
452. Truce between the Athenians and Peloponnesians for five years.
449. The Athenians defeat the Persians.
448. The Athenians assist the Phocians in the second Sacred War (*q. v.*).
447. Battle of Coronea (*q. v.*).
445. Thirty years' truce between Sparta and Athens.
444. Pericles is at the head of affairs.
440. Comedy (*q. v.*) is prohibited at Athens. The Samian war (*q. v.*).
439. Athens is at the height of its glory.
437. The law against comedy is repealed.
433. Alliance between the Athenians and the Corcyreans.
431. Commencement of the Peloponnesian war (*q. v.*), and invasion of Attica.
430. Plague at Athens. Second invasion of Attica.
429. Pericles dies of the plague.
428. Third invasion of Attica.
415. First Athenian campaign in Sicily.
414. The Athenians are defeated in the second campaign in Sicily.
413. The Athenian fleet and army are destroyed.
411. Government of the "Four Hundred."
407. Second and last banishment of Alcibiades. War with Sparta (*q. v.*).
406. Sea-fight of Arginusæ (*q. v.*).
405. Battle of Ægospotami (*q. v.*).
404. Athens is taken by Lysander. End of the Peloponnesian war. The rule of the Thirty Tyrants (*q. v.*), who are replaced by "the Ten."
403. Thrasybulus overthrows the government of "the Ten."
399. Death of Socrates.
394. Xenophon is banished from Athens.
393. Conon rebuilds the walls of Athens.
388. Plato founds the Academia (*q. v.*).
378. The Thebans and Athenians are allied against Sparta.
376. Athenian victory off Naxos.
374. Peace between Athens and Sparta.
371. General peace.
360. War between the Athenians and the Olynthians respecting Amphipolis.
359. Philip II. of Macedon makes peace with Athens.
357. Commencement of the Social War (*q. v.*).
355. The Social War terminates.
354. Philip II., in prosecuting the third Sacred or Phocian War (*q. v.*), takes Methone (*q. v.*), and enters Thessaly. He is stopped at Thermopylæ by the Athenians. Demosthenes delivers his first Philippic (*q. v.*).

B.C.
346. Peace between Athens and Macedon.
339. War breaks out between Philip II. and the Athenians.
338, Aug. 7. Battle of Chæronea (*q. v.*).
323. Commencement of the Lamian war (*q. v.*).
322. Submission of Athens to Macedon. Death of Demosthenes.
317. Cassander conquers Athens. Execution of Phocion on a charge of treason.
307. Demetrius restores the ancient constitution of Athens.
297. Demetrius falls in an attack upon Athens.
296. Demetrius besieges Athens.
295. Demetrius takes Athens.
287. Athens revolts from Demetrius.
277. Athens, Sparta, and Egypt are allied.
268. After a series of sieges, Athens surrenders to Antigonus Gonatus, King of Sparta.
229. Athens joins the Achæan League.
215. The Athenians and Ætolians unite against Macedon.
211. A Roman fleet arrives at Athens.
200. Athens and other Greek states join Rome against Philip V. of Macedon.
196. The Romans proclaim Athens free from the Macedonian power.
146. The Romans subdue Greece.
86. Athens is stormed by Sylla.

ATHENS (Modern).—This city sank into comparative insignificance early in the Christian æra. St. Paul visited it (Acts xvii. 5—34) in 51. At first a bishop's see, it became an archbishopric, and ultimately received the metropolitan dignity.

A.D.
267. Athens is besieged by the Goths.
395. It is taken by Alaric.
534. The walls are restored by Justinian.
1146. The city is plundered by Roger, King of Sicily.
1205. It is taken by Otho de la Roche, whom the Marquis of Montferrat makes Lord of Athens and Thebes, by the title of Grand Sire.
1311. It is conquered by the Catalans.
1394. It is bequeathed by Nerio Acciaiuoli to the church of St. Mary.
1456. The city is taken by Mohammed II., who thus puts an end to the domination of the Latins.
1466. It is taken by the Venetians.
1497. It is restored to the Turks.
1687. It is retaken by the Venetians.
1827. Insurrection of Greeks.—May 17. Siege and capture by the Turks.
1834. Athens is declared the capital of the modern kingdom of Greece.
1850, Jan. 18. It is blockaded by a British fleet. (*See* GREECE.)
1854. It is occupied by French and English forces.
1856. The French and English forces are withdrawn.
1862, Oct. 22. A revolution against King Otho takes place during the night, which results in his abdication. (*See* GREECE.)
1863, Oct. 30. King George I. enters Athens.

ATHERTON MOOR (Battle).—The parliamentary army, led by the Earl of Essex, was completely defeated here, June 30, 1643, by the royalist forces under the Marquis of Newcastle.

ATHLETIC SPORTS were highly prized by the classic nations of antiquity, and constituted an important feature of the Olympic and other games of the Greeks and Romans. Professional athletæ first appeared at Rome B.C. 186. An annual contest in running, leaping, and other athletic exercises between members of the universities of Oxford and Cambridge was instituted in 1864, and the first competition took place March 5, 1864. (*See* GLADIATORS, GYMNASIUM, GYMNASTICS, ISTHMIAN and OLYMPIC GAMES, &c.) The foundation-stone of a new hall for the use of the Turnverein—a society for the cultivation of athletic sports on the German system—was laid by torchlight in the St. Pancras Road, London, May 14, 1864.

ATHLONE (Ireland), called "the key of Connaught," a place of considerable strength, situated partly in Westmeath and partly in Roscommon, was besieged by William the Third's army in 1690. The siege was raised July 25. The attempt was renewed by Gen. Ginkell, afterwards Earl of Athlone, and the town was taken July 1, 1691.

ATLANTA (Battles).—The Federals, under Sherman, defeated the Confederates, under Hood, at this town in Tennessee in three engagements, fought July 20, 22, and 28, 1864. Sherman withdrew his forces, Aug. 30, intending to march southward; but, having defeated an opposing body of Confederates at Jonesborough, Sep. 1, and thereby compelled Gen. Hood to evacuate Atlanta, he caused that city to be occupied by Gen. Slocum, Sep. 2, and subsequently made it his own head-quarters. On commencing his march to Savannah, Nov. 12, he abandoned Atlanta, which was entered and burned by Gen. Corse Nov. 15.

ATLANTIC TELEGRAPH.—In 1854 Whitehouse commenced his researches on the possibility of the establishment of telegraphic communication between Europe and America, and March 7—10 in the same year Mr. C. Field summoned meetings at New York to consider the question. In 1856 soundings were made by the British and United States navies of the portion of the Atlantic across which it was proposed to carry the wires, and the Atlantic Tel graph Company was soon afterwards formed. Accordingly, 2,500 miles of cable were prepared, and stowed in equal quantities on board the English screw-steamer *Agamemnon*, and the American man-of-war *Niagara*. The latter commenced paying out her cable from Valentia, on the west coast of Ireland, Aug. 7, 1857, but the cable snapped, Aug. 11, when about 380 miles had been submerged, and operations were necessarily suspended. The two vessels again sailed from Queenstown, May 29, 1858, on an experimental trip, after which they returned to Plymouth, whence they set sail on Thursday, June 10, for the purpose of laying the cable. They reached the middle of the Atlantic June 26, and having joined their cables, commenced paying them out; but, after a series of breakages, they were compelled to return to Queenstown. They once more set sail from this port July 17, and, reaching the point of junction July 28, parted on the following day, the *Agamemnon* steering for Valentia, and the *Niagara* for Trinity Bay, Newfoundland. Both vessels arrived in safety at their respective ports Aug. 5, and the completion of the enterprise was announced Aug. 7. The first public despatch, a message from the Queen to President Buchanan, was received Aug. 17, from which day several communications passed between Europe and America, until Sep. 3, when the signals became unintelligible, and eventually ceased entirely. Scientific men having decided that the failure was due to causes which might have been guarded against, the Atlantic Telegraph Company resolved upon another venture, issued a prospectus, Dec. 20, 1862, and entered upon a contract with the Telegraph Construction and Maintenance Company in May, 1864, for the manufacture and submersion of a new cable. The *Great Eastern* steamship was chartered to lay this new line, and arrived in the Medway July 11, in order to undergo the alterations necessary for enabling her to carry her freight. The construction of the cable was commenced at Greenwich in September, the completed portions being conveyed to the *Great Eastern* by two government hulks in nine voyages. The operation of coiling the cable in the tanks on board the vessel began Jan. 20, 1865, and the cable itself was completed on Monday, May 29. The *Great Eastern* left the Thames with her cargo July 15, arriving July 19 at Valentia, where she was joined by the *Caroline*, carrying 27 miles of the shore end, which were successfully laid July 22. The splice with the main cable on board the *Great Eastern* was effected on Sunday, July 23, when the voyage and operation of paying out the cable were commenced. Signals having become unintelligible, July 24, it became necessary to pick up the portion of cable already submerged, which led to the discovery, July 25, of a fault caused by a piece of wire having pierced the coating of the cable, and thus opened a communication between the telegraphic wires and the sea. This defect having been remedied, the *Great Eastern* resumed her voyage, which proceeded without interruption till about midday on Saturday, July 29, when communications with the shore entirely ceased. The picking-up apparatus was again set to work, and a second fault was discovered, similar in character to the first, and apparently the result of malignant intention on the part of some ill-wisher to the enterprise. Operations were resumed July 30, and on the 31st the whole of the cable contained in the after tank was submerged. On Wednesday, Aug. 2, when the *Great Eastern* had steamed 1,062 miles from Valentia, and was only 606 miles distant from her journey's end, a third fault was discovered, and the operation of picking up was again in progress when the cable parted. Grapnels were immediately lowered, and on the following day a great resistance was encountered, which was regarded as an indication that they had taken hold; but in hauling them in the line broke, and the hooks, with whatever was attached to

them, sank in deep water. A buoy was secured near the spot where this partial success was attained, Aug. 4, and preparations were made for sinking another grapnel, which was supposed to have caught the cable, Aug. 7, but broke like the former during the process of hauling in, Aug. 8. Another buoy was placed, and on Thursday, Aug. 10, a third grapnel was lowered, but again without success. A fourth attempt was made, Aug. 11, when the grapnel again held and again broke before the weight was brought on deck. All the line having been exhausted in these successive failures, the *Great Eastern* turned her head towards England, where she arrived with the tidings of her unsuccessful voyage Aug. 17, 1865.

ATMOSPHERE.—Atmospheric air was supposed by the ancients to be a simple elementary body, and the experiments of their philosophers did not lead to the discovery of its real properties. The investigations of Anaximenes (B.C. 556), of Aristotle (B.C. 384—322), and of others, produced no great results. The weight of air and its pressure upon all bodies were first perceived by Galileo in 1564. Descartes probably went further in the same direction, but it was not demonstrated until Torricelli's successful experiment by the agency of quicksilver in 1643. Pascal fully confirmed the theory of atmospheric pressure in 1648. In spite, however, of these and other important discoveries, the ancient doctrine, that air was one of the four elements, continued prevalent till Dr. Priestley, in 1774, discovered oxygen gas, showing it to be a constituent of air. Azotic gas, the other constituent, was discovered soon after. Scheele and Lavoisier endeavoured to determine the volumes of each contained in the atmosphere, and Mr. Cavendish published, in the "Philosophical Transactions" for 1783, the results of experiments made the year before, by which the matter was settled with greater precision. Messrs. Glaisher and Coxwell ascended in a balloon for the purpose of making scientific observations of the atmosphere at great elevations, Sep. 5, 1862. They attained a height of six miles, when both were rendered nearly insensible from its intense coldness and rarity. Mr. Glaisher made ascents for a similar purpose in 1864 and 1865.

ATMOSPHERIC RAILWAY.—The application of atmospheric pressure as a motive power on railways was first suggested about 1812, and a plan was made public in 1825. A line, constructed to test the principle, between Kingston and Dalkey, near Dublin, was opened in 1843; and another, between Croydon and London, in 1845. (*See* PNEUMATIC RAILWAY.)

ATOMIC THEORY, in chemistry, sometimes called the doctrine of definite proportions, was first explained by Dr. Dalton, in 1803, in his "Manchester Memoirs." His "New System of Chemical Philosophy" appeared in three parts, in 1808, 1810, and 1829. The basis of the theory is found in a work "On the Affinities of Bodies," published by Wenzel, a German chemist, in 1777.

ATRA, or ATRÆ (Arabia).—This fortified town, dedicated by its inhabitants to the sun, was attacked by the Emperor Trajan A.D. 117. He was wounded in the assault, and his army, assailed by the Parthian archers, and confused by a violent storm of rain and hail, was compelled to retreat. El Hadir, the site of Atra, was visited and explored by Layard in 1840 and 1846.

ATREBATES.—This Belgic nation contributed 15,000 to the army that opposed Cæsar, B.C. 57, and participated in the rebellion of the Gallic tribes B.C. 52. They were subsequently subdued, and under the empire formed part of Belgic Gaul, and carried on a manufacture of woollen cloths. The modern Arras (*q. v.*) occupies the site of their chief city.

ATTAINDER.—The Norman laws provided that by attainder of treason or felony a person not only forfeited his land, but that his blood became attainted; by which his descendants, as well as himself, were for ever (*i.e.*, unless the attainder had been reversed) disqualified from inheriting property. The theory of constructive treason proved a source of great injustice in the days of arbitrary rule. Its severity was mitigated by 7 Wm. III. c. 3 (1695), an act which modified 25 Edw. III. stat. 5, c. 2 (1350); and 54 Geo. III. c. 145 (July 27, 1814), restricted disinheritance, except in cases of high treason, to the actual culprit. By 3 & 4 Wm. IV. c. 106 (Aug. 29, 1833), it was enacted that after the death of a person attainted, those tracing descent through him may inherit, unless the land should have escheated before Jan. 1, 1834.

ATTICA (Greece).—The early history of this political division of ancient Greece is involved in obscurity. Its capital, Athens, was, according to the traditional account, founded by Cecrops, a native of Lais, in Egypt, about B.C. 1558. (*See* ATHENS.)

ATTISBERG (Battle), fought near Zurich June 5, 1799, between the Austrians, led by the Archduke Charles, and the French, under Massena. The latter were victorious.

ATTORNEY, one who is appointed to act in place, or in *turn* of, another in the conduct of a suit. In early times, every suitor was obliged to appear in person, in obedience to the king's writ. After appearance, the courts of record had the power of allowing them to appear by attorney. Suitors could also have attorneys appointed by letters patent, under the great seal; but if these could not be obtained, the suitors were obliged to appear each day in court in their proper person. The Statute of Westminster II. c. 10 (13 Edw. I., 1285), gives to all persons the power of appointing an attorney without letters patent. In the poll-tax of 2 Rich. II. (1379), the legal profession were divided into four classes; from which it appears that the attorneys had by this time become a separate body. Attorneys are also mentioned as a distinct body of men in 4 Hen. IV. c. 18 (1402), whereby it is ordained that all attorneys should be examined by the justices, and by their discretions should be put in the roll. They were to be good, virtuous, and of good fame. Their discipline, mode of admission, and qualifications, have been regulated by a long series of statutes, down to the 6 & 7 Vict. c. 73 (Aug. 22, 1843), by which previous enactments were repealed, and the

present regulations established. Acting without proper qualification is punished as a misdemeanour.

ATTORNEY-GENERAL. — The records of 1278 furnish two instances of the appearance of an officer designated "attornatus regis." Another mode adopted at the time of describing this official was, "qui sequitur pro rege," or "Narratores pro rege." It is, therefore, certain that such an officer, appointed, probably, at first for special occasions only, was created some time before 1278. Foss (Judges of England, iii. 45) says,—"In most years two were regularly employed, who may be supposed to answer to our modern officers—the attorney and solicitor general. The latter title, however, had certainly not been then adopted; and, as far as I can find, was not used till the reign of Edward IV." The queen also had an attorney to attend to her separate interests. Holinshed mentions one killed in a fray in Fleet Street, April 13, 1458. Foss states that Lord Bacon was the first attorney-general elected a member of the House of Commons. This was in 1614.

ATTORNEYS-GENERAL OF ENGLAND.

A.D.

EDWARD I.

1277–8. William Bonneville.
1278–9. William de Gisclham.
1279–80. Gilbert de Thornton.
1280–1. Alan de Walkingham.
1281–2. John le Falconer.
1284–5. William de Seleby.
1286–7. William Inge.
1289–90. John de Boseo.
Nicholas de Warwick.
John de Haydell.
1291–2. Richard de Breteville.
Hugh de Louther.
1292–3. Roger de Hegham.
1293–4. John de Mutford.
1300–1. John de Chester.
1304–5? John de Drokenesford.

EDWARD II

1307–8. John de Chester again.
1309–10. Mathew de Scaccario.

1859.	June 18.	Richard Bethell again.
1861.	June 27.	William Atherton.
1863.	Oct. 2.	Roundell Palmer.

ATTRACTION.—Thales discovered the attractive power of amber, when excited by rubbing, B.C. 600. Pythagoras, born B.C. 580, and Anaxagoras, born B.C. 499, had some knowledge of this principle as the source of the stability of the heavenly bodies; but it was first scientifically understood by Copernicus, whose system of astronomy was completed in 1530. Dr. Gilbert, of Colchester, taught, in 1590, that the earth exerts in all its parts great attractive power; and Kepler, in 1609, applied the same principle to the explanation of the motions of the planet Mars by the phenomena of the tides. Sir Isaac Newton's researches into the subject of attraction commenced in 1666, and the result was published in the "Principia" in 1687, in which he developed his theory of gravitation. (*See* ELECTRICITY, GRAVITATION, MAGNETISM, &c.)

AUBAINE.—This right, by which the sovereigns of France claimed the property of a stranger who had died in their dominions without having been naturalized, was abolished by laws dated Aug. 6, 1790, and April 13, 1791; confirmed by a constitutional act Sep. 3, 1791. It was re-established in 1804; and finally abolished July 14, 1819.

AUBEROCHE (Battle).—Fought between the English and French before this place, in France, Aug. 19, 1344, in which the former, although greatly inferior in point of numbers, were victorious; the loss of the French amounting to 7,000 slain and 1,200 prisoners.

AUBIN DU CORMIER, ST. (Battle).—Fought at this place, in Britanny, between the Bretons and the French, July 28, 1488. The latter gained the victory, and St. Aubin fell into their hands. The Prince of Orange and the Duke of Orleans were made prisoners. A body of English archers, 400 in number, commanded by Lord Woodville, were cruelly put to death after the battle.

AUCKLAND (New Zealand), the capital, was founded Sep. 19, 1840. Capt. Hobson, the first governor of the colony, arrived in January, 1841. It was resolved to transfer the seat of government to Wellington (*q.v.*), Dec. 24, 1864.

AUCTION.—This mode of sale was common amongst the Romans. Petronius gives the following caricature of the handbill of a Roman auction:—"Julius Proculus will make an auction of his superfluous goods to pay his debts." In the 13th century the crier, called cursor, stood under a spear, as amongst the Romans. By 19 Geo. III. c. 56, s. 3 (1779), an auction is defined,—"a sale of any estate, goods, or effects, whatsoever, by outcry, knocking down of hammer, by candle, by lot, by parcel, or by any other mode of sale at auction, or whereby the highest bidder is deemed to be the purchaser." Duties were first levied on auctions by 17 Geo. III. c. 50 (1777). Increased and extended to Ireland in 1797; and again increased by 45 Geo. III. c 30 (April 5, 1805); they were repealed by 8. Vict. c. 15 (May 8, 1845), which imposed upon auctioneers the necessity of taking out a license.

AUDIANS, or AUDÆANS, a Christian sect, so called from Audius, Audæus, or Udo, a native of Mesopotamia, who was prosecuted by the Syrian clergy, because he censured their irregular lives.

In revenge, he was ejected from the Syrian Church, and banished to Scythia, where he died A.D. 370. His followers celebrated Easter on the same day as the Jewish passover, contrary to the decree of the Council of Nicæa in 325; and they maintained that God had a human form, and that man was created after his image. From the former doctrine they have been called *Quartodecimarians*, and from the latter *Anthropomorphites*. Theodosius I., in 385, decreed death against those who dared to perpetrate the atrocious crime of celebrating Easter on an improper day. Only a small number of Audians remained after the year 377, and they dwelt in cabins and monasteries near Antioch. By the 5th century they had become extinct. They are also called Ardæans, and their founder Ardæus.

AUDIENCIA REAL. — A great council appointed to assist the viceroys in the Spanish colonies in the administration of civil affairs. Venezuela threw off the authority of this tribunal July 8, 1810, establishing in its stead a popular junta, and her example was speedily followed by the other colonies of South America.

AUDIT OFFICE. — This department was established at Somerset House by 25 Geo. III. c. 52 (1785), to provide for the proper audit and examination of the public accounts. Commissioners were appointed to audit the colonial revenues by 2 Will. IV. c. 26 (April 9, 1832), and the accounts of Ireland were brought within the jurisdiction of the Commissioners of Audit for Great Britain by 2 & 3 Will. IV. c. 99 (Aug. 9, 1832).

AUDLEY'S REBELLION.—(*See* FLAMMOCK'S REBELLION.)

AUERSTADT (Battle). — Marshal Davoust, at the head of the French army, defeated the Prussians, under Marshal Blucher, at this plateau in Prussia, Oct. 14, 1806. The Duke of Brunswick, who led the infantry, was mortally wounded. The Prussians lost 10,000, and Davoust 7,500 men. This battle, with that of Jena (*q. v.*), fought the same day, placed Prussia completely at the mercy of the French.

AUFIDENA (Italy).—This ancient city of the Samnites was carried by assault by the consul Cn. Fulvius, B.C. 298. A Roman colony was established here by Julius Cæsar B.C. 45.

AUGHRIM, or AGHRIM (Battle).—Fought near this place, in Ireland, Sunday, July 12, 1691. The troops of William III., commanded by Gen. Ginkell, gained a complete victory over the army of James II. The chief result was the submission of Ireland to William III.

AUGMENTATION OF POOR LIVINGS.—(*See* QUEEN ANNE'S BOUNTY.)

AUGMENTATIONS, called "The Court of the Augmentations of the King's Revenues," was established by 27 Henry VIII. c. 27 (1535), to take cognizance of suits and controversies arising out of the suppression of monasteries. It consisted of a chancellor, treasurer, attorney, solicitor, 10 auditors, 17 receivers, a clerk, an usher, and a messenger. It was suppressed by letters patent, re-established, and was annexed to the Court of Exchequer by 1 Mary, sess. 2, c. 10 (1553), and revived by 1 Eliz. c. 4 (1558). The records of the court may be searched on payment of a fee, by 1 & 2 Vict. c. 94 (Aug. 10, 1838).

AUGSBURG (Bavaria).—Founded by Augustus about B.C. 14, after the conquest of Rhætia by Drusus, and called Augusta Vindelicorum, was pillaged by the Huns about the middle of the 5th century. Charlemagne destroyed it in 788. It was restored, and enjoyed the rights of a free and imperial city from 1276—1806. Marshal Villars captured it Sep. 18, 1703; the Elector of Bavaria in December of the same year; and Marlborough retook it in 1704. It was taken by the French Oct. 10, 1805, and delivered by them to the Bavarian authorities in March, 1806. The bishopric is very ancient. Councils were held at Augsburg Aug. 7, 952, and Feb., 1051. The academy of painting was founded in 1712.

AUGSBURG CONFESSION. — This celebrated confession of faith, compiled by Melancthon, and revised by Luther and other reformers, was read before the diet of Augsburg, June 25, 1530. It consisted of 28 articles, seven of which contained refutations of Roman Catholic errors, and the remaining 21 set forth the leading tenets of the Lutheran creed. Soon after its promulgation, the last hope of inducing the pontiff to reform the Roman Catholic Church was abandoned, and the complete severance of the connection followed. An answer by the Roman Catholics was read Aug. 3, 1530; and the Augsburg diet declared that it had been refuted. Melancthon drew up another confession somewhat different. The first is called the unaltered, and the second the altered confession.

AUGSBURG DIET.—The most celebrated of the numerous diets held at this place was that of 1530. As Pope Clement VII. refused to call a general council for the settlement of all religious disputes, to be held in some German town, in accordance with the recess of the diet of Spires in 1529, the Emperor Charles V. summoned another diet at Augsburg, which met June 20, 1530. The confession (*q. v.*) was read June 25, and an answer by the Roman Catholics Aug. 3, whereupon it was proclaimed that the Protestants must conform in all points to the Church of Rome. Philip of Hesse withdrew Aug. 6, and John, Elector of Saxony, asked leave to depart Sep. 20. Charles V. soon after delivered his decision, in which he gave the Protestants till April 15 to re-unite themselves to the Roman Catholic Church, during which period they were to attempt no further innovations, to publish no new religious works, and to allow their Roman Catholic subjects free use of their worship, and to repress Anabaptists and Sacramentaries. The Emperor engaged to induce the Pope to summon a national or general council. This decision met with resistance, and a recess was issued Nov. 22, in which the emperor announced his intention to execute the edict of Worms, made some severe enactments against the Protestants, and re-constituted the Imperial Chamber. The Protestant deputies put in a counter declaration, and the diet separated.

AUGSBURG INTERIM. — This document

was drawn up by order of the Emperor Charles V., with a view to the settlement of the religious differences in Germany. It was the joint production of John Agricola, Julius Pflug, and Michael Heldingus, commonly called Sidonius, from his bishopric. The code, consisting of 26 articles, most of them in favour of the Roman Catholics, was read before a diet at Augsburg May 15, 1548, and having failed to produce the desired effect, was at length withdrawn.

AUGSBURG LEAGUE.—Concluded at Augsburg July 9, 1686, for the maintenance of the treaties of Münster and Nimeguen, and the truce of Ratisbon. It was negotiated by William Prince of Orange, June 21, 1686, for the purpose of resisting the encroachments of France. The contracting parties were the Emperor Leopold I., the Kings of Spain and Sweden, the Electors of Saxony and Bavaria, the Circles of Swabia, Franconia, Upper Saxony, and Bavaria. The League was to be in force three years, and might be renewed. England acceded to it in 1689.

AUGURY, supposed to be of Asiatic origin, was received by the Romans from the Etruscans. The story of the rival pretensions of Romulus and Remus, to be decided by the flight of birds, B.C. 753, is well known. Romulus instituted four augurs, and Numa Pompilius increased the number to six, and established them as an order B.C. 716. The Romans never embarked in any important enterprise without consulting the augurs, and one of them always attended upon the consul when commanding an army. In B.C. 307 the number of augurs was increased to nine, five plebeians being associated with four patricians. Sylla increased the number to 15, B.C. 81. Augustus, B.C. 29, obtained the right of electing augurs at his pleasure. Theodosius I. (the Great) abolished the office of augur A.D. 390. Gibbon (iii. ch. 28) remarks:—"Fifteen grave and learned augurs observed the face of the heavens, and prescribed the action of heroes according to the flight of birds."

AUGUST.—By a decree of the senate, B.C. 30, the name of this month was changed from Sextilis to August, in honour of the Emperor Augustus, who extended the number of its days from 30 to 31.

AUGUSTA PRÆTORIA.—(*See* AOSTA.)

AUGUSTALIA, or AUGUSTALES. — This festival, in honour of the birthday (Sep. 23, B.C. 63) of Augustus, was established by a decree of the Roman senate, B.C. 11. The term is applied to games celebrated in honour of Augustus at Rome, Neapolis, Alexandria, and other cities.

AUGUSTAN ÆRA, named after Augustus, began Feb. 14, A.U.C. 727, or B.C. 27.

AUGUSTENBURG (Denmark).—The castle at this town, on the isle of Alsen, erected in 1651, is the seat of the ducal family of Augustenburg, a branch of the house of Holstein. Prince Christian Charles Augustus of Augustenburg, born in 1786, and nominated in 1809 Crown-Prince of Sweden, died immediately on his arrival in that country, in 1810, it is believed by poison. In consideration of the sum of $3,500,000, Prince Christian signed an act, Dec. 30, 1852, renouncing for himself and family all right to the succession of any part of the Danish kingdom. After the death of Frederick VII., Prince Frederick of Augustenburg published a claim to the succession in Sleswig-Holstein, Nov. 16, 1863. (*See* DENMARK.) —The contract for the marriage of the Princess Helena with Prince Christian of Augustenburg, younger brother of the claimant to the duchies, was sanctioned by Queen Victoria in council, Dec. 5. 1865.

AUGUSTINE FRIARS, also called AUSTINS, or EREMITES.—Their origin is uncertain. Pope Alexander IV. is said to have collected several bodies of hermits and placed them under the common rule of St. Augustine in 1256. Lanfranc of Milan was their general. Much controversy has been excited respecting the date of their introduction into England. A small body is said to have settled at Woodhouse, in Wales, in 1252. Humphrey Bohun, afterwards Earl of Hereford and Essex, gave them a house and a church in London in 1254. They had about 32 houses in England and Wales when the monasteries were suppressed at the Reformation.

AUGUSTINES, or the Canons of the order of St. Augustine, sometimes called Austin Canons, because they pretended to follow the rule of St. Augustine, or Austin, Bishop of Hippo, in Africa, A.D. 395. They were little known until the 11th century, and did not assume the name until a later period. It is generally believed that they came into England in the reign of Henry I., about 1105. Stevens states that they did not take any vows until the 12th century, and that they assumed the name of Regular Canons of St. Augustine, when Innocent II., at the tenth general council, that of Lateran, in 1139, placed all regular canons under his rule. There were canonesses of this order, which had about 175 houses in England and Wales at the time of the suppression of the monasteries.

AUGUSTODUNUM.—(*See* BIBRACTE.)

AULDEARN (Battle). — The Covenanters were defeated at Auldearn, or Alderne, near Inverness, by the Earl of Montrose, May 9, 1645.

AULIC COUNCIL.—Soon after the establishment of the Imperial Chamber by the diet of Worms, in 1495, Maximilian I. instituted an Aulic Council at Vienna. The judges were appointed by the emperor. "The Aulic Council," says Hallam, "had, in all cases, a concurrent jurisdiction with the Imperial Chamber; an exclusive one in feudal and some other causes. But it was equally confined to cases of appeal; and these, by multiplied privileges *de non appellando*, granted to the electoral and superior princely houses, were gradually reduced into moderate compass." This court underwent various modifications. An edict for its regulation was issued by Ferdinand III. in 1654. During the wars between Austria and Napoleon I. the Aulic Council directed the military affairs of the empire. Its interference with the plans of the generals frequently proved disastrous. The Aulic Council was abolished on the formation of the Confederation of the Rhine in 1806, but was

revived on the renewal of the struggle against Napoleon I.

AURAY (Battle), was fought near this town, in France, Sep. 29, 1364, between a French army, 4,000 strong, led by Charles de Blois and Bertrand du Guesclin, and some English and Breton forces, amounting to 2,500, under the command of the Count de Montfort and Sir John Chandos. Bertrand was defeated and taken prisoner, Charles de Blois was killed, and the results of the victory were the capture of Auray, Dinan, and other towns, and the conclusion of a peace at Guerrande, April 13, 1365. The French lost 1,000 men in the battle, and their army was dispersed, whilst only 20 fell on the other side.

AUREOLA.—(*See* NIMBUS.)

AURICULAR CONFESSION.—The practice of private confession of sins to the priest arose at an early period of Christianity, and was frequently condemned by the primitive Church. The penitent in Anglo-Saxon times was required to say to the priest (Thorpe, Ancient Laws and Institutes of England, p. 404), "I confess to thee all the sins of my body, of skin, of flesh, and of bones, and of sinews, and of veins, and of gristles, and of tongue, and of lips, and of gums, and of teeth, and of hair, and of marrow, and of everything, soft or hard, wet or dry." It was established in the Roman Catholic Church by the decision of the twelfth general council (fourth Lateran), in 1215, and confirmed by that of Trent, 1545—1563. The former decreed it to be heresy for any one to assert that it was sufficient to confess sins to God, without making confession to a priest. It was abolished in England at the Reformation. Attempts have been made by members of the Tractarian party to revive the practice in the Anglican Church; and in 1858 a clergyman was suspended from his office on this account.

AURIFLAMMA.—(*See* ORIFLAMME.)

AURORA BOREALIS.—Pliny the Elder (A.D. 23 — 79) declares this phenomenon of nature was greatly dreaded, and speaks of one appearance as exhibiting daylight in the night. Extraordinary displays were seen in Spain, Portugal, Holland, France, and Great Britain, Aug. 31, 1769, and Feb. 29, 1780. The aurora borealis seen Oct. 24, 1847, one of the most brilliant ever witnessed in this country, was preceded by great magnetic disturbance.

AUSTERLITZ (Battle).—Fought near a small town of this name, in Moravia, Dec. 2, 1805, and called "the battle of the three emperors," because the French were commanded by Napoleon I., and the Austrians and Russians by the Emperors Francis II. and Alexander I. The French army numbered 90,000, and that of their opponents 80,000 men. The former proved victorious, and the armistice of Austerlitz was signed Dec. 6. It led to the breaking up of the third coalition, and the conclusion of the treaty of Presburg (*q. v.*).

AUSTINS.—(*See* AUGUSTINE FRIARS.)

AUSTRALASIA, the fifth great division of the world, comprises several of the islands lying in the Indian and Pacific Oceans. The most important are Australia, or New Holland; Van Diemen's Land, or Tasmania; Papua, or New Guinea; New Zealand, New Britain, New Caledonia, the New Hebrides, and Solomon's Archipelago. The first discovery made by Europeans in this quarter of the globe was that of Papua (*q. v.*), by the Portuguese, in 1512.

A.D.
1528. Saavedra, a Spaniard, lands in Papua.
1529. Saavedra visits Papua a second time.
1537. An expedition, sent by the Viceroy of Peru, lands in Papua.
1542. Gaetano discovers one of the Sandwich Isles (*q. v.*).
1567. Mendana discovers New Georgia, or Solomon's Island.
1603. The New Hebrides (*q. v.*) are discovered by the Spaniards.
1606, March. The Dutch sight Australia (*q. v.*).—June, Torres, a Spaniard, passes through the strait named after him in 1762, separating Australia from New Guinea. He also discovers islands in the Louisade Archipelago.
1642. Tasman discovers Van Diemen's Land (*see* TASMANIA) and New Zealand (*q. v.*).
1644. Tasman's second voyage to Australia.
1700, Feb. 27. Dampier discovers the island of New Britain (*q. v.*).
1767. Carteret discovers New Ireland (*q. v.*).
1772. Kerguelen, or Desolation Island (*q. v.*) is discovered.
1773. Furneaux discovers Adventure Bay (*q. v.*).
1774. Cook visits the New Hebrides.—Sep. 4. He discovers New Caledonia.
1789. Banks's Island, to the north of the New Hebrides, is discovered by Bligh.
1798. Bass, in the *Norfolk*, explores the strait bearing his name.
1799. Flinders circumnavigates Van Diemen's Land.

AUSTRALIA, or NEW HOLLAND.—The discovery of this, the largest island in the world, called by the Dutch Terra Australis, by the Spaniards Terra Australis del Espiritu Sancto, and in the earliest maps Java la Grande, or Great Java, has been claimed by the French for Capt. Binot Paulmier de Gonneville, in 1504. Recent researches have proved that it was the coast of Madagascar, and not that of Australia, upon which this French navigator was driven. Magellan is said to have discovered it during the voyage made in the *Victoria* in 1520, but the claims of these early discoverers are not supported by satisfactory evidence. There is, however, little doubt that Australia was discovered previous to the year 1540, and the Portuguese are supposed to be entitled to the honour of this discovery, of which no record remains. The Dutch, Nov. 18, 1605, despatched the yacht *Duyphen*, from Bantam, to explore the islands of New Guinea, and during the voyage, about March, 1606, they sighted the coast of Australia. In June of the same year it was seen by Torres, a Spanish navigator, when passing through the straits that bear his name; yet neither of these enterprising men was aware of the importance of the discovery. Between the years 1616 and 1705 several expeditions were sent by the Dutch in this direction, and various portions of the Australian coast were explored. Much information will be found in "A History of the Discovery and Exploration of Australia," by the Rev. J. E. Tenison Woods, 1865. In 1770 Capt. Cook gave the name of New South Wales to a part of the island, and in 1829 Western Australia, or Swan River, was founded. Other provinces have since been erected into separate colonies, and Australia contains the following divisions:—1. New South Wales; 2. Western Australia, or Swan River; 3. South Australia;

4. Victoria, or Port Phillip; 5. Queen's Land, or Moreton Bay.

A.D.
1616. Hartog makes discoveries in what is now called West Australia.
1618. Zeachen makes discoveries in what is now called North Australia.
1619. Von Edels makes discoveries in what is now called West Australia.
1627. Nuyt's Land is discovered by the Dutch.
1628. De Witt makes discoveries, to which his name is given, in what is now called Northern Australia.
1642, Aug. 14. Tasman sails from Batavia with two vessels, on his first voyage of discovery, to Australia.—Nov. 22. Discovers Tasmania (*q. v.*).—Dec. 1. Lands, and names it Van Diemen, after the Governor of Batavia.
1644. Tasman's second voyage to Australia.
1688, Jan. 4. William Dampier, the first Englishman to visit Australia, lands on the eastern coast.—Feb. 12. Dampier sails from Australia.
1696, Dec. 25. William Vlamingh, a Dutch navigator, sights the southern coast of Australia.
1697, Jan. 5. Vlamingh lands on the Australian continent.
1699, Jan. 14. W. Dampier sails for Australia a second time.—Aug. 1. He sights the coast of Australia.—Aug. 31. Lands on one of the group called Dampier's Islands.
1705, April—July 14. The Dutch explore the north-west coast of Australia.
1727, June. A Dutch vessel, the *Zeewyk*, is wrecked on what is now called Gun Island.
1770, April. Capt. Cook sails along the south-east coast of Australia; lands at a spot which he calls Botany Bay (*q. v.*); and takes formal possession of the country by the name of New South Wales (*q. v.*).
1772. Marion, a French navigator, visits Tasmania.
1773, March 9. Furneaux reaches Tasmania.—March 25. Capt. Cook sights New Zealand on his second voyage.
1774, Nov. 10. After making various discoveries, and visiting different parts of Australia, Capt. Cook sails from New Zealand.
1777. Capt. Cook arrives in Adventure Bay (*q. v.*) on his third voyage.
1787, May 13. The English Government having determined to send convicts to Australia, a fleet of 11 ships, carrying 558 male and 318 female convicts, and about 200 soldiers, with their wives and children, sails from Plymouth.
1788, Jan. 3. The fleet arrives off the coast of Australia, and all the convicts are soon after safely landed at Port Jackson, near Botany Bay. La Perouse, the French navigator, arrives with two ships, the *Boussole* and the *Astrolabe*.—Jan. 26. Capt. A. Phillip, the first governor, founds Sydney (*q. v.*).—Mar. 10. La Perouse quits the coast of Australia. Governor Phillip goes on several exploring tours.
1790. The colonists are in danger of perishing from starvation, caused by the loss of the storeship *Guardian*.
1791. Vancouver makes some important discoveries.
1792, April 21. Two French vessels, under Admiral D'Entrecasteaux, despatched in quest of the lost expedition of La Perouse, anchor off Storm Bay, Tasmania.
1793. The first church is erected.
1795. The first printing-press is established.—Sep. Bass and Flinders arrive at Port Jackson, and ascend the George's River in a small boat named *Tom Thumb*.
1797, Dec. 3. Bass commences a short voyage of discovery.
1798, Oct. 7. Bass and Flinders sail in the *Norfolk*.—Oct. 11. They anchor in Twofold Bay.—Oct. 17. They reach Kent's Islands.—Nov. 4. They sight the north coast of Tasmania, and discover Port Dalrymple.—Dec. 4. They discover Bass's Straits (*q. v.*), thus establishing the fact that Australia and Tasmania are distinct islands.
1799, Jan. 12. They return to Sydney.—July 8. Flinders starts on another expedition.—July 15. He discovers Moreton Bay (*q. v.*), which he explores.
1800, Jan. The brig *Lady Nelson*, under Lieut. Grant, is sent from England as a surveying ship.—Dec. 3. He discovers Cape Northumberland.
1801, July 18. Flinders sails from Spithead in the *Investigator*.—Dec. 6. He reaches Cape Leeuwin.

A.D.
1802, Feb. 16. Flinders passes Point Sir Isaac, and discovers Port Lincoln, whence he sails Mar. 6.—Mar. 21. He discovers Kangaroo Island (*q. v.*).—April 26. He reaches Cape Schanck.—May 9. He returns to Port Jackson, having explored the south coast.—July 22. He sets sail on an expedition to the north-west coast.—Nov. 4. He reaches the gulf of Carpentaria, which he explores.—Nov. 17. He discovers Sweer's Islands.—Dec. 1. Discovery of Wellesley's Islands.—Dec. 31. He sights Cape Maria Island.
1803, June 9. Flinders returns to Port Jackson. The *Sydney Gazette* is published by authority. A settlement is formed at Port Phillip (*q. v.*).
1804. The Irish rebellion is suppressed.
1808. Governor Bligh is deposed by the colonists for his tyranny, and sent home.
1813. Lieut. Lawson, and Messrs. Wentworth and Blackland, cross the Blue Mountains.
1817, May 1—Aug. 29. Lieut. Oxley partially explores the rivers Lachlan and Macquarrie.—Dec. 22. The *Mermaid*, Capt. King, is despatched by Government to survey the north-west coast.—Hume discovers lake Bathurst.
1818, May 18. Oxley leaves Bathurst to explore the Macquarrie River.—July 28. King arrives at Port Jackson, having explored Van Diemen's Gulf, and discovered several rivers and inlets on the northern coast.—Nov. 5. Oxley's expedition terminates at Newcastle, on the Hunter River, having resulted in the discovery of Liverpool plains.
1819, May. King starts on a second voyage.
1820, Jan. 12. He reaches Sydney, having explored 540 miles of the northern coast.—June 14. King commences his third voyage.—Sep. 6. He is forced by the leaky state of his vessel to return to Sydney without having made any important discovery.
1821, May 26. King commences his fourth voyage, in the *Bathurst*.—Departure of Governor Macquaire, under whose rule the convicts were well treated, and assisted to retrieve their character and obtain a position.
1822, Mar. 25. King returns to Sydney, having explored a large extent of the north-west coast.
1823, June 1. Capt. Currie and Gen. Owens discover the Murrumbidgee River.—Oxley discovers the Brisbane River.
1824, Oct. 2. A settlement is formed on Melville Island, on the north coast.—Oct. Hovell and Hume commence their overland exploration.—Nov. They discover the Australian Alps.—Nov. 15. They discover the Hume or Murray River, and, a few days afterwards, the Ovens River.—Dec. 3. They cross the Goulburn River.—Dec. 9. They second Mount Disappointment.—Dec. 18. They reach the limit of their exploration, and commence their return.—The Legislative Council is established this year.
1825, Jan. 18. Hovell and Hume return to lake George.
1826. The north coast settlement is removed from Melville Island to Raffles' Bay.
1827, June 5. Cunningham discovers Darling Downs.
1828. Capt. Stirling surveys the coast from King George's Sound to Swan River (*q. v.*).—Nov. 10. Capt. Sturt commences his first expedition.
1829, Jan. Sturt discovers the Darling River.—April 21. He returns to Wellington Valley.—Sep. 25. Sturt's second expedition reaches the Murrumbidgee.
1830, Jan. 14. He discovers the junction of the Murrumbidgee with a larger river, which he calls the Murray, but which had been previously named the Hume.—Jan. 23. He discovers the junction of the rivers Murray and Darling.—Feb. 13. Having traced the Murray to lake Alexandrina, and thence ascertained its innavigable outlet into the ocean at Encounter Bay, he commences his return journey.
1831. Mitchell explores South Australia and Eastern Australia.
1835, March 9. Mitchell commences his second expedition.—May 25. He reaches the Darling.—July. He is compelled by the natives to return to Sydney.
1836, March 17. Mitchell's third expedition starts. He returned in October, having traversed 2,400 miles, and explored Australia Felix.—July 27. Settlement of Adelaide (*q. v.*).
1837, Oct. Capt. Grey leaves the Cape of Good Hope on an expedition to North-western Australia.—Dec. 2. He reaches Port George the Fourth.

A.D.
1838, April 16. Grey's expedition terminates at Hanover Bay. Eyre discovers lake Hindmarsh, into which the waters of the Wimmera discharge themselves.
1839, Feb. 25. Grey commences his second expedition at Bernier Island.—March. Bonney journeys overland from Portland Bay to Adelaide. Grey discovers the Gascoyne River.—April 21. He reaches Perth, Swan River. Wickham explores the Victoria River.
1840, Feb. 15. Count Strzelecki ascends the Australian Alps.—June 18. Eyre commences his overland exploration of Western Australia.—July 30. Stokes enters the Albert River.
1841, Feb. 23. Eyre, having sent back all his party except Mr. Scott and three native boys, resumes his journey.—April 29. Scott is murdered by two of the native guides. Eyre, attended only by the third guide, and 600 miles distant from any settlement, continues his journey.—June 2. Signals the French whaler *Mississippi*, and obtains relief from the captain.—July 7. After enduring extreme hardships, Eyre reaches Albany.
1843. Landor and Lefray explore Western Australia.
1844, Aug. Dr. Leichhardt's expedition leaves Moreton Bay. — Sep. 24. Sturt leaves the Darling on another expedition.
1845, Sep. 6. Sturt, having travelled within nearly 150 miles of the centre of the continent, is compelled by drought to return.—Nov. 17. Sir Thomas Mitchell's expedition leaves Paramatta.—Dec. 17. Leichhardt reaches Port Essington, having journeyed overland upwards of 3,000 miles.
1846, Aug. 7. The brothers Gregory set out from Bolgart Spring.—Sep. 9. They discover coal deposits on the Arrowsmith River. — Sep. 22. They return, having penetrated 953 miles into Western Australia.—Sep. 28. Mitchell reaches the limit of his exploration of the Upper Barcoo.
1847, March. Kennedy starts from Sydney on his first expedition.—Aug. 13. He reaches the limit of Mitchell's exploration of the Barcoo.—Sep. 19. He is compelled by want of water to return.
1848. Leichhardt starts early in the year, intending to traverse the continent from east to west.—April 3. He dates a letter from M'Pherson's station, Cogoon, and is never heard of afterwards.—April 29. Kennedy's second expedition sails from Sydney.—May 30. He lands at Rockingham Bay, on the north-east coast, and commences his journey overland.—Sep. 9. A. C. Gregory sets out from Western Australia to search for pasture-land, &c. —Sep. 14. Roe's expedition starts from York, in Western Australia.—Oct. 18. He commences the ascent of the Pallinup River. — Nov. 13. After much hardship and disappointment, Kennedy, with three white men and Jackey Jackey, a native, leave the main body and endeavour to push their way to Port Albany. Kennedy is killed by the natives; the whites die from accident or privation; and Jackey Jackey, the sole survivor, reaches Port Albany Dec. 23.—Nov. 17. Gregory returns to Perth, having travelled more than 15,000 miles, and discovered valuable lead veins on the Murchison River.
1849, Feb. 2. Roe's expedition returns to Perth, having traversed nearly 18,000 miles, and discovered several coal seams.
1851. Hargreaves discovers gold in the Bathurst Mountains. (*See* GOLD DISCOVERIES.)
1854. Hely leaves Sydney early in the year in quest of Leichhardt.—July 22. Having failed in his object, he returns to the Balonne River.
1854, July 10. Austin's expedition leaves Momekine.—Oct. 29. He reaches the extreme point of his journey.
1855. A. C. Gregory commences his exploration of the Victoria River.
1856, Nov. 16. Gregory's expedition returns to Brisbane, having made one of the most extensive explorations ever made in the continent.
1858, April 16. F. Gregory sets out from the Geraldine Mine.—May 12. He discovers the Lyons River. —June 22. He returns to the Geraldine Mine.—May to Sep. John M'Douall Stuart's first expedition on the west coast of Port Lincoln district.—Sep. A public meeting in Melbourne for organizing an exploration of the interior of Australia, collects upwards of £3,000, which sum is raised to £10,000 by the colonial legislature.

A.D.
1859. April 2 to July 3, and Nov. 4 to Jan. 21, 1860. Stuart's second and third expeditions.
1860, March 3. Stuart starts from Chambers Creek.—April 23. He reaches the centre of Australia.—Aug. 20. The expedition of Robert O'Hara Burke and W. J. Wills leaves Melbourne.—Oct. 19. They quit Menindee.—Nov. 20. They reach Cooper's Creek. — Dec. 16. The party divides into two portions; the first, under Brahé, staying as a reserve at Cooper's Creek, while the other, consisting of Burke, Wills, Gray, and King, commence the exploration of the great Sahara of Australia.
1861, Jan. 1. Stuart starts on his fifth expedition.—Feb. 21. Burke and Wills, having crossed the Australian continent, commence their return homewards. —April 17. Death of Gray from starvation.—April 21. The three survivors reach Cooper's Creek, which had been abandoned the same day by Brahé and his party.—June. Death of Burke and Wills from exhaustion. King is hospitably entertained by the natives until Sep. 15, when he is rescued by a relieving party under A. W. Howitt.—Sep. 15. Stuart, having reached lat. 17 deg. long. 133 deg., and on one occasion been for 106 hours without water, reaches the settlements. —Oct. 9. Howitt's relief expedition returns to Poria Creek.—Nov. 9. F. Gregory completes a successful exploration of the north-west coast.
1862, Jan. 2. Stuart commences another expedition.—Jan. 22. McKinlay completes his journey across the continent.—June. Landsborough completes some important discoveries.—July 25. Stuart reaches the opposite shore at Chambers Bay.—Dec. He returns to the settlements.
1864. In consequence of the opposition of the Australian colonies, the English Government abolishes the practice of transportation. Explorations are continued in North and South Australia and Queensland.
1865. Foundation of Somerset as the nucleus of a settlement near Cape York, on the shores of Torres Straits.

AUSTRASIA, or EAST FRANCE, was allotted to Thierry I. on the death of his father, Clovis I., A.D. 511. It was united to Neustria by Clotaire II. in 613, and separated from it by Dagobert I. in 622. Charles Martel annexed it to his dominions in 737. Carloman received Austrasia on the death of Charles Martel, in 741, and Charlemagne annexed it to his empire in 772. Sigebert I. transferred the capital from Rheims to Metz in 561. Many of the sovereigns of Austrasia were mere puppets in the hands of the mayors of the palace.

KINGS OF AUSTRASIA.

A.D.
511. Thierry I.
534. Theodebert I.
547. Theodebald.
553. Clotaire I., King of Soissons, seizes Austrasia, and is sole King of the Franks in 558.
561. Sigebert I.
575. Childebert II.
596. Theodebert II.
613. Clotaire II. annexes it to Neustria.
622. Dagobert I., sole King of the Franks 628.
638. Sigebert II. receives Austrasia.
656. Clovis II. unites it to Neustria and Burgundy, and dies the same year, when an interregnum ensues.
660. Childeric II. is sole King of the Franks in 673.
673. Thierry III., who is deposed.
674. Dagobert II

After the death of Dagobert II., in 679, Pepin of Héristal seized the reins of government, and was acknowledged duke.

DUKES OF AUSTRASIA.

A.D.
679. Pepin of Héristal.
715. Charles Martel, who becomes sole ruler of France in 737.

A.D.
741. Carloman receives Austrasia.
747. Pepin the Short takes Austrasia, and Carloman retires to the monastery on Monte Casino.
752. Pepin, sole King of the Franks.
768. Charlemagne and Carloman.
771. Charlemagne sole king, becomes emperor in 880.

AUSTRIA.—Noricum, bordering on Pannonia, made a Roman province B.C. 15, was the original seat of the Austrian empire. The two provinces of Noricum and Pannonia consisted of the extensive territories between the Inn, the Save, and the Danube. During the decline of the Roman empire, Noricum was overrun by various barbarian tribes, and one of these, the Avari, having penetrated into Bavaria, was defeated and driven across the Raab by Charlemagne, in 791 and 796. A colony was placed in the territory from which they had been driven, and it was called the Eastern Mark, or Ostreich, whence its present name. On the division of the empire in 843, it was annexed to Bavaria. The Hungarians took it in 902, but it was wrested from them by Otho I. in 955. Leopold I., grandson of Adalbert of Bamberg, was made margrave of Austria in 984; and one of his successors, Leopold III., obtaining Bavaria in 1139, the two provinces were again united. Frederick I. (Barbarossa) adding to it the province west of the Ens, erected it into a separate duchy in 1156, and bestowed it upon Henry IX., who had previously resigned his former duchy of Bavaria.

A.D.
1246. Extinction of the male branch of the ducal line, and commencement of an interregnum.
1264. Premislaus Ottocar II., King of Bohemia, obtains the investiture of Austria and Styria.
1268. Dec. Ottocar II. obtains Carinthia by legacy.
1276. Nov. 25. Ottocar II. formally resigns Austria, Styria, &c., to Rodolph of Habsburg.
1277. Ottocar II. rebels.
1278. Aug. 26. Battle of Marchfield (*q. v.*).
1308. Jan. The Swiss revolt from Albert I.
1337. Carinthia is annexed to Austria.
1363. Acquisition of the Tyrol (*q. v.*).
1364. Treaty of union between Austria and Bohemia is concluded.
1438. Albert V., Duke of Austria, King of Hungary and Bohemia, is made Emperor of Germany under the title of Albert II.
1453. Jan. 6. Austria is created an archduchy by the Emperor Frederick III. Duke Rodolph III. (1358—1365) had assumed the title of archduke, but it had not been confirmed by the emperor.
1477. Aug. 18. Acquisition by Austria of the Netherlands, and some provinces in France, by the marriage of Maximilian, afterwards emperor, with Mary of Burgundy.
1496. Marriage of Philip, Archduke of Austria, to Joanna of Castile, which begins the connection with Spain.
1522. Charles V. cedes Austria to his brother Ferdinand.
1526. Bohemia (*q. v.*) and Silesia (*q. v.*) are united to Austria.
1529. Hungary is invaded by Soliman the Magnificent. (*See* OTTOMAN EMPIRE.)
1570. Hungary (*q. v.*) is annexed to Austria.
1618. The Thirty Years' War begins.
1624. Ferdinand II. abolishes the Protestant worship, and imposes severe restrictions on all Lutherans.
1648. The Thirty Years' War ends. Alsace (*q. v.*) is ceded to France.
1687. Oct. Hungary is, by the diet of Presburg, converted from an electoral into an hereditary monarchy, and settled on the male line of the house of Austria.—Dec. 9. The Archduke Joseph is crowned King of Hungary.
1701. The War of the Spanish Succession begins.
1708. Mantua is added to the Austrian dominions.

A.D.
1713. April 11. Peace of Utrecht, by which Austria obtains part of Milan.
1714. End of the War of the Spanish Succession.
1715. Nov. 15. Barrier treaty, which confirms Austria in possession of Milan, Naples, and Sardinia.
1718. July 21. Peace of Passarowitz (*q. v.*).
1734. Charles VI. obtains the assent of the Germanic empire to the Pragmatic sanction (*q. v.*), thereby securing the succession for his daughter Maria Theresa.
1735. Naples and Sicily are relinquished.
1740. Oct. 20. Death of Charles VI., with whom the male branch of the Habsburg dynasty becomes extinct. Maria Theresa succeeds.
1740-2. First Silesian War.
1744-5. Second Silesian War.
1745. Sep. 13. Francis, Grand Duke of Tuscany, and husband of Maria Theresa, is elected Emperor of Germany.
1748. Parma, Milan, and other Italian possessions, are lost.
1756. The third Silesian War, known as the Seven Years' War, commences.
1763. Feb. 5. Treaty of Hubertsburg, by which Austria cedes Silesia and Glatz to Prussia, terminates the third Silesian, or the Seven Years' War.
1772. Aug. 5. On the dismemberment of Poland, Austria acquires Galicia and other parts of Poland.
1797. Oct. 17. Treaty of Campo Formio (*q. v.*).
1801. Feb. 9. Treaty of Luneville (*q. v.*).
1805. Joins England and Russia in order to oppose France.—Nov. 14. Napoleon I. enters Vienna.—Dec. 2. Battle of Austerlitz (*q. v.*).—Dec. 26. Treaty of Presburg, and cession of Venice and the Tyrol to France.
1806. Aug. 6. Francis II. of Germany abolishes the title of Emperor of Germany, and takes that of Francis I., Emperor of Austria.
1809. April 20. Battle of Abensberg (*q. v.*).—May 13. Vienna is again taken by the French.
1810. Mar. 11. Marriage by proxy of Napoleon I. and Maria Louisa, daughter of the Emperor.
1814. Oct. 2. Congress at Vienna.
1815. Mar. 25. Treaty of Vienna. Austria regains her Italian possessions.
1835. Mar. 2. Death of Francis I., and accession of Ferdinand I.
1838. July 3. Treaty of commerce between Austria and Great Britain.
1848. Mar. 13. Insurrection at Vienna, and flight of Prince Metternich.—May 17. Flight of the Emperor.—July 22. A constituent assembly meets at Vienna.—Sep. 11. The Hungarian revolution breaks out, and war ensues. (*See* HUNGARY.)—Dec. 2. Abdication of the Emperor Ferdinand I. in favour of his nephew, Francis Joseph.
1849. July 2. Battle of Acs (*q. v.*).—Aug. 13. Surrender of Georgey.
1850. Nov. 29. Convention of Olmütz (*q. v.*).
1853. Feb. 18. Libeny attempts to assassinate the Emperor Francis Joseph.
1854. April 24. Marriage of the emperor with the Princess Elizabeth of Bavaria.—Aug. 23. The Austrians enter the Danubian principalities.—Dec. 2. Alliance with Great Britain and France.
1855. Aug. 18. Conclusion of a concordat with Rome, whereby the Pope receives almost absolute power in Austria.
1857. March. The Austrians commence the evacuation of the Danubian principalities. Diplomatic relations between Austria and Sardinia are broken off.
1859. Jan. 1. Napoleon III. throws Europe into excitement by a few words addressed to the Austrian ambassador.—Feb. 13. Lord Cowley receives instructions to proceed to Vienna on a "mission of peace."—April 26. The Austrians cross the Ticino.—May 3. Napoleon III. declares war against Austria. Battles of Montebello (May 20), Palestro (May 30, 31), Magenta (June 4), and Malegnano (June 7), in which the Austrians are defeated.—June 11. Death of Prince Metternich.—June 24. Battle of Solferino lost by the Austrians.—July 11. Treaty of Villafranca. Austria relinquishes Lombardy to Sardinia.—Nov. 10. Treaty of Zurich, which confirms all the articles of that of Villafranca.—Dec. 20. Publication of an imperial patent appointing an industrial legislation for the whole empire excepting Venetia.

A.D.
1860, Mar. 5. Publication of an imperial patent enlarging the Reichsrath, and extending its privileges.—Mar. 25. The government protests against the annexation of Parma, Modena, Tuscany, &c., to the New Kingdom of Italy.—April 23. Death of Baron de Bruck, Minister of Finance.—May 30. Opening of the Reichsrath.—July 17. The Emperor publishes a resolution empowering the Reichsrath to co-operate in the making of new loans.—July 25-27. The Emperor meets the Prince Regent of Prussia at Töplitz.—Sep. 27. Closing of the session of the Reichsrath.—Oct. 20. Publication of a new imperial diploma for the regulation of the affairs of the empire.—Oct. 22-26. The Emperor meets the Emperor of Russia and Prince Regent of Prussia at Warsaw.—Nov. 17. Departure of the Empress for Madeira.—Dec. 13. M. Schmerling succeeds Count Goluchowski as Minister

1861, Jan. 7. An amnesty for political offenders.—Feb. 5. The Archduke Regnier president of the council.—Feb. 26. Publication of decrees for the new constitution of the empire.—May 1. Formal opening of the new Reichsrath by the Emperor.—May 18. Return of the Empress from Madeira.—July 5. The Hungarian Diet votes an address praying the Emperor to restore the old constitution.

1862, Jan. 26. A ministry of marine is established in Austria, under the direction of Count Wickenbourg.—Feb. 12. The Prince of Wales visits the Emperor at Vienna.—May 1. The Emperor sanctions the responsibility of ministers.—Nov. 7. The Emperor submits a financial statement of the national expenses to the Chamber of Deputies at Vienna.—Nov. 18. The Emperor grants an amnesty to political offenders in Hungary.

1863, April 7. Austria joins England and France in remonstrating against Russian cruelties in Poland.—Aug. 2. The Emperor visits the King of Prussia at Gastein, and invites him and the other German sovereigns to assemble in congress at Frankfort-on-the-Maine.—Aug. 17. The congress is opened, and the Emperor presents a project of federal reform.—Sep. Celebration of the jubilee of the union of the Tyrol with Austria (1363).

1864, Jan. 31. Marshal Wrangel, at the head of an army of 70,000 Austrians and Prussians, summonses the Danish commander to evacuate Sleswig. (*See* DENMARK.)—April 14. The Archduke Ferdinand Maximilian embarks at Miramar to assume the imperial crown of Mexico (*q. v.*).—June 22. The Emperor visits the King of Prussia at Carlsbad.—July 26. Plenipotentiaries of Austria, Prussia, and Denmark assemble at Vienna to consider the terms of a peace. (*See* DENMARK.)—Aug. 20—25. The King of Prussia and Count Bismarck visit Vienna.—Oct. 27. Count Mensdorff Pouilly succeeds Count Rechberg as Minister.—Oct. 30. Peace is concluded at Vienna.—Nov. 11. In consequence of revolutionary movements certain districts are put in a state of siege.—Nov. 30. The Austrian troops engaged in the Danish war enter Vienna in triumph.

1865, Feb. 20. Liberation of Joseph Langiewicz. (*See* POLAND.)—May 18. The government is defeated on the budget in the Lower House of the Reichsrath.—June 6. The Emperor visits Hungary (*q. v.*).—June 27. Resignation of the ministry.—July 25. Closing of the Reichsrath.—July 27. Reconstitution of the ministerial council.—July 29. Dissolution of the ministry of marine, the duties of which office are divided between the ministers of war and commerce.—Aug. 14. Convention of Gastein (*q. v.*).—Aug. 20. The Emperor meets the King of Prussia at Salzburg.—Sep. 20. Publication of an imperial rescript announcing conciliatory intentions respecting Croatia and Hungary.—Dec. 12. The Emperor again visits Hungary (*q. v.*).—Dec. 16. A preliminary treaty of commerce is signed with England at Vienna.

DUKES OF AUSTRIA.

1276. Rodolph I.
1282. Rodolph II. and Albert I.
1290. Albert I. alone.
1308. Frederick I. and Leopold I.
1326. Frederick I. alone.
1330. Albert II. and Otho.
1339, Feb. 17. Otho dies, and Albert II., or the Wise, sole duke.

A.D.
1358, Aug. 16. Rodolph IV.
1365, July 27. Albert III. and Leopold II.
1386, July 9. Albert III. alone.
1395, Aug. 29. Albert IV., William I., and Leopold III.
1404. William I. and Albert V.
1406. Albert V., elected King of Hungary in 1437, and Emperor of Germany, by the title of Albert II., in 1438.
1439. Ladislaus Posthumus.
1453. Frederick III., Albert VI., and Sigismund.

ARCHDUKES OF AUSTRIA.

1493. Maximilian I., Emperor of Germany. From this period the imperial dignity remained hereditary in the house of Austria (*see* EMPERORS OF GERMANY) until 1806.

EMPERORS OF AUSTRIA.

1804, Aug. 11. Francis II. resigned the title of Emperor of Germany, and assumed that of Emperor of Austria.—Aug. 6, 1806. He formally abdicated the imperial crown of Germany.
1835. Ferdinand I.
1848, Dec. 2. Francis Joseph I.

AUSTRIA (Screw Steam-ship).—Built on the Clyde in 1857, was destroyed by fire, Sep. 13, 1858. She left Hamburg Sep. 4, with 425 passengers and a crew of 103, including officers and men. They were principally Germans; and of the 528 persons, only 67 were saved. Some of these were picked up by the *Maurice*, a French barque, and the remainder by a Norwegian barque.

AUTO-DA-FÉ, or "Act of Faith," a term applied by the Spanish and Portuguese to the ceremony with which the punishment of death was inflicted upon heretics under the Inquisition. "The last scene in this dismal tragedy," says Prescott, "was the *act of faith* (*auto-da-fé*), the most imposing spectacle, probably, which has been witnessed since the ancient Roman triumph, and which, as intimated by a Spanish writer, was intended, somewhat profanely, to represent the terrors of the Day of Judgment. The proudest grandees of the land, on this occasion, putting on the sable livery of familiars of the Holy Office, and bearing aloft its banners, condescended to act as the escort of its ministers; while the ceremony was not unfrequently countenanced by the royal presence. . . . The effect was further heightened by the concourse of ecclesiastics in their sacerdotal robes, and the pompous ceremonial which the Church of Rome knows so well how to display on fitting occasions, and which was intended to consecrate, as it were, this bloody sacrifice by the authority of a religion which has expressly declared that it desires mercy and not sacrifice." Thousands of victims perished in this manner in Spain, Portugal, and their colonies. It was instituted in Spain in 1556, and the first took place at Valladolid in 1560, and was celebrated annually in many parts of Spain. An *auto-da-fé* was held at Lisbon so late as Sep. 20, 1761, at which Gabriel Malagrida, an old man of 70, was burned for having indulged certain heretical notions. Fifty-four persons suffered at the same time. A nun was burned at Seville Nov. 7, 1781, and an *auto-da-fé* is said to have taken place at Mexico during the present century.

AUTOMATON FIGURES, or AUTOMATA.—The Chinese long since contrived to give motion to puppets by means of quicksilver; and

several specimens of automata constructed by the Greeks are mentioned by different authors. The wooden pigeon made by Archytas of Tarentum, about B.C. 400, though it could fly, was not able to resume its flight when it had once settled. In the 13th century, Albertus Magnus is said, after 30 years' labour, to have constructed a speaking head, which so frightened Thomas Aquinas that he shattered it to pieces; and Roger Bacon produced a similar invention. These accounts, however, like that of John Müller's, or Molitor's (Regiomontanus), artificial eagle, which it is alleged flew to meet Maximilian on his arrival at Nuremberg, June 7, 1470, more than 20 years before he ascended the throne, are not supported by satisfactory evidence. Beckmann has no doubt that in the 14th and following centuries several automata were made. The Emperor Charles V. during his cloister life amused himself with contrivances of this kind. Vaucanson exhibited at Paris, in 1738, a flute-player sitting, who performed 12 tunes; another that played upon a shepherd's pipe and a drum at the same time; and a duck that imitated all the motions of the living animal. Du Moulin, in 1752, produced similar automata. Baron de Kempelen's automaton chess-player, exhibited in London in 1816, is believed to have been a deception. Faber's euphonia was exhibited at the Egyptian Hall in 1846. The anthropoglossus, an automaton speaking and singing machine, in the shape of a human head, was exhibited at the St. James's Hall, London, during the winter of 1864–5, and another, called the Sphinx, at the Egyptian Hall, London, 1865–6.

AUTOGRAPHS.—An Exhibition of Autographs, illustrating the literature of Great Britain to the accession of Queen Victoria, was opened at the rooms of the Society of Antiquaries, April 3, 1862.

AUTUN (France).—The ancient Augustodunum, or Bibracte (*q. v.*), is one of the earliest bishoprics established in France after Lyons and Vienne. At a council held at this town, sentence of excommunication was pronounced against Philip I. of France, Oct. 16, 1094. In the previous year he had put away his wife Bertha, mother of Louis VI., and married Bertrade, wife of the Count of Anjou, and for this he was at first privately admonished by the Roman Catholic authorities, and then excommunicated.

AUXIMUM (Italy), now OSIMO, first mentioned B.C. 174, when the order for erecting walls around it was given by the Roman censors. It was made a Roman colony B.C. 157; and having been taken by the Goths, was wrested from them by Belisarius A.D. 538.

AUXUME.—(*See* AXUM.)

AVA (Asia), for some time subject to Pegu, became an independent state in the 17th century. Its chief city, Ava, was taken by the Peguans in 1752, and rescued from their hands in 1753. It was made the capital of Burmah in 1364, in 1761, and for the third time in 1822. It suffered severely from an earthquake in March, 1839. (*See* BURMAH.)

AVAINE, or AVEIN (Battle).—The Marshals Chatillon and Brézé, commanding the French and Dutch troops, defeated the Spanish forces under the command of Prince Thomas of Savoy, in this plain, near Luxemburg, May 20, 1635. The Spaniards lost 4,000 men and 50 standards.

AVARS, sometimes called the Huns of Pannonia, a barbarian tribe first mentioned in history towards the close of the 5th century. Retiring before the Turks, they reached the shores of the Euxine, and sent an embassy to Constantinople A.D. 558. In their audience with Justinian, at that time declining in years, the chief ambassador addressed him thus:—"You see before you, O mighty prince, the representatives of the strongest and most populous of nations, the invincible, the irresistible Avars. We are willing to devote ourselves to your service; we are able to vanquish and destroy all the enemies who now disturb your repose. But we expect, as the price of our alliance, as the reward of our valour, precious gifts, annual subsidies, and fruitful possessions." They afterwards advanced into Poland and Germany; and in 626 joined the Persians in an attack on Constantinople, but were repulsed. Having committed various aggressions, and provoked numerous wars, they were, after a conflict of eight years' duration, subdued by Charlemagne in 799.

AVE MARIA.—This form of prayer, used in the Roman Catholic Church, is a repetition of the salutation of the angel Gabriel to the Virgin Mary (Luke i. 28). Bingham shows that the use of this invocation to the Virgin cannot be traced higher than the beginning of the 15th century. "Ferrarius," he adds, "ingeniously confesses that Vincentius Ferrerius was the first ecclesiastical writer that ever used it before his sermons. Baronius has not a syllable of its antiquity in all his 12 centuries; there being a perfect silence both among the ancients and all the Ritualists about it, till that Dominican preacher, in his abundant zeal for the worship of the Holy Virgin, began to use it before his sermons." Christians were ordered to annex it to their prayers in 1420. This invocation is now generally used in the services of the Roman Catholic Church. The early summons to worship was called the Ave-bell; and indulgences granted by various pontiffs for frequent repetition of the invocation were termed Ave Marias.

AVEBURY, or AVBURY.—This village in Wilts occupies the site of a Celtic structure, composed of blocks of stone, and generally believed to be a Druidical work. Aubrey visited it in 1648; Dr. Stukeley commenced his examination of these antiquities in 1720; and Sir Richard Hoare in 1812. It is supposed to be the remains of a national temple, or place of assembly for the performance of sacred rites, erected by the Druids before the Christian æra.

AVENTURINE.—A successful imitation of this mineral, which is a kind of quartz interspersed with brilliant metallic points, was accidentally discovered at Venice during the Middle Ages, by a workman who let some copper filings fall into coloured glass in a state of fusion. This process, improved by Fremy and Clemandot, was superseded in 1865 by

Pelouze, who obtained beautiful specimens of aventurine by fusing sand, carbonate of soda, carbonate of lime, and bichromate of potash.

AVERSA (Italy).—Built A.D. 1020, by Rainulph, a Norman chief, near the ruins of the ancient Atella, from which place the bishopric was transferred to Aversa, about 1050. Alphonso V., of Aragon, took it in 1440; and it was frequently besieged. It suffered from an earthquake in 1805.

AVIGNON (France).—This ancient city is seated in a beautiful valley on the left bank of the Rhone. The adjacent territory, the Venaissin county, "a populous and fertile spot," was ceded to the papacy by Philip III. in 1273; and the sovereignty of Avignon was sold to Clement VI. for 80,000 gold florins of Florence by Joanna, Queen of Naples and Countess of Provence, in 1348. Clement V., elected through the influence of Philip IV. of France, removed the papal chair to Avignon, in 1309. The following popes remained here under French influence :—

A.D.
1309. Clement V.
1314. See vacant two years.
1316. John XXI. or XXII.
1334. Benedict XI. or XII.
1344. Clement VI.
1352. Innocent VI.
1362. Urban V.
1370. Gregory XI.
1378. Commencement of the Papal Schism (*q. v.*), when two popes were elected. Clement VII. at Avignon.
1394. Benedict XIII.

Urban V. went to Rome for a short time, but returned to Avignon; and Gregory XI. is said to have meditated flight, when surprised by death. In the Papal Schism, called "the great schism of the West," occasioned on the election of his successor in 1378, the antipope Clement VII. took up his residence here, and was succeeded by Benedict XIII. The popes at Rome, however, triumphed, and Avignon was deprived of its rival pontiffs in 1409. The French kings seized this city on various occasions. The annexation of the Venaissin and Avignon to France by the revolutionary government, Sep. 14, 1791, was their first act of aggression. By the treaty of Tolentino, Feb. 19, 1797, Pius VI. formally ceded these possessions to France. Avignon was made a bishopric in the 1st century, and was erected into an archbishopric in 1475. By the concordat of 1801 it ceased to be a metropolis, but the privilege was restored in 1821. Councils were held at Avignon in 1080, 1209, 1270, 1279, 1282, 1326, 1327, 1337, and 1457. Its university, founded in 1303, was abolished in 1794.

AVIS (Order).—Instituted in 1147 by Alphonso I., the founder of the Portuguese monarchy, and raised by him in 1162 to the rank of an ecclesiastical order of chivalry. The knights were then called "Knights of Evora," but took their present title in 1187, from their gallant defence of the fortress of Avis against the Moors. The order was changed from an ecclesiastical to a civil institution in 1789.

AVOIRDUPOIS.—This system of weight, used for all goods except the precious metals and medicines, is first mentioned in some orders of Henry VIII., in 1532. A pound avoirdupois was placed in the Exchequer by Elizabeth, in 1588, to serve as a standard.

AVRANCHES (Normandy), anciently Ingena, also called Abrincatæ, came into the possession of England at the Norman conquest. In its cathedral Henry II. received absolution from the Pope's legate, in 1172, for the murder of Becket; a flat stone marks the spot where he did penance. The Bretons captured the town in 1203, and committed great havoc. It was restored by Louis IX., and it again fell under the power of the English in 1415, but was recovered by France in 1450. The bishopric, established in the 5th century, was suppressed and united to Coutances in 1801.

AXARQUIA (Battle).—In the winding defiles of the Axarquia, the Moors inflicted a severe loss on the Spaniards, in actions extending over two days, March 20 and 21, 1483.

AXE.—The Franks in their expedition into Italy in the 6th century made use of an axe with a large blade. Hence it was termed *francisca*. The principal weapons of this kind were the taper axe, the broad axe, and the double axe. The pole axe and the adze axe were varieties of these. The Lochaber axe was used in the 16th century.

AXUM, anciently AUXUME (Abyssinia).—This ancient city, founded about B.C. 650, became in later times the seat of a powerful kingdom, nearly co-extensive with modern Abyssinia, and embracing portions of Arabia. Though its origin has not been ascertained, it is mentioned as existing in the 2nd century of our æra. Justinian formed an alliance with the Auximites A.D. 533. Gibbon is of opinion that the Auximites, or Abyssinians, as he calls them, were a colony of Arabs, and there can be no doubt that the Arab element is blended with the Ethiopian in their composition. They were converted to Christianity in the 4th century; and in its defence came into collision with the followers of Mohammed, who deprived them of their possessions in Arabia, and destroyed their commerce. The Chronicles of Axum, a kind of history of Abyssinia, a copy of which the traveller Bruce brought to England in 1774, are deposited in a Christian church in Axum, built about 1657. Axum was made a bishopric about 330, and Frumentius was the first bishop.

AYACUCHO (Battle).—On this plain, in Peru, the Spaniards were defeated by the republican forces Dec. 9, 1824, and a capitulation was soon afterwards made, by which Spain surrendered the whole of Peru and Chili.

AYLESBURY (Buckinghamshire).—This ancient town formed one of the principal strongholds of the Britons in their resistance to the Romans. In 571 Cuthulf, a West-Saxon chief, took Aylesbury, which was ravaged by the Danes in 921. The town was incorporated and made a borough by Queen Mary in 1554. During the disputes between Charles I. and the Parliament, it espoused the cause of the latter, and in 1643 it formed the head-quarters of Lord Essex. John Wilkes represented it in Parliament in 1761.

AYLESFORD (Battle). — A victory was gained by the Britons over the Saxons, A.D.

455, near a village of this name, in Kent. The Saxon chief Horsa was slain in the conflict.

AZINCOURT.—(*See* AGINCOURT.)

AZOF.—This sea, called by the ancients the Palus Mœotis, communicates with the Euxine by the strait of Yenikalo, or the Cimmerian Bosphorus. It was the scene of some important operations during the Crimean war. An allied expedition, 15,000 strong, composed of English, French, and Turkish troops of all arms, with five batteries of artillery, left the anchorage at Sebastopol May 22, 1855, and arrived off Kertch May 24. The Russians blew up their fortifications on both sides of the straits, destroyed three steamers and several heavy-armed vessels, and large quantities of provisions, ammunition, and stores. Operations were carried on against the chief Russian positions. A small garrison was left at Kertch and Yenikale, and the expedition returned June 12.

AZORES, or WESTERN ISLANDS (Atlantic), nine in number, are said to have been known before 1380, and by some their discovery is attributed to Vanderberg of Bruges, about 1430. The Portuguese no sooner heard of the discovery than they sent out Cabral, who sighted one of the group in 1432; and in 1448 Prince Henry of Portugal took formal possession of the islands. Alphonso V. gave them in 1466 to his sister, the Duchess of Burgundy, and they were colonized by the Dutch. When Philip I. seized the vacant throne of Portugal in 1580, they fell under the dominion of Spain. The Earl of Essex and Sir Walter Raleigh failed in an attempt to capture them in 1597. They reverted to Portugal in 1640, and still remain in her possession. Angra (*q. v.*), the capital of Terceira, one of the group, was made a bishop's see by Paul III. in 1534. Owing to volcanic disturbance, rocks and islands have frequently been thrown up from the sea. The most remarkable phenomena of this kind occurred in 1538, 1720, and 1811.

AZOTUS.—(*See* ASHDOD.)

AZTECS.—The earliest known seat of this tribe was Aztlan, a country to the north of the Gulf of California, where they were dwelling in 1160. They soon after commenced their migrations, arriving at Tula in 1196. They removed to Zumpanco about 1216, and eventually settled on a group of islands to the south of lake Texcuco. They were reduced to slavery by the Colhuans in 1314; and, moving to the westward of the lake, founded Tenochtitlan, their capital, on the site of which Mexico now stands, in 1325. They were assailed by the Spaniards under Cortes in 1519.

B.

BAAL and ASHTORETH, or ASTARTE, the former supposed to represent the sun, and the latter the moon, were idols worshipped by the Phœnicians, Chaldeans, and other ancient nations. This idolatry was established amongst the Moabites and the Midianites B.C. 1451 (Numb. xxv.), and the Israelites were punished for falling into it B.C. 1161—1143 (Judges x. 6—8), and on several occasions. Ahab, at the instance of his queen Jezebel, established the worship of Baal and set up an altar in Samaria B.C. 918 (1 Kings xvi. 28—33), for which he was reproved by Elijah, who slew the prophets of Baal at the river Kishon B.C. 906 (1 Kings xviii. 36—40). Jehoiada destroyed the temple of Baal, slew its priest, and Athaliah, the last of the house of Ahab, B.C. 878 (2 Kings xi.).

BAALBEC, or HELIOPOLIS (Syria), the name given to the place by the Seleucidæ, both words signifying "the city of the sun," is by some supposed to correspond with the Baal Gad of Scripture. Little is known of its early history. Julius Cæsar made it a Roman colony. Trajan consulted its famous oracle previous to his departure on his expedition to the East, A.D. 114. Antoninus either enlarged its temple to Jupiter or built a new one, that became one of the wonders of the world. Baalbec capitulated to the Saracens, paying an enormous ransom, in 635; it was sacked and dismantled by the Caliph of Damascus in 748; seized by Tamerlane in 1401; and has since gradually declined. Thevet, in 1550; Pococke, in 1740; Maundrell, in 1745; Wood and Dawkins, in 1751; and Volney, in 1785, are amongst the most celebrated travellers who have visited and described its ruins. This Syrian city must not be confounded with another Baalbec, or Heliopolis, in Lower Egypt, one of the earliest cities of which any record remains. Smith (Dict. of Greek and Roman Geog.) remarks concerning the last-mentioned city: "Its obelisks were probably seen by Abraham when he first migrated from Syria to the Delta 1600 years B.C.; and here the father-in-law of Joseph filled the office of high priest."

BAB-AT-THE-BOWSTER.—This old dance, somewhat resembling the cushion-dance (*q. v.*), save that a bolster, as the name indicates, supplies the place of the pillow, is still danced in Scotland, and is always the winding up at "kirns" and other merry-makings.

BABEL (Tower).—Described Gen. xi. 1—9, and built 120 years after the Deluge, by the descendants of Noah, about B.C. 2247. Much controversy has been excited respecting its exact position. It is now generally believed that Babylon was built upon the site, if not upon the actual ruins, of this temple.

BABINE REPUBLIC, or RESPUBLICA BINEPSIS.—The following account of this society, established in the 14th century, is given in the *Annual Register* for the year 1764: "There was at the court of Sigismund Augustus, a gentleman of the family of Psomka, who, in concert with Peter Cassovius, bailiff of Lublin, formed a society, which the Polish writers call 'The Republic of Babine,' and which the Germans denominate 'The Society of Fools' (*q. v.*). This society was instituted upon the model of the Republic of Poland; it has its king, its chancellor, its counsellors, its archbishops, bishops, judges, and other officers: in this republic Psomka had the title of captain, and Cassovius that of chancellor. When any of the members did or said anything at their meetings which was

unbecoming or ill-timed, they immediately gave him a place of which he was required to perform the duties till another was appointed in his stead; for example, if any one spoke too much, so as to engross the conversation, he was appointed orator of the republic; if he spoke improperly, occasion was taken from his subject to appoint him a suitable employment; if, for instance, he talked about dogs, he was made master of the buck-hounds; if he boasted of his courage, he was made a knight, or, perhaps, a field-marshal; and if he expressed a bigoted zeal for any speculative opinion in religion, he was made an inquisitor. The offenders being thus distinguished for their follies, and not their wisdom, gave occasion to the Germans to call the republic 'The Society of Fools,' which, though a satire on the individual, was by no means so on the institution. * * * * The regiment of the Calot, or Calotte (*q. v.*), which was some years since established in the court of France, is very similar to the republic of Babine." (*See* Fools, Order.)

BABŒUF'S CONSPIRACY.—Babœuf, a Jacobin, surnamed Gracchus, formed a conspiracy against the French Directory in 1796. His chief aim was to obtain a division of property. The deliberations of this society were carried on in a large vault under the Pantheon, where, as Alison (iv. ch. 24) remarks, "by the light of flambeaux, and seated on the humid ground, they ruminated on the most likely method of regenerating France." They had agents in the provinces, and they also elected a secret directory of public safety in Paris. Their design was at length acknowledged to be to establish what they termed "the Public Good," by means of a division of property, and the formation of a government consisting of "true, pure, and absolute democrats." They had framed a solemn instrument, called an "Insurrection Act," the publication of which was to be the signal for revolt. This was fixed to take place May 21, 1796; but one of the party having given information, the chief conspirators were arrested the day before. Babœuf and one of his associates suffered on the scaffold May 25, 1797.

BABYLON, the chief city of Babylonia (*q. v.*). Sir John Stoddart states that Babylon, according to the scriptural account, "was the first great city built after the Deluge, and that it was founded by Nimrod, a great-grandson of Noah, or at all events by a tribe of his descendants, bearing his name." The city of Babylon is supposed to have been built on the site of Babel (Gen. x. 10), the scene of the confusion of tongues, about B.C. 2247 (Gen. xi. 9). It was taken by Tiglath-Pileser I., of Assyria, about B.C. 1110, and by Cyrus B.C. 538. During the present century many enterprising travellers, amongst whom may be mentioned Rich, Ker, Porter, Layard, Frazer, Chesney, Botta, Loftus, and Rawlinson, have, by their explorations amongst the ruins of the ancient city, thrown considerable light upon the history of Babylon.

BABYLONIA.—"The Babylonian and Assyrian empires," says Sir John Stoddart, "in all historical records, are much blended together. These empires, whether distinct or united, possessed in very early times two vast cities; Babylon on the Euphrates, and Nineveh on the Tigris. The country on the Tigris was called Assyria; that on the Euphrates Babylonia; and the large intervening space was commonly termed Mesopotamia, or 'between the rivers;' and this, together with Babylonia, seems to be meant in Scripture by the land of Shinar." The Rev. G. Rawlinson classes it fourth of "The Five Great Monarchies of the Eastern World" (Murray, 1862—5), and from his valuable work the following table has been compiled:—

B.C.
1723. Babylon is conquered by the Assyrians.
1270—1250. Tiglathi-Nin, King of Assyria, assumes the title of "Conqueror of Babylonia," where he establishes an Assyrian dynasty.
1150—1130. Nebuchadnezzar I., King of Babylon, leads two expeditions into Assyria during the reign of Asshur-ris-ilim.
1130—1110. Tiglath-Pileser I., King of Assyria, towards the end of his reign, invades Babylonia, where he remains for two years, taking the cities of Kurri-Galzu (now Akkerkuf), Sippara of the Sun, Sippara of Anunit (*see* Sepharvaim), and Hupa or Opis, and ultimately seizing the city of Babylon. On his return, however, he is much harassed by Merodach-iddin-akhi, who captures several of the Assyrian idols and deposits them in Babylon as trophies of victory.
880. The Assyrian monarch Asshur-idanni-pal invades Babylonia, and recovers and rebuilds the city of Divaleh, which had been destroyed at a remote period by a Babylonian king named Tsibir.
850. During a civil war between King Merodach-sumadin and his younger brother Merodach-bel * * the country is invaded by Shalmaneser II. of Assyria, who slays the pretender, takes many cities, and enters the capital, thus establishing his sovereignty over the native king.
820. Babylonia is invaded by Shamas-Iva, who defeats King Merodak-belatzu-ikbi in two pitched battles, and renders his kingdom tributary to Assyria. (*See* Daban.)
750. About the middle of the 8th century B.C. Babylon regained its independence, but was split up into numerous petty states.
747. Nabonassar establishes his authority in Babylon.
744. Tiglath-Pileser II. invades Babylonia and subdues Merodach-Baladan, prince of one of its minor divisions.
721. Merodach-Baladan is acknowledged King of Babylon.
713. Merodach-Baladan, King of Babylonia, sends an embassy to Hezekiah, King of Judah, which is favourably received by that monarch. (2 Kings xx. 12, 13.)
709. Sargon, King of Assyria, invades Babylonia, besieges Merodach-Baladan in Beth-Yakin, which, with its defenders, he captures, establishes his court at Babylon, and places an Assyrian viceroy on the throne.
704. Babylon revolts.
702. Sennacherib invades Babylonia, and defeats the ex-king Merodach-Baladan near the city of Kis.
688. Disturbances commence in Babylon, which revolts from Assyria.
680. It is recovered by Esarhaddon.
667. A revolt is suppressed by Asshur-bani-pal.
625. Nabopolassar, Viceroy of Babylonia, revolts from Assyria, and establishes an independent empire.
608. Babylonia is invaded and in great part conquered by Pharaoh Necho, King of Egypt.
605. Nebuchadnezzar, son of Nabopolassar, defeats the Egyptians at Carchemish, and succeeds his father on the Babylonian throne.
598. Nebuchadnezzar invades Palestine, besieges Tyre (*q. v.*), and conquers Jehoiachim, King of Judah, whom he carries away captive (2 Kings xxiv. 1—7).
588. Nebuchadnezzar lays siege to Jerusalem (*q. v.*), which surrenders the following year.
581. He invades Egypt.

B.C.
570. He again invades Egypt (q. v.).
561. Death of Nebuchadnezzar.
559. Evil-Merodach is deposed and put to death by his brother-in-law, Neriglissar.
555. The young king Laborosoarchod is deposed and put to death by his nobles, who raise to the throne Nabonadius, a man not related to the royal family.
538. Cyrus, king of Persia, invades Babylon and defeats Nabonadius, who seeks refuge in Borsippa, leaving Babylon under the government of his son, Belshazzar.
538. Cyrus, having turned the waters of the Euphrates from their course, enters Babylon during a religious festival, and massacres Belshazzar and a large number of the inhabitants (Dan. v. 1—31). Nabonadius tenders his submission, and the kingdom is annexed to the Persian empire.

Rawlinson (Ancient Monarchies, iii. 483) gives the following list of the rulers of Babylonia :—

B.C.
1518–1273. Dynasty of Arabs.
Circ. 1743. Dynasty of Assyrians.
,, 1150. Nebuchadnezzar I.
,, 1130. Merodach-iddin-akhi.
,, 1110. Merodach-shapik-zîri.
* * * *
Tribir (Debeiwa).
* * * *
,, 850. Merodach-sum-âdin.
,, 820. Merodach-baladan-iddi.
* * * *
747. Nabonassar.
733. Nadius.
731. Chinzirus and Porus.
726. Elulæus.
721. Merodach-Baladan.
709. Arceanus (viceroy).
704. Interregnum.
703. Illibus.
703. Merodach-Baladan.
702. Belibus (viceroy).
677. Assaranadius (viceroy).
6[illegible]. Saosduchin.
648. Kandalanus (viceroy).
647. Mesesimordachus (viceroy).
625. Interregnum.
625. Nabopolassar.
6[illegible]. Nebuchadnezzar.
561. Evil-Merodach.
559. Neriglissar.
555. Laborosoarchod or Laborosoarchus.
538. Nabonnedus, or Nabonadius.
538. Belshazzar.

BABYLONISH CAPTIVITY of the Jews, foretold by Isaiah (xxxix. 6) and Jeremiah (xxv. 9—11), lasted from B.C. 604 to B.C. 536. It commenced under Jehoiakim (2 Chron. xxxvi. 5—7), and terminated with the decree issued for their restoration by Cyrus (2 Chron. xxxvi. 22 and 23).

BABYNGTON'S CONSPIRACY.—In 1586, Anthony Babington, an English gentleman, instigated by John Ballard, a Roman Catholic priest, entered into a conspiracy to assassinate Queen Elizabeth, with the view of placing Mary Queen of Scots on the throne, and of restoring the Roman Catholic religion. John Savage (a soldier serving under the King of Spain, who had first made the proposal to assassinate the queen), and 13 others, including Babington, embarked in this desperate project, and Mary herself did everything in her power to further its success. Intimation of the plot having been given to Walsingham by a spy, the conspirators were seized, brought to trial Sep. 13—15, and executed Sep. 20 and 21, 1586. Mary's share in this conspiracy alarmed Elizabeth, and was the principal cause of her subsequent trial and execution.

BACCHANALIA, or festivals of various kinds in honour of Bacchus, are said by Herodotus to have been of Egyptian origin (see DIONYSIA), and led to such abuses, as practised at Rome and in other parts of Italy, that they were suppressed by a decree of the senate B.C. 186. This decree, engraved upon a brazen table, was discovered at Buri in 1640, and is preserved in the imperial collection at Vienna.

BACHELORS were branded with infamy by the laws of Lycurgus, and at festivals were exposed to public derision. Dionysius of Halicarnassus notices a law requiring all persons of a certain age to marry. The Romans imposed a fine on bachelors by the Lex Julia, B.C. 18. It was, however, abolished by Constantine. Bachelors of 25 years of age, and widowers without children, were, by 6 & 7 Will. III. c. 6 (1694), required to pay yearly, so long as they remained single, a tax of one shilling. It was levied for five years, commencing May 1, 1695. By 8 & 9 Will. III. c. 20, s. 14, the tax was continued till Aug. 1, 1706, when it was suffered to expire. In addition to the tax of one shilling per annum, every person of the undermentioned rank paid yearly as follows :—

	£	s.	d.
Duke	14	10	0
Duke's eldest son	7	10	0
Younger sons, each	6	5	0
Marquis	10	0	0
Marquis's eldest son	6	5	0
Younger sons, each	5	0	0
Earl	7	10	0
Earl's eldest son	5	0	0
Younger sons, each	3	15	0
Viscount	6	5	0
Viscount's eldest son	4	7	6
Younger sons, each	3	6	8
Baron	5	0	0
Baron's eldest son	3	15	0
Younger sons, each	3	0	0
Baronet	3	15	0
Knight of the Bath	3	15	0
Knight bachelor	3	10	0
King's serjeant	5	0	0
Other serjeants at law, each	3	15	0
Esquire	1	5	0
Gentleman	0	5	0
Archbishop	12	10	0
Bishop	5	0	0
Dean	2	10	0
Archdeacon	0	12	6
Canon or prebendary	0	12	6
Doctor of divinity, law, or physic	1	5	0
Sons of archbishops, bishops, deans, archdeacons, canons or prebendaries, and of doctors of divinity, law, or physic	0	5	0
Persons with £50 per annum real estate, or personal property of £600, not charged in the above	0	5	0
Their sons, each	0	2	6

A registry was ordered to be kept by persons in holy orders, for the better collecting of the duty, by 6 & 7 Will. III. c. 6, s. 20 (1694). By 43 Geo. III. s. 43 (1785), bachelors above the age of 21 years were required to pay annually, in addition to the usual tax, £1 5s. for every male servant in their employ; and those that had three or more female servants paid 10s. per annum for each, in addition to the ordinary tax.

BACKGAMMON. — This, or some similar game played with dice, was known to the Greeks, and was a favourite amusement amongst the Saxons, by whom it is said to have been invented about the 10th century. Dr. Henry attributes the invention to the Welsh. It is recorded of Canute that he frequently played at backgammon, which was called the English game in the early part of the 14th century.

BACK-STAFF, or DAVIS'S QUADRANT, for taking the sun's altitude at sea, was invented by Capt. J. Davis, about 1590. It has been superseded by later inventions.

BACTRA, called by Strabo and Pliny Zariaspa, though Heeren contends that they were different places, the capital of Bactriana, was one of the oldest centres of commerce and civilization in the world. Heeren says it was the first place of exchange for the productions of India; and that the great highways of commerce from east to west followed this direction. (*See* BALKH.)

BACTRIANA, or BACTRIA (Asia). — This ancient state, situated between Persia and India, bounded on the north by the Oxus, varied at different periods in extent. Ninus, King of Assyria, is said to have failed in an attack upon its capital, until Semiramis suggested a plan for its capture, thereby gaining the favour of the king and a share of his throne. For a considerable period Bactriana formed part of the Persian empire, and in eastern traditions is represented as having been the seat of powerful and independent princes long before it became a Persian satrapy. Alexander III. conquered it in his sixth campaign, B.C. 329. It is now a dependency of the Khanat of Bokhara, under the name of Balkh.

B.C.
255. The Governor Theodotus, called by Strabo Diodotus, revolts from Antiochus II. of Syria, and founds the kingdom of Bactriana.
221. Euthydemus deposes and succeeds Theodotus or Diodotus II.
207. Antiochus of Syria defeats Euthydemus.
181. Commencement of the reign of Eucratides I., the period of Bactriana's prosperity.
168. Part of India is added to Bactriana.
143. Eucratides II. assassinates his father, and succeeds to his throne.
125. Bactriana is overrun by tribes of wandering Scythians, by whom the kingdom is destroyed.

SOVEREIGNS OF BACTRIANA.

B.C.	B.C.
250. Theodotus or Diodotus I.	196. Menander.
245. Theodotus or Diodotus II.	181. Eucratides I.
221. Euthydemus.	143. Eucratides II.
200. Demetrius.	

BADACA, or VADAKAT (Susiana).—This, the second city of Susiana, was stormed and taken by Sennacherib, King of Assyria, about B.C. 695. Antigonus retired thither after his defeat by Eumenes, B.C. 316.

BADAJOS (Spain).—This barrier fortress, the capital of a province of the same name, only five miles from the Portuguese frontier, has sustained numerous sieges, and was several times taken and retaken during the occupation of the peninsula by the Moors. It was besieged by the Portuguese in 1660, and was assailed, but without success, by a combined English, Portuguese, and Dutch force, Oct., 1705. Galway was beaten in a battle here by the Spanish army, May 7, 1709. Soult captured it March 11, 1811 (*see* ALBUERA, battle); and Wellington having been compelled to raise the siege June 10, in the same year, obtained possession April 6, 1812. Badajos was made an episcopal see at an early period. The cathedral was commenced in 1248; and its granite bridge was built in 1460, restored in 1597, and rebuilt in 1833.

BADAJOS (Treaty), between Spain and Portugal, was signed at Badajos June 6, ratifications were exchanged at Badajos June 16, and it was published at Madrid Aug. 8, 1801. It brought to a close the short contest between Portugal and Spain, which Napoleon I. had stirred up for the purpose of carrying out his ambitious designs. Spain restored all her conquests, excepting Olivenza and its territory, which were ceded to her; and she guaranteed the Prince Regent of Portugal the entire possession of all his states and possessions. Portugal agreed to close her ports against England, and to pay the expenses of the war. (*See* ABRANTES, Treaty.)

BADDESDOWN HILL, or BADON MOUNT (Battle).—This spot, near Bath, was the scene of a celebrated victory gained by the Britons under King Arthur over the Saxon leader, Cerdic, in 493, according to Bede. This appears to be an error, as it is generally believed to have taken place in 520.

BADEN (Germany) was made a margraviate about the year 1130, by Herman II., grandson of Berthold, Landgrave of Brisgau, his father, Herman I., having previously acquired Baden by marriage. The title of Grand Duke was given to the Margrave Charles Frederick, by Napoleon I., in 1806. The rank held by Baden is that of seventh in the Germanic Confederation, and in time of war it is required to furnish 10,000 men to the federal army.

A.D.
1130. Herman II. takes the title of Margrave of Baden.
1190. Herman IV. accompanies Frederick I. (Barbarossa) to the Holy Land.
1236. Herman V. (the Pious) cedes the county of Dagsburg to the Bishop of Strasburg.
1250. Death of Herman VI., who is succeeded by his infant son Frederick, under the regency of his mother, Gertrude of Austria.
1267, Oct. 29. Frederick is beheaded at Naples.
1283. Rodolph I. acquires part of Eberstein by purchase.
1288. Baden is divided among the four sons of Rodolph I.
1353. Rodolph VII. reunites Baden into a single state.
1405. League of Marbach formed between Bernard, Marquis of Baden, the Archbishop of Mayence, the Count of Würtemberg, and some minor powers, against the Emperor.
1464, June 19. Frederick II., King of the Romans, gains a great victory over Charles I. of Baden, and takes him prisoner.
1488. Christopher of Baden sends 4,000 men to deliver Maximilian, son of the Emperor Frederick II., from the inhabitants of Bruges.
1503. Christopher claims the marquisate of Hochberg: the claim is referred to the imperial tribunal.
1515, Aug. 1. Christopher abandons the government to his sons, Bernard, Philip, and Ernest, who rule as his vicars.
1527. Baden is divided into Baden-Baden and Baden-Durlach.
1533. Bernard establishes Protestantism in Baden-Baden.
1569, Oct. 3. Philibert of Baden-Baden assists the Roman Catholics, and is slain at Moncontour.
1581. The lawsuit in reference to the possession of Hochberg terminates in favour of Baden.

A.D.
1594. The creditors of Edward of Baden obtain permission from the Emperor to indemnify themselves by seizing his territories.
1627. Arrangements as to territory are made between the rulers of Baden-Baden and Baden-Durlach.
1683. Louis William, Marquis of Baden-Baden, assists in the deliverance of Vienna from the Turks.
1707. Death of Louis William, the most warlike marquis of Baden-Baden.
1733. The French ravage Baden, and compel Louis George to seek refuge in Bohemia.
1771. Baden-Durlach is united to Baden-Baden.
1796. A treaty of peace is concluded with the French republic.
1801, Feb. 9. Baden receives an accession of territory by the treaty of Luneville.
1803. Charles Frederick of Baden is raised to the rank of elector.
1805, Dec. 26. Brisgau is added to Baden by the treaty of Presburg.
1806, July 12. The elector, Charles Frederick, is raised to the rank of grand duke.
1815, March 25. Baden joins the allies against Napoleon I.
1818, Aug. 22. A representative constitution is granted.
1849, May 14. Insurrections take place in Baden. The Grand Duke Charles Leopold Frederick quits Carlsruhe.
1850, Sep. 6. Treaty of peace with Denmark and other powers.
1857, July 9. General amnesty for the political offenders of 1848 and 1849.
1859, Dec. 1. The concordat signed by the Pope June 28 is published.
1860, June 16. Interview at Baden-Baden between Napoleon III., the Prince Regent of Prussia, and other German princes.
1861, June. A new constitution for the Protestant Church is settled at a synod that meets at Carlsruhe.

GRAND DUKES OF BADEN.

1806. Charles Frederick.
1811. Charles Louis Frederick.
1818. Louis William Augustus.
1830. Charles Leopold Frederick.
1852, April 24. Frederick William Louis assumes the regency.
1856, Sep. 5. Frederick William Louis assumes the title of grand duke by patent.

BADEN (Treaty).—Signed at Baden, in Switzerland, Sep. 18 (O. S. 7), 1714, between the Emperor Charles VI. and Louis XIV. It confirmed the treaty of Alt-Ranstädt (*q. v.*). By one of its provisions Landau was ceded to France. (*See* AIX-LA-CHAPELLE, Treaties.)

BADON, MOUNT.—(*See* BADDESDOWN HILL.)

BAEZA (Spain).—Near this town, which is of great antiquity, and contains many Roman relics and inscriptions, the younger Scipio vanquished Hasdrubal B.C. 208. Having fallen under the Saracen yoke, it was taken by the Spaniards A.D. 1239. It is the birthplace of the 11,000 virgins who, with St. Ursula, were, according to the legend, slaughtered by the Huns at Cologne.

BAFFIN'S BAY.—This inland sea, between Greenland and the N.E. coast of America, was discovered July 6, 1616, by the English navigator, William Baffin, from whom it takes its name.

BAGAUDÆ.—An appellation given to the peasants of Gaul who rebelled against the Romans A.D. 286. Their work was executed with fire and sword. "They asserted," says Gibbon, "the natural rights of men, but they asserted those rights with the most savage cruelty." For some time they obtained the ascendancy, but were subdued by Maximian. The term was subsequently applied to other rebels. (*See* PEASANT WAR.)

BAGDAD (Asia), on the Tigris, was founded by Al Mansur, the second caliph of the Abbassides, in 762, and remained the seat of the caliphate until Feb. 20, 1258, when it was captured, after a siege of two months, by the Mongols, and Mostasem, the last of the Abbassides (*q. v.*), was put to death. Tamerlane sacked the city July 23, 1401, erecting on its ruins a pyramid of 90,000 heads. Its Tartar rulers returned, but were expelled in 1417, by Kara Yusef. His descendants were, in 1477, replaced by Usum Cassim, who was followed by the Suffide dynasty, of Persian origin, in 1516. The possession of the city was long contested by the Persians and the Turks, and amongst the numerous sieges it sustained may be mentioned those of 1534, when it was captured by Soliman I. (the Magnificent); of 1590, when taken by Abbas I. (the Great); of 1638, when it was captured by Amurath IV.,—30,000 Persians having been ruthlessly massacred; and of 1740, when Nadir Shah was repulsed by Achmet, who rendered the pashalic independent of the Porte. Its celebrated college was founded in 1233. A Nestorian patriarch resided at Bagdad, and the Greek metropolitan was expelled in 913.

BAGNALO (Treaty).—Concluded Aug. 7, 1484, between the Venetians on the one hand, and the King of Naples, the Duke of Milan, and the Florentines, on the other. The news is said to have so affected Pope Sixtus IV. that it brought on a fit of the gout, which caused his death, Aug. 13, 1484.

BAG-PIPE.—The earliest representation of this instrument occurs in a terra-cotta discovered at Tarsus, and supposed to date from about B.C. 200. It was known to the Romans, and probably to the Greeks, and appears in a bas-relief of a Persian concert of the 6th century A.D. It is said to have been introduced into the British islands by the Danes. In Germany it was a favourite instrument during the 15th century, and it has always been prized by the Scotch Highlanders.

BAHAMA ISLANDS (Atlantic), called also the LUCAYOS, consist of about 20 inhabited islands, with innumerable rocks and islets. St. Salvador, the chief of the group, was discovered by Columbus Oct. 11, 1492, being the first portion of America discovered by him. The Spaniards conveyed the natives to Mexico, and the islands remained unpeopled till colonized by the English, under a patent granted Dec. 4, 1630. In 1641 the Spaniards destroyed the colony, but it was re-established by the English in 1666, and remained in their hands till 1703, when it was ravaged by a combined French and Spanish fleet. It afterwards became notorious as a rendezvous for pirates, who were extirpated in 1718, when a regular colonial administration was established. In 1776 New Providence was stripped by the Americans of its artillery and stores, and the governor and some other officers were made prisoners. The islands surrendered to the Spaniards May 8, 1782, but were restored to England by the 7th article of the treaty of Versailles, Sep. 3, 1783.

BAHAR, or BEHAR (Hindostan).—This territory, after changing rulers several times, was formally ceded to England by the treaty of Allahabad, Aug. 12, 1765.

BAHARITES, the first Mameluke dynasty that reigned in Egypt, were descended from Turks sold to slavery by the Tartars. They began to reign in 1244, and the last sultan of the race was expelled by the Borgites, or Circassians, the second Mameluke dynasty of Egypt, in 1381, after having reigned 137 years. (*See* BORGITES.)

BAHAWULPORE, or BUHAWULPORE (Hindostan).—This state, formerly ruled by deputy governors from Cabul, solicited an alliance with the English in 1808; and it came under the direct protection of Great Britain by treaty Oct. 5, 1838. The khan having proved faithful, received as a reward, in Feb., 1843, a part of Scinde.

BAHREIN ISLANDS (Persian Gulf).—This small group of islands, celebrated for its pearl-fishery, is called by the natives Awal, or Avál. The Portuguese, who had seized them, were expelled by the Persians in 1622; and the islands have since fallen under the sway of different Arab chiefs. During the expedition of 1809 against the pirates in the neighbourhood, they were occupied by British troops.

BAHTZ.—This fort, situated at the point dividing the East and West Scheldt, and forming the key to both channels, was captured by the land forces of the Walcheren expedition (*q. v.*), Aug. 3, 1809.

BAIÆ (Italy).—This town of Campania, which was celebrated for its harbour at a very remote period, and remarkable for its warm springs, which were mentioned by Livy under the name of the "Aquæ Cumanæ," B.C. 176, became, towards the close of the Roman Republic, a fashionable resort of the wealthy citizens of the capital. Horace (B.C. 65—B.C. 8) refers to the beauty of its bay, and it subsequently became a favourite residence of the Emperors Caligula (A.D. 37—41), who erected a bridge of boats upwards of two Roman miles in length across the bay, Nero (54--68), Hadrian, who died here July 10, 138, and of Alexander Severus (222—235), who had several magnificent villas at Baiæ. The springs to which the town owed its repute continued in use as late as the 6th century.

BAIBOUT (Battle).—The Russians, under Paskewitch, defeated the Turks at this town in Asiatic Turkey, Sep. 28, 1829. The total loss of the victors did not exceed 100 men. The Turks lost 700 killed, 1,200 prisoners, 6 guns, and 12 standards.

BAIL.—"The system of giving sureties, or bail," says Sharon Turner (Anglo-Saxons, iii. Ap. i. ch. 6), "to answer an accusation, seems to have been coeval with the Saxon nation." The Statute of Westminster I. (3 Edw. I. c. 15), in 1275, defined what persons were bailable, and what were not; and this act was enforced by 27 Edw. I. stat. 1, c. 3 (1299). By 1 Rich. III. c. 3 (1484), justices of the peace were allowed to bail offenders, and the facility thus accorded having led to some abuses, not less than two justices were, by 3 Hen. VII. c. 3 (1487), required. Bail was regulated by subsequent statutes, more particularly by the Habeas Corpus Act (31 Charles II. c. 2, 1679), which, as Hallam remarks (Const. Hist. of Eng. iii. ch. 12), "introduced no new principle, nor conferred any right upon the subject." Provisions against excessive bail are embodied in various statutes. Bail in cases of felony is regulated by 7 Geo. IV. c. 64 (May 26, 1826). This act, entitled "An Act for Improving the Administration of Criminal Justice in England," repealed several previous statutes. Bail in error is regulated by s. 151 of 15 & 16 Vict. c. 76 (June 30, 1852), the Common Law Procedure Act.

BAILIFF.—Two bailiffs were appointed for the city of London in the first year of the reign of Richard I. (1189); though such officers under another name existed in Anglo-Saxon times. We learn from the "Liber Albus" that the sheriffs of the city of London were formerly styled bailiffs; and we know, from the same authority, that such officers were in existence at the time of the Norman Conquest. In 1207 the office of sheriff superseded that of bailiff.

BAIOLENSIANS, or BAGNOLENSIANS.—Manichæans, so called from Bagnols, in Languedoc, where they arose in the 8th century. Another sect, with the same name, a branch of the Cathari, arose in Provence during the 12th century.

BAIREUTH.—(*See* BAYREUTH.)

BAIZE.—The art of making baize was introduced into England by a body of Dutch artisans, who settled at Colchester in 1568; and their privileges were confirmed by letters patent under the great seal in 1612. An act of Parliament was passed in 1660 (12 Charles II. c. 22) for the regulation and protection of their trade. It took effect from Sep. 20, 1660.

BAKEHOUSES REGULATION ACT. — By 26 & 27 Vict. c. 40 (July 13, 1863), it was enacted that no person under the age of 18 years should be employed in any bakehouse between the hours of nine at night and five in the morning. In towns of more than 5,000 inhabitants bakehouses, if painted, were to have three coats of paint, to be renewed every seven years, and well washed every six months; and if limewashed they were to be re-washed every six months. Other regulations were enacted for ensuring cleanliness, efficient ventilation, &c., the whole being enforced by fines or imprisonment.

BAKER. — In early ages every household prepared its own bread. Public bakers are first mentioned as existing at Rome B.C. 173. Athenæus speaks of the Cappadocians, the Lydians, and the Phœnicians as the best bakers. It is probable the trade arose in the East. The punishments for bakers who transgressed the law were, at an early period of our history, extremely severe. Fabyan notices that in 1258 the tumbrel was temporarily substituted for the pillory; and that "sharpe correction upon bakers for making of light bread" was administered upon several of the fraternity in 1485. The bakers formed a brotherhood in the reign of Henry II., about 1155. The white bakers existed as a company in 1308, and obtained in 1485 a new charter, which was confirmed by Henry the Seventh's successors. The brown bakers, who are said to have existed as a company in 1380, were incorporated June 9, 1621.

BAKERIAN LECTURES. — Henry Baker, the microscopist, born May 8, 1698, was elected a fellow of the Royal Society March 12, 1740,

and died Nov. 25, 1774. By his will he left £100, the interest to be devoted to the maintenance of an annual lecture in connection with the Royal Society.

BAKU (Asia).—This port, in the Caspian, mentioned as early as 943, and the neighbouring territory, were surrendered by Persia to Russia in 1723, and restored to Persia in 1735. The Russians seized Baku in 1801, and it was ceded to them by the treaty between Russia and Persia, Oct. 19 (O.S. 7), 1813.

BALACLAVA.—A small port in the Crimea, about 10 miles to the east of Sebastopol. The harbour is commodious, though the entrance is very narrow; and it was with great difficulty that accommodation was obtained for the British ships during its occupation in the Crimean war. The troops took possession Sep. 26, 1854, a portion of the fleet having already arrived. They improved the harbour, constructed quays, built a new town, with storehouses, hospitals, &c., and laid down a line of rail to the camp, about seven miles distant. Soon after the conclusion of the treaty of Paris, the army of occupation was gradually withdrawn, and the last soldier quitted the place during the summer of 1856. (*See* RUSSIAN WAR.)

BALACLAVA (Battle).—Fought Oct. 25, 1854, between the Russians and the British and Turkish troops. Early in the morning a powerful Russian force, led by Liprandi, drove the Turks from some earthen redoubts facing the Tchernaya, a weak point in the English position. The further advance of the Russians was checked by the 93rd Highlanders, under Sir C. Campbell (Lord Clyde), and the enemy was quickly repulsed by a charge of the heavy cavalry. From this day the British lines were, on account of the insufficiency of our force, contracted, and the communication by the Woronzoff road was effectually closed.

BALACLAVA (Charge), called "The Ride of the Six Hundred." Owing to some misconception of orders, the light cavalry brigade, only 670 strong, followed up the battle of Balaclava (Oct. 25, 1854), by charging the Russian infantry and cavalry in position, protected by a powerful artillery. The exploit has scarcely a parallel in the annals of war. In spite of the fearful and almost hopeless nature of their task, that handful of British horsemen rode fearlessly onward. When at a distance, their ranks were shattered by a murderous discharge, and many a gallant fellow was struck down before he could reach the foe. The Russians quailed before this band of heroes. Their artillery fired upon the struggling mass of friend and foe. The heavy cavalry and the French Chasseurs d'Afrique covered their retreat. The glorious but fatal charge lasted 25 minutes. More than two-thirds of the men were killed or wounded, and 400 horses destroyed. The moral effect it produced was extraordinary.

BALAGHAUT DISTRICTS (Hindostan).—These provinces once formed part of the Hindoo kingdom of Bijyangur, and on its fall were divided into several independent states, until conquered in rapid succession by Hyder Ali, between 1766 and 1780. On the dismemberment of Tippoo Saib's empire in 1799, a considerable portion came into the possession of the East India Company, and the remainder was taken in 1841.

BALAMBANGAN (Indian Archipelago).—This island was ceded by the King of Sooloo, in 1762, to the East India Company, and a settlement was formed in the following year. In Aug., 1774, intelligence was received that the Spanish governor of the Manillas had threatened to destroy the works and fortifications in case the English settlers did not retire; and this threat was put into execution Feb 24, 1775. Another settlement, founded in 1803, was abandoned, and the island is now uninhabited.

BALANCE OF POWER.—The first combined attempt to preserve the balance of power in European affairs was made during the invasion of Italy by Charles VIII. of France, 1494—1496. Incited by the Emperor Maximilian I., the Italian states and some other European powers held secret conferences by night at Venice, and the celebrated league was signed at that city, March 31, 1495, between Austria, Milan, Rome, Spain, and the Venetian republic. Its object was to defeat the ambitious projects of the French king. Robertson remarks that princes and statesmen "had extended on this occasion to the affairs of Europe the maxims of that political science which had hitherto been applied only to regulate the operations of the petty states in their own country. They had discovered the method of preventing any monarch from rising to such a degree of power as was inconsistent with the general liberty; and had manifested the importance of attending to that great secret in modern policy, the preservation of a proper distribution of power among all the members of the system into which the states of Europe are formed." After showing that the attention of Italian statesmen was from that period directed to the maintenance of the principle, he adds: "Nor was the idea confined to them. Self-preservation taught other powers to adopt it. It grew to be fashionable and universal. From this æra we can trace the progress of that intercourse between nations which has linked the powers of Europe so closely together; and can discern the operation of that provident policy which, during peace, guards against remote and contingent dangers; and, in war, has prevented rapid and destructive conquests." The principle was first publicly acknowledged at the peace of Westphalia, Oct. 24, 1648.

BALASORE (Hindostan).—Different European nations established factories here at the commencement of the intercourse with India. The English factory was destroyed by fire in Nov. 1688. The town itself was ceded to England by the Danes in 1846.

BALEARIC ISLANDS (Mediterranean).—This group, consisting of five islands, Cabrera, Formentera, Iviza, Majorca, and Minorca, off the coast of Spain, is supposed to have been colonized by the Phœnicians. The Carthaginians reduced the inhabitants to subjection. After the fall of Carthage they regained their independence. The Romans, under the

pretence that the people were pirates, took possession of the Balearic Islands, B.C. 123. The Vandals seized them A.D. 423, and the Moors A.D. 790; but they were wrested from the latter by the troops of Charlemagne in 799, and placed under his protection. The Moors, however, regained their footing, and were not expelled until 1286. (*See* MAJORCA and MINORCA.)

BALIOL COLLEGE (Oxford).—Founded by John Baliol, of Barnardcastle, Durham (father of Baliol, King of Scotland), between the years 1263 and 1268. He died in 1269, during the progress of the work, which was completed by his widow. Her statutes, dated the 10th year of the reign of Edward I. (1282), are still preserved in the college.

BALISTA. — Described by Gibbon as "a powerful cross-bow, which darted short but massy arrows." Belisarius made use of the balista in his defence of Rome against the Goths, A.D. 537. The more modern weapon is supposed to have been a species of "gyn," rather than a hand instrument. Its introduction into England is usually assigned to the 12th century. Richard I. appears to have been the first to adopt the manubalista, after its use had been prohibited by Innocent II. in 1139.

BALKH (Asia), the ancient Bactriana, is now a dependency of the khanat of Bokhara. Its chief city, also called Balkh, the ancient Bactra, is styled by Orientals the "Mother of Cities," on account of its great antiquity. It was taken from the Uzbeg Tartars by the Khan of Bokhara in 1820.

BALL. — Games with the ball have been common amongst ancient and modern nations. The Anglo-Saxons played at ball. An amusement of this kind was in vogue in this country amongst ladies and gentlemen in the 14th century, and it became fashionable at courts in the 16th. Fitzstephen, who wrote in the reign of Henry II., in alluding to sports at Shrovetide, says,—"After dinner, all the youth of the city goeth to play at the ball in the fields; the scholars of every study have their balls. The practisers also of all the trades have every one their ball in their hands." Some writers suppose football is here meant. A complaint of the citizens of London was brought before the Privy Council in July, 1446, respecting the erection of several places where the people played "at the ball, cleche, and dice." It has been highly recommended as a gymnastic exercise.

BALLARAT (Victoria).—This goldfield, about 100 miles from Melbourne, was first worked in Sep., 1851.

BALLENY ISLES.—(*See* ANTARCTIC REGIONS.)

BALLET.—Dancing applied to theatrical representation is an ancient amusement, supposed to have been revived in Italy during the 16th century. Baltagerini, director of music to Catherine de Medici, was the first to introduce the ballet into France, where it became very popular in the time of Louis XIII. Since that period it has undergone various improvements. The first dramatic piece performed in England, in which the story was entirely carried on by dancing and action, was a production by Mr. John Weaver, called "The Tavern Bilkers," performed at Drury Lane in 1702. A work of higher pretensions was produced by the same author at Drury Lane in 1716. It was entitled "The Loves of Mars and Venus," and its success led to the establishment, in this country, of the ballet as a branch of theatrical amusements.

BALLINAMUCK (Battle). — A French force landed at Killala Aug. 22, 1798, and having been joined by some Irish rebels, were defeated and taken prisoners at Ballinamuck, Sep. 8, 1798.

BALLOON.—Albert of Saxony, a Dominican monk, who flourished at the commencement of the 14th century, was the first to form a correct notion of the principle on which balloons might be constructed. The idea was taken up by several learned men; and Bishop Wilkins, in 1680, speaks of a carriage with sails, like a windmill, to be propelled through the air. The brothers Montgolfier, papermakers, at Annonay, near Lyons, were the first to secure a practical result, and, June 5, 1783, launched the first balloon, which, after them, was then called a Montgolfier. The experiment was repeated at Paris, Aug. 27, 1783; and, Nov. 21 in the same year, M. Pilatre de Rozier and the Marquis d'Arlandes made the first ascent from Paris, which was accomplished with success, and the adventurers alighted in safety about six miles from the point at which they had started. "The Montgolfiers," says a writer in the "Encyclopædia Britannica," "had the annual prize of 600 livres adjudged to them by the Academy of Sciences; the elder brother was invited to court, decorated with the badge of St. Michael, and received a patent of nobility; and on Joseph a pension was bestowed, with the further sum of 40,000 livres, to enable him to prosecute his experiments with balloons." The first ascent in a hydrogen balloon was made Dec. 1, 1783, at Paris, by Messieurs Charles and the brothers Robert, who, after a pleasant voyage, alighted in safety about 27 miles from the spot where they started. Since that time great improvements have been made in the construction of balloons. The first ascent made in England was by Lunardi, Sep. 21, 1784. Blanchard and Jefferies crossed the Channel, from Dover to Calais, Jan. 7, 1785. Count Zamfieccari, Admiral Vernon, and a Miss Grice, of Holborn, took their seats in the car of one of these machines March 23, 1785. The balloon was, however, over-weighted, and the lady was compelled to retire, which she did with great reluctance, and burst into tears at her disappointment. A successful ascent was made at Ranelagh Gardens, Dublin, Jan. 20, 1785. Balloon ascents have since been of frequent occurrence; and we read of one at Constantinople, by a Persian physician, in 1786. Rozier and Romain were killed through the ignition of their balloon, in an attempt to cross the Channel, June 15, 1785; and William Sadler, son of the celebrated aëronaut of that name, was killed by a fall from a balloon in 1825. The French are said to have employed balloons on various occasions for the purpose of reconnoitring the position of an enemy. The most remarkable instances occurred at Liège, in September, 1794, and during the

Italian campaign of 1859. Mr. Glaisher and Mr. Coxwell have made several ascents for scientific purposes, the first at Wolverhampton, July 17, 1862. M. Nadar's monster balloon, the Géant, was exhibited at the Crystal Palace in 1863. Mr. Chambers, an amateur aëronaut, was killed during an ascent at Basford, Notts, Aug. 24, 1863. Mr. Coxwell's balloon was destroyed by a mob at Leicester, on the occasion of a Foresters' fête there, July 11, 1864.

BALLOT was used in several states of ancient Greece, as well as amongst the Romans. It was first introduced at Rome for the election of magistrates, by the Gabiana lex, B.C. 139; for state trials, treason excepted, by the Cassia lex, B.C 137; and for the legislative assembly, by the Papinia lex, B.C. 131. The ballot was used in the republic of Venice. It was employed at a political debating society, called the Rota, held nightly, in 1659, at Miles's coffee-house, New Palace Yard, Westminster. Addison, in a letter dated Feb. 20, 1708, speaks of the House of Commons being engaged upon a project for deciding all elections by balloting. Its adoption in the election of members for the House of Commons has been frequently urged.

BALL'S BLUFF (Battle). — (*See* LEESBURG HEIGHTS.)

BALLYHOE (Battle).—O'Neill was checked in his career of plunder and devastation within the British pale, at a battle fought at Ballyhoe, in Aug., 1539.

BALLYNAHINCH (Battle).—Fought during the Irish rebellion, June 13, 1798. The rebels, led by Munroe, a draper of Lisburn, were defeated, and this terminated the rising in the north of Ireland.

BALMORAL CASTLE. — Queen Victoria selected this mansion and domain, situated on the right bank of the river Dee, about 45 miles from Aberdeen, as a royal residence, in Sep., 1848. The property, which had been previously rented, was purchased in 1852, and a new castle has been erected on the estate.

BALTA-LIMAN (Treaty). — Concluded between Russia and Turkey, at Balta-Liman, May 1, 1849. It arose out of the transactions relating to the insurrection in the Danubian provinces and the Russian occupation. Russia was secured in the same rights as she then exercised in the principalities for seven years.

BALTIC EXPEDITIONS.—During the war with Russia, two expeditions were sent into the Baltic Sea by the English Government. The first, under the command of Sir Charles Napier, sailed from Spithead March 11, 1854, and was afterwards joined by a French squadron, and reinforcements from England. The fleets entered the Baltic Sea March 20. Several merchantmen were captured, and the Russian ports blockaded, until more decisive operations were undertaken on the arrival of a French expeditionary force. (*See* ALAND ISLES.) The fleet returned home during the autumn.—The second, accompanied by gun and mortar boats, under the command of Admiral Sir R. S. Dundas, sailed April 4, 1855, an advance squadron having left March 20. It was joined by a French squadron June 1. Several infernal machines were taken up, and the ships sailed within sight of Cronstadt (*q. v.*). Its operations, chiefly directed against Hango (*q. v.*) and Sweaborg, are described under these titles. The fleets returned during the autumn.

BALTIC SEA. — By a treaty concluded between Russia and Sweden, at St. Petersburg, March 9, 1759, to which Denmark acceded March 17, 1760, these nations agreed to maintain a fleet to preserve the neutrality of the Baltic for purposes of commerce.

BALTIMORE (United States). — This city, founded in 1729, in accordance with an act passed by the proprietary government of Maryland, received the name of Baltimore in 1745, and became the shire town of the county of the same name in 1768. In 1780 it was made a port of entry, and in 1791 was selected as the site of the Roman Catholic College of St. Mary. The charter of incorporation was granted Dec. 31, 1796, and the University of Maryland was founded in 1812. Baltimore was attacked by British forces under Gen. Ross Sep. 12, 1814. The Washington Medical College was incorporated in 1833. On the outbreak of the great American civil war a party of Federal volunteers on their way to Washington were attacked by the citizens of Baltimore, April 19, 1861. A conflict resulted, which occasioned the destruction of several lives, and the route through the city was closed to the northern troops for more than two weeks. Eventually, however, Baltimore, with the other cities of Maryland, adopted the Federal cause.

BAMBERG (Bavaria) is said to have been founded by a colony of Saxons in 804. Other authorities state that it was founded by the Emperor Henry II. in 1004, finished in 1012, and rebuilt, after a conflagration, in 1110. It was made a bishopric in 1007; and in 1020, on the visit of Pope Benedict VIII. to Germany, the emperor presented the city and bishopric to the Roman see, on condition of receiving every year a white horse and 100 silver marks. The bishopric afterwards became independent, was secularized in 1801, and assigned to Bavaria in 1803. Councils were held here in 1020, 1052, and 1148. Bamberg surrendered to the Prussians May 16, 1759, and during two days was given up for pillage. It was again captured in 1763.

BAMBOROUGH, or BAMBURG (Northumberland).—This ancient town was built by Ida, who reigned 12 years, from 547. Bede says it was called Bebba, after its queen. It was frequently pillaged by the Danes. The castle, built in 1070, was wrested by stratagem from his rebellious barons by William II., in 1096, and was besieged and taken by Edward IV., Dec. 24, 1463.

BAMEEAN (Battle).—Fought between Dost Mohammed Khan's army and his Oosberg allies, under the Walee of Khooloom, and a small English and Sepoy force, commanded by Brigadier Dennie, Sep. 18, 1840. The former were completely routed, and their leader fled into Kohistan.

BAMFLEET (Essex). — This fortress was

stormed and captured by King Alfred, and several Danish ships in the neighbourhood were destroyed in 894.

BAMPTON LECTURES.—Founded by Rev. J. Bampton, Canon of Salisbury, who bequeathed to the university of Oxford estates, the proceeds of which were to be devoted to the endowment of eight divinity lecture-sermons, to be preached every year at Great St. Mary's. The cost of the publication of the lectures, within two months of delivery, was to be defrayed out of the endowment. The first course was delivered in 1780, by the Rev. J. Bandinel. Only those who have taken the master's degree at Oxford or Cambridge are eligible; and a second course by the same person is not allowed.

BANBURY (Oxfordshire).—In 1125 Blois, Bishop of Lincoln, erected a castle here, which was frequently assailed. The royalists captured it in 1642, defended it with great gallantry during a siege of 13 weeks in 1644, and again in 1646. The parliamentary party demolished it when it came into their possession. A battle was fought at Danesmore, near this town, Wednesday, July 26, 1469, in which the Lancastrians were defeated by the troops of King Edward IV.

BANCA, or BANJA (Indian Ocean).—This island, possessing tin mines, discovered in 1710, was ceded to the East-India Company by Sultan Najemudin, of Palembang, in 1812. By the second article of the convention of Aug. 13, 1814, the English ceded the island to the King of the Netherlands, in exchange for Cochin and its dependencies, on the coast of Malabar.

BANCHOR.—(*See* BANGOR-ISCOED.)

BANCROFT'S HOSPITAL.—Almshouses, near Mile End, London, erected in 1735, pursuant to the will of Francis, grandson of Archbishop Bancroft. Accommodation is afforded for 24 poor men of the Drapers' Company, and a school for 100 boys.

BANDA ISLANDS (Pacific), 10 in number, were discovered, in 1511, by the Portuguese, who were expelled by the Dutch in 1603. The English established a factory in 1608. After various struggles between them and the Dutch the latter obtained possession in 1664. They retained their hold until March 8, 1796, when the islands surrendered to an English squadron. Having been restored to the Dutch, by the treaty of Amiens, in 1802, they were again captured by the English, Aug. 9, 1810, and once more restored to the Dutch at the peace of 1814.

BANDA ORIENTAL.—(*See* URUGUAY.)

BANGALORE (Hindostan) was captured by Lord Cornwallis March 22, 1791. The fortress was, however, restored to Tippoo Saib, by the treaty of peace of March 19, 1792. He destroyed it, but it was repaired in 1802.

BANGKOK (Siam).—This city was chosen by Pia-tac as the capital of Siam (*q. v.*) about the year 1760. In 1849 the cholera carried off 20,000 of the inhabitants in about 12 days. It was visited by Sir J. Bowring in 1855.

BANGOR (Caernarvonshire) was made a bishopric early in the 6th century, Daniel, Abbot of Bangor, in Flintshire, its first bishop, having been appointed in 516. The cathedral was destroyed in 1071; and having been rebuilt, suffered severely in subsequent wars. An order for union of the see with St. Asaph, issued in 1838, was rescinded by 10 & 11 Vict. c. 108 (July 23, 1847).

BANGOR (United States) was captured by a party of English sailors and marines Sep. 3, 1814.

BANGORIAN CONTROVERSY.—During the reign of William III., the Lower House of Convocation had requested "that some synodical notice might be taken of the dishonour done to the Church by a sermon preached by Mr. Benjamin Hoadley, at St. Lawrence Jewry, Sep. 29, 1705, containing positions contrary to the doctrine of the Church, expressed in the first and second parts of the homily against disobedience and wilful rebellion." The enmity of this writer's opponents was further excited by a sermon which he preached before George I., March 31, 1717, and afterwards printed under the title, "The Nature of the Kingdom or Church of Christ." He had been made Bishop of Bangor in 1715; was translated to Hereford in 1721; to Salisbury in 1723; and to Winchester in 1734. The so-called dangerous tenets of this discourse, and of a work entitled, "A Preservative against the Principles and Practices of the Non-Jurors," were denounced in the report of a committee of the Lower House of Convocation in 1717. This gave rise to a general paper war between the supporters and opponents of Bishop Hoadley's views on various points, known as the Bangorian Controversy.

BANGOR-ISCOED, or BANCHOR (Flintshire), which must not be confounded with Bangor, in Caernarvonshire; or Benchor, in Ireland; was the seat of the largest ancient monastic establishment in Great Britain. It contained above 2,000 monks, and was founded by Dunod in the beginning of the 6th century. Ethelfrith, King of Northumberland, instigated, it is supposed, by Augustine, who was resolved to reduce the primitive Christian Church in these islands to subjection to Rome, destroyed the monastery and massacred all the monks and students. This event probably took place in 603, but as some confusion has arisen in the chronology of the time, the date cannot be ascertained with certainty. Augustine is said to have died in 604, though there is some doubt on the subject. Bede says, Augustine foretold of these monks that if they would not join in unity with their brethren, they should be assailed by their enemies, and that if they would not preach the way of life to the English people, they should perish at their hands.

BANK OF ENGLAND.—Incorporated by royal charter, July 27, 1694, was projected by William Paterson, who, with other merchants in London, subscribed £1,200,000 as a loan to the government, to bear interest at 8 per cent. per annum. The first charter provided that at any time after Aug. 1, 1705, on a year's notice and the repayment of the £1,200,000, the said charter should cease and determine. It received the sanction of Parliament, and thus were the governor and company of the Bank of England established. Further loans

have since been advanced to the government, the rate of interest has been reduced, and the charter has been repeatedly renewed and extended. The last, known as Sir R. Peel's act (7 & 8 Vict. c. 32), received the royal assent July 19, 1844. The bank suspended cash payments in 1696, but having recovered from a temporary pressure flourished greatly, until again compelled by the drain upon its resources, caused by the French war at the close of the last century, to suspend cash payments, for which an order in council appeared Feb. 27, 1797, and they were not resumed until May 1, 1821. By the 6th section of the Bank Charter Act of 1844, the directors are required to render a weekly account in a prescribed form to the Commissioners of Stamps and Taxes, to be published in the next succeeding *Gazette*. Since 1828 branch establishments of the Bank of England have been formed in several provincial towns. The first stone of the Bank of England was laid Aug. 3, 1732, the business having been transacted in the Grocers' Hall until June 5, 1734, when it was removed to the new building. Sir John Soane commenced alterations in 1788, and completed the present structure in 1821.

BANK OF IRELAND was established by act of Parliament, with privileges similar to those enjoyed by the Bank of England, and opened in June 1783. In 1802 the governors purchased the buildings in College Green used as the Houses of Parliament previous to the Union in 1801. These were adapted for the purposes of the bank, which was transferred here in 1808. The Bank of Ireland is now regulated by 8 & 9 Vict. c. 37 (July 21, 1845).

BANK OF SCOTLAND, the first establishment of the kind in that part of the kingdom, was founded at Edinburgh in 1695, receiving a charter from William III. and the Scottish Parliament. The second, the Royal Bank of Scotland, was incorporated in 1727.

BANK NOTES, which were unknown to the money-lenders of Greece and Rome, became general in England in the 18th century, especially after 1750. Bramah's machine for numbering and dating them, invented in 1807, was adopted by the Bank of England in 1809. Steel plate engraving, used in consequence of a recommendation of the Society of Arts in 1818, was supplanted in 1837 by the siderographic process of Perkins and Heath, which gave place in 1855 to Smee's electrotype surface printing.

BANKRUPTCY.—The word bankruptcy is derived through the French from *bancus*, the counter, *ruptus*, broken. Ancient legislation on this subject was extremely severe. According to the generally received interpretation, the Roman Law of the Twelve Tables gave to creditors the power of cutting a debtor's body in pieces, each of them receiving a proportionate share. Debtors were imprisoned in chains, subjected to stripes and hard labour at the mercy of the creditor, and liable with their wives and children to be sold to foreign servitude. The severity of these laws was relaxed by the "Lex Poetelia Papiria," B.C. 326, and the Christian emperors subsequently introduced the law of cession, by which a creditor making *cessio bonorum* (*i.e.*, giving up all his goods), was exempted from personal penalties. The first English statute on this subject, 34 & 35 Hen. VIII. c. 4 (1543), was principally directed against the frauds of traders who were in the habit of acquiring goods from other persons and then escaping to foreign countries. This was made felony, and punished capitally. By 13 Eliz. c. 7 (1571), bankruptcy was confined to those who used the trade of merchandise, or sought their living by buying and selling. By 21 James I. c. 19 (1624), which extended bankruptcy to scriveners, a bankrupt might, unless his inability to pay his debts arose from some casual cause, be set upon the pillory for two hours, and have one of his ears nailed to the same and cut off. It was repealed in 1816. Bankruptcy was extended to bankers by 5 Geo. II. c. 30 (1732). By many subsequent statutes aliens, denizens, brokers, factors, farmers, graziers, &c., were made liable to bankruptcy. All these statutes were consolidated by 6 Geo. IV. c. 16 (May 2, 1825), which appointed commissioners for carrying the law into effect. These laws were again amended and consolidated by 12 & 13 Vict. c. 106 (Aug. 1, 1849); and this act was further amended by 15 & 16 Vict. c. 77 (June 30, 1852), and by the Bankruptcy Act of 1854. The Court of Bankruptcy was established by 1 & 2 Will. IV. c. 56 (Oct. 20, 1831). This act was amended by 5 & 6 Will. IV. c. 29 (Aug. 21, 1835); and by 5 & 6 Vict. c. 122 (Aug. 12, 1842), which came into operation Nov. 11, 1842, and established bankruptcy courts in the country. A Royal Commission for inquiring into the amendment of the bankruptcy laws was appointed Aug. 23, 1853, and published a report April 10, 1854, which led to a further alteration in the law by 17 & 18 Vict. c. 119 (Aug. 11, 1854). The law was again amended by 24 & 25 Vict. c. 134 (Aug. 6, 1861). The Irish bankruptcy laws were consolidated by 6 Will. IV. c. 14 (May 20, 1836); and they were further amended and assimilated to the English law by several subsequent statutes, the last being 20 & 21 Vict. c. 60 (Aug. 25, 1857). The Scotch bankruptcy laws were consolidated by 19 & 20 Vict. c. 79 (July 29, 1856), which came into operation Nov. 1, 1856, and was further amended by 20 & 21 Vict. c. 19 (Aug. 10, 1857).

BANKS. — These establishments existed amongst the Greeks and Romans. In modern times the Jews were the first bankers. Banks were established in Italy in the 12th century. The first public bank was founded at Venice in 1157, and the first bank of exchange and deposit was established at Barcelona in 1401. Money matters were for some time regulated by the Royal Exchangers, but their calling fell into disuse until revived by Charles I. in 1627. The Royal Mint, in the Tower of London, was used as a bank of deposit until Charles I., by a forced loan, in 1638, destroyed its credit. The Goldsmiths' Company undertook private banking in 1645, but on the closing of the Exchequer in 1672 their transactions terminated. Child, of Fleet Street, was the first regular banker, and he commenced business soon after the Restoration. (*See* BANK OF ENGLAND AND JOINT-STOCK BANKS.)

BANNATYNE CLUB (Edinburgh) was established by Sir Walter Scott in 1823, for printing works illustrating the history, antiquities, and literature of Scotland. The club, which held annual meetings in December, was dissolved in 1860.

BANNER.—Is of very early origin, being referred to in Num. ii. 2, B.C. 1490. Banners of some kind or other were used amongst all ancient nations, and the practice has been followed in modern times. Bede represents Augustine and his companions going in procession to meet Ethelred in 597, bearing banners, with a silver cross, and the image of our Saviour. Alfred captured the celebrated Danish banner, called the Raven, in 878. In the monasteries various banners were kept for festivals and great commemorations.

BANNERET.—(*See* KNIGHT BANNERET.)

BANNOCKBURN (Battles).—Two bearing this name were fought; the first at Bannockburn, Scotland, between the English, under King Edward II., and the Scotch, under Robert Bruce, in which the latter gained the victory, Monday, June 24, 1314; and the second at Sauchie-burn, near Bannockburn, June 11, 1488, on which occasion James III., of Scotland, was slain by an army raised by the partisans of the Duke of Albany.

BANNS.—Tertullian, who died A.D. 240, states that the Primitive Church was forewarned of marriages. The practice was probably introduced into France in the 9th century. The Bishop of Paris enjoined it in 1176; and it was regularly established in the Latin Church by the fourth Lateran Council, in 1215. The earliest enactment on the subject in the English Church is the 11th canon of the Synod of Westminster, in 1200, which decrees that no marriage shall be contracted without banns thrice published in the church. The 62nd canon of the Synod of London (1603—4) forbids the celebration of marriage unless the banns have been first published three several Sundays, or holy days, during divine service, in the parish churches or chapels where the parties dwell. The publication was required to be made on Sundays, and not on holy days, by 26 Geo. II. c. 33 (1752). This act has been superseded by 4 Geo. IV. c. 76 (1823), and various laws have since then been passed, but this regulation remains in force. By the latter act it is provided that if the marriage does not take place within three months after the publication of the banns, they must be republished.

BANQUETING HOUSE (London).—Intended for the reception of ambassadors and state ceremonials, and soon after converted into a chapel, was built by Inigo Jones 1619—1622. It occupies the site of an old building that had been devoted to similar uses. The ceiling, representing the apotheosis of James I., in nine compartments, was painted by Rubens. Charles I. slept in one of the rooms the night before his execution, and passed through one of its windows to the scaffold.

BANTAM (Java).—The Dutch commenced trading at this place in 1602 and the English in 1612, and, after various disputes, the latter established a factory in 1619; but were expelled in 1683 by the Dutch, who abandoned the place in 1817.

BANTRY BAY (Sea-fights).—Admiral Herbert, afterwards Lord Torrington, with 19 sail of the line, attacked, in this bay, May 1, 1689, a French fleet of 28 ships-of-war, carrying from 60 to 70 guns each, and 5 fire-ships. A short action ensued, when Admiral Herbert tacked in order to obtain the weather-gauge, and the engagement was not renewed.—A French fleet carrying 16,000 troops, intending to co-operate with the Irish rebels, anchored in this bay, Dec. 22, 1796. They were compelled by a severe gale to cut their cables and stand out to sea, Dec. 25, and it was not until Dec. 29 that they were able, in a sadly damaged state, again to cast anchor in the bay. A landing was not even attempted, and the remnant of the expedition returned to France. —The men in Admiral Michell's squadron mutinied here, Dec. 1—11, 1801. The trial of 14 of the mutineers commenced on board the *Gladiator*, at Portsmouth, Jan. 8, 1802, and terminated on the 12th, when 13 out of the 14 culprits were sentenced to death, and suffered on the 15th —the day on which the trial of some of their associates commenced.

BAPHÆON (Battle).—Othman, founder of the Ottoman empire, passed the heights of Mount Olympus, descended into the level country of Bithynia, and defeated the Emperor Andronicus III., at Baphæon, in the commencement of the 14th century.

BAPTISM.—The first use of baptism is ascribed by Lightfoot to Jacob, on the admission of the proselytes of Sechem into his family and the Church of God, about B.C. 1732 (Gen. xxxv.). The Jews administered baptism to all Gentiles before admitting them into their Church; but baptism was not made a permanent institution until the time of John the Baptist, who performed the rite in the waters of Jordan on those that flocked to hear his preaching in the autumn of the year 26 (Matt. iii. 6); and Christ himself was baptized by him in January of the year 27 (Matt. iii. 13—15). It was practised in various forms by the Primitive Church, and was received as the initiatory rite by Christians, though certain heretics rejected it altogether. The ceremony was at first, according to the testimony of Justin Martyr, who wrote in the 2nd century, and of Tertullian, who wrote in the 3rd, performed by trine immersion in rivers. This is said to have been discontinued on account of persecution. Baptisteries containing pools for the performance of the rite were erected outside the churches about the 3rd century. Baptism was usually solemnized by the primitive Christians in the season from Easter to Whitsuntide. Siricius, in his decretal epistle to Himerius in 385, censures the new custom of some Spanish bishops in baptizing at Christmas, Epiphany, and on Saints' days. Sacred fonts were constructed in the porches about the 4th century, and in the 6th century within the churches. The early English Church retained the practice of immersion till a late period, as the Council of Chelsea, July 27, 816, condemned the innovation of sprinkling. The Quakers reject baptism altogether.

BAPTISTS.—The name applied to several sects who deny the validity of infant baptism, and require immersion, after the example of John the Baptist. They are in many respects followers of the Anabaptists, who arose in Germany in 1521. They are divided into several sects: the chief in England are the General, or Arminian Baptists, who believe that God has excluded no man from salvation by any sovereign decree; and the Particular, or Calvinistic Baptists, who published a confession of faith in 1643, which was reprinted in 1644 and 1646, and revised in 1689. The first congregation of English Baptists, the followers of John Smith, who died at Leyden in 1610, was organized in London in that year. These were General Baptists, and the Particular Baptists trace their origin to a congregation established in London in 1616. Their first institution in America was at Providence, in 1639. (*See* ANABAPTISTS.)

BAR (Confederation).—The Roman Catholics of Poland, during their fierce religious struggles with the Dissidents, the latter being supported by the Russians, seized the fortress of Bar, in Podolia, and formed the Confederation of Bar in March, 1768. Similar confederations were formed in other towns, and they were merged in a general confederation, which met first at Eperies, in Hungary, then at Teschen, in Silesia, and afterwards at Bielitz, close to the frontiers of Poland. Anarchy ensued, and the confederates were defeated by the combined forces of Austria, Prussia, and Russia, those powers having coalesced for the purpose of interfering in Poland.

BAR-SUR-AUBE (Battle).—The allies obtained a signal victory over the French near this town, in France, Feb. 27, 1814.

BARBADOES (Atlantic), one of the Caribbee Islands discovered by the Portuguese at the close of the 15th century. The English first landed here in 1605; and their first settlement was formed in 1624. Various disputes having occurred between different claimants, the Earl of Carlisle obtained the right of possession by patent, dated July 2, 1627. Sir William Courteen, an English merchant, had fitted out ships to effect a settlement, one of which landed colonists Feb. 17, 1625, who founded Jamestown. He was displeased at this arrangement, and obtained a grant of the island in 1628; but by another patent, dated April 7, 1629, Carlisle was confirmed in the possession. It afforded a refuge to the royalists, and was captured by the republicans in 1652. After the Restoration, litigation ensued between rival proprietors, and these led to the imposition of a tax on the inhabitants, which was not repealed until 1838. Barbadoes was devastated by tremendous hurricanes in August, 1675, 1780, and 1831. It was created a bishop's see in 1824.

BARBARY (Africa).—This term has been applied to describe the northern portion of Africa, divided, both in ancient and modern times, into several states. The name is supposed to be derived from the Berbers, who occupied the country on its invasion by the Saracens in the 7th century.

BARBASTRO, or BALBASTRO (Spain).—This city was taken from the Moors in 1065 and again in 1097, by Pedro I., King of Aragon. The church was erected into a cathedral in 1090, which was confirmed by a papal bull in 1101, from which date there is a regular succession of bishops. A sanguinary struggle occurred in its suburbs between the Carlists and the Queen's troops, June 2, 1837. Both parties claimed the victory. The Carlists, however, crossed the Cinca and entered Catalonia without opposition, June 5.

BARBER.—The art of the barber was practised in Greece about B.C. 420. Their shops were then, as in more modern times, celebrated as places of gossip. Barbers are said to have been introduced into Rome from Sicily, B.C. 299. Formerly barbers practised surgery in England. Chicheley published a decree in 1415 forbidding them to keep their shops open on Sundays. The barbers, long an ancient company, were incorporated by letters patent Feb. 24, 1462. It was confirmed by Henry VII. and Henry VIII. By city law, in the time of Edward I. (Liber Albus), barbers who were so bold and daring as to expose blood in their windows, instead of having it privily conveyed into the Thames, were subject to a fine of 2*s*.

BARBER-SURGEONS.—Though the barbers at first practised surgery, yet a company of surgeons had been formed, but not incorporated, consisting, as Stow states, of not more than 12 persons at the commencement of the reign of Henry VIII. By 32 Hen. VIII. c. 42 (1540), the barbers and surgeons were united in one body corporate, called "Masters or Governors of the Mystery and Commonalty of Barbers and Surgeons of London." It provided that none of the company that used barbery and shaving should occupy any surgery, letting of blood, or any other thing belonging to surgery, except only drawing of teeth; nor he that used the mystery of surgery should exercise the feat or craft of barbery or shaving. They were made distinct corporations by 18 Geo. II. c. 15 (1745).

BARCA (N. Africa).—This maritime district, the ancient Cyrenaica, was colonized from Cyrene B.C. 560, and formed a part of the "Libya about Cyrene," mentioned in the Acts (ii. 10). The Persians besieged and captured its chief town, Barca; and it was conquered by the Saracens in 641. It was a bishopric of the early Church.

BARCELONA (Spain).—The foundation of this ancient city is assigned by tradition to as early a period as 400 years before the building of Rome. Hamilcar Barcas, the Carthaginian, is said to have restored it B.C. 235; and from him it received the name of Barcius. The Carthaginians were expelled B.C. 206; and it belonged to Rome from B.C. 146 until A.D. 411, when it was taken by the Goths. The Moors captured it in 718, and Charlemagne in 801. It became the capital of a Spanish march, held by the Counts of Barcelona, by one of whom, Raymundo Berenguer I., the general code of the usages of Barcelona, by which foreign vessels were encouraged to visit the port, was published in 1068. In 1137 it was annexed to Aragon. Its inhabitants having revolted, the

city was besieged by John II. of Aragon, and captured Oct. 17, 1471. It became a great centre of commerce in the 15th century; and the first bank of exchange and deposit in Europe was established here in 1401. Barcelona has since that period sustained several sieges. The French took it Aug. 7, 1697; it was restored by the treaty of Ryswick, and taken again Oct. 9, 1705; by the eccentric Lord Peterborough, Sep. 13, 1706; and by the Duke of Berwick, after a long siege, Sep. 12, 1714. The French captured it on their invasion of Spain, Feb. 28, 1808. It was made the seat of a bishop at an early period. Councils were held here in 540; Nov. 1, 599; 906; Nov. 20, 1054; and in 1068. Its university, established in 1430, was suppressed in 1714, and restored in 1841. Disturbances occurred here Nov. 13, 1842, and a junta was established Nov. 17. The town surrendered, after a bombardment, Dec. 3, 1842.

BARCELONA (Treaties).—A treaty between Charles VIII., of France, and Ferdinand and Isabella, of Spain, was signed by the former at Tours, and by the latter at Barcelona, Jan. 19, 1493. It was an alliance offensive and defensive between France and Spain. Charles VIII. ceded the counties of Roussillon and Cerdagne to Spain.—Another was concluded at this place between the Emperor Charles V. and Pope Clement VII., June 29, 1529. Robertson says that Charles, among other articles, agreed to restore all the territories belonging to the ecclesiastical state; to re-establish the Medici at Florence, and give his daughter to Alexander, the head of that family; and to put it in the Pope's power to decide respecting the fate of Sforza, and the possession of the Milanese. Clement VII. gave the emperor the investiture of Naples without the reserve of any tribute, but the present of a white steed in acknowledgment of his sovereignty; absolved all who had been concerned in assaulting and plundering Rome, and permitted Charles and his brother Ferdinand to levy the fourth of the ecclesiastical revenues throughout his dominions. Numerous treaties have been concluded at Barcelona.

BARCELONA, NEW. —(*See* NEW BARCELONA.)

BARCLAYANS.—(*See* BEREANS.)

BARDENEY, or BARDNEY (Lincolnshire). —This ancient monastery, in the province of Lindsey, is said by Bishop Tanner to have been founded before A.D. 697, because Osthryda, Queen of Mercia, who caused King Oswald's remains to be removed to this place, was murdered in that year. It was destroyed by the Danes in 869, and all the inmates were put to the sword.

BARDESANISTS.—A Christian sect which flourished in Mesopotamia from A.D. 161 to 180. They were the followers of Bardesanes of Edessa, who at one time advocated the tenets of Valentinus the Egyptian, though he afterwards abjured them. Mosheim contends against this view, declaring that Bardesanes admitted two principles, like the Manichæans. His followers denied the incarnation and the resurrection, and continued to exist as late as the 5th century.

BARDOLINO.—(*See* RIVOLI.)

BARDS, or PROFESSIONAL POETS, were in high repute amongst ancient nations. They were the recorders of important events, celebrating in poetry and music the virtues and heroic deeds of their gods and great men. Amongst the ancient Gauls and Britons they were regarded with peculiar veneration, and wielded considerable authority. The Druids had their order of bards. They continued to flourish in Wales, where Eisteddfods (*q. v.*), or sessions of the bards, were held; and the supreme dignity, and the privileges of the bards, are dwelt upon at great length in their early laws. The court bard is mentioned as a domestic officer in Welsh records of the year 940. Edward I. has been accused, though unjustly, of having massacred the Welsh bards in 1283. The ancient Irish bards were also celebrated.

BAREBONE'S PARLIAMENT.—This "motley convention of 120 persons," as Hallam terms it, was assembled at Cromwell's command July 4, and dissolved Dec. 12, 1653. It was sometimes called the Little, or Little Horned Parliament. Amongst the seven representatives for London was one Barebone, a leather-seller, of Fleet Street, a fanatic notorious for his long prayers and sermons, with the Christian name of "Praise God." Hence arose the term "Praise-God Barebone's Parliament," by which this assembly was afterwards known. It consisted of 122 members for England, six for Wales, six for Ireland, and five for Scotland, chosen by Cromwell and his officers.

BAREILLY (Hindostan).—This district, in the province of Delhi, was ceded by the rulers of Oude to the East India Company in 1801. A formidable mutiny broke out at its chief town, also named Bareilly, April 16, 1816. It was caused by a form of taxation obnoxious to the people. Conflicts ensued, April 18 and 21, and order was soon restored. The sepoys rose against the English, murdered some, and expelled others, Sunday, May 31, 1857. The mutineers marched into Delhi July 2. Bareilly was recaptured by the British forces May 7, 1858.

BARENWALD.—(*See* BARWALDE.)

BARFLEUR (Normandy). —A portion of William the First's fleet was equipped at this port for the invasion of England A.D. 1066. Near Barfleur, Prince William, only son of Henry I., perished by shipwreck during the night of Nov. 25 and 26, 1120. Two of the king's illegitimate children and several nobles perished on this occasion, the total number of persons being almost 300. Only one escaped, a butcher, of Rouen. William had married Matilda, daughter of the Count of Anjou, in June, 1119. The vessel was called the *Blanche Nef*. The shipping at Barfleur was destroyed and the harbour filled up by Edward III., during his invasion of Normandy, in 1346.

BARGAIN CUP.—Dyke, in his "Mysteries" (London, 1634), states that the Jews were forbidden to make covenants with the Gentiles, on account of the customary ceremony of drinking together on the conclusion of a bargain. The practice is supposed to have been

introduced into England since the Norman conquest.

BARI (Italy).—This town, occupying the site of the ancient Barium, having been captured by the Saracens A.D. 840, was wrested from them in 871, by Louis II., Charlemagne's great-grandson, after a siege of four years' duration. The Greek emperors made it the capital of the province of Apulia in 982. Afterwards it came into the possession of the Normans, and Robert Guiscard became Duke of Apulia in 1060. It was the seat of a bishop as early as 347, and became an archbishopric in 931. A celebrated council assembled here Oct. 1, 1098, at the command of Urban II.; no less than 183 bishops, and among them Anselm of Canterbury, attended; the principal subjects discussed being the reunion of the Greek and Latin Churches, and what is termed the *filioque*, or the procession of the Holy Ghost from the Father as well as the Son.

BARINAS.—(*See* VARINAS.)

BARIUM.—Protoxide of barium was discovered in 1774, by Scheeler; and barium, the metallic base of baryta, by Davy, in 1808.

BARK.—(*See* PERUVIAN OR JESUITS' BARK.)

BARLAAMITES.—Followers of Barlaam, a native of Calabria, and a monk of the order of St. Basil, who, in the controversy between the Greek and Latin Churches, after supporting the cause of the latter, became an advocate of the former. He brought a complaint before the Patriarch of Constantinople, against the tenets of the Hesychistæ, or Quietists, the name given to the monks of Mount Athos. The cause was tried, and the monks acquitted, in 1337. In 1339 Barlaam was the Emperor's ambassador to the Pope at Avignon for a union of the two Churches. The old controversy was afterwards renewed, and to such a pitch did it proceed that a council was held at Constantinople, June 11, 1341, in which the monks, with Palamas at their head, were victorious. The Barlaamites were condemned by subsequent councils, and Barlaam himself is said to have once more joined the Latins. He died about 1348.

BARLETTA (Italy) was besieged by the French in 1502. During the siege, the celebrated military encounter between 11 Spanish and as many French knights took place. The lists were formed on neutral territory, under the walls of Trani, and the combat came off Sep. 20, 1502. Though five of the French knights were slain, Bayard and a companion are said to have defended themselves with such skill against the seven Spaniards, that it terminated in a drawn battle. There are various accounts of this trial of arms. Bayard fought in single combat with the Spanish cavalier Sotomayor (Feb. 2, 1503), when the latter was slain. The French, having been defeated in two battles, Friday, April 21, and Friday, April 28, 1503, in the last of which the Duke of Nemours was slain, abandoned the siege of Barletta.

BARNABITES.—This religious order was formed at Milan, in 1530, by three persons, named Antony Maria Zacharias, Bartholomew Ferrarius, and Jacopo Antony Morigia. It was approved by Clement VII. in 1533, and confirmed by Paul III. in 1535. They were called regular clerks of St. Paul, from their assiduous study of his epistles, recommended to them by their first master; and are said to have received the name of Barnabites from the church of St. Barnabas at Milan, given them in 1535. They spread through Italy and Germany, and were invited into France by Henry IV., in 1608, to be employed in the mission of Béarn. On their first establishment they lived on the gratuities of the pious, but afterwards held property.

BARNARD'S INN (London), was named after Lyonel Barnard, who resided here in the year 1434 (13 Hen. VI.), at which time it was the property of Dr. John Mackworth, Dean of Lincoln, by whose name it had been before known. In 1601, one Mr. Warren was fined £1. 6*s*. 8*d*. for wearing his hat in hall, and for his long hair, and otherwise misdemeaning himself. The first attempt to introduce attorneys into the inn was made in 1608.

BARNET (Battle).—Fought during the wars of the Roses, on Gladsmore Heath, near Chipping-Barnet, on Easter Sunday, April 14, 1471. The Yorkists, commanded by Edward IV., gained a complete victory over the Lancastrians, led by the Earl of Warwick, the kingmaker, who fell in the battle. A monument was erected in 1740 on the spot where the encounter took place.

BAROACH (Hindostan).—This district was conquered by the British in 1781, and was afterwards restored to the Mahrattas. The city of Baroach and its fortress were captured Aug. 29, 1803, and the whole territory ceded to the East India Company, by treaty, Dec. 30, 1803. It was a place of great trade in the 16th century, and was taken by Akbar in 1572.

BARODA (India), the capital of the Guicowar's territory, was a large and wealthy city in the reign of Aurungzebe, who died Feb. 21, 1707. A treaty of amity was concluded between its ruler and the East India Company in 1780. In 1802 the king applied to the East India Company for assistance to put down a rebellion. This was accomplished, and the relations between the two governments were regulated by arrangements made in 1802, 1805, 1817, and 1820.

BAROMETER was invented by Evangelista Torricelli, a Florentine, pupil of Galileo, in 1643. Pascal improved it in 1648, and from that period great improvements have been effected in its construction by various scientific men. (*See* ANEROID.)

BARON.—This term, now applied to the lowest title in the peerage, was formerly extended to all the nobility of England. Its origin and real signification in the early period of our history have excited much controversy. The ancient baron is generally supposed to have been the same as our present lord of the manor. He was at first called *varassour*, this being changed by the Saxons into *thane*, and by the Normans into *baron*. Originally, all barons had seats in the king's council. In the reign of King John, the barons had become so numerous that they were divided, the greater barons, who held *in capite* of the crown, being summoned by writ to attend the king's coun-

cil; whilst the lesser barons, who held under the greater barons by military tenure, were summoned by the sheriff to sit by representation; hence arose the lower House of Parliament. The first precept to be found is of the 49th of Henry III., Dec. 24, 1265, from which period no other seems to have been issued until 22 Edw. I. (1294), or, as Sir H. N. Nicolas is of opinion, until 23 Edw. I., June 24, 1295. Richard II. converted it into a mere title of honour, by conferring it on persons by letters patent; the first barony of this kind being that of Beauchamp and Kidderminster, dated Oct. 10, 1387, and conferred upon John Beauchamp, of Holt. This baron never sat in Parliament, as he was attainted in the following year. At the Restoration, Charles II. granted a coronet to barons. The first instance of their being styled peers is in the award of exile against Hugh le Despencer and his son, in 1321. The citizens of London, York, Chester, and other towns, were at an early period honoured with the title of baron.

BARONET.—This order was instituted, or, as some assert, adopted, because the title existed previously in Ireland, by James I., in 1611; and the first patent, to Nicholas Bacon, is dated May 22, in that year. Each knight or esquire was, under the pretence of providing a fund for the defence of the Ulster Settlement (*q. v.*), to pay a sum of £1,000, to support 30 foot-soldiers for three years at 8*d.* per day, together with the official fees. The number fixed was 200, but only 93 patents were sold in six years. Baronets of Ireland were established in 1619, the first patent being dated Sep. 30; and of Scotland, called baronets of Nova Scotia, by Charles I. in 1625; the first patent being dated May 22. Females have assumed the dignity. The *Gentleman's Magazine* for 1754 gives the following instance of one created by James II.:—"Sep. 9, 1686.—Cornelius Speelman, of the United Provinces, a general of the states of Holland; with a special clause to the general's mother, of the rank and title of a baronetess of England."

BARONS OF GERMANY.—During the Middle Ages many of the German barons were little better than reckless freebooters. Hallam (Middle Ages, iii. ch. 9, pt. 1) says:—"Germany appears to have been, upon the whole, the country where downright robbery was most unscrupulously practised by the great. Their castles, erected on almost inaccessible heights among the woods, became the secure receptacles of predatory bands, who spread terror over the country. From these barbarian lords of the dark ages, as from a living model, the romances are said to have drawn their giants and other disloyal enemies of true chivalry." Their depredations compelled the inhabitants of towns to form leagues for purposes of protection and self-defence. Sixty cities were associated in the League of the Rhine in 1255. The Hanseatic union owes its origin to the same cause; and in 1370 the cities of Swabia and of the Rhine entered into a similar confederacy.

BARONS' WAR originated in the refusal of Henry III. to ratify the statutes enacted at Oxford, in the "Mad Parliament," June 11, 1258. The matter was referred to the arbitration of Louis IX. of France, who decided, at a council held at Amiens, that the statutes should be annulled, Jan. 23, 1264. The barons, with Simon de Montfort at their head, took up arms, and totally defeated the king at Lewes, May 14. A parliament assembled at London, Jan. 20, 1265. Disputes arose amongst the barons, and a second great battle was fought at Evesham, Aug. 4, 1265, in which the king was victorious, and De Montfort was slain. The barons, who continued to oppose the king, took refuge in the castle of Kenilworth, and they were compelled by famine to surrender, in November, 1266. The war was still carried on, and Prince Edward, afterwards Edward I., reduced the island of Ely, their last stronghold, July 25, 1267.

BAROSSA (Battle). — An allied British, Spanish, and Portuguese force, of 12,000 men, with 24 pieces of artillery, were attacked at this place, in Spain, by 16,000 French under Victor, March 5, 1811. The former were victorious, though the British contingent under Gen. Graham, which amounted to only 4,000 men, received no support whatever from the Spaniards. An eagle, six pieces of artillery, and 500 prisoners fell into the hands of the British.

BARRACKPORE (Hindostan). — A revolt occurred here in 1824, and the mutiny of the sepoys commenced at Dum-Dum and at this town, near Calcutta, in 1857. On the first occasion the 47th regiment of native infantry, then about to depart to assist in the Burmese war, displayed a mutinous spirit, Sep. 15, and they refused to parade Oct. 30, 1824. They declared that they would not go to Rangoon, or anywhere else, by sea, or even march by land, unless they received double batta. A further manifestation took place Nov. 1, when a battery opened on their rear, killing a few, and putting the remainder to flight. Many arrests were made, the offenders were found guilty by a court-martial, and the ringleaders were executed. The 47th native regiment was erased from the army list. It was here that the sepoys, in Feb., 1857, objected to bite off the ends of the new cartridges, on the pretence that they contained fat, which, if permitted to come in contact with their lips or tongues, entailed a loss of caste. An inquiry took place Feb. 6, but it did not produce any satisfactory result; and the 34th native regiment rebelled March 29. The 19th regiment of native infantry was disbanded and dismissed here, March 31; and the 34th, May 5. Three native regiments were disarmed at Barrackpore, June 14.

BARRICADES, constructed of the first materials that came to hand, were used in popular insurrections during the Middle Ages. Paris has obtained notoriety as the city in which they have been most frequently employed. In 1358, its streets were barricaded against the Dauphin. The first Battle of the Barricades took place on the entry of the Duke of Guise into Paris, May 12, 1588. Henry III., at his instigation, consented to take severe measures against the Huguenots, on the promise that the duke would assist

him in purging Paris of strangers and obnoxious persons. No sooner, however, was an attempt made to execute this plan, than the people rose, erected barricades, and attacked the king's troops with irresistible fury. Henry III., having requested the Duke of Guise to put a stop to the conflict, fled from Paris, and the moment the duke showed himself to the people they pulled down the barricades. It was followed, during the war of the Fronde, by another contest of a somewhat similar character, Aug. 26, 1648, when Anne of Austria ordered the arrest of Charton, Blancmeuil, and Broussel, three popular members of the Parliament. The first-mentioned managed to escape, but the other two were captured; whereupon the people rebelled, formed barricades, and attacked the troops with cries of "Broussel and liberty!" The Queen was intimidated, and, by the advice of Mazarin, ordered the release of the prisoners. In July, 1830, the elder branch of the Bourbons, and in Feb., 1848, the Orleans branch of the same family, were driven from the French throne after a struggle at the barricades. Gen. Cavaignac, in defence of the Provisional Government, waged a fearful contest with the insurgents, who had erected barricades, June 23, 24, 25, and 26, 1848, in which he was at length victorious. The killed and wounded amounted to 15,000, and about 8,000 of the rebels were taken prisoners. Napoleon III. has widened the streets, and taken other precautions to prevent the recurrence of such scenes. Barricades have been erected during popular outbreaks at Berlin, Vienna, and other continental cities. An attempt at something of the kind, made in London, on the occasion of the funeral procession of Queen Caroline, Aug. 19, 1821, was speedily suppressed.

BARRIER ACT.—A name given to an act passed by the General Assembly of the Church of Scotland, Jan. 8, 1697, as a barrier against innovations. Similar acts have been passed by other churches.

BARRIER TREATIES.—The first between England and the Netherlands was negotiated by Lord Townshend, and signed at the Hague Oct. 29, 1709. England engaged to assist the Dutch in preserving their barrier towns, whilst the Dutch pledged themselves to maintain the Queen of England's title to her dominions, and the Protestant succession. It was very unpopular in this country, and was called Lord Townshend's treaty. It was annulled in 1712, and the second barrier treaty was concluded at Utrecht, Jan. 29, 1713. The third treaty known by this name was signed at Antwerp, between England, the Netherlands, and the Emperor Charles VI., Nov. 15, 1715. It determined the boundaries of the Netherlands, and the Emperor recognized the Hanoverian succession, as the states general had done in the former treaties.

BARRIERS (Battle), was fought under the walls of Paris, March 30, 1814, when the allied army, after an obstinate contest, gained a victory, which led to the capitulation of Paris and the abdication of Napoleon I.

BARRISTERS, or BARRASTERS, at first styled *apprenticii ad legem* (apprentices), were first appointed, according to Dugdale, by an ordinance of 20 Edw. I. (1292). The clergy, who for some time supplied the only persons learned in the law, were at the commencement of Henry III.'s reign prohibited from practising in the secular courts. Reeves (Hist. of Eng. Law, v. 247) remarks,—"We have seen that heretofore there were only two descriptions of advocates; these were *serjeants* and *apprentices*. But we find in this reign (Elizabeth), and no doubt it had been so for some time, that the orders of the profession were these,—the lowest was a *student*, called also an *inner barrister*, and so distinguished from the next rank, which was that of an *outer* or *utter barrister;* then came an *apprentice*, and next a *serjeant*." The first order relative to the qualifications of barristers was made June 21, 1571, being the 13th year of Elizabeth's reign. The following entry occurs in the churchwardens' accounts of St. Margaret, Westminster, for 1476:—"Also paid to Roger Fylpott, learned in the law, for his counsel-giving, 3*s.* 8*d.*, with 4*d.* for his dinner." In the reign of Charles II. the client consulted the barrister in person, and handed him the *honorarium* without the intervention of an attorney or clerk. The qualifications required varied until 1852, when the four societies agreed upon one set of rules.

BARROSA.—(*See* BAROSSA.)

BARROW ISLAND (Arctic Sea).—Discovered by Capt. Beechy, Jan. 26, 1826. Like Barrow's Straits, it is named after Sir John Barrow, Bart., secretary to the Admiralty, and author of "A Chronological History of Voyages into the Arctic Regions," London, 1818, and other works.

BARROW'S STRAITS.—This channel, leading from Baffin's Bay into the Polar Sea, was discovered by Baffin in 1616; and explored in 1819 by Lieut. Parry, who named it after Sir John Barrow.

BARROWS.—These tumuli, or mounds of earth, are the most ancient monuments in the world. Gough says they were both tombs and altars. They were used by the Assyrians, the Egyptians, and other ancient people. Homer (B.C. 962—B.C. 927) makes mention of one raised by Achilles in memory of Patroclus, and of another to Hector. In some cases they were erected in honour of a deceased hero, whose remains were not deposited beneath them, and frequently to signalize some important event. After the battle of Platæa (*q. v.*), B.C. 479, Pausanias ordered the dead to be interred in tumuli or barrows. "A single burying-place," says a writer in the "Encyclopædia Metropolitana," "was appointed to the use of the Athenians, Tegæans, Megarean, and Philiasians; but the slain of the Lacedæmonians formed three separate mounds; one consisting of those who had borne the priestly office, another of the Lacedæmonians in general, and the third of their Helots." Barrows were very common in Britain at an early period. Those at Avebury and Stonehenge are the most ancient. They are of numerous shapes, and devoted to various purposes. Many have been opened, and in addition to bones (calcined), ashes, stone coffins, &c.

amber ornaments and other relics have been discovered.

BARTENSTEIN (Treaty).—Between Prussia and Russia, was concluded at Bartenstein April 25, 1807. It provided for a vigorous prosecution of the war against France, and the contracting parties engaged not to make a separate peace.

BARTHOLOMEW FAIR.—To the priory of Bartholomew, founded by Rahere in 1102, King Henry I., in 1133, granted the privilege of holding a fair in Smithfield on St. Bartholomew's Day, O.S. Aug. 24, N.S. Sep. 3. The original grant was for three days, but this was gradually extended to 15. In 1593, 1603, 1625, 1630, 1665, and 1666, the fair was suspended on account of the plague. An order of the Common Council, in 1708, limited its duration to three days. At one time it was a great place of resort for traders, but it declined in importance until it was only attended by itinerant showmen and the owners of a few stalls. Proclamation of the fair by the Lord Mayor was made for the last time in 1850, and the fair has not been held since 1855. Morley's work, entitled "Memoirs of Bartholomew's Fair," contains full and interesting details on this subject.

BARTHOLOMEW, ST. (W. Indies).—This island was colonized by the French in 1648; taken by the English in 1689; and restored to France in 1697. The English took it again in 1746, restored it in 1748, and captured it again March 17, 1781. It was ceded in perpetuity by France to Sweden in 1784, in return for certain concessions. The English again captured it March 22, 1801, but restored it to Sweden the same year.

BARTHOLOMEW'S DAY (Massacre). — On the evening of St. Bartholomew's Day, Aug. 24, 1572, the massacre of the Huguenots at Paris commenced. The Roman Catholic leaders, the Dukes of Guise, Aumale, and Anjou, with the connivance of Charles IX., and at the instigation of Catherine de Medici, resolved by a general assassination to exterminate the French Protestants. Their leader, Admiral Coligny, the first victim, was shot Aug. 22, and the inhuman slaughter of man, woman, and child, which commenced Aug. 24, was carried on till it was believed that all the Protestants in Paris had been destroyed. The plot had been secretly organized, and similar scenes were enacted in many towns in the provinces. According to the lowest estimate, 30,000 persons perished. The reigning pope, Gregory XIII., celebrated this deed of blood by a procession and a *Te Deum* at Rome, and proclaimed a year of jubilee. He also ordered a medal to be struck in its commemoration. (*See* NONCONFORMISTS.)

BARTHOLOMEW'S HOSPITAL (London) was founded in 1102, by Rahere, who had been king's minstrel. It was originally in connection with the priory, which Rahere established about the same time. Edward II., by letters patent, conferred upon it the privilege of sanctuary; consequently no person could be arrested within its precincts. Both priory and hospital were dissolved by Henry VIII., who founded the hospital anew, giving 500 marks per annum towards its maintenance, on the condition that the city should give a like sum. It escaped the great fire in 1666, and has been several times enlarged.

BARTHOLOMITES.—This religious order of St. Basil, driven from Armenia in 1296, owing to the cruelties committed upon them by the Sultan of Egypt, formed an establishment at Genoa in 1307. They obtained a second house at Parma in 1318, and afterwards spread to other towns in Italy. They assumed the habit of St. Dominic, and eventually followed the rule of St. Augustine, which was confirmed to them by Innocent VI., in 1356. The Bartholomites gradually decreased in numbers, and were suppressed by Innocent X. in 1650.

BARWALDE (Treaty).—Between France and Sweden, concluded by Gustavus, in his camp at Barwalde or Barenwald, Jan. 13, 1631. It provided for a defensive alliance, and its duration was fixed at six years. It was aimed against the Emperor Ferdinand II., and Spain.

BASEL, or BASLE (Switzerland). — This ancient city was ruled during the Middle Ages by a bishop, who was a prince of the German empire. It was taken by Rodolph of Hapsburg in 1267; in 1392 became a free imperial city, which was, with the adjoining territory, admitted into the Confederation in 1501, when the bishops were expelled. A council was held here in Oct., 1061. The 18th general council, transferred from Pavia to Sienna and from Sienna to Basel, assembled July 23, 1431, and was brought to a conclusion May 16, 1543. Its chief objects were the reunion of the Greek and Latin Churches, and a general reformation of the Church. The university of Basel was founded by a papal bull from Pius II. in 1459. Treaties of peace were concluded at Basel between France and Prussia, April 5 and May 17; between France and Spain, July 22; and between France and Hesse-Cassel, Aug. 28, 1795. The French seized the city in 1798.

BASHEE, or BASHI ISLANDS (Pacific), five in number, were discovered by Dampier, in 1687, and colonized by the Spaniards in 1783. They form a dependency of the Philippines.

BASHI BAZOUKS.—Irregular troops in the Turkish service, principally Asiatics. They formed a contingent of the Turkish army during the Russian war, 1853—56. As light cavalry they are considered excellent, surpassing the Cossacks in courage and powers of endurance.

BASIENTELLO (Battle).—Otho III., Emperor of Germany, was defeated near this place, in Italy, by the Greeks and Saracens, July 13, 982. This victory restored Apulia and Calabria to the Eastern empire.

BASILIANS.—Monks of the order of Basil, surnamed the Great, Bishop of Cæsarea A.D. 370. He had retired in 358 into a desert in Pontus and founded a monastery. He afterwards founded several similar establishments, placing them under rules of his own institution. The order was introduced into the Western Church in 1057, and was reformed by Pope Gregory XIII. in 1569.

BASILICA.—Halls bearing this name were erected by the Romans for public business, or the administration of justice, about B.C. 180. Their form, in most cases that of a paral-

lelogram, twice as long as its width, with a circular recess at one end, having fitted them for the public worship of the primitive Christian Church, they were in many instances converted into temples in the reign of Constantine I. (A.D. 306—337), and furnished models for all early ecclesiastical architects.

BASILICAN CODE of Byzantine law was published A.D. 884 by Basilius I., from whom its name is derived. It was revised and extended by Leo VI. and Constantine VII. (Porphyrogenitus), and appeared in its amended form between 905 and 911. This remained the law of the Byzantine empire till its conquest by the Turks, and has been adopted in the modern kingdom of Greece.

BASILIDIANS.—The followers of Basilides of Alexandria, who is supposed to have quitted the Church during the reign of Trajan or that of Hadrian, were thus named. Cave says that he flourished in 112, Basnage in 121, and Mill in 123. Basilides, who died in 130, perverted the doctrine of the Logos. Clement of Alexandria asserts that Basilides boasted that he had been taught by Glaucias, a disciple of St. Peter.

BASILIKON DORON, or ROYAL GIFT, a treatise composed by James I., and published at Edinburgh in 1599, and in London in 1604. It is divided into three books, and contains precepts on the art of government, addressed by the king to his son, Henry, Prince of Wales, who died suddenly, Nov. 6, 1612, aged 17.

BASING (Hants).—The scene of the Danish victory over Ethelred and Alfred in 871. Near this place is Basing House, celebrated for its heroic defence by the Marquis of Winchester, against the parliamentary forces in 1644. It was relieved by Col. Gage, after having sustained a siege of three months; but on his retirement the enemy again returned. When Col. Gage once more approached to relieve it in November of the same year they took to flight. The besiegers returned: Cromwell stormed the place in 1646, and put the garrison to the sword.

BASKET-MAKING, or WICKER-WORK.—The ancient Britons, from whom the Romans are said to have learned it, excelled in this kind of manufacture. Their boats, shields, and various implements were fashioned of wicker-work. Herodotus (i. 194) mentions boats of this kind on the Euphrates. A company of basket-makers once existed in London.

BASLARD.—Sir W. Walworth wounded Wat Tyler in the neck with a baslard or basiliarde, a species of dagger, worn at that time suspended from the girdle. By 12 Rich. II., c. 6 (1388), no servant or labourer was allowed to carry one of these weapons. This statute was repealed by 21 James I. c. 28 (1623). Wright states that in 1403 it was decreed that no person not in receipt of an income of £20 per annum should use a baslard ornamented with silver.

BASQUE PROVINCES (Spain).—The origin of this term, applied to three provinces, viz., Biscay, Guipuzcoa, and Alava, is unknown. The inhabitants preserved their independence against successive invasions of Romans and Goths, but were at length subdued by the latter about A.D. 585. Guipuzcoa and Alava were united to Castile in the 13th century, and Biscay was annexed to Castile by Peter the Cruel in the 14th.

BASQUE ROADS (Sea-fight).—Capt. Lord Cochrane, afterwards Earl of Dundonald, in the *Impérieuse*, with explosion-vessels, fire-ships, gunboats, &c., sailed from Basque Roads to attack the French fleet at anchor under the shelter of the batteries in Aix Roads, April 11, 1809. A boom, half a mile in length and composed of the thickest cables, floated by buoys, had been moored a few yards in front of the line of French frigates. An explosion-vessel, fired by Lord Cochrane, broke through the boom, and such was the terror caused amongst the French fleet that the cables were cut and the ships drifted on shore. Lord Cochrane, in the morning of April 12, signalled to Admiral Lord Gambier to send half the fleet to destroy the French ships, several of which were aground. This, however, Lord Gambier refused to do, and a large portion of the French fleet, by dint of great exertions, managed to escape. At St. Helena Napoleon I. admitted that if Lord Cochrane had been properly supported all the French ships must have been captured or destroyed.

BASSANO (Battles).—During the French revolutionary war, the Austrian general Würmser was defeated at this town in Lombardy, Sep. 8, 1796, by the French republican army under Massena and Augereau. After this defeat the Austrians retired to Mantua. Bassano was restored to Austria, by the treaty of Campo Formio, Oct. 17, 1797; but in the Italian campaign of 1813 Eugène Beauharnais wrested it from the Austrians.

BASSEIN (Burmah).—An English expedition that sailed from Rangoon, April 17, 1852, anchored off this town April 19, and took it by storm.

BASSEIN (Hindostan).—This town, in the presidency of Bombay, was ceded, in 1531, to the Portuguese, by whom it was promised, but never bestowed, as part of the dowry of Catherine of Bragança, queen of Charles II. It was taken in 1750 by the Mahrattas. In 1774 and 1780 it was captured by the British, who relinquished it in 1782, but concluded a treaty with the Peishwa in 1802 (*see* BASSEIN, Treaty), and finally annexed it to their Indian possessions in 1818. Bishop Heber, who visited Bassein in 1825, described it as a city in ruins, uninhabited, and desolate.

BASSEIN (Treaty), between the Peishwa and East India Company, was concluded at this place, in Hindostan, Dec. 31, 1802. The ratifications were exchanged March 18, 1803. It was an alliance offensive and defensive between the contracting parties, and in return for certain concessions the English engaged to support the rights of the Mahratta chieftain.

BASSET.—This game at cards, said to have been invented by a noble Venetian in the 15th century, was introduced into France in 1674. The courtiers of James II. are, in an account dated Feb. 6, 1685, represented as playing at basset on the day of his proclamation. It was played at the court of Louis XIV., until that monarch lost a large sum by means of false

cards; whereupon he ordered that persons found playing basset should be fined 1,000 livres.

BASSET HORN was invented in Passau in 1770, and improved by Lotz of Presburg in 1782.

BASSETERRE (Sea-fight).—Count de Grasse made three attacks upon the British fleet, anchored in Basseterre Roads, St. Christopher's, Jan. 26, 1782, and was, on each occasion, repulsed with great loss.

BASSORAH, or BUSRA (Asiatic Turkey).—This city was founded by Omar A.D. 636, and captured during the revolt against Ali, by Telha and Zobeir, accompanied by Ayesha, the widow of the prophet, in 658. The rebels were, however, defeated under its walls in the same year. (*See* CAMEL.) The Saracen rule terminated by its conquest by the Turks in 701. Though it became a flourishing place it was abandoned, some writers allege, because the canal on which it was built had fallen into neglect; and the modern Bassorah, eight miles to the north-east of the ancient site, was established. The Turks made themselves masters of Bassorah in 1668; but it was wrested from them by the Persians April 16, 1776, after a siege of 12 months. It was recovered by the Turks in 1778, and is known under the names of Bussorah and Basra.

BASS ROCK (Frith of Forth).—This small island is first mentioned in history as affording a retreat for St. Baldred, a Scottish enthusiast, who died here March 6, 606 A.D. It was granted to the Lauder family by charter, dated June 4, 1316. A castle existed on this island in the 15th century, if not before. James VI. of Scotland visited the Bass Rock in 1581, and the English Government purchased it for a state prison in Oct., 1671. Having surrendered to the new government in 1690, some adherents of James II. regained possession the same year, and they held it, plundering all vessels that came near, until April, 1694. It was the last place in Scotland that held out for James II. The fortifications were finally destroyed in 1701, by order of William III. To the Dalrymple family, in whose possession it has since remained, it was ceded by charter, July 31, 1706, ratified by Parliament in March, 1707. Several of the Covenanters were imprisoned in this island.

BASS'S STRAIT (Pacific).—This channel, separating Van Diemen's Land from Australia, is named after Mr. Bass, surgeon of the ship *Reliance*, who, accompanied by Flinders, then a midshipman in the same ship, crossed it in an open boat called the *Tom Thumb*, March 25—27, 1796. Flinders and Bass, in a small vessel, the *Norfolk*, circumnavigated Van Diemen's Land, long believed to form part of Australia, Oct. 7, 1798—Jan. 12, 1799.

BASTARNÆ.—This powerful tribe of Sarmatia first appeared in history during the reign of Perseus of Macedon (B.C. 178—168), to whose army they contributed 20,000 mercenaries. Having encroached upon Roman territory, they were driven across the Danube by M. Crassus, B.C. 30, and ultimately settled between the rivers Dneister and Dnieper.

BASTIA, the ancient Mantinum, founded in 1380, was the capital of Corsica until that island was annexed to France in 1768. The town and its citadel were captured by the English in 1745, and again May 22, 1794. The Austrians assailed it without success in 1748.

BASTILLE.—There were three bastilles or state-prisons, namely, those of the Temple, St. Denis, and the Rue St. Antoine, at Paris. On the ground occupied by the last-mentioned a kind of fortress, which was strengthened in 1356, had long before existed. The place generally known as the Bastille was commenced by order of Charles V., and the first stone was laid April 22, 1369. It was not completed until 1383, and was afterwards improved and strengthened in such a manner that it became one of the strongest fortresses of the kind in Europe. It was taken in 1418, in 1504, and Jan. 13, 1649, by the Fronde army. The mob attacked it July 14, 1789, released the prisoners, put the governor to death, committed great havoc, and soon after the order was given for its demolition. Croker (Essays on the French Revolution, p. 246) remarks that only six or seven prisoners were found in the Bastille when captured, and not a single state-prisoner. In July, 1794, the prisons of Paris contained 8,913 prisoners, and in 1793, 2,637 had passed from the prison to the scaffold. (*See* IRON MASK.)

BATALHA (Portugal).—John I. (1383—1433), of Portugal, built a convent at this place in commemoration of his victory over John I. of Castile, at Aljubarota (*q. v.*), Aug. 14, 1385.

BATAVIA, an island between the Rhine and the Waal, occupied in the time of Cæsar, B.C. 55, by a German tribe, called the Batavi. Claudius Civilis, a Batavian chieftain, rose in arms against the Romans A.D. 69, and after a fierce struggle, in which he gained many victories, was at last defeated. Zosimus, who was the first to call the island Batavia, states that in the time of Constantius II. (350—360) it belonged to the Franks. (*See* HOLLAND.)

BATAVIA (Java).—A factory was established by the Dutch at the village of Jacatra in 1612, and upon its site the town of Batavia was founded in 1619. The new settlement became the seat of the government of the Dutch East Indian colonies. The French obtained possession in 1811, and were expelled by the English Aug. 8 in the same year. It was restored to the Dutch by a convention signed in London, Aug. 13, 1814.

BATAVIAN REPUBLIC.—In 1795 the French republicans invaded the Netherlands, and subverted the government. The seven united provinces formed with France an offensive and defensive alliance against England, May 15, 1795, and assumed the title of "the one and indivisible Batavian Republic," May 1, 1798. The new commonwealth, guaranteed by the treaty of Luneville (*q. v.*), Feb. 9, 1801, received a constitution promulgated Sep. 14, 1801. Other changes were made, and at last the Batavian republic was annexed to France, and named the kingdom of Holland, June 5, 1806.

BATH (Somersetshire).—This city occupies the site of a Roman station, called by them *Aquæ Solis*, and formed as early as B.C. 44. The Romans adorned it with many noble

buildings. Its hot springs are mentioned by their writers. Bath suffered during the struggles between the Saxons and the Britons, and was seized and plundered by the Danes. Richard I. granted it a charter, which was confirmed by Henry III. Edgar was crowned at Bath by Dunstan, A.D. 973. The hospital of St. John was founded in 1180. The Black Alms Hospital and Grammar School were established by Edward VI., July 12, 1552. The abbey church was completed in 1609, and the old town-hall, erected by Inigo Jones in 1625, was removed in 1777, and the present building opened in 1780. The city, which had previously afforded but scanty accommodation to its numerous visitors, was much benefited by the architectural improvements commenced by Wood in 1728. The old pump-room, erected in 1704, and improved in 1751, 1786, and 1791, was taken down in 1796, when the present structure was built. The Assembly Rooms, built in 1708 and 1728, were superseded by more spacious apartments in 1771. The first stone of the general hospital was laid by the Hon. W. Pulteney, afterwards Earl of Bath, July 6, 1738. Beau Nash, the celebrated "king of Bath," died here Feb. 3, 1761. Sydney Gardens were opened in 1795, and Victoria Park in 1830. The theatre, built in 1805, was destroyed by fire April 18, 1862. The 34th annual meeting of the British Association took place here in 1864.

BATH (Order).—Knights of the Bath were thus named from the ceremony of bathing, performed the night before their creation, and Sir Harris Nicolas mentions two cases of knights created in this manner during the reign of King John, the first in 1204 and the second in 1205. The order is supposed to have existed at a much earlier period. It is first noticed under the name of the Bath, Oct. 11, 1399, when Henry IV., at his coronation, created 46 knights. The practice was continued at the coronation of our sovereigns, but after that of Charles II., in 1661, fell into neglect, until it was revived by George I., May 18, 1725. The order was re-organized and extended Jan. 2, 1815; and April 14, 1847, the number of knights in the existing classes was increased, whilst civil knights, commanders, and companions were added. (*See* TRIA JUNCTA IN UNO.)

BATH AND WELLS (Bishopric).—The see of Wells was founded A.D. 909, and that of Bath in 1078. William II. removed the see of Wells to Bath, by charter, Jan. 25, 1092. This gave rise to a dispute between the canons of Wells and the monks of Bath, and it was not terminated until about 1139, when, with the Pope's consent, it was determined that the bishops should be called bishops of Bath and Wells; that the election should be made by the canons of Wells and the monks of Bath conjointly; that the event of the election should be pronounced by the Dean of Wells; and that the bishop should be enthroned in both cathedrals. The episcopal residence is at Wells.

BATH ADMINISTRATION. — (*See* LONG-LIVED ADMINISTRATION.)

BATHS are mentioned in the Old Testament, and Homer (B.C. 962—B.C. 927) speaks of the baths in the houses of the Greeks. Hot baths were also used in ancient times, and Homer commends the warm fountains of the Scamander, though he attributes to them the effeminacy of the Phæacians. They were not common at Rome until the 1st century of the Christian æra. Augustus constructed public baths in every part of the capital. The baths of Antoninus Caracalla, in the 2nd century, contained above 1,600 marble seats, and those of Diocletian, in the 4th century, about 3,000. Gibbon says (ch. xxxi), "The meanest Roman could purchase, with a small copper coin, the daily enjoyment of a scene of pomp and luxury which might excite the envy of the kings of Asia." (*See* TURKISH BATHS.)

BATHS AND WASH-HOUSES.—(*See* PUBLIC BATHS AND WASH-HOUSES.)

BATHURST (N. S. Wales).—Established in April, 1815, being the first settlement made beyond the Blue Mountains. Gold was discovered at Ophir, near Bathurst, Feb. 12, 1851. The governor issued a proclamation, May 22, claiming the gold, but allowing persons to search or dig, on taking a license at 30s. per month. By the month of June 20,000 persons had arrived at the new diggings.

BATHURST (W. Africa).—This settlement, on the south side of the Gambia, was established in 1816.

BATNEAR (Hindostan).—The former capital of the Batnears or Batties of Hindostan was taken by Tamerlane in 1398, and by the Rajah of Beykaneer in 1805.

BATON ROUGE (Louisiana). — This town possessed a college in 1838, and was made the capital of the state in 1849. It was taken by the Federals May 7, 1862, and was attacked by the Confederate general Breckenridge Aug. 5, the assailants being repulsed after a sharp contest, in which the Federal general Williams was killed. It was evacuated by the Federals Aug. 23.

BATSHIAN, one of the Molucca Islands, was wrested from the Portuguese by the Dutch in 1610.

BATTEL.—(*See* TRIAL BY BATTEL AND WAGER OF BATTEL.)

BATTERING-RAM. — This machine, the Aries of the Romans, whence the name, employed for making a breach in the walls of besieged cities, is mentioned in the Old Testament, appears in sieges on the monuments of Rameses II., and was used by the Greeks and Romans. When placed upon wheels and roofed over it was called a *testudo*. Battering-rams were often of great length, the beam of wood having at the end the head of a ram, made of brass or iron. They were used extensively in the Middle Ages, and were sometimes called *testudines*. Sir Christopher Wren found them of great service in throwing down old walls and disjointing stones.

BATTERSEA PARK (London).—By 9 & 10 Vict. c. 38 (Aug. 3, 1846), the Commissioners of Woods, &c., were empowered to form a royal park in Battersea Fields. Additional powers were granted to them by 11 & 12 Vict. c. 102 (Sep. 4, 1848); by 14 & 15 Vict. c. 77 (Aug. 7, 1851); and by 16 & 17 Vict. c. 47 (Aug. 4, 1853). The park was opened in 1858, and the suspen-

sion bridge across the Thames, leading to it, March 28, 1858.

BATTIN (Battle). — The Russians defeated the Turks in a sanguinary attack upon their camp, near this place, on the Danube, Sep. 7, 1810.

BATTLE ABBEY (Sussex) was founded by William I., in 1067, on the spot near which the battle of Hastings, Oct. 14, 1066, was fought. Its ancient name, Hetheland or Epiton, has since been changed to Battle. The abbey was dedicated to St. Martin, "in order that glory might be offered up to God for his victory, and that offices for the souls of the dead might be there perpetually performed." It was endowed with peculiar privileges and exempted from episcopal rule and jurisdiction. The abbot was mitred and sat in Parliament.

BATTLE-AXE.—Herodotus (B.C. 484– B.C. 408) speaks of the battle-axes of the Scythians in Xerxes' army. The Teutonic tribes introduced the modern battle-axe into Europe, and it was afterwards so common amongst the Franks, that it was called *francisca*. They gained great celebrity for dexterity in using it, on their invasion of Italy in the 6th century. The battle-axe was known in England at a very early period, and the assertion that it was introduced by the Danes is erroneous. Fragments of this weapon have been found in Druidical remains of a period antecedent to their arrival. Hoveden celebrates the might displayed by King Stephen at the battle of Lincoln, in 1141:—"Equal to a thunderbolt, slaying some with his immense battle-axe, and striking down others." It was borne, as a royal weapon, at the funeral of Henry VII. in 1509, and offered up at the altar with the helmet, gauntlet, and crest.

BATTLE-DOOR.—This game was known in England in the 14th century, and was a fashionable pastime, even among adults, in the reign of James I. In a comedy called "The History of Two Maids of Moreclacke," printed in 1609, the expression occurs,—"To play at shuttlecock methinks is the game now."

BATTLE-FIELD (Battle). — (*See* HATELEY FIELD.)

BATTLE ROLL.—On the day following the battle of Hastings, Oct. 14, 1066, William I. called over, from the roll drawn up at St. Valery, the names of those chieftains who had accompanied him. The number amounted to 629, and amongst them a large portion of the English territory was divided.

BATTLES.—The most important battles recorded in history, whether by sea or land, are described under their best known names, and a list is given in the Index. Professor Creasy (Fifteen Decisive Battles of the World, from Marathon to Waterloo) enumerates the following as the most important:—

B.C.
1.—490. Marathon.
2.—413. Syracuse.
3.—331, Oct. 1. Arbela.
4.—207. Metaurus.

A.D.
5.—9. Teutoberg.
6.—451. Châlons.
7.—732, Oct. 10. Tours.
8.—1066, Oct. 14. Hastings.
9.—1429, April 29. Orleans.
10.—1588. Spanish Armada.
11.—1704, Aug. 13. Blenheim.
12.—1709, July 8. Poltowa.
13.—1777, Oct. 17. Saratoga.
14.—1794, Sep. 20. Valmy.
15.—1815, June 18. Waterloo.

BATTS (Parliament) assembled at Leicester, Monday, Feb. 18, 1426, and was called the Parliament of Batts, because, arms having been forbidden, servants and adherents followed the members with bats or clubs on their shoulders.

BAUGÉ (Battle).—(*See* ANJOU.)

BAUTZEN (Battle).—Napoleon I., at the head of 148,000 men, supported by a numerous artillery, attacked an allied Prussian and Russian army, amounting to 96,000 men, near Bautzen, Saxony, May 20 and 21, 1813. The French loss was very great; but they compelled their opponents to retire, which they did in good order, presenting a bold front to their assailants. (*See* WÜRTZCHEN.) Napoleon I. renewed his attempts at negotiation, which led to the armistice of Poischwitz (*q. v.*).

BAVARIA.—This country, occupied by the Boii (*q. v.*), was annexed to the Roman empire as part of Noricum and Vindelicia, B.C. 15. It subsequently fell into the power of the Ostrogoths and the Franks, and was conquered by Charlemagne, who annexed it to his empire A.D. 788. After his death it was governed by one of his grandsons, under the title of margrave, or lord of the marches. The early chronology is involved in much confusion.

A.D.
530. Agilulph shakes off the yoke of the Ostrogoths about this time, and founds the first Bavarian dukedom.
649. Christianity is introduced by Theodon I.
788. Charlemagne expels the Avars from Bavaria, which he annexes to his empire.
1070. It passes by imperial grant into the possession of the Guelphs.
1180. The Emperor Frederick I. bestows Bavaria on Otho of Wittelsbach.
1231. Otho II. becomes Duke of Bavaria, uniting with it the Palatinate of the Rhine.
1294. Separation of the Palatinate from Bavaria.
1542, March 5. William I. issues a mandate, ordering his subjects, under heavy penalties, to maintain the Roman Catholic faith.
1648, Oct. 24. The treaty of Westphalia restores the Palatinate, and constitutes Bavaria the eighth electorate.
1702. Bavaria forms an alliance with France to oppose Austria.
1704, Aug. 13. Battle of Blenheim (*q. v.*).
1714, Sep. 18. The treaty of Baden (*q. v.*) reinstates the Elector in his dominions.
1740. The Elector, Charles Albert, aspires to the imperial crown, and invades Austria.
1744. Maria Theresa defeats the Bavarians, and seizes the electorate, which is soon after restored.
1777, Dec. 30. Death of the Elector Maximilian Joseph I., with whom the younger line of the house of Wittelsbach becomes extinct.
1779, May 13. Treaty of Teschen (*q. v.*), which recognizes Charles Theodore as Elector of Bavaria, and cedes the district of the Inn to Austria.
1796. A French army, under Moreau, occupies Munich, and forces Bavaria to conclude a treaty with France.
1801, Feb. 9. Treaty of Luneville, by which Bavaria cedes all her possessions on the left bank of the Rhine, and receives, as an indemnification, territory of greater extent.
1805, Dec. 26. By the treaty of Presburg, Napoleon I. confers the title of "King" on the Elector of Bavaria, together with extensive additions of territory.
1813. Bavaria joins the allies against Napoleon I., and in the two following years has additional territories confirmed by definitive treaties.
1818, May 26. The King grants a constitutional charter.
1841, March 2. A convention for the settlement of matters relating to commerce and navigation is concluded at London between Great Britain and Bavaria.
1848, March 21. Louis Charles, King of Bavaria, abdicates in favour of Maximilian Joseph II.

A.D.
1850, Feb. 27. A convention is signed at Munich, between Bavaria, Saxony, and Wurtemberg, relative to the revision of the German constitution.
1864, Mar. 10. Maximilian Joseph II. expires, after a short illness, and is succeeded by his son, Louis II.

SOVEREIGNS OF BAVARIA.

AGILULPHINGIAN DUKES.

554. Garibald I.
593. Tassilon I.
610. Garibald II.
640. Theodon I.
680. Theodon II.
700. Theodoald, Grimoald, and Theodebert.
715. Grimoald and Theodebert.
724. Grimoald (alone).
728. Huxibert.
737. Odilon.
748. Tassilon II.

FRANK KINGS.

788. Charlemagne.
814. Louis I., le Débonnaire, and Lothaire.
817. Louis II., the German.
876. Carloman.
880. Louis III.
882. Charles the Fat.
888. Arnulph I. of Carinthia.
900. Louis IV., the Child.

BAVARIAN DUKES.

911. Arnulph II., the Bad.
937. Eberhard.
938. Berthold.

DUKES OF SAXONY AND FRANCONIA.

948. Henry I.
955. Henry II., the Quarrelsome.
974. Otho I. of Swabia.
983. Henry III.
985. Henry IV.
1004. Henry V.
1026. Henry VI.
1039. Henry VII.
1049. Conrad I.
1053. Henry VIII.
1056. Conrad II.
1057. Agnes.
1061. Otho II.

GUELPHIC DUKES.

1070. Guelph I.
1101. Guelph II.
1120. Henry IX.
1126. Henry X.

DUKES OF THE HOUSE OF BABENBERG.

1139. Leopold.
1141. Henry XI.

GUELPHIC DUKE.

1156. Henry XII.

DUKES OF THE HOUSE OF WITTELSBACH.

1180. Otho I.
1183. Louis I.
1231. Otho II., the Illustrious.
1253. Henry XIII. and Louis II.
1294. Louis III.
1347. Stephen.
1378. John I. of Munich.
1397. Ernest and William I.
1438. Albert I.
1460. John II. and Sigismund.
1467. Albert II.
1508. William II. and Louis IV.
1550. Albert III.
1579. William III.

ELECTORS OF THE HOUSE OF WITTELSBACH.

1598. Maximilian I. (Duke).
1623. do. (Elector).
1651. Ferdinand Maria.
1679. Maximilian Emanuel.
1726. Charles Albert.
1745. Maximilian Joseph I.

PALATINE HOUSE.

1777. Charles Theodore.

KINGS.

1799. Maximilian Joseph II. (Elector).
1805. Maximilian Joseph I. (King).
1825. Louis I.
1848. Maximilian Joseph II.
1864. Louis II.

BAY ISLANDS (Bay of Honduras).—This cluster was made an English colony by royal warrant, dated March 20, 1852, and a proclamation was issued at Belize July 17. Great Britain ceded the Bay Islands, consisting of Ruatan, Guanaca, Elena, Utile, Barbareto, and Morat, to the republic of Honduras, by treaty, signed at Comayagua Nov. 28, 1859.

BAY OF ISLANDS (Pacific), at the northern extremity of New Ulster, one of the New Zealand isles, became the seat of a whaling station in the 18th century.

BAYAZID (Battle).—The Russians, 8,000 strong, defeated a Turkish army of 5,000 men at this place, in Armenia, July 29, 1854.

BAYEUX (Normandy), the ancient Augustodurus, was burned to the ground by Henry I. in Aug., 1105, on which occasion its magnificent cathedral was much injured. Bayeux suffered greatly in the wars between England and France. It capitulated to Charles VII. in 1449. The bishopric was founded in the 4th century.

BAYEUX TAPESTRY.—This celebrated roll of linen cloth or canvas, 214 feet in length and 20 inches wide, contains, in 72 distinct compartments, a representation, in embroidery, of the events of the Norman invasion, from Harold's leave-taking of Edward the Confessor, on his departure for Normandy, to the battle of Hastings. The Bayeux tapestry is supposed to have been worked by Matilda, wife of William I., and was by her presented to the cathedral of Bayeux. Montfaucon caused researches to be made that ended in the discovery of the tapestry in Bayeux cathedral in 1728; and Napoleon I. had it conveyed to Paris in 1803, where it was kept some time and exhibited. It has been engraved, and several works upon the subject have been published. Bruce (Bayeux Tapestry Elucidated) says it contains figures of "623 men, 202 horses, 55 dogs, 505 animals of various kinds not hitherto enumerated, 37 buildings, 41 ships and boats, and 49 trees—in all 1,512 figures."

BAYLEN (Battle).—In 1808 Dupont's army was shut up in this town, in Spain, where a battle was fought with the Spaniards, July 20. It terminated in the complete discomfiture of the French, 20,000 strong, who surrendered at discretion.

BAYONET.—Military instructions issued to the French army in 1646 and 1647 contain the earliest notice of this weapon. In 1671 they were introduced generally into the French army. From official documents it appears that in 1682 the bayonet was inserted into the barrel of the musket. The plug-bayonet was used in England until 1690, after which date the socket bayonet was introduced. It superseded the pike, and was doubtless taken from the sweynes-feather, or swine's feather, called also swan's feather, invented during the reign of James I. This was a long, thin rapier blade, which the musketeer, after discharging his piece, fixed into the muzzle. The bayonet is said to have received its name from Bayonne, where it was invented. The first victory secured by a charge of the bayonet was that of Landen (*q. v.*), in 1693.

BAYONNE (France).—This ancient town was made a bishopric towards the end of the 4th century. Its cathedral was erected in the 13th century. It was taken by the English, Jan. 1, 1295, during the invasion of France by Edward I. The bayonet is said to have been invented at this place, from which its name is derived. Napoleon I. met Ferdinand VII. of Spain at the castle of Marac, near Bayonne, in April, 1808, and endeavoured to induce him to resign the crown, which he had just received from Charles IV. (*See* ARANJUEZ.) Ferdinand VII. abdicated May 6. Several encounters between the French and English took place near Bayonne, Dec. 9, 10, 11, and 13, 1813, in which the English were victorious, and the place was invested by them Feb. 24, 1814. The French

were repulsed in a desperate sally, April 14. This action was fought after peace had been concluded. The castle of Marac was destroyed by fire in 1825. An exhibition was opened here July 19, 1864.

BAYONNE (Treaty).—Agreed to May 4, 1808, and signed May 5, between Napoleon I. and Charles IV., King of Spain. The latter resigned his kingdom, and Napoleon I. engaged to maintain its integrity, and to preserve the Roman Catholic religion. His son Ferdinand VII. confirmed the cession, May 10.

BAYONNE CONFERENCE was held in June, 1565, between Charles IX., the queen mother, Catherine de Medici, Elizabeth, Queen of Spain, and the Duke of Alva, envoy of Philip II., to arrange plans for the repression of the Huguenots. It is generally believed that the massacre of Bartholomew's Day (*q. v.*) was determined upon at this meeting.

BAYREUTH (Germany).—This principality, formed about 1248, was united with the margraviate of Anspach, in 1769, and sold by the last Margrave of Anspach-Bayreuth to Prussia in 1791. Its annexation was agreed to by a treaty between France and Prussia, Dec. 15, 1805. France acquired it by the treaty of Tilsit (*q. v.*), July 9, 1807; but it was transferred to Bavaria in 1810. Its capital, of the same name, is a place of some importance. The church of St. Mary Magdalen was built in 1446, and the gymnasium in 1664.

BAZA (Spain).—This stronghold of Granada was wrested from the Moors, after a siege of six months' duration, by Ferdinand and Isabella, in Nov., 1489. The Spanish sovereigns made their triumphal entrance into the city Dec. 4.

BAZAAR.—This term is applied in Eastern countries to a large square or street appropriated to purposes of trade. The bazaar of Tauris is the most extensive in the world, and that of Khan Khaliel, at Cairo, which occupies the site of the tombs of the caliphs, contains some valuable records. It was built in 1292. The bazaar at Ispahan is, perhaps, the most magnificent of any. Adrianople and Constantinople have large bazaars. The last-mentioned was built in 1462. The Soho Bazaar, London, was opened in 1815, the St. James's Bazaar in 1832, the Pantheon (*q. v.*) in 1834, and the London Crystal Palace Bazaar in 1858. The Queen's Bazaar, Oxford Street, was burned down May 27, 1829. (*See* ARCADES.)

BAZAS (France).—This ancient city, the Roman *Cossio*, taken from the Vasates by Crassus in the 1st century B.C., was ravaged by the Vandals A.D. 408, by the Goths in 414, and by the Normans in 853. The Crusades were preached here by Urban II. in 1096, and by St. Bernard in 1153. Bazas was made a bishopric in the 6th century, and its cathedral was built in the 12th century.

BEACHEY HEAD (Sea-fight).—A French fleet, commanded by Tourville, consisting of 78 ships-of-war and 22 fire-ships, defeated the combined Dutch and English squadrons, under the Earl of Torrington, amounting to 56 sail, off Beachey Head, June 30, 1690. The French obtained the command of the Channel, and great consternation was created throughout England, particularly in the metropolis. William III. was incensed against the Earl of Torrington, who was tried by court-martial, and honourably acquitted.

BEACONS, or SIGNAL-FIRES, are referred to by Jeremiah (vi. 1), and were used by the Greeks and Romans. The intelligence of the capture of Troy is represented by Æschylus as having been conveyed to the Peloponnesus by signals of this kind. Coke says:—"Before the reign of Edward III. they were but stacks of wood set up on high places, which were fired when the coming of enemies was descried; but in his reign pitch-boxes, as now they be, were, instead of these stacks, set up; and this properly is a beacon." An act of the Scotch Parliament, in 1455, prescribed the mode in which any approach of the English was to be signalled by beacons. The erection of beacons once formed a branch of the royal prerogative, but by 8 Eliz. c. 13 (1566), the corporation of the Trinity House were empowered to set up beacons, or sea-marks, in all places where they deemed them necessary, and the penalty for destroying them was the fine of £100, and, in case of inability to pay, outlawry. They were sometimes erected on the towers of churches. The eastern beacon nearest London was on Shooters' Hill; and that in Middlesex on Hampstead Hill, as was represented in Hollar's View of London in 1666.

BEADEN-HEAD (Battle).—The Kings of Wessex and Mercia fought an indecisive battle at this place, supposed to be Great Bedwyn, in Wiltshire, A.D. 675.

BEADS, made of various materials, were used as ornaments amongst ancient nations, and have been frequently found in barrows, more particularly in those of the Druids, in different parts of England. They were used for devotional purposes by the Chinese, Hindoos, and Egyptians; and Augustine, in the 4th century, is said to have introduced the practice among the Christians. According to the 10th of the canons of Chelsea, July 27, 816, seven belts of paternosters were to be said for the repose of a bishop. About the year 1200 St. Dominic introduced the rosary (*q. v.*).

BEANDUNE (Battle).—Cynegils, King of Wessex, defeated the Britons at this place, supposed to be Bampton, in Oxfordshire, though some authorities are in favour of Bampton, in Devonshire, in 614. More than 2,000 of the Britons fell in the action.

BEAR.—This military order was instituted at St. Gall, in Switzerland, by the Emperor Frederick II., in 1213, St. Ursus being the patron. It was abolished when Switzerland threw off the Austrian yoke.

BEAR-BAITING.—This cruel pastime was very popular in England during the Middle Ages, and frequently took place on a Sunday, after service. In Fitzstephen's description of London—and he wrote in the time of Henry II.—bear-baiting is enumerated amongst the sports of the citizens; and Stow speaks of the bear-gardens as being much frequented in his day. The act against cruelty to animals, 5 & 6 Will. IV. c. 59 (Sep. 9, 1835), inflicts upon persons keeping bear-pits a fine not exceeding £6, nor less than 10*s.* per day; and the 47th clause of the act for improving the police in

and near the metropolis, 2 & 3 Vict. c. 47 (Aug. 17, 1839), gives them the power of entering such places.

BEARD is first noticed in Lev. xix. 27: "Neither shalt thou mar the corners of thy beard." It was held in veneration amongst ancient nations, who regarded it as an emblem of wisdom, and a symbol of authority. Some classes of the Israelites wore long beards (2 Sam. x. 4 & 5). The ancient Egyptians of rank shaved both head and chin, but used wigs and artificial beards. In their paintings, &c., a short square beard denotes a man of rank, one longer in form a king, while a god is distinguished by a beard pointed and curled upwards at the end. The Assyrians paid great attention to the beard, which was adorned by the wealthy with gold threads interwoven with the hair. The Romans shaved the beard on attaining their majority, dedicating the hair to some divinity. The flowing beards and majestic mein of the Roman senators awed the Goths on their invasion of Italy, B.C. 390. The fashion of the beard has varied greatly at different periods. The ancient Britons shaved the chin, but cultivated thick moustachios; the Saxons wore forked beards. Owen, Bishop of Evreux, allowed his beard to grow, as a sign of mourning. Francis I. (1515—1547) introduced the fashion, imitated in England, of wearing the hair short, with a thick bushy beard. In the Elizabethan period the custom of dying the beard was general. Shakespeare (A Midsummer-Night's Dream, i. 2) speaks of "Your straw-coloured beard, your orange-tawny beard, your purple-in-grain beard, or your French-crown-coloured beard, your perfect yellow." Taylor, the water poet, dwells on the great variety of beards in his day. The beard diminished in size, and gradually went out of fashion in England after the reign of Charles I. The fashion has, however, of late years revived.

BÉARN (France).—This province, the name of which is derived from its ancient capital, Beneharnum (*q. v.*), after successively forming a portion of the territories of the Romans, the Goths, the Franks, and the Gascons, was erected in 820 into an independent state, under Centule I. In 1134 it passed to the family of Gabaret, and in 1170 to the lords of Moncade, from whom it was transferred, in 1290, to the house of Foix, and ultimately, in 1550, to the family of Bourbon. Henry IV. annexed it to the French crown in 1594, and Louis XIII., having defeated the Huguenot populace, confirmed the annexation in 1620. In 1813 it was occupied by the British.

BEAULIEU ABBEY (Hants) was founded by King John for Cistercian monks in 1204. Margaret of Anjou, queen of Henry VI., took sanctuary here after the battle of Barnet, April 14, 1471, and Richard, Duke of York,* after his failure upon Exeter, also sought sanctuary in this monastery, Sep. 21, 1497.

BEAUNE (France).—The church of Notre Dame was founded by Henry I., Duke of Burgundy, in 976, and the church of St. Pierre, built of materials taken from the ruins of an old Roman temple, was completed in 1098. Beaune was erected into a commune in 1203. A fine hospital was founded by Chancellor Rollin in 1443. Beaune, seized by the Leaguers in 1585, was surrendered by the inhabitants to Henry IV. in 1595. During the 17th century it was a flourishing seat of manufactures, carried on for the most part by Protestants, who were expelled by the revocation of the edict of Nantes, Oct. 22, 1685. La Madeleine, the last ancient gate of this city, was pulled down in 1837.

BEAUVAIS (France).—The Cæsaromagus, or Bratuspantium of the Romans, was taken by Cæsar B.C. 57. It received the name of Bellovacum in the time of Constantine I. The bishopric of Beauvais was erected in the 3rd century. It was assailed by the Northmen in 850, and after undergoing various vicissitudes, it resisted an attack by the English, June 7, 1433. It was the scene of the Jacquerie or Peasants' war in 1358. Charles, Duke of Burgundy, laid siege to it, Saturday, June 27, 1472, assaulted it in vain July 9, and after making the most extraordinary efforts, was compelled to retire, Wednesday, July 22, in the same year. The women, called the heroines of Beauvais, distinguished themselves during the siege. Jeanne Laisné, battle-axe in hand, carried off a Burgundian standard, for which she was called Jeanne Hachette; and in honour of this deed of daring, a procession, headed by girls carrying her banner, takes place in her native town every October. A statue was erected to her memory in 1851.

BEAVER DAM (N. America).—At this place, near Queenstown, Capt. Kerr, with a force not amounting to 200 men, captured a detachment of 500 men belonging to the army of the United States, June 24, 1813.

BECANCELDE, or BACCANCELDE. — A council summoned by Wihtred, King of Kent, was held at this place in 694, to consult respecting the bettering of God's Church in that part of England. Abbesses took part in its deliberations, and five subscribed the constitutions in the form of a charter, drawn up on the occasion. Bapchild, in Kent, is generally supposed to be the place at which this early synod was held, though some authorities are in favour of Beckenham, in the same county.

BECKASCOG (Treaty), renewing the convention of Helsinborg, dated Aug. 31, 1805, was concluded between Great Britain and Sweden, at Beckascog, Oct. 3, 1805. Sweden agreed to send 12,000 troops into Pomerania to co-operate with the Russians against France, for which England was to furnish an annual subsidy, at the rate of £12. 10*s.* each man; and to pay for preliminary expenses the subsidy calculated at that rate for five months, on the ratification of the treaty. It consisted of 10 articles, and by the ninth England agreed to furnish an additional £50,000 sterling for the purpose of improving the defences of Stralsund.

BED OF JUSTICE, the seat or throne on which the sovereign sat in the Parliament of France. As the authority of the Parliament

* The statement that he was an impostor, named Perkin Warbeck, son of a Jew of Tournay, though generally received, does not rest upon good authority.

ceased when the king was present, a bed of justice came to signify a session of the king in Parliament. The last bed of justice was assembled at Versailles, Nov. 19, 1787, by order of Louis XVI.

BEDCHAMBER.—(*See* LORDS AND LADIES OF THE BEDCHAMBER.)

BEDER (Battle).—This battle, won by Mohammed over the Koreish of Mecca, was fought between that town and Medina, A.D. 623. It was the first struggle after the flight from Mecca, and was represented, from the great disparity in numbers, as having been gained by miraculous agency.

BEDFORD.—The Saxon "Bedcanford," "the lodging at the ford," so called from its situation at an ancient ford of the Ouse. The West Saxons and the Britons fought a battle here in 571. The town, nearly destroyed by the Danes in 1010, was restored by Edward the Elder. Stephen took the castle in 1137, during his war against Matilda. King John captured it in 1216. It was frequently besieged. The Grammar School was founded by Edward VI. in 1552. John Bunyan preached in a chapel here from 1671—1688; and in its gaol, on the site of which a new one has been erected, wrote "The Pilgrim's Progress." The bridge was rebuilt in 1811.

BEDFORD ADMINISTRATION.—(*See* GRENVILLE ADMINISTRATION.)

BEDFORD LEVEL.—(*See* DRAINAGE.)

BEDLAM.—(*See* BETHLEHEM HOSPITAL.)

BEDNORE (Hindostan).—This place, made in 1645 the seat of the rajahs of Ikeri, was captured, with a large amount of plunder, by Hyder Ali in 1763. Though he ordered the name to be changed to Hydernagur, it still retains its former appellation. It was taken by Gen. Matthews in Jan., 1783, and was retaken by Tippoo Saib, April 18, in the same year. In 1833 it came into the possession of the East India Company.

BEDOUINS, wandering Arab tribes, supposed to be the descendants of Ishmael, the "wild man," whose "hand was against every man, and every man's hand against him" (Gen. xvi. 12), B.C. 1910. Their mode of life has undergone little change since the time of Moses (B.C. 1571—1451) and Mohammed (A.D. 570—632), but since the conquest of Northern Africa in the 7th century they have enjoyed a wider field for their predatory excursions, which extend from Egypt to the Atlantic Ocean. (*See* ARABIA.)

BEDRIACUM, or BEBRIACUM (Battles).—The first, between the generals of Marcus Otho and Aulus Vitellius, rivals for the imperial sceptre, was fought in April, A.D. 69, when the former suffered a defeat, and Marcus Otho committed suicide at Brixellum, April 17. The second was fought the same year, between the generals of Vitellius and Vespasian, the latter being victorious. Bedriacum lay between Verona and Cremona, but its exact position has not been ascertained.

BEDS.—The earliest practice amongst ancient nations was to sleep upon the skins of beasts. Among the Israelites an ordinary couch, with light coverings, served the purpose of a bed. At a later period ivory bedsteads were used by the wealthy (Amos vi. 4), B.C. 805. They were sometimes decked with rich hangings, and sprinkled with perfumes (Prov. vii. 16 & 17). The Greeks did not make use of pillows until about B.C. 850. Towards the end of the Roman republic, and under the empire, when simplicity of living had given place to Asiatic luxury, the beds of the opulent classes were most costly and magnificent. Straw is said to have been used in the royal chambers in England in the 13th century. The great bed of Ware, to which Shakespeare alludes in "Twelfth Night"—"Although the sheet were big enough for the bed of Ware in England" (act iii. sc. 2)—is still in existence at Ware, and will hold 12 persons. Air-beds were invented in the 18th century, and the hydrostatic or water-bed, by Dr. Arnott, in 1832.

BEE (Order of the) was instituted at Sceaux, by Louise of Bourbon, wife of Louis Augustus of Bourbon, Duke of Maine, June 4, 1703. It was intended for women as well as men.

BEEF-STEAK CLUB (London).—The first of this name was established in the reign of Queen Anne, and is described in Ward's "Secret History of Clubs" (1709). Dick Estcourt, the actor, who died in 1712, was its first providore. The club was frequently noticed in contemporary literature, and appears to have been famous for the jovial character of its meetings. The Sublime Society of the Steaks was founded by Henry Rich in 1735, and consisted of 24 members, who met every Saturday in a room at the top of Covent Garden Theatre. The number was, in 1785, increased to 25, in order to admit the Prince of Wales, who joined May 14. Its archives were destroyed when Covent Garden Theatre was burned, Sep. 20, 1808. After the fire they met at the Bedford Hotel till apartments were fitted up for them in the English Opera House. After its destruction by fire, Feb. 16, 1830, they returned to the Bedford, until the Lyceum Theatre was rebuilt in 1834. A beef-steak club became a kind of institution in almost every theatre. The club formed by Dr. Johnson in Ivy Lane, in 1749, was at first a beef-steak club. (*See* RUMP-STEAK or LIBERTY CLUB.)

BEER.—(*See* ALE and BEER.)

BEES were kept by the Greeks and Romans, who used hives made of cork, wood, wicker, bronze, and pottery. By 9 Hen. III. c. 13 (1225), every freeman was entitled to the honey found in his own woods. Huber, the blind naturalist, by whom the nature of bees was most carefully studied, discovered the existence of the wax cells in 1793. The Western Apiarian Society was established at Exeter in 1709.

BEES, ST. (Cumberland).—This ancient town derives its name from Bega, an Irish saint, who is said to have formed a small monastery here A.D. 650. It was destroyed by the Danes, and restored in the reign of Henry I., about 1120, being intended for Benedictine monks. Archbishop Grindall, who died A.D. 1583, founded the grammar-school. The founder's statutes were afterwards confirmed, and the governors incorporated in 1585. The college was established in 1817.

BEET-ROOT, introduced into this country in the latter part of the 18th century as a pickle, salad, and for feeding cattle, has been extensively used on the continent in the manufacture of sugar (*q. v.*).

BEFFROI, or BELFRY. — This movable tower, with different stories, used in besieging towns, is mentioned by Cæsar. Some of them were of extraordinary height, the upper story rising above the walls of towns. Gibbon speaks of one employed at the siege of Nicæa in 1097, and Froissart describes another used against the castle of Breteuil in 1356. They were commonly employed during the Crusades. (*See* BATTERING-RAM.)

BEFORT, or BELFORT (France). — This town of Alsace, which belonged in the 14th century to the Counts of Ferette, was taken by the Swedes in 1632 and 1634. In 1636 it was seized by the French, to whom it was ceded by Austria in 1648, and having been strongly fortified by Vauban in 1686, was unsuccessfully invested by the allies in Jan., 1814. Lieut.-Col. Caron failed in a conspiracy against the French Government at this place in 1821, for which he was condemned to death Oct. 1, 1822.

BEGGARS have in all ages, and amongst most nations of which any record remains, practised various arts in order to enlist the sympathies of the benevolent. Severe enactments have from time to time been passed against them. By 12 Rich. II. c. 7 (1388), beggars able to work were ordered to be punished, and a provision was made for the impotent. Various enactments followed. By 22 Hen. VIII. c. 12 (1530), justices of the peace might issue licenses to poor and impotent persons to beg within a certain precinct; they were punished if they went beyond the limits, while vagabonds found begging were to be whipped and compelled to labour; and by 27 Hen. VIII. c. 25 (1535), persons giving alms to beggars were to forfeit 10 times the value. All former acts were repealed by 1 Edw. VI. c. 3 (1547), and new regulations made. These, however, were abandoned, and the act 22 Hen. VIII. c. 12, revived by 3 & 4 Edw. VI. c. 16 (1549—50). By 14 Eliz. c. 5 (1572), vagabonds above the age of 14 were to be grievously whipped and burned through the gristle of the right ear with a hot iron. A second offence was punished more severely, and for the third they were to suffer death. This statute was repealed by 35 Eliz. c. 7, s. 24 (1593), and fresh regulations were made by 39 Eliz. c. 4 (1597). All the statutes relating to rogues, vagabonds, sturdy beggars, &c., were reduced into one law by 12 Anne, st. 2, c. 23 (1713), which was explained and amended by 10 Geo. II. c. 28 (1737); and enforced by 13 Geo. II. c. 24 (1740). It was repealed by 17 Geo. II. c. 5 (1744), which made fresh provisions. The Vagrant Act 5 Geo. IV. c. 83 (June 21, 1824), which repeals all former acts, and lays down other regulations, is amended in some particulars by 1 Vict. c. 38 (July 27, 1838).

BEGGARS OF THE SEA.—(*See* GUEUX.)

BEGGAR'S OPERA was written by John Gay, and produced Jan. 29, 1728, at the theatre in Portugal Row, afterwards street, Lincoln's-Inn-Fields, by Henry Rich, having been refused by Colley Cibber for Drury Lane. It ran for 62 nights, 32 being in succession. Gay received £693. 13*s.* 6*d.*, and afterwards sold the copyright of the opera, with some fables in verse, for £94. 10*s.* Miss Fenton, the original "Polly Peachum," retired from the stage, and became Duchess of Bolton, during the run of the piece. Stanhope (Hist. of Eng. ii. ch. 18) attributes it to the resentment of Gay against the queen, who had offered to him the appointment of gentleman usher to one of the princesses, a child of about two years of age. The post was an easy one, and the salary £200 per annum. Gay was induced not only to refuse this offer of "an honourable sinecure," but to resent it as an insult. "Soon afterwards," says Lord Stanhope, "he joined the opposition, and declared his quarrel by the production of the 'Beggar's Opera,' teeming with satirical strokes against the court and government. The name of 'Bob Booty,' for example, always raised a laugh, being understood as levelled at Sir Robert Walpole. The first idea of the opera seems to have sprung from a suggestion of Swift (Spence's Anecdotes, p. 159), but the praise of its execution belongs entirely to Gay." It was said to have "made Gay rich, and Rich gay," in allusion to the author and manager.

BEGHARDS, BEGUARDS, or BEGUINES, is a term applied to several religious orders, as well as heretics, during the Middle Ages. It was probably first used to describe those half monks of the third order of St. Francis, who arose in the 11th century. They must not be confounded with later sectaries, a branch of the Fraticelli, condemned by the Fifteenth General Council, that of Vienne, in 1311 and 1312. This mistake was so often made at the time that Pope John XXI. or XXII., by a decretal of 1322, declared the last-mentioned to be execrable impostors, and in no way connected with the Beghards of the third order of St. Francis. Mosheim shows that the name is derived from the old German word *beggen* or *beggeren*, to beg, with the word *hard* subjoined; and that it signified to beg earnestly and heartily; and he accounts by this derivation for the indiscriminate manner in which it was applied to so many orders and sects. The subject is involved in almost inextricable confusion, as the student or inquirer will discover if he attempts to reconcile the conflicting accounts of different authorities.

BEGUINES, or BEGUTTÆ, praying ladies, as Mosheim calls them, arose in the Netherlands, and spread through France and Germany during the 12th and 13th centuries. They were pious women, virgins or widows, who formed themselves into societies, under the direction of a superior of their own sex. The first establishment of which any record remains was at Nivelles, in Brabant, founded, according to some authorities, in 1207, and according to others in 1226. They soon became so numerous that Matthew Paris speaks of 2,000 Beguines in Cologne and its neighbourhood about the year 1243. The example set by the ladies was soon followed by the men, and a society of Beghards (*q. v.*), consisting of both

bachelors and widowers, was formed at Antwerp in 1228. They were known under various appellations in different parts of the Continent, where, although they spread rapidly, they never became so numerous as the Beguines. As a natural consequence, the Beghards and Beguines became infected with heretical opinions, and declined from the simple rule of life observed in the earlier days of their organization. The Popes tolerated and sometimes interfered to protect them from their numerous enemies; but they suffered persecution and gradually diminished in numbers, although a few remain to this day in parts of Belgium, Holland, and Germany.

BEHAR.—(*See* BAHAR.)

BEHISTUN (Media).—Semiramis, during her supposed march from Babylon to Ecbatana, about B.C. 2017, is said to have halted at this city, the name of which signifies "the place of God," and to have engraved upon a neighbouring mountain, called by the Romans Bagistanus Mons, several rock tablets of which no traces remain. Rawlinson, who ascribes a much later date to Semiramis (*see* ASSYRIA), supposes that these inscriptions "were probably either Assyrian or Babylonian, and (it is most likely) resembled the ordinary monuments which the kings of Babylon and Nineveh delighted to erect in countries newly conquered." (Ancient Monarchies, iii. 32). Darius, King of Persia, commenced a fine series of cuneiform sculptures, B.C. 516, which Sir H. Rawlinson deciphered as a statement of the monarch's ancestral right to the Persian throne. Alexander III. (the Great) visited this spot on his march from Susa to Ecbatana, about B.C. 330. The rock also bears an inscription commemorating a victory gained in the neighbourhood by Gotarzes, a Parthian prince of the dynasty of the Arsacidæ, over his rival Meherdates, A.D. 50.

BEHMENITES, disciples of Jacob Behmen, or Böhme, the mystic, who was born at Alt-Seidenberg, in Upper Lusatia, in 1575, settled at Görlitz as a shoemaker in 1595. In 1610 he commenced the publication of a series of works in which he professed to enjoy a revelation of inward light from the Holy Ghost, that enabled him to perceive the secrets of nature and religion. He was opposed by Gregorius Richter, primate of Görlitz, and was compelled to retire to Dresden, but returned to his home, where he died, Sunday, Nov. 18, 1624. His works were first published in a collected form in 1675. The Rev. W. Law, an ardent advocate of Behmen's theological doctrines, stated in 1756, in the second edition of his "Appeal to all that doubt or disbelieve the Truths of the Gospel," that Sir Isaac Newton was a student of Behmen, and had derived some portions of his philosophy from his works.

BEHMUS HEIGHTS (Battle).—During the American revolutionary war, Gen. Burgoyne defeated the Americans at Behmus Heights, on the Hudson, Sep. 19, 1777.

BEHRING'S STRAIT, connecting the Pacific Ocean and the Arctic Sea, was discovered by Vitus Behring, a Danish navigator in the Russian service, in 1728. Capt. Cook surveyed it in 1788. On an island in the N. Pacific, named after him, Behring was wrecked Nov. 3, 1741, and died of exhaustion Dec 8.

BEILAN (Battle).—Ibrahim Pasha defeated 36,000 Turks under Hussein Pasha at this place in Syria, July 29, 1832. All their cannon and baggage were seized, and they were afterwards unable to muster 10,000 men.

BEITÎR.—(*See* BETHAR.)

BEJA (Portugal), the ancient Pax Julia, was captured by the Moors in 1145, and retaken by Sancho I., King of Portugal, in 1189. The see, which is known to have been in existence in the 6th century, as Aprigius was bishop in 540, was suppressed in 1647, and restored in 1770.

BEJAPORE (Hindostan).—This town was formerly the capital of an independent Mussulman state of the same name. Its founder, Yusuf, built the citadel in 1489. In 1566 the walls were completed by Ali Adil Shah, who died in 1579. Aurungzebe took Bejapore in 1686, and annexed it to Delhi, from which it was separated by the Nizam in 1724, and ceded to the Mahrattas in 1760. In 1818 Bejapore passed into the hands of the British, who assigned it to the Rajah of Satara, but resumed possession on the extinction of that royal house in 1848.

BELCHITÉ (Battle).—The Spanish army, under Gen. Blake, was assailed at this town in Spain by the French, commanded by Suchet, June 16, 17, and 18, 1809, and on the last-mentioned day the Spanish army took to flight without firing a shot.

BELEM (Portugal).—This town, on the Tagus, forming a fashionable suburb of Lisbon, was the port whence Vasco de Gama sailed on his expedition of discovery, July 8, 1497. King Emanuel of Portugal established a church and monastery here in 1499. It was taken by the French under Junot, Nov. 30, 1807, and was occupied by Don Pedro's forces in 1833. (*See* PARA.)

BELFAST (Ireland).—The earliest mention of Belfast occurs in 1315, when Edward Bruce, on the invitation of the native Irish, landed at Carrickfergus, and wasted Belfast and other towns. In 1476 the castle was destroyed by O'Neill; and again in 1503 by Gerald, Earl of Kildare, who returned in 1512 and committed still further ravages. In 1552 the castle was repaired and garrisoned, and given by Edward VI. to Hugh McNeill. In 1613 Belfast was incorporated by James I., and sent two members to the Parliament of that year. The "Great Bridge of Belfast," which consisted of 21 arches, was founded in 1682, and seven of the arches fell in 10 years afterwards, 1692. The first edition of the Bible printed in Ireland is that of Belfast, 1704. The castle was burned April 4, 1708. The first Belfast newspaper was published in 1737. The old Exchange was built by the Earl of Donegal in 1769. Cotton manufacture was introduced in 1777. The savings bank, established in 1811, was one of the first in Ireland. The museum was built in 1830. Queen's College was opened for the reception of students in November, 1849. Religious riots occurred July 14, 1852; and in July, August, and September, 1857, the

town was the scene of a series of riots, in consequence of the opposition of the Roman Catholics to the attempts of some Protestant ministers to introduce open-air preaching. Fire destroyed the Victoria Chambers, Belfast, causing a loss of £100,000, July 1, 1859. It was one of the centres of the so-called religious revivals, in Sep., 1859. On the installation at Dublin of the statue of Daniel O'Connell, Aug. 8, 1864, the Orangemen of Belfast burned his effigy, whereupon the Roman Catholics attacked the procession and the Protestant churches. Riots ensued, which were not suppressed till Aug. 19. Nine lives were lost, and 176 persons were wounded.

BELFORT.—(*See* BEFORT.)

BELFRY.—(*See* BEFFROI.)

BELGÆ.—This ancient Celtic people, originally settled in Germany, passed at an early period into Gaul, whither they were attracted by the superior fertility of the soil. Cæsar, who quartered his legions in their country during the winter B.C. 54—55, describes them as one of the three great tribes among whom Gallia was distributed. He also refers to a nation of Belgæ as inhabiting the southern portions of Britain, but the history of this people, and its identity or otherwise with the Gallic tribe of the same name, is involved in obscurity.

BELGIUM.—This country, the Gallia Belgica of the Romans, occupied by Celtic and German tribes, after undergoing various changes (*see* FLANDERS, HOLLAND, the NETHERLANDS, and the UNITED PROVINCES), was, by treaty of July 21, 1814, united with Holland. The Dutch and Belgian elements would not combine, and the outbreak of the French Revolution proved the signal for a separation.

A.D.

1830, Aug. 25. An insurrection breaks out at Brussels.—Sep. 22. The separation from Holland is resolved upon.—Oct. 16. Arrangements are made for a national congress.—Oct. 27. The insurgents take Antwerp.—Nov. 10. The national congress at Brussels proclaims the independence of the Belgian people.—Dec. 20. The conference of the great powers assembled at London interferes to prevent war between Holland and Belgium, and recognizes the independence of Belgium.

1831, Feb. 3. The Belgian Congress choose the Duke of Nemours for king.—Feb. 25. M. Surlet de Chokier is installed Regent of Belgium.—June 4. Louis Philippe having refused to sanction the election of the Duke of Nemours, Prince Leopold of Saxe Coburg is chosen king.—July 21. Prince Leopold of Coburg is installed at Brussels.—Aug. 4. Renewal of hostilities with the King of Holland.—Aug. 23. A French army of 50,000 men assists the Belgians, and a truce is resolved upon.—Nov. 15. The great powers conclude a treaty at London with Belgium, defining the limits of the new kingdom.

1832, Nov. 30. The siege of Antwerp.

1833, Great distress prevails among the Belgian manufacturers in consequence of the cessation of trade with Holland.

1834, April 6. Riots take place in Brussels.

1838, Commercial panic, owing to the failure of the bank of Belgium.

1839, April 19. Holland concludes a treaty with Belgium.

1846, Dec. Terrible famine in Belgium.

1850, Aug. Calamitous floods in Belgium.

1851, Oct. 27. A treaty of commerce is concluded at London between Great Britain and Belgium.

1852, Aug. 10. Queen Victoria visits Belgium.

1853, Aug. 22. Marriage of the Duke of Brabant, heir apparent of Belgium, with the Archduchess Maria of Austria.

A.D.

1857, May 19. The Roman Catholic clergy introduce a bill placing the administration of public charities in their power.—June 12. It is abandoned in consequence of its unpopularity.

1860, June 17. Deputies from all the Belgian provinces, assembled at Brussels, decide upon forming a league for the preservation of national independence.

1861, Oct. 19. The King of Belgium meets the King of Holland at Liège.

1862, July 23. A treaty of commerce with Great Britain is signed at London.

1863, June 18. Leopold I. having been appointed to arbitrate between Great Britain and Brazil, awards in favour of the latter country. (*See* BRAZIL.)—Aug. 11—Sep. 10. Queen Victoria visits Belgium.

1865, Dec. 10. Death of Leopold I., who is succeeded by his son, the Duke of Brabant, under the title of Leopold II.—Dec. 16. Funeral of Leopold I., at Laeken.—Dec. 17. Leopold II. takes the constitutional oath as King of the Belgians.

KINGS OF BELGIUM.

1831. Leopold I.
1865. Leopold II.

BELGRADE, or THE WHITE CITY (Servia), built on the site of the ancient Singidunum, destroyed by the Avars in the 6th century, was founded in 1372. John Huniades defended it against Mohammed II. from July 22 to Sep. 4, 1456. The latter was repulsed with a loss of 40,000 men, and Gibbon remarks, "the joyful nations celebrated Huniades and Belgrade as the bulwarks of Christendom." The Turks captured it Aug. 20, 1521; the Austrians obtained possession in 1688; but the Turks recovered it in 1690. Prince Eugène invested Belgrade, June 19, 1717, defeated the Turkish army sent for its relief, Aug. 16, and entered the town the following day. By a humiliating treaty it was restored to the Turks in Sep., 1739. The Austrians retook it Oct. 8, 1789, and restored it to the Turks in 1791. The Servians seized it in 1806; but in 1813 it reverted once more to the Turks. A dispute between the Turks and Servians broke out here June 15, 1862, in consequence of the assassination of a Servian youth by a Turkish soldier. The Turks were driven into the citadel, whence they commenced bombarding the town, and an armistice was concluded June 18.

BELGRADE (Treaty).—This humiliating peace, dictated at the point of the sword, was concluded between Austria, Russia, and Turkey in Sep., 1739, the definitive treaty having been signed Sep. 18. Austria ceded Servia, Wallachia, with Belgrade and other fortresses, and Russia restored her conquests to the Porte and renounced her pretensions with respect to the navigation of the Black Sea. It was the most glorious treaty the Turks had ever made with any European power.

BELIZE, or BALIZE (Central America).—This settlement, otherwise called British Honduras, was founded by the logwood cutters of Yucatan, Honduras, and Nicaragua, shortly before 1674, when it was visited by Dampier. In 1754 an invading expedition of 1,500 Spaniards was defeated by a body of 250 English settlers. A second attack was made Sep. 15, 1779, when the inhabitants were overcome, and removed in large numbers to Merida and Havana, where many died in captivity. In 1783 the settlement was again thriving, and after

repeated altercations with its Spanish American neighbours, repulsed another formidable attack, made by a fleet of 13 vessels and a land force of 2,000 men, July 10, 1798. After this victory, Belize was suffered to remain in comparative tranquillity, and it was specially excepted from the treaty concluded at Washington, June 29, 1850, by which Great Britain and the United States mutually agreed "not to occupy, fortify, or colonize any part of Central America."

BELL, BOOK, AND CANDLE.—(*See* ANATHEMA AND EXCOMMUNICATION.)

BELL ROCK LIGHTHOUSE.—(*See* INCHCAPE ROCK.)

BELLAIR (Battle).—Capt. Sir Peter Parker, at the head of 120 men, landed from the *Menelaus*, at anchor in the Chesapeake, and attacked the Americans posted at Bellair, near Baltimore, Aug. 30, 1814. The enemy, who appeared in greater force than had been anticipated, were put to flight. Capt. Parker was killed, and the expedition returned, carrying away their wounded.

BELLEGARDE (France).—This barrier fortress, near the Pyrenees, was taken by Peter III. of Aragon, in 1285. The Spaniards regained possession in 1674, but were expelled by Marshal Schomberg in 1675. Louis XIV. constructed the present fortress in 1679. The Spaniards captured it June 25, 1793, and Dugommier, at the head of the French republicans, regained possession Sep. 17, 1794.

BELLEISLE (Atlantic).—This island, off the coast of France, belonged, in the 9th century, to the Count of Cornouailles, who bestowed it on the abbey of Quimperlo. The monks ceded it to Marshal Retz in the 16th century, and it was sold to Fouquet in 1638. The Dutch captured it in 1674. Fouquet's grandson, Marshal Belleisle, ceded it to the Duke of Orleans in 1718. A French fleet was defeated off Belleisle by an English squadron under Sir E. Hawke, Nov. 20, 1759. The English having failed in an attempt to land, April 8, 1761, succeeded April 22, and the whole island surrendered June 7. It was restored to France by the treaty of Paris, Feb. 10, 1763.

BELLMEN.—Stow says that Alderman Draper set up the first bellman in Cordwainer Street Ward, in January, 1556. The number was speedily increased, and the bellman was often attended by a dog. He was added to the London watch, and went through the streets and lanes ringing his bell, and crying, "Take care of fire and candle; be kind to the poor, and pray for the dead." It was also a part of the bellman's office to bless the sleepers as he passed their doors. Milton refers to this in "Il Penseroso:"—

> "The bellman's drowsy charm,
> To bless the doors from nightly harm."

BELLOT STRAIT (Antarctic), connecting Prince Regent's Inlet with Peel Sound or Franklin Channel, was discovered by Capt. Kennedy in 1851, and named by him after Joseph Réné Bellot, a French naval officer, who joined the expedition which sailed from England in search of Sir John Franklin in May, 1851. Lieut. Bellot sailed in Capt. Inglefield's expedition in 1852, and perished in a deep crack in the ice, Aug. 18, 1853. A monument was erected to his memory in front of Greenwich Hospital in 1855.

BELLOVACI.—This Gallic tribe, referred to by Cæsar as the chief of the Belgic peoples, had their capital at Bratuspantium. Their territory was invaded, and their chief city captured, by Julius Cæsar B.C. 57. They revolted B.C. 51, but were again reduced to subjection.

BELLOWS are represented in the paintings of the ancient Egyptians, and were used by the Greeks and Romans, who ascribed their invention to Anacharsis the Scythian, the contemporary of Solon, B.C. 594. During the 13th century bellows-blowers were regular officers of the royal kitchens of England. Wooden bellows, which, from the greater strength of their material, are better adapted than those made of leather for manufacturing purposes, were introduced in Germany in the 16th or 17th century, their invention being variously ascribed to Hans Lobsinger, of Nuremberg, about 1550; to a Bishop of Bamberg before 1620; and to the brothers Martin and Nicholas Schelhorn, about 1630. The Trompe, or Water-bellows, was invented in Italy about the year 1640. Smeaton constructed large bellows or blowing machines, worked by steam or water power, for the Carron iron-foundry, in 1760. The hot-blast, discovered by Neilson in 1827, was patented by him in 1829.

BELLS were in use amongst ancient nations both for religious and other purposes. They are first mentioned in the book of Exodus. The Egyptian monuments do not, however, contain any appearance of them, but small bells have been discovered both in Egyptian and Assyrian tombs, and it appears from their bas-reliefs that the Assyrians also used them to decorate their horses. The Chinese claim to have used bells as early as B.C. 2000. Bingham rejects as a vulgar error the story that they were first introduced into the Christian Church by Paulinus, Bishop of Nola, about A.D. 400, and believes that they were not known long before the 7th century. Benedict, Abbot of Wearmouth, brought one from Italy to England in 680. Ingulphus relates of Turketul, Abbot of Croyland, who died in 975, that he had a very large bell made, called Guthlac, and that this, with six others, soon afterwards added, produced such an exquisite harmony that England had no such peal of bells in those days. William of Malmesbury speaks of the bells given to the churches by Dunstan. The custom of consecrating, anointing, and baptizing bells, giving them the name of some saint, Bingham shows to be a modern invention. Baronius himself does not assign the date earlier than the year 968, when John XIII. consecrated the great bell of the Lateran church, naming it John. The Turks have a saying that "bells drive away good spirits from the abodes of men," and do not allow them to be used. The Greek Church, under their dominion, employ various modes of summoning people to service. In the 15th century bells of enormous size were cast. In olden times many superstitions were connected with the ringing of bells. It was believed to be

efficacious in dispelling tempests. By 7 & 8 Geo. IV. c. 75 (June 14, 1827), the court of the Company of Watermen were required to erect and maintain a bell at Billingsgate, and another at Gravesend; the former to be rung at high water, and the latter at first flood. The following are the most celebrated:—

A.D.	
1507. Breslau.	1636. Lucerne.
1680. Bruges.	1847. Montreal.
1448. Cologne.	1653 and 1734. Moscow (great bell).
1453. Dantzic.	1680. Oxford.
1497. Erfurth.	1680. Paris (Notre Dame).
1675. Exeter.	1711. Vienna.
1457. Halberstadt.	1656. Westminster (Big Ben).
1610. Lincoln (Tom).	1845. York.
1834. Lincoln (new bell).	
1716. London (St. Paul's).	

(*See* RINGING OF BELLS.)

BELMONT (Battle).—Gen. Grant defeated the Confederates at this place, in Missouri, Sep. 7, 1861. The Federals lost 84 killed, 288 wounded, and 235 missing; and the Confederates 632 men.

BELOOCHISTAN (Asia).—This country, the ancient Gedrosia, called, according to Rawlinson, Kusan, through the Sassanian period, is now known as Beloochistan, the country of the Beloochees or Belus. Its early history is involved in obscurity. Hajee Mohammed Khan, a kind of lieutenant of Nadir Shah, was assassinated in 1739, by his brother Nusseer Khan, who obtained the chief authority. In 1758 he declared Beloochistan independent, and, after a struggle, succeeded in concluding a treaty with the Affghan monarch. Under his successors Beloochistan lost several of its provinces. Owing to the hostile and treacherous attitude assumed by the government and people towards the English in their advance through the Bolan Pass, Kelat, the chief town of Beloochistan, was captured Nov. 13, 1839, and temporarily occupied. The Beloochees regained possession July 27, 1840; but it was recovered by the English Nov. 3, 1840, and held by them until the conclusion of the Affghan war.

BELPER (Derbyshire), anciently named Beaupoire, or Belle-repaire, was the seat of a residence of Edmund Crouchback, Earl of Lancaster, who died in 1296, and was a favourite resort of the celebrated John of Gaunt, who died Feb. 3, 1399. The plague carried off 51 persons between May 1 and Sep. 30, 1609. Belper was one of the earliest seats of the cotton manufacture; and the mills of the Messrs. Strutt were erected in 1776. In 1795 a flood carried away the bridge over the Derwent, which has since been replaced; and a fire occasioned much injury Jan. 12, 1803. The poor-house was erected in 1803; the church, founded Oct. 31, 1822, was opened Sep. 6, 1824; and the national school and gaol were built in 1849.

BENARES (Hindostan).—The holy city of the Hindoos, the capital of a district of the same name, and the ancient seat of Brahminical learning, is studded with mosques and temples, whilst thousands of pilgrims flock to it annually to wash away their sins in the waters of the Ganges. It came into the possession of the East India Company May 21, 1775. The Sanscrit College was founded in 1792, and an English department was added in 1832. The 37th Regiment of Native Infantry, and the 13th Irregular Cavalry, and Loodianah Sikhs, mutinied here June 4, 1857. Owing to the energy displayed by Gen. Neill, the supremacy of the English was maintained.

BENCOOLEN (Sumatra).—The East India Company, on being expelled from Bantam, formed a settlement, afterwards called Fort Marlborough, at this place in 1683. It was much enlarged in 1695. The natives massacred a large portion of the settlers in 1719. Bencoolen and other English settlements in the island were destroyed by the French in 1760. They were, however, again restored. By the 9th article of the treaty between England and the Netherlands, concluded at London March 17, 1824, they were ceded to the Dutch in exchange for their settlements on the continent of India. The respective settlements were to be given up March 1, 1825.

BENDER (Bessarabia).—Varnitza, the retreat of Charles XII. of Sweden after his defeat of Pultowa (July 8, 1709), is situated near this place. Having refused compliance with the sultan's order to quit the town, he was attacked in Feb., 1713, by an army of 6,000 Turks and 20,000 Tartars, who subdued his guard of 600 Swedes, and carried him captive to Demotika, whence he returned the following year to Sweden. Bender was taken by the Russians Sep. 28, 1770, and was restored to the Turks in 1774. A sanguinary battle was fought at Tobak, near Bender, between the Turks and Russians, in 1789, in which the former were defeated. Bender itself surrendered in the middle of November. It was again captured by the Russians in 1809, and was finally ceded to them by the treaty of Bucharest, May 28, 1812.

BENEDICTINES.—This order of monks was founded by St. Benedict or Bennet, born at Nursia in 480, who introduced monachism into Western Europe, and erected his first monastery on the site of a temple of Apollo on Monte Casino, about 50 miles from Subiaco, in Italy, A.D. 529. The order spread rapidly in Europe; St. Benedict himself founded several monasteries, and his example was followed by others. The monks took the vows of chastity, obedience, and poverty. By some authorities the Benedictines are said to have been introduced into England by Augustine in 596, and by others the event is assigned to a later period, Dunstan (925—988) being considered the first English abbot of that order. Edgar (958—975) is said to have founded above 40 Benedictine convents. Milman, referring to the beautiful spots chosen for their monasteries, says:—"In general, if a district in England be surveyed, the most convenient, most fertile, most peaceful spot will be found to have been the site of a Benedictine abbey." Towards the end of the 8th century they had become so numerous that Charlemagne caused inquiry to be made whether any other kind of monks existed than those of the order of St. Benedict. The austerity of their rule soon became relaxed, and Matthew Paris mentions a reformation that was attempted in 1238. Their merits in collecting, preserving, and multiplying copies of

classical manuscripts must not be forgotten; and the order is every way distinguished for the numerous services rendered to literature. There were several branches of the Benedictines living under the same rule, but observing a different discipline; the chief being the Cluniacs, established in 912, and brought into England in 1077; the Carthusians, founded in 1080, and introduced into England in 1180; and the Cistercians or Bernardines, founded in 1098, and brought into England in 1128. The habit of the Benedictines was black, and from this circumstance they have been called Black Monks, or the Black Monks of St. Benedict. According to an inquiry instituted by Pope John XXI. or XXII. (1316—1334), this order had at that time produced 20 emperors, 10 empresses, 47 kings, 50 queens, 24 popes, 68 princes, 100 princesses, 200 cardinals, 7,000 archbishops, 15,000 bishops, 15,000 abbots, and 4,000 saints, besides a host of other dignitaries, both in church and state. There were nuns as well as monks of this order.

BENEFICE.—An estate held by feudal tenure was originally termed a benefice, which at length came to signify the ecclesiastical estate granted to a clergyman for term of life, to be enjoyed by him on account of his ministry in the Church. Lord Coke says benefice is a large word, and is taken for any ecclesiastical promotion whatever. The custom of endowing churches arose in the time of Justinian, about A.D. 500. Towards the end of the 12th century the bishops of Rome issued mandates, requesting that particular benefices might be conferred upon their nominees. This was speedily assumed as a right, and Clement V. (1305—1314) claimed the disposal of all benefices. This claim was resisted, more particularly in England, and the statute of provisors of benefices (25 Edw. III. st. 6), passed in 1351, was aimed against this system. It was followed by other enactments of a similar character. The temporary submission of former sovereigns to the claim had inundated the country with Italians and other foreign clergy. The statute of provisors was confirmed by 3 Rich. II. c. 3 (1380); and by 7 Rich. II. c. 12 (1383), it was enacted that no alien should be eligible to purchase or to be presented to any ecclesiastical preferment within the realm. The most terrible abuses arose on account of the pretensions of the Pope respecting the presentation to benefices. Milman (Lat. Christ. vol. vi. b. xiii. c. 3), treating on Boniface IX. (1389—1404), says, "The smaller benefices were sold from the day of his appointment with shameless and scandalous notoriety. Men wandered about Lombardy and other parts of Italy, searching out the age of hoary incumbents, and watching their diseases and infirmities. For this service they were well paid by the greedy aspirants at Rome. On their report the tariff rose or fell. Benefices were sold over and over again." A distinction between benefices and cathedral preferments is drawn in 1 & 2 Vict. c. 106, s. 124 (Aug. 14, 1838), and in a later act, 13 & 14 Vict. c. 98, s. 3 (Aug. 14, 1850), the word "a benefice" is explained to signify a benefice with cure of souls and no other.

BENEFIT OF CLERGY.—The exemption of the clergy from secular jurisdiction was one of the privileges claimed by the Roman Catholic Church. Milman remarks (Lat. Christ. vol. iii. b. viii. c. 8), "Crimes of great atrocity, it is said of great frequency, crimes such as robbery and homicide, crimes for which secular persons were hanged by scores and without mercy, were committed almost with impunity, or with punishment altogether inadequate to the offence, by the clergy; and the sacred name of clerk exempted not only bishops, abbots, and priests, but those of the lowest ecclesiastical rank from the civil power." The system, gradually introduced into this country after the Norman conquest, gave rise to many abuses. Not only the clergy, but clerks and all members of the laity who could read, in cases in which capital punishment was awarded, were at length entitled to claim benefit of clergy, so that when the penalty of death was to be rigidly enforced, the statute expressly intimated that it was without benefit of clergy. On the introduction of the custom the claim was not allowed unless the prisoner appeared in his clerical habit and tonsure. When ability to read became the test, this ceremony ceased, and he was merely required to read from a psalter or some other book before the judge. By 4 Henry VII. c. 13 (1489), it could only be pleaded once by persons not in orders, and by 4 Hen. VIII. c. 2 (1512), it was denied to murderers and felons. Abjurers in cases of treason were not allowed benefit of clergy, by 28 Hen. VIII. c. 1 (1536), and the same statute placed persons in holy orders, in respect to many offences, exactly on the same footing as the laity. Women were allowed to plead benefit of clergy by 3 & 4 Will. & Mary, c. 9, s. 6 (1691), and by 4 & 5 Will. & Mary, c. 24, s. 12 (1692), women were only allowed to plead benefit of clergy once. Both these statutes were made perpetual by 6 & 7 Will. III. c. 14, s. 1 (1695). The practice of requiring the prisoner to read from a book was abolished by 5 Anne, c. 6, s. 4 (1706). Benefit of clergy was abolished by 7 & 8 Geo. IV. c. 27, s. 6 (June 21, 1827), and 4 Vict. c. 22 (June 21, 1841), removed all doubts as to the liability of peers to punishment for felony. It was abolished in Ireland by 9 Geo. IV. c. 54, s. 12 (July 15, 1828).

BENEFIT SOCIETIES.—Provident associations among the working classes, formed for the purpose of affording assistance in sickness and distress, existed in Scotland as early as 1634 and 1659, when two societies were established at Boroughstoness. In England they originated among foreign workmen who had settled in the country, and had no claim upon the poor-rates, several associations having been formed by the French Protestants who took refuge in England after the revocation of the edict of Nantes in 1685. They were first brought under government control by Rose's Act, 33 Geo. III. c. 54 (June 21, 1793). Numerous associations partaking of the character of benefit societies are described under their respective titles. (*See* BUILDING SOCIETIES, FORESTERS, Ancient Order of, FREEMASONRY, FRIENDLY SOCIETIES, GUILDS, ODD FELLOWS, &c., &c.)

BENEHARNUM (France), an ancient town,

first mentioned in the Itinerary of Antoninus, which is supposed to have been compiled between B.C. 44 and B.C. 19, was the seat of a bishopric in the 6th century, and gave to the country of which it formed the capital its modern name of Béarn (*q. v.*).

BENEVENTO (Italy).—The ancient Beneventum was made the capital of a duchy by Alboin, King of Lombardy, A.D. 571. In the time of Charlemagne the duchy embraced the modern kingdom of Naples, and Arrechis, its reigning duke, saved it from the French yoke; and though defeated at Amalphi in 786, preserved his dominions by doing homage. It was besieged by the Saracens in 874, and being severely pressed, a fearless citizen dropped from its walls, passed through the enemy, besought aid of the Greek emperor, and was returning with a favourable answer when he was made prisoner. His captors offered him a rich reward to betray his countrymen, but as soon as he was led within hearing he cried in a loud voice,—"Friends and brethren, be bold and patient; maintain the city; your sovereign is informed of your distress, and your deliverers are at hand. I know my doom, and commit my wife and children to your gratitude." He had scarcely uttered the words when he fell transfixed by the spears of the Saracens. It was a bishopric until 969, when it was made the seat of an archbishopric. It was taken by the Normans, and declared in favour of Pope Leo IX. in 1050. Robert Guiscard besieged it in 1078, and Pascal II., expelled from Rome in 1117, sought refuge at Benevento. It was ceded to Rome in 1139, and taken by Frederick II. in 1240. Charles of Anjou, supported by France, defeated Manfred, King of Sicily, who was slain in a great battle near it, Feb. 26, 1266. The city itself was sacked, and a general massacre of both sexes took place. The French seized it in 1798, but it was restored to the Pope in 1815. In 1806 the principality was conferred by Napoleon I. on Talleyrand, with the title of Prince of Benevento. Councils were held here Aug. 1, 1059; in Aug., 1087; March 28, 1091; Aug. 12, 1108; in April, 1117; and March 10, 1119.

BENEVENTUM (Italy).—This important city fell into the hands of the Romans during the third Samnite war, B.C. 298—B.C. 272. Pyrrhus was defeated near it B.C. 275, and it was made a Roman colony B.C. 268. The Carthaginians were defeated in the neighbourhood B.C. 214, and B.C. 212. It suffered frequently from the ravages of war. The arch of Trajan was erected A.D. 114. The city was sacked in 545, during the Gothic invasion. (*See* BENEVENTO.)

BENEVOLENCE, though nominally a free gift, was, in fact, a forced loan. The old Chronicler of Croyland records, amongst other events of 1473, the introduction of a new and unheard of impost, by which every one was to give "just what he pleased, or rather, just what he *did not please*, by way of *benevolence*." Hallam (Middle Ages, iii. ch. 8, pt. 3) gives Edward IV. the credit of having introduced this new method of obtaining the subjects' money, under the plausible name of benevolences, and says "that they came in place of the still more plausible loans of former monarchs, and were principally levied on the wealthy traders." This form of exaction soon became intolerable, and was annulled for ever by 1 Rich. III. c. 2 (1484), though this monarch had recourse to it in order to raise money to carry on the war against the Earl of Richmond in 1485. Henry VII. was the first English king who obtained the sanction of Parliament to a benevolence, and this he effected in 1492. By 11 Hen. VII. c. 10 (1495), proclamation was to be made against defaulters, requiring them to pay the sum due within three months, and in default they were to be imprisoned, without bail, until payment was made or sufficient sureties obtained. In case of death the goods and chattels of a defaulter became chargeable. Wolsey exacted several benevolences between 1522 and 1525. In the latter year an extraordinary demand caused much discontent, and the citizens of London, who appealed to the statute against benevolences, passed in Richard the Third's reign, were told that he was a usurper, and consequently that his laws were not binding on the king. In 1545 Henry VIII. exacted another benevolence, which was very unwillingly paid. Elizabeth wisely abstained from the practice, but James I. raised one in 1614. This method of obtaining supplies was declared illegal by the Petition of Right in 1689; and 1 Will. & Mary st. 2, c. 2. (1689), declared the levying of money without the authority of Parliament illegal.

BENGAL (Hindostan).—This province was conquered by the Mohammedans in 1203, and became independent in 1340.

A.D.
1517. Some Portuguese are cast upon the coast of Bengal; their ships enter the Ganges.
1536. Nine Portuguese ships are sent to assist Mahmoud Shah.
1580. Bengal is made a dependency of Delhi.
1620. An attempt made to establish a factory at Patna fails.
1634. The English obtain permission to trade to Piplee, in Orissa, where a factory is built.
1640. An English factory is established on the Hooghley.
1652. The English obtain great influence in Bengal.
1658. Bengal is placed under Madras.
1664. The French and Danes form establishments in Bengal.
1681. Bengal is made an agency distinct from Fort St. George, Madras.
1686, Dec. 20. The council remove from the Hooghley to Calcutta (*q. v.*).
1687, Sep. The Hooghley factory is resumed.
1688, Dec. The factories in Bengal are abandoned.
1690. The Company's agents return to Chuttanuttee, and are allowed to erect a factory.
1700. Chuttanuttee, Govindpore, and Calcutta are granted to the Company.
1707. The garrison is increased to 300 men.
1726. A mayor's court is established in Bengal.
1765, Aug. 12. By the treaty of Allahabad, the Company are empowered to receive the revenues of Bengal, Bahar, and Orissa.
1772. The Company assume direct authority.
1773, July 1. Bengal is made the chief presidency in India.
1774, Aug. 1. The new arrangements commence in Bengal.
1793. The permanent settlement is introduced by Lord Cornwallis.

GOVERNORS OF BENGAL.

1749. Alexander Dawson.
1752. William Fytche. He died Aug. 8, and was succeeded by Roger Drake.
1757. Watts, Manningham, Becker, and Holwell govern alternately, each for four months.

A.D.
1758. Robert, afterwards Lord Clive.
1760. John Zephaniah Holwell, retired July 27, when Mr. Henry Vansittart succeeded.
1764. John Spencer.
1765. Lord Clive again.
1767. Harry Verelst.
1769. John Cartier.
1772, April 13. Warren Hastings is appointed to succeed him. (*See* INDIA.)

BENIN (W. Africa). — This country, discovered by the Portuguese about the year 1485, was first visited by English traders in 1553. In 1588 a company was established by Elizabeth for opening trade with this country, and a ship and pinnace accomplished a voyage for the purpose. The French settlements, formed in 1786, were destroyed by the British in 1792. The traveller Belzoni died in Benin Dec. 8, 1823. In 1840 the Benin River was explored by Capt. Becroft, who ascended both its branches in a steamer, and an agreement for the navigation of the river was concluded April 4, 1851. Owing to the prevalence of slave piracy the coast of this region was blockaded by an English squadron from Dec. 6, 1851, till Feb. 11, 1852.

BENNINGTON (Battle).—A party of Hessians were defeated at this place in Vermont, by the Americans, July 16, 1777.

BENSINGTON (Battle).—Offa, Ethelbald's successor in the kingdom of Mercia, having subdued Kent, reduced the more powerful kingdom of Wessex by the defeat of Cynewulph, at Bensington, in Oxfordshire, A.D. 777. This victory rendered him master of all the territory north of the Thames.

BENTONVILLE (Battle). — Gen. Sherman defeated the Confederates in a series of battles fought near this town in North Carolina, March 18—21, 1865. The Confederates lost 1,892, and the Federals 1,646 men.

BENZINE, originally obtained from coal gas by Professor Faraday in 1825, has since been employed by M. Beschamps, Dr. Hofmann, and others, in the production of aniline (*q. v.*).

BERAN-BIRIG (Battle). — Fought between the Britons and Saxons at this place, supposed to be Barbury Hill, near Marlborough, Wilts, though some authorities are in favour of Banbury, Oxfordshire, in 556. Henry of Huntingdon says that the Britons formed their battle array in nine battalions, three being posted in the van, three in the centre, and three in the rear, the archers, slingers, and cavalry being arranged in the Roman order. The Saxons came on in a compact body, and charged with such fury that the standards were dashed together, and a hand-to-hand fight ensued. The battle lasted till nightfall, without any decisive result.

BERBICE (S. America) was discovered by the Spanish navigator Pinzon in 1499, and the Dutch formed a settlement in 1580. The English settled in the neighbourhood in 1634, but withdrew in 1667. The French attacked the colony in 1690 and in 1712, on each occasion levying a contribution. An insurrection of the negroes occurred in Feb., 1762, when they destroyed a large amount of property. Berbice surrendered to an English expedition May 2, 1796; but it was restored to the Dutch by the third article of the treaty of Amiens, March 25, 1802. It was again taken Sep. 23, 1803; and retained by an agreement concluded at London, between England and the Netherlands, Aug. 13, 1814. With Demerara and Essequibo it was formed into one colony in 1831, under the name of British Guiana (*q. v.*).

BEREANS.—A sect of dissenters from the Church of Scotland, founded in 1773 by the Rev. J. Barclay, who died in 1798. They believe that the Bible is the sole source of information respecting the existence and attributes of the Deity, that the Psalms relate exclusively to Christ, and that unbelief is the unpardonable sin. Their title was adopted in imitation of the ancient Bereans, who "received the word with all readiness of mind, and searched the Scriptures daily" (Acts xvii. 11). They are also known as Barclayans.

BERENGARIANS.—The followers of Berengarius, Archdeacon of Angers, who, about 1047, denied the real presence in the Eucharist. He was excommunicated by a council at Rome, May 2, 1050. The cause was tried again in a council held at Tours in 1055, when Berengarius is said to have recanted, and to have been reconciled to the Church. At a later period he persisted in maintaining the views he had previously advocated, and is said to have been again summoned before a council at Rome in 1059, and to have once more recanted. He again wrote in defence of his former opinions, and was condemned at councils held at Angers, April 4, 1062; at Rome, in 1063; at Poitiers, in 1073; at Rome, in Nov., 1078, and Feb., 1079, when he is said to have made a confession of faith; and at Bordeaux, in 1080, when he made another exposition of his faith. It is probable that some of the above-mentioned councils did not deal with Berengarius, who died in communion with the Church, Jan. 6, 1088.

BERESINA (Battle).—The French, during their retreat from Russia, were defeated at this river with great slaughter, Nov. 26, 27, and 28, 1812. Such scenes of carnage and destruction as those of the night of the 28th and the following days have seldom been witnessed. The camp-followers,—men, women, and children,—terrified by the Russian artillery, pressed forward to the bridges, one of which broke down, and thousands were precipitated into the stream. On the return of spring above 12,000 bodies were taken out of the bed of the river, near the place where the struggle occurred.

BERG (Germany) was ruled by counts for many years, and on the failure of the first line in 1348, devolved on the princes of Juliers. It was raised to a duchy in 1380. Juliers was incorporated with it in 1423, and they came into the possession of the dukes of Cleves on the failure of the Juliers line in 1511. The Cleves line became extinct in 1609, and after a long contention, the elector palatine and the Elector of Brandenburg, in 1666, agreed to divide the possessions, the former taking Berg. It was merged in Bavaria, the elector of which ceded it to France in 1806; and Napoleon I.

raised it into a grand-duchy, and conferred it with other territory upon Murat, March 15 in that year. Murat went to Naples in 1808. This grand-duchy was extinguished in 1815, and the territories were transferred to Prussia.

BERGAMO (Italy), the ancient Bergomum, was ravaged by Attila A.D. 452. A council was held here July 5, 1311. Under the Lombard monarchs it was made the capital of a duchy. It was annexed to Venice in 1428, and was taken by the French in 1509. The Venetians having succeeded in re-occupying it, the French again obtained possession in 1512; but it once more fell into the power of the Venetians in 1515. Bergamo revolted March 12, 1797; was incorporated with the Cis-alpine republic by the treaty of Campo Formio, Oct. 18, 1797; was given to Austria in 1814—15, and ceded by that power to Sardinia in 1859. It was a bishop's see in the early Church. It had two cathedrals, the oldest destroyed by the Venetians in 1561. The other was founded in 896.

BERGEN (Battles).—The first battle of the name was fought at Bergen, near Frankfort-on-the-Maine, in Germany, between the allied English and Germans under Prince Ferdinand of Brunswick, and the French under the Duke of Broglio and Contades, April 13, 1759. The former retired from the contest, but were not pursued by the French.—The second was fought between Bergen and Alkmaar (*q. v.*), in the north of Holland, Sep. 19, 1799. The Duke of York, commanding the Russian and British troops, attacked the French and Dutch under Gen. Brune. The Russians fled in disorder, but the English obtained some advantages. Both armies, however, at night resumed the positions they had occupied before the battle.—In the third battle, fought at the same place Oct. 2, 1799, the Duke of York, with 30,000 English and Russians, engaged and defeated Gen. Brune, at the head of 25,000 French and Dutch troops.

BERGEN (Norway) was founded in 1070, and during the 12th and 13th centuries was the residence of the kings of Norway. The merchants of the Hanse towns obtained great privileges in the way of trade in 1278, and these were confirmed and extended in 1343. From this time they obtained an ascendancy, which was destroyed by a law passed by Frederick II. of Denmark, July 25, 1560. It has several times suffered from the ravages of pestilence and fire. The former committed great ravages in 1348, 1353, 1618, 1629, and 1637; and a fire that broke out May 19, 1702, destroyed the larger portion of the town.

BERGEN-OP-ZOOM (Holland).—This strong fortress was unsuccessfully assailed by the Duke of Parma in 1581 and in 1588, and by Spinola in 1622. The French captured it Sep. 17, 1747; and it was restored to the Dutch by the treaty of Aix-la-Chapelle Oct. 18, 1748. It again fell into the hands of the French in 1795. Sir T. Graham carried it by storm March 8, 1814, but some of the troops, having broken into the wine-shops, were overcome by wine, and the garrison, taking fresh courage, expelled the assailants. It was surrendered by the treaty of Paris in 1814.

BERGERAC (France).—The Earl of Derby (John of Gaunt) defeated the French at this place in Guienne in 1344. So great was the booty on the occasion that the Earl of Derby is said to have obtained a pipe of gold. The French recovered Bergerac in 1371; but the English recaptured it, and were not finally expelled until 1450. It became one of the strongholds of the Huguenots. Louis XIII. captured it in 1621, and demolished its fortifications.

BERGERAC (Treaty).—Concluded at Bergerac between the Huguenots and the Roman Catholics Sep. 17, 1577. Protestants were allowed to practise their religion in those places in which it was tolerated, on the day the treaty was signed, though its exercise was entirely prohibited in Paris, or within 10 leagues of the city. The nobility were free to follow the Protestant worship in their own houses. These and other points were settled by the treaty, which in the end satisfied neither party. It is also called the treaty of Poitiers.

BERKHAMPSTEAD (Herts).—A council was held here A.D. 697, convened by Wihtred, King of Kent. Several constitutions were passed, and amongst them one ordering the suspension of any priest who deferred the baptizing of children beyond the proper time.

BERLIN (Prussia).—This city is said to have been founded by Albert the Bear, Margrave of Brandenburg. The Elector Frederick William improved and embellished it, 1640—1688; and Frederick III., who erected Prussia into a kingdom in 1701, and became its first king under the title of Frederick I., greatly extended its area. The French and Austrians surprised Berlin Oct. 17, 1757. The Austrians and Russians captured it Oct. 9, 1760, and having committed various depredations, retired Oct. 13. Napoleon I. entered Berlin Oct. 21, 1806. An insurrection broke out during the revolutionary troubles on the Continent, June 15, 1848. A state of siege, proclaimed Nov. 12, was declared illegal by the Legislative Chamber April 25, 1849. The equestrian statue of Frederick the Great was inaugurated May 31, 1851. The Academy of Sciences was founded in 1702; the bank in 1765; and the university in 1810.

BERLIN (Treaties).—Several treaties have been concluded at this city, the principal being the peace between Prussia, Poland, and Hungary, by which the former obtained Silesia, July 28, 1742; the treaty of union and confederation for maintaining the indivisibility of the German empire, caused by the attempt of Austria to exchange her possessions in the Netherlands for the duchy of Bavaria, which was signed at Berlin July 23, 1785, by the King of Prussia, the King of England, as Elector of Brunswick-Lunenburg, the Elector of Saxony, and other German princes; and the treaty between Prussia and France, guaranteeing the neutrality of the north of Germany, Aug. 5, 1796.

BERLIN DECREE.—Prussia and a great part of the Continent being under his domination, Napoleon I. issued this celebrated interdict against English commerce at Berlin,

Nov. 19, 1806. It prohibited all commerce, and even correspondence between countries under his sway and Great Britain. England was declared to be blockaded; English property was liable to seizure; all subjects of England found in countries occupied by French troops were declared prisoners of war; all letters addressed to Englishmen or written in the English language were to be stopped; and ships touching at any port in England or her colonies were excluded from the ports under French control. (*See* ORDERS IN COUNCIL.)

BERMUDAS, OR SUMMERS' ISLANDS (Atlantic), were discovered by Juan Bermudez, a Spaniard, wrecked upon them in 1522, during a voyage from Spain to Cuba with a cargo of hogs. Henry May was wrecked upon them in 1593; and Sir George Summers in 1609, who claimed them for the Virginia Company. They sold them to another company, to which a charter was granted by James I., June 29, 1615. A settlement was immediately formed, and George-town founded. Their first general assembly was held Aug. 1, 1620. The group consists of between 300 and 400 islands, but of these only six or seven are inhabited. The charter expired in 1684. These islands, with Newfoundland, were separated from the diocese of Nova Scotia and erected into a distinct bishopric in 1839.

BERNARD, GREAT ST.—(*See* ALPS.)

BERNARDINES.—The Cistercians, a branch of the Benedictines, instituted at Citeaux in 1098, were reformed by Bernard, Abbot of Clairvaux, in Champagne, at the commencement of the 12th century; from which circumstance they received the name of Bernardines. The second crusade, in 1146, was preached by Bernard, who was one of the most influential men of his time. He resolutely refused all ecclesiastical dignities, and is said to have founded 160 religious houses. The Bernardines came into England in 1128. Their first house, at Waverley, in Surrey, was founded in that year, and completed in 1129. At one time the number of their establishments was about 90. From the colour of their habit, they were called White Monks. There were nuns of this order. (*See* CISTERCIANS.)

BERNE (Switzerland) joined the Swiss confederation, being the eighth canton, in 1352. Its chief town, of the same name, was founded by Berthold V., Duke of Zæringen, in 1191; and was made a free and imperial city by a charter from Frederick II., dated May, 1218. It was besieged, though unsuccessfully, by Rodolph of Habsburg in 1288. It long exercised considerable authority, and obtained several accessions of territory. It was destroyed by fire in 1405. Berne received a new constitution in 1846, and was made the capital of Switzerland by the National Assembly of 1848. Its university was founded in 1834.

BERNWALD.—(*See* BARWALDE.)

BERŒA.—(*See* ALEPPO.)

BERSAGLIERI.—These riflemen, or sharpshooters, introduced into the Sardinian army by Gen. Della Marmora about the year 1849, took part in the Russian war (*q. v.*), and assisted at the battle of the Tchernaya (*q. v.*), Aug. 16, 1855. They were also employed in the Italian war of 1859.

BERSINIKIA (Battle).—Crumn, King of Bulgaria, defeated the Emperor Michael I. at this place, in Thrace, A.D. 813.

BERWICK-ON-TWEED.—This ancient town, between England and Scotland, suffered greatly in the wars between those countries. When first mentioned in history, it belonged to Scotland, and its castle was ceded to England in 1174, and restored to Scotland in 1189. Baliol did homage for himself and his heirs for the whole kingdom of Scotland at Berwick, Nov. 30, 1292. Edward I. captured Berwick, March 30, 1296, united it to England, and granted it a charter, afterwards extended and confirmed by Edward III. Bruce took it in 1315, and again April 2, 1319; and Edward III. recovered it July 20, 1333. The Scots surprised it Nov. 6, 1355, but Edward III. retook it in 1356. Henry VI. surrendered Berwick to the Scotch, April 25, 1461; it was, however, retaken by Edward IV. in 1482, who conferred many privileges upon it by 22 Edw. IV. c. 8 (1482). It was made independent of both countries in 1556. Cromwell captured it in 1648, and Monk in 1659; and it has since remained in the possession of England. The statute 20 Geo. II. c. 42, s. 3 (1746), provided that where England only is mentioned in any act of Parliament, the same, notwithstanding, shall be deemed to comprehend the dominion of Wales and the town of Berwick-upon-Tweed. A treaty was concluded here in 1560; and another, between Elizabeth and James VI., of Scotland, July 1, 1586, providing for mutual assistance in case of invasion by Roman Catholic powers.

BERYL.—This precious stone, called also aquamarine, was the first in the fourth row on the breast of the Jewish high priests (Ex. xxviii. 20, xxxix. 13), B.C. 1491. Beads of this gem have been found in Egyptian mummy-pits, and it was employed by the Greeks for intaglios more than 2,000 years ago. It was also known to the Romans, and was supposed by Pliny to be a species of emerald, a supposition proved by modern discovery to be correct. An opaque specimen of this gem from North America, of the enormous weight of 78 lb., was exhibited in the Great Exhibition of 1851.

BERYTUS (Syria).—This city, supposed to be the Berothai whence "King David took exceeding much brass" (2 Sam. viii. 8), B.C. 1040, was destroyed by Tryphon B.C. 140. Agrippa founded a colony here, B.C. 15, which was afterwards called Julia Augusta Felix Berytus, and received the rights of an Italian city. (*See* BEYROUT.)

BESANÇON (France).—This ancient city, called Vesontio by the Romans, was occupied by Julius Cæsar B.C. 56. The Burgundians sacked it A.D. 456, and the Hungarians in 937. The Emperor Frederick I. held a diet of more than usual magnificence at Besançon, Oct. 24, 1157. It was an imperial city from 1184 till about 1648, when it was joined to Spain. It was captured by Louis XIV. in 1668, and was annexed to France in 1674. The allied army

failed in an attack upon it in 1814. It was made a bishopric in the 3rd century.

BESIKA BAY (Archipelago). — The Czar Nicholas having, May 31, 1853, issued an order for the passage of the Pruth by his troops, the French and English fleets sailed for this bay, at the entrance of the Dardanelles, June 2, 1853, and anchored here June 13.

BESSARABIA.—This province, taken by the Turks under Mohammed II. in 1474, was seized by the Russians in the autumn of 1770, and finally ceded to Russia by the treaty of Bucharest, May 28, 1812.

BESSEMER'S PROCESS.—(*See* IRON.)

BETHAR (Palestine).—This city was the last retreat of the Jews on their expulsion from Jerusalem by Hadrian, A.D. 130. After holding out for nearly three years, it was carried by storm in 133, when the Jewish leader Barcochebas died in the field, and the rabbi Akiba, who had been active in the defence, was torn to death with hot pinchers. The site of Bethar, now called Beitir, was identified in 1843.

BETH-HORON (Battle).—At this village, in Palestine, Joshua gained a memorable victory over the five kings of the Amorites, B.C. 1450. These kings, viz., Adoni-zedec, of Jerusalem; Hoham, of Hebron; Piram, of Jarmuth; Japhia, of Lachish; and Debir, of Eglon, having coalesced against the Gibeonites (Josh. x. 3—5), that people sent to entreat aid of the Jewish leader, then in camp at Gilgal (v. 6). Joshua, being divinely commanded to accede to this request, fell upon the foe suddenly at Gibeon, and chased them to Beth-horon, to Azekah, and to Makkedah, the retreating Amorites being further harassed by stones hurled upon them from heaven (Josh. x. 8—11). It was on this occasion that the sun stood still upon Gibeon and the moon in the valley of Ajalon, according to the command of Joshua Josh. x. 12, 13).

BETHLEHEM.—This town of Syria, called also Beit-laham, *i. e.* House of Bread, about six miles south of Jerusalem, is celebrated as the birthplace of the Saviour of mankind (Matt. ii. 8, and Luke ii. 4). It was called Ephrath, and is mentioned as the place at which Rachel died and was buried (Gen. xxxv. 17—19, and xlviii. 7), B.C. 1729. Rehoboam fortified or rebuilt it (2 Chron. xi. 5, 6), B.C. 973. David was born here (circ. B.C. 1085), and hence it was called the city of David. Helena, the mother of Constantine I., erected a church, A.D. 325, on the place of the Nativity. The church, destroyed by the Saracens in 1236, was restored by the Crusaders. It was ceded, with other towns, to Frederick II. by the Sultan of Egypt, in 1229. It was called Bethlehem-Judah, to distinguish it from Bethlehem in Zebulon (Josh. xix. 15, 16). Bethlehem was made a bishopric in 1110.

BETHLEHEM (Order).—(*See* OUR LADY OF BETHLEHEM.)

BETHLEHEM (United States), in Pennsylvania, was settled by the Moravians under Count Zinzendorf in 1741.

BETHLEHEM HOSPITAL (London), commonly called Bedlam, a priory for canons, both brothers and sisters, founded by a deed of gift dated Wednesday, Oct. 23, 1247, from Simon FitzMary, sheriff of London, was with all its revenues granted by Henry VIII., in 1547, to the city of London, for an hospital for lunatics. It was transferred from Bishopsgate Without to Moorfields in 1675. The foundation of the new building was laid in April, 1676, and it was finished in July, 1676. The hospital was transferred to its present site in St. George's Fields in 1814. The foundation-stone was laid April 18, 1812; and the erection of a new wing was commenced July 26, 1838. Patients partially cured, and suffered to go at large, were called Bedlam beggars. Alterations were made in the building in 1856.

BETHLEHEMITES. — These monks were also styled Star-bearers, because they wore a red star of five rays, with a blue circle in the middle, on their breast, in memory of the star which appeared to the wise men. Matthew Paris states that they obtained an establishment at Cambridge in 1257, and adds,—"So many orders of brethren now made their appearance in England that there was a most extraordinary confusion among them." A religious order bearing this name was founded at Guatemala, in New Spain, by Pierre de Bethencourt, about 1660. They attended the sick in hospitals. Innocent XI. confirmed the order in 1687, and ordered the brethren to follow the rule of St. Augustine.

BÉTHUNE (France).—This town, which was governed by independent potentates in the 11th century, and has usually shared the changes of Artois, was the scene in 1487 of a victory of the French over the Archduke Maximilian. Taken from the Spaniards by Gaston of Orleans in 1645, it was recaptured by Prince Eugène in 1710, and was finally annexed to France by the treaty of Utrecht (*q. v.*), April 11, 1713.

BETTING-HOUSES.—A considerable number of these places, the owners of which offered to bet upon the principal races with all comers, sprang up in London between the years 1850 and 1853. Servants, apprentices, and workmen frequently robbed their employers to invest money in this new form of gambling, and these places were suppressed by 16 & 17 Vict. c. 119 (Aug. 20, 1853).

BEVERWYK (Battle).—In this position, near Alkmaar, in the Netherlands, Gen. Brune's outposts were attacked by the English and Russian forces Oct. 6, 1799. The French and Dutch were at length compelled to give way, though their antagonists did not succeed in capturing the position.

BEYLAU (Battle).—Ibrahim Pasha, at the head of the Egyptian army, defeated the Turks at this place, in Asia Minor, July 29, 1832. The battle was fought near the spot where Alexander III. (the Great) defeated Darius in the battle on the Issus.

BEYROUT (Syria), the ancient Berytus (*q.v.*), was the seat of a famous school of jurisprudence from the 3rd to the middle of the 6th century. The city having been destroyed by an earthquake July 9, 551 A.D., the school was removed to Sidon. Beyrout suffered severely during the Crusades, and having been taken by the Saracens, was wrested from them

by Baldwin I. in 1110. Beyrout was made a bishopric by Theodosius the Younger, and after its capture by Baldwin I. it became the seat of a Latin bishop about 1136. The Saracens, however, regained possession in 1187. Ibrahim Pasha seized it in 1832; and it was bombarded by the combined fleets of England and Turkey, Sep. 11—16, 1840, and being captured was restored to the Porte. Beyrout and its neighbourhood was the theatre of the massacre of the Maronites (*q. v.*) by the Druses (*q. v.*), in 1860.

BEZABDE (Mesopotamia) was captured by Sapor II. A.D. 360, when all the inhabitants, even women and children, were massacred. Constantius II. made a vain effort to wrest it from the Persians during the same year. It was the seat of a bishopric before the Persians seized it.

BEZIERS (France). — This ancient city, made a Roman colony A.D. 52, was besieged during the crusade against the Albigenses, and captured July 22, 1209. "A general massacre," says Milman (Lat. Christ. vol. iv. b. ix. ch. 8), "followed; neither age nor sex were spared; even priests fell in the remorseless carnage. Then was uttered the frightful command, become almost a proverb, 'Slay them all, God will know his own.' In the church of St. Mary Magdalene were killed 7,000 by the defenders of the sanctity of the Church. The amount of the slain is variously estimated from 20,000 even up to 50,000. The city was set on fire, even the cathedral perished in the flames." It was rebuilt in 1289, and suffered severely in the religious wars in France. Tradition assigns the introduction of Christianity to St. Paul. Its bishopric, founded at an early period, was suppressed in 1801.

BHOTAN (Hindostan).—The inhabitants of this hill country invaded Cooch Behar, a dependency of Bengal, in 1722, and were expelled by the British, with whom they concluded a treaty of peace, April 25, 1774. Lower Assam having been acquired in 1828, constant difficulties commenced with the Bhotanese in reference to the tribute to be paid by them for the Dooars, or plains at the foot of the hills that divided the two provinces, and in 1837 Capt. Pemberton was despatched as an envoy, to arrange matters. The mission proving unsuccessful, the government determined, in 1841, to annex the Dooars, paying to Bhotan an annual compensation, and in 1842, at the request of the Bhotanese, the estate of Ambaree Fallacottah was also taken under British control. In consequence of continued outrages upon the Bhotan frontier, it was resolved in 1860 to withhold the rental of Ambaree Fallacottah until the Bhotan Government should surrender the guilty parties. Other disputes having arisen in reference to Sikim (*q. v.*) and Cooch Behar, Mr. Eden was despatched on a pacific mission, which left Darjeeling Jan. 4, 1864, arriving, after much delay, at Paro, Feb. 22. Resuming his journey March 10, he reached Poonakha March 15, and was insulted by the Tongso Penlow and council, who compelled him, March 29, to sign a treaty assigning to Bhotan the Assam Dooars. The governor-general accordingly proclaimed his intention to annex permanently the Bengal Dooars, and part of the hill territory, Nov. 12, 1864, and despatched an army, which occupied Gopalgunge, Nov. 28; seized Buxa, Dec. 7; captured Dewangiri, Dec. 10; and took possession of Chamoorchee, Dec. 31. The British garrison in Dewangiri was attacked by the natives Jan. 30, 1865, and though at first victorious, was compelled by want of water to evacuate the place Feb. 5. Other disasters following, additional forces were sent, and Balla was captured March 15. Buxa was again occupied March 23, and Chamoorchee March 24; Dewangiri was taken by storm April 2, and the defences having been destroyed, was abandoned April 6. This success terminated the war, which was formally ended by a peace concluded Nov. 11, 1865.

BHURTPORE (Hindostan).—The capital of a native state of the same name. Gen., afterwards Lord Lake, concluded a treaty of perpetual friendship with the rajah Sep. 29, 1803. The rajah, however, espoused the cause of Holkar in 1804, and his chief town, Bhurtpore, was besieged Jan. 3, 1805, by Gen. Lake. The English general failed in several attempts to carry the place by storm; but the rajah surrendered April 10, and a second treaty was concluded April 17, by which, on the payment of a heavy fine, the rajah was allowed to retain his authority. A rebellion broke out Feb. 25, 1825. Lord Combermere captured Bhurtpore Jan. 18, 1826, and the rightful heir was restored Feb. 4.

BIAGROSSA (Treaty).—Concluded between Louis XII. and the Cardinal of Pavia, on behalf of Pope Julius II, in July, 1509.

BIALYSTOCK (Poland).—This province was incorporated with Russia by the third treaty of partition in 1795. A portion of it was transferred to the duchy of Warsaw by the treaty of Tilsit, July 7, 1807, whilst the remainder was erected into a separate province.

BIANCHI.—Men and women, called White Penitents or Brethren, from a white linen vestment that they wore, appeared all over Italy in August, 1399. In their progress from province to province, and city to city, they kept their faces covered and bent downward, carrying before them a large crucifix, and shouting "Misericordia." They sang continually "Stabat mater dolorosa." They were not confined to Italy, where, according to some authors, they effected a remarkable reformation of manners. In 1400 Boniface IX. had their leader seized at Viterbo. He was sent to Rome, and burned there by his orders; and he prohibited these processions.

BIANCHI AND NERI, or WHITES AND BLACKS, appeared amongst the numerous factions into which the inhabitants of various Italian towns were divided early in the 14th century. They are said to have originated in the following manner. Two branches of a rich and powerful family in Pistoja, called the Cancellieri, were descended from the two wives of their common ancestor. The descendants of one of them, named Bianca, called themselves *Bianchi*, whilst the descendants of the other wife were termed *Neri*. A quarrel having ensued at a convivial meeting, one of the

Bianchi wounded a member of the Neri branch. The latter, in revenge, waylaid and maltreated another of the Bianchi. The father of the last-mentioned aggressor compelled him to wait upon, and ask pardon of, Guglielmo Cancelliere, the father of the wounded man. Guglielmo could not, however, be appeased; he chopped off the hand of the penitent, bidding him return to his parent and tell him that wounds were to be healed by wounds, not words. The feud between the families gathered strength from this savage act; the citizens joined in the struggle, and factions, bearing these names, spread to other towns in Tuscany. At Florence two noble families, the Cerchi and the Donati, took up the quarrel in 1300, the former siding with the whites and the latter with the blacks. In 1302 Dante Alighieri, with several of the Bianchi, were expelled from Florence, and in his exile the poet wrote the great work that has immortalized his name. Hallam (Middle Ages, vol. i. ch. 3. pt. 1) remarks, "An outrage committed at Pistoja in 1300 split the inhabitants into the parties of Bianchi and Neri; and these, spreading to Florence, created one of the most virulent divisions which annoyed that republic."

BIARRITZ (France).—This watering place was a favourite resort of Eugénie de Montijo before her marriage with Napoleon III., Jan. 29, 1853. The English church was erected in 1860.

BIBERACH (Battle).—During the French revolutionary war, the republicans, led by Moreau, defeated the imperialists at Biberach, in Würtemberg, with considerable loss, Oct. 2, 1796. This is often mistaken for another combat at Biberach, in which Moreau defeated Marshal Kray, the Austrian general, May 9, 1800.

BIBLE, or THE BOOK.—A term derived from the Greek, applied to the sacred writings by St. Chrysostom in the 5th century. The name Old Testament first occurs in St. Paul's second epistle to the Corinthians (iii. 14), written in A.D. 55. The canon is generally believed to have been closed by Simon the Just, about B.C. 292. The Apocrypha (*q. v.*) was added B.C. 150. The Old Testament canon consists of 39 books, divided into 929 chapters, containing 592,439 words. Of this portion of the Bible, the oldest edition is the Septuagint, translated into the Greek, according to the tradition of Aristeas, B.C. 277, by 72 Jews. The work was undertaken at the desire of Ptolemy Philadelphus. The books of the New Testament, written in Hellenistic Greek, were first collected about the middle of the 3rd century. Peter (2nd epistle, iii. 16), in 65, speaks of St. Paul's epistles as though they had been collected in his time. Doubtless the separation of the genuine from the spurious had already commenced when St. Peter wrote. The New Testament is divided into 27 books, containing 260 chapters. The sacred writings were translated by the early Christians into various languages. Eusebius says, "They were translated into all languages, both of Greeks and barbarians, throughout the world, and studied by all nations as the oracles of God." Many of the fathers bear similar testimony. Origen published a Bible, called Hexapla, in six columns, with different versions, and, on adding two, called it the Octapla. The division of the Bible into chapters has been erroneously attributed to Stephen Langton, Archbishop of Canterbury, in 1206. The Psalms were always divided as at present, and Hugo de Sancto Caro, a Dominican friar, and afterwards a cardinal, who compiled the first concordance to the Bible, divided the matter into sections, and the sections into subdivisions, and these sections are the chapters. He flourished about 1240, and died in 1262. Rabbi Isaac Nathan in 1445 introduced regular verses. These alterations have since been much improved. In the Latin translation of the Bible, by Paginus of Lucca, published at Lyons in 1528, Arabic numerals are placed in the margin, opposite the verses.

EARLY TRANSLATIONS.

B.C.
277 (circ.). The Septuagint. The Old Testament is translated into Greek.
100. Old Syriac version.

A.D.
128. Aquila, a Jewish proselyte, translates the Old Testament into Greek.
176. Theodotion translates the Old Testament.
205. Symmachus, by order of Septimius Severus, translates the Old Testament into Greek.
200–300. Coptic translation.
300–400. Ethiopic version.
360. Gothic version, by Uphilas.
405. Jerome completes the Latin vulgate, commenced about 385.
410–413. Armenian version.
709. Saxon translation of the Psalms.
721. Saxon translation of the Gospels.
725. Bede's Saxon translation of the whole Bible is completed.
864. Slavonian translation.
1160. French translation of the whole Bible, by Peter de Vaux.
1290. English translation.
1380. Wyckliffe's English version.

EDITIONS OF ENGLISH BIBLES.

A.D.
1526. Tyndale's New Testament. Antwerp.
1530. Tyndale's Pentateuch. Malborow, Land of Hesse.
1531. Joye's Isaye (Isaiah). Strasburg.
1535. Bartholetus, first Latin Bible printed in England. Quarto. London. Tyndale and Coverdale's folio Bible. Printed abroad.
1537. Matthew's Bible. Folio. Abroad.
1537. An edition of Coverdale's Bible. Quarto. Southwark.
1539. The Great (or Cromwell's) Bible. London. (The first Bible printed by authority in England.)
1539. Taverner's Bible. Folio. London.
1540. Cranmer's edition of the Great Bible. Folio. London.
1560. Genevan Bible. Quarto. Geneva.
1568. Parker's, or the Bishops' Bible. Folio. London.
1571. The Gospels, in Saxon and English. The Saxon from the Vulgate, and the English (from the Bishops' Bible. London.
1576. Genevan Bible. Folio. Edinburgh. (The first Bible printed in Scotland.)
1609. First Romanist Bible in England. Quarto. Douai.
1611. The Royal Bible, or King James's Bible. Folio. London.
1632. The "Wicked Bible." Octavo. London.
1633. First Scotch edition of Authorized Bible. Octavo. Edinburgh.
1657. Walton's Polyglot Bible. Folio. London.
1717. Vinegar Bible. Folio. Oxford.
1850. Wycliffe's Bible. Quarto. Oxford.

(For list of books in the Bible *see* CANON OF SCRIPTURE.)

BIBLE SOCIETIES.—The following are the principal associations formed for the dissemination of the Scriptures, with the date of institution:—

A.D.
1649. New England, re-incorporated in 1661.
1662. Society for the Propagation of the Gospel in Wales.
1698. Society for Promoting Christian Knowledge (*q. v.*).
1701. Society for the Propagation of the Gospel in Foreign Parts.
1709. Society for Promoting Christian Knowledge in Scotland.
1712. Society at Halle.
1750. Society for Promoting Christian Knowledge among the Poor.
1780. Naval and Military Bible Society.
1785. Society for the Support and Encouragement of Sunday Schools.
1792. French Bible Society.
1803. Society for Promoting a more Extensive Circulation of the Scriptures, both at Home and Abroad.
1804. British and Foreign Bible Society, being the society of 1803 remodelled. German Bible Society. New York Society.
1805. Berlin Society, changed to Prussian Bible Society in 1814.
1808. Philadelphia Bible Society.
1813. Russian Bible Society. Suspended in 1826.
1817. American Bible Society.
1831. Trinitarian Bible Society.

Some of these societies have a large number of branch establishments. Pius VII. issued a bull at Rome, June 29, 1816, against bible societies, denouncing the movement as a crafty device, by which the very foundations of religion are undermined.

BIBLIOGRAPHY.—Conrad Gesner published at Zurich, in 1545, his "Bibliotheca Universalis," a catalogue of all the Hebrew, Greek, and Latin books of which he could obtain information, arranged according to the names of their authors. This appears to have been the earliest book on bibliography, though the term, which originally signified an acquaintance with ancient writings, was first introduced in its modern sense by De Bure, whose "Bibliographie Instructive" appeared in 1763. Brunet's "Manuel du Libraire," of which many editions have been issued, was originally published in 1810, and Watt's "Bibliotheca Britannica" in 1824. The first edition of Lowndes's "Bibliographer's Manual" was published in 1834.

BIBLIOMANCY, or divination by the Bible, sometimes called "Sortes Biblicæ," was a common practice among the early Christians, who were accustomed to regulate their conduct by opening the Sacred Scriptures and accepting the passage which first presented itself as a guide. Although condemned by the councils of Vannes in 465, Agda in 506, and Orleans in 511, this mode of divination was practised for many years. The Mohammedans exercise a similar divination by means of the Koran. The ancients used the works of Homer and Virgil in the same manner, the Sortes Homericæ and Sortes Virgilianæ being popular modes for prognosticating future events. Divination was also practised by consulting the poems of Museus.

BIBRACTE, the modern Autun (*q. v.*), called also Augustodunum, was the capital of the Ædui (*q. v.*), and was delivered by Julius Cæsar from a besieging army of Belgæ and Suessiones B.C. 58. It was seized by the Æduan chieftain Sacrovir, A.D. 21, and in the reign of Gallienus (260—268) was besieged and taken by Tetricus. It was finally destroyed by the Huns under Attila about 451.

BICENTENARY.—(*See* NONCONFORMISTS.)

BICÊTRE (France).—This place, near Paris, is said to derive its name from John, Bishop of Winchester, who erected a castle here in 1290. A hospital, established here in the reign of Charles V. (1364—1380), and destroyed in the time of Charles VI. (1380—1422), was restored and converted into an asylum for old soldiers during the reign of Louis XIII. (1610—1643). Bicêtre is celebrated for a remarkable well, constructed in 1733. The prison, the scene of barbarous massacres, on account of an alleged conspiracy, June 16 and 26, 1794, was abolished in 1835. A fort was erected here in 1842.

BICOCCA (Battle).—Prospero Colonna, at the head of the Imperialists, repulsed the French and Swiss, under Lautrec, at this villa and park in Lombardy, between Milan and Monza, April 29, 1522. The latter were compelled to retire from Italy, where Francis I. had nothing left but the castles of Milan and Cremona, both of which were closely besieged.

BIDASOA, or VIDASOA (Spain).—Wellington effected a passage of this river in Spain, defeating the French army under Soult, Oct. 7, 1813.

BIDDENDEN MAIDS.—On the afternoon of Easter Sunday, 600 rolls are distributed to strangers, and 270 loaves, weighing 3½ lb. each, with cheese in proportion, to the poor of the parish of Biddenden, in Kent, the expense being defrayed from the rental of 20 acres of land, called Bread-and-Cheese Land, said to have been left for this purpose by the Biddenden Maids. The donors are represented as two sisters, named Elizabeth and Mary Chulkhurst, who were born joined together by the hips and shoulders, at Biddenden, in 1100. They lived together in this state for 34 years, when one of them died, and the other, refusing to be separated from the body of her sister, succumbed a few hours after. An impression of the Biddedden Maids is stamped upon the rolls. Halstead, in his "History of Kent," rejects this story, saying that the lands were left by two maiden ladies of the name of Preston, and that the impression on the cakes is intended to represent two widows, as general objects of charity. W. Horner, rector of the parish, brought an action to obtain the land as part of his glebe, but he was nonsuited.

BIG HARRISON CREEK (Battle).—At this place, in north-western Missouri, Col. Morgan defeated a Confederate force, killing 14, and making 8 prisoners, Oct. 19, 1861.

BILBAO (Spain).—This city, founded in 1300, quickly rose into importance. It was taken by the French in July, 1795, but restored by the treaty of Basel, July 22 in that year. The Spaniards expelled the French, who had again seized it, in September, 1808, but Napoleon I. recovered it in the same year. It surrendered to Wellington after his victory at Vittoria, June 21, 1813. The Carlists besieged it during the civil war. It was relieved by Espartero and the British Legion, Dec. 24, 1836.

BILL OF RIGHTS.—The petition of right, drawn up by Parliament in 1628, and accepted by Charles I., June 7, 1628, was converted into a statute (3 Charles I. c. 1), and called the Bill of Rights. The term is, however, generally used to describe the statute passed, after much discussion (1 Will. & Mary, sess. 2, c. 2), in Nov., 1689. It embodied the declaration of rights presented to William and Mary when the tender of the throne was made to them, Feb. 13, 1689, which defined and vindicated the rights and liberties of the subject, at the same time that it settled the succession to the throne.

BILLIARDS.—This game is said to have been invented by the French, though by some authorities the invention is ascribed to the Italians. It was introduced into England, and became a favourite diversion in the 16th century. Evelyn speaks of a new sort of billiards, with more hazards than ours usually have.

BILLINGSGATE (London).—Geoffrey of Monmouth (b. iii. c. 10) relates that amongst other works erected by Belin was a wonderful gate in Trinovantum, upon the bank of the Thames, which is to this day called after him, Billingsgate; and that above it he erected an immense tower, and beneath a haven for ships. This somewhat strange and legendary story is the only account given of its origin. Toll was paid here in 1016, as appears from Ethelred's laws; and in the time of Edward III. the charge on every large vessel was *2d.*, for a smaller one *1d.*, and for a boat ½*d.* for standage. Billingsgate was made a free market to all persons from May 10, 1699, by 10 & 11 Will. III. c. 14. Abuses having arisen, an order was issued in 1707, enforcing certain payments. The hours of the market were fixed, and a bell ordered to be rung by a proper officer by 9 Anne c. 26, s. 5 (1710). Billingsgate was destroyed by fire Jan. 13, 1715, when 50 lives were lost; it was, however, rebuilt. An entirely new market was constructed, with superior accommodation, in 1852.

BILLS OF EXCHANGE.—The origin of bills of exchange has not been clearly traced, though it is certain that they were known in Europe in the 13th century. Henry III. of England and Pope Alexander IV., for the purpose of carrying out their plans in Italy, in 1254, borrowed large sums of the Italian bankers, authorizing them to draw bills for the amount on the English bishops, the latter being compelled, under threats of excommunication, to furnish the necessary funds. Beckmann quotes an ordinance issued at Barcelona, in 1394, requiring bills of exchange to be accepted within 24 hours of presentation, and the acceptance to be on the back of the bill. In 1404 the magistrates of Bruges applied to the magistrates of Barcelona for information as to how they were to act when bills of exchange were in certain cases dishonoured. Baldus, the jurist, quotes one dated March 9, 1328. They are mentioned in 3 Rich. II. c. 3, s. 2 (1379), and various enactments have been made for their regulation. The duties on bills of exchange, which have formed the subject of many statutes, are regulated by 17 & 18 Vict. c. 83 (Aug. 9, 1854). Remedies on bills of exchange, by the prevention of frivolous defences to actions thereupon, were provided by 18 & 19 Vict. c. 67 (July 23, 1855).

BILLS OF MORTALITY.—Strype and Maitland state that one, dated 1562, is in the Sloane Collection; but Stow, on the authority of a learned author, says they commenced in 1592, a year of great mortality; and having fallen into disuse, were revived in 1603, the first of the weekly bills being dated Oct. 29 in that year. Diseases were first noticed in them in 1629. They were published every Thursday, and delivered at the houses of the citizens for *4s.* a year. They were superseded by the new machinery introduced by the Registration Act (6 & 7 Will. IV. c. 86), that became law Aug. 17, 1836. Its operations commenced March 1, 1837.

BINARY ARITHMETIC.—This kind of notation, said to have been used amongst the Chinese 4,000 years ago, was invented by Leibnitz at the end of the 17th century.

BINGEN (Hesse-Darmstadt).—This ancient city, the *Bingium* of the Romans, said to have been founded by Drusus about B.C. 10, was fortified by the Emperor Julian (A.D. 360—363). The *Mauselthurm*, or mouse-tower, was erected on an island near Bingen in the 13th century. The castle of Klopp was destroyed by the French in 1689, and the navigation of the

Rhine was rendered practicable by works completed in 1833.

BIRDS OF PASSAGE.—(*See* MIGRATORY BIRDS.)

BIRKENHEAD (Cheshire).—A Benedictine priory was founded here A.D. 1150, of which the ruins still exist. Birkenhead was an obscure village at the commencement of the century. Its population of 200 in 1821 had in 1851 increased to nearly 25,000. Its extensive docks were commenced Oct. 23, 1844. By 24 & 25 Vict. c. 112 (Aug. 6, 1861) Birkenhead was made a borough, with power to elect a member after Dec. 1, 1861; and the first election took place Dec. 10. The foundation stone of a Workmen's Hall was laid by Mr. Laird, May 16, 1864.

BIRKENHEAD, steam transport, conveying troops to the seat of the Caffre war, was wrecked near the Cape of Good Hope, Feb. 26, 1852, when only 194 persons out of 630 on board at the time were saved.

BIRMINGHAM (Warwickshire). — This manufacturing town, of which the name is said to be spelt in 150 ways, one being *Bromwycham*, was founded in the Anglo-Saxon period, and was a market town before the Norman Conquest. It sided with Cromwell during the civil war, and a battle was fought near it in 1643, when Prince Rupert obtained possession of the town.

A.D.
1552. King Edward VI. founds the Grammar School.
1643. Birmingham is besieged, taken, and partially burned by Prince Rupert.
1665. It is visited by the plague.
1764. Matthew Bolton founds the Soho manufactory.
1767. The Birmingham Canal is commenced.
1774. Watt and Boulton enter into partnership.
1779. The General Hospital is opened.
1791, July 14. Riots occur.
1792, Aug. 24. The theatre is burned.
1813. A Government proof-house is erected.
1817, May 15. Walter Street Mills are entirely consumed by fire. The damage is estimated at £200,000.
1820, Jan. 7. The theatre is again destroyed by fire.
1831. The Birmingham Political Union is formed to insure the success of the Reform Bill.
1832. It is made a borough by the Reform Bill, to return two members to Parliament.
1833. The town-hall is built.
1834, May 10. Dissolution of the Political Union. Erection of the present Grammar School.
1837, July. The Grand Junction Railway is opened between Birmingham and Liverpool.
1838, Sep. 17. The London and Birmingham Railway is opened.—Oct. 31. A municipal charter is granted.
1839, July 15. Chartist riots.—(*See* CHARTISTS.)
1843. Queen's College is incorporated.
1846. Queen's College is authorized by royal warrant to issue certificates to candidates for degrees in London University.
1847, Oct. The Corn Exchange is opened. The People's Park is opened, the gift of Mr. Adderley. The new music-hall is opened. Lord Calthorpe's Park is opened.
1858, June 15. The Queen opens Aston Hall and Park, which become the property of the people of Birmingham.
1859, Sep. 27. Twenty persons are killed by an explosion of gunpowder in a percussion-cap manufactory.
1862, June 21. Nine persons are killed by an explosion in a percussion-cap factory.
1864, Feb. 2. The town council vote £19,000 to complete the purchase of Aston Park.—Sep. 12. Aston Hall and Park are acquired.
1865, Jan. 2. A new Exchange is opened.—March 11. Spooner and Atwood's bank stops payment.—Aug. 28, Monday. An Industrial Exhibition is opened in Bingley Hall.—Sep. 6–13. Meeting of the British Association.

BIRTHS were first taxed in this country by 6 & 7 Will. III. c. 6 (1694). The tax was granted for five years, from May 1, 1695, and was by 8 & 9 Will. III. c. 20, s. 14 (1697), continued till Aug. 1, 1706, and every person not receiving alms was required to pay 2*s.* for each child. The nobility, &c., paid, in addition to the 2*s.*, as follows:—

	Eldest son.				For each son and daughter.		
	£	*s.*	*d.*		£	*s.*	*d.*
Duke	30	0	0	.....	25	0	0
Marquis	25	0	0	.....	20	0	0
Earl	20	0	0	.....	15	0	0
Viscount	17	10	0	.....	13	6	0
Baron	15	0	0	.....	12	0	0
Baronet, knight of the Bath, or knight-bachelor	5	0	0	.....	1	0	0
Sergeant-at-law, esquire, or gentleman	1	0	0	.....	1	0	0
Archbishop, bishop, dean, archdeacon, canon, prebendary, doctor of divinity, law, or physic	1	0	0	.....	1	0	0
Every person not included in the above list, having a real estate of £50 per annum, or personal estate of £600 or upwards	0	10	0	.....	0	10	0

BIRTHS, DEATHS, AND MARRIAGES.—A stamp duty on the registry of births, christenings, marriages, and burials, was granted from Oct. 1, 1783, by 23 Geo. III. c. 67 (1783). The amount was threepence on each entry. The tax was extended to Dissenters from Oct. 1, 1785, by 25 Geo. III. c. 75 (1785), and both acts were repealed by 34 Geo. III. c. 11 (March 1, 1794), the duties ceasing Oct. 1, 1794. (*See* REGISTRATION OF BIRTHS, DEATHS, AND MARRIAGES.

BISHOP, or OVERSEER, the title given by the Greeks and Romans to certain civil officers, was adopted in the Christian Church for one of its chief authorities during the apostolical period. Bishops were at first styled apostles. By canons passed at the councils of Chalcedon (the fourth General Council), A.D. 451; of Agda, Sep. 11, 506; of Lerida, Aug. 6, 546, and at many others, ascetics, hermits, and monks were made subject to them. Bishops were appointed in England soon after the introduction of Christianity during the 1st century, the monkish account of the foundation of the see of London by Lucius, between 170 and 185, being rejected as an invention intended to convey the idea of the subjection of the ancient British Church to Rome. The hierarchy became very powerful in Anglo-Saxon times. William I. changed the frank-almoign, or free alms, the spiritual tenure under which the bishops before held their lands, into the feudal or Norman tenure by barony in 1070; and in right of succession to these baronies the bishops and abbots were afterwards allowed seats in the House of Lords as lords spiritual. They were at first elected to their office. Charlemagne claimed the right of confirming each appointment, and of granting investiture of the temporalities; and this was recognized by Hadrian I. in 773, and the Council of Lateran. This custom prevailed in England until the year 1106, when Anselm induced Henry I. to be satisfied with homage from the bishop for his temporalities. King John conceded by charter to the cathedrals and monas-

teries the right of electing their bishops and abbots. (*See* CONGÉ D'ELIRE.) This right was recognized and confirmed in Magna Charta, and by 25 Edw. III. st. 6, s. 3 (1361). The ancient right of nomination was restored to the crown by 25 Hen. VIII. c. 20 (1534). The precedency of bishops was settled by 31 Hen. VIII. c. 10, s. 3 (1539), which assigned the highest place to the primate, the Archbishop of York ranking second, and the bishops of London, Durham, and Winchester, following in succession, the other bishops sitting "on the same side after their ancienties, as it hath been accustomed." Twelve bishops were impeached and committed to the Tower, Dec. 30, 1641, for protesting (Dec. 28) against the legality of all laws, orders, votes, resolutions, and determinations passed during their enforced absence, from the violence of the mob, by whom they were daily assaulted on their way to Parliament. Bishops were excluded from Parliament by 16 Charles I. c. 27 (Feb., 1641), but the act was repealed by 13 Charles II. st. 1, c. 2 (1662), and they have since sat in the upper house. The act 19 & 20 Vict. c. 115 (July 29, 1856) provided for the retirement of Dr. Blomfield, Bishop of London, and Dr. Maltby, Bishop of Durham, and fixed the amount of their pensions. (*See* NONJURORS, and SEVEN BISHOPS, Trial of.)

BISHOPRICS.—(*See* COLONIAL, ENGLISH AND WELSH, IRISH, ROMAN CATHOLIC, AND SCOTCH BISHOPRICS.)

BISMUTH.—This metal, first described by Agricola in 1529, was shown by him to be "somewhat different from lead" in 1546. Its nature was studied by Pott and Geoffroy, about the middle of the 18th century.

BISUTUN.—(*See* BEHISTUN.)

BITHYNIA (Asia Minor). — The original inhabitants of this ancient province were, according to the traditional account, expelled by some Thracian tribes, of which the Bithyni were the most numerous. The Megarians formed a colony at Astacus B.C. 712, which became a flourishing city. Bithynia was incorporated with the Lydian empire by Cresus about B.C. 560, and it is included in the modern Anatolia.

B.C.
543. Bithynia succumbs with Lydia to the Persian yoke.
431, or 436. Dydalsus, or Dudalsus, chief of the Bithyni, seizes Astacus, and founds the kingdom of Bithynia.
409. The Bithynians deliver to Alcibiades the property of the Chalcedonians intrusted to their keeping.
401. The Bithynians vigorously oppose the Retreat of the Ten Thousand (*q. v.*).
333. The Bithynians defeat Calas, one of the generals of Alexander III. (the Great).
315. Zipœtes makes war upon Astacus and Chalcedon.
281. Lysimachus, the Thracian, sends an army to subdue Bithynia; but his troops are defeated and his generals slain.
278. Nicomedes I., King of Bithynia, invites the Gauls into Asia, and assigns Galatia (*q. v.*) as their territory.
264. Nicomedes I. founds Nicomedia (*q. v.*).
228 (circ.) Zielas having treacherously planned the massacre of the chiefs of Galatia, is detected and slain by them.
216. Prusias I. defeats the Gauls in a great battle.
183. Hannibal, who had sought refuge with Prusias I., and assisted him in his wars against the King of Pergamus, poisons himself to avoid betrayal into the hands of the Romans.
167. Prusias II. visits Rome, and is magnificently received.
156. War between the kings of Bithynia and Pergamus, in which the former is victorious.
88. War between Nicomedes III. and Mithridates VI., King of Pontus, in which the latter is victorious.
74. Death of Nicomedes III., who bequeaths Bithynia to the Roman people.
44. After the death of Cæsar, Bithynia is assigned to Cimber.

A.D.
63. The provinces of Bithynia and Pontus are united about this time.
103. Pliny the Younger becomes governor of Bithynia.
104. Pliny the Younger complains of the Christians in his province.
260 (circ.) Bithynia is ravaged by the Goths.
1074. It is seized by the Seljukian Turks.
1231. The first settlement of the Tartars in Bithynia.
1327. The Emir Orchan conquers Nicomedia, and establishes the Ottoman power in Bithynia.

KINGS OF BITHYNIA.

326.	Zipœtes.	91.	Nicomedes III. (Philopator).
278.	Nicomedes I.		
250.	Zielas.		

BITONTO (Battle).—The Imperialists were defeated at this place, the ancient Butuntum, in Apulia, by the Spanish troops, led by the Duke of Montemar, general to Don Carlos, May 27, 1734. Don Carlos was crowned King of Naples, the German viceroy expelled, and Montemar created Duke of Bitonto. The whole of Sicily was soon after subjugated.

BITUMEN was obtained at a very early period from mineral springs at Hit, in Chaldæa, whence Thothmes III. brought it into Egypt about B.C. 1400. The ancient Chaldæans and Susianians used it for cement.

BLACK ACT, passed in 1722 (9 Geo. I. c. 22), was thus named because it was intended to put an end to the wanton destruction of deer, game, plantations, the obtaining of the same by threats, and other outrages committed by persons called Blacks, having their faces blackened, and being otherwise disguised. These offences were punished as felony, the delinquents to suffer death without benefit of clergy. Offenders under this act were excepted from the general pardon granted by 20 Geo. II. c. 52 (1746). The act was to last for three years, from June 1, 1723, and it was continued for five years by 12 Geo. I. c. 30 (1725), and after other renewals was made perpetual by 31 Geo. II. c. 42 (1757). It was repealed by 7 & 8 Geo. IV. c. 27, s. 1 (June 21, 1827). The acts of the Scottish parliament from the reign of James I. of Scotland to 1586—1587 are also denominated black acts, because they are printed in Saxon characters.

BLACK ART.—(*See* MAGIC.)

BLACK ASSIZE.—A fatal pestilence that broke out at Oxford, at the close of the assizes, July 6, 1577. It lasted until Aug. 12, and 510 persons in Oxford and its neighbourhood are said to have fallen victims to this malady. Antony Wood attributes it to the noisome smell of the prisoners, or the damp ground. Something of the same kind occurred at the Lent assizes in Cambridge in 1521, when all "there present were sore sick, and narrowly escaped with their lives."

BLACK BRUNSWICKERS.—(*See* DEATH'S HEAD CORPS.)

BLACKBURN (Lancashire), formerly the capital of a sterile district called Blackburnshire, possesses a grammar school, founded in 1567, and a school established by W. Leyland in 1764 for the maintenance and instruction of 90 girls. As early as 1650 it was celebrated for its manufacture of Blackburn checks, which subsequently gave place to the Blackburn greys. James Hargreave, a carpenter residing at this town, invented the spinning-jenny in 1767, thus giving an impetus to the cotton trade (*q. v.*), which forms the staple industry of the inhabitants. A theatre was erected in 1818. The old church, dating from the Norman Conquest, and rebuilt in 1819, was much injured by fire in 1831. Blackburn suffered severely during the Cotton Famine (*q. v.*) of 1863—4.

BLACK CAP, called the "Judgment Cap," is worn on extraordinary occasions, and forms a portion of the full dress of the judge. For this reason it is used when sentence of death is passed upon a prisoner. When the Lord Mayor is presented in the Court of Exchequer, Nov. 9, the judges wear "the black cap" during the ceremony. Covering the head was a sign of mourning amongst the Israelites, as may be seen from 2 Sam. xv. 30, and other passages in the Old Testament; also amongst the Greeks, Romans, and other ancient nations, and even amongst the Anglo-Saxons. It is not known when the custom for a judge to put on the black cap in passing sentence of death upon a prisoner was introduced into this country.

BLACK DEATH.—This pestilence, so called from the black spots which at one of its stages appeared upon the bodies of the sufferers, desolated the world in the 14th century. It is said to have broken out in China. After having traversed Asia, it appeared in Europe in 1348, where it prevailed with more or less severity until 1351. The loss of human life was great, no less than 25,000,000 persons having perished in Europe alone. The terrors it excited gave rise to several sects, who wandered about, lashing themselves, singing penitential psalms, and declaring that the day of judgment was at hand. (*See* FLAGELLANTS.) In some places the calamity was attributed to the Jews, who were, in consequence, persecuted with great severity. Our historians dwell upon the great ravages it committed in London in 1348—9. It returned at a later period, but its visitations were less fatal in their character.

BLACK FOREST (Battles).—This forest, lying between France and Austria, has been the scene of conflicts in all the wars between those countries. The Kniebiss Pass was taken by the French in 1796 and in 1797, and the Valley of Holle, or Hell, was traversed by Moreau during his retreat in 1796. In 1805 it was occupied by the Austrians under Mack.

BLACK FRIARS.—This name was given to the Dominicans, who came into England in 1221, on account of their black habit. (*See* DOMINICANS.)

BLACKFRIARS BRIDGE (London).—The first pile of this edifice was driven Jan. 7, and the foundation stone was laid Oct. 31, 1760. The temporary bridge was opened for foot passengers Nov. 19, 1766; for horses in 1768; and for carriages Nov. 19, 1769; the edifice having been completed in 1770. Toll, to the amount of one halfpenny per foot passenger on week-days and one penny on Sundays, was at first levied; but this was abolished June 22, 1785. The bridge had nine arches, the width of the central one being 100 feet, and the length of the whole structure 995, and the width 42 feet. It was repaired in 1840, when the carriage-way was closed until October in the following year. It was at first called Pitt's Bridge, in honour of the great Earl of Chatham. It was pulled down in 1864—5. (*See* NEW BLACKFRIARS BRIDGE.)

BLACKFRIARS THEATRE (London) was erected in 1576, and rebuilt in 1596. The edifice was pulled down, and tenements erected on its site, Aug. 6, 1655. In the reign of Charles I. the Blackfriars theatre was the first in London.

BLACKHEATH (Kent). — This common, about five miles S.E. from London, has been the scene of many important events. The Danes were defeated here in 1011. Wat Tyler and his followers assembled here June 12, 1381. (*See* WAT TYLER'S INSURRECTION.) Here, Nov. 23, 1416, the citizens of London welcomed Henry V., after the victory at Agincourt. Jack Cade encamped on the heath June 1, 1450 (*see* CADE'S INSURRECTION), and the leaders of Flammock's Rebellion (*q. v.*) were defeated here by the royal army, June 22, 1497. Charles II., at the Restoration, was met here by the army, May 29, 1660, and made his triumphal entry into the metropolis. It was a resort of highwaymen during the 18th century. A cavern, excavated in the solid chalk, and discovered on the Deptford borders of the heath in 1780, is believed to have been used as a retreat by the Saxons during the invasions of the Danes. (*See* MORDEN COLLEGE.)

BLACK-HOLE.—Dowlah, Viceroy of Bengal, captured Calcutta June 20, 1756, when he ordered Mr. John Zephaniah Holwell, its valiant defender, and 145 of his fellow-countrymen, to be imprisoned in the common dungeon of Fort William, usually called the Black-hole. The dungeon was only 18 feet square; but little air was admitted; and the consequence was that when the door was opened on the following morning, June 21, only 23 of the 146 incarcerated the night before were found alive. Clive exacted signal vengeance for this act of barbarity. He took Calcutta Jan. 2, 1757; won the battle of Plassey (*q. v.*) June 23 in the same year; and the perfidious Dowlah was slain by one of his own officers June 25 in the same year.

BLACK LETTER.—(*See* PRINTING.)

BLACK-MAIL.—This tax, in kind or money, was levied by the borderers of England and Scotland, under the pretence of affording protection from robbers, with whom those demanding the tribute were generally allied. By 43 Eliz. c. 13 (1601), all persons in the counties of Northumberland, Westmoreland, Cumberland, and the bishopric of Durham,

receiving or carrying black-mail, or giving it for protection, were to suffer death as felons, without benefit of clergy, and to forfeit all their goods. These illegal exactions were carried to such an extent that they became the subject of legislation just before the Union in 1707. The practice was, in spite of every effort for its suppression, continued in Scotland until the rebellion of 1745.

BLACK MONDAY.—Easter Monday, April 6, 1360, was thus named from the severity of the weather on that day. Stow, under the year 1360, says, "And here is to be noted that the 14th day of April, and the morrow after Easter-day, King Edward, with his host, lay before the city of Paris, which day was full dark of mist and hail, and so bitter cold that many men died on their horsebacks with the cold; wherefore unto this day it hath been called the Black Monday." Easter Monday in that year fell April 6 (N. S.). Launcelot, in the "Merchant of Venice," remarks, "Then it was not for nothing that my nose fell a bleeding on Black Monday last."—By school-boys, the first Monday after the holidays—the day on which work usually commences—is also called Black Monday.

BLACK MONEY.—Base coin, brought into England from foreign countries, was thus denominated. The importation of black money was prohibited by 9 Edw. III. c. 2 (1335); and 9 Edw. III. c. 4 (1335), declared that it should not be current in this realm. The term was also applied to jettons and counters.

BLACK MONKS.—The Benedictines (*q. v.*), from the colour of their outward garments, were usually called black monks.

BLACK RIVER (Battle).—Gen. Lawler drove the Confederates from their entrenched position on the banks of this stream in Mississippi, capturing many prisoners and 17 cannon, May 17, 1863.

BLACK-ROCK (Battle).—At this place, near Buffalo, the American army, amounting to nearly 2,500 men, was defeated by a British force consisting of 1,400 regulars and militia, Dec. 30, 1813. The Americans attempted to make a stand at Buffalo, but speedily gave way; whereupon the village of Blackrock and the town of Buffalo, with all stores, &c., were destroyed. This was done in retaliation for the acts of plunder and devastation committed by the Americans during their invasion of Upper Canada.

BLACK ROD.—The gentleman-usher of the black rod was appointed by letters patent from the crown, at the institution of the order of the Garter, of which he is an officer, in 1350. He, or his deputy, the yeoman-usher, is sent to desire the attendance of the Commons in the House of Lords when the royal assent is given to bills, and on other occasions.

BLACK ROOD OF SCOTLAND.—This cross of gold, containing, as was alleged, a relic of the true cross, was brought into Scotland by Margaret, sister of Edgar Atheling, on her marriage with Malcolm III. in 1067. By the middle of the 12th century it was regarded with reverence by the entire Scotch nation, and having been removed to England by Edward I. in 1291, it was used to add solemnity to the oaths of allegiance tendered to him by the northern nobles. On the ratification of peace at Northampton, May 4, 1328, it was restored to Scotland. David II. having brought it with him on his invasion of England in 1346, it was captured by the English at Neville's Cross (*q. v.*) Oct. 12, and was deposited by the conquerors in Durham Cathedral, where it remained till the Reformation. Of its subsequent history nothing is known.

BLACK SEA, or THE EUXINE (Expedition). — The Turks excluded all foreign vessels, until the Russians obtained admission by the treaty of Kutschouc-Kainardji (*q. v.*), July 10, 1774. Austrian ships were admitted soon after, and British and French by the treaty of Amiens, March 25, 1802.—The allied English and French squadrons entered the Black Sea Jan. 4, 1854. Odessa was bombarded April 22, and the British war steamer *Tiger* was lost off that port May 12. The landing of the allied armament was effected at Old Fort, Sep. 14 — 18, Balaclava entered Sep. 26, and Sebastopol bombarded Oct. 17. A terrible gale occurred Nov. 11, and the hurricane in which so many British and French ships were lost, Nov. 14. The expedition to Kertch sailed May 23, 1855, and after having captured several places and destroyed warlike stores, returned to Balaclava June 14. The expedition to the Bug and the Dnieper anchored off Odessa Oct. 8, was detained by fogs and contrary winds till Oct. 14, captured Kinburn Oct. 16, and returned to Balaclava in November. After the conclusion of peace in 1856, the English and French squadrons were gradually withdrawn, and the Black Sea was thrown open to the commerce of all nations.

BLACK-WALL (Middlesex).—This important suburb of London was connected with the metropolis by railway July 4, 1840. Brunswick Wharf was opened July 6, 1840.

BLACK WATCH.—A militia armed by Government in 1725, to guard the Scotch Highlands, and regularly organized in 1729 or 1730, was so termed from the dark tartan uniform. This force was formed, in 1739, into the 42nd Regiment.

BLACK-WATER (Battle) took place, near this river in Ulster, during Tyrone's rebellion, between the English forces, led by Sir Henry Bagnal, and the rebels, Aug. 14, 1598. The former were defeated, and the result of the disaster was a general rising of the Irish in Ulster.

BLACKS.—(*See* BIANCHI and NERI.)

BLADENSBURG (Battle).—An English army defeated the Americans on the heights of Bladensburg, in Maryland, Aug. 24, 1814. The American force consisted of between 7,000 and 8,000 infantry, with 3,000 cavalry, in a strong position, supported by a powerful artillery; whilst the British scarcely mustered 5,000 men, and only 1,500 were actually engaged. The defeated army retreated through Washington, of which the victors took possession.

BLANCO (Cape).—This headland of Western Africa, discovered by the Portuguese in 1440, was first doubled by Tristam in 1443.

BLANKET.—Coarse woollen cloth, manufac-

tured at Bristol by the brothers Edward, Edmund, and Thomas Blanket, the last of whom was bailiff of that town in 1340, though originally used for the dress of monks and nuns, was speedily adopted as a material for bed-coverings, and is frequently alluded to as such in the "Expenses of the Great Wardrobe of Edward III., from Sep. 29, 1347, to Jan. 31, 1349."

BLANKETEERS.—Rioters who assembled from all parts of Lancashire at St. Peter's Church, Manchester, Monday, March 10, 1817, for the ostensible purpose of carrying a petition for reform to London, in order to present it to the Prince Regent. Each man brought with him a blanket, amongst other necessaries for the journey, and on this account they received the name of Blanketeers. The authorities, by adopting proper precautions, and suspending the Habeas Corpus Act, were enabled to suppress the movement before mischief had been done.

BLANK VERSE was, according to Hallam, first used in English poetry by Henry Howard, Earl of Surrey, who was executed Jan. 19, 1547. His chief production in this measure is a translation of a portion of the Æneid, published in 1557. Blank verse was much improved by Marlowe. Some authors state that Chaucer first employed it.

BLARNEY-STONE.—The tradition that whoever kisses this stone, in the castle of Blarney, county Cork, is endowed with persuasive eloquence, is traced to the circumstance that Cormac M'Dermot Carthy, an Irish rebel, having concluded, in 1602, an armistice with the English on condition of surrending Blarney Castle, succeeded by his promises and entreaties in holding that stronghold until the assailants became the laughing-stock of the English court. Two stones of the castle are said to possess the power referred to,—one dated 1446, being situated about 20 feet from the top of the lofty tower, while the other, inscribed 1703, is at the summit and easily accessible.

BLASPHEMY was severely punished, both in ancient and modern times. The penalty by the law of Moses was death, and the same was awarded by the civil code of Justinian. The ecclesiastical codes were very severe upon persons guilty of any form of the offence. The Long Parliament passed a law (May 2, 1648) visiting it in some cases with capital punishment without benefit of clergy. By 3 James I. c. 21 (1605), any person or persons in any stage play, interlude, show, Maygame, or pageant, jestingly or profanely speaking or using the name of either person of the Trinity, incurred a fine of £10 for every offence. The act for more effectually suppressing blasphemy or profaneness, 9 & 10 Will. III. c. 32 (1698), punished these offences with general disqualification and imprisonment for three years. By 53 Geo. III. c. 160, s. 2 (July 21, 1813), Unitarians are relieved from its operation. The law respecting blasphemy is regulated by 60 Geo. III. c. 8 (Dec. 30, 1819). The Scotch acts, punishing the offence by death, passed in 1661 and 1695, were repealed by 53 Geo. III. c. 160 (July 21, 1813).

BLEACHING, which seems to have originated in Egypt, was practised by the ancients, who did not, however, discriminate clearly between it and the kindred operations of fulling and washing. Early in the 18th century Holland was celebrated for its bleach-works, to which goods were sent from this country; but similar establishments having been introduced into Scotland with much success in 1749, the process was speedily extended over Great Britain. Berthollet having, in 1785, discovered the bleaching properties of chlorine (*q. v.*), several attempts were made to utilize that substance by depriving it of its tendency to rot cloth brought within its influence. This was successfully accomplished by Tennant's invention of chloride of lime bleaching powder in 1798. Bentley's continuous process was patented in 1828. The employment of women and children in bleaching works was placed under the Factories Acts by 23 & 24 Vict. c. 78 (Aug. 6, 1860), which act was amended by 23 Vict. c. 8 (April 11, 1862), by 26 & 27 Vict. c. 38 (June 29, 1863), and by 27 & 28 Vict. c. 98 (July 29, 1864).

BLÉNEAU (Battle).—The Spanish, led by Condé and the Duke of Orleans, defeated the army of Louis XIV., under Hocquincourt, near this place, in France, April 7, 1659.

BLENHEIM, or BLINDHEIM (Battles).—The allied army, under Marlborough and Eugène, defeated the French and Bavarians at this place in Bavaria, about 20 miles from Augsburg, Aug. 13 (O. S. 2), 1704. The forces of the former consisted of 52,000 men and 52 pieces of cannon; those of the latter of 57,000 men, advantageously posted and defended by a powerful artillery. The battle commenced at eight in the morning, and by nine in the evening the triumph of the allies was complete. Their loss was 4,500 killed and 7,500 wounded; that of the French and Bavarians, 12,000 killed and 13,000 prisoners; whilst several thousands perished in the Danube. The victors took 100 pieces of cannon, 24 mortars, 129 colours, and 171 standards. This was Marlborough's greatest achievement, and on the evening of the battle he wrote in pencil, on a slip of paper torn from his memorandum-book, the following letter, still preserved in the family archives, to the duchess:—

"I have not time to say more, but to beg you will give my duty to the Queen, and let her know her army has had a glorious victory. Monsieur Tallard and two other generals are in my coach, and I am following the rest. The bearer, my aide-de-camp, Colonel Parke, will give her an account of what has passed: I shall do it in a day or two, by another more at large.

"MARLBOROUGH."

This distinguished general received, as a national gift, the manor and honour of Woodstock (*q. v.*), and the hundred of Wootton, where the palace of Blenheim was erected for him. The trophies of the victory were removed from the Tower to Westminster Hall, Jan 3, 1705, amid the thunders of artillery and popular demonstrations. It is also called the battle of Hochstädt, from a village in the vicinity.—The French, under Moreau, effected the passage of the Danube at this place, in face of a strong body of Austrians, who were defeated with much slaughter and the loss

of three battalions made prisoners, June 19, 1800.

BLIND.—Louis IX. founded the hospital of the Quinze Vingts at Paris, in 1260, for the reception of soldiers who had lost their sight in the Crusades. Simpson's hospital for the blind at Dublin was founded in 1781. The first school for the blind was opened by Valentine Hatty at Paris, in 1784. The following is a list of the principal institutions for the blind, with the date of foundation :—

A.D.		A.D.	
1791.	Liverpool.	1815.	Dublin (Molineux.)
1792.	Edinburgh.	1817.	Stockholm.
1793.	Bristol.	1820.	Barcelona.
1799.	London.	1822.	Naples.
1804.	Vienna.	1824.	Lintz.
1804.	Prague.	1825.	Perth.
1804.	Amsterdam.	1828.	Glasgow.
1805.	Norwich.	1830.	Hamburg.
1806.	St. Petersburg.	1831.	Boston, U.S.
1806.	Berlin.	1831.	New York, U.S.
1809.	Dublin (Richmond Inst.)	1833.	Philadelphia, U.S.
1809.	Zurich.	1835.	Limerick.
1809.	Dresden.	1836.	Columbus, U.S.
1811.	Copenhagen.	1837.	York.
		1838.	Manchester.

The number of these excellent institutions increases rapidly. Printing for the blind was introduced in 1827, and the methods of conveying instruction have been greatly improved.

BLINDING.—Duncange, under the term Abacinaire, enumerates the various methods by which this barbarous punishment of depriving persons of sight was inflicted. Burning with hot irons was the most common. Shakespeare, in the case of Gloucester (King Lear, act iii. sc. 7), and in the scene between Arthur and Hubert in King John (act. iv. sc. 1), gives a vivid description of its horrors. Michael Palæologus blinded the young Emperor John Lascaris, in order to render his own usurpation secure (Dec. 25, 1261). Gibbon (ch. lxii.) remarks : "The loss of sight incapacitated the young prince for the active business of the world: instead of the brutal violence of tearing out his eyes, the visual nerve was destroyed by the intense glare of a red-hot basin, and John Lascaris was removed to a distant castle, where he spent many years in privacy and oblivion." This mode of torture was a fearful weapon in the hands of oppressors and tyrants in ancient times, as well as during the Middle Ages. (*See* ZETUNIUM, Battle.)

BLOIS (France), the Blesum of the Romans, who erected a fine aqueduct which still exists, passed in the early part of the 9th century under the government of counts, one of whom, Guy II., sold it, in 1391, to Louis of France, Duke of Orleans, by whose successors it was annexed to the French crown. Louis XII. rebuilt the eastern portions in 1498, and in 1577 it was the scene of a meeting of the states general. The Duke of Guise was assassinated here by order of Henry III., Dec. 23, 1588, and Mary de Medici, imprisoned in the castle May 3, 1617, escaped thence in 1619. Blois was erected into a bishopric in 1697. A fine bridge over the Loire was erected in 1717. Maria Louisa, consort of Napoleon I., held her court here for a short time during the occupation of Paris by the allies in 1814.

BLOIS (Treaties).—A secret treaty was concluded here between Louis XII. and the Archduke Philip, Sep. 22, 1504, by which the former ceded to Prince Charles (afterwards the Emperor Charles V.) Britanny, part of Burgundy, and certain places in Italy, as the dowry of his daughter, the Princess Claude: the marriage never took place.—A second treaty, by which the Princess Germaine de Foix, niece of Louis XII., was betrothed to Ferdinand V. of Castille, who agreed to pay the French king a million gold ducats within 10 years, was concluded here Oct. 12, 1505.—By a third treaty, signed Nov. 17, 1510, in consideration of a sum of 100,000 ducats and an auxiliary of 1,200 lances and 8,000 infantry, covenanted to him by Louis XII., the Emperor Maximilian engaged to invade Italy the ensuing spring.—Another alliance, between Louis XII. and the Venetians, was concluded here March 14, 1513; and a league between England and France, negotiated at Paris, was signed at Blois, April 11, 1572. The latter was an offensive and defensive alliance, intended to lull the suspicions of the French Protestants.

BLOOD.—During the early and Middle Ages, human blood was regarded as a medicine of great efficacy, and blood-baths, in which the patients sat, were used in cases of leprosy. Louis XI. (1461—1483) of France, after having tried a number of remedies, is said by the historian Gaguin to have hoped to recover by the blood of certain children, which he swallowed. Pope Innocent VIII. (1484—1492) is said to have endeavoured to prolong his days by the transfusion of blood. The Harveian theory of the circulation of the blood was confirmed by the experiment of transfusing blood, tried upon dogs, in 1657. Various attempts were made in France in the 18th century to renovate old and broken constitutions by means of some system of transfusion of blood.

BLOOD (Circulation of the).—The discovery of the general circulation of the blood has been attributed to several individuals. Hallam, who substantiates the claim of William Harvey, after reviewing the controversy, remarks: "It is thus manifest that several anatomists of the 16th century were on the verge of completely detecting the law by which the motion of the blood is governed; and the language of one (Cæsalpin) is so strong, that we must have recourse, in order to exclude his claim, to the irresistible fact that he did not confirm by proof his own theory, nor proclaim it in such a manner as to attract the attention of the world." Servetus (1543—1553) was acquainted with the pulmonary circulation; Columbus (1559) possessed the same knowledge; and Cæsalpin, about 1583, had a more just notion than any of his predecessors of the general circulation of the blood, discovered in 1619 by William Harvey, who fully demonstrated its truth in 1628. Asellius, in 1622, discovered the lacteal vessels. The common origin of the lacteal and lymphatic vessels was discovered by Pecquet in 1647, and made public in 1651.

BLOOD (Council of).—This name was popularly given to the "Council of Tumults," organized by the Duke of Alva in 1567, to try criminals against the Spanish throne and reli-

gion in the Netherlands. By their orders 500 citizens were arrested on Ash Wednesday, 1568, and condemned to death. They also had Counts Egmont and Horn executed, June 2, 1568.

BLOOD ORDER.—John George I., Elector of Saxony, who owed his power to Swedish assistance, having bound himself, by the peace of Prague, May 30, 1635, to drive his benefactors from Germany, subsequently directed his troops, under Baudis, to attack the Swedish forces of General Bauer. In consequence of the ingratitude of this command, it is usually known in history as the Saxon Blood Order.

BLOOD OF OUR SAVIOUR.—This order of knighthood was instituted at Mantua by the Duke Vincentio di Gonzaga, on the marriage of his son with Margaret of Savoy, in 1608.

BLOOD OF ST. JANUARIUS.—(*See* JANUARIUS, ST.)

BLOODY ASSIZES.—After the suppression of Monmouth's rebellion, a special commission, dated Aug. 24, 1685, for the trial of offenders, was directed to Jeffreys* and four other judges. They set out for the west of England under a military escort, commanded by Jeffreys, with the rank of lieutenant-general, and at Dorchester, Exeter, Taunton, and Wells, condemned above 300 persons to death, almost without trial. Nearly 1,000 were sold as slaves to the West Indian plantations, and others were whipped, fined, and imprisoned. James II. termed the expedition Jeffreys' Campaign, rewarding him with the lord-chancellorship, Sep. 28. This is generally known as the Bloody Assizes.

BLOOMER COSTUME.—Holinshed, in his description of England in the 16th century, says, "I have met with some of these trulles in London, so disguised that it hath passed my skille to discerne whether they were men or women." These were doubtless the first wearers of what is called the Bloomer costume, being a dress for females, adopted in America in 1848, and introduced into England in 1851, where, though recommended by lecturers, it fell into contempt, and speedily disappeared.

BLOOMSBURY GANG, a clique of politicians who, towards the close of the 18th century, exercised an undue influence over the councils of George III., so called from the fact that their meetings often took place at Bloomsbury House, the residence of their leader, John, fourth Duke of Bedford. To such an extent was their tyranny carried, that the sovereign was frequently compelled, though reluctantly, to submit to their demands. The Marquis of Bath, and Lords Sandwich and Weymouth, were members of this political knot. The Marquis of Stafford, who died Oct. 26, 1803, was the last survivor of the Bloomsbury Gang.

BLORE-HEATH (Battle).—Fought at this place, in Staffordshire, during the wars of the Roses, Sunday, Sep. 23, 1459, when the Yorkists, commanded by the Earl of Salisbury, defeated a superior force of the Lancastrians, led by Lord Audley. Henry VI. and Queen Margaret were in the neighbourhood at the time of the encounter.

BLOTTING-PAPER.—Though no account of its first use is known to exist, it was probably introduced soon after the invention of paper. Fuller (circ. 1655) says, "Paper participates in some sort of the characters of the countrymen which make it: the Venetian being neat, subtile, and courtlike; the French light, slight, and slender; the Dutch thick, corpulent, and gross, not to say sometimes also *charta bibula*, sucking up the ink with the sponginess thereof." Blotting-paper is included amongst the items in an account of stationery supplied to the Exchequer and Treasury 1666—1668.

BLOWING MACHINES.—(*See* BELLOWS.)

BLOWPIPE.—The date of its invention has not been ascertained. It was first employed in the analysis of metals by Swab, in 1738, and its use in the science of mineralogy was demonstrated by Cronstedt in 1758. It has been improved by various men of science since his time.

BLUE COAT.—Blue was the colour in which the Gauls and ancient nations clothed their slaves; and a blue coat with a badge was, in the time of Shakespeare, the livery worn by servants of the nobility. A serving-man in one of Ben Jonson's dramas remarks, "Ever since I was of the blue order." Blue was also the colour worn by beadles; hence "blue-bottle" became a term of reproach for both. Doll Tear-sheet (Henry IV., pt. ii. act v. sc. 4) says to the beadle who is dragging her to prison, "I will have you as soundly swinged for this, you blue-bottle rogue!" Blue was also worn by apprentices, and even younger brothers; and a blue gown was the dress of ignominy for a harlot in the house of correction.

BLUECOAT SCHOOL.—(*See* CHRIST'S HOSPITAL.)

BLUE'S GAP (Battle).—Col. Dunning drove an inferior force of Confederates from their position at this place in Virginia, Jan. 6, 1862.

BLUE SPRINGS (Battle).—The Confederates were defeated by the Federals at this place in East Tennessee, with a severe loss in killed and wounded, and 150 prisoners, Oct. 10 and 11, 1863.

BLUE-STOCKING CLUBS.—The term, applied to a literary body, is referred by Mills (History of Chivalry) to a society formed in Venice in 1400. Boswell, in his "Life of Johnson," thus describes their origin:—"About this time (1781) it was much the fashion for several ladies to have evening assemblies, where the fair sex might participate in conversation with literary and ingenious men, animated by a desire to please. These societies were denominated 'Blue-Stocking Clubs;' the origin of which title being little known, it may be worth while to relate it. One of the most eminent members of those societies, when they first commenced, was Mr. Stillingfleet, whose dress was remarkably grave, and in particular it was observed that he wore blue stockings. Such was the

* Lord Campbell (Lives of the Chancellors, iii. 495), remarks:—"The name is spelt no fewer than eight different ways—'Jeffries,' 'Jefferies,' 'Jefferys,' 'Jeffereys,' 'Jefferyes,' 'Jeffrys,' 'Jeffryes,' and 'Jeffreys,' and he himself spelt it differently at different times of his life; but the last spelling is that which is found in his patent of peerage, and which he always used afterwards."

excellence of his conversation, that his absence was felt as so great a loss that it used to be said 'We can do nothing without the blue stockings;' and thus by degrees the title was established."

BOARD OF ADMIRALTY. — (*See* ADMIRALTY.)

BOARD OF CONTROL, established by Pitt's East India Bill, 24 Geo. III., sess. 2, c. 25 (May 18, 1784). Six privy councillors were appointed as commissioners to have control and superintendence of all the affairs of the British possessions in the East Indies. The statute was amended by 33 Geo. III. c. 52 (June 11, 1793), and subsequent acts. The first president was Lord Sydney, appointed Sep. 3, 1784. The Board of Control was abolished by 21 & 22 Vict. c. 106 (Aug. 2, 1858), when a council of India, consisting of 15 members and a secretary of state for India, was appointed.

BOARD OF GREEN CLOTH.—(*See* MARSHALSEA COURT.)

BOARD OF HEALTH.—The General Board of Health was established by 11 & 12 Vict. c. 63 (Aug. 31, 1845), for sanitary purposes, with the power of creating local boards in provincial towns. It was reconstructed by 17 & 18 Vict. c. 95 (Aug. 10, 1854), entitled "An Act to make better provision for the administration of the laws relating to public health." Sir B. Hall, created Lord Llanover June 27, 1859, was made president, with a salary of £2,000 per annum. By 21 & 22 Vict. c. 97 (Aug. 2, 1858), all the powers of the General Board of Health were transferred to the Privy Council. Further provision for the local government of towns and populous districts in this matter was made by 21 & 22 Vict. c. 98 (Aug. 2, 1858).

BOARD OF ORDNANCE.—(*See* ORDNANCE.)

BOARD OF TRADE AND PLANTATIONS.—Cromwell, in 1655, appointed his son Richard, with several lords of the council, merchants, &c., to consider by what means trade and navigation might be best promoted and regulated. Charles II. established a council to superintend and control the whole commerce of the nation, Nov. 7, 1660, and a Council of Foreign Plantations, Dec. 1 in the same year. The boards were united in 1672, but ceased altogether soon afterwards, their functions being transferred to the Privy Council. The board was re-established in 1695, undergoing many changes until 1782, when, by 22 Geo. III. c. 82, it was abolished. A committee of members of the Privy Council was ordered to be appointed for the consideration of all matters relating to trade and foreign plantations. The order of council issued March 5, 1784, was revoked, and a new committee, appointing the board as at present constituted, was nominated Sep. 5, 1786, Mr. R. B. Jenkinson, afterwards Lord Hawkesbury, being the first president.

BOAT RACE.—(*See* UNIVERSITY BOAT RACE.)

BOBER (Battle). — The Prussian General Blucher was driven from his position on this river, in Silesia, by the French army, commanded by Napoleon I., Aug. 21, 1813.

BOCCA TIGRIS, or BOGUE FORTS, at the entrance of the Canton river, having been attacked, two were taken by the English, Jan. 7, 1841. The Chinese having failed to carry out the provisions of a treaty by which a cessation of hostilities had been secured, the rest of the forts were captured Feb. 26 in the same year. A treaty was concluded here April 4, 1846; and the forts were again captured by the English in Nov., 1856.

BOCHETTA (Battle).—Prosper Adorno, Governor of Genoa, under Bona of Savoy, sister of Louis XI. of France, and Regent of Milan, during the infancy of Duke John Galeazzo, having, at the instigation of Pope Sixtus IV., thrown off his allegiance to that princess, defeated her army at the pass of the Bochetta, Aug. 7, 1478.

BODLEIAN, or BODLEYAN, LIBRARY (Oxford). — Humphrey, the good Duke of Gloucester, founded a library at Oxford; but it was destroyed, and in 1556 the desks and benches were ordered to be sold. The room remained empty until repaired and again devoted to the purposes of a library by Thomas Bodley, an eminent diplomatist, who had been sent on several embassies by Queen Elizabeth. On retiring from his employments in 1597, he undertook to restore this library. He endowed it richly, and presented it with a collection of books worth £10,000. It was opened Nov. 8, 1602, and alterations in the building were completed in 1606. The foundation-stone of a new library was, however, laid by Sir Thomas Bodley himself, July 19, 1610. It was not completed until 1613; after his death, which occurred Jan. 28, 1612. It was enlarged in 1634, has since received many additions, and contains upwards of 260,000 volumes of printed books and 22,000 volumes of manuscripts. Several catalogues have been published, the first by Dr. James, in 1605. Casaubon calls the Bodleian library a work rather for a king than a private man. A reading room was opened for the convenience of students in 1856.

BOEHMISCHBROD (Battle).—(*See* LIPPAU.)

BŒOTIA.—The early history of this political division of ancient Greece, included in the modern kingdom, is involved in obscurity. Thucydides represents it as having been inhabited by various barbarous tribes until about 60 years after the Trojan war, when the Bœotians, an Æolian people, expelled from their native seat by the Thessalians, settled in the country, at that time called Cadmeis, to which they gave the name of Bœotia, B.C. 1124. According to traditional accounts, Ogyges was King of Bœotia B.C. 1749, and Cadmus is said to have founded Thebes, B.C. 1550, or, according to other authorities, B.C. 1493. There is, however, little, if any, authentic information respecting the early period. The cities of Bœotia, with Thebes (*q.v.*) at their head, entered into a league, though the date of its formation is not known. The number is generally supposed to have been 10, or at the outside 14.

B.C.
608. War in Bœotia between the Mitylenæans and the Athenians.
519. Platæa withdraws from the Bœotian League.
507. The League joins the Peloponnesians and the Chalcidians against Athens.

B.C.
480. The Bœotians join the Persians.
456. Battle of Œnophyta (*q.v.*).
447. Battle of Coronea (*q. v.*).
395. The Bœotians take part against Sparta in the Corinthian war (*q. v.*).
394. The Spartans defeat the Bœotians, &c., at Coronea (*q. v.*).
387. Peace of Antalcidas (*q. v.*).
386. Bœotia regains Platæa.
378. Agesilaus and Cleombrotus invade Bœotia.
377. Agesilaus invades Bœotia a second time.
371. Battle of Leuctra (*q. v.*).

From this time the history of Bœotia is merged in that of Thebes. The Bœotian confederacy, that had long had only a nominal existence, was entirely dissolved by the Romans B.C. 170.

BOGESUND (Battle).—(*See* ASUNDEN, Lake.)

BOGOMILES, or BOGARMITÆ.—A sect of heretics that sprang up in Bulgaria early in the 12th century. The name is compounded of two Slavonic words,—*bog*, "God," and *miloui*, "have mercy on us," given to them from their custom of muttering prayers to themselves. They are said to have been Manichæans. They rejected images, discarded all mysteries in the sacraments and the historical books of the Old Testament. Their leader, one Basil, a monk, having been condemned by a council held at Constantinople in 1110, was burned alive by order of the Greek Emperor Alexius Commenus in 1118. The sect is said to have been in existence early in the 13th century.

BOGOTA.—(*See* SANTA FÉ DE BOGOTA.)

BOHEMIA (Germany) derives its name from the Boii (*q. v.*), its ancient inhabitants, who were expelled by the Slavonians. Borzivoi became its first duke in 891. The dukes were frequently nominated by the Emperor of Germany, and two of them, Wratislaus II., in 1086, and Ladislaus III., in 1158, received the title of king as a mark of personal honour, before Bohemia was definitively erected into a kingdom. (*See* PRAGUE.)

A.D.
480. (circ). The Czeches establish themselves in Bohemia.
630. Samo raises Bohemia into an independent state.
680. About this time the first advance in civilized arts is made by the Bohemians.
722. Libussa, granddaughter of Samo, weds Premislaus, who founds the dynasty which bears his name.
805. Bohemia is conquered by Charlemagne.
864. Borzivoi, a Bohemian chief, receives the sacrament of baptism.
1005. Boleslaus I., King of Poland, takes Cracow, and lays siege to Prague, which is delivered by Jaromir.
1039. War between Bretislaus I. and the Emperor Conrad, in which the former is defeated.
1061. On the death of Spitigneus II., Wratislaus II. unites Bohemia, Poland, Silesia, Lusatia, and Moravia into one kingdom.
1174. Ladislaus II., banished by his subjects, takes refuge in Lusatia, where he dies.
1176. A large number of the Vaudois immigrate into Bohemia.
1191. Conrad II. dies of the plague at the siege of Naples, and leaves the succession to his dukedom disputed.
1198. Premislaus Ottocar I. is made the first hereditary king.
1241-2. The Tartars overrun Moravia.
1262. Premislaus Ottocar II. is King of Bohemia and Austria, and soon obtains possession of Styria, Carinthia, and Istria, when his dominions extend from the Baltic to the Adriatic.
1272. Premislaus Ottocar II. refuses the imperial crown.
1278. Battle of Marchfield (*q. v.*).
1289. Marriage of Wenceslaus IV. to Judith, daughter of Rodolph of Habsburg. Part of Misnia and of Eger added to Bohemia.
1300. Wenceslaus IV. is elected King of Poland.
1306. Death of Wenceslaus V., the last sovereign of the house of Premislaus.
1327. Silesia is annexed to Bohemia.
1408. John Huss declares himself a disciple of Wycliffe.
1416. Rebellion of the Hussites (*q. v.*).
1420. Suppression of the Adamites (*q. v.*).
1438. Death of Sigismund, and extinction of the house of Luxemburg. The Hussites invite Cassimir, Prince of Poland, to succeed him, but the Crown falls to Albert of Austria.
1466. Pope Paul II. excommunicates George Podiebrad, the Hussite King of Bohemia, and sends an army against him, which is defeated at Tina.
1526. On the death of Louis I. the Bohemians confer the crown on Ferdinand I. of Austria, in whose family it has since remained.
1567. Maximilian II. abolishes the religious compacts which had restrained the spread of Protestantism.
1609. Rodolph II. establishes freedom of conscience in Bohemia.
1618. The commencement of the Thirty Years War.
1620. The battle of Prague (*q. v.*).
1648. The treaty of Münster puts an end to the Thirty Years War, and to the political existence of Bohemia, which is incorporated with the Austrian empire.
1744. Frederick II. (the Great) of Prussia, invades Bohemia.
1757, May 6. The battle of Prague (*q. v.*).
1762. The Prussians ravage Bohemia.
1772. A terrible famine devastates Bohemia.
1775. Insurrection of the peasantry.
1781. Joseph II. abolishes slavery.
1813. The Austrian army, under Schwartzenberg, assembles in Bohemia, preparatory to the campaign against Napoleon I.
1848, June 12. An insurrection breaks out at Prague.

BOHEMIAN BRETHREN.—(*See* MORAVIAN BRETHREN.)

BOII.—A Celtic people who migrated at an early period from Transalpine Gaul into Italy, where they assisted at the destruction of Melpum, B.C. 396. The Dictator Sulpicius defeated them in Latium B.C. 358, and they were, with the Etruscans, defeated at the Vadimonian Lake (*q. v.*), B.C. 283. They were

again opposed to Rome B.C. 225, and attacked the Roman colony of Placentia, B.C. 218. They destroyed the army of the Consul Postumius, numbering 25,000 men, B.C. 216, and assisted in the destruction of Placentia, B.C. 200. They were at length subdued by Scipio Nasica B.C. 191, who slew numbers of their people, and confiscated nearly half their lands, which became the seat of the colonies of Bononia, Mutina, and Parma, B.C. 183.

BOILING TO DEATH.—By 22 Hen. VIII. c. 9 (1531), this punishment was awarded to poisoners. The act related that one Richard Roose, otherwise called Coke, a cook in the Bishop of Rochester's diocese, had, by mixing poison in their food, caused the death of two and the illness of several persons. He was declared guilty of treason, and ordered to be boiled to death, without receiving benefit of clergy; and the like punishment was decreed for all, from that time, found guilty of any manner of poisoning. He suffered at Smithfield, April 5, 1532; and Margaret Dany, a maid-servant, was boiled to death at the same place, March 17, 1542, for "poisoning of three households, that she had dwelt in." This act was repealed by 1 Edw. VI. c. 12, s. 11 (1547). The punishment itself was common both in England and on the Continent, previous to the enactment of the statute of Henry VIII. The Chronicle of the Grey Friars of London (Camden Society) records a case at Smithfield of a man who was fastened in a chain and pulled up and down divers times, till he was dead. It appears to have been a common punishment for coining.

BOIS-LE-DUC (Holland) was founded in 1184 by Godfrey III., Duke of Brabant, in the midst of a forest. Having separated from the United Provinces during the 16th century, it was ineffectually besieged by Prince Maurice of Nassau in 1601 and 1603, but was at length taken by the Dutch in 1629. Besieged and captured by the French republican army Oct. 10, 1794, it was retaken by the Prussians under Bulow Jan. 25, 1814. The bishopric, founded in 1560 or 1561, and suppressed in 1629, was restored in 1853.

BOJACA, or BOYACA (Battle).—During the war of independence in South America, the Spaniards were defeated at this place, in New Granada, by Bolivar's army, Aug. 7, 1819.

BOJANO (Naples).—This town, which occupies the site of the ancient Bovianum (*q. v.*), has often suffered severely from earthquakes, and was nearly destroyed by one in 1805.

BOKHARA, or USBEKISTAN (Asia), the ancient Sogdiana, also called Transoxiana—though not, as has been asserted, by ancient writers—was conquered by the Saracens about 710 A.D. It was overrun by Zingis Khan in 1222; by Timour in 1361: and by the Uzbeg Tartars in 1505. Bokhara has remained under the sway of various khans of this race ever since. Col. Stoddart and Capt. Conolly, sent by the British Government on a mission to the khan in 1843, were murdered by him at Bokhara, the chief town of the khanat. Intelligence was received Aug. 1, 1844, from the enterprising traveller Dr. Wolff, who, in 1843, went to ascertain their fate, that they had been put to death in June or July of 1843. After undergoing a short imprisonment, Dr. Wolff was allowed to leave Bokhara, and he reached England in April, 1845. War having broken out between the khan and the Emperor of Russia, a Russian army entered the country, and having captured the fort Nias-Bek, garrisoned by the Kokanians, a people hostile to Bokhara, May 8, 1865, subsequently defeated the main body of the Kokanians, and slew their general, May 21. Taschkent, whither the defeated Kokanians had retired, was taken by assault June 27, 1865.

BOLIVIA (South America).—The provinces of Upper Peru, which had separated from the vicerovalty of Buenos Ayres, having by the victory of Ayacucho (*q. v.*), Dec. 9, 1824, secured their independence, were formed into a republic Aug. 11, 1825. The deputies decided in favour of separation, and upon calling the new state Bolivia, in honour of its liberator, Bolivar. This assembly separated Oct. 6, 1825, and a new congress met May 25, 1826. In 1836 slavery was abolished in Bolivia. Changes in the constitution took place in 1839, 1843, and the new system was not settled until 1848. A commercial treaty was concluded with England, Sep. 29, 1840. An attempt was made to assassinate the President Aug. 10, 1858.

BOLLANDISTS.—Herbert of Rosweyd, a Flemish Jesuit, having projected a series of lives of the Christian saints, his collection passed upon his death in 1629 to John Bolland, a native of the Netherlands, who established himself at Antwerp, and opened a correspondence with all parts of Europe towards the furtherance of the same object. With the assistance of other Jesuits he published in 1643 the first two volumes of the "Acta Sanctorum," to which he added three other volumes in 1658, and died in 1665. Among the most eminent of those by whom his labours were continued may be mentioned Gottfried Henschen, who died in 1681; Daniel Papebroch, 1714; Conrad Janning, 1723; Peter Bosch, 1736; Suyskens, 1771; Hubens, 1782; Dom Anselmo Berthod, 1788; and Joseph Ghesquière, 1802. On the suppression of the Jesuits in 1773 the Bollandists removed to the monastery of Candenberg, in Brussels, whence they removed in 1789 to the abbey of Tongerloo, in Brabant, where the 53rd volume was published in May, 1794, when the work was interrupted by the French occupation. In 1837 the Jesuits formed a new Bollandist society, by whom the 54th volume was brought out in 1845. M. Guizot states the number of lives contained in the 53 volumes published prior to the French Revolution is above 25,000.

BOLOGNA (Italy), the ancient Bononia, is said to have been founded by the Tuscans, and was called by them Felsina, a name used by Livy. It became a Roman colony, B.C. 189. A bishop's see was founded here at a very early period, and it was raised to an archbishopric by Gregory XIII. Dec. 10, 1582. Its university, the oldest in Italy, was established in 1116; the story of its foundation about 430, and its restoration by Charlemagne, being rejected by the best authorities. The Emperor Henry V. granted Bologna a charter in 1112,

and it was long governed by a podestà and consuls, being at the same time a zealous partisan of the Pope. A council held at Bologna in 1264 excommunicated the English barons who had rebelled against Henry III. John XXI. or XXII. sent Bertrand de Poiet, his legate, here in 1327, and though the city received him as its lord, he was, in 1333, violently expelled. Giovanni Visconti, temporal and spiritual lord of Milan, purchased Bologna in 1351, but it threw off the yoke of Milan in 1356; and, having surrendered to the Pope, Milan formally resigned its claim by treaty in 1359. Anarchy prevailed for some time, during which period Bologna frequently changed masters. It was taken by the papal army, and Julius II. made his triumphal entry Nov. 11, 1506; but it fell into the hands of the French in 1511, was besieged by the papal forces early in 1512, and Gaston de Foix compelled them to retire Feb. 7 in the same year. Julius II. had seized Bologna and its territory in 1506, and it was annexed to the papal dominions by the treaty of peace between Louis XII. and Pope Leo X. in 1514. The French king dying that year, his successor, Francis I., met the Pope at Bologna in 1515, and confirmed the acts of Louis XII. Its academy of painting was founded in 1712. Napoleon I. entered the city June 19, 1776; and it was made the capital of the Cispadane republic in 1797. It was occupied by the Austrians in 1814, and was formally restored to the papal government in 1815. An insurrection occurred Feb. 4, 1831, when a provisional government was proclaimed. The sovereignty of the Pope was, however, restored by Austrian interference. It rebelled again in 1848, and surrendered to an Austrian army, after a sanguinary struggle of eight days' duration, May 16, 1849. The Austrians quitted Bologna June 12, 1859; and a national assembly, soon after convened, threw off the papal yoke Sep. 7. A deputation sent to offer the legations to Sardinia was received by the king, and their request acceded to, Sep. 24 in the same year.

BOLSOVER (Derbyshire).—This village, at the compilation of the Domesday Book (*q. v.*) was the property of William Peveril, who is supposed to have founded the castle which was taken from the barons on behalf of King John by William de Ferrers, Earl of Derby, in 1215. In 1514 it was granted to Thomas Howard, Duke of Norfolk, on the attainder of whose son in 1547 it reverted to the crown. Edward VI. granted it to Lord Talbot, afterwards sixth Earl of Shrewsbury, whose descendants occupied it till the reign of James I., when it was sold to Sir Charles Cavendish, who completed the restoration of such portions as had fallen into decay in 1616. In 1644 it was taken by the parliamentary forces under Maj.-Gen. Crawford, and subsequently passed into the possession of the dukes of Portland, by whom it is still held.

BOMARSUND (Gulf of Bothnia). — This, the capital and principal of the Aland Isles, was captured by the French and English Aug. 14 and 15, 1854. Russia, by a convention annexed to the treaty of Paris of 1856, engaged not to restore the fortifications. (*See* ALAND ISLES.)

BOMB.—This invention is, by Strada, attributed to an inhabitant of Venlo, in 1588, in which year bombs were employed at the siege of Wachtendonk, in the Netherlands: whilst others, on the authority of Valturinus, contend that bombs were invented in the middle of the 15th century. The Moors are said to have used them at the siege of Baza in 1325. Condo (Arabs in Spain, iii. p. 231) speaks of "machines that cast globes of fire, with resounding thunders and lightnings, resembling those of the resistless tempest." At any rate, they did not come into general use till much later. The Turks employed them at the siege of Rhodes in 1522, the French at that of La Mothe in 1634.

BOMBAY (City) signifying "good harbour," was founded by the Portuguese soon after they obtained possession of the island of Bombay, in 1530.

A.D.
1676. A mint is established at Bombay.
1686. The seat of government is transferred from Surat to Bombay by the East India Company.
1688. Bombay is besieged by Aurungzebe, who is prevailed upon to withdraw.
1691. Bombay is visited by the plague.
1702. The plague commits great ravages.
1718, Dec. 25. The first church, of which the foundation-stone had been laid as early as 1685, is opened for the celebration of divine service.
1803. A fire commits much destruction.
1810. The *Minden*, 70-gun ship, is launched at Bombay.
1818. The cholera breaks out.
1827. A supreme Court of Justice established.
1833, Aug. 28. Power is given to the crown to establish a bishopric at Bombay.
1837. Elphinstone College is founded, and Bombay is made a bishopric. Steam communication with Suez is established.
1845, Oct. Nearly 300 houses are destroyed by fire.
1853, Feb. The first Indian railway, from Bombay to Tannah, is opened.
1865, July 1. A great commercial crisis, caused by speculations in cotton to supply the English market during the cotton famine (*q. v.*), reaches its height.

BOMBAY (Island).—The Portuguese first arrived off the coast of this part of India in 1508, and visited the island of Bombay in 1509, at which period it formed a dependency of the Mohammedan rulers of Guzerat.

A.D.
1530. The island of Bombay, &c., ceded by the Mongols to the Portuguese.
1534. Bombay is fortified by the Portuguese.
1612, Dec. The English obtain a footing at Surat.
1662, May 20. Bombay becomes an English possession by the marriage of Charles II. with Catherine of Braganza. The fleet arrives Sep. 18, to take possession, but the Portuguese governor refuses to give it up.
1664. Bombay is delivered to the English by the Portuguese.
1668. The island of Bombay is granted to the East India Company, on payment of the rent of £10 in gold, Sep. 30 in each year.
1674. A mutiny commences amongst the English troops.
1683. The mutiny again breaks out. Capt. Keigwin issues a proclamation declaring that the island belongs to the king, Dec. 27.
1687. Bombay is made a regency, with unlimited power over the Company's settlements.
1688. Aurungzebe invades the island.
(*See* INDIA.)

BOMBAY (Presidency).—The seat of the East India Company's government was removed from Surat to Bombay in 1686; and in 1687 Bombay was made a regency, with un-

limited power over the rest of the Company's settlements. In 1773 a measure was passed by which Bombay became subordinate to Bengal from Aug. 1, 1774. By 24 Geo. III. c. 25 (Aug. 13, 1784), a governor and a council were appointed for this presidency. (*See* INDIA.)

GOVERNORS OF BOMBAY.

1848.	Viscount Falkland.
1853.	Lord Elphinstone.
1860.	Sir G. R. Clerk, Bart.
1862.	Sir Bartle Frere.

BONA (Algeria).—This town, erected in the 7th century near the site of the ancient Hippo Regius (*q. v.*), was protected by a fort established by Charles V. in 1535. The French African Company had a depôt at this town from the time of Louis XIV. to 1789, and in 1805 the English received a permission, of which they did not avail themselves, to form a commercial establishment. Bona suffered severely from the plague in 1817. It was occupied by the French May 6, 1832.

BON-HOMMES, or GOOD MEN, an order of friars, brought into England, and established at Ashering, in Bucks, by Edmund, Earl of Cornwall, in 1283. Another house of the order was founded at Edington, in Wiltshire, in 1350. The Bon-hommes followed the rule of St. Augustine, and wore a blue habit.—The Paulicians called themselves Good Men, or Los Bos Homos.

BONIN, or ARCHBISHOP ISLANDS (Pacific).—This group was discovered by Capt. Beechey in 1827. (*See* PEEL ISLAND.)

BONN (Prussia), occupies the site of the ancient Bonna, a Roman station, the scene of the victory of the Batavi and Canninefates over the Romans, A.D. 70. Drusus threw a bridge over the Rhine at this place B.C. 11. It was frequently assailed, and even captured by the German tribes; and was ravaged by them in 355. Julianus recovered it and repaired its walls about 359. In 1320 it became the residence of the archbishops of Cologne. The Emperor Charles IV. was crowned here in 1346. The French, who had captured Bonn, were besieged and expelled Nov. 12, 1673; and regained possession in 1688. Frederick III., Elector of Brandenburg, took Bonn in 1689; and Marlborough, who laid siege to it May 3, 1703, gained possession May 16. The French republican army entered Bonn in 1794, its fortifications having been destroyed in 1717. Its academy, founded in 1777, was made a university in 1784. Prince Albert studied at this university in 1837. Napoleon I. suppressed it, but it was re-established on an extended scale Oct. 18, 1818. Bonn, seized by the French in 1802, was assigned to Prussia in 1814. Bonn is an ancient bishopric.

BONONIA (Battle).—At this place, on the Danube, near Widdin, Constantine I. defeated the Goths and Sarmatians A.D. 322.

BOODLES CLUB (London) was established as the *Savoir Vivre* Club, about 1764. Gibbon, the historian, was a member in 1772.

BOOK.—This word, derived from the Danish *bog*, the beech-tree, the inner bark of which was used in former times for writing material, has been applied to literary productions in general, whether in manuscript or in print. The ancients wrote upon wooden blocks, waxen and other tablets, until more flexible materials were made available for the purpose; and these they formed into rolls, or volumes, as they termed them when completed; and the parchment, or whatever material it happened to be, was rolled up, and placed upon the library shelf. This form was, however, gradually abandoned during the Middle Ages, when books consisted of several leaves, joined together, and enclosed in boards or covers. The binding was often very magnificent. The boards, covered with leather or even velvet, were occasionally decorated with precious stones. Gold and silver clasps were also used. Shakespeare writes—

> "That book in many's eyes doth share the glory,
> That in gold clasps locks in the golden story."

In early times almost fabulous prices were paid for books. At the Reformation the Bible and other works were chained to desks in churches, that the people might have access to them. The custom is said to have originated from an act of Convocation in 1562, ordering that Nowell's Catechism, the Articles, and Bishop Jewell's Apology, should be joined in one book and taught at the universities and educational establishments, and in the cathedral churches and private houses of the kingdom. The custom has, however, been traced as far back as to Sir Thomas Lyttleton, who, by his will, dated 1481, ordered some of his works to be chained in different churches. St. Bernard, who died in 1153, alludes, in one of his sermons, to some such custom. Dictionaries were also chained to desks in educational establishments. Walton's Polyglott, fol. 1657, was the first book published in England by subscription; Tonson's folio edition of "Paradise Lost," in 1688, was the next; and Dryden's Virgil, fol. 1697, the third. By 8 Anne c. 19, s. 4 (1709), any bookseller or printer setting what was conceived to be too high a price upon a book, might, after March 25, 1710, on complaint being made to the Archbishop of Canterbury, the Lord Chancellor, and some other high functionaries mentioned in the act, be compelled to charge a price fixed by any of them, upon pain of forfeiting £5 for every book sold at a higher rate. This act was repealed by 12 Geo. II. c. 36, s. 3 (1739).

BOOK CENSORS.—Many centuries before the introduction of printing, authors submitted their works to their superiors, before venturing to put them into circulation, and a regular system of censorship was established by the Inquisition. Two books printed at Cologne in 1478, were issued with the approbation of the university censor; and the "Nosce Teipsum," printed at Heidelberg in 1480, bore

the approving testimonies of four persons. A mandate of Berthold, Archbishop of Mayence, dated 1486, appointing a book censor, is still in existence. Alexander VI. in 1501 issued a bull prohibiting the publication of books that had not been submitted to the censor; and the council of the Lateran in 1515 ordered that no books should be printed excepting those which had been inspected by ecclesiastical censors. By the 51st of Queen Elizabeth's injunctions, in 1559, no person was allowed to print any book or paper without a licence from the council or ordinary. The Star Chamber, June 23, 1586, published ordinances for the regulation of the press. The Long Parliament, which abolished the Star Chamber, made an ordinance, June 14, 1643, prohibiting the printing of any order or declaration of either house, without order of one or both houses; or the printing or sale of any book, pamphlet, or paper, unless the same were approved and licensed by such persons as the House should appoint. A more severe enactment followed, Sep. 28, 1647; and from that time various regulations were made on the subject till 1695, when the censorship in this country ceased, much to the displeasure of William III. and his ministers.

BOOK-KEEPING.—The system of double entry, called Italian book-keeping, had its rise amongst the mercantile cities of Italy in the 15th century. Lucas de Burgo's algebraic work, published at Venice in 1494, and Luke's work on the subject, published in 1495, are the earliest known to exist. The first English book on this subject is Hugh Oldcastle's treatise, published in 1543. James Peele published a work on book-keeping in 1553; and a new and augmented edition of Oldcastle's treatise, by John Mellis, appeared in 1588. Gotlieb published a work on book-keeping at Nuremberg in 1531.

BOOK OF SPORTS.—This title was given to a proclamation issued at Greenwich by James I., May 24, 1618, sanctioning different recreations after divine service on the Sunday. It was intended only for Lancashire. As it proved very offensive to the Puritans, no clergyman was compelled to read it. Amongst the recreations mentioned are dancing, archery, leaping, vaulting, May games, Whitsun-ales, morris-dancers, and setting up of Maypoles. The Sabbatarian controversy having been revived, Charles I. (Oct. 18, 1633) ratified and published his father's declaration. Some of the clergy refused to read it, for which one of them was deprived and excommunicated by the High Commission Court in 1637. In 1643 it was ordered by Lords and Commons that the Book of Sports should be burned by the common hangman in Cheapside, and other public places.

BOOKS (Privilege for Printing).—The oldest privilege known is that of Henry Bishop, of Bamberg, for a missal, set forth April 23, 1490. The first Venetian privilege is dated 1491, and another of 1492 is in existence. The first Milanese is dated 1495; Papal, 1505; French, 1507; and English, 1510, for "The History of King Boccus." By 1 Rich. III. c. 9 (1484), aliens were allowed to import books and manuscripts. This act was, however, repealed by 25 Hen. VIII. c. 15 (1534). In 1538 an order was issued respecting the printing of Bibles, and in 1542 the privilege was granted to one person for four years. The last patent of the kind, commencing Jan 21, 1830, for printing the English Bible and Prayer-Book, was conferred by Geo. IV. upon Strahan, Eyre, & Spottiswoode for a term of 30 years, expired Jan. 21, 1860.

BOOKS BURNED.—This mode of dealing with objectionable doctrines was practised both in ancient and modern times. Jehoiakim burned the roll of Jeremiah (Jer. xxxvi. 23) B.C. 605; and persons at Ephesus, who used curious arts, brought their books together and burned them before all men (Acts xix. 19) A.D. 57. The writings of Arius were condemned to be burned during the reign of Constantine I. The Church of Rome has, both by the decrees of councils and of popes, caused innumerable works, and in some cases their authors, to be committed to the flames. Wycliffe's bones as well as his writings were condemned to be burned by the Council of Constance (being the 17th General Council), in 1415; and a convocation at Oxford in 1410 condemned and burned his works. Cardinal Wolsey went in procession to St. Paul's, May 12, 1521, for the purpose of having the works of Luther consumed. Several works were burned by order of the Parliament in the time of the Commonwealth.

BOONEVILLE (Battle).—Gen. Lyon defeated the Confederates at this town in Missouri, June 18, 1861.

BOOT (Torture).—This mode of torture, in which the legs were confined in a wooden frame, the sides being driven together with wedges and mallets until the limb was crushed, was introduced into Scotland in the 16th century, and was employed in 1666 and the following years to extort confessions from the Covenanters. It was sometimes inflicted by encasing the leg in a tight wet stocking of parchment, which was then shrunk by the application of heat.

BOOTAN.—(*See* BHOTAN.)

BOOTHIA FELIX (North America) was discovered by Sir J. Ross in 1830, and named after Sir Felix Booth, who furnished a large sum of money for the purposes of the expedition.

BOOTS.—The Normans wore short boots, and in the time of William II. peak-pointed boots were in fashion. In the wardrobe accounts of Edward II., the following passage occurs:—"For six pairs of boots, with tassels of silk and drops of silver gilt, price each pair 5s., bought for the king's use." Planché says that boots reaching to the middle of the thigh, and turned over with straps, like modern top-boots, were worn in the time of Richard III. Short boots were worn by ladies in the 12th century. The Hessian, Blucher, and Wellington boots for gentlemen, and the Balmoral for both sexes, are the principal novelties of the kind introduced during the present century.

BORAX.—This alkaline salt, known to the Arabs for many centuries, and named by Agricola (1494—1555) *chrysocolla*, has from time immemorial been imported into Europe from

Persia, Tartary, India, and Ceylon. In 1702 Homberg discovered boracic acid in borax, the nature of which was further revealed by Stahl in 1723, by Lemery in 1728, and by Geoffroy in 1732. In 1777 boracic acid was discovered in several lakes of Tuscany. It was decomposed by Sir H. Davy in 1807, and by Gay-Lussac in 1808. John Rose used borax in the composition of varnish for porcelain in 1822. (*See* BORON.)

BORDEAUX (France), the ancient Burdigala, the metropolis of Aquitania Secunda, rebuilt by the Romans after a fire, A.D. 261, was taken by Adolphus, King of the Goths, in 412; recovered by Clovis I. in 508; devastated by the Saracens in 529; and suffered repeatedly from the ravages of the Danes. It was made an episcopal see in 314, and became an archbishopric. The modern town was rebuilt by the dukes of Guienne at the commencement of the 10th century. Henry II. obtained Aquitaine by marriage in 1151, with Eleanor, daughter of William V. of Aquitaine, the divorced wife of Louis VII. of France; and on his accession to the English crown, in 1154, Bordeaux and the remainder of the duchy became English possessions. Councils were held at Bordeaux in 384, in 670, in 1080, in 1214 or 1215, and April 18, 1255. In 1451 Bordeaux submitted to Charles VII., and though Earl Talbot restored the authority of the English, Oct. 23, 1452, it was besieged and taken by the French Oct. 17, 1453, and has since formed part of France. Richard II., son of the Black Prince, was born here in Feb., 1366. The Parliament of Bordeaux was established by Louis XI. (1461—1483.) Its university, founded by Eugenius IV. in 1441, received great privileges from Louis XI. in 1473. Bordeaux suffered greatly during the civil and religious wars in France. An academy was founded here in 1781. The Société Philomathique, numbering about 600 members, and founded here in 1808 for the advance of science, art, industry, and public instruction, is said to be the Society of Arts of France. Under its auspices 11 general art exhibitions have taken place, the last of which was held at Bordeaux in 1865, in a wooden building constructed for the purpose.

BORDEAUX (Treaty). — Concluded March 25, 1357, establishing a truce of two years between England and France. It was prolonged till Midsummer, 1359.

BORGITES, or CIRCASSIANS.—The second dynasty of the Mamelukes in Egypt descended from a Circassian captive named Barcok, who, in 1381, on the deposition of the last sultan of the Baharites, obtained the sovereignty. Twenty-three sultans of this dynasty, which lasted 135 years, reigned. The last was hanged at the gate of his capital, April 23, 1517, by order of Selim I.; and the Mamelukes were expelled and the authority of the Ottoman Turks established.

BORNEO (Indian Archipelago), called by natives Bruné, is, excepting Australia, the largest island in the world. It was first visited by Lorenzo de Gomez in 1518; and by Pigafetta, with Magalhaen's expedition, in 1521. In addition to the Portuguese, the Spaniards, English, French, and Dutch endeavoured to form establishments in different parts of this island.

A.D.
1598. Oliver Van Noort, the first Dutchman who visited the country, reaches Borneo.
1604. The Dutch begin to trade at Succadana.
1608. The Dutch at Batavia endeavour to enter into a commercial treaty with the ruler of Sambas.
1609. A treaty is concluded by the Dutch with the ruler of Sambas, and they establish a factory.
1623. The Dutch abandon their settlement at Succadana.
1707. The English factory is destroyed.
1763. The English take possession of Balambangan.
1774. The English endeavour to establish a factory at Passir, and fail.
1775. Feb. 24. The garrison at Balambangan are killed by pirates.
1776. The Dutch establish a factory at Pontianak.
1780. Part of the W. coast is ceded to the Dutch.
1786. The Dutch, in alliance with the Sultan of Pontianak, destroy Succadana.
1787. The sovereignty of the S. coast is granted to the Dutch.
1812. An English expedition against Sambas fails.
1813. July 3. Sambas is captured by the English.
1818. The Dutch, who had been expelled by the English during the war, return.
1839. Aug. Sir James Brooke arrives at Borneo.
1841. Sir James Brooke is made Rajah of Sarawak, by treaty with the native ruler. (*See* SARAWAK.)
1846. The Dutch colonies in Borneo are formed into a special government, by a decree of the Dutch governor.
1848. Labuan is formed into an English colony. (*See* LABUAN.)
1855. Oct. 18. Consecration of Francis J. McDougall, the first Bishop of Labuan.

BORNOU (Central Africa), called by Heeren "a great empire," was first explored by Denham and Clapperton, sent out by the English Government, who reached Kouka, the capital, Feb. 17, 1822. It has been more recently explored by Richardson, Barth, and Overweg.

BORODINO (Battle).—During the invasion of Russia, Napoleon I. attacked the whole Russian army intrenched at this village, Sep. 7, 1812. After a sanguinary engagement, both armies encamped on the field of battle, but the Russians withdrew during the night. The killed and wounded amounted to 80,000 men. In 1839 the Russians erected a mausoleum on this battle-field.

BORON. — This olive-coloured substance, discovered by Sir H. Davy in 1807, was examined by Gay-Lussac and Thenard in 1808.

BOROUGH, or BURGH, is supposed to have been first applied to a tithing or collection of 12 families, bound together as sureties for one another. The term was afterwards applied to a castle, then to the group of houses built beneath the shelter of its defences, next to a walled town, and is now used to designate cities or towns that possess the privilege of sending representatives to the House of Commons. Guizot asserts that it was not until the 11th century that boroughs assumed any important position in history.

BOROUGH-BRIDGE (Battle).—Edward II. defeated the Earl of Lancaster and the confederated barons, with their Scottish allies, at this place, in Yorkshire, Tuesday, March 16, 1322. The Earl of Lancaster, who fled, was afterwards taken prisoner. He was tried by a military council, and executed at Pontefract, Tuesday, March 23.

BOROUGH-ENGLISH.—A custom, so called,

as some assert, because it originated in England, existing in certain boroughs, by which the youngest son inherited, to the exclusion of his elder brothers, the father's tenements in the borough, in case the latter died intestate. It is a species of burgage tenure, which at one time prevailed to a great extent in this country, and still exists in some places. The best authorities regard it as a remnant of the pastoral state of the tribes from which we claim descent. Amongst them the elder sons invariably took their portion, quitted the paternal roof, and sought new habitations, whilst the younger son, who remained at home, naturally became the heir.

BORRISOW (Battle).—During the retreat of the French from Moscow, Portonneaux's division, consisting of 8,000 men, surrendered to the Russians at this place, Nov. 27, 1812, and on the following day a drawn battle was fought between the French and the Russians.

BORSIPPA (Chaldæa).—The remains of Birs-Nimroud at this place, dating, it is believed, from circ. B.C. 2234, consist of a pyramidal structure about 153 feet high, and divided into seven stories. It was rebuilt by Nebuchadnezzar (B.C. 605—B.C. 561).

BOSCOBEL (Shropshire).—Charles II., after his defeat at the battle of Worcester (*q. v.*), Wednesday, Sep. 3, 1651, obtained shelter in this farm-house, the residence of William Penderell. In order to escape the parliamentary troopers, he quitted it Friday, Sep. 5, hiding all that day in a large oak, whence he could see and hear his pursuers. He finally left Boscobel Sunday, Sep. 7, and after a series of romantic escapes, embarked at Brightholmstone, the modern Brighton, Oct. 15, arriving at Fécamp the following day. The Boscobel Tracts, containing contemporary records of this period in the "Merry Monarch's" life, were first published in 1662. The tree in which he found shelter was afterwards called the "Royal Oak."

BOSCOI, or Grazers, an order of monks originating in Mesopotamia, and afterwards numerous in Palestine, who dwelt in mountains or deserts, feeding on herbs and grass, and dispensing almost entirely with the use of clothes. They were noticed by Sozomen in the 5th century.

BOSNIA (European Turkey).—Part of the ancient Pannonia, long tributary to Hungary and Servia, was erected into a kingdom in 1376. Its monarch was defeated by the Turks in 1389. Bosnia became tributary to Turkey in 1463, and was annexed in 1522. Austria obtained a portion of Bosnia by the treaty of Passarowitz, July 21, 1718. This was, however, recovered by the Turks in 1738. Bosnia has been the scene of numerous insurrections; and frequent quarrels have occurred between the Christian and the Moslem population. A revolt which occurred in 1851 was suppressed by Omar Pasha.

BOSPORUS (Asia).—This ancient kingdom on the Cimmerian Bosporus was a great corn-growing country, and for many years served as a granary to Greece. Gibbon calls it "the little kingdom of Bosporus, composed of degenerate Greeks and half-civilized barbarians." It is supposed to have been a Milesian colony, and arose out of the old Greek settlements. The history of the kingdom cannot, however, be traced with accuracy, and much uncertainty prevails respecting the dynasties compiled from the works of the ancient writers.

B.C.
480. The kingdom of Bosporus is founded.
310. On the death of Parysades the succession is contested by his sons Satyrus and Eumelus; Satyrus defeats his brother, but dies in the battle; so the younger brother, Prytanis, reigns in his stead.
309. Eumelus murders Prytanis and all his adherents, and succeeds to the crown.
108. Bosporus is ceded to Mithridates VI. of Pontus.
86. Bosporus revolts from Mithridates VI.
63. Pompey reduces Bosporus to a Roman province, and makes Pharnaces, son of Mithridates VI., its king.
47. Julius Cæsar defeats Pharnaces, and gives Bosporus to Mithridates of Pergamus, who soon afterwards dies, and his territory is seized by Asander.
14. Agrippa gives Bosporus to Polemon, King of Pontus.
A.D.
49. Mithridates Achemenides, King of Bosporus, revolts against the Romans, who depose him.
258. Bosporus is captured by the Goths.
545. The Turks take the city of Bosporus.

BOSTON (Lincolnshire) is supposed to have been built upon the site of the monastery of Icanhoe, founded by St. Bodolph in 654, and destroyed by the Danes in 870. Boston became important as a commercial town in the 13th century, was made a staple for wool, &c., by Edward III. in 1357, and was incorporated on the dissolution of the monasteries, of which there were several in the town and neighbourhood, by Henry VIII. The church of St. Bodolph was founded in 1309, and its tower, 290 feet in height, forms a well-known landmark. The grammar school was founded in 1554, the Bluecoat school in 1713, the national school in 1815, and the market-house was erected in 1819. The bridge was commenced in 1802, and completed in 1807.

BOSTON (United States).—Founded in 1630 by colonists from Charlestown. King's chapel was opened for the service of the Church of England in June, 1689, and Trinity church in 1735. The American rebellion commenced at this place, where the cargoes of tea were thrown into the sea, Dec. 16, 1773. The English

forces held possession of Boston in 1775. They evacuated it by the terms of a capitulation, signed March 17, 1776. Slave riots occurred June 24, 1854; and a religious revival in 1858.

BOSWORTH FIELD (Battle). — The last battle between the houses of York and Lancaster was fought near Market Bosworth, in Leicestershire, Monday, Aug. 22, 1485. Richard III., who displayed great gallantry, having been betrayed by Sir W. Stanley and the Earl of Northumberland, was defeated and slain, and the Earl of Richmond proclaimed king, under the title of Henry VII. The crown worn by Richard in the battle was placed upon his head. The line of the Plantagenets terminated with Richard III., and that of the Tudors commenced with Henry VII., who sought to strengthen his title by a marriage with Elizabeth of York, daughter of Edward IV., which took place Jan. 18, 1486.

BOTANICAL GARDENS.—Sylvaticus formed a botanical garden for medicinal purposes at Salerno in 1309; a medical garden was established at Venice in 1333; Lorenzo de Medici established one at Marburg in 1530, and one at Padua in 1533. The first public botanical gardens were established, one at Pisa, by the university, and another at Padua, in 1545. A professorship of botany was founded at Padua in 1533. The first botanical garden in France was established at Montpellier in 1558; and the Jardin des Plantes, at Paris, was founded in 1610. The first botanical garden in England was formed at Oxford in 1632. Botanical gardens were established at Leyden in 1577, at Leipsic in 1580, at Jena in 1629, at Upsal in 1657, at Edinburgh in 1680, at Carlsruhe in 1715, at Kew in 1730, at Schönbrunn in 1753, at Madrid in 1755, at Cambridge in 1761, at Calcutta in 1768, at Coimbra in 1773, at St. Petersburg in 1785, at Dublin in 1790, at Ghent in 1797, at Moscow in 1802, at Liverpool in 1803, at Ceylon in 1811, at Pesth in 1812, at Chiswick in 1822, at Birmingham in 1831, and at Montreal in 1832. The garden at Chelsea was commenced in 1673, and enclosed in 1686; and the gardens in the Regent's Park were opened in 1839.

BOTANY.—Theophrastus, one of Aristotle's pupils, left the earliest existing treatise on botany, B.C. 322. The elder Pliny and Dioscorides, in the 1st century of our æra, wrote more fully on the subject. The Arabians began to cultivate the study of botany at the commencement of the 9th century, and Avicenna, who died in 1037, was long considered a great authority. The science was revived in the 16th century, and Otto Brunfels, of Strasburg, published his "Herbarum Vivæ Eicones" in three volumes folio, with 238 woodcuts of plants, in 1530. Ruel of Soissons published his treatise "De Natura Stirpium," at Paris, in 1536; and Leonard, amongst other works, his "Commentaries on the History of Plants," at Basel, in 1542. Dr. Turner published "The New Herbal," in three parts, in 1551, 1562, and 1568 successively. Columna, in his "Ecphrasis," a history of rare plants, published at Rome, in two parts, in 1606 and 1616, laid down the true basis of the science, by establishing the distinction of genera, which Gesner, Cæsalpin, and Joachim Camerarius had before conceived. Robert Morison, of Aberdeen, published works on botany, in 1669, 1672, and 1678; and although allowed to have benefited greatly from the labours of his predecessors, he is generally considered the "founder of classification." Grew, in 1671, and Malpighi, first directed attention to the anatomy of plants. Rivinus, in 1690, is said to have anticipated some portions of the system of Linnæus, who produced quite a revolution in botany by the publication, in 1735, of his "Systema Naturæ." Since that period the science of botany has advanced rapidly.

BOTANY BAY (Pacific), on the E. coast of Australia, was discovered by Capt. Cook in 1770, and thus named by a naturalist in the expedition, from the number of plants growing on its shores. A monument to the memory of La Perouse was erected in 1825.

BOTHWELL BRIDGE (Battle).—The Scottish Covenanters were defeated at this place, in Lanarkshire, June 22, 1679, by the Duke of Monmouth.

BOTTLE CONJUROR.—An immense crowd was attracted to the Haymarket Theatre, Monday, Jan. 16, 1749 (O. S.), an announcement having been made that a person would play on a common walking-cane the music of every instrument then in use, get into a quart bottle, and whilst there sing several songs, at the same time permitting any spectator to handle the bottle, and perform other remarkable feats. The performer did not appear, and some person behind the curtain cried out that if the audience would remain there till the next evening, instead of going into a quart he would get into a pint bottle. Only a small portion of those who had assembled could obtain admission; a riot ensued, and the interior of the theatre was destroyed. The real history of the imposture was never discovered, but it is supposed to have been the result of a wager.

BOTTLES.—Vessels for containing liquids were made of leather, pottery, or metal, and, according to some authorities, of glass, by ancient nations. Glass bottles, with handles, were found in the ruins of Pompeii, which was overwhelmed Aug. 23, A.D. 79. Beckmann says the use of bottles amongst modern nations commenced in the 15th century. Stone and earthen bottles were first subjected to duty by 6 & 7 Will. III. c. 18 (1695); and half the duties on glass wares, and the whole duty on stone and earthen bottles, were repealed by 9 & 10 Will. III. c. 45 (1698).

BOUCHAIN (France).—This fortress was taken from Marshal Villars by the Duke of Marlborough, after a siege of 35 days, Sep. 14, 1711. The French recovered possession Oct. 10, 1712.

BOUILLON (Belgium).—This town, with the district of the same name, of which it forms the capital, was sold to the Bishop of Liège in 1095, by its ruler Godfrey, previous to his departure for the Crusades (*q. v.*). Seized in 1482 by William de la Marck, it was restored to the bishopric by Charles V. in 1521, but was retaken in 1548 by Robert de la Marck, whose descendants assumed the title of dukes of Bouillon. The town was occupied by the

French from 1552 till 1559, and from 1676 till 1814, when it was annexed to the kingdom of Holland. By the revolution of 1830 it was separated from the Netherlands, and in 1837 was annexed to Belgium.

BOULOGNE (France), the ancient Gesoriacum, also called Bolonia and Bononia, is supposed to have been the port at which Claudius embarked for Britain, A.D. 42. The Roman fleet was stationed here in 287. It was sacked by the Danes in 882, and was frequently assailed during the Middle Ages. The seat of this ancient bishopric was removed from Térouane to Boulogne in 1553. The see was suppressed in 1801. Boulogne was annexed to Burgundy in 1435, and to France in 1447. Henry VII. besieged it in 1492. Henry VIII. took it, after a siege of six weeks, Sep. 14, 1544. The French made several attempts to regain possession, and having failed, purchased it from Edward VI. for 400,000 crowns, March 24, 1550. Napoleon I. assembled his forces here for the invasion of England in 1801. Nelson attacked the flotilla Aug. 15, 1801, but without obtaining any decisive results. On the renewal of a threat of invasion in 1804, and in subsequent years, much damage was done by our cruisers. Louis Napoleon, with 40 or 50 followers, landed here early in the morning, Aug. 6, 1840, in his second attempt to raise an insurrection against the Orleans dynasty, and having failed, was taken prisoner whilst retreating to the steam-vessel which had brought him and his colleagues from England. Napoleon III. visited this town, accompanied by the King of the Belgians and his son, Sep. 3, 1854. The King of Portugal arrived Sep. 4, and Prince Albert Sep. 5. A grand mimic battle was fought on a plain between Boulogne and Calais, Sep. 8, after which Prince Albert returned to England. The statue of Dr. Jenner, the discoverer of vaccination (*q. v.*), was inaugurated Sep. 11, 1865.

BOULOGNE (Treaty).—Concluded between Henry VIII. and Francis I., Oct. 28, 1532. The contracting parties agreed to provide an army of 80,000 men to resist the Turks, who were then ravaging Hungary, but stipulated "that they should take the road which seemed best to them."

BOUNTY.—(*See* MUTINY OF THE BOUNTY.)

BOURBON (France).—Formerly the capital of the Bourbonnois, frequently called Bourbon l'Archambault, received the name of Bourges-les-Bains in 1789. Pepin took it in 759, and bestowed the town and the surrounding territory upon one of his followers, from whom, through the heiress Beatrice of Burgundy, married to Robert, Count of Clermont, son of Louis IX., in 1272, the Bourbon family is descended.

BOURBON (Indian Ocean).—This island, called Ile de Bourbon, was discovered in 1542 by a Portuguese mariner, after whom it was called Mascarenhas. It was then uninhabited; but the French formed a settlement in 1642, and in 1649 changed its name to Bourbon. It has since borne the following names: Réunion, Ile Buonaparte, and Napoleon. It was taken by the English July 8, 1810, and restored to France at the general peace in 1815.

BOURBONS.—Henry IV., of Navarre, who succeeded to the throne on the extinction of the house of Valois, July 31, 1589, was the first Bourbon sovereign of France. His father, Antony of Bourbon, Duke of Vendôme, by his marriage with Jeanne d'Albret in 1548, became King of Navarre in 1555. He was descended through the younger branch—the elder having become extinct on the death of the Constable of Bourbon, May 6, 1527—from Robert of Clermont, youngest son of Louis IX. By his marriage in 1272 with Beatrice of Burgundy, Robert of Clermont obtained the Bourbonnois, the Charlerois, and the lordship of St. Just. His son, Louis I., was created Duke of Bourbon by Charles IV. of France in 1327. The Bourbons reigned in France from the accession of Henry IV., July 31, 1589, till the death of Louis XVI., Jan. 21, 1793. They were restored in the person of Louis XVIII., April 10, 1814; expelled March 19, 1815, during the Hundred Days; and again restored, after the fall of Napoleon I., July 8, 1815. The rule of the elder branch ceased on the abdication of Charles X., Aug. 2, 1830. Louis Philippe, of the Orleans, or younger branch of the Bourbons, then succeeded to the throne, and their line ceased to reign in France on his abdication, Feb. 24, 1848. In 1865 the family numbered 73 persons, 50 of whom, including the ex-royal family of Naples, were in exile.

BOURBONS (Collateral Branches). — The Condé branch took its title from Condé, in Hainault, which came into the possession of the Bourbon family by the marriage, in 1487, of Francis of Bourbon, Count of Vendôme, with Mary of Luxemburg, heiress of St. Paul, Enghien, Soissons, and Condé. Their son Charles had several children, and one of these, named Louis, assumed the title of Prince of Condé. This line became extinct in 1830.—The later Orleans branch sprang from Philip, second son of Louis XIII., made Duke of Orleans in 1660. A decree was issued during the French Revolution (Sep. 15, 1792), authorizing the Duke of Orleans to change his name for that of Egalité.—The Spanish Bourbons are descended from Philip, Duke of Anjou, grandson of Louis XIV., who was made King of Spain under the title of Philip V. in 1700. The Neapolitan branch is descended from Charles, third son of Philip V. of Spain, made Duke of Parma in 1731, and King of Naples in 1735.—The Conti, a branch of the Condé, is descended from Louis, the first Prince of Condé, who married Eléonore de Roye, Dame de Conty or Conti, by whom he had two sons, Henry of Bourbon, Prince of Condé, and François, who took the title of Prince of Conti.

BOURGES (France), the ancient Avaricum, afterwards called Bituriges and Biorgas, whence the present name is derived. Cæsar captured it B.C. 52, when it is said that only 800 out of 40,000 inhabitants escaped. It was captured by the Goths A.D. 475, and by Clovis I. in 507. It suffered greatly from the ravages of war. The bishopric was founded in the 3rd century. It was made an archbishopric. The occupant of the see was termed Patriarch and Primate of Aquitaine. Councils were held at this town in 473; Nov. 1, 1031; Dec. 25, 1145;

in 1225; Sep. 13, 1276; in April, 1280; Sep. 19, 1286; in 1336; Aug. 26—Sep. 11, 1440; and March 21, 1528. Louis XI., who was born here, founded its university, which was suppressed at the Revolution. The Huguenots seized the place in 1562, but were driven out Sep. 1 by the royal troops.

BOURIGNONISTS.—The followers of Antoinette Bourignon de la Porte, a fanatic born at Lille, in Flanders, Jan. 13, 1616. Bayle says she was so ugly that it was debated for some days after her birth, by her family, whether she should be stifled as a monster. She took the habit and order of Augustine in 1658; and travelling in Holland, France, and Scotland, taught that religion consists in internal emotions. She published a great many works. Driven from place to place, she died at Franeker, in Friesland, Oct. 30, 1680; and her tenets obtained a temporary popularity amongst the Scotch. A minister was deposed at Aberdeen in 1701 for holding these tenets.

BOURNEMOUTH (Hampshire).—The National Sanatorium for Consumption and Diseases of the Chest was founded at this watering-place in 1855; and the foundation stone of the Herbert memorial was laid Sep. 18, 1865.

BOUTS RIMÉS.—"Rhymed ends" were supplied, which were amplified into complete lines by the person undertaking the task, a pastime invented by the French poet Dulot, in 1648. It became very fashionable, and was much used by ladies to test the tact and devotion of their lovers. It is stated that Campbell wrote his poem of "Lochiel," which was first published in 1802, after this strange fashion.

BOVIANUM (Italy).—This Samnite city, besieged by the Romans without success B.C. 314, was taken by them B.C. 311, again B.C. 305, and again B.C. 298. It was an important military position, and suffered in many succeeding wars. Bovianum was destroyed by an earthquake in the 9th century, and the modern Bojano occupies its site.

BOVINES or BOUVINES (Battle).—Fought, Sunday, July 27, 1214, at the bridge of Bouvines, where Philip II. (Augustus), with inferior numbers, defeated the army of Otho, Emperor of Germany, and his allies. The Counts of Flanders and Boulogne, and William, Earl of Salisbury, were made prisoners.

BOWIDES.—A dynasty established in Persia A.D. 932. There were 17 kings of this line, which lasted for 127 years, and became extinct in 1059.

BOW ISLAND (Pacific).—One of the coral islands discovered by Bougainville in 1768. He called it La Harpe, and it received its present name from Capt. Cook, who landed upon it in 1769.

BOWLS.—This game, which was unknown to the classical ancients, is believed to have originated in England at an early period. Half-bowl, played with a hemispherical ball, was prohibited by Edward IV. (1461—1483); and bowls were forbidden by 33 Hen. VIII. c. 9 (1541), which was repealed by 8 & 9 Vict. c. 109, s. 1 (Aug. 8. 1845).

BOWYER FORT (United States), near Mobile, was captured by the English troops, Feb. 11, 1815. This was the last encounter during the American war, as the news of the conclusion of peace reached the belligerents the next day.

BOXING.—(*See* PUGILISM.)

BOXTEL (Battle).—The republican army under Pichegru having wrested Boxtel from the Dutch, Sep. 14, 1794, the Duke of York ordered Gen. Abercrombie to advance during the night with the army of reserve. In the morning of Sep. 14, he was engaged with the French, and was compelled to retire. On this occasion, the Duke of Wellington, then commanding the 33rd Regiment, first came under fire. By a well directed movement he checked the advance of the republican troops, and inflicted such chastisement upon them that the further retreat was effected without molestation.

BOYACA.—(*See* BOJACA.)

BOYADJI-KEUY (Treaty), between Austria and the Porte, was signed at Boyadji-Keuy June 14, 1854. It consisted of seven articles, providing for the occupation of the Danubian principalities by the Austrians, who entered the principalities Aug. 20, 1854, and retired at the close of the war in 1856.

BOY-BISHOP, called also Barn, Barne, or Bearn Bishop, was elected in cathedrals and parish churches on St. Nicholas' day (Dec. 6), during the Middle Ages. This child, usually chosen from one of the choir, was invested with all the insignia of the episcopal office, and his authority lasted until Innocents' day (Dec. 28). He performed all the ceremonies and offices of the Church except mass. At Salisbury the boy-bishop is said to have had the disposal of all stalls that came vacant during his rule. This custom was suppressed by proclamation July 22, 1542, and according to some authorities a previous proclamation had been issued July 22, 1540. This, with other Roman Catholic pageants, was revived by Queen Mary in 1554, and it was again suppressed by Elizabeth, though it continued to exist in rural districts for some time after the prohibition. A similar custom prevailed in many parts of the Continent.

BOYLE LECTURES.—Instituted according to instructions in the will of the Hon. Robert Boyle (seventh son of the Earl of Cork), who died Dec. 30, 1691. He was one of the founders of the Royal Society, and a man of extraordinary attainments. The lectures, eight in number, intended as a defence of natural and revealed religion, are preached at St. Mary-le-Bow church, on the first Monday in January, February, March, April, May, September, October, and November. The first course was preached by the celebrated Dr. Bentley in 1692, and he preached a second in 1694.

BOYNE (Battle).—At this battle, fought on the banks of the Boyne, near Oldridge, in Ireland, William III. defeated his father-in-law, James II., July 1, 1690. The latter fled to Dublin, thence to Waterford, from which port he set sail for France.

BRABANÇONS, or BRABANCIONES, mercenary soldiers, called also Routiers, because they were always *en route*, and Cotereaux,

were frequently employed during the Middle Ages, and in this country in particular, by William II., Stephen, and Henry II. They were little better than freebooters. The greater number came from Brabant: hence their name.

BRABANT (Belgium and Holland).—This ancient province formed part of Charlemagne's empire, and in the division of his territories, made A.D. 806, was assigned by him to his son Charles. Lothaire I. obtained it in 843, and his son, Lothaire II., in 855, by whom it was joined to Lorraine. Bruno, Archbishop of Cologne, made it a separate duchy, called Lower Lorraine, and afterwards Brabant; and bestowed it upon Geoffrey, its first duke. It passed under the rule of the dukes of Burgundy in 1429, and was with their dominions transferred to Austria in 1477. When Charles V., Emperor of Germany, became King of Spain, in 1516, the Netherlands were united to Spain. The religious persecutions of Philip II. having caused a revolt, North Brabant joined the United Provinces in 1581; and South Brabant remained under the dominion of Spain until 1706, when it became part of the Austrian Netherlands. Brabant, with the whole of the Austrian Netherlands, was united to France by decrees of the National Convention, dated March, 1793, and 1795, and armies were sent for the purpose of subjugating the country. It formed part of the kingdom of Holland in 1815, and at the revolution of 1830 South Brabant became a province of Belgium. The heir to the throne bears the title of Duke of Brabant.

BRACELETS, or ARMLETS, were worn at a very early period. Abraham's servant gave Rebecca two bracelets of gold B.C. 1857 (Gen. xxiv. 22); and the Amalekite who killed Saul brought the bracelet that was upon his arm to David, B.C. 1055 (2 Sam. i. 10). They were worn both by men and women amongst most ancient nations. William of Malmesbury relates that Alfred ordered golden bracelets to be hung up in the highways (circ. 890), and such was the good order that prevailed that nobody took them away. The same author mentions, as part of the peace-offering sent by Earl Godwin to Hardicanute in 1041, 80 soldiers, who had two bracelets on their arms weighing 16 ounces of gold. In the Saxon Chronicle, under the year 975, Edgar is called the "bracelet-giver to heroes." Amongst the Danes, the most sacred form of oath was that sworn on the holy bracelet, originally kept at an altar, but afterwards worn on the arm of a priest. This ceremony is alluded to by the Saxon Chronicle under the year 876. Various ancient ornaments of this kind have been found in different parts of the island.

BRADFIELD RESERVOIR.—The embankment of this large reservoir, situated within a few miles of Sheffield, suddenly burst at midnight, March 11, 1864, when the water rushed in torrents through the neighbouring villages, drowning 250 persons, and causing an immense destruction of property.

BRADFORD (Yorkshire).—This town is mentioned in Domesday Book (*q. v.*) as waste, the whole surrounding country having been desolated by William I. in suppressing an insurrection in 1070. Notice of the church occurs in 1281, and the town was, at an early period, an important centre of the woollen manufacture. The royalists, foiled in an attack upon Bradford, Sunday, Dec. 18, 1642, effected its capture in July, 1643. Riots occurred here in 1812, and a strike, lasting from June 14 to Nov. 7, 1825, threw 20,000 persons out of employment. Riots against the use of machinery took place here in May, 1826; the franchise was conferred by the Reform Act in 1832; and serious disturbances occurred in consequence of the New Poor Laws, Nov. 20, 1837. Eighteen persons were accidentally poisoned here in consequence of a confectioner having adulterated lozenges with arsenic instead of a preparation of gypsum, known as "daff," Oct. 30, 1858. The grammar school, founded by Edward VI., and incorporated by charter of Charles II. in 1663, was rebuilt in 1830. Airedale College, a seminary for Independent ministers, was established in 1665. The Piece-hall was erected in 1773, the Bradford canal was finished in 1774, and the new market-place was opened in Sep., 1824. The dispensary was established in 1826, the mechanics' institute in 1832, the court-house in 1834, the temperance-hall in 1837, and the new infirmary in 1844. All Saints' church, built by Mr. F. S. Powell, M.P., was consecrated March 31, 1864. The foundation-stone of the Exchange was laid by Lord Palmerston, Aug. 9, 1864.

BRADOCK DOWN (Battle).—Sir R. Hopton, with inferior numbers, defeated the parliamentary army at this place, near Liskeard, in Cornwall, about the middle of Jan., 1643. With trifling loss on his part, he took 1,250 prisoners, all their cannon, colours, arms, &c.

BRAGA (Portugal).—This city, the Bracara Augusta of the Romans, is the seat of an archbishopric, which dates from about A.D. 37. In 445 it became the capital of the Suevi, who were expelled by the Visigoths in 585. It fell under Moorish domination, and was taken by the forces of Old Castile in 1040. Councils were held here May 1, 563; June 1, 572; and in 675.

BRAGANÇA.—According to tradition, this city in Portugal was founded by King Brigo, B.C. 1906. Its real founder was Sancho I., who built the present city and castle in 1187. Bragança was erected into a duchy by Alphonso V., in 1442. In 1782 the see of Miranda was transferred to Bragança, the bishop retaining both titles.

BRAGANÇA (House of).—Portugal threw off the Spanish yoke in 1640, and John II., eighth Duke of Bragança, was raised to the throne Dec. 1, under the title of John IV. The family dates from the beginning of the 15th century, when Alphonso, a natural son of John I., was created Duke of Bragança and Lord of Guimaraens. He married Beatrice, daughter of the Count of Barcellos and Ourem, and from them the Bragança line sprang. In 1801 Napoleon I. declared that the reign of the Bragança sovereigns had ceased. John, regent of the kingdom, withdrew to Brazil in 1807, but he returned in 1821. At his death, in 1826, his son, Don Pedro, resigned the throne in favour

of his daughter Maria II., preferring to remain Emperor of Brazil, which he had been elected Nov. 18, 1825.

BRAHMINS.—The order of Hindoo priests, constituting the highest of the four castes into which the Hindoo nation is divided, is of great antiquity. It is said that their Vedas, or sacred books, date from B.C. 1400, and that some of their codes of criminal and civil law go back nearly 3,000 years from the present time. The Hindoo tradition respecting the origin of this caste is, that in the first creation the Brahmins proceeded with the Veda from the mouth of Brahma, their chief god. The system of castes prevailed both in Egypt and in India, and much controversy has been excited as to whether India borrowed it from Egypt or Egypt from India.

BRAILOW (Battle).—Fought near Brailow, or Ibrail, in Wallachia, between the Russians and the Turks, June 19, 1773, the latter having been defeated. The town, taken by the Russians June 18, 1828—the siege having commenced May 11—was restored to the Turks by the treaty of Hadrianople (*q. v.*), Sep. 14, 1829.

BRAMHAM MOOR (Battle).—Sir Thomas Rokeby, High Sheriff of Yorkshire, defeated the Earl of Northumberland, who had rebelled a second time against Henry IV., at this place in Yorkshire, Feb. 19, 1408. The Earl of Northumberland was killed in this battle.

BRANDENBURG (Prussia).—This province, subjugated by Charlemagne A.D. 789, some time after regained its independence, which it enjoyed until 928, when it was conquered and annexed to Saxony. It became a margraviate under Albert, surnamed the Bear, in 1142. On the extinction of that race in 1320, it was given by the Emperor Louis V. to his son Louis, and was sold by one of his descendants to Charles IV. It continued in this family until the Emperor Sigismund obtained possession in 1411, and by him it was, in 1415, sold to Frederick of Hohenzollern, one of whose successors founded the kingdom of Prussia in 1701. The town of Brandenburg, founded about the 7th century, was made a bishop's see in 946. It was suppressed in 1565.

BRANDY, formerly called Brandwine, was first mentioned about 1671. The aqua vitæ invented by Raymond Lully, who died in 1515, is often mistaken for brandy. Potato brandy was distilled by C. Skytes about 1747.

BRANDY STATION (Battle).—The Confederate cavalry, under Gen. Stuart, defeated the Federals in a skirmish at this place in Virginia, Aug. 20, 1862.

BRANDY-WINE (Battle).—At Brandy-wine Creek, near Newcastle, in Pennsylvania, Lord Cornwallis, with inferior numbers, defeated, Sep. 11, 1777, an American army of 15,000 men, advantageously posted.

BRÄNKIRKA (Battle). — Christian II. of Denmark was defeated by the Swedes, under Sten Sture the younger, at this place in Sweden, in 1518.

BRASENOSE COLLEGE (Oxford).—Brasenose Hall existed in the time of Henry III., in the middle of the 13th century, and was known by that name in 1278, a nose of brass being fixed to the gate. The name is said to be derived from a corruption of *brasinium* or *brasinhuse*, because it was originally situated in part of Alfred's palace used as a brew-house. William Smyth, Bishop of Lichfield, afterwards of Lincoln, and chancellor of the university of Oxford, and Sir R. Sutton, founded this institution about 1508. A charter was granted by Henry VIII., Jan. 25, 1512, for one principal and 60 scholars of the King's Hall and College of Brasenose. The new library was finished in 1663, and the foundation stone of the new chapel was laid in 1656. It has received numerous benefactions.

BRASS. — The art of making this alloy of copper and zinc was known in ancient times, and the early Britons are said to have possessed brass foundries. The celebrated colossus of Rhodes, erected about B.C. 288, was formed of brass. This fact has, however, been disputed, and it is certain that the present process of making brass is altogether of modern invention. The first works in England are said to have been established at Esher in 1649. In 1781 Emerson obtained a patent for making brass in a more direct way, by melting together its constituent metals. (*See* MONUMENTAL BRASSES.)

BRATUSPANTIUM. — This town of the Bellovaci (*q.v.*) was besieged and taken by Julius Cæsar B.C. 57. According to some authorities Beavais, and according to others Breteuil, occupies its site.

BRAY (Berks).—Fuller's story of the Vicar of Bray, who held his living under Henry VIII., Edward VI., Mary, and Elizabeth, being first a Roman Catholic, then a Protestant, again a Roman Catholic, and once more a Protestant, on the principle that he intended to live and die Vicar of Bray, is not borne out by the Church records. The living was not held by the same person for so long a period as that required to prove the truth of the anecdote.

BRAZIL (South America). — This country, discovered by Vincent Pinzon, was afterwards surveyed by Americo Vespucci, who published an account of it, with a map. The Spaniards and French occupied several portions of the country.

A.D.
1500. Feb. Vincent Pinzon, having sailed from Palos, in Dec. the preceding year, arrives at Cape Augustine, and discovers and names the river Amazon. —April 23. Pedro Alvarez Cabral is driven on to the coast, and takes possession of the country on behalf of the King of Portugal.
1530. Capt. Hawkins, of Plymouth, the first Englishman who visits Brazil, prevails on one of the native chiefs to accompany him to England.
1549. The Portuguese found St. Salvador, and the Jesuits first enter Brazil.
1553. Settlements formed by Europeans extend as far as the river La Plata, and the country is made a Jesuit province.
1555. Coligny establishes a settlement of French Protestants in Brazil.
1558. The Portuguese massacre most of the French settlers.
1560. The French Huguenots are expelled by the Portuguese.
1572. The English make an unsuccessful attempt to obtain a footing in Brazil.
1580. It passes into the power of Philip II., King of Spain, who becomes Sovereign of Portugal.
1624. First invasion of Brazil by the Dutch, who take Bahia, but are unable to make a permanent settlement.

A.D.
1630. Second invasion by the Dutch, who take Olinda and the province of Pernambuco.
1654. Vieyra restores Brazil to the Portuguese rule. Free trade is opened between Brazil and England.
1661. The Dutch resign all claim to Brazil.
1723. The French found Monte Video, which is seized by the Spaniards.
1760. The Jesuits are expelled from Brazil.
1763. The seat of government is transferred from Bahia to Rio.
1778. Revolt of the oppressed natives and negro slaves.
1789. Insurrection of the province of Minas.
1808, Jan. 21. The royal family of Portugal, driven from Lisbon by the French, reach Brazil.
1815, Aug. 1. The culture of the tea-plant is introduced into Brazil.—Dec. 16. John, Prince Regent of Portugal, erects Brazil into a kingdom.
1821. Revolutions in Para, Bahia, Pernambuco, and Rio Janeiro. The king returns to Lisbon, leaving Don Pedro Regent of Brazil.
1822, Sep. 21. Don Pedro refuses to recognize the authority of the King of Portugal, and is proclaimed "constitutional Emperor of Brazil."
1825, May 13. The King of Portugal recognizes the independence of the Brazilian empire.
1828. Brazil recognizes Monte Video as an independent state.
1829. Insurrection in Pernambuco.
1831, April 6. The Emperor abdicates in favour of his infant son Don Pedro—April 7. He embarks for Europe.
1840, July 23. The Emperor is declared of age by a *coup d'etat*, and assumes the head of affairs.
1850, Sep. 4. The Emperor issues a decree, making the importation of slaves piratical.
1858, Nov. 8. Inauguration of the first Brazilian railroad from Rio to Belem (38 miles).
1862, Oct. A conflict occurs at Belem about the end of this month, between the Brazilian authorities and two Peruvian ships-of-war, respecting the customs rights of Brazil relative to the entry of the Amazon.
1863, Jan. 2. By order of the English envoy at Rio Janeiro, several Brazilian merchant vessels are seized by British ships-of-war in reprisal of alleged insults offered to three officers of H.M.S. *Forte*, and of the pillage of the *Prince of Wales*, trading vessel, shipwrecked on the Brazilian coast.—Feb. 26. The Brazilian Government pays, under protest, the indemnity demanded by the English envoy.—May 26. The Brazilian envoy quits London.—June 6. The English envoy is recalled from Rio de Janeiro.—June 18. The King of Belgium having been chosen to arbitrate between England and Brazil, decides in favour of the latter.
1864, Aug. 4. In consequence of repeated outrages Brazil addresses an ultimatum to Uruguay.—Aug. 9. It is rejected, and war commences (*See* URUGUAY).—Oct. 12. The seizure of the Brazilian postal steamer *Marquis of Olinda* leads to a war with Paraguay (*q.v.*).
1865, May 4. An alliance is concluded at Buenos Ayres between Brazil, Uruguay, and the Argentine Confederacy.—Sep. 23. Friendly relations having been restored with Great Britain, an English minister is received by the emperor.

EMPERORS.

A.D.		A.D.	
1822, Dec. 1.	Pedro I.	1831, July 18.	Pedro II.

BREAD.—Various materials were converted into bread in ancient times, when wheaten flour was not in such general use as at present. From the description of England prefixed to Hollinshed's Chronicle, it appears that even in this country bread was made "of such grain as the soil yieldeth, nevertheless the gentility commonly provide themselves sufficiently of wheat for their own tables, while their household and poor neighbours in some shires are enforced to content themselves with rye or barley, yea, and in time of dearth, many with bread made either of beans, peas, or oats, or of all together, or some acorns among." Amongst other substitutes for wheat, potatoes and various kinds of earth have been used. Stow says Bread Street was so called on account of its being the place where bread was formerly sold, and adds: "For it appeareth by records that in the year 1302, which was the 30th of Edward I., the bakers of London were bounden to sell no bread in their shops or houses, but in the market." Butter was substituted for dripping, to be eaten with bread at breakfast, between the reigns of Edward IV. and Elizabeth. By a royal mandate issued by Henry III. in the 36th year of his reign (1252), bakers were ordered not to impress bread intended for sale with the sign of the cross, Agnus Dei, or the name of Jesus Christ. (*See* ASSIZE OF BREAD, BAKER, &c.)

BREAD-AND-CHEESE WAR. — In consequence of oppressive taxation, the people of Holland rose in rebellion in 1491, and seized Alkmaar, using for their standard a banner bearing the device of a loaf and cheese: hence the name.

BREAD-FRUIT TREE.—This esculent, found in the South-Sea Islands, was introduced into the West Indies by order of the British Government. The first attempt in 1789 under Bligh failed, on account of the mutiny of part of his crew on board the *Bounty*. Bligh was sent out again in 1791, reached Otaheite in 1792, and landed the plants in 1793. Capt. Bligh received the gold medal offered in 1777 by the Society for the Encouragement of Arts and Manufactures to any one who should bring the bread-fruit plant in a state of vegetation from the South-Sea Islands to the West Indies. The experiment succeeded, but the negroes prefer their own preparation of food from the plantain.

BREAKWATER.—The mole at Tangier, commenced in 1663, and abandoned, though not completed, in 1676; the works commenced at Plymouth Aug. 12, 1812, and completed in 1841; those at Cherbourg, commenced June 6, 1784, continued at intervals, and completed in 1858; those at Portland, commenced in 1849; and the Admiralty pier at Dover, commenced about 1844, are amongst the most celebrated breakwaters in the world. (*See* HOLYHEAD).

BREASTPLATE.—A portion of the vestment worn by the high-priest amongst the Jews, was called the breastplate of judgment, and to it the Urim and Thummim were attached. The defensive armour called the breastplate, worn both in ancient and modern times, is made of various materials.

BRECHIN (Scotland).—This ancient town, supposed to have been the capital of the kings of the Picts, was burned by the Danes A.D. 1012. It was made a bishopric in 1150, and the see, suppressed in 1689, was revived in 1731. Brechin was taken by Edward I., Aug. 9, 1303, and was burned by Montrose in 1645. (*See* HUNTLY HILL, Battle.)

BREDA (Holland), founded about 1190, was annexed to Spain in 1567. It was recovered in March, 1590, by Prince Maurice of Nassau, to whose family it belonged during the 14th and 15th centuries. During the struggle with

Spain conferences were opened here March 3, 1575, and closed July 8, 1575. The Spaniards besieged Breda in 1624, and captured it in June, 1625. It came into the possession of the United Provinces Oct. 6, 1637, and was confirmed to them by the peace of Westphalia in 1648. Charles II. resided here during part of his exile, and his celebrated declaration was written at Breda, and dated April 14 (O. S. 4), 1660. Peace between England, France, and Holland was concluded here July 20 (O. S. 10), 1667. During the revolution the assembly of the United Belgic States met here Sep. 14, 1789. Breda capitulated to the French Feb. 25, 1793. The French were expelled in 1813, and Breda was restored to Holland at the peace in 1815.

BREECH-LOADING GUNS.—Breech-loading hand-cannon were used, it is believed, early in the reign of Henry VI. (1422—1461). "Carts of war," a species of artillery peculiar to Scotland, which the barons of that country were commanded to employ against the English in 1471, were also breech-loading weapons. The *Mary Rose* ship-of-war, which sank off the French coast in 1545, contained breech-loading ordnance that has been recovered from the wreck; and numerous weapons of the 15th and 16th centuries, constructed on the same principle, and exhibiting other modern improvements, are deposited at the arsenal at Venice. Breech-loading cannon were invented by Dr. Lind and Capt. Blair in 1774, and were improved by Lieut.-Gen. Sir W. Congreve, who exhibited a breech-loading field-piece of his own invention shortly before his death in 1814. Rifled breech-loading ordnance was introduced by Major Cavalli, of the Sardinian army, and Baron Wahrendorff, of the Swedish service, about 1847.

BREHON LAW prevailed in Ireland previous to its conquest by Henry II. in 1169, and was so called because the Irish name for a judge is Brehon. The Irish nation received and swore to observe the English laws at the Great Council assembled at Lismore. Spencer, in 1596, describes Brehon Law as "a rule of right unwritten, but delivered by tradition from one to another, in which oftentimes there appeared great show of equity in determining the right between party and party, but in many things repugnant quite both to God's laws and man's." This account is not altogether correct, as the code existed in manuscript as early as the 14th century. King John, who visited Ireland in 1210, ordained and established by letters patent that it should be governed by the laws of England. The Irish, however, clung to the Brehon Law. Henry III. and his successors made several efforts to induce them to abandon it; and Edward III., by the statute of Kilkenny, in 1366, formally abolished the Brehon Law, the practice of which was, by the last-mentioned statute, made treason. The Brehon Law was not, however, in spite of this and other enactments, entirely abolished until the reign of James I.—The Earl of Eglinton, in 1852, appointed a commission to secure the transcription and translation of the ancient Irish laws.

BREITENFELD (Battles.)—(*See* LEIPSIC.)

BREMEN (Germany).—The capital of the republic of Bremen, and one of the free Hanse towns, is first mentioned as a bishop's see A.D. 787. The Archbishop of Hamburg removed his seat here in 845, and Bremen itself became an archbishopric in 1203. It was destroyed by the Hungarians in 900. In 1283 it joined the Hanseatic League; and in 1648 its archbishopric was suppressed. Bremen was made an imperial city in 1640. A majority of the inhabitants having declared in favour of Protestantism, the city was separated from the remainder of the diocese. The latter, called the duchy of Bremen, was ceded to Sweden by the peace of Westphalia, Oct. 24, 1648. Denmark conquered it in 1712, and sold it to Hanover in 1715, with which it was incorporated in 1732. The French captured it Aug. 20, 1757, again in 1758, but were speedily expelled, and took it again in 1759. It was taken by the French in 1806, and annexed to the French empire in 1810, but regained its independence in 1813, and was made a member of the German Confederation in 1815.

BRENNEVILLE (Battle).—Louis VI. of France, who supported the claim of William Clito to the estates in Normandy seized by Henry I., was defeated by the latter in the plain of Brenneville, in Normandy, Aug. 20, 1119. This is sometimes called the battle of Bremulle, and also of Noyon.

BRENTFORD (Battles).—Edmund Ironside defeated the Danes at Brentford, with great slaughter, in May, 1016. Charles I. defeated the parliamentary army near this place, Nov. 12, 1642.

BRESCIA (Italy), the ancient Brixia, was conquered by the Romans. The Goths burned it A.D. 412, and Attila plundered it in 452. It became an important city under Lombard rule, and the capital of a province of the same name. It was taken by Charlemagne. It joined the league against the Emperor Frederick I. in 1175, and successfully resisted the arms of Frederick II. in 1238. It was long a prey to the various factions by which Italy was convulsed; was taken by the Emperor Henry VII. in 1311, by the Venetians in 1426, and by the French in 1509. The Venetians having regained possession in 1512, it was taken and sacked by the French, under Gaston de Foix, Feb. 16, but was again captured, after a long siege, by the Venetians, May 26, 1516. It was annexed to Venice in 1576, and continued under the sway of that republic until 1797. The French having captured it in 1796, they were expelled in 1799; but Brescia again passed under their yoke until 1815, when, with the remainder of Lombardy, it was ceded to Austria. During the revolution of 1848, the Austrians were expelled, but it was retaken March 30, 1849, and passed to Sardinia, by the treaty of Zurich, in 1859. Its cathedral was commenced in 1604, and completed in 1825. (*See* ARNOLDISTS.)

BRESCIA (Treaty).—The Venetians, jealous of the growing influence of their ally, Francis Sforza, concluded this treaty with the republicans of Milan, during his siege of that city, Sep. 27, 1449. The reduction of Milan (*q. v.*), which followed soon after, rendered its provisions of no effect.

BRESLAU (Silesia). — The bishopric of Smogro, founded in 960, was transferred to Breslau in 1062. Councils were held at Breslau in 1248, and Feb. 2, 1268. Frederick II. of Prussia took possession of Breslau Jan. 1, 1741. After the battle of Czaslau (*q. v.*), May 17, 1742, a treaty of peace between Frederick II. and Maria Theresa was drawn up at Breslau under the mediation of the British ambassador, June 11, 1742, and definitively concluded July 28. Silesia and Glatz, in Bohemia, were ceded to Prussia. A great battle was fought here between the Austrians and the Prussians, Nov. 22, 1757, and the latter having been defeated, the Austrians took possession of Breslau Nov. 25; but it was retaken by Frederick II. Dec. 19, in the same year. Loudon, who had appeared before it July 30, 1760, was compelled to raise the siege Aug. 5, and the Russians bombarded it in 1761. The French took it in 1806, and its fortifications were demolished in 1814. Its university was founded in 1702, and that of Frankfort-on-the-Oder was incorporated with it in 1811.

BREST (France), supposed to be the ancient Brivates Portus, came into the possession of the Duke of Britanny in 1240. It was frequently captured and held by the English in the continental wars during the 14th and 15th centuries; and it passed to the French crown, with the remainder of Britanny, by the marriage of Louis XII. with Anne of Britanny, widow of Charles VIII., in 1498. Sir Thomas Howard burned Brest May 23, 1512; and an indecisive action between the French and English fleets occurred off the port Aug. 10, in the same year. Sir Edward Howard, lord high admiral, sailed into Brest, landed some men, and ravaged the country in 1513, and was killed outside the port in an attempt to destroy some French galleys. Sir Martin Frobisher assisted the French to recover Brest from the Spaniards in 1594. The harbour was improved in 1631 by order of Richelieu, who made Brest a naval station. The English failed in an attack upon Brest in June, 1694. Capt. Gordon was beheaded at Brest in 1769, on a charge of being concerned in a conspiracy for setting fire to the shipping in that port. The hospital was destroyed by fire, and 50 slaves lost their lives, in Nov., 1776. Lord Howe defeated the French fleet off Brest, June 1, 1794; and the port was blockaded by an English squadron during the French revolutionary war.

BRETEUIL (France). — This town of Normandy possesses a church, erected in the 11th century, and the ruins of a castle, built by William the Conqueror in the same period. In 1356 it was taken by John II. of France, after a long siege. Joanna, daughter of Charles II. of Navarre, was here made prisoner by the French and taken to Paris in 1377.

BRETHREN. — (*See* BIANCHI, MORAVIAN, PLYMOUTH BRETHREN, &c.)

BRETHREN OF SOCIAL LIFE.—This association, which professed to imitate the social condition of the primitive Christians, was founded about 1376 by Geert Groote and Florentius Radewin. They had their goods in common, and were protected against the opposition of the religious orders by several popes and councils. The last fraternity was founded at Cambray in 1505. At the Reformation, many members of these societies joined the reformed congregations, while others were united with the Jesuits. They were also called Brethren of the Common Lot, Brethren of Good Will, Hieronymites, and Gregorians.

BRETIGNY (Treaty). — At the village of Bretigny, near Chartres, a treaty of peace was concluded between England and France, May 8, 1360. It consisted of 40 articles. France ceded several provinces that England had conquered, and Edward III. renounced his claim to Normandy, Maine, Anjou, &c., and agreed to release the French King John, who had been prisoner in England since 1356, his ransom being fixed at 3,000,000 gold crowns. King John was conducted to Calais July 3; the two kings signed the treaty there Oct. 24; and John was released Oct. 26. He returned to England Jan. 4, 1364, and the kings of Scotland and Cyprus being then in London, he was received with great pomp; but falling suddenly ill, he died at the palace of the Savoy, April 8, 1364. Some historians assert that he came to England because he was unable to fulfil the terms of his release; but a desire to see Edward III., for whom he entertained great affection, appears to have been his principal, if not his sole object.

BRETWALDA, or "Ruler of Britain," a title assigned by the Saxon chronicle to those kings of the Heptarchy who extended their government over the entire nation. The following are mentioned by Bede, but Hallam and other historians doubt whether any sovereign in those early times possessed such authority:—

A.D.
492. Ella, King of Sussex.
571. Ceawlin, King of Wessex.
594. Ethelbert, King of Kent.
615. Redwald, King of East Angles.
623. Edwin, King of Deira.
634. Oswald, King of Bernicia.
643. Oswy, King of Bernicia.

BREVIARY, originally called the Cursus, is composed of psalms, lessons taken from Scripture, homilies, histories of saints, hymns, anthems, prayers, &c., suited to the particular season, festival, or canonical hour, collected for the use of Roman Catholics. After undergoing several alterations, it was settled by Pius V. in 1568. Reformation of the breviaries was enjoined upon bishops by the synod held at Cologne in 1536, and both popes and councils have introduced various alterations.

BREWERS.—The art of brewing is of great antiquity. By a statute of the Pillory and Tumbrel, 51 Hen. III. st. 6 (1267), brewers were fined for the first, second, and third offences not over grievous against the law of assise; but if the offence was often, or over grievous, the brewer was condemned to the tumbrel, or some other correction. The trade of brewing, within the city of London, was at one time confined almost wholly to females. The company of brewers was incorporated by Henry VI., Feb. 22, 1428; confirmed by Edward IV. in 1480; and again by Elizabeth, July 13, 1560. There were 26 brewers in London and West-

minster in 1585, and they brewed 648,960 barrels yearly. Barrels were first ordered to be gauged by 23 Hen. VIII. c. 4 (1532). The trade itself has since been regulated by several statutes.

BRIAR CREEK (Battle). — Gen. Prevost, with about 1,200 English troops, defeated the American army, 2,000 strong, at this place, in America, March 3, 1779. Several colours, seven pieces of cannon, all the baggage, and 200 prisoners, fell into the hands of the victors.

BRIBERY. — This form of corruption is mentioned several times in the Bible, and is forbidden Deut. xvi. 19. It prevailed extensively amongst most ancient nations. When Ergocles was convicted of having embezzled 30 talents, and payment was demanded of his friend Philocrates, his party openly boasted of having bribed 2,100 jurymen at Athens. A modern author remarks that "in all periods of their history, the Greeks seldom had sufficient principle to resist a bribe." Bribery prevailed to a fearful extent in Rome, and existed in various forms during the Middle Ages. The first case of punishment for bribery at an English election is recorded by Parry (Parl. and Councils of Eng. p. 221). Thomas Long, a very simple man, and unfit to serve, confessed, May 10, 1571, that he gave the mayor of Westbury and another £4 for his place in Parliament. They were ordered to refund the money, to appear to answer such things as should be objected against them, and the corporation and inhabitants of Westbury were fined £20 for their scandalous attempt.

BRICIAN, or ST. BRIDGET.—This Swedish order of knighthood was founded by the Swedish princess, afterwards St. Bridget, in 1366. (*See* BRIGETTINES.)

BRICK-MAKING was known immediately after the flood (Gen. xi. 3), B.C. 2234, burned bricks having been employed in the construction of the tower of Babel. The lives of the Israelites in Egypt were embittered by their cruel task of brick-making about B.C. 1571 (Exod. i. 14, and ch. v.). It is probable that these were sun-dried bricks. There are several brick pyramids in Egypt. The Jews inscribed magical and other characters upon bricks. The art was much improved by the Greeks, and carried to a still higher state of perfection by the Romans. The Anglo-Saxons and the Normans employed brickwork in their architecture. Hampton Court, built by Cardinal Wolsey, is a good specimen of English brickwork. Bricks were first taxed by 24 Geo. III. c. 24 (1784), at the rate of 2*s.* 6*d.* per 1,000. This duty was several times increased until, by 2 & 3 Vict. c. 24 (July 10, 1839), it was fixed at 5*s.* 10*d.* per 1,000 for ordinary sized bricks, and 10*s.* for the larger size. It was repealed by 13 & 14 Vict. c. 9 (1850).

BRIDE-ALE, or BRIDE-STAKE, an old custom, so called because the bride sold ale on her wedding day, and her friends contributed what they pleased in payment. It was also called *bride-bush*, from a bush at the end of a pole, the ancient badge of a country alehouse; *bride-wain*, because poor persons sent a cart round to their relations and friends, to obtain contributions; and *bidding*, because guests were invited. The custom is supposed to have been confined to these islands. Puttenham, in the "Arte of Poesie," published in 1589, mentions a bryde-ale, and one was celebrated before Queen Elizabeth, at Kenilworth Castle, in that year. In the court-rolls of Halesowen, Salop, amongst other regulations is one made in 1573, to the effect that the wedding couple should not have above "eight messe of persons at his dinner within the burrowe."

BRIDEWELL (London).—A tower or castle built in St. Bride's parish, was for many years a residence of the English kings. Here, in 1210, King John summoned a council, at which he exacted above £1,000 sterling from the clergy; and after depriving the White Monks of their privileges, compelled them to contribute £40,000 in silver. Henry VIII. built a stately and beautiful house upon the ruins of this old tower, giving it the name of Bridewell, from a well in the neighbourhood dedicated to St. Bride, or St. Bridget. It is said to have been built specially for the entertainment of the Emperor Charles V., who visited London in May, 1522. Henry VIII. called a meeting here of peers, councillors of state, and aldermen, to consider his divorce case, Nov. 8, 1528. Ridley, in May, 1552, wrote a letter to Cecil requesting him to obtain it for charitable uses; and in June, 1553, Edward VI. granted it to the city of London for the maintenance of poor and impotent people. A mill to grind corn was placed in it in 1570. It was made a house of correction in the 17th century, and was destroyed by fire in 1666. Several houses of correction bearing the same name have been erected in London and other parts of the kingdom.

BRIDGENORTH (Shropshire).—This ancient town was incorporated by John in 1214. Henry I. captured the castle in 1102; and Henry II. in 1157.

BRIDGE-BUILDING BROTHERHOODS, called in French *Frères pontifes*, and in Latin *Fratres pontifices*, were founded according to tradition by Benezet, a herdsman, who is said to have completed a bridge over the Rhone at Avignon in 1180. They were sanctioned by Pope Clement III. in 1189, and devoted themselves to the maintenance of hospices near the principal fords of large rivers, the preservation of ferries, and the construction of bridges.

BRIDGES, of rude materials and form, were constructed by ancient nations at the earliest periods. The first stone bridge of large dimensions was built at Rome by Caius Flavius Scipio, B.C. 127. Old London Bridge was commenced A.D. 1176, and was not completed until 83 years later. Bow Bridge, built in 1118, is said to have been the first stone bridge in England. By 9 Hen. III. c. 15 (1225), no town or freeman could be distrained to make bridges; and by 22 Hen. VIII. c. 5 (1530), it was provided that if a bridge was within a city or town corporate, the inhabitants of such city or town corporate were bound to repair it; if without a city or town

corporate, the inhabitants of the county had to effect the repairs; and if part of a bridge was in one county and part within another, the inhabitants of the respective counties were charged with the repairs of the portion within their own limits. Pritchard, in 1775, introduced cast-iron in the construction of bridges; and the first of this material was built over the Severn, at Coalbrook Dale, in 1779. The punishment for pulling down or destroying a public bridge was made transportation for not less than seven years, or imprisonment for not more than four years with flogging, by 7 & 8 Geo. IV. c. 30, s. 13 (June 21, 1827). By 13 & 14 Vict. c. 64 (Aug. 14, 1850), the repairing, maintaining, and building of bridges was placed under the sole management and control of the town councils. The following is a list of the principal bridges :—

B.C.

(*See* BRITANNIA TUBULAR BRIDGE, RAILWAY AND SUSPENSION BRIDGES, &c.)

BRIDGEWATER (Somersetshire).—This ancient town, called in Domesday Book Brugie, received its first charter, dated June 26, 1200, from John. It was taken by the parliamentary forces, July 23, 1645. In 1685 the corporation of Bridgewater proclaimed the Duke of Monmouth king.

BRIDGEWATER CANAL, from Worsley to Manchester, a distance of seven miles, was undertaken by James Brindley at the instance of the Duke of Bridgewater, whose extensive coal-fields at the former place were rendered useless by the expense of land carriage. Acts for the undertaking were obtained in 1754 and 1758, and the canal, which formed the commencement of British inland navigation, was opened July 17, 1761.

BRIDGEWATER TREATISES.—The sum of £8,000 was, by the will of Francis Henry Egerton, last Earl of Bridgewater, who died in Feb., 1829, placed at the disposal of the President of the Royal Society, to be paid by him to the writer, or writers, of a treatise "on the power, wisdom, and goodness of God, as manifested in the creation," of which 1,000 copies were to be published. The subject, divided into eight parts, was allotted to eight individuals, each of whom received an equal share of the money. The works, published between 1833 and 1840, and known by the name of the Bridgewater Treatises, are as follows :—

The Hand: its Mechanism and Vital Endowments, as evincing Design. By Sir Charles Bell. 1833.

On the Power, Wisdom, and Goodness of God, as manifested in the Adaptation of External Nature to the Moral and Intellectual Constitution of Man. By Rev. Thomas Chalmers. 1833.

On the Adaptation of External Nature to the Physical Condition of Man. By John Kidd. 1833.

Astronomy and General Physics, considered with reference to Natural Theology. By the Rev. Wm. Whewell. 1833.

Animal and Vegetable Physiology, considered with reference to Natural Theology. By Peter Mark Roget, M.D. 1834.

On the Power, Wisdom, and Goodness of God, as manifested in the Creation of Animals, and in their History, Habits, and Instincts. By the Rev. William Kirby. 1835.

Chemistry, Meteorology, and the Functions of Digestion, considered with reference to Natural Theology. By William Prout, M.D. 1835.

Geology and Mineralogy, considered with reference to Natural Theology. By the Rev. William Buckland. 1836.

The dates given are of the first publication. Later editions have been issued.

BRIEF.—(*See* BULL.)

BRIEF, or QUEEN'S LETTER.—This kind of document, bearing the royal signature, addressed to the archbishops, bishops, clergymen, magistrates, churchwardens, and overseers of the poor in England, authorizing the collection of money for some charitable purpose therein mentioned, was first issued in this country soon after the Reformation. Certain abuses crept in, and a measure was passed (4 Anne c. 14) in 1706, entitled, "An Act for the better collecting charitable money on briefs by letters patent, and preventing abuses in relation to such charities." This act was repealed by 9 Geo. IV. c. 42 (July 15, 1828); and though the power of issuing briefs is still retained by the Crown, it has not been exercised of late years.

BRIEL, or BRILL (Holland).—This fortified seaport surrendered to the confederates in 1572, and was the first place in Holland to obtain its independence. It was placed in the hands of the English in 1585, Queen Elizabeth having agreed to protect the Netherlands, and was, with other cautionary towns (*q. v.*), given back to the Dutch, May 27, 1616.

BRIENNE.—This town in France was governed by counts from the 10th century. A

college founded here by the Order of Minims in 1730, and erected by government in 1776 into a military school preparatory to that at Paris, was the scene of the earliest studies of Napoleon Buonaparte from April 23, 1779, till Oct. 17, 1784, and was suppressed in 1790.

BRIENNE (Battle).—Napoleon I. attacked Blucher at this place, Jan. 29, 1814, forcing him from the town, which was reduced to ashes, and compelling him on the following day to retreat to Trannes. (*See* LA ROTHIÈRE, Battle.)

BRIGANDS.—A company of soldiers, armed by the city of Paris, in 1356, during the captivity of John II. in England, were termed "briganda," because they were defended by brigandines, a kind of armour then much worn.

BRIGETTINES, or NUNS OF OUR HOLY SAVIOUR, instituted by St. Bridget, Duchess or Princess of Nericia, in Sweden, about the middle of the 14th century. She died in 1373, and was canonized in 1391. They adopted, with certain modifications, the rule of St. Augustine. It was not lawful for them to have anything they could call their own, not even so much as a halfpenny. The new order arose in Spain, spread through parts of the Continent, and had only one house in England, at Syon, in Middlesex, founded by Henry V. in 1413. Men were admitted into their convents.

BRIGHTON (Sussex), formerly Brighthelmstone, was a place of some importance in early times; and, having been plundered and burned by the French in 1514, was afterwards fortified by Henry VIII. It declined, and was merely a fishing village at the commencement of the last century. George IV., then Prince of Wales, visited it in 1782, and the foundation of the Pavilion was laid in 1784. It was completed in 1787, and additions were made in 1802 and 1817. The chain pier was commenced Oct., 1822, and opened in Nov., 1823. A battery was built in 1793, and rebuilt in 1830. The town-hall was commenced in 1830. It obtained the right of returning two members to Parliament in 1832. The railroad to London was opened Sep. 21, 1841. The Pavilion was purchased by the corporation in 1850. A collision occurred on the railroad in the Clayton tunnel, by which 16 persons lost their lives, and many were seriously injured, Aug. 25, 1861. Volunteer reviews were held here on Easter Monday in 1861, and in other years. (*See* VOLUNTEERS.) The new pier was commenced in 1865.

BRIHUEGA (Spain). — Gen. Stanhope and 6,000 British troops were surrounded and taken prisoners, after a gallant resistance, at this small town, by the Duke of Vendôme, Dec. 9 (O. S. Nov. 28), 1710. The French were immensely superior in numbers.

BRIGNAIS (Battle). — The French, under James de Bourbon, were defeated by the Free Companies fighting in the service of England, at this place, on the Rhone, near Lyons, on the Friday after Easter (April 2), 1361. James de Bourbon and his son Pierre were mortally wounded.

BRILL.—(*See* BRIEL.)

BRINDISI (Calabria), occupies the site of the ancient Brundisium, or Brundusium (*q. v.*). It was frequently besieged, and suffered severely during the various invasions of Italy. It became the seat of a bishopric A.D. 172, and was united with Oria, and made an archbishopric, about 1060; but the sees were disunited in 1591. Brindisi was nearly destroyed by an earthquake A.D. 1456.

BRISBANE (Australia), the capital of Queensland (*q. v.*), was founded soon after the discovery of the Brisbane River by Oxley, in 1823. It ceased to be a penal settlement in 1842, and was made a bishopric in 1859.

BRISSOTINS.—(*See* GIRONDISTS.)

BRISTOL.—Part is in Somersetshire, and part in Gloucestershire. It was a walled town and royal burgh at the time of the Norman Conquest. Henry of Huntingdon describes it as the most opulent city in that part of the country, and much frequented by shipping. The Empress Maud repaired to this city in 1140, and Stephen was imprisoned in its castle in 1141. Bristol has returned two members to Parliament since 1283; and it was made a staple for wool, leather, &c., by 27 Edw. III. st. 2, c. 1 (1353). A charter for making Bristol a town and county of itself was confirmed under the great seal (47 Edw. III.) Aug. 8, 1373. Henry VII. granted it another charter in 1550. Prince Rupert captured Bristol July 27, 1643, and it was retaken by the parliamentary forces Sep. 10, 1645. The castle was demolished by order of Cromwell in 1656. Riots occurred here in 1749, 1793, and in 1831. The see was founded June 4, 1542, and united to Gloucester in Oct., 1836. The docks were commenced in 1804, and completed in 1809. The council house was built in 1827. The suspension bridge over the Avon at Clifton, designed by Brunel, but not completed during his lifetime from want of funds, was opened Dec. 8, 1864, part of the materials of the Hungerford bridge (*q. v.*) having been employed in its construction. An industrial exhibition was opened in Bristol Sep. 19, 1865.

BRITAIN.—(*See* NEW BRITAIN.)

BRITANNIA, or BRITAIN.—Aristotle (B.C. 384—322), the first ancient writer who makes direct mention of Britain, speaks of two large islands, Albion (*q. v.*) and Ierne (*i. e.* England and Ireland), called Bretannic, in the ocean beyond the Pillars of Hercules. The origin of the word Britain has excited much controversy. In early native poems it is called the isle of the Prydhain, of which Carte conjectures Britannia to be the Latinized form. Some portions of the coast of Britain were known to the Phœnicians, who resorted to them for tin, before the time of Aristotle. (*See* CASSITERIDES.) Herodotus uses the term, though he declares that he can give no information on the subject, admitting that he never met a man who had seen the sea on that side of Europe. The original inhabitants of Britain were a Celtic race, divided into two principal branches, the Gaelic and the Cimbric; but of their history previous to the Roman invasion little authentic is known. The islands are supposed to have been peopled from the neighbouring continent of Gaul. Their priests, called Druids (*q. v.*), wielded the chief authority. When Cæsar (Aug. 26, B.C. 55) landed on the coast of Kent,

Divitiacus was the most powerful of the native leaders.

B.C.
57. Divitiacus, King of the Belgic tribe, the Suessones, rules Britain.
55. Aug. 26. Julius Cæsar arrives in Britain, but makes no important conquests.—Sep. 20. He returns to Gaul.
54. May. Cæsar returns to Britain, and is opposed by Cassivellaunus. He crosses the Thames, and takes Verulamium (St. Alban's).—Sep. He imposes a tribute on the Britons, and returns to Gaul.
51. Commius takes refuge in Britain from the pursuit of Cæsar.
26. Augustus sets out for the purpose of invading Britain, but an embassy of the inhabitants meets him in Gaul, and offers submission to him.

A.D.
40. Caligula is persuaded to invade Britain by Adminius, son of Cinobellinus, King of the Britons. He returns without making any attempt at conquest.
43. Claudius sends Aulus Plautius into Britain, and soon afterwards goes in person, and reduces the greater part of the island to subjection.
44. Claudius has a triumph at Rome in celebration of the conquest of Britain, and assumes the surname Britannicus.
47. Flavius Vespasian annexes Britain to the Roman empire. Christianity is said to have been first preached in the island about this time, by Simon Zelotes.
50. Ostorius Scapula, Roman Governor of Britain, reduces the Cangli, the Brigantes, and the Silures; takes Caractacus, King of the Silures, prisoner, and sends him to Rome.
51. Aulus Didius, governor, is opposed by Venusius, the British chieftain.
57. Veranius, governor, dies soon after his appointment.
58. Suetonius Paulinus governor. Agricola commences his military career under his tutelage.
61. The Britons revolt, and capture several Roman posts. Suetonius defeats their army, led by Boadicea, Queen of the Iceni, who dies shortly after.
62. Petronius Turpilianus governor.
65. St. Paul is said to have visited Britain.
69. The Roman legions in Britain revolt from the Emperor Vitellius in favour of Vespasian.
70. Petilius Cerealis governor. The Brigantes are reduced to order.
75. Julius Frontinus governor.
78. Agricola governor. He reduces the isle of Anglesey, and reforms the abuses of his predecessors.
79. Agricola's second campaign in Britain. The Roman language begins to be studied.
80. Agricola's third campaign. He penetrates as far as the Frith of Tay.
81. Agricola's fourth campaign. He erects forts between the Friths of Clyde and Forth.
82. Agricola's fifth campaign.
83. Agricola's sixth campaign. He defeats the Caledonians.
84. Agricola, in his seventh campaign, defeats the Caledonians under Galgacus. He sails round Britain, and discovers its insular form; resigns his governorship, and returns to Rome.
85. Sallustius Lucullus governor. He is put to death by order of Domitian.
86. The Britons rebel under Arviragus.
106. Neratius Marcellus governor.
117. The Britons strive to obtain their freedom.
120. The Emperor Hadrian visits Britain. (*See* HADRIAN'S WALL.)
124. Platorius Nepos governor.
138. The Emperor Titus Antoninus deprives the Brigantes of part of their territories.
139. The Britons are subdued by Lollius Urbicus. (*See* AGRICOLA'S WALL.)
140. C. Valerius Pansa is proconsul in Britain.
162. Marcus Aurelius sends Calphurnius Agricola against the turbulent Britons.
181. Lucius, King of the Britons, sends an embassy to the Pope. Various dates, ranging between 137 and 193, are assigned for this event. Some barbarous British tribes revolt, and are reduced to order by Marcellus.
183. Marcellus puts an end to the war in Britain.

A.D.
187. The Britons again revolt, and are subdued by P. Helvius Pertinax.
196. Virius Lupus governor.
204. South Britain is divided into two provinces by order of Severus.
207. Britain again revolts.
208. The Emperor Severus heads an expedition into Britain. (*See* HADRIAN'S WALL.)
211. Feb. 4. Death of Severus, at York. Papianus appointed governor.
231. Marius Valerianus governor.
139. Macilius Fuscus governor.
240. Gn. Lucilianus governor.
242. Nonnius Philippus governor.
255. Desticius Juba governor.
273. Constantius Chlorus (afterwards emperor) marries Helena, said by monkish chroniclers to be a British princess.
275. Constantine, their son, is said to have been born in Britain.
276. Proculus and Bonosus claim Britain for themselves, and are defeated by Probus.
282. Britain is assigned to Carinus, son of the emperor.
287. Carausius assumes imperial dignity in Britain.
294. Carausius is slain by Allectus, who succeeds him in the empire.
296. Constantius reunites Britain to the Roman empire, and slays Allectus.
304. Alban and other British Christians suffer martyrdom. (*See* ALBAN'S, ST.).
306. July 25. The Emperor Constantius Chlorus dies at York, and is succeeded by his son Constantine I.
313. Constantine I. subdues the Britons.
314. British bishops are present at the Council of Arles.
341. The Emperor Constans restores tranquillity in Britain.
357. Julian sends 800 vessels to Britain to obtain corn.
360. Britain is invaded by the Picts and Scots.
364. The Saxons assail the British coasts, and the Picts and Scots penetrate inland.
367. Revolt in Britain. Continued incursions of the Picts and Scots.
374. The Saxons effect a landing in Britain.
383. The Roman army in Britain revolts, and proclaims Maximus emperor.
394. Ninias, a Briton, is ordained Bishop of the Southern Picts.
396. The Britons seek and obtain aid from Rome against the Picts and Scots.
407. The army in Britain revolts, and chooses Gratian, a native of the country, emperor. He is killed four months afterwards, and Constantine assumes authority.
409. The Britons revolt from the Romans, who are too much weakened by the Goths to attempt to reduce them to subjection.
425. Vortigern reigns in Britain.
428. Vortigern seeks aid from the Saxons against the northern barbarians.
429. The Saxons form an alliance with the Picts, and turn their arms against Vortigern.
435. The Britons obtain assistance from Rome, and repel their invaders.
436. The Romans finally quit Britain.
445. The Britons are driven to the mountains by the Picts and Scots.
449. The first Saxon invasion. Hengist and Horsa return for the purpose of conquest.
455. Battle of Aylesford (*q. v.*).
477. The second Saxon invasion. Ella arrives in Britain, and defeats the natives at Andredsleu.
491. Ella founds the kingdom of Sussex, or of the South Saxons.
492. Ella is made first Bretwalda.
495. The third Saxon invasion. Arrival of Cerdic.
519. Cerdic founds the kingdom of Wessex.
520. The renowned King Arthur defeats Cerdic at Baddesdown Hill (*q. v.*).
527. The fourth Saxon invasion. Essex is founded.
530. Cerdic invades and takes the isle of Wight. The fifth Saxon invasion.
547. The sixth Saxon invasion. Landing of Ida at Flamborough Head, and commencement of the kingdom of Northumbria.
559. Northumbria is divided into Bernicia and Deira. Ella takes Deira.
568. Ethelbert, King of Kent, attacks Ceawlin, King of Wessex, and is driven back into his own territories.

A.D.
577. Battle of Dearham (*q. v.*).
586. Crida founds the kingdom of Mercia.
591. Ceawlin is defeated by his nephew Ceolric, and expelled; soon after which he dies.
597. Arrival of St. Augustine. (*See* CANTERBURY.)
603. The Scots invade Bernicia, but are repulsed, with much slaughter, by Ethelfrith.
610. Tewdrick, King of the Welsh, defeats Ceolwulph, King of Wessex.
617. Ethelfrith, King of Bernicia, is defeated and slain by Redwald, King of East Anglia, and Edwin becomes King of Deira and Bernicia.
626. Quicelm, King of Sussex, makes an unsuccessful attempt to assassinate Edwin, who is preserved by his thane Lilla.
642. Penda, King of Mercia, defeats and slays Oswald, King of Bernicia.
655. Oswy, King of Bernicia, slays Penda.
661. Edilwalch, King of Sussex, obtains possession of the isle of Wight and part of Hampshire.
664. A great plague rages in Britain.
687. Sussex is united to Wessex.
688, April 20. Death at Rome of Cadwallader, the last King of the Britons.
694. Kent is devastated by the West Saxons.
704. Ethelred, King of Mercia, voluntarily resigns his crown, and retires into a monastery.
727. Ina, King of Wessex, quits the throne, and retires to Rome.
755. Insurrection in Mercia, and death of King Ethelbald.
777. Offa, King of Mercia, commences an intercourse with Charlemagne.
787. The Danes (*q. v.*) first land in England.
800. Egbert is recalled from exile to ascend the throne of Wessex.
813. Egbert lays waste West Wales.
823. Essex is united to Wessex.
824. Kent is united to Wessex.
825. Northumbria is united to Wessex.

The date usually assigned for the dissolution of the Heptarchy (*q. v.*) is 827; but the title "King of the English" was first assumed, according to Hume, by Edward the Elder, son of Alfred the Great, in 901. Sharon Turner makes Athelstan the first king of all England, and fixes 934 as the year when he assumed the title.

THE HEPTARCHY.

KINGS OF KENT.

A.D.
455. Hengist.
488. Aesc.
512. Octa.
534. Ermric.
560. Ethelbert.
616. Eadbald.
640. Ercombert.
664. Egbert.
673. Lothaire.
685. Edric.
690. Wihtred.
725. Ethelbert and Edbert.
748. Ethelbert alone.
760. Alric.
774. Sigiraed, Eadbert, and Eardulph.
786. Egebert.
798. Cudred.
805. Baldred.
824. Submitted to Egbert, King of Wessex. (United to Wessex.)

KINGS OF SUSSEX.

A.D.
491. Ella.
514. Cissa.
588. Ceawlin, King of Wessex.
592. Ceolric, ditto.
598. Ceolwulph, ditto.
611. Cynegils, ditto.
612. Quicelm.
636. Cynegils, King of Wessex (again).
643. Cenwalch, ditto.
648. Edilwalch.
687. Cadwallader, or Ceadwalla, King of Wessex. (Permanently united to Wessex.)

KINGS OF WESSEX.

A.D.
519. Cerdic.
534. Kenric.
560. Ceawlin.
592. Ceolric.
598. Ceolwulph.
611. Cynegils.
643. Cenwalch.
674. Seaburga.
674. Escwin and Kentwin.
686. Cadwallader, or Ceadwalla.
688. Ina.
727. Ethelheard.
740. Cuthred.
754. Sigebyrth and Cynewulf.
784. Brithtric.
800. Egbert.
837. Ethelwulph.
858. Ethelbald.
861. Ethelbert.
867. Ethelred.
870. Alfred the Great.

KINGS OF ESSEX.

A.D.
527. Erchenwin.
587. Sledda.
598. Sebert.
616. Saxred, Seward, and Sigibert.
623. Sigibert the "Little."
653. Sigibert II.
660. Swithelm.
665. Sebbi and Sigher.
683. Sebbi alone.
694. Senfrid and Sigeherd.
700. Offa.
709. Sucalred, or Suebricht.
746. Swithred.
791. Sigeric.
799. Sigerid.
823. Egbert, King of Wessex. (United to Wessex.)

KINGS OF EAST ANGLES.

A.D.
527. Uffa.
578. Titel.
599. Redwald.
624. Eorpwald.
630. Sigibert.
644. Egric Anna.
655. Adelhere Edewald.
664. Aldulph.
683. Selred.
747. Alphuald.
749. Humbean and Albert.
758. Beorna and Ethelred. (Obscure period.)
870. Edmund, the king and martyr, slain this year.

KINGS OF MERCIA.

A.D.
586. Crida.
595. Wibba.
616. Ceard.
625. Penda.
650. Wulfhere.
675. Ethelred.
704. Cenred.
709. Ceolred.
716. Ethelbald.
755. Offa.
788. Offa and Ecgfrid.
796. Cenulph.
819. Ceolwulph.
821. Beornwulph.
826. Ludican.
836. Wiglaf.
835. Bertulph.
852. Burthed.
875. Ceolwulph.
892. Ethelred.

KINGS OF DEIRA.

A.D.
559. Ella, or Alla.
589. Ethelric, King of Bernicia.
593. Ethelfrith, ditto.
617. Edwin.
633. Osric.
634. Oswald, King of Bernicia.
644. Oswin.
652. Oswy, King of Bernicia.
662. Alfred.
670. Ecgfrid, King of Bernicia. (United to Bernicia, taking the name Northumbria.)

KINGS OF NORTHUMBRIA, OR BERNICIA.

A.D.
547. Ida.
559. Adda.
568. Clappa.
571. Theodulf.
572. Freothulf.
579. Theodric.
586. Ethelric.
593. Ethelfrith.
617. Edwin, King of Deira.
633. Eanfrid.
634. Oswald.
643. Oswy.
670. Ecgfrid. (United to Deira, the two kingdoms being called Northumbria.)
685. Alfred.
705. Eadwulph (3 months).
705. Osred I.
716. Cenred.
718. Osric.
730. Ceolwulph.
737. Eadbert.
758. Oualph.
759. Ethelwald, surnamed Mollo.
765. Alred.
774. Ethelred.
779. Alfwold.
789. Osred II.
790. Ethelred (restored).
796. Oswald, Eardulf.
808. Alfwold.
810. Eanred (submits to Egbert, King of Wessex, 825).
867. Ella and Osbert, rival sovereigns of Northumbria, are slain by the Danes.
871. Egbert, succeeded by Ricseg (who died 876).

BRITANNIA THEATRE (London).—This establishment, erected on the site of the Britannia Saloon, with seats for 2,500 spectators, was opened Monday, Nov. 8, 1858.

BRITANNIA TUBULAR BRIDGE, over the Menai Strait, was commenced in 1846, and opened March 5, 1850. It was designed and executed by Robert Stephenson, and is the first structure of the kind.

BRITANNY (France), or BRETAGNE.—This name was given to a portion of Armorica (*q. v.*), in which some Britons from Cornwall formed a colony, in the latter part of the 4th century. The country was subjugated by

Charlemagne. In 841 the Bretons regained their independence and were ruled by their own sovereigns,[1] tributary at times to the Frankish kings. Charles II. (the Bald), after several severe struggles, induced its sovereigns to do homage to him, and this was afterwards rendered to the dukes of Normandy.

A.D.
818. Louis I. (the Pious) of France intrusts Nominoë with delegated authority.
841. Nominoë revolts, becomes the first duke, and captures the march-land of Rennes.
843. First expedition of Charles II. into Britanny. He is compelled to retreat on account of the severity of the weather.
845. Charles II. undertakes a second expedition, and is defeated at Baldon, the battle lasting two days.
848. Nominoë assumes the title of king, and obtains the golden crown from the Pope.
850. Charles II. enters Britanny for the third time. Nominoë, again victorious, dies suddenly.
851. His son, Herispoë, succeeds, and does homage to Charles II. Dissensions arise between France and Britanny, and Charles II. invades it for the fourth time.
852. Charles the Second's fifth expedition leads to a peace.
858. The Bretons, incensed at the alliance with the Franks, are induced by Solomon, Herispoë's nephew, to revolt, and Herispoë is killed in a church. Solomon succeeds.
861. A portion of Britanny is assigned to Robert-le-Fort, by the great council held at Compiègne.
874. Solomon, deposed by a cousin and a nephew, is cast into prison, and these relatives, Pasquitain and Gurvard, divide Britanny between them.
877. Alain I., surnamed the Great, obtains the supremacy.
907. The Northmen ravage Britanny, which, divided into four great counties, Rennes, Nantes, Vannes, and Cornouailles, remains for some time in a very distracted state.
921. Britanny is ceded to the Northmen by Count Robert.
922. Rollo's supremacy is acknowledged in Britanny.
931, Sep. 29. The Bretons revolt against the Northmen.
934. Guillaume Longue-épée, having vainly sought to induce the Bretons to return to their allegiance, invades and subdues them. The Channel Islands and other parts of Britanny are annexed to Normandy.
937. Athelstane, King of England, interferes in behalf of Alain II., who recovers part of Britanny. Cornouailles is permanently annexed to Normandy.
938–43. Alain II. defeats the Northmen at Dôl, St. Brieux, and Nantes, and obtains part of Anjou
944. The Northmen invade Britanny. Confusion prevails for several years.
992. Geoffrey I. rules all Britanny, and takes the title of Duke.
1076. William I. of England invades Britanny, but retires, the duke being supported by Philip I. of France.
1148. Three dukes rule in Britanny.
1182. Marriage of Geoffrey of Anjou, Duke of Britanny, with Constance, daughter of Duke Conan.
1186. Geoffrey II. is killed at a tournament at Paris.
1196. Arthur, posthumous son of Geoffrey II. and Constance, is acknowledged Duke of Britanny.
1203, April 3. Mysterious death of Arthur, at Rouen.
1224. Alliance of France and Britanny against the English.
1237. Abdication of Peter I. (Mauclerc), who is succeeded by John I.
1309. A project to render Britanny subject to England is prevented by the people.
1341. The duchy of Britanny is disputed by Charles de Blois and John de Montfort, the former being supported by Philip VI. of France, and the latter by Edward III. of England.
1378. Unsuccessful incursions by John of Gaunt, Duke of Lancaster.
1398, Oct. 20. Peace in Britanny, after long wars.
1399. Death of John IV., "the Valiant," who is succeeded by his infant son John, under the tutelage of his mother.
1423. A treaty between Britanny and Henry VI. of England is made against France.
1426. War is declared between England and Britanny.
A.D.
1449. Alliance between the Duke of Britanny and the King of France, who fight in concert against the English.
1450. Francis I. poisons his brother Giles, and dies, soon afterwards, from fear and remorse.
1489. Marriage, by proxy, of Anne of Britanny to Maximilian, King of the Romans.
1491. Charles VIII. of France annuls the marriage between Anne of Britanny and Maximilian, and weds her himself.
1501. Treaty of Trente, whereby Claude, the infant Princess of Britanny, is betrothed to Prince Charles of Austria, on the condition that her duchy shall constitute her dowry.
1514. Death of Anne, and marriage of Claude with the Duke of Angoulême.
1515. The Duke of Angoulême becomes Francis I. of France, and receives the duchy of Britanny from his wife Claude.
1524. Death of Claude, who bequeaths Britanny to the dauphin.
1532. Britanny is finally annexed to France.

DUKES OF BRITANNY.

A.D.		A.D.	
992.	Geoffrey I.	1305.	Arthur II.
1008.	Alain III.	1312.	John III.
1040.	Conan II.	1341.	Charles de Blois and John de Montfort.
1066.	Hoel II.	1345.	Charles alone.
1084.	Alain Fergent.	1364.	John IV.
1112.	Conan III.	1399.	John V.

1237.	John I.		
1286.	John II.		

BRITISH AMERICA.—Sir Walter Raleigh formed a settlement in North America, in 1585, which, in honour of Queen Elizabeth, was called Virginia. It did not, however, succeed, and Sir Francis Drake, who touched there in 1586, brought the colonists to England. Another attempt was made in 1607, when the first permanent settlement of the English in America was formed at Jamestown, in Virginia. Other colonies were speedily established. The inhabitants of Virginia and of other parts of the American continent under English rule, in 1776, declared their independence, which was recognized by England in 1782. A conference of delegates from the dependencies of Great Britain in North America assembled at Quebec Oct. 10, 1864, to consider the propriety of a federal union of those provinces under the British crown, and passed resolutions affirming the desirability of such a union, provided it could be effected on principles just to the several colonies. (The British colonies in America are noticed under their names.)

BRITISH ARCHÆOLOGICAL ASSOCIATION (London).—This society was established in 1843, for the promotion of research into the arts and monuments of the Middle Ages existing in England. The Archæological Institute (*q. v.*), founded the same year, was also originally termed the British Archæological Association, its name having been changed at the annual meeting held at Winchester, Sep. 9–15, 1845. The 22nd annual meeting of the British Archæological Association took place at Durham, Aug. 21–26, 1865.

BRITISH ARCHITECTS.—(*See* ARCHITECTURAL SOCIETIES.)

BRITISH ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE, instituted by Sir David Brewster, to promote scientific investigation and discovery, held its inaugural meeting at York in Sep., 1831. The annual meetings have been held at the following places :—

A.D.	
1831.	York, 1st.
1832.	Oxford, 1st.
1833.	Cambridge, 1st.
1834.	Edinburgh, 1st.
1835.	Dublin, 1st.
1836.	Bristol.
1837.	Liverpool, 1st.
1838.	Newcastle, 1st.
1839.	Birmingham, 1st.
1840.	Glasgow, 1st.
1841.	Plymouth.
1842.	Manchester, 1st.
1843.	Cork.
1844.	York, 2nd.
1845.	Cambridge, 2nd.
1846.	Southampton.
1847.	Oxford, 2nd.
1848.	Swansea.
1849.	Birmingham, 2nd.
1850.	Edinburgh, 2nd.
1851.	Ipswich.
1852.	Belfast.
1853.	Hull.
1854.	Liverpool, 2nd.
1855.	Glasgow, 2nd.
1856.	Cheltenham.
1857.	Dublin, 2nd.
1858.	Leeds.
1859.	Aberdeen.
1860.	Oxford, 3rd.
1861.	Manchester, 2nd.
1862.	Cambridge, 3rd.
1863.	Newcastle, 2nd.
1864.	Bath.
1865.	Birmingham, 3rd.

BRITISH AUXILIARY LEGION.—In June, 1835, the Foreign Enlistment Act was suspended, and a legion formed in this country under the command of Gen. Evans to assist the Queen of Spain in suppressing the Carlist Revolution. The war was waged with great fury, and in June, 1836, Gen. Evans issued a proclamation declaring that every Englishman found fighting on the side of Don Carlos would be put to death as a traitor.

BRITISH BANK (London) was established in 1849, under the act to regulate joint-stock banks (7 & 8 Vict. c. 113), Sep. 5, 1844. It stopped payment Sep. 3, 1856, and in consequence of the mismanagement and the malversation of the capital by its directors, the government ordered a criminal prosecution. The trial of eight directors commenced in the Court of Queen's Bench Feb. 13, and terminated with a sentence of guilty Feb. 27, 1858, when Humphrey Brown, Edward Esdaile, and Hugh Innes Cameron were sentenced to one year's, Alderman R. H. Kennedy to nine months', W. D. Owen to six months', and H. D. Macleod to three months' imprisonment. James Stapleton was discharged on the payment of a fine of one shilling, and the eighth defendant, Loran de Wolfe Cochran, did not surrender. An act (20 & 21 Vict. c. 54) to make better provision for the punishment of frauds committed by trustees, bankers, and other persons entrusted with property, received the royal assent Aug. 17, 1857.

BRITISH CHURCH.—The Gospel was introduced into Britain at a very early period, but whether preached, as some authorities assert, by St. Paul between A.D. 63 and 66, it is impossible to decide. To Lucius, to Joseph of Arimathea, and to others, the honour of its introduction has been, on different grounds, attributed. Milman says there can be no doubt that during the 2nd and 3rd centuries Britain gradually received the faith of Christ. The British Church is often mentioned by writers of the 2nd and 3rd centuries; and British martyrs suffered under the edicts against the Christians issued by Diocletian in 303. Bede describes the death of Alban, the protomartyr of England, in 304. Julius, Aaron (the names adopted by these early converts at their baptism), and several members of the British Church, suffered martyrdom about the same time. Sees were founded in the island, and colleges established. British bishops were present at the councils of Arles, in 314, and of Nicæa, the first general council, in 325. It was not until the 7th century that Rome attempted to interfere. Gregory I., about the year 597, sent Augustine and a band of monks to bring the British Church into subjection to Rome. Ethelbert, King of Kent, was converted, and a struggle between the early British Church and Gregory's emissaries at once commenced. Differences existed respecting the time for the celebration of Easter and other points. Augustine peremptorily required the British Christians to conform in every respect to the Latin Church, uttering the remarkable threat that if they refused to comply they should perish at the hands of their enemies. By some authorities Augustine is said to have died in 605, but it seems probable that this event did not take place till later. It is supposed that the massacre of the British monks in Wales, by Ethelfrid, King of Northumbria, in 607, if not perpetrated under his immediate direction, was undertaken at his instigation. Though the emissaries from Rome at length triumphed, yet the more intolerant claims of the papal rulers were rejected by the British people. At the Reformation the entire system was overthrown, and the British Church restored to that state of independence and purity in which it had originally existed in these islands.

BRITISH COLUMBIA (North America), called at first New Caledonia, comprises "all such territories within the dominions of her Majesty as are bounded to the south by the frontier of the United States of America, to the east by the main chain of the Rocky Mountains, to the north by Simpson's River and the Finlay Branch of the Peace River, and to the west by the Pacific Ocean." Queen Charlotte's Islands and all other islands adjacent, with the exception of Vancouver' Island, are included in this colony, erected by 21 & 22 Vict. c. 99 (Aug. 2, 1858). This portion of America was first discovered by the Spaniards in the 16th century, and was visited by Sir Francis Drake in 1579, and called by him New Albion. The first settlement was formed in 1806. Small quantities of gold were discovered in Queen Charlotte's Island in 1850, and on the mainland in 1853. The intelligence was not, however, made public until June, 1856, when numerous diggers flocked to the country. Gold-fields were discovered on the Frazer and Thompson rivers in 1858, and large numbers of the gold-diggers from San Francisco went in that direction during the summer of that year. Silver was discovered in 1860, and other metals are said to exist in abundance. British Columbia was made a bishop's see in 1858.

BRITISH GUIANA (South America), consisting of Berbice, Demerara, and Essequibo, which were formed into one colony in 1831. Stabrock, now called George-Town, on the Demerara, is the capital. Slavery was abolished in 1834, and in 1838 the system of

apprenticeship was abandoned. In 1827 this territory was included in the bishopric of Barbadoes and the Leeward Isles. It became an archdeaconry in 1838, and was erected into a separate bishopric in 1842.

BRITISH INSTITUTION (London), for the encouragement of British artists, received its charter June 4, 1805, and was opened Jan. 18, 1806. The summer exhibition of the works of deceased artists was established in 1813. The building was erected by Alderman Boydell, for his gallery of Shakesperian pictures.

BRITISH METEOROLOGICAL SOCIETY (London), established in 1850 for the encouragement and promotion of meteorological science.

BRITISH MUSEUM (London), was formed of three collections,—the Cottonian (*q. v.*), the Harleian (*q. v.*), and the Sloane (*q. v.*). For these, and a bequest made by Arthur Edwards, Esq., in his will, dated June 11, 1738, one general repository, within the precincts of London and Westminster, was ordered to be provided by 26 Geo. II. c. 22 (1753). Trustees were appointed, and the powers to raise £300,000 by lottery were also granted. Montague House, Bloomsbury, was purchased for £10,250 of Lord Halifax in 1754, the Duke of Montague having died in 1749 without male heir. Arrangements were immediately made for adapting it to the purposes of the new institution

A.D.
1756. The books are transferred to Montague House.
1757. George II. presents the library collected by his predecessors.
1759. Monday, Jan. 15. The reading-room, entrance in Montague Place, is opened to the public.
1764. A collection of 30,000 tracts and MSS., bound in volumes for the use of Charles I., is purchased by George III., who presents it to the Museum.
1772. March 20. Sir W. Hamilton's collection is purchased for £8,410.
1801. New rooms are added for Egyptian antiquities.
1805. The Townley marbles are purchased for £20,000.
1807. The Lansdowne MSS. are purchased for £4,925.
1810. A larger room is allotted to readers. The Greville collection of minerals is purchased for £13,727.
1815. The Phigalian marbles are purchased for £19,000.
1816. The Elgin marbles are purchased for £35,000.
1818. Dr. Burney's MSS., &c., are purchased for £13,500.
1820. The new building is commenced.
1823. George the Third's Library, consisting of 63,000 volumes, said to have cost £130,000, is presented by George IV. to the British Museum.
1831. The Arundel Library is added.
1845. The old house is removed.—Oct. 28. By a codicil of this date the Hon. Thomas Grenville bequeaths his library, consisting of 20,240 volumes, said to have cost above £54,000.
1847. April 19. The portico is finished.
1854. The first grant for a new reading-room is obtained.
1855. Jan. The first standard for the new room is fixed.
1857. May 8. The new reading-room is opened.
1864. July. A refreshment room is opened for readers and officials.
1865. July 10. The bookbinders' workshops, containing several valuable MSS., are destroyed by fire.

BRITISH ORPHAN ASYLUM (London).—This institution, founded at Clapham Rise in 1827, was removed to a new building at Slough, in Buckinghamshire, opened by the Prince and Princess of Wales, June 24, 1863.

BROAD BOTTOM ADMINISTRATION.—Lord Granville having been compelled to retire from the Pelham ministry, Nov. 24, 1744, fresh arrangements were made which resulted in the formation, during the following month, of a coalition between the chiefs of different parties. From this circumstance it was ludicrously called the Broad Bottom Administration.

First Lord of the Treasury and Chancellor of the Exchequer	The Hon. Henry Pelham.
Lord Chancellor	Lord Hardwicke.
President of the Council	Duke of Dorset.
Privy Seal	Earl Gower.
Secretary of State	Duke of Newcastle, Lord Harrington, and Marquis of Tweeddale, resigned in 1746.
Admiralty	Duke of Bedford.
Master of the Ordnance	Duke of Montague.
Master of the Horse	Duke of Richmond.
Lord Chamberlain	Duke of Grafton.
Lord Keeper, Scotland	Duke of Argyle.

This administration, with the exception of an interval of two days, Feb. 11 and 12, 1746 (*see* LONG-LIVED ADMINISTRATION), remained in power until the death of the Hon. H. Pelham, March 6, 1754. The following are the principal changes that ensued during the period:—The Earl of Chesterfield replaced Lord Harrington, who resigned the secretaryship of state Oct. 29, 1746. Lord Chesterfield, who resigned Feb. 6, 1748, was replaced by the Duke of Bedford Feb. 13, the Earl of Sandwich having taken the Admiralty Feb. 10. The Earl of Holdernesse superseded the Duke of Bedford June 21, 1751. Earl Granville became president of the council June 17, 1751. The Duke of Richmond was replaced as master of the horse by the Marquis of Hartington in 1751. Lord Anson took the Admiralty, vacated by the Earl of Sandwich, June 22, 1751. (*See* NEWCASTLE ADMINISTRATION.)

BROCCOLI.—Brought to Italy from the island of Cyprus in the 16th century.

BROKER.—Regulations for the city of London, passed in 1285, ordered that brokers should be admitted and sworn before the warden or mayor, and aldermen. Persons acting in defiance of this law were to be arrested and imprisoned, and were for ever inadmissible to the franchise. A parliament held by Edward III. in 1376, ordained that "no stranger merchant, nor other stranger, should use or exercise the occupation of 'brocage,' between merchant and merchant, or other persons, nor be a 'brocour' within the city of London or its suburbs;" and a petition was, in 1442, presented to Parliament demanding the enforcement of that law. They were called "broggers" in a statute of 10 Rich. II. (1386); and in 1574 Stow says there were but 30 of them in London.

BROMINE.—This elementary fluid body was discovered by Balard, a French chemist, in 1826.

BRÖMSEBRO, or BROEMSBROE (Treaty).—This peace, between Sweden and Denmark, was concluded Aug. 14, 1645. Christian IV. of Denmark ceded Gothland and other territories, and his son Frederick renounced Bremen and Verden.

BRONI (Battle).—Prince Eugène defeated the French at this place in Savoy in 1703.

BRONZE.—Works in bronze were known in very ancient times; and the Israelites, at the time of their escape from Egypt, B.C. 1491, had made some progress in the art, as appears from Exod. xxx. 18 and xxxi. 4. It was improved by the Greeks and Romans, and revived in

Italy about the 14th century. Bronze casting had almost reached perfection amongst the Greeks about B.C. 330.

BROOKES'S CLUB (London).—This Whig Club, established in the first instance as Almack's Club, then Goosetree's (*q. v.*), named after Brookes, a wine merchant and money lender, who took it and built a house for it in St. James's Street, which was opened in Oct., 1778. Brookes retired from the club soon after, and is said to have died in poverty in 1782.

BROOM-FLOWER IN THE HUSK.—This order of knighthood was instituted at Sens by Louis IX., on his marriage with Margaret, eldest daughter of Raymond Berengarius, Count of Provence, in 1234. It became extinct during the 15th century.

BROTFELD (Battle).—Paul Kinis, Count of Temeswar, and Stephen Bathori, Waiwode of Transylvania, defeated the Turks at this place in Hungary, Oct. 13, 1479.

BROTHERS' CLUB (London).—The rules of this political club were framed in 1713 by Dean Swift, who stated that its object was "to advance conversation and friendship, and to reward learning without interest or recommendation." It was dissolved in 1714, many of the members removing to the Scriblerus Club (*q. v.*).

BROTHERS AND SISTERS OF THE FREE SPIRIT.—This sect arose in Germany during the 13th century, and afterwards extended into France and Italy. Perverting the Scripture doctrine that the Holy Spirit is a spirit of freedom, they disallowed the claims alike of ecclesiastical and moral law, and having cultivated pantheism, and the grossest licentiousness, they were denounced by the councils of Cologne in 1307, and of Trèves in 1310, and shortly disappeared from the page of history.

BROTHERS OF CHARITY.—(*See* CHARITY.)

BROTHERS OF THE SWORD.—(*See* SWORD.)

BROWNISTS, or BARROWISTS.—The followers of Robert Browne, an ultra Puritan, born about 1550, who denounced the discipline and ceremonies of the Church of England, and having been imprisoned for a short time on account of his extreme views, quitted England, and formed a Church at Middleburg, in Zealand. In 1589 he returned to England, sought re-admission to the Church, and in 1590 received the rectory of Achurch, in Northamptonshire. He is said to have died in 1630,* in the prison of Northampton, in which he had been confined for striking a constable. On his deathbed he boasted of having been an inmate of 32 prisons. Landon says the Brownists "held all church officers and ministers to be unchristian and unlawful; that the evil of the minister does away with the efficacy of the Sacrament; that marriage is but a civil contract; that all forms of prayer are unlawful, and that even the Lord's Prayer is to be used only as a *model* for extempore prayer; that by communicating with the wicked at the Eucharist, the good become partakers in their wickedness; and that salvation was to be obtained only in their sect!" They were severely dealt with by the law. Elias Thacker was hanged June 4, 1583, and John Coping June 6, for distributing Browne's libels against the Book of Common Prayer. Henry Barrow, John Greenwood, and Henry Penny were executed, the two former April 6, and the latter May 29, 1593. From Henry Barrow these sectarians received the name of Barrowists. Sir Walter Raleigh, in 1592, stated that there were 20,000 Brownists. They formed a settlement at New Plymouth, in Massachusetts, in 1620. They were condemned by the synod of London in 1640, and afterwards took the name of Independents.

BRUCTERI.—This German tribe, subdued by Tiberius, A.D. 4, and by Cæcina in 15, retained a distinct nationality as late as the 5th century.

BRUGES (Belgium) ranked as a city in the 7th century, and was celebrated in the time of Charlemagne for its industrial productions. Bruges was fortified A.D. 837, walls were erected in 1052, and extended in 1270. The counts of Flanders, who resided at Bruges, obtained the rule in the 9th century. It became a member of the Hanseatic League in 1300, and passed under the sway of the dukes of Burgundy in the 14th century. It suffered from the ravages of fire in 1184, 1215, and 1230. Wycliffe, as second in a commission, was sent in 1375, by Edward III., to treat with the papal legate at Bruges, respecting the questions at issue between the king and Gregory XI. Wycliffe remained at this place from July 27 to Sep. 14. During the 15th and 16th centuries it attained the highest prosperity as an emporium of trade, and in 1429 Philip the Good, Duke of Burgundy, instituted the order of the Golden Fleece (*q. v.*), in commemoration of its celebrated woollen manufactures. Bruges passed to the Habsburg family in 1477, and the citizens rebelled against the Archduke Maximilian, and imprisoned him in 1488. During the religious struggles it surrendered to Spain, May 20, 1584. The Dutch bombarded Bruges without success in 1704; and it surrendered to the allied army in 1706, after the victory at Ramillies. The French took it by surprise July 5, 1708, and retired in 1709. The English took it in 1712, and the French again in 1745, and again in 1792. They were, however, expelled, but regained possession in 1794, and the inhabitants formally acknowledged the sovereignty of the French republic June 24. It was restored to the Netherlands in 1814, and has formed part of Belgium since 1830. Bruges was made a bishopric in 1561, which was united to Ghent in 1801. The town-hall at Bruges dates from 1377.

BRUGES (Treaty).—This alliance of England and Germany against Francis I. of France, called also the treaty of Windsor, was concluded at Bruges by Wolsey, Nov. 24, 1521, and ratified at Windsor by Henry VIII. and Charles V., in June, 1522. Henry agreed to invade France with 40,000 men, and promised to the emperor the hand of his eldest daughter Mary, who was affianced to the dauphin.

BRUNANBURG (Battle).—According to the best received account, Anlaf, the pagan King of the Irish, incited by Constantine III., King

* This date is not correct, as the parish registers of Achurch contain an entry in his handwriting dated May 21, 1631.—*N. & Q.*

of Scotland, sailed up the river Humber, with a fleet of 615 vessels; and having landed, was with his army encountered by Athelstan, who defeated him with much loss. The contest is said to have lasted from daybreak to dusk, and in no previous battle in England had so much blood been shed. It has been called the Waterloo of the Anglo-Saxons. The chronicles differ respecting the locality and the date of this battle. It probably took place somewhere in the immediate neighbourhood of the Humber, and about 937.

BRUNDISIUM, or BRUNDUSIUM (Italy).—This city of Calabria, situated on the shores of the Adriatic, was an important stronghold of the Sallentines, long before the surrounding Greek colonies of Tarentum, &c., were established. It was taken by the Romans B.C. 267, and became a colony of the republic B.C. 244. During the Illyrian war, B.C. 229, it was the naval and military station for the Roman fleet and army, and its fine harbour rendered it on many subsequent occasions the centre of warlike operations. Sylla landed here on his return from the Mithridatic war, B.C. 83, and Cicero selected its port as the scene of his return from exile, B.C. 57. Mark Antony laid siege to Brundisium B.C. 40, when peace was concluded before the attack was brought to an issue. Virgil died here B.C. 19. Brundisium, after declining in importance on the fall of the Western empire, was finally wrested from the Byzantine emperors by the Normans in the 11th century. (*See* BRINDISI.)

BRUNKEBERG (Battle).—Christian I. of Denmark was defeated by the Swedes under Sten Sture on this height, which forms part of the site of the modern city of Stockholm, in Oct., 1471.

BRÜNN (Moravia).—This town, made the capital of Moravia in 1641, and besieged by Torstenson in 1645, was entered by Napoleon I. Nov. 20, 1805, and became his head-quarters. It is the seat of a bishop.

BRUNSWICK formed part of Saxony during the reign of Charlemagne, and was made a separate lordship in 955. It was inherited by Henry the Proud, Duke of Bavaria, in 1126. One of his successors, Henry the Lion, was, in 1180, for his refusal to aid the Emperor in the war against the Pope, deprived of all his possessions, except Brunswick. In 1235, Otho, surnamed the Child, was made first Duke of Brunswick-Lüneburg, by the Emperor Frederick II. Various changes ensued, and in 1542 the duchy was divided into Brunswick-Lüneburg and Brunswick-Wolfenbüttel. (*See* HANOVER.)

BRUNSWICK, the capital of the duchy, formerly called Bruno Vicus, was founded by Bruno, Duke of Ostfalen, in 868. It was beautified and extended by Henry the Lion in the 12th century, and became one of the chief cities of the Hanseatic League in the 13th. Its annual fair, that afterwards became celebrated, was established in 1498. It suffered in various German wars, and was taken by the French July 28, 1757. They evacuated it early in 1758, and its fortifications were destroyed in 1794.

BRUNSWICK (Battle).—Otho of Brunswick, and Philip, Duke of Swabia, were competitors for the imperial crown of Germany, and the former, besieged in Brunswick by Philip, made a sortie in July, 1200. This brought on an engagement, in which Philip's army was defeated.

BRUNSWICK (House of).—The various branches of this family are derived from Albert Azzo I., Margrave of Este, in the 10th century. His great grandson, Albert Azzo II., married Cunegonda, and their son, Guelph IV., inherited the dukedom of Bavaria in 1071, and founded the junior branch of the Guelph family, from which the Brunswick House trace their descent. Otho was recognized as first Duke of Brunswick in 1235.

BRUNSWICK CLUBS, Orange societies formed in Ireland, in support of the principles of the revolution of 1689, and against Roman Catholic emancipation. The proposal for the establishment of these associations was made Aug. 28, 1828, at a meeting of the Dublin members of the Grand Orange Club that had then been recently suppressed; and the first general meeting was held in the Dublin Rotunda Nov. 4. Similar clubs were formed in other parts of Ireland. A meeting of Yeomanry was held on Pennenden Heath, Kent, Oct. 24, 1828, for the purpose of petitioning the House of Commons to preserve the Protestant constitution inviolate. Brunswick Clubs were also formed in Leeds, Leicester, and other parts of England.

BRUNSWICK-LÜNEBURG. — The modern duchy of Brunswick-Lüneburg was founded by William, the second son of Ernest I., who, on the death of his father, in 1546, took this portion of his dominions, with the title of Duke of Hanover. Ernest Augustus, one of his descendants, was made ninth Elector of the empire in 1692. His son, George Lewis, descended from James I. of England, on the female side, became King of England under the title of George I., Aug. 1, 1714. (*See* HANOVER.)

BRUNSWICK-WOLFENBÜTTEL.—The modern duchy of Brunswick-Wolfenbüttel was founded by Henry II., eldest son of Ernest I., in 1546. Several of its dukes distinguished themselves in the continental wars of the last century, and Charles William Ferdinand, who succeeded in 1780, led the Prussian army against the French at Auerstädt, Oct. 14, 1806, and having been wounded in that battle, died Nov. 10, 1807. All the Brunswick possessions were seized by the French after the victory at Jena, and by the eighth article of the treaty of peace between France and Prussia, signed at Tilsit July 9, 1807, incorporated with the new kingdom of Westphalia, conferred upon Jerome Buonaparte. They were, however, recovered by Frederick William, son of Charles William Ferdinand, in Dec., 1813. Representative institutions were introduced in 1820. The then reigning duke was expelled and took refuge in England Sep. 6, 1830, and his brother, Augustus Lewis William, assumed the sovereignty April 23, 1831.

BRUNSWICK THEATRE (London) was built in 1827, on the site of the old Royalty Theatre in Wellclose Square, burned down

April 11, 1826. The Brunswick Theatre, opened Feb. 25, fell during a rehearsal of "Guy Mannering" Feb. 29, 1828, when 12 persons were killed, and several houses on the opposite side of the street destroyed. It is sometimes called the New Royal Brunswick Theatre.

BRUNSWICKERS. — (*See* DEATH'S HEAD CORPS.)

BRUSA, BROUSSA, or BOURSA (Asia Minor), the ancient Prusa, was made the capital of the Turkish dominions in the 14th century; and although the sultans transferred their residence to Hadrianople about 1430, Prusa continued to be the Turkish capital until the capture of Constantinople, May 29, 1453. Abd-el-Kadir took up his residence here in 1852; but on its destruction by an earthquake, Feb. 28, 1855, he obtained permission from the French government to remove to Constantinople.

BRUSSELS, or BRUXELLES (Belgium).—St. Géry, Bishop of Cambray, built a chapel on one of the islands in the river Senne, in the 7th century. A large congregation was attracted by his eloquence, houses were built near his place of worship, and the town of Brussels was gradually formed. The Emperor Otho dates a decree "*apud Brusolam*," in 976. Walls with seven gates were formed round the town in 1044.

A.D.
1010. The Cathedral of St. Gudule is founded. (Some authorities gave a different date.)
1213. Brussels is taken by the English.
1273. St. Gudule is completed.
1300. The Old Palace is founded.
1314. Brussels is visited by the plague.
1340. The Museum is commenced.
1369. The walls are removed and the city is enlarged.
1370. The Jews are banished.
1380. A second wall is built.
1401. The town-hall is commenced.
1405. A large portion of the city is destroyed by fire.
1442. The town-hall is completed.
1488. The city is taken by Philip of Cleves.
1489. The plague commits great ravages.
1507. Brussels becomes the seat of government for the Low Countries.
1518. The towers are added to the cathedral.
1567. Alva attempts to establish the Inquisition. 10,000 artisans quit Brussels.
1568, June 5. Execution of Egmont and Horn. (*See* HOLLAND.)
1578. The plague rages with great fury.
1695. Villeroi bombards the city, destroying a considerable portion.
1701. Brussels is captured by the French.
1706, Oct. 12. Marlborough enters Brussels.
1708, Nov. 22. It is assailed by the Elector of Bavaria.—Nov. 29. It is relieved by Marlborough.
1746. The Old Palace is rebuilt.—Feb. 16. Marshal Saxe takes Brussels.
1748. It is restored to Austria by the peace of Aix-la-Chapelle.
1749. The Museum is extended.
1770. The academy is founded.
1790, Nov. The Austrians regain possession of Brussels, which had revolted.
1792, Nov. 14. Dumouriez takes the city.
1794. Dumouriez, having been driven out, regains possession.
1803, July 21. Napoleon I. makes a triumphal entry.
1814, Feb 1. The Prussians enter Brussels. It becomes one of the capitals of the Netherlands.
1830, Sep. 23. Revolution. Brussels is made the capital of the new kingdom of Belgium.
1831, June 4. The National Congress at Brussels elects Leopold king.
1834, April 6. Riots occur in the city. The university is founded.
1848. A Peace Congress assembles at Brussels.
1853. A Statistical Congress assembles at Brussels.
1859, Aug. 31. The Assembly of Deputies, by a majority of 20, pronounce in favour of the fortification of Antwerp.—Sep. 6. The proposal is adopted by the Senate.—Sep. 8. It receives the royal assent.
1864, April 6. The foundation-stone of a new English church is laid by the Bishop of Oxford.
1865, Dec. 10. Death of Leopold I. (*See* LAEKEN.)

BRUSSELS (The Union of).—This confederacy, formed by the states of Holland in Jan., 1577, had for its object the expulsion of the Spaniards, the execution of the pacification of Ghent (*q. v.*), and the maintenance of royalty and the Roman Catholic religion. It was dissolved in 1578. (*See* UTRECHT, UNION OF.)

BRUSTEN (Battle).—Charles the Bold, of Burgundy, defeated the burghers of Liège at this village in the Netherlands, Oct. 28, 1467.

BRZESC LITEWSKI, or BREST LITEVSKI (Russia).—Suwarrow defeated the Poles at this place in 1794. It was occupied by the Russians in 1795, and became the seat of a military school in 1841.

BUBBLE ACT, passed in 1719 (6 Geo. I. c. 18), in order to punish unprincipled adventurers who proposed schemes merely as baits to extract money from the thoughtless. "The whole nation," says Tindal, "was become stock-jobbers. The South Sea scheme was like an infectious distemper, which spread itself in an astonishing manner. Every evening produced new projects, which were justly called Bubbles, and new companies appeared every day." The king issued a proclamation against them June 11, 1720. The act was repealed by 6 Geo. IV. c 91 (July 5, 1825).

BUCANEERS.—The term *boucan* was applied by the Caribbees to the flesh of cattle or fish dried in the sun. They taught this mode of curing to the early French settlers in Hayti or St. Domingo, and they were called boucaniers, or bucaneers, because they hunted wild boars and buffaloes, and preserved their flesh after this peculiar method. The term was afterwards applied to those bold and hardy adventurers, whether English, French, or Dutch, who assailed the Spanish settlements in America. On the failure of Dudley's conspiracy (*q. v.*) against Queen Mary, several of the confederates sought refuge at the court of Henry II. of France, who furnished them, in Aug., 1556, with three or four ships, in which they sailed with the avowed object of waging war against all Spaniards. Other expeditions were fitted out. The island of St. Christopher's was taken in 1623, and the little island of Tortuga, to the north of Hispaniola, in 1629. Here they carried on their piratical warfare, under various celebrated commanders. The Spaniards captured Tortuga in 1638, and the bucaneers regained possession in the following year. In 1603 the Dutch pirate, Van Horn, sailed at the head of 1,200 bucaneers, and took Vera Cruz. Morgan captured Panama in 1670; Grammont took Campeachy in 1685; and in 1697 Pointis seized Cartagena, and gained booty to the amount of £1,750,000. A treaty, called the treaty of America, for the entire suppression of this warfare, was concluded between Great Britain and Spain in 1670; but it was not until a few years after the peace of

Ryswick, Sep. 10, 1697, that the bucaneer confederacy was broken up.

BUCEPHALA (India).—This town, on the western bank of the Hydaspes, was founded by Alexander III., at the spot where he had crossed the river to attack Porus, an Indian king, whom he defeated, B.C. 327. It was built in memory of his famous charger, "Bucephalus," which expired in the hour of victory. Jelum, in the Punjaub, is supposed to occupy its site.

BUCHANITES.—This Scotch sect, followers of one Mrs. Elspeth Buchan, whose maiden name was Simpson, a woman of indifferent character, sprang up in Irvine in 1783. In conjunction with Hugh White, minister of the Relief congregation of Irvine, she attempted to gain converts; but an outbreak occurred, and they were both driven from the town in May, 1784. She was addressed "Friend Mother in the Lord," personified the woman mentioned in Rev. xii. 1, and pretended that Hugh White was her son (Rev. xii. 5). She promised her followers bodily translation to heaven; and on one occasion, after a long fast, led them to the top of a hill for that purpose. They retired to a place near Dumfries, where Mrs. Buchan died in May, 1791. On her deathbed she declared she had a secret to communicate, which was to the effect that she was the Virgin Mary. The last member of this fanatical sect is said to have died in 1846.

BUCHAREST (Wallachia) was captured by the Russians in 1769, and by the Austrians in 1789. By the treaty of Bucharest, concluded between Turkey and Russia at this place May 28, 1812, the former ceded Bessarabia to Russia, and thus the frontier of the last-mentioned power was extended to the Pruth. The Czar agreed to restore Anapa and other places in Asia to the Sultan; but this part of the treaty was not fulfilled; and soon after Russia had recovered from the disastrous effects of the French invasion, she again made war upon Turkey. The Russians occupied Bucharest in July, 1853, but quitted it on July 28. The Turks regained possession Aug. 8, and were followed by the Austrians Sep. 6 in the same year. The Austrian occupation terminated in 1856.

BUCKINGHAM PALACE (London).—Old Buckingham House occupied a portion of the mulberry garden, at which Evelyn relates that Lady Gerrard treated him and some others, May 10, 1654. The new palace is erected on the site of Buckingham House, so called from John Sheffield, Marquis of Normanby, made Duke of Normanby March 9, and Duke of Buckingham March 23, 1703. Old Buckingham House was erected by him in 1703. The government purchased it in 1761 for Queen Charlotte, upon whom it was settled by George III., in case she should survive him. Hence it was called the Queen's House, and here nearly all her children were born. The new palace was commenced in 1825, and Queen Victoria took possession July 13, 1837. It cost nearly £1,000,000 sterling. Improvements were effected in 1853.

BUDA, or OFEN (Hungary), the ancient Acincum, held by the Romans till about the 4th century. Arpad made it the residence of the Magyar chieftains about 900. The modern city was founded in 1240, and became the capital of Hungary in the 14th century. A council held here Sep. 14, 1279, ordered 69 canons for the regulation of the Church of Hungary to be promulgated. Another council was held at Buda, May 7, 1309. Solyman II. captured it Sep. 10, 1526, and Sep. 8, 1529. The Turks sacked it in 1541, and it was considered the key of the Ottoman empire until it was wrested from the Turks by the Austrians, under the Duke of Lorraine, Sep. 2, 1686. Its university was founded by Martin Corvinus between the years 1470—1490, and its library was destroyed by the Turks in 1527. Buda, seated on the Danube, is connected with Pesth by a bridge of boats. The Austrian army took Buda from the Hungarians Jan. 5, 1849.

BUDDHISM, long the prevailing religion in India, was, according to Sir William Jones, introduced into that country about B.C. 1,000, though later authorities are inclined to accept the traditional account of its introduction by Gautama, or Godama, about B.C. 500. A feud arose between the Buddhists and the Brahmins, and the former were expelled from the greater part of Hindostan, though Buddhism is still the prevailing religion in China, Japan, Ceylon, and other parts of Asia.

BUDE LIGHT, so named from the residence of its inventor, Goldsworthy Gurney, of Bude, Cornwall, by whom it was patented June 8, 1839, and March 25, 1841, is produced by the introduction of oxygen instead of common air into the centre of the flame. It has been adopted in the illumination of the House of Commons.

BUENOS AYRES (South America). — This province threw off the Spanish yoke in 1810, and with other South-American states issued a declaration of independence, July, 1816, and formed themselves into the Argentine Confederation (*q. v.*). A treaty of commerce between England and Buenos Ayres was signed Feb. 2, 1825. It separated from the Argentine Confederation, and became an independent state, in 1853.

BUENOS AYRES.—This city, the capital of the state of the same name, founded by Don Pedro de Mendoza in 1534, and abandoned, owing to the attacks of the Indians, in 1539, was not permanently colonized by the Spaniards until 1580.

A.D.
1620. Buenos Ayres is made the seat of a bishopric by Paul V.
1763, Jan. 1. An English and Portuguese expedition fails in an attack upon the city.
1775. It is made the seat of a viceroyalty.
1778. The river is thrown open by Spain.
1806, June 27. It is taken by the English, and a large amount of treasure secured.—Aug. 12. The Spaniards regain possession.—Oct. 29. It is retaken by the English.
1807, July 5. The English fail in an attempt to capture Buenos Ayres.
1825, Feb. 2. A treaty of amity and commerce is signed with Great Britain at Buenos Ayres.
1827-8. It is blockaded by the Brazilian fleet.
1859, Oct. 23. Indecisive battle between the forces of the Argentine Republic and of Buenos Ayres.—Nov. 10. A treaty is signed, by which Buenos Ayres again joins the Argentine Confederation.

A.D.
1860, June 6. The act of union between the Argentine Confederation and Buenos Ayres is signed and ratified.
1861, Aug. 29. War is announced with the Argentine Confederation.—Sep. 17. Gen. Mitre defeats the Argentine forces of Gen. Urquiza, at Pavon.—Nov. 23. Gen. Flores defeats the Argentine Gen. Virasoro, and thereby causes a majority of the states to declare for Buenos Ayres.
1862, Jan. 31. Order is declared re-established in most of the provinces.—Oct. 12. Gen. Mitre and Col. Paz are solemnly installed president and vice-president of the Argentine Confederacy.
1865, April 16. The Argentine Republic declares war against Paraguay.—May 4. Brazil, the Argentine Republic, and Uruguay conclude an alliance against Paraguay and Buenos Ayres.

BUFFALO TOWN (United States).—This town, and part of the enemy's squadron, with stores, were destroyed by the English army, after the defeat of the Americans at Black-rock (*q. v.*), Dec. 30, 1813.

BUHAWULPORE.—(*See* BAHAWULPORE.)

BUHL.—This mode of decorating furniture, by inlaying it with tortoise-shell, metal, or enamel, was invented by André Charles Buhl, *Tapissier en titre du Roi*, an Italian cabinet-maker settled in France (Louis XIV.), who died at the age of 90, in 1732.

BUILDING SOCIETIES.—The earliest association for enabling tenants to acquire absolute proprietorship in houses, after payment of a given amount of rent, was established at Kirkcudbright, in Scotland, under the auspices of the Earl of Selkirk, in 1815. Similar institutions, termed "Menages," soon became common in North Britain, whence they extended to England, where they became so numerous that Parliament passed "An Act for the Regulation of Benefit Building Societies," 6 & 7 Will. iv. c. 32 (July 14, 1836).

BULGARIA (East Turkey), the ancient Mœsia Inferior, was invaded by the Bulgarians in the 7th century, and named after them Bulgaria. The first kingdom lasted from 640 to 1018, when it was subjected to the Eastern empire by Basil II. The second, established about 1186, was annexed to the Ottoman empire in 1396.

A.D.
559. The Bulgarians, under Zabergan, invade Macedonia and Thrace, and are repulsed by Belisarius.
678. The Bulgarians, led by Asparuch, conquer the country between the Hæmus and the Danube.
788. The Bulgarians defeat the Thracians.
792. Cardam, King of the Bulgarians, defeats Constantine IV.
811, July 25. Crumn, King of the Bulgarians, defeats and slays the Emperor Nicephorus.
813. Battle of Berzinikia, in which the Emperor Michael I. is defeated by Crumn.
814. The Emperor Leo defeats and annihilates an army of 30,000 Bulgarians.
861. Michael and Bardas invade the territory of the Bulgarians, whose king becomes a Christian.
885. Bogoris, or Michael, first Christian King of Bulgaria, abdicates and retires to a monastery.
893. The Bulgarians defeat the Byzantine Gen. Leo Hatakalon.
917, Aug. 20. Battle of Achelous, in which the Bulgarians defeat the Byzantine army.
921. Simeon, King of Bulgaria, defeats the Byzantine forces, and plunders Constantinople.
923. The Emperor Romanus purchases peace from Simeon on the most humiliating terms.
981. The Emperor Basil II., who invades Bulgaria, is driven back, with great loss, by King Samuel.
A.D.
996. Samuel invades Greece. His army is totally routed, and he himself escapes with difficulty.
1014, July 29. Battle of Zetunium (*q. v.*).
1018. Death of Ladislaus, last King of Bulgaria, whose territory becomes a province of the Byzantine empire.
1040. The Bulgarians revolt, and seize upon Western Greece.
1186. The Bulgarians revolt from the Byzantine yoke, and establish a second monarchy.
1285. Bulgaria is overrun by the Tartars.
1330. It is made subject to Servia.
1393. It is invaded by Amurath I.
1396. The Sultan Bajazet conquers Bulgaria, and unites it to the Ottoman empire.

SOVEREIGNS OF BULGARIA.

FIRST KINGDOM.

A.D.		A.D.	
	Mœsus.	826.	Baldimir, or Vladimir.
700.	(circ.) Terbelis.	844.	Bogoris, or Michael.

SECOND KINGDOM.

A.D.		
1186.	Peter II.	Mytzes, A.D. 1258 or 1259, after whom the throne is a continual object of contention, till the conquest of Bulgaria by Bajazet, in 1396.
1196.	John I.	
1207.	Vorylas.	
1215.	John Asan II.	
1241.	Caloman I.	
1245.	Michael.	
1258.	Caloman II.	

BULGNEVILLE (Battle) fought at this place in France, July 2, 1431, between René of Anjou and Antony, Count of Vaudémont, for the succession of Lorraine. René, defeated and taken prisoner, was confined for many years in the "Tower of Bar," at Dijon.

BULJANAK (Battle).—A skirmish took place near this river in the Crimea, between 15,000 Cossacks and 500 British horse, Sep. 19, 1854. The former, having lost a few men, withdrew.

BULL.—This term, derived from the word *bulla*, a seal, was first applied to deeds, ecclesiastical as well as regal. Subsequently it was used to denote a papal edict, or rescript, written upon parchment, bearing a leaden seal, and issued by order of the Pope from the Roman chancery. The seals varied in form until 1088, when one side was impressed with the heads of Peter and Paul, the reverse bearing the name of the Pope and the year of his pontificate. Vigilius, in the 6th century, introduced the date of the regnal years of the emperors into bulls, and this custom was continued till the middle of the 11th century. In bulls of grace or favour the lead is attached by silken (red or yellow), and in those of punishment by hempen, cords. The preparation of bulls was entrusted to a college of 72 persons. (*See* ABBREVIATORS.) Pius V. published a bull against Elizabeth, April 25, 1570. Fenton, who posted a copy of it on the gate of the Bishop of London's palace, May 24, was taken and executed Aug. 8. By 13 Eliz. c. 2 (1570), bringing in bulls, or putting them into execution, was made high treason, for

which the penalty was death and forfeiture of property. The bull *in Cœnâ Domini*, excommunicating heretics and opponents of the papacy, was read in the Pope's presence every Maundy Thursday, until the time of Clement XIV. According to the ancient mode of pronouncing the sentence of excommunication, the Pope, after the reading of the bull, threw a lighted torch into the public place. It was declared void by the Council of Tours, Sep., 1510. Brief is the term applied to papal acts sealed with wax. Pius IX. published a bull or encyclical letter, accompanied by an appendix of 80 propositions, condemning certain "modern errors," amongst which he included Bible societies, and the belief that salvation can extend to any except members of the Roman Catholic Church, Dec. 8, 1864.

BULL-BAITING was a favourite amusement amongst the Egyptians, the Greeks, the Romans, and other ancient nations, and was frequently practised in this country during the Middle Ages, and even to a comparatively recent period. Fitzstephen, the monk of Canterbury, in his description of London in the 12th century, speaks of bull-baiting as then common; and Henzel, who visited England in 1598, gives a description of the sport. Evelyn mentions a visit he paid to the bear-garden June 16, 1670, when one of the bulls tossed a dog into the lap of a lady sitting in the boxes: he calls it "a rude and dirty pastime." The following occurs in an advertisement dated 1719:—"This is to give notice to all gentlemen, gamesters, and others, that on this present Monday is a match to be fought by two dogs at a bull, for a guinea, to be spent; which goes fairest and farthest in wins all. Likewise a green bull to be baited which was never baited before; and a bull to be turned loose with fireworks all over him." A bill for the suppression of this sport was introduced into the House of Commons April 3, 1800. Mr. Windham opposed the measure, declaring that it had existed more than one thousand years, and that it was a manly amusement. Mr. Canning contended that the amusement was a most excellent one; it inspired courage and produced a nobleness of sentiment and an elevation of mind. The bill was rejected by a small majority, and though a similar attempt in 1802 failed, bull-baiting has since been declared illegal, and by the act against cruelty to animals (5 & 6 Will. IV. c. 59, Sep. 9, 1835), persons keeping places for bull-baiting incur a penalty. The Stamford Bull-running, which took place annually Nov. 13, was in 1825 postponed till the next day, because the 13th fell on a Sunday. Bull-fights, said to have been introduced into Spain by the Moors, still form a favourite sport with the vulgar in that country. Isabella I., in the 15th century, vainly endeavoured to abolish them.

BULLETS, originally spherical, have, since the extensive adoption of rifled musketry, been introduced of conical and other elongated forms. Greener, in 1836, invented a plan for causing bullets to expand while leaving the gun, and thus to fill up the grooves in the rifled barrel, for which he was rewarded by Government with a grant of £1,000 in 1857.

BULLION REPORT.—The Bank of England having been restricted in 1797 from paying its notes in gold, the country possessed two independent and separate currencies, one metallic and the other of paper. These soon came to differ so widely in value that a select committee of the House of Commons was appointed, which published a report in 1810, asserting the fact that paper-money is always in danger of being over-issued, and consequently depreciated, unless its immediate conversion into gold is at all times possible.

BULL RUN, or BULL'S RUN (Battle).—(*See* MANASSAS, Battle.)

BULWER-CLAYTON TREATY, between England and the United States, relative to the establishment of a communication by ship canal between the Atlantic and the Pacific Oceans, was signed at Washington April 19, and ratifications were exchanged there July 4, 1850. It consisted of nine articles. The contracting parties declared that they would not erect fortifications on the banks or in the vicinity of the proposed canal, and that they would not assume dominion over Nicaragua, Costa Rica, the Mosquito Coast, or any part of Central America. Opposite and contradictory constructions having been placed upon this treaty by England and the United States, another, called the Clarendon-Dallas Treaty (*q. v.*), was, after various negotiations, signed at London, Oct. 17, 1856; but objections having been raised to it on both sides of the Atlantic, it was ultimately rejected, and the President, in his message for the year 1857, recommended the abrogation of the Bulwer-Clayton Treaty as the best method of solving the difficulty.

BUNDELCUND (Hindostan).—This extensive province, consisting of 33 states, five of which are tributary, attained great power, under a native dynasty, in the 11th century. Their rule was, however, subverted by the Delhi princes in 1183, and for a long period the country remained in a very unsettled state. By the treaty of Bassein (*q. v.*), Dec. 31, 1802, a portion of the province was ceded to the East India Company. Owing to the refractory conduct of certain chiefs, military expeditions were sent into portions of Bundelcund, and in the treaty of Poonah (*q. v.*), June 13, 1817, the articles of the treaty of Bassein were explained and amended; certain provisions being added calculated to prevent the recurrence of such disastrous outbreaks.

BUNDSCHUH.—(*See* PEASANTS' WAR.)

BUNKER'S HILL (Battle).—The revolted Americans having thrown up batteries and erected a formidable redoubt on Bunker's or Breed's Hill, an eminence that commanded the harbour of Charleston, were attacked in this position by the English, June 17, 1775. The latter amounted to 2,000, whilst the batteries and redoubt were defended by 5,000 men. In their advance the assailants suffered severely from sharpshooters, posted in the houses of Charleston. In spite of every obstacle the English had almost reached the works, when a terrific fire was opened upon them. Gen. Howe was for a few seconds left almost alone, several of the officers near having been either killed or wounded. The troops, however, rallied from

the confusion into which they had been thrown, and carried the works at the point of the bayonet. In this brilliant action 226 officers and men were killed, and 828 wounded. The American loss, according to their own representation, amounted to 450 killed, wounded, and missing, but it is believed to have been much greater.

BURA (Greece).—This town, which, with Helice (*q. v.*), was swallowed up by an earthquake, B.C. 373, was afterwards rebuilt, and its inhabitants, having shaken off the yoke of an oppressive tyrant, joined the Achæan League (*q. v.*) B.C. 275.

BURFORD (Battles).—Near this town, in Oxfordshire, Cuthred, King of Wessex, defeated Ethelbald, King of Mercia, in 752. Fairfax defeated the Royalist army here in 1649.

BURFORD CLUB.—This association was frequently mentioned in the documents connected with Layer's Conspiracy (*q. v.*). Having been called upon to explain the meaning, Layer declared it to be an appellation made use of by the Pretender and his agents to denote a club of Tory lords and others, of which association Lord Orrery was declared to be chairman. Earl Cowper, one of the lords mentioned as being a member, made a declaration, March 20, 1722, to the effect that he had never heard of such a club, and that he did not know, even by sight, three out of the six commoners named as being members. A committee of the House of Commons appointed to examine Layer, declared in their report that "the matters asserted of Burford's Club in Plunket's Letters, seem utterly inconsistent with the known characters of some of those persons."

BURGESS.—Previous to the Norman Conquest freemen not holding landed property, but permitted to occupy houses in towns as tenants of the Crown or some inferior lord, were called burgesses. The first writ summoning them to Parliament was issued by Henry III. in 1265, and they are mentioned as a distinct class from citizens by 5 Rich. II. stat. 2, c. 4 (1382). Several modifications in the definition and privileges of a burgess were introduced by the Municipal Reform Act, 5 & 6 Will. IV. c. 76 (Sep. 9, 1835).

BURGH.—(*See* BOROUGH.)

BURGHERS, ANTI-BURGHERS, and BURGHER SECEDERS.—These terms are applied in ecclesiastical history to the parties that grew out of the schism in the Scottish Church, caused by the induction of a pastor to the parish of Kinross, in direct opposition to the wishes of the congregation. After much discussion, eight ministers protested against this procedure, for which they were deprived, and their parishes declared vacant in 1740. Their congregations adhered to them, and so powerful did they become that, in 1745, they formed themselves into a synod, consisting of three presbyteries. An inquiry which they instituted into the lawfulness of certain oaths led to a further division amongst them, the subject being the particular oath administered in royal burghs when persons were admitted to the privileges of a burgess. The Burghers maintained that it was lawful to take the oath in question, while their opponents, the Anti-burghers, took a different view, and in 1746 carried a vote condemning the oath. In 1747 the Burghers mustered in great strength, whereupon the Anti-burghers withdrew, and formed a synod of their own. The rival persuasions were, after a long period of hostility and opposition, reunited in 1820 under the name of the United Associate Synod of the Secession Church.

BURGLARY.—This offence, defined as the breaking into and entry of a dwelling-house by night with felonious intent, was punished by 7 & 8 Geo. IV. c. 29 (June 21, 1827), and by all previous legislation, with death. By 7 Will. IV. and 1 Vict. c. 86 (July 17, 1837) the capital sentence was limited to cases where there had been violence to any person; and by 14 & 15 Vict. c. 19 (July 3, 1851), the being found by night with intent to commit a burglary was declared a misdemeanour, subjecting the offender to three years' imprisonment. All statutes on the subject were repealed by 24 & 25 Vict. c. 95 (Aug. 6, 1861), and by 24 & 25 Vict. c. 96, s. 52 (Aug. 6, 1861), the punishment for burglary was limited to penal servitude for life or not less than three years, or imprisonment not exceeding two years.

BURGOS (Spain), the capital of the ancient province of Burgos, was founded by Diego Porcelos, A.D. 884. The Cid was buried in this city in 1099. The bishopric of Oca or Auca was transferred to Burgos in 1077. It was made an archbishopric by Gregory XIII., Oct. 22, 1574. The cathedral was founded in 1221, and completed in 1567. Councils were held at Burgos in 1080, and in Oct., 1136. In the 15th century Burgos was made a royal residence. Charles V. transferred the court to Madrid in the 16th century, and from that time Burgos gradually declined. The French committed ravages in 1808. Wellington besieged it, and carried some of the works Sep. 19, 1812, but failed in an attempt to take it by storm Oct. 18 in the same year. The French blew up the castle and retired, June 12, 1813.

BURGUNDIAN CROSS.—This order of knighthood was instituted at Tunis, by the Emperor Charles V., on the feast of St. Mary Magdalen, July 22, 1535.

BURGUNDIANS, or BOURGUIGNONS.—(*See* ARMAGNACS.)

BURGUNDY.—The Burgundiones, a Vandal tribe, established themselves in the southern portion of Gaul about B.C. 406; and from them the country received its name. They succeeded in forming a kingdom, which, says Gibbon (ch. xxxviii.), "was defined by the course of two Gallic rivers, the Saone and the Rhone, extended from the forest of Vosges to the Alps and the sea of Marseilles." A second kingdom of Burgundy, also called Arles (*q. v.*), was established by Rodolph I. in 888.

FIRST KINGDOM OF BURGUNDY.

A.D.

413. Gundicar, King of the Burgundians, receives a grant of land from Jovinus, and permanently settles in Gaul.

435. The Burgundians are defeated by Aetius, and the country is invaded by the Huns.

A.D.
491. Gondebaud murders his brother Chilperic, and seizes his kingdom.
500. Gondebaud is defeated by Clovis I., King of the Franks.
523. Sigismund, King of Burgundy, is made prisoner, and put to death by the Franks.
532. Clotaire and Childebert make war upon Burgundy.
534. Clotaire and Childebert conquer Burgundy, and render it subject to the Franks.

SOVEREIGNS OF BURGUNDY.

A.D.		A.D.	
413.	Gundicar.	491.	Gondebaud.
436.	Gunderic.	516.	Sigismund.
466.	Chilperic I.	523.	Gondemar.

BURGUNDY, or BURGUNDY PROPER, was erected into a duchy during the reign of Charles II. (the Bald), and assigned to his son-in-law, Richard le Justicier, at the Council of Quiercy, or Kiersy, June 14–16, 877. It underwent several changes, and was ultimately incorporated with France.

A.D.
943. Rodolph, Duke of Burgundy, is elected King of France, and resigns his duchy to Giselbert.
938. Hugh the Great, Count of Paris, and Hugh the Black, rule Burgundy between them.
943. Hugh the Great is sole Duke of Burgundy.
956. Death of Hugh the Great, who is succeeded by his son Otho.
987. Henry I., the Great, is confirmed in his title of Duke of Burgundy, with sovereign rights, by Hugh Capet.
1002. Death of Henry I., whose duchy is claimed by Robert of France and two other competitors.
1015. Henry II., son of King Robert, becomes Duke of Burgundy.
1032. Henry II. having become King of France the preceding year, makes his brother Robert Duke of Burgundy. With him begins a long succession of dukes.
1361. Death of Philip I., Duke of Burgundy, with whom terminates the first succession of dukes. John II., King of France, unites Burgundy to his own dominions.
1364. John II., King of France, erects Burgundy into a duchy, and bestows it upon his son Philip the Bold.
1369. Marriage between Philip of Burgundy and Margaret of Flanders.
1384. Philip inherits Flanders, Artois, Nevers, and other territories.
1407. John the Fearless causes the assassination of the Duke of Orleans, and is compelled to seek safety in flight.
1416. Secret treaty between John the Fearless and Henry V. of England.
1419. John the Fearless is assassinated at Montereau by the Orleanists.
1420. Philip the Good enters into an alliance with Henry V., and sanctions the treaty of Troyes.
1431. Philip the Good acquires Namur by purchase.
1430. Acquisition of Brabant and Limburg.
1435. Philip of Burgundy withdraws from his alliance with the English, and enters into a league with France.
1436. He acquires Hainault, Holland, and Zealand.
1443. Acquisition of Luxemburg.
1468, July 2. Marriage of Charles the Bold and Margaret, sister to Edward IV. of England.
1472. Charles the Bold invades France, ravages Normandy, and adds Guelderland to his dominions.
1476. Charles the Bold invades Switzerland, where he is defeated.
1477, Jan. 4. Death of Charles the Bold at the battle of Nanci (*q. v.*). Louis XI. seizes part of the duchy.—Aug. 19. Mary, daughter and successor of Charles, marries Maximilian of Austria.
1479. Louis XI. of France seizes Burgundy, and annexes it to France.
1482. Mar. 27. Death of Mary of Burgundy, in consequence of a fall from her horse.
1482. Dec. 23. Treaty of Arras (*q. v.*).

DUKES OF BURGUNDY.

A.D.		A.D.	
877.	Richard le Justicier.	1142.	Eudes II.
921.	Rodolph.	1162.	Hugh III.

1102.	Hugh II.	1467.	Charles the Bold.
		1477.	Mary of Burgundy.

BURIAL is the most ancient mode of disposing of the dead. Abraham buried his wife Sarah in the cave of Machpelah, B.C. 1859 (Gen. xxiii. 19). It was practised amongst ancient nations, although burning of the dead was at one period common amongst the Greeks and Romans. Burial in woollen material only was ordered by 18 Charles II. c. 4 (1666). This statute was repealed by 30 Charles II. st. 1, c. 3 (1677), which enforced new regulations, and inflicted a penalty of £5 in every case where a person was not buried in stuff made from sheep's wool only. Registers of burials were ordered to be kept in every parish. Further regulations were made by 32 Charles II. c. 1 (1680). These acts were repealed by 54 Geo. III. c. 108 (July 23, 1814). A tax of 4*s.* on each person on burials, to last five years from May 1, 1695, was imposed by 7 and 8 Will. III. c. 6 (1694). It was continued till Aug. 1, 1706, by 8 & 9 Will. III. c. 20, s. 14 (1697). In addition to the 4*s.*, a regular scale was imposed on the different ranks between a duke and a person possessing real property of £50 per annum, or personal property of £600. The burial of a duke was taxed at £50—that of the lowest in the scale 10*s.* (*See* CEMETERY.)

BURIAL CLUBS, or SOCIETIES, on the principle of friendly societies, were introduced into this country during the first half of the 19th century. It would appear that this is merely the revival of an ancient institution. Miller states (Anglo-Saxons, p. 363):—"The Saxons had also guilds or clubs, in which the artizans, or such as seem to have consisted of the middle classes, subscribed for the burial of a member, and a fine was inflicted upon every brother who did not attend the funeral. Thus, above 1,000 years ago, were burial societies established in England." As some irregularities arose from the insurance of children, the legislature interfered for their regulation.

BURKERSDORF (Battle).—Frederick II. of Prussia drove the Austrians from the heights of this town in Silesia, in the early part of the autumn of 1762.

BURKING.—The high price paid by medical practitioners for subjects for dissection, induced a man named Burke to endeavour to supply bodies, by decoying persons into his house, and then murdering them by suffocation. He carried on this inhuman trade at Edinburgh, and secured many victims, until he was at length detected, and suffered the extreme penalty of the law, Jan. 28, 1829. Burke, from whom it was called burking, admitted

having perpetrated 15 murders of the kind. A woman named M'Dougal, who was charged with being his accomplice, was acquitted. This crime was revived in London by Bishop and Williams, who were convicted of burking an Italian boy, and were executed Dec. 5, 1831. They admitted having murdered several persons in this manner.

BURLINGTON ARCADE (London) was opened to the public March 20, 1819.

BURLINGTON HEIGHTS (Battle).—In a night attack upon the American camp near this place, in New Jersey, June 6, 1813, an English force, consisting of 704 men, completely routed the Americans, 3,500 strong, including cavalry. The action was continued during the night; but the Americans were repulsed in every attempt to retrieve their disaster, and eventually took to flight, leaving 100 prisoners and four guns in the hands of the victors.

BURMAH (Asia).—This extensive kingdom, sometimes called Ava, from its capital, when first visited by the Portuguese in the 16th century, was divided into four states,—Arracan, Ava, Pegu, and Siam. Very little is known of its history previous to the establishment of intercourse with Europe. Buddhism is said to have been introduced amongst the inhabitants about A.D. 301. The seat of the government was removed from Panya to Ava in 1364. With the assistance of the Portuguese, the Burmese subdued the Peguans. Ralph Fitch, who travelled in India at the end of the 16th century, is the first English writer who notices Burmah.

A.D.
1687. The English take possession of the island of Negrais, at the mouth of the Irawaddy.
1709. Capt. Hamilton visits Burmah.
1740. The Peguans revolt.
1752. Ava is captured by the Peguans, and the Burmese are completely subdued.
1753. Alompra recovers Ava, and builds Rangoon.
1754. The Peguans are defeated in another attempt upon Ava. The French assist the Peguans, and the English the Burmese, in this struggle.
1755. Alompra is again victorious.
1757. Alompra captures Pegu. The East India Company obtain a site for a factory.
1760. Alompra, who is taken ill whilst besieging the capital of Siam, withdraws his army, and dies on his way home.
1766. Shembuan captures Ayuthia, or Yuthia, the Siamese capital.
1767. Burmah is invaded by a Chinese army of 50,000 men. They are defeated, with great slaughter.
1771. The Siamese revolt, and regain their independence.
1781. Amarapora is made the capital of Burmah.
1783. Arracan is annexed to Burmah.
1785. The Burmese fail in an attack upon the island of Junkseylon or Salang.
1786. The Burmese invade Siam, and are again repulsed.
1793. Peace is concluded between Burmah and Siam. The provinces of Tenasserim, Mergui, and Tavoy are ceded to Burmah.
1794. The Burmese make inroads upon the territories of the East India Company in pursuit of robbers.
1795. A satisfactory explanation is given, and war is averted.
1810. Salang is conquered.
1811. Arracan is invaded by a Mugh force.
1819. The Burmese make further inroads upon the territories of the East India Company.
1823, Sep. 23. The Burmese attack and overpower a British guard on the island of Shapuree.
1824, March 5. The Governor-General of India declares war.—May 11. Rangoon is captured. Cheduba, Negrais, Tavoy, Mergui, Martaban, the whole of Tenasserim, and Yeah, surrender.

A.D.
1825, Feb. 1. Assam is conquered.—March 8. Gen. Cotton is defeated at Donabue.—April 2. It is captured; and Arracan, after a series of actions, March 26, 27, 28, and 29.—April 25. Prome is entered.—Sep. 17. An armistice for one month is signed, and afterwards extended to Nov. 2.—Dec. 1, 2, and 5. The armistice is broken, and the Burmese army defeated at Prome (*q. v.*).—Dec. 26. The Burmese send a flag of truce.
1826, Jan. 1. The first conference is held.—Jan. 3. A treaty is signed, but is not ratified.—Jan. 18. Hostilities are resumed.—Jan. 19. Melown is captured.—Feb. 9. The Burmese are defeated at the battle of Pagahm Mew.—Feb. 24. Treaty of Yandaboo (*q. v.*).
1850, Dec. 28. Rangoon is destroyed by fire.
1851. Complaints by English seamen of ill-treatment are received from the governor of Rangoon. Reparation is demanded and refused.
1852, Jan. 4. The British force the passage of the Irawaddy.—Jan. 10. The batteries at Rangoon fire upon the *Fox* man-of-war.—April 5. Martaban is taken.—April 14. Rangoon.—April 19. Bassein.—Oct. 10. Prome.—Nov. 21. Pegu.—Dec. 30. Pegu is annexed to India by proclamation.
1853. Several marauding chiefs are punished.—June 30. The termination of the Burmese war is officially proclaimed by the Governor-General of India.

BURNEL.—(*See* ACTON BURNEL.)

BURNETT PRIZES.—Mr. Burnett, of Dens, Aberdeenshire, born in 1729, on his death in 1784 bequeathed the bulk of his fortune to found prizes to be awarded to the authors of the two best treatises on "The evidence that there is a Being all-powerful, wise, and good, by whom everything exists; and particularly to obviate difficulties regarding the wisdom and goodness of the Deity; and this independent of written revelation, and of the revelation of the Lord Jesus; and from the whole to point out the inferences most necessary and useful to mankind." The competition, which is open to all, takes place every 40 years, the first having occurred in 1815, when the highest prize of £1,200 was awarded to Dr. W. L. Brown, Principal of Marischal College, Aberdeen, and the second prize of £400 to the Rev. J. B. Sumner, afterwards Archbishop of Canterbury. On the second competition, in 1855, the first prize of £1,800 was received by the Rev. R. A. Thompson, and the second prize of £600 by the Rev. Dr. J. Tulloch, Principal of St. Mary's College, St. Andrew's. In accordance with the founder's directions, these essays have all been published.

BURNING ALIVE was a common punishment, amongst ancient nations, for various kinds of offences. The Anglo-Saxons used it in certain crimes, and it was the ordinary punishment for witchcraft during the Middle Ages. Blackstone says:—"In treasons of every kind, the punishment of women is the same, and different from that of men. For as the decency due to the sex forbids the exposing and public mangling their bodies, the sentence is, to be drawn to the gallows, and there to be burned alive." The "Scandalous Chronicle" contains an account of a woman, named Perrotte Mauger, who was burned alive at Paris in 1460 for having committed several robberies, and having harboured thieves and housebreakers. Criminals were generally strangled and their bodies afterwards burned. Katherine Hayes, who suffered for the murder of her husband, was, through the carelessness of the executioner, really burned alive at Tyburn,

Nov. 3, 1726. The last woman executed in this manner was Christian Murphy, alias Bowman, March 18, 1789, for coining. The law was altered by 30 George III. c. 48 (1790), which provided that after June 5, 1790, women under this sentence were to be hanged. Death at the stake was long considered the only method of extirpating heresy, and as early as 304, Alban, the protomartyr of England, suffered in this manner. Lord Hale says:—"Before the time of Richard II., that is, before any acts of Parliament were made about heretics, it is without question, that in a convocation of the clergy or provincial synod, they might and frequently did here in England proceed to the sentencing of heretics." By 29 Charles II. c. 9, s. 1 (1676), the writ commonly called *breve de hæretico comburendo*, with all process and proceedings thereupon in order to the executing such writ, or following or depending thereupon, and all punishment by death, in pursuance of any ecclesiastical censures, was utterly taken away and abolished.

BURNING THE DEAD.—(*See* CREMATION.)

BURNING-GLASSES.—Gibbon (ch. xl.) remarks:—"A tradition has prevailed that the Roman fleet was reduced to ashes in the port of Syracuse by the burning-glasses of Archimedes; and it is asserted that a similar expedient was employed by Proclus to destroy the Gothic vessels in the harbour of Constantinople, and to protect his benefactor Anastasius against the bold enterprise of Vitalian. A machine was fixed on the walls of the city, consisting of an hexagon mirror of polished brass, with many smaller and moveable polygons to receive and reflect the rays of the meridian sun; and a consuming flame was darted to the distance, perhaps, of 200 feet. The truth of these two extraordinary facts is invalidated by the silence of the most authentic historians; and the use of burning-glasses was never adopted in the attack or defence of places. Yet the admirable experiments of a French philosopher (Buffon have demonstrated the possibility of such a mirror; and, since it is possible, I am more disposed to attribute the art to the greatest mathematicians of antiquity, than to give the merit of the fiction to the idle fancy of a monk or a sophist." Leonhard Digges, in his "Pantometria," published in 1571, speaks of a burning-glass which he had constructed on the plan of Archimedes; John Napier, the inventor of logarithms (1550—April 3, 1617), mentions them as a means of defence. Dr. Gregory sent one that he had constructed to Sir Isaac Newton in 1673. That eminent man's attention having been thus directed to the subject, he is said to have constructed one himself. Kircher investigated it with much perseverance. Vilette constructed several burning mirrors of great magnitude, and experiments were tried in this country with one of them in June, 1718. Buffon made several successful experiments in 1747. Parker, in 1800, and other men of science at later periods, have improved the construction of burning-mirrors.

BURNLEY (Lancashire) is supposed to have been an early Roman settlement, and to have been visited by the Christian missionary Paulinus in 597. The town, which contained 53 families in 1311, continued unimportant till the introduction of the cotton manufacture, about 1780. The grammar school was established in 1578, and the barracks in 1819. Mr. Howard gave 16 acres of land for the site of an infirmary to be called the Howard Institution, March 4, 1864.

BURSE.—This title for a place of resort for financiers and commercial men, now generally termed an exchange, was first applied to the burse at Bruges, formed early in the 16th century. Lewis Roberts, in "The Merchants' Mappe of Commerce," published in 1638, says:—"This city Bruges hath an eminent market-place, with a publick-house for the meeting of all merchants at noon and evening; which house was called the *Burse*, of the houses of the extinct family Bursa, bearing three purses for their arms engraven upon their houses, from whence these meeting-places to this day are called *burses* in many countries, which in London we know by the name of the Royal Exchange, and of Britain's Burse." The burse at Antwerp was established in 1531: that at Amsterdam in 1608; at Paris 1784. The first stone of Britain's Burse, or the first Royal Exchange in England, was laid by Sir Thomas Gresham, June 7, 1566, and the building was opened by Queen Elizabeth, Jan. 23, 1571.

BURSLEM Staffordshire), the principal town for the manufacture of English pottery during the 17th century, was the birth-place in 1730 of Josiah Wedgwood, by whom this important branch of native industry was carried to its highest perfection. The town-hall was erected in 1761, and the market established in 1825. The county constabulary force was introduced here in 1842. The first stone of the Wedgwood Institute was laid by Mr. Gladstone, Oct. 26, 1863.

BURY ST. EDMUNDS, or ST. EDMUNDSBURY Suffolk).—This town received its name from Edmund, King of East Anglia, who was crowned at Bury on Christmas Day, 856. He was taken prisoner by the Danes, and refusing to renounce the Christian faith, suffered martyrdom, Monday, Nov. 20, 870. According to the chroniclers, his persecutors bound him to a tree, scourged him, shot him with arrows, and beheaded him. On account of his heroic constancy, he was afterwards canonized, and a monastery dedicated to him was founded at Bury. Stephen Langton and the barons met here Nov. 20, 1214, and agreed upon the demands which form the basis of Magna Charta. Henry III. held a parliament at Bury in 1267; Edward I. held another Nov. 3, 1296; and Henry VI. another Feb. 10, 1447; and his example in this respect was on one or two occasions followed by some of his successors. A large portion of the town was destroyed by fire in 1608. The grammar school was founded in 1550.

BURYING ALIVE.—This mode of punishment was occasionally resorted to by the Jews and other nations of antiquity. Herodotus mentions burying alive as a Persian custom, and states that Xerxes buried alive nine sons and nine daughters of the Edonians; and that Amestris, the wife of Xerxes, in her old

age ordered 14 children, selected from the best Persian families, to be buried alive, in order to show her gratitude to the god under the earth. In ancient Rome it was the punishment awarded to the vestal virgin who violated her vow (*see* VESTALS); and, during the Middle Ages, nuns were for a similar offence subjected to the same penalty. Sir Walter Scott, in "Marmion," describes the manner in which it was carried out. The culprit was placed in a small niche, made in the massive wall of the convent, a slender meal of water and bread was deposited in it, and at the words *Vade in pace* the opening was closed. Skeletons have been discovered in an upright position in the ruins of abbeys in this country, and it is probable that they are the remains of persons who had been for some offence or other immured. It was at one time the punishment for a female thief.

BURYING-PLACE.—The Jews and other ancient nations buried their dead in fields, near the highways, and other places, without the walls of their cities and towns. Plutarch relates of Lycurgus, that, in order to do away with superstition and to accustom the youth of Sparta to such sights, he ordered the dead to be buried within the city, and permitted their monuments to be erected near the temples (B.C. 830—820). In ancient Rome, the bodies of her more illustrious men were allowed, as a favour, to be buried within the city. The Twelve Tables prohibited burial in the city. Hadrian and several emperors published edicts against the practice. Bingham shows that no burying-places existed either in cities or in churches during the first three centuries of our æra. Graves in the public roads, or vaults and catacombs in the fields, were used for this purpose. The Christian emperors prohibited the practice several centuries later. The origin of the change in the custom appears to have arisen from the erection of churches over the graves of martyrs, or the removal of their relics into the churches, and this commenced in the 4th century. The next step was the burial of emperors and kings in the church porch, or some outer building of the church, which originated in the 5th century; and to this privilege the people were admitted in the beginning of the 6th century. The Council of Braga, May 1, 563, allowed burial in the churchyard, but prohibited it within the walls. Hereditary burying-places were forbidden in the 9th century (Council of Meaux, June 17, 845); but this was afterwards allowed by a decree of Leo V., inserted in the decretals of Gregory IX. about 1230. From this later period it became customary for bodies to be buried in churches and in family sepulchres. (*See* CEMETERY, CHURCHYARD, &c.)

BUSACO (Battle).—Massena and Ney were defeated at the convent of Busaco, near Coimbra, in Portugal, by Wellington, Sep. 27, 1810. The French attacked the British and Portuguese with a superior force. Their loss was 4,500 men killed and wounded, whilst that of the allies was only 1,300. Wellington soon after retired to the famous lines of Torres Vedras.

BUSHEL, supposed to take its name from an old English word, *buss*, signifying a "box," was regulated by several enactments. By 14 Edw. III. st. 1, c. 12 (1340), a standard bushel was ordered to be sent throughout the realm, according to a provision in 9 Hen. III., st. 1, c. 25 (1225), which ordained that only one measure should be used throughout the kingdom. The bushel of wheat was to contain 8 gallons by 12 Hen. VII. c. 5 (1496). By 22 Charles II. c. 8, s. 1 (1670), the Winchester bushel, containing 8 gallons, was ordered to be used in gauging corn or salt; and in 8 & 9 Will. III. c. 22, s. 9 (1697), it was declared to be a round bushel, with a plain and even bottom, being 18½ inches wide throughout, and 8 inches deep. The heaped bushel was done away with by 4 & 5 Will. IV. c. 49 (Aug. 13, 1834), the prohibition taking effect from Jan. 1, 1835. All former statutes were repealed, the Winchester bushel abolished, and a general measure established, from May 1, 1825, by 5 Geo. IV. c. 74 (June 17, 1824).

BUSHIRE (Persia) was made the seat of a factory by the East India Company in the 17th century. During the Persian war it was captured by the British forces, Dec. 10, 1856, and was occupied by them until the conclusion of peace, May 2, 1857.

BUSIRIS (Egypt).—Four places in ancient Egypt bore this name. One Busiris, in the Thebais, was utterly destroyed by order of Diocletian A.D. 296; and at another Busiris, on the west bank of the Nile, Merwan II., the last Caliph of the Ommiades, was slain, Feb. 10, 750.

BUSSORAH.—(*See* BASSORAH.)

BUTCHERS.—There were three classes of butchers among the Romans; viz., the *Suarii*, who provided hogs; the *Pecuarii*, or *Boarii*, who provided oxen, sheep, &c.; and the *Lanii*, or *Carnifices*, who killed the animals. During the Middle Ages, a common slaughter-house, in which the inhabitants had their beasts killed, was established in many towns. The butchers of Dunstable are said to have been the first to erect sheds, in 1279. A clause in the ordinary of the butchers' company at Newcastle-upon-Tyne, dated 1621, ordered that any member who killed flesh in that town during the Lent season without the general consent of the fellowship, should incur a penalty of £5 for each offence. Edward III., in a letter to the mayor and sheriffs, dated Feb. 25, 1361, ordered that no large beasts should be slaughtered nearer to London than Stratford on the one side and Knightsbridge on the other; and a similar injunction was made by Richard II. in 1380. A statute for the regulation of the trade was passed in 1531. The butchers were incorporated under letters patent of James I., bearing date Sep. 16, 1605. They were at that time an ancient fraternity. The blue dress is the uniform of a guild. By 24 Hen. VIII. c. 3 (1532), butchers were required to sell by weight "called Haver-du-Pois." A penalty was fixed for infraction of this law by 25 Hen. VIII. c. 1 (1533). By 27 Hen. VIII. c. 9 (1535), butchers were allowed from April, 1536, to April 12, 1540, to sell meat as they had done previous to the statute of 1532; and by 33 Hen. VIII. c. 11 (1541), former

regulations were repealed, and the privilege was continued.

BUTE ADMINISTRATION.—Its advent to power was caused by the retirement of Mr. Pitt, Oct. 5, 1761, from the Newcastle and Pitt (Chatham) Ministry, though the new ministry was not formed till the following year. Mr. Pitt's office was filled first by the Earl of Egremont, and afterwards by the Duke of Bedford. The Earl of Bute, who had been tutor to George III., was made prime minister May 26, 1762.

Treasury	Earl of Bute.
Lord Chancellor	Lord Henley.
President of the Council	Earl Granville.
Privy Seal	Duke of Bedford.
Chancellor of Exchequer	Sir Francis Dashwood, afterwards Lord Le Despencer.
Principal Secretaries of State	Earl of Egremont and Hon. Geo. Grenville.
Admiralty	Lord Anson.
Ordnance	Viscount, afterwards Earl, Ligonier.
Board of Trade	Lord Sandys.

On the death of Lord Anson, June 6, 1762, the Hon. George Grenville, who took the Admiralty, was replaced as Secretary of State by the Earl of Halifax. In Oct., 1762, Henry Fox, afterwards Lord Holland, paymaster of the forces, was made leader in the Commons, with a seat in the cabinet. This administration was assailed by Junius and Wilkes, and the Earl of Bute resigned April 8, 1763. His opponents called him "the favourite," and in some parts of the kingdom he was burned under the effigy of a jack-boot. (*See* GRENVILLE ADMINISTRATION.)

BUTTER.—The word rendered butter in our translation of the Old Testament (Gen. xviii. 8; Job xx. 17; and other passages) is supposed by the best biblical critics to signify cream or sour thick milk. Herodotus (B.C. 484—B.C. 408), in his notice of the Scythians, describes a rude process of churning practised amongst them; and as his account is confirmed by Hippocrates (B.C. 460—B.C. 357), Beckmann believes this to be the earliest mention of butter. It was probably introduced at a later period, though not generally, amongst the Greeks and Romans, who derived their knowledge of it from the Scythians. The Romans anointed the bodies of their children with butter; the Burgundians besmeared their hair with it; and Clemens of Alexandria (192) speaks of it as having been used by the early Christians in lamps, instead of oil. The trade is regulated by act of Parliament.

BUTTINGTON (Battle).—Ethelred collected an army and surrounded the Danes in their fortifications at Buttington, on the banks of the Severn, in 894. The Danes were so reduced by famine, having eaten their horses, that their leader, Hastings, was compelled to risk a sally towards the east. This led to a battle, in which the Danes were routed with great slaughter.

BUTUNTUM.—(*See* BITONTO.)

BUXAR (Battle). — Major, afterwards Sir Hector, Munro, with 7,072 men and 20 field-pieces, defeated the army of the confederated native princes of Hindostan, consisting of 40,000 men and a powerful artillery, at this fortified town in Bahar, Oct. 23, 1764. The loss of the latter was severe, 6,000 men having been left on the field of battle. The victors captured 133 pieces of artillery.

BYE, SURPRISE, or SURPRISING PLOT. —George Brooke, brother of Lord Cobham, who was engaged in the plot to place Arabella Stuart on the throne—this being termed the Main Plot, to distinguish it from the lesser scheme, the Bye Plot—had also conspired with Sir Griffin Markham, Lord Grey of Wilton, and two Roman Catholic priests, named Walton and Clarke, to seize James I., imprison him, compel him to change his ministers, and to grant liberty of conscience and the free exercise of religion. The existence of the plot was made known to the Government about midsummer, 1603, and in July the conspirators were apprehended. (*See* MAIN PLOT.)

BYZANT, or BEZANTINE. — William of Malmesbury (book iv. ch. 2) states that Byzantium, the original name of Constantinople, is still preserved in the imperial coin called a byzant. This coin was current in England from the 9th to the 14th centuries, and Camden, writing in the 16th, says "that a great piece of gold, valued at £15, which the king offered on high festivals, is yet called a Bezantine, which was anciently a piece of gold coined by the emperors of Constantinople; but afterwards there were two purposely made for the king and queen, with the resemblance of the Trinity, inscribed,—*In honorem Sanctæ Trinitatis;* and on the other side the picture of the Virgin Mary,—*In honorem Sanctæ Mariæ Virginis.*" The last were cast by order of James I., in 1603. The Turks, at the siege of Cæsarea, in 1102, are said to have hidden byzants in their mouths. The Crusaders struck the captives in the neck, whereupon the coin was disgorged. One writer declares that the bodies of the slain were also piled up and burned, for the purpose of obtaining the byzants which they had swallowed. A similar coin was struck in other countries; and in the reign of Stephen, a white or silver byzant, of the value of two shillings, is supposed to have been current in England.

BYZANTINE EMPIRE.—(*See* EASTERN EMPIRE.)

BYZANTINE HISTORIANS. —The Greek historians and writers in whose works are recorded the principal transactions of the Byzantine or Eastern empire, from A.D. 325 to 1453, are known by this name. A collected edition of their works was published at Paris 1645—1711; another, in 23 volumes folio, was published at Venice 1722—1733; and a new edition at Bonn was commenced in 1828.

BYZANTIUM was founded B.C. 667, by the navigator Byzas, with followers from Argos and Megara, and received a considerable accession of numbers from Megara under Zeuxippus, B.C. 628. It was captured by the Persians B.C. 505, and retaken by the Greeks under Pausanias, B.C. 477, from which circumstance he has been called its founder. Byzantium became subject to Athens B.C. 470, threw off the yoke B.C. 440, but again submitted. Alcibiades took it B.C. 408, Lysander B.C. 405, and Philip II. of Macedon made an attempt B.C. 340,

but was compelled to raise the siege B.C. 339. It was then allied with Rome, and eventually became a Roman colony. In the civil wars that ensued on the accession of Severus, Byzantium remained faithful to Niger, and after having sustained a siege of three years' duration, was reduced by famine A.D. 196. Severus ordered its walls to be demolished, and suppressed many of its privileges. Maximin took it after a siege of 11 days in 313, and in the civil war between Constantine and Licinius, the former captured it in 323. Struck with what Gibbon terms "the incomparable position of Byzantium," Constantine determined to make it the seat of his government, and an imperial edict for the building of the new city was issued in 324. The Emperor, at the head of a procession, marked out its boundaries, the capital was forthwith constructed, and inaugurated in May, 330. The rites of inauguration lasted 40 days, and the city received the title of Second or New Rome, which soon gave place to that of Constantinople, derived from its founder. The Byzantine Church is supposed to have been founded in the 1st century. (*See* CONSTANTINOPLE.)

C.

CAABA, or the SACRED STONE OF MECCA, was guarded by the Koreish tribe; and the term was applied to the temple in which it was kept. Gibbon (ch. l.) says that its genuine antiquity "ascends beyond the Christian æra;" and he describes the rites which the idolaters, and after them the Mussulmans, practised. "At an awful distance they cast away their garments: seven times with hasty steps they encircled the Caaba, and kissed the black stone: seven times they visited and adored the adjacent mountains: seven times they threw stones into the valley of Mina: and the pilgrimage was achieved, as at the present hour, by a sacrifice of sheep and camels, and the burial of their hair and nails in the consecrated ground." Mohammed destroyed the 360 idols of the Caaba in 630. The Carmathians despoiled the temple in 929, and bore away the black stone, which was, however, afterwards restored.

CAB.—This term, an abbreviation of cabriolet, is applied to the conveyances introduced into London in 1820. The Cab and Omnibus Men's Sunday Rest Society was established in London in 1858, and the Cabmen's Club Aid Society in 1861. (*See* HACKNEY COACH.)

CAB STRIKE.—Displeased with the provisions of 16 & 17 Vict. c. 33 (June 28, 1853), reducing the fare from 8*d.* to 6*d.* per mile, London cabmen withdrew their vehicles after midnight on Tuesday, July 26, 1853. The strike lasted three days, during which time locomotion was entirely paralyzed. Arrangements having, however, been made for bringing up vehicles from various provincial towns, the cab proprietors and drivers returned to their work Saturday, July 30.

CABAL.—Soon after the dismissal of the Earl of Clarendon, Aug. 30, 1667, the formation of the secret council, called the Cabal, commenced. It has been incorrectly stated that the name "Cabal" originated from the initial letters of the names of the five members of this ministry. This is not the case, as the word "cabal" had been employed at an earlier time to denote a secret council, or what is now termed the cabinet. Its influence was directed principally to foreign affairs, and it was, when fully formed, in 1670, composed of the following members: Sir Thomas, afterwards Lord Clifford, Lord, afterwards Earl of Arlington, the Duke of Buckingham, Lord Ashley, afterwards Earl of Shaftesbury, and the Earl of Lauderdale. Sir William Coventry was associated with them. The passing of the Test Act (25 Charles II. c. 2), early in 1673, spread disunion in its ranks; and by the spring of 1674 it was entirely dissolved. Hallam (Eng. ii. ch. xi.), whilst admitting that their counsels soon became "extremely pernicious and dishonourable," declares, "the first measures after the banishment of Clarendon, both in domestic and foreign policy, were highly praiseworthy."

CABATUAN.—The chief city of Panay, one of the Philippines, was founded in 1732.

CABBAGE was introduced into England at an early period, and is noticed in documents of the 13th century. Henry says the better kind was known in the time of Edward IV. It is supposed that Evelyn, in assigning the introduction of the cabbage from Holland to the 16th century, alludes to some particular sort. The soldiers of Cromwell's army are said to have introduced the plant into Scotland.

CABBALISTS.—Jewish doctors, who study the Cabbala, described by Dr. Moore as a traditional doctrine or exposition of the Pentateuch, which Moses received from God on Mount Sinai. Prideaux considers Cabbalist to be the general name of those who profess the study and knowledge of all manner of traditions, which are of the interpretative part of the Hebrew Scriptures. Hallam declares (Lit. pt. 1, ch. 3) that the Cabbala is the offspring of the Alexandrian Jews and not far from the beginning of the Christian æra. It was revived during the 11th and 12th centuries.

CABINET COUNCIL.—(*See* ADMINISTRATIONS OF GREAT BRITAIN.)

CABIRA (Battle).—Mithridates VI. (the Great) was defeated near this city, in Pontus, by Lucullus, B.C. 71. The Roman general captured the town itself and secured a large quantity of treasure.

CABLES were made of hemp, rush, papyrus, barks of trees, &c., from time immemorial. Iron cables were first suggested in the narrative of M. Bougainville's voyage of discovery, which was published in 1771, but no attempt was made to adopt them till Slater obtained a patent for their manufacture in 1808. The first vessel fitted with iron rigging was the *Penelope*. She made her trial trip in 1811, and satisfactorily proved the efficacy of the system, which was generally adopted in the royal navy in 1812. Capt. Brown invented the proving machine, for testing chain-cables, in 1813.

CABOCHIENS.—In 1412, John the Bold, Duke of Burgundy, armed a chosen body of about 500 journeymen butchers or skinners, who took the name of Cabochiens, from John Caboche their leader. They maintained the cause of Burgundy against the Armagnac faction, and, ruling Paris in the most despotic manner, kept the inhabitants in a state of constant terror. The citizens rose against them in 1418.

CABRERA (Mediterranean).—One of the Balearic Islands (*q. v.*), was used by the Spaniards as a depôt for French prisoners from 1808 to 1813.

CABRIOLET.—(*See* CAB.)

CABRITA POINT (Sea-fight).—Sir Thomas Dilkes engaged with a French squadron off Cabrita Point, March 10, 1705, when two out of the five ships of which the French squadron consisted were driven on shore and destroyed, and three were captured.

CABUL, or CABOOL (Affghanistan), the capital of a territory of the same name, is said to have been founded by Pusheng. Baber acquired possession of it in 1504, and in 1547 his son Humáyun expelled his brother Camran from the city. On the accession of Akbar, at the age of 13 years, in 1556, Cabul was seized by Mirza Soliman; but it was again added to the empire of the Mogul in 1581. An insurrection was quelled in 1611. Nadir Shah took Cabul in 1737, and in 1774 it was made the capital of Affghanistan by Timour Shah, who died there May 20, 1793. In 1801 a revolt of the Ghiljies took place at Cabul; but after severe struggles it was suppressed, May 11, 1802. In 1809, Shah Shooja was deposed and driven from the city by Futteh Khan, who was murdered in 1818, after which Cabul fell into the hands of Dost Mohammed. Shah Shooja was restored by the English May 8, 1839. An insurrection broke out at Cabul Nov. 2, 1841, and many English officers were massacred; and the British commenced their disastrous retreat from Cabul, leaving Lady Sale and others prisoners in the hands of the enemy, Jan. 6, 1842. Cabul was retaken by Gen. Pollock Sep. 15, 1842. Gen. Nott arrived with another force the following day. Operations for the destruction of the great bazaar at Cabul, the most celebrated building of Central Asia, in which Sir W. McNaghten's body had been exposed, were commenced Oct. 9, and the objects of the expedition having been fully accomplished, a portion of the English army evacuated Cabul Oct. 11, and the whole force gradually withdrew from Affghanistan. (*See* AFFGHAN WAR.)

CACHAO (Anam), the capital of Tonquin, was nearly demolished by an incendiary fire during the 17th century. Since 1820 the sovereign has resided in Cochin China, and Cachao has suffered in consequence.

CACHAR, or HAIRHUMBO (Hindostan).—This province was invaded by the Burmese in 1774, but no conquests were effected. The Brahminical religion was introduced in 1780. In 1813 Rajah Govind Chunder became sovereign of Cachar. He was soon expelled, and in 1818 Choorjeet gained the ascendancy and maintained it for five years, when Govind Chunder was restored. This prince, finding himself unable to protect his kingdom against Burmese invasion, sought the assistance of the British, and concluded a treaty of alliance with them March 6, 1824. He was assassinated in 1830, and his territory was annexed to the possessions of the East India Company by a treaty signed at Seenaputtee, Nov. 3, 1834.

CACHET.—(*See* SEALED LETTERS.)

CADAN (Treaty), concluded at this town in Bohemia, June 29, 1534, between Ferdinand, King of the Romans, and Ulric VI., Duke of Würtemberg. Ulric was recognized as legitimate governor of his duchy, on condition that it should become a fief of the house of Austria, to be absorbed, on the extinction of the ducal line, into the imperial dominions. The confederates of Smalcald, who were parties to the treaty, recognized Ferdinand as King of the Romans.

CADDEE LEAGUE originated in Switzerland, and was occasioned by an alliance formed between the subjects of Hartmann, Bishop of Coire, and the Counts of Werdenberg, in 1396. The peasantry of Upper Rhætia assembled by night at Trons in 1400, and exacted from their feudal lords a recognition of their right to independence, justice, and security. A second league, formed at the same place in May, 1424, was attended by the nobles as well as by the peasantry, and all present pledged themselves to unite for the maintenance of justice and public safety. Owing to the predominant colour of the costumes at this meeting, it is known as the *Grey League*, or *League of the Grisons* (*q. v.*). A similar alliance, the third league, known as the *League of the Ten Jurisdictions*, was established in 1436, and in 1471 the three confederacies met at the village of Vazerol, and united for mutual defence and assistance.

CADESIA (Battle).—The Saracens defeated the Persians on this plain, near Cufa, in 636. Some authorities are, however, of opinion that this battle was fought early in 635. The battle lasted four days, and the different periods were distinguished by peculiar appellations. The first was called the day of *succour*, because a Syrian reinforcement reached the army; the second the day of *concussion*, the third the day of *embittered war*, and the fourth of *cormorants*, or *howling*, or *barking*. The Saracens sacked Ctesiphon, and obtained the province of Irak, or Assyria.

CADE'S INSURRECTION.—Several risings took place in different parts of England in 1450, caused by general dislike of the Duke of Suffolk. The most formidable was excited in Kent during the month of May, by John Cade, an Irish soldier of fortune, who assumed the name of Mortimer, called himself John Amendall, and claimed relationship with the Duke of York. He encamped on Blackheath June 1, defeated the royal army at Sevenoaks June 27, and slew its commander, Sir Humphrey Stafford. Their demands were set forth in 15 articles. Cade entered London July 1, beheaded Lords Say and Sele, and others, July 3, and was expelled by the citizens July 5. He was killed by Alexander Iden, sheriff of Kent, July 11, and his head was exhibited on London Bridge. Several of his followers were executed.

CADETS' COLLEGE (Sandhurst). — The junior department of the Royal Military Col-

lege was remodelled and received this name in 1858.

CADIZ (Spain), the ancient Gadir, Latin form Gades, was the seat of a Phœnician colony B.C. 1100. The inhabitants entered into an alliance with Rome B.C. 212, and this was confirmed B.C. 78. Julius Cæsar conferred the civitas on all its citizens B.C. 49, and it was made a municipium by Augustus. The Goths destroyed it on their invasion of Spain, 415—418, and it was ravaged by the Danes in the 9th century. The Moors held it for many years, until it was wrested from them by Alonzo the Wise in 1262. It was made a bishopric in 1264. Sir Francis Drake burned several ships in its harbour April 19, 1587; and Lord Howard of Effingham and the Earl of Essex captured Cadiz June 21, 1596. Two galleons, 13 ships of war, and 24 merchantmen, were taken or burned. The town was plundered and the fortifications were destroyed. An English expedition failed in an attack in 1625, and another Aug. 15, 1702. Nelson bombarded it July 3 and 5, 1797. Victor invested it in 1810, and raised the siege Aug. 12, 1812. Insurrections broke out July 7, 1819, and Jan. 1, 1820, and massacres ensued March 9 and 10 in the latter year. It was taken from the revolutionary Cortes by the French, under the Duke d'Angoulême, Oct. 3, 1823, and held by them until 1828. It has two cathedrals, one built in 1597, and the other commenced in 1720, and completed in 1840. Its academy of arts was founded in 1789.

CADMIUM.—This metal was discovered by M. Stromeyer in 1817.

CADSAND (Zealand).—This island was captured, its Fleming garrison defeated, and the town sacked and burned, by the Earl of Derby, Nov. 10, 1337. It was overrun by the republican army in 1797; and part of the Walcheren expedition landed in Cadsand July 29, 1809. It was ceded to France by treaty, March, 1810, and was restored to Holland at the close of the war.

CÆCILIA DIDIA LEX, enacted B.C. 98, limited the legislative power of the Roman tribes by prohibiting the promulgation of any law containing provisions on different subjects, and insisting on an interval of seven days between the proposing and passing of a bill.

CAEN (France), originally called Cathern or Cathorn, was an important city in the 10th century. Henry I. captured it in 1105, Edward III. in 1346, and Henry V. Sep. 4, 1417. The French recovered it in 1449, and it has since remained in their possession. The church of the abbey of St. Etienne, now the cathedral, was founded by William I between 1061 and 1070. The town was a favourite residence of William I. and his wife Matilda, both of whom were buried here. Louis XI. concluded a treaty at Caen with the Duke of Britanny, Dec. 22, 1465, and it was ratified on the following day. The Girondists raised a revolt here in 1793.

CAERLEON, or CASTLE OF THE LEGION (Monmouthshire), the Isca Silurum of the Romans, is supposed to have been the chief city of Wales when it formed a Roman province, and was the permanent station of the second legion until its removal in the 5th century. St. Alban, Aaron, and Julius, the protomartyrs of England, suffered here A.D. 304. The seat of the archbishopric was removed from Caerleon to St. David's in 521.

CAERMARTHEN (Wales), the ancient Maridunum, was made a Roman station A.D. 70. Merlin, the Welsh prophet, is said to have been born here in the 5th century.

CAERNARVON (Wales).—Edward I. laid the foundations of the castle in 1282, which was not completed for 10 years. Edward II. was born here April 25, 1284. Edward I. granted the town a charter in 1284, being the first accorded to any town in Wales. The Welsh captured the castle, and put its garrison to the sword in 1294. It was taken and retaken during the civil wars.

CÆSAREA (Cappadocia), originally called Mazaca, afterwards Eusebea, which was changed to Cæsarea by Tiberius (A.D. 14—37), and founded by Aram, King of Armenia, B.C. 1827, was the residence of the kings of Cappadocia. It was taken by Tigranes, and by the Persians under Sapor, about A.D. 260, and again under Chosroës II. in 612. The gospel was preached here by St. Peter and St. Paul; and it became the metropolitan see of Pontus. A council was held at Cæsarea in 365.

CÆSAREA (Palestine), founded by Herod the Great B.C. 10, and named in honour of Cæsar Augustus, was the Roman capital of Judea. St. Paul appeared before Felix, and was imprisoned at Cæsarea A.D. 58 (Acts xxiii. 33—35). An insurrection occurred here about 65, when 20,000 Jews were massacred in one hour. It was made a metropolitan see at an early period. Councils were held here in 334 and 358. It must not, however, be confounded with Cæsarea Philippi, another town in Palestine (Matt. xvi. 13).

CÆSAREA PHILIPPI (Palestine). — This city was founded by Philip the Tetrarch (who died A.D. 33), near a cave which the Syrian Greeks had dedicated to Pan, whence it was sometimes called Paneas. It was the northern limit of our Saviour's wanderings (Matt. xvi. 13, and Mark viii. 27).

CÆSAREWITCH.—(*See* HORSE RACING.)

CÆSARS, Æra of.—(*See* SPAIN, Æra of.)

CÆSIUM.—This metal, closely resembling potassium, discovered by Bunsen by means of the spectrum (*q. v.*), was made known by him in 1861.

CAFFA (Crimea), built on the site of the ancient Theodosia, or Feodosia, was captured by the Genoese in 1261. It was wrested from them by the Venetians in 1296, but they recovered it in 1299. The Turks took it in 1475, the Russians in 1783, and it was ceded to them by the treaty of Jassy, Jan. 9, 1792. Caffa was made a free port in 1806.

CAFFRARIA (South Africa) appears to have been quite unknown in 1718, as it is not mentioned in Peter Kolbe or Kolben's "The Present State of the Cape of Good Hope," published in that year. In 1707 Barrow explored part of Caffraria, and obtained the first authentic information as to the manners and customs of the Caffres. The interior was explored by Duncan in 1844, and by Ruxton in

1845. A part of Caffraria was made an English colony in 1848. (*See* CAFFRE WAR.)

CAFFRE WAR.—The settlers at the Cape of Good Hope came into frequent collision with the Caffres between the years 1798 and 1811. In 1819 the Caffres, led by Makanna, a pretended prophet, attacked Graham's Town, but were repelled and forced to purchase peace by a cession of territory. In 1828 they were defeated, and in 1834 they again invaded the English settlements under their chief Charlie, who carried slaughter and devastation wherever he appeared. Sir Peregrine Maitland expelled them from the Tyumie district in 1846. In 1850 Sir Harry Smith was appointed governor of the Cape; and the Caffres rose, Dec. 24, in a general insurrection, and treacherously attacked a British force of 600 men in the Kriskamma defile. They blockaded Sir Harry Smith in Fort Cox, Dec. 29, and repelled Col. Somerset, who came to his assistance. Fort Hare was unsuccessfully besieged by the Caffres, who lost more than 100 men, Jan. 21, 1851. The Hottentots rose in rebellion May 31, and joined the Caffre chiefs, who continued to harass the colonists. Col. Fordyce and several other officers and men were killed in a battle fought on the Waterkloof Hills in Nov. The war continued with great violence. Sir George Cathcart succeeded Sir Harry Smith as governor April 9, 1852, and the Caffres, defeated Dec. 20, near the Berea mountain, sued for peace Feb. 13, 1853. A meeting between the governor and the chiefs was arranged, and peace was restored March 9.

CAGLIARI (Sardinia), the capital of the island, occupies the site of the ancient Caralis, said to have been founded by the Carthaginians. It is the seat of an archbishopric. The Genoese were defeated at Cagliari by the united Venetian and Catalan forces in 1352. The university, founded in 1626, was re-established in 1764. During the war of the Spanish succession, Cagliari was bombarded and taken in 1708, and the inhabitants were compelled to declare in favour of Charles III. It was seized by the Spaniards in 1717. The French bombarded the town in 1793, but did not succeed in reducing it to subjection. The King of Sardinia resided at Cagliari from 1798 to 1814.

CAGLIARI AFFAIR.—The Sardinian steamer *Cagliari*, trading between Genoa and Tunis, was seized by some armed Sicilians who were on board, June 27, 1857, and steered by them to the island of Ponza, which they attacked, releasing several prisoners and capturing arms and ammunition. They then landed on Neapolitan territory, for the purpose of inciting the inhabitants against the government. The vessel, thus left to continue her voyage, was surrendered by the captain to a Neapolitan frigate, on the high seas, and her crew, with two English engineers, Watt and Park, were imprisoned at Naples on a charge of having aided in an attempted insurrection on Neapolitan territory. Although 11 of the crew deposed that the English prisoners were ignorant of the objects of the expedition, and had been compelled by force to work the engines, they were kept in close confinement for eight months, till one had lost his reason and both sustained serious injury to health. They were liberated in consequence of the general indignation of the English people, and the strong representations made to the Neapolitan Government by the English Foreign Secretary, the Earl of Malmesbury. Compensation having been demanded on behalf of the victims, the sum of £3,000 was conceded by the authorities at Naples, June 8, 1858.

CAGOTS.—This proscribed race, existing in the Pyrenees, are said by some to have descended from the fugitive Goths who survived the defeat of Alaric II., near Poitiers, in 507. Others refer their origin to the Arabs who fled to Gascony on the defeat of Abd-el-Rahman, by Charles Martel, in 732. They are first mentioned about 1000, when they were under the absolute power of the nobility. In 1288 they were forbidden to sell articles of food, and compelled to wear a peculiar costume, on the alleged ground of leprosy. From documents dated 1365 and 1385, it appears that the Cagots then dwelt in the province of Bearn; but they afterwards appeared in Navarre, Aragon, and other districts in the north of Spain. It was not till May 13, 1515, that the papal bull was published which established them in the commonest rights of humanity; and even then the privileges obtained were limited to the Cagots of Navarre. They subsequently became obnoxious to the Inquisition, which continued to persecute them as late as 1755.

CAHORS (France).—This town, called Divona by the Romans, of whose architecture many splendid remains still exist in the city and neighbourhood, was made a bishopric about 257, and was ravaged by the Northmen in 864. The Pont Valendré was built in the 13th century. The university, founded by Pope John XXI. or XXII. in 1322, was united in 1751 to that of Toulouse. Cahors, surrendered to England by the treaty of Bretigny, May 8, 1360, revolted and returned to France in 1428, and was seized by Henry of Navarre in 1580. An obelisk in honour of Fénélon, who studied at the university, was erected in 1820.

CAIETA (Italy).—This port of Latium, frequented by traders at a very early period, was sacked by the Cilician pirates before their conquest by Pompey, B.C. 66. The town and harbour, much improved by Antoninus Pius (A.D. 138—161), formed a favourite resort of the wealthier Romans. (*See* GAETA.)

CAI-FONG-FOU, or KAIFONG (China), the ancient capital, was invested by the Mongols about 1227, and yielded in 1232. It was besieged by rebels in 1642, when the embankments were destroyed, and 300,000 persons perished in the inundation.

CAINITES, or CAINIANS.—A Gnostic sect that arose in the 2nd century. They pretended that Cain was produced by a superior virtue to that which produced Abel, who was thus easily overcome. They honoured all the worst characters mentioned in Scripture, Judas among the number. Origen did not regard them as Christians.

CAIRO, GRAND CAIRO, or CAHERA (Egypt), the "Victorious," called by the natives Musr, the capital of modern Egypt, was founded by the first of the Fatimite caliphs in 969, and became the chief city of Egypt in

973. One mosque, built in 879, before the foundation of the city, and another, finished in 1362, are among its most remarkable buildings. On the approach of the Crusaders in 1171 it was partially burned by the inhabitants, who succeeded in saving it from foreign occupation; and a second attempt to surprise it, made by Louis IX. of France, was defeated in 1249. In 1382 it passed under the rule of the Mameluke Kings of the Circassian or Borgite dynasty, during whose government a Tartar invasion, under Tamerlane, was successfully resisted in 1393 and 1394. It was the seat of a Jacobite bishop, who possessed the rights of a metropolitan. Councils were held at Cairo in 1086 and 1239. In 1517 the Turks under Selim I. took Cairo, and subverted the dynasty of the Egyptian sultans. In 1754 it was nearly destroyed by an earthquake; and in July, 1781, the plague carried off many inhabitants. Cairo was taken July 21, 1798, by Napoleon Buonaparte, who held it till March 29, 1801, when the inhabitants threw off the French yoke. It was taken by the English and Turks June 27. Cairo was the scene of the massacre of the Mamelukes, by order of Mehemet Ali, in 1811. The Prince of Wales visited Cairo in March, 1862.

CAIRVAN, or KAIRWAN (Africa), was founded, in 670, by Akbah, the Saracenic conqueror of Africa. A city of the same name had been built by his predecessor, but Akbah, not liking the site, determined upon erecting another. It was about 33 leagues from Carthage.

CAITHNESS (Scotland).—This, the most northern part of the mainland of Great Britain, was the seat of a bishopric established about 1066, and suppressed at the Revolution. New harbour works in course of construction were severely injured by a storm, Oct. 20, 1864.

CAIUS COLLEGE (Cambridge).—Edmund Gonville in 1348 obtained letters patent from Edward III. to found a college called after him Gonville Hall. At his death in 1350 William Bateman, Bishop of Norwich, undertook the care of the Hall, calling it "the College or House of the Annunciation of the Virgin Mary." He enlarged the statutes in 1353. Dr. John Caius obtained a charter of foundation in 1557, and dedicated it March 25, 1558, and it has since been named Caius College. A new body of statutes was drawn up and approved by the Queen in council in 1860.

CALABRIA (Italy) was anciently peopled by the Messapians, who possessed some of the arts of civilization, as early as B.C. 708. They suffered much from the tyranny of the Tarentines, whom they defeated with great slaughter B.C. 473. Another battle was fought B.C. 338. The Romans took possession of Calabria B.C. 266, and suppressed a rebellion in favour of Hannibal B.C. 213. The province subsequently formed part of the empire, until conquered by Odoacer, A.D. 476. On the defeat and death of Odoacer, in 493, it formed part of the Ostrogothic kingdom of Theodoric, until sold to Justinian by Theodatus, in 536. Alboin, King of the Lombards, took it in 570, and made it part of the duchy of Benevento; and in 828 its richest towns were pillaged by the Saracens, who made a permanent settlement at Bari in 842. In the 11th century it was conquered by Robert Guiscard, the Norman, who, in 1051, was installed Duke of Apulia and Calabria, together with all the lands he could rescue from the infidels. The Emperor Manuel I., in 1155, despatched Michael Palæologus to conquer Calabria; but the success gained was merely temporary, as William I. of Sicily expelled the invaders the following year. Calabria has since formed part of the kingdom of the Two Sicilies. It was erected into a dukedom in 1597. Garibaldi landed here on his invasion of Italy, Aug. 23, 1862, and was defeated at Aspromonte (*q. v.*) Aug. 29.

CALAH (Assyria).—This, the second city of the Assyrian empire, founded by Shalmaneser I. about B.C. 1290, was improved by Asshur-idanni-pal (B.C. 884—B.C. 859), who made it the residence of his court. Shalmaneser II. (B.C. 859—B.C. 824) and Esar-haddon (B.C. 680—B.C. 667) erected spacious palaces here, and Saracus or Asshur-emid-ilin, the last King of Assyria (B.C. 647 — B.C. 625), commenced a much smaller edifice, which he was unable to complete. Its ruins still exist, and the edifice, according to Rawlinson (Ancient Monarchies ii. 517), "contrasts most painfully with the palatial erections of former kings." Nimroud occupies the site of the ancient Calah.

CALAIS (France) was only a fishing village until 997, when Baldwin IV., Count of Flanders, improved the harbour, and erected fortifications. Philippe, Count of Boulogne, extended its defences in 1224, and built a castle in 1227. It suffered greatly during the wars between England and France. Edward III. invested it in Sep., 1346, and it surrendered Aug. 4, 1347. The French failed in an attempt to regain possession in 1349. Wolsey was sent to mediate between the Emperor Charles V. and Francis I. of France; but the conferences, held in Aug., 1521, proved ineffectual. Henry VIII. landed here on his invasion of France, July 14, 1544. The castle surrendered to the Duke of Guise Jan. 6, and the town itself Jan. 7, 1558. By the treaty of Câteau-Cambrésis (April 2, 1559) Calais was to be restored to the English, if no act of hostility were committed in eight years. This engagement was not, however, fulfilled, and Calais passed out of the hands of the English, who had held it 210 years. Henry VIII. granted to Calais the privilege of representation in the English Parliament, and this it continued to exercise during the reigns of Edward VI. and Mary. The Spaniards took Calais April 24, 1596, and retained possession until 1598. Several acts relating to Calais will be found in the statute-book, under the reigns of many of our kings to the time of Edward VI. Charles II. resided here in 1659.

CALATAYUD (Spain).—This town, near the site of the ancient Bilbilis, in Aragon, was wrested from the Moors by Alphonso VII. in 1119.

CALATRAVA.—This order of knighthood was instituted by Sancho III. of Castile, in 1158. His father having taken the town of Calatrava from the Moors in 1147, intrusted its defence to the Templars. They resigned it to

Sancho III. in 1158, when Raymond, abbot of a Cistercian monastery, undertook to defend it, and the order was instituted. It was confirmed by Pope Alexander III. in 1164. Having been defeated by the Moors, they took refuge in the castle of Salvatierra, by which name they were some time known, and in 1212 they returned to Calatrava. The grandmastership was united to the crown by Ferdinand and Isabella in 1487.

CALATRAVA LA VIEJA, or OLD CALATRAVA (Spain).—This town, of which only the ruins remain, was taken from the Moors in 1147. (*See* CALATRAVA.)

CALCIUM, the metallic basis of lime, was discovered by Sir Humphry Davy in 1808.

CALCULATING MACHINE, or DIFFERENCE ENGINE.—The swanpan of the Chinese, and the Roman abacus (*q. v.*), were employed in early times for performing arithmetical operations. Pascal, born in 1623, and Leibnitz, in 1646, invented machines of this kind. Sir Samuel Morland also constructed machines for performing some of the simpler operations of arithmetic about 1670. Mr. Babbage's difference-engine was commenced in July, 1823, government having granted £1,500 to be employed in perfecting the invention. Owing to misunderstandings with the draughtsman, the undertaking was suspended in 1833, at which time it had cost £17,000. This machine was removed to King's College, London, in 1843. The Messrs. Scheutz, of Stockholm, who took the idea from Dr. Lardner's article on Mr. Babbage's machine in the "Edinburgh Review" for July, 1834, succeeded, in Oct., 1853, after many years of labour, in completing a similar machine. They exhibited it in England in 1854, at the Paris Exhibition in 1855, and it was purchased for the Dudley Observatory, Albany, in the United States.

CALCUTTA (Hindostan).—When the East India Company removed their factory from the Hooghley in 1686, the site on which Calcutta now stands was occupied by one of the villages afterwards granted to them by Aurungzebe. Fort William was erected in 1700, and Calcutta, now the chief city of Bengal, and the metropolis of the English dominions in India, was soon after commenced.

A.D.
1707. Calcutta is made a separate presidency.
1742. A ditch is dug round a portion of Calcutta.
1752. Defences are commenced.
1756, June 20. Calcutta is taken by Surajah Dowlah. (*See* BLACK-HOLE.)
1757, Jan. 1. Watson and Clive anchor in the Hooghley. —Jan. 2. They plant the British standard on the walls of Calcutta.
1758. Meer Jaffier grants the free tenure of Calcutta to the East India Company.
1773, July 1. Calcutta is made the residence of the Governor-General, and a supreme Court of Judicature is established.
1793. The High Court of Criminal Appeal is established.
1801. The university is founded.
1804. The Government House is erected.
1813. A bishopric is established at Calcutta.
1820. Bishop's College is founded.
1829. General Assembly's Institution for extending a knowledge of Christianity among the Native Youth, is founded by the Scotch Church. The Insolvent Court is established.
1833. The Bishop of Calcutta is made metropolitan. A high tide in the Hooghley commits great destruction.
A.D.
1836. The Martinière, an institution founded by Gen. Claude Martin, for the education and maintenance of indigent native Christian children, is opened.
1855, Jan. 25. An industrial exhibition is opened.
1864, Oct. 5. A violent hurricane or cyclone lays waste a great part of Calcutta, destroying nearly 200 vessels, and thousands of houses, and causing a loss of 70,000 lives, according to the lowest official estimate.

CALDIERO (Battles).—Napoleon Buonaparte was defeated in a sanguinary engagement at this strong position, the site of the ancient Caldarium, celebrated for its thermal springs, between Verona and Vicenza, Nov. 11, 1796, by Alvinzi, at the head of an Austrian army superior in point of numbers.—Massena, at the head of a French and Italian army, attacked the Austrians in this position Oct. 29 and 30, 1806, and after a gallant struggle was repulsed, and retreated to Verona.

CALEDONIA.—(*See* BRITISH COLUMBIA and SCOTLAND).

CALEDONIAN CANAL (Scotland), connecting the North Sea with the Atlantic Ocean, is navigable for ships of 500 or 600 tons burden. In 1773 James Watt showed the practicability of executing this work, which was commenced by Telford in Sep., 1803, and was opened Oct. 23, 1822. In 1837 and 1838 the works sustained considerable injury, and as the expenditure far exceeded the revenue, the idea of abandoning the undertaking was seriously entertained. An act was obtained in 1840 to permit the transfer of the canal to a joint-stock company; but the project was not carried out.

CALENDAR.—The Jews and some ancient nations divided the year into 12 lunar months, a 13th being added from time to time to accommodate it to the seasons. The year amongst the ancient Egyptians consisted of 12 months, each of which contained 30 days. At the end of the year five supplementary days were added. The Greeks for a considerable period made the year consist of 12 lunar months. Solon, B.C. 594, introduced a change respecting the length of the months, making them of 29 and 30 days alternately. An intercalary month was occasionally introduced to restore the balance. Romulus is said to have divided the year into 10 months, of which March was the first. This year consisted of 304 days, and was the original Roman calendar. Numa added two months, January at the commencement, and February at the end of the year, and caused an additional month, consisting of 22 and 23 days alternately, to be inserted every second year. The Decemvirs altered this arrangement B.C. 452, by placing February after January. Confusion having arisen in these calculations, Julius Cæsar abolished the use of the intercalations B.C. 46. He adjusted the year according to the course of the sun, and assigned to the months the number of days which they now contain. He added an intercalary day to February every four years. The new system, arranged by Sosigenes, an astronomer of Alexandria, whom Cæsar invited to Rome for the purpose, commenced Jan. 1, B.C. 46, and was called the Julian or solar year. This arrangement was disturbed by the Emperor Augustus. The

consequence was, that the equinox, which, on the introduction of the Julian calendar, fell March 29, retrograded so much that in the year 1582 it fell March 11. Gregory XIII., by a bull dated Feb. 24, 1582, effected another reformation, which is now generally adopted and is called the Gregorian calendar. He ordered 10 days to be deducted, making Oct. 5, 1582, to reckon as the 15th. In order to render the civil and the natural year of the same length, he ordered that every 100th year, excepting the fourth, commencing with 2000, should not be a leap-year. Thus, whilst 1700, 1800, and 1900 are not leap-years, 1600 was; and 2000 will be, but 2100, 2200, and 2300 will be common years. (*See* NEW STYLE and REVOLUTIONARY CALENDAR.)

CALENDS, in the Roman calendar, the first day of the month. Nicolas says, in the Middle Ages the term was sometimes used for the first day of the *preceding* month, on which the calends of the ensuing month began to be reckoned.

CALETES, or CALETI.—This Belgic tribe, which numbered 10,000 fighting men B.C. 57, attempted to relieve Vercingetorix during the siege of Alise (*q. v.*) by Julius Cæsar, B.C. 52, and assisted the Bellovaci against the Romans B.C. 51.

CALICO, so called from Calicut, a city of India, has been manufactured in Hindostan from time immemorial. The first importation was made by the East India Company in 1631, and the printing was commenced in London in 1676. In 1768 this branch of industry was introduced into Lancashire. In consequence of the hostility of the Spitalfields silk-weavers, the importation of Indian calicoes was prohibited in 1700, and by 7 Geo. I. c. 7 (1721) it was made illegal to wear any printed calico whatever. By 9 Geo. II. c. 4 (1736) the use of calico partly made of linen was permitted; and by 14 Geo. III. c. 72 (1774) cloth entirely of cotton was sanctioned. By 1 Will. IV. c. 17 March 15, 1831), all laws restricting calico-printing were finally repealed, and the manufacture has since rapidly increased.

CALICUT (Hindostan) was the first port in India reached by Vasco de Gama in 1497. The Portuguese attacked and burned Calicut in 1510. They were repulsed, but obtained permission to erect a factory in 1513. The English East India Company established their factory in 1616. Hyder Ali seized the town in 1766, and compelled the inhabitants to remove to Nellaru, afterwards called Furruckabad. The English took Calicut Feb. 12, 1782; Tippoo Saib obtained possession in 1789, and completely destroyed the town. The country was finally ceded to the British in 1792, and the people returned and rebuilt the town.

CALIFORNIA (N. America) was discovered by Grijalva in 1534, and visited in 1537 by Cortes. Its coasts were explored by Cabrillo in 1542; but no European settlement was formed till a subsequent period. It is now divided into Lower and Upper California; the former had been previously called Old and the latter New California. Sir Francis Drake landed near the site of the present San Francisco in June, 1579. In the account of the proceedings of the expedition in this part of America, it is stated, "There is no part of earth here to be taken up, wherein there is not special likelihood of gold or silver." Capt. George Shelvocke, who visited California in Aug., 1719, declared that gold-dust was promiscuously and universally mingled with the common earth, and he brought away some of the soil for the purpose of making further investigations. This was, however, lost in China, and the actual discovery of the gold was reserved for the 19th century.

A.D.
1578. Sir Francis Drake takes possession, on behalf of Queen Elizabeth, of the northern part of California, calling it New Albion.
1698. The Spanish Jesuits establish the first European settlements in California.
1768. The Spanish Jesuits are succeeded by the Franciscans.
1823. Revolution, by which California is separated from Spain.
1829. Revolt among the Californians and Indians at Monterey.
1831. Don Manuel Victoria becomes governor, and occasions an insurrection by his tyranny.
1833. The Mexican Government seizes all the missionary stations of the Spanish priests, and declares them public property.
1836, Nov. Overthrow of the Mexican dominion in California.
1840. All foreigners are expelled from California.
1846. California is occupied by the army of the United States.—Sep. 24. Monterey is captured by the United States army.
1847, Sep. Gold is discovered on the Sacramento River.
1848, Feb. 2. Upper California is ceded to the United States.
1850. California is admitted into the Union as a sovereign state.
1860. Towards the end of this year the assembly resolves in favour of maintaining its connection with the United States Government.

CALIGRAPHY.—Varro, who died B.C. 28, is commended by Cicero for the elegance with which he adorned his manuscripts; and Seneca, A.D. 65, speaks of books ornamented with figures. Charlemagne (800—814) was a munificent patron of professors of caligraphy, as was also the Emperor Basilius I. (867—886). About 1150 great progress began to be made in the art, and Charles V. of France (1364—1380) granted special protection to caligraphic painting in France and Flanders.

CALIPH.—This title was first borne by Abu Beker, who succeeded Mohammed in 632.

CALIPPIC PERIOD.—Calippus of Cyzicus, said to have been a disciple of Plato, lived about B.C. 330. He discovered and corrected the error of the Metonic cycle, which was composed of 235 lunations, or periods from new moon to new moon, containing a few hours more than 19 years. Calippus observed that a more correct period might be formed by taking four times the period of Meton, all but one day, or 27,759 days, very nearly 76 years. The Calippic cycle is therefore four Metonic cycles all but one day. The first dated from July, B.C. 330, and corresponded with the third year of the 112th Olympiad, and to A.U.C. 423.

CALIXTINES.—In 1420 a schism broke out amongst the Hussites, and they separated into two factions, the Calixtines and the Taborites. The former derived their name from the circumstance that they insisted on the use of the cup (*calyx*, the Greek word) in the Eucharist.

The difference between the Calixtines and the Roman Catholics was very slight, and they were reconciled to the Pope in 1433. They defeated the Taborites in a great battle at Lippau (*q. v.*), May 28, 1434. In 1458 they persecuted the original Hussites, whom they expelled from Bohemia in 1497.——Also a Lutheran sect, the followers of George Calixtus of Helmstadt, who flourished 1586—1656, and endeavoured to unite the various branches of the Romish, Lutheran, and Reformed Churches. He was assailed by Buscher in 1639, and other Lutheran divines.

CALIYUGA.—The Hindoo æra of the Deluge. Hales remarks "Though the date of the astronomical æra *Cali yuga* be invariably fixed to B.C. 3102, the historical æra" of that name fluctuates considerably.

	B.C.
"The *Bhagavat* reckons it	1913
The *Vishnu Purana*	1905
Other *Puranas*	1370
The followers of *Jina*	1078."

CALLAO (Peru), the port of Lima, from which it is seven miles distant, was founded during the reign of Philip IV. (1621—1665). In 1746, the original city was destroyed by an earthquake and covered by the sea. It surrendered Sep. 22, 1821, during the Peruvian war of independence. In the struggle between Brazil and Buenos Ayres, Callao capitulated after a siege of two years' duration, Jan. 23, 1826. Severe shocks of an earthquake were felt here in the middle of April, 1860.

CALLIAS (Treaties).—A compact between Artaxerxes Longimanus, King of Persia, and the Greeks, concluded at Susa by the Athenian envoy Callias, B.C. 449, fixed a boundary between the territories of the contracting parties, who agreed to abstain from aggressions either upon the Greek colonies of Western Asia, or the Persian dependencies of Egypt and Cyprus. The jealousy of the Greek states soon led them to invoke the aid of Persia against each other, and thus neutralized the intended benefit of this treaty.——A second peace, concluded at Sparta by the Lacedæmonians and Athenians, and their allies, B.C. 371, assured the independence of each Greek city, subject to certain rights due to Sparta as the supreme state on land, and to Athens as queen of the sea. This treaty was also named from one of the Athenian envoys.

CALLINGHUR (Hindostan).—Mohammed of Ghuznee failed in an attempt to capture this stronghold in 1024; and Sher Shah, the Affghan leader, made an unsuccessful attack in 1543. The English failed in an attempt to carry it by storm Feb. 2, 1812; but the fort surrendered Feb. 7.

CALLINICUM (Battle).—The Persians defeated Belisarius near this small town on the Persian frontier, Easter Sunday, April 20, A.D. 531.

CALMAR (Sweden).—The celebrated treaty known as the "Union of Calmar," by which Sweden, Norway, and Denmark were united into one kingdom, under Queen Margaret, was concluded at this town in Sweden July 12, 1397. The Union was finally dissolved by Gustavus Vasa, in 1523. A large portion of the town was destroyed by a fire, which broke out Oct. 18, 1765, and raged till Oct. 21.

CALMUCKS.—This name was given to one of the three principal Tartar divisions by the Mohammedan Mongols. Expelled from China in 1672, they settled on the banks of the Volga. Repeatedly invited to return, the great transmigration of these hordes commenced in Jan., 1771, when above 300,000 set out for their original seat in China. By the end of May they crossed the Torgan, after a march in which they endured such terrible hardships that 250,000 of their number perished in its progress. In June they were compelled to resume their journey by an army of Bashkirs; and they arrived in China Sep. 8, and were permitted to enjoy rest and prosperity after their adversities.

CALNEH (Assyria).—This city, founded by Nimrod (Gen. x. 10) about B.C. 2218, was afterwards called Niffer.

CALOMEL, or SUBCHLORIDE OF MERCURY, is said to have been prepared by the alchemists; but the original discoverer is unknown. Croillus, writing at the beginning of the 17th century, speaks of its preparation as a great mystery. Beguin made the process public in 1608.

CALORIC ENGINE.—(*See* ERICSSON'S PATENT.)

CALOTTISTES, or LE REGIMENT DE LA CALOTTE.—This association of wits, formed in France during the reign of Louis XIV. (1643—1715), received its name from its custom of sending to any public character who had exposed himself to ridicule a "patent" authorizing him to wear the *calotte*, a small cap worn by the monks over the tonsure, as a protection to the weak part of his head. Having become too bold in its satire it was dissolved during the ministry of Cardinal Fleury (1726—1743). *Mémoires pour servir à l'Histoire de la Calotte* were published at Basel in 1725. (*See* BABINE REPUBLIC.)

CALOTYPE PROCESS of photography, for producing negative pictures on paper, was first exhibited by H. F. Talbot in 1840.

CALPE.—(*See* GIBRALTAR.)

CALPEE, or KALPEE (Battle).—At this town, in the province of Agra, Hindostan, the first engagement took place between the British, under Gen. Carnac, and the Mahrattas, May 20, 1765. The latter were completely routed, and driven across the Jumna. Sir Hugh Rose defeated the mutineers, who came out from Calpee in great force, and attacked his besieging army at Gulowlie, May 22, 1858.

CALPEE, or KALPEE (Hindostan), said to have been founded before A.D. 400, was seized by the Mohammedans in 1196, and surrendered by the Patan sovereigns of Delhi to Baber in 1527. In 1778 it was taken from the Mahrattas by the British, and it was ceded to the East India Company by the treaty of Bassein, Dec. 31, 1802. The native chief in possession, having, however, refused to deliver up the tow it was besieged and taken Dec. 4, 1803. Its possession was confirmed to the Company in 1806. Sir Hugh Rose, who arrived in the neighbourhood May 15, took possession of Calpee May 23, 1858.

CALVARY.—(*See* MOUNT CALVARY.)

CALVES'-HEAD CLUB (London).—In a tract entitled "The Secret History of the Calves'-Head Club; or, The Republican Unmasked," published in 1703, and reprinted in the sixth vol. of the Harleian Miscellany, Milton and other members of the Commonwealth are said to have instituted this club. This account of its origin is not, however, considered authentic. Some members of such an association are said to have met at a French tavern in Suffolk Street, Jan. 30, 1735, and exhibited calves' heads, on which they were feasting, at the window. They drank to the memory of the army which dethroned the king, and of the men who cut off his head on the scaffold. This led to a riot, which was suppressed by the interference of the military. The whole affair is by some writers believed to be a hoax.

CALVI (Corsica).—This seaport was taken by the English under Lord Hood, Aug. 10, 1794, after a siege of 51 days. Nelson was engaged in this struggle, and received a wound which destroyed the sight of his right eye. The English retired in 1796.

CALVINISM and CALVINISTS.—The former name is given to the peculiar doctrines taught by John Calvin, the reformer, born at Noyon, July 10, 1509. He quitted the Roman Catholic Church, in which he held a cure, in 1532, and having left Paris in 1534, took refuge at Basel, where he published his "Christian Institutes" in 1535. He went to Geneva in 1536, but having advocated some unpopular views was expelled in April, 1538. The edict of banishment was cancelled in May, 1541, and in Sep. he returned to Geneva, where he exercised absolute authority. By his influence Michael Servetus was arrested and burned at the stake Oct. 27, 1553. The peculiar doctrines of the Calvinists, called the five points, are—1, particular election; 2, particular redemption; 3, moral inability in a fallen state; 4, irresistible grace; and 5, final perseverance. Calvinism spread through France, Holland, England, Scotland, and other parts of Europe. Calvin himself died at Geneva, May 27, 1564. Various divisions have broken out amongst his followers. On the subject of predestination they are divided into the Infra or Sub-lapsarians and the Supra-lapsarians; the former contending that God permitted, and the latter that He decreed, the fall of man. The 300th anniversary of the death of Calvin was celebrated by the reformed churches of France, May 27, 1864. (*See* GOMARISTS.)

CAMALDULENSIANS, or CAMALDOLITES.—An order of religious persons founded at Camaldoli, or Campus-Maldoli, a desert spot on the lofty heights of the Apennines, about 30 miles from Florence, by Romuald, an Italian, in 1023. They follow the rule of St. Benedict, and are divided into Cenobites and Eremites. One of their houses was established at Grosbois, near Paris, but they do not appear ever to have had an establishment in England.

CAMARINA (Sicily).—Founded by a colony from Syracuse, B.C. 599. It revolted and was destroyed by the Syracusans B.C. 552. Hippocrates, tyrant of Gela, restored it about B.C. 495; but it was again destroyed by Gelon B.C. 485. The town was re-established for the third time B.C. 461, fell into the hands of the Carthaginians B.C. 405, and joined the Romans in the first Punic war. The Roman fleet was destroyed off the coast, near Camarina, B.C. 255. Camarina afterwards declined, and no trace of it remains.

CAMBAY (Hindostan), supposed to have been the capital of the Hindoo empire in western India in the 5th century, is mentioned by Marco Polo (1256—1323). In 1780 the English took Cambay from the Mahrattas, to whom it was restored in 1783. Cambay has formed part of the British empire in India since 1803.

CAMBERWELL (Surrey).—The grammar school of this village, which now forms a southern suburb of the metropolis, was founded by the Rev. E. Wilson under letters patent granted by James I. Sep. 29, 1615. The old parish church was destroyed by fire in 1841.

CAMBODIA (Asia).—Nothing was known of this country beyond the Ganges till about 1590, when the King of Cambodia implored the assistance of the Governor of the Philippines against the King of Siam. Christianity was introduced by the Portuguese Jesuits in 1624. The Siamese invaded the country and took the capital in 1809; and in 1819 all direct intercourse of foreigners with the Cochin Chinese portion of Cambodia was prohibited by the Emperor of Anam. The final partition of the country between the Emperor of Anam and the King of Siam took place in 1820. A treaty with France was concluded at Udong Aug. 11, 1863.

CAMBRAY, or CAMBRAI (France), the ancient Camaracum, one of the chief cities of the Nervii, was fortified by Charlemagne, and was long governed by bishops under the rule of the empire. The English besieged the town in 1339; and in 1477 it fell into the possession of Louis XI., who restored it to Burgundy in 1478. It was captured by Charles V. in 1544. The Prince of Parma besieged Cambray in 1580, but without success. In 1595 it was seized by the Spaniards. Louis XIV. reunited it to France in 1667. During the revolutionary riots of 1793, the cathedral was utterly destroyed. Cambray was twice besieged by the Austrians in 1793, being taken by them Sep. 10. The French were defeated here by the Duke of York, April 24, 1794; and the English under Sir Charles Colville captured the town June 24, 1815. Cambray was made a bishopric in 390, an archbishopric in 1556, reduced to a bishopric in 1801, and reconstituted an archbishopric in 1841. It was in union with Arras until 1092, when a separation took place. Fénélon was made Archbishop of Cambray in 1695. Councils were held here in 1064; Dec. 27, 1303; Oct. 1, 1383; and in Aug., 1565.

CAMBRAY (League) is supposed to have been determined upon at the meeting between Louis XII. of France and Ferdinand and Isabella of Spain, at Savona, June 28—July 3, 1507. The celebrated convention was signed Dec. 10, 1508, between Louis XII. and the Emperor Maximilian, Pope Julius II., Ferdinand, and other princes being invited to join. Ferdinand and Julius II. soon after ratified the

treaty. Its objects were the humiliation of Venice, and the partition of her territories. The contracting parties advanced into Italy in order to carry out the project, and this proved the signal for a struggle, in which one member of the league was often arrayed against another, until peace was re-established in 1516. Sismondi says this league laid the foundation of public law in Europe. (*See* CÂTEAU-CAMBRÉSIS.)

CAMBRAY (Peace), known as the "Paix des Dames," or "Ladies' Peace," because the negotiations were commenced by Margaret, Duchess Dowager of Savoy, the emperor's aunt, and Louise, mother to Francis I. of France. The treaty of Madrid served as the basis for that of Cambray, signed Aug. 5, 1529. Robertson says the chief articles were, that the emperor "should not, for the present, demand the restitution of Burgundy, reserving, however, in full force, his rights and pretensions to that duchy; that Francis should pay 2,000,000 crowns as the ransom of his sons, and, before they were set at liberty, should restore such towns as he still held in the Milanese; that he should resign his pretensions to the sovereignty of Flanders and of Artois; that he should renounce all his pretensions to Naples, Milan, Genoa, and every other place beyond the Alps; that he should immediately consummate the marriage concluded between him and the emperor's sister Eleanora."

CAMBRIA.—(*See* WALES.)

CAMBRIAN ARCHÆOLOGICAL ASSOCIATION, for promoting the study and preservation of the antiquities of Wales, was established in that country in 1846.

CAMBRIC, originally manufactured at Cambray, whence its name, was introduced into England by the Dutch emigrants in 1563. In 1745 the importation of foreign cambric was prohibited. In 1761 the manufacture was established at Winchelsea, and brought to such perfection that, in 1765, the home-made article was considered equal to the French. Cambric was also manufactured at Dundalk, in Ireland. By 7 Geo. III. c. 43 (1767), the restrictions on the importation of cambric were reimposed; but they were repealed by the commercial treaty between England and France, signed at Versailles, Sep. 26, 1786. They were again enforced June 6, 1797.

CAMBRIDGE (England), supposed to be the Camboricum or Camboritum of the Romans, and the Grantabricsir of the Saxons, is said to have been founded by a Spaniard named Cantaber, B.C. 375. It was plundered and burned by the Danes in 871 and in 1010. William I. founded the castle in 1070, and fortified the town against the attacks of the Saxons. In 1088 it was seized and plundered by the rebellious barons of William II. King John granted it a charter in 1200, and confirmed it in perpetuity in 1207. Its castle, captured by the Barons in 1215, was soon recovered by King John. Cambridge suffered in the "Barons' War," in the reign of Henry III., having been plundered by the insurgents, who, in 1266, carried away such of the inhabitants as were able to pay heavy ransom. In 1381 the town lost its charters in consequence of an attack made by the populace on the university, and it was seized by Cromwell and made "the prime garrison and rendezvous of the associated counties" in 1642. The Fitzwilliam Museum was founded in 1816; the Cambridge Philosophical Society was established Nov. 15, 1819, and received its charter Aug. 3, 1832. The railway from London was opened in July, 1845. The Prince and Princess of Wales visited Cambridge June 2—4, 1864.

CAMBRIDGE (United States).—This town in Massachusetts was first settled in 1631, under the name of Newtown. Harvard College (*q. v.*), the oldest institution of the kind in the United States, was founded here by the Rev. John Harvard, an English clergyman, in 1638. The Synod of Cambridge met in 1646, and was dissolved in 1648, after adopting the system of church discipline known as the "Cambridge Platform," which formed the religious constitution of the New England states.

CAMBRIDGE UNIVERSITY.—Some authors believe Cambridge to be the place at which Sigibert, King of the East Angles, founded a school for youth in 635, as related by Bede (b. iii. c. 18). It was restored by Edward I. (the Elder) in 915. Peter of Blois, in his continuation of Ingulphus, relates that Joffrid, Abbot of Croyland, in 1109, sent Gislebert and three other monks to Cambridge every day, where, having hired a barn, they taught the sciences, and collected a great concourse of scholars. The number had increased so much in the second year after their arrival, that no house or church was large enough to hold them. For this reason they separated into classes, and met in different places. The first mention of the university under the title of the chancellor and masters occurs in 1231, during the reign of Henry III., who granted several charters, and contributed greatly to the welfare of the institution. In 1381, during Wat Tyler's riots, the town of Cambridge rose in arms against the university and burned its charters, all which were afterwards restored by Richard II. Pope Martin V. gave it full ecclesiastical and spiritual jurisdiction over its students in 1430; and Thomas Scott, Bishop of Lincoln, founded the Library in 1475. It was incorporated by 13 Eliz. c. 29 (1571). In 1687, Feb. 9, the university refused to admit Francis, a Benedictine monk, in consequence of which the vice-chancellor and senate rendered themselves obnoxious to James II. The Classical Tripos was established in 1824. The Philosophical or Moral Sciences Tripos and the Natural Sciences Tripos were established in 1851. The present university statutes were confirmed by Queen Victoria, by an Order in Council, July 31, 1858. The University Local Examinations (*q. v.*) commenced in 1858. A new B.A. scheme was adopted June 3, 1865. The following are the 17 colleges, with the date of foundation:—

A.D.		A.D.	
1257.	St. Peter's College.	1473.	St. Catherine's College
1326.	Clare "	1496.	Jesus "
1347.	Pembroke "	1505.	Christ's "
1348.	Gonville Hall and Caius College.	1511.	St. John's "
		1519.	Magdalene "
1350.	Trinity Hall.	1546.	Trinity "
1352.	Corpus Christi College.	1584.	Emanuel "
1441.	King's "	1598.	Sidney Sussex "
1448.	Queen's "	1800.	Downing "

Founded. EXHIBITIONS.

A.D.
1657. Lumley. Five.
1858. Sheepshanks, the Astronomical.

PRIZES.

749. Seatonian. Value £40. English Poem on a Sacred subject.
1751. Chancellor's (two) gold medals, £15 15s. each, for Classical Learning.
1752. Members'. Four £15 15s. each, for Latin Prose Composition.
1768. Smith. Two. £25 each. Mathematics and Natural Philosophy.
1774. Browne. Three gold medals, £5 5s. each. Greek and Latin Verse and Epigrams.
1780. Norrisian. Value £60. English Essay on Theological subject.
1789. Hulsean (*q. v.*). Value £80.
1812. Chancellor's gold medal. An English Ode or Poem in Heroic Verse.
1816. Porson (*q. v.*). Greek books, £20.
1840. Camden. Gold medal. Latin Hexameter Verse.
1844. Maitland. Value £120. English Essay on Missionary subject.
1845. Burney. English Essay. Value £100.
1848. Adams. Value £120. Essay on some subject of Pure Mathematics, Astronomy, or other branch of Natural Philosophy.
1848. Le Bas. Value £57. English Essay on a subject of General Literature.
1853. Carus (two) Greek Testament Prizes. Proceed of £1,000 Fund.
1856. Chancellor's gold medal for Legal Studies.
1856. Scholefield. Value £15. Greek Testament and Septuagint.
1861. Kaye. Value £60. English Dissertation on some subject of Ecclesiastical History.
1861. Harn. Value £60. English Dissertation on some subject from Ancient Greek or Roman History.
1865. Hebrew. Interest of £300 Scinde Railway Stock.
1865. Sedgwick. Three years' interest of £500 Scinde Railway Stock. Geology or Kindred Sciences. The first prize to be awarded in Lent, 1868.

PROFESSORSHIPS.

A.D.
1502. Margaret, Divinity.
1540. Regius, Divinity.
1540. Five Regius Professorships for Divinity, Civil Law, Greek, Hebrew, and Physic.
1632. Arabic.
1663. Lucasian, Mathematics.
1683. Moral Philosophy.
1684. Music.
1702. Chemistry.
1704. Plumian, Astronomy.
1707. Anatomy.
1724. Lord Almoner's, Arabic.
1724. Modern History.
1724. Botany.
1727. Woodwardian, Geology.
1749. Lowndean, Astronomy.
1768. Norrisian, Divinity.
1783. Jacksonian, Natural and Experimental Philosophy.
1800. Downing, Laws of England.
1801. Downing, Medicine.
1808. Mineralogy.
1828. Political Economy.
1851. Disney, Archæology.
1860. Hulsean, Divinity.
1860. Hindustani.
1863. Sadlerian, Mathematics.
1863. Sanscrit.

PREACHERS AND LECTURERS.

1503. Lady Margaret's Preacher.
1524. Sir Robert Rede's Lecturer.
1724. Whitehall Preacher.
1816. Hulsean Lecturer.

UNIVERSITY SCHOLARSHIPS.

1647. Craven, six Classical.
1746. Battie, one ,,
1774. Browne, one ,,
1824. Davies, one ,,
1810. Bell, eight ,,
1813. Pitt, one Classical.
1818. Tyrwhitt, six Hebrew.
1832. Crosse, three Theological.
1855. Porson, one Classical.

The "University Calendar" and the "Cambridge Year Book" (Rivingtons), edited by W. White, Sub-librarian of Trinity College, contain full particulars on all points relating to the University.

CAMBUSKENNETH (Battle).—Wallace defeated John de Warrenne, Earl of Surrey, guardian of Scotland, at this place, near Stirling, Sep. 10, 1297.

CAMDEN (Battles).—The first was fought at the village of Camden, in South Carolina, Aug. 16, 1780, between the Americans under Gen. Gates, and the British under Lord Cornwallis. The former were completely routed, with a loss of about 1,000 killed and wounded, and as many prisoners, the English having only 20 killed and about 200 wounded. —— The second battle, at the same place, was fought April 25, 1781. The Americans, commanded by Gen. Greene, were defeated. Lord Rawdon, the English commander, evacuated Camden May 13. This is sometimes called the battle of Hobkirk's Hill.

CAMDEN SOCIETY (London), for the publication of documents illustrative of English history, was established in 1838. It takes its name from William Camden, author of the "Britannia," and historian of Queen Elizabeth.

CAMEL.—This machine for raising ships, in order to enable them to pass over shallows, was invented about the year 1688, by a Dutchman named Meuvis Meindertzoon Bakker, of Amsterdam.

CAMEL (Battle).—Fought under the walls of Bassorah, in 658, by the Caliph Ali, against the Arab chieftains Telha and Zobeir, who were accompanied by Ayesha, the widow of the Prophet. She rode upon a camel: hence the name given to the battle. The rebels were defeated, and Telha and Zobeir were slain.

CAMELFORD (Cornwall), said to have been the scene of the battle between King Arthur and his rebellious nephew Mordred, in which both leaders were mortally wounded, fought in 542. A second battle was fought here in 823, between the Britons, and the Saxons under Egbert. Camelford was incorporated by one of the Cornish earls, and sent two members to the first parliament of Edward VI., in 1547. At the passing of the Reform Bill, in 1832, the borough was disfranchised.

CAMELODUNUM, or CAMULODUNUM (Britain).—This town, the modern Colchester (*q. v.*), was founded, it is believed, by the Celtic inhabitants of Britain some time subsequent to B.C. 350, and called by them Cam-a-latin-uldun, or "the town on the hill, at the winding of a river." At the time of Cæsar's invasion, B.C. 54, it was the capital of Cassivellaunus, and fell into the hands of the Romans, who latinized the name and established here their first municipality in Britain. It was taken by Claudius A.D. 44, and erected into a Roman colony; and though seized and destroyed by the British rebels under Boadicea in 61, was soon recovered by Suetonius Paulinus, and rebuilt on a scale of considerable magnificence. It is said to have been the birthplace of Constantine I. in 265, and to have sent a bishop to the Council of Arles in 314; but both stories are considered very doubtful.

CAMEO.—The art of cameo engraving upon the onyx, sardonyx, and other stones possessing layers of variegated colours, is believed to have passed at a very early period from Egypt to the Etruscans, by whom it was imparted to the Greeks, who carried it to a state of high perfection. Theodorus of Samos, who flourished about B.C. 522, Pyrgoteles, the engraver of seal rings for Alexander III. (the Great), during the latter portion of the 4th century B.C., and Tryphon, who lived in the reign of Alexander's suc-

cessors, and engraved the celebrated cameo in the collection of the Duke of Marlborough, representing the reconciliation of Cupid and Psyche, are regarded as the most eminent ancient professors of the art. Cameos of high merit were engraved at Rome under the empire, the best being produced in the reign of Augustus. On the decline of the ancient civilization, this, with every fine art, fell into neglect; but it was restored in Italy during the 15th century, when it was much encouraged by the Medici family. It subsequently declined, but again attained considerable excellence in the 18th century. The art of engraving shell cameos, in which the varying colours of the different layers of the shells of certain species of mollusca are used as substitutes for the hard stones of the ancients, commenced at Rome about 1805, and was afterwards introduced at Paris. (*See* INTAGLIO.)

CAMERA LUCIDA.—Dr. Hooke (1635—1703) invented a camera lucida, for making the image of any object appear on the wall in a light room. The modern camera lucida was invented by Dr. Wollaston in 1807.

CAMERA OBSCURA was described by Baptista Porta in the Magia Naturalis, of which the first edition was published at Naples in 1558, and is said to have been invented by Friar Bacon.

CAMERINO (Italy), the ancient Camerinum, was made a bishopric in 252, by Pope Lucius I. In 1545 Paul III. received Camerino in exchange for Parma and Piacenza. The statue of Sixtus V. was erected in 1587. The see was made archiepiscopal by Pius VI. in 1787, and Pius VII. added the see of Treja to this archbishopric in 1817. Napoleon I. united Camerino to the kingdom of Italy in 1807, but it was afterwards restored to the Pope.

CAMERONIANS.—The followers of Richard Cameron, who entered Sanquhar, in Dumfriesshire, June 22, 1680, and made a public declaration that Charles II. had, by usurpation over civil and religious liberties, forfeited all right to the crown. They separated from the Presbyterians, refused the terms of accommodation proposed by Charles II., and demanded the rigorous observance of the Solemn League and Covenant received by the Parliament Sep. 25, 1643. They are, on this account, frequently called Covenanters (*q.v.*). Cameron was killed in a skirmish with the royal troops at Aird's Moss, July 20, 1680, and his followers were dispersed. They published declarations against the test of 1681, Jan. 12, 1682; against the royal authority Oct. 28, 1684, and May 28, 1685. The Cameronians renewed the covenants in 1712, and formed themselves into a presbytery called the Reformed Presbytery Aug. 1, 1743. A writer in "Notes and Queries" (2nd series, vol. v. p. 262) asserts that "the Cameronians still exist as a distinct sect, a small but tenacious body."

CAMERONITES.—Some French Calvinists, the followers of John Cameron, are thus designated. He was born at Glasgow in 1580, and in 1600 went to France, where he held professorships at Sedan and Saumur. Mosheim says that this divine and his followers "devised a method of uniting the doctrines of the Genevans respecting the divine decrees, as expounded at Dort, with the views of those who hold that the love of God embraces the whole human race." They were also called Hypothetical Universalists. Cameron, who was stabbed in the streets of Montauban, died in 1625.

CAMISARDS, so called from the camise or smock which they often wore over their other clothes, were French Protestants, who appeared in the Cevennes early in the 18th century. Their object was the maintenance of religious liberty, which had been sacrificed by the revocation of the Edict of Nantes (*q. v.*). In 1703 their numbers had increased to 10,000. They maintained their ground for some time, gaining several victories, but being unable to resist the strong forces sent against them, were ultimately suppressed in 1705.

CAMLET.—Marco Polo, the account of whose travels was circulated in 1298, speaks of camlet among the manufactured articles produced in Thibet. This stuff is a much coarser material than the modern camlet, which was made of the hair of the Angora goat—not, as has been erroneously supposed, of that of the camel. A mixed stuff of wool and silk was used for gowns in this country in the time of Elizabeth. During the Middle Ages the term camlet appears to have been applied to haircloth in general.

CAMPAGNA (Italy).—Clement VII. erected this town of Naples into an episcopal see July 19, 1525, united it to Satriano, and made it subject to Salerno.

CAMPAGNA DI ROMA.—This name is said to have been first applied during the Middle Ages, to the unhealthy plain in which Rome is situated. Pius VI. (1775—1799) drained a considerable portion of this plain.

CAMPANIA (Italy). — The luxuriance and fertility of the soil, and the salubrity of the climate, of this province, the richest plain in the world, have been frequently celebrated in prose and verse. The first well-ascertained fact in its history is the settlement of the Greek colony of Cumæ, B.C. 1050. It afterwards fell under Etruscan rule. The Samnites captured Capua B.C. 423, and Campania was afterwards the theatre on which the Romans and the Samnites, and other nations, waged hostilities. A large portion of the province was conquered by the Romans B.C. 340. Pyrrhus passed through Campania B.C. 280; and some of the smaller towns declared in favour of Hannibal B.C. 216. The Carthaginians were driven out of Campania B.C. 212. This province became the favourite retreat of the wealthy Romans. The towns of Herculaneum and Pompeii were overwhelmed by an eruption of Vesuvius A.D. 79; but the province speedily recovered from the effects of this calamity. Campania formed part of the kingdom of Naples, under the name of Terra di Lavoro, and is now included in the kingdom of Italy.

CAMPBELL'S ACT. — (*See* DEATH BY ACCIDENTS COMPENSATION ACT.)

CAMPBELL'S STATION (Battle). — Gen. Burnside repelled an attack of the Confederate Gen. Longstreet at this place in Tennessee, Nov. 14, 1863. He was, however, compelled to withdraw to Knoxville (*q. v.*), where he was besieged by Longstreet Nov. 17 and 18.

CAMPE (Treaty), between Henry VIII. of England and Francis I. of France, was con-

cluded at this small place, between Ardres and Guines, June 7, 1546. Henry VIII. was to retain Boulogne until the debt of 2,000,000 livres due to him should be paid, and a further claim of 500,000 livres was adjusted. The emperor was included by both parties in the treaty, and Henry VIII. agreed to include Scotland, on condition that the Scotch gave him no further cause to make war upon them.

CAMPEACHY BAY (Mexico) was discovered in 1517 by Cordova. The Spaniards founded Campeachy in 1540. It was taken by the English in 1659, who formed a settlement of logwood-cutters about the year 1667. It was again taken in 1678 by the pirate Louis Scott, and by the buccaneers in 1685.

CAMPEN (Battle). — The hereditary Prince of Brunswick was repulsed in an attack upon the French at the convent of Campen, on the Lower Rhine, Oct. 15, 1760.

CAMPERDOWN (Sea-fight). — Fought off the Dutch coast, near the village of Camperdown, Oct. 11, 1797, between the Dutch and English fleets, commanded by Admirals De Winter and Duncan, in which the latter gained a complete victory, taking or destroying eleven of the enemy's ships. For his valour and address in this engagement, Admiral Duncan was raised to the peerage by the title of Lord Duncan of Camperdown, Oct 21, 1797.

CAMPHOR has been long known in the East, although the Greeks and Romans were unacquainted with it. The date of its introduction into Europe by the Arabians is not known. Aetius, who flourished about 500, is the first author who names it, and it is also mentioned by Paracelsus (1493—1541). The results of the first correct experiments on the properties of camphor were published by Neumann in 1725.

CAMPILLO (Battle). — The French, under Gen. Molitor, defeated the Spaniards under De Ballesteros, at Campillo de Arenas, in Seville, July 28, 1823.

CAMPO-FORMIO (Treaty). — The preliminaries of this treaty between Austria and the French republic were signed at the castle of Eckenwald, near Leoben, in Styria, April 18, 1797, and the treaty itself was concluded at Campo-Formio, a village in Friuli, N. Italy, Oct. 17, 1797. The emperor surrendered the Austrian Netherlands, the Ionian Islands, and extensive territories in Italy, receiving Venice and some other places in return. He acknowledged the independence of the Cisalpine republic, and acquiesced in the incorporation with it of the duchies of Modena and Mantua, Massa, Carrara, Bergamo, Brescia, Bologna, Ferrara, and Romagna. This treaty, most humiliating for Germany, consisted of 25 articles, to which 14 secret articles were added, involving further sacrifices on the part of the emperor. The 20th article provided that a congress should assemble at Radstadt (*q. v.*) within one month after the conclusion of the treaty, or sooner if possible. It was to be composed solely of the plenipotentiaries of the German empire and of the French republic, and its object was to conclude a pacification between these powers.

CAMPO MALO (Battle).—Fought, in 1036, between the Bishop of Milan and his rebellious vassals, who were aided by numerous auxiliaries. It terminated in favour of the latter.

CAMPONA (Battle).—Constantine I. defeated the Goths and the Sarmatians, their allies, at this place, in Italy, A.D. 322.

CAMPS. — (*See* ALDERSHOT and CHOBHAM CAMP.)

CAMPUS RAUDIUS (Battle).—On this plain, in Cisalpine Gaul, Marius and Catulus defeated the Cimbri with immense slaughter B.C. 101.

CAMPVERE. — (*See* VERE, or VEERE.)

CAMULODUNUM. — (*See* CAMELODUNUM.)

CANAAN (Asia).—This portion of Palestine was named after Canaan, one of the sons of Ham (Gen. x. 6, 15—19). Canaan is said to signify "low land," as opposed to "Aram," "high land," the Hebrew name of Syria. Abram, at the command of God (Gen. xii.), went forth into the land of Canaan B.C. 1921. (*See* PALESTINE.)

CANADA (North America).—This portion of the New World was visited by the Scandinavians in the 12th and 13th centuries. John and Sebastian Cabot discovered Canada in June, 1497; but no permanent settlement was formed until the French arrived in the 16th century. According to a Castilian tradition, the Spaniards visited this country before the French, and finding neither gold nor riches of any description, exclaimed "*Aca Nada!*"—"Here is nothing," in the presence of the natives. Hence the name Canada. Another account is, that the Spaniards named the country "*El Capo di Nada*," or "Cape Nothing." Charlevoix's derivation of the term is, however, generally received. He says that *Cannada*, signifying in the Iroquois language a number of huts, or a village, was applied by the inhabitants to the first settlements made by the French, and the entire province afterwards received this designation. The French called it New France.

A.D.
1497, June 24. John and Sebastian Cabot discover Canada.
1500. The Portuguese mariner Corterval visits Canada, and is said to have discovered the gulf of St. Lawrence.
1517, June 11. Sir Thomas Pert's expedition, which is accompanied by Sebastian Cabot, enters Hudson's Bay, but does not explore it, owing to the timidity of the commander.
1524. Settlement of New France (*q. v.*).
1535. Jacques Cartier ascends the St. Lawrence as far as the present site of Montreal, and carries several of the natives, with their chief, to France.
1540. The French erect the fort of Charlesbourg. Cartier and Roberval explore the country round Montreal.
1549. Roberval sails for Canada, and is lost.
1581. The French again trade to Canada.
1591. A French fleet sails to Canada.
1598. Henry IV. of France commissions the Marquis de la Roche to conquer Canada; but the undertaking proves a failure.
1608, July 3 (N. S. 13). Quebec (*q. v.*) is founded by Champlain.
1627. Richelieu intrusts the government of the colony to the "Company of a Hundred Associates."
1629, July. Sir D. Kirke takes the French possessions in Canada.
1632. They are restored to France by the treaty of St. Germain.
1648-49. The colony suffers from the incursions of the Iroquois Indians.
1663. Louis XIV. erects Canada into a royal government, with the laws and usages of France.
1665. Canada is granted to the French West India Company
1667. Peace is made with the Indians.

A.D.
1690. Sir William Phipps is despatched from New England to conquer Canada.—Oct. 16. He reaches Quebec.—Oct. 22. He re-embarks, without effecting any conquests.
1711. The British American colonies send another fleet to conquer Canada.—Aug. 22. It is wrecked at the mouth of the St. Lawrence.
1713, April 11. The peace of Utrecht restores tranquillity to Canada.
1746. Shirley, Governor of Massachusetts, projects the conquest of Canada, but only carries his arms into Nova Scotia.
1755. The English again attack Canada.
1759, Sep. 13. Battle of Quebec (*q. v.*), and death of Gen. Wolfe.—Sep. 18. The town surrenders to the British.
1760. Entire reduction of Canada by the British.
1763, Feb. 10. Canada is ceded to Great Britain by the treaty of Paris.
1765. Canada submits to the Stamp Act.
1774. A legislative council of 23 members is appointed.
1775, Sep. 10. The American forces invade Canada, and land at St. John's.—Nov. 3. Gen. Montgomery takes St. John's; Nov. 12, Montreal.—Dec. 31. In company with Arnold, he assaults Quebec. He is killed in the action, and the Americans surrender to Gen. Carleton.
1776, June 18. The Americans evacuate Canada.
1791, March 4. Pitt proposes the Quebec Bill (31 Geo. III. c. 31), by which Canada is divided into the Upper and Lower provinces, and receives a representative constitution.
1792. The first House of Assembly is opened by Lieut.-Governor Clarke.
1793. Canada is erected into a bishopric.
1812, Aug. 15. The Americans, under Gen. Hull, having invaded Canada, are compelled to surrender.—Oct. 14. A second army, under Gen. Wadsworth, capitulates.—Nov. 27. A third, under Van Rensselaer, surrenders.
1813, April 27. The Americans take York (Toronto).—May 27. They capture Fort George.—May 29. They repel the British at Sacket's Harbour.—June 6. They are defeated at Stony Creek.—Nov. 11. Indecisive battle of Williamsburg.
1814, March 4. The Americans gain the battle of Longwood.—July 3. They take Fort Erie.—July 5. They gain the battle of Chippawa.—July 25. Second battle at Chippawa, also called Bridgewater.—Dec. 24. Peace is signed at Ghent.
1828. 87,000 Canadians petition the king against the manner in which the governors had applied the revenues.
1836, Sep. 22. The Houses of Assembly refuse to vote supplies.
1837. The "Sons of Liberty," under Papineau, rise in rebellion at Montreal.—Dec. 4. They are defeated in an attempt to seize Toronto.—Dec. 14. They are defeated at St. Eustace.
1838, Jan. 15. Resignation of Sir Francis Head.—May 29. Lord Durham, his successor, arrives at Quebec.—Oct. Lord Durham leaves for England.
1841, Feb. 10. Upper and Lower Canada are united into one province.
1844. The seat of government is transferred from Kingston to Toronto.
1849, April 25. Disturbances in Canada, owing to the Rebellion Losses Indemnity Bill. The insurgents burn the parliament house at Montreal.
1853, May 9. By 16 Vict. c. 21, the Legislature is empowered to make provision concerning the lands known as Clergy Reserves, and their proceeds.
1855, Sep. Extensive immigration from the north of Scotland.
1856, March 12. Seventy people are killed by an accident on the Hamilton Railway.—April 17. Quebec is made the seat of government.
1858. Ottawa is made the capital.
1860, July. The Prince of Wales visits Canada.—Sep. 20. He leaves for the United States.
1861, Dec. 23. Detachments of troops are despatched to Canada by the British Government as a precaution against aggression by the Federal States of America.
1862, May 20. Resignation of the Ministry. A new cabinet is formed under Mr. J. L. M'Donald.—June 7. A disastrous fire occurs at Quebec (*q. v.*).

A.D.
1864, Oct. 3. A meeting of French Canadians, held at Montreal, protests against the project of Federal union.—Oct. 10. A conference of delegates assembles at Quebec to consider the advisability of forming a federal union of the provinces of British America (*q. v.*).—Oct. 19. Confederate refugees in Canada cross the frontier into Vermont, and attack the town of St. Albans.—Dec. 6. President Lincoln proposes in his message, after giving six months' notice to England, to form a naval force on the Lake, to prevent Confederate raids from Canada.—Dec. 14. Gen. Dix publishes a proclamation, annulled by President Lincoln, announcing that persons invading United States territory across the Canadian frontier, will be pursued beyond that boundary and captured on British soil.—Dec. 15. The raiders having been discharged, great excitement prevails in the United States.
1865, Jan. 19. Opening of the Canadian Parliament.—March 23. The English House of Commons, after an animated debate, votes £80,000 for the defence of Canada.—April 17. The Canadian Parliament adopts, by a large majority, the project of federal union.
1866, March. The Canadians take measures to repel a threatened invasion of Fenians from the United States.

CANADIAN.—This screw steamer, carrying mail-bags and passengers from Quebec, struck upon a field of ice about five miles from the straits of Belleisle, between Newfoundland and Labrador, and foundered in about an hour, June 4, 1861. The majority of the passengers and crew escaped in the boats, but 35 persons perished.

CANALS were constructed in China at a very early period, and in Egypt as early as B.C. 1350. (*See* SUEZ CANAL.) The Bahr-Yoosuf, or river of Joseph, was made under the Pharaohs. They were introduced into Europe about the commencement of the Christian æra. The Caer Dyke and the Foss Dyke, in Lincolnshire, the earliest in England, were constructed by the Romans. Locks, which are said to have been used in the time of the ancient canals of Upper Egypt, and in the Milanese canals in 1497, were introduced into England from Flanders in 1652. Canals are regulated by 8 & 9 Vict. c. 42 (July 21, 1845), and 17 & 18 Vict. c. 31 (July 10, 1854). (*See* INLAND NAVIGATION.)

CANANORE (Hindostan).—The Portuguese had a fort at this town in Malabar, as early as 1505. They were expelled by the Dutch, who in 1664 sold their privileges to the native princes. It afterwards formed part of the empire of Hyder Ali. The English, who were repulsed in an attack upon Cananore in 1768, garrisoned it in 1784. Having been restored, it was taken from Tippoo Saib by Gen. Abercrombie in 1791.

CANARA (Hindostan).—This province was wrested from the Hindoos by Hyder Ali, in 1763. On the death of his son Tippoo Saib, in 1799, it came under the rule of the East India Company, and has since formed part of the presidency of Bombay. It is divided into North and South Canara.

CANARY-BIRD, found in Madeira, the Canary and Cape Verde Islands, was brought to Europe early in the 16th century.

CANARY ISLANDS, or CANARIES (N. Atlantic Ocean), are supposed to be the Hesperides or *Fortunate Islands* of the ancients. Their discovery in modern times is attributed to the crew of a French vessel, who were driven

to their shores by stress of weather about 1330—4. (*See* AFRICA.) Some Spanish adventurers visited them about 1395, and plundered all the populous districts, carrying off as captives the king and queen and about 70 of the inhabitants. In 1400, the King of Castile granted the Canaries to John de Béthencourt. An episcopal see was established in the Canaries in 1404. In 1483 the Spaniards commenced the conquest of the Canaries, which have remained in their possession ever since. In 1494 most of the Guanches, the aboriginal inhabitants who had escaped slavery, war, and famine, were carried off by a terrible pestilence. Ximenes extended the Inquisition to the Canaries in 1516. In 1822 the Canary Islands were formed into a Spanish province, with the right of representation in the Cortes.

CANCER HOSPITAL (London), situated at West Brompton, was opened Nov. 20, 1852.

CANDAHAR.—(*See* KANDAHAR.)

CANDIA (Mediterranean), the ancient Crete, became a Roman province B.C. 67. The capital of the island, also called Candia, was taken by a band of Spanish Arabs A.D. 823, and recovered by the Greeks under Nicephorus Phocas in 961. The Venetians purchased the island Aug. 12, 1204, and took possession in 1205. In consequence of the frequent insurrections of the Candiotes, the Venetians, in 1243, divided the island into three parts; the first for the republic, the second for the Church, and the third for the colonists. Notwithstanding this, the inhabitants remained so turbulent, that it was necessary to despatch a fleet to reduce them to subjection, which was done in 1364. In 1571 the Turks settled in Candia, but soon abandoned it to prosecute their conquests in other directions. They returned June 24, 1645, and after a siege of 24 years, gained possession of it in 1669. In 1830 it was ceded to the Pasha of Egypt, and again restored to Turkey in 1840. An insurrection among the Christians of Candia, that broke out in 1841, was suppressed by the Turkish Government before the end of the year. It suffered from an earthquake in 1846.

CANDLE.—(*See* INCH OF CANDLE.)

CANDLEMAS DAY.—A festival held Feb. 2, to commemorate the purification of the Virgin Mary. Bingham (b. xx. c. 8, s. 5) says, "This at first among the Greeks went by the name of *Hypapante*—Ὑπαπαντή, which denotes *the meeting* of the Lord by Simeon in the temple, in commemoration of which occurrence it was first made a festival in the Church; some say in the time of Justin, the emperor; others in the time of his successor Justinian, anno 542." A proclamation against carrying candles on Candlemas Day was issued by Edward VI. in 1548.

CANDLES.—Pliny the elder (A.D. 23—79), speaks of the invention of rush-lights, and Apuleius (130—173) mentions candles of wax and tallow. They were also used in the Church during the 3rd century. Alfred the Great used them to measure time (871—901). Tallow candles did not come into general use till about 1300, before which time torches and oil lamps were most frequently employed. An attempt to obviate the inconvenience of snuffing was made in 1799. The composite candle, which does not require snuffing, was introduced in 1840. The patents of Gwynne, in 1840, of Wilson in 1842, and of Tighlman in 1854, have led to great improvements in the manufacture. A duty on candles, first imposed by 8 Anne c. 9, s. 1 (1709), was repealed from Jan. 1, 1832, by 1 & 2 Will. IV. c. 19 (Sep. 6, 1831).

CANDLESTICK.—Some of the ancient utensils called by this name were lamps for burning oil. Moses was commanded to make a candelabrum with six branches, of hammered gold, for the tabernacle (Exod. xxv. 31 & 32), B.C. 1491. The golden candlestick, which had been replaced in Solomon's temple by 10 golden candelabra, was restored after the Babylonish captivity. It was seized by the Romans on the capture of Jerusalem A.D. 70, carried into Africa by the Vandals under Genseric in 435, and taken from them in 533 by Belisarius, who removed it to Constantinople. It was afterwards transferred to Jerusalem. Another account states that it fell into the Tiber from the Milvian bridge during the flight of Maxentius from Constantine, Oct. 28, 312.

CANEA, or CANNA (Candia), the capital of the island, was founded by the Venetians in 1252.

CANE HILL (Battle).—At this place, in Arkansas, the Federals under Gen. Blunt defeated the Confederate forces of Gen. Marmaduke, Nov. 28, 1862. The latter retired to Van Buren.

CANGI.—The territory of this British tribe, which some authorities place in Somersetshire and others in North Wales, was invaded and laid waste by Ostorius Scapula, A.D. 50.

CANICULAR YEAR.—The Egyptians and Ethiopians began their year from the rising of the Canicula, or Sirius, the Dog-star; whence the term. It consisted ordinarily of 365 days, to which another was added every fourth year. It commenced July 20, 2785 B.C., and is sometimes called the HELIACAL YEAR.

CANINEFATES.—This German tribe, which submitted to Tiberius A.D. 4, assisted Civilis in his rebellion against the Romans in 69.

CANNÆ (Battle), fought between the Romans under L. Æmilius Paulus and C. Terentius Varro, and the Carthaginians under Hannibal, at this place, called by Florus "an obscure Apulian town," Aug. 2, B.C. 216. As the Roman calendar was in confusion, it is believed to have taken place in June. The Romans were defeated with a loss of 70,000 men, whilst Hannibal's loss was only 6,000.

CANNES (France).—Napoleon I. landed near this seaport, March 1, 1815, on his escape from Elba.

CANNING ADMINISTRATION.—The Earl of Liverpool having been incapacitated from continuing at the head of affairs by a paralytic stroke, with which he was seized Feb. 17, 1827, George IV. applied to Mr. Canning, then secretary of state for foreign affairs, and after protracted negotiations, he received formal instructions from the king to form a ministry, April 10. The Duke of Wellington, Lord Westmoreland, Lord Eldon, Lord Bexley, Earl Bathurst, and Mr. Peel resigned, April 11. The king, however, persevered, and Mr. Canning kissed hands April 12. Other resignations fol-

lowed. The new ministry was composed as follows:—

First Lord of the Treasury and Chancellor of the Exchequer.	Rt. Hon. G. Canning.
Lord Chancellor	Lord Lyndhurst.
President of the Council	Earl of Harrowby.
Privy Seal	Duke of Portland.
Home Secretary	Rt. Hon. W. S. Bourne.
Foreign Secretary	Viscount Dudley and Ward.
Colonial Secretary	Viscount Goderich.
Board of Control	Rt. Hon. C. W. W. Wynn.
Board of Trade	Rt. Hon. W. Huskisson.
Chancellor of the Duchy of Lancaster	Lord Bexley.
Secretary at War	Lord Palmerston.
Woods and Forests	Earl of Carlisle.
Master of the Mint	Rt. Hon. G. Tierney.
Without office	Marquis of Lansdowne.

The Earl of Carlisle was gazetted Privy Seal, July 61, 1827, in place of the Duke of Portland, who retained a seat in the cabinet; and the Marquis of Lansdowne Home Secretary in place of Rt. Hon. W. S. Bourne, who became first Commissioner of Woods and Forests, retaining his seat in the cabinet. A reconstruction of this ministry occurred after the death of the Rt. Hon. G. Canning, which took place Aug. 8, 1827. (*See* GODERICH ADMINISTRATION.)

CANNON have been long known to the Chinese, whose books mention them as early as 618 B.C. A small brass cannon, bearing the date 1258, has been taken from a well at the Castle de Cluey in France. The earliest document yet discovered relative to the employment of cannon for siege and defence, is among the ordinances of Florence for 1326, where metal cannon are appointed to be made for the defence of the forts and lands of Florence, and for the injury of her enemies. The first French mention of cannon is dated July 2, 1338, and provides ammunition for the attack on Southampton. Froissart speaks of cannon used by the inhabitants of Quesnoy against the Duke of Normandy in 1340. Mohammed II. established a foundry at Hadrianople in 1452, where a piece of brass ordnance of incredible magnitude was cast expressly for the siege of Constantinople. Gibbon says its bore measured 12 palms, and that the stone bullet weighed 600 lb.; according to another authority, the bullet was double that weight. This gun burst during the siege. Von Hammer declared that he had seen the great cannon of the Dardanelles, and that it furnished a hiding-place for a tailor who had run away from his creditors. The invention of brass cannon is attributed to John Owen. Iron cannon were first cast in England in 1547. (*See* ARMSTRONG GUN, ARTILLERY, &c.)

CANNONGATE MARRIAGES.—In the middle of the 18th century, couples were married at public-houses in the Cannongate, Edinburgh, by unauthorized persons. Hence the term by which such marriages were known.

CANON LAW is a collection of ecclesiastical constitutions, decisions, and rules for the regulation of the Roman Catholic Church. It consists principally of ordinances of provincial and general councils, the decretals, bulls, and epistles of the papacy. The earliest of these rules (canones) are the Canons Apostolical (*q. v.*). Dionysius Exiguus, a Roman monk, compiled a "Codex Canonum" in 520; and the canons of the four councils of Nicæa, Constantinople, Ephesus, and Chalcedon, received the sanction of Justinian in 545. The Codex Canonum, with the Capitularies of Charlemagne, and the decrees of the popes from Siricius to Anastatius IV. (385—1154), formed the chief part of the canon law down to the 12th century. In 1114 Ivo, Bishop of Chartres, collected the decrees made by the popes and cardinals, and this work was completed by Gratian, a Benedictine monk, and published in 1140. Raimundus Barcinus, chaplain to Gregory IX., published in 1234 the decretals, which were rescripts or letters of the popes, in answer to questions on ecclesiastical matters submitted to them. The work consisted of five books, to which Boniface VIII. added a sixth in 1298. Clement V. added what were called the Clementines in 1308. John Andreas added a commentary called the Novellæ in the 14th century, and John XXI. or XXII. the Extravagants in 1317. To these have since been added some decrees by later popes, and the whole form what is now known as the "Corpus Juris Canonici," or the great body of the canon law received by the Church of Rome. The primary object of this system was to establish the supremacy of ecclesiastical authority. It was not received in England, though attempts at its introduction were made at various times. The Legatine and Provincial Constitutions (*q. v.*) formed, however, a kind of national canon law, adapted to the English Church. By 25 Hen. VIII. c 19 (1553), it was enacted that these canons should be reviewed by the king and certain commissioners to be appointed under the act, and that until such review was made, all canons, constitutions, ordinances, and synods provincial, being then already made, and not repugnant to the law of the land or the king's prerogative, should remain in force. This act, repealed by 1 Phil. & Mary c. 8 (1553), was revived by 1 Eliz. c. 1, s. 10 (1559). By 27 Hen. VIII. c. 15 (1535), power was given to the king to appoint 32 commissioners under the act of 1533. Divers urgent matters interfered to prevent the exercise of the power, and by 35 Hen. VIII. c. 16 (1544), power was given to the king to nominate them during his life. A commission was duly appointed, but the death of the king prevented the completion of the work. During the reign of his successor, Cranmer renewed his efforts to obtain a satisfactory settlement of the question. By 3 & 4 Edw. VI. c. 11 (1549), another commission was ordered, and eight persons were appointed to prepare the materials for the larger commission. They were engaged on the work in 1552, and concluded their labours during the year. Various matters interfered to delay the ratification and establishment of the new code of ecclesiastical laws, and after the death of Edward VI. it was almost entirely neglected. The manuscript containing this code of laws, with numerous notes and corrections in the handwriting of Cranmer, is preserved amongst the Harleian MSS. in the British Museum. From this draught Archbishop Parker probably prepared the code published in 1571, under the title of "Reformatio Legum Ecclesiasticarum." It

was republished in 1640. The Rev. E. Cardwell has published several editions of this remarkable work.

CANON OF SCRIPTURE consists of those books which are in "the rule, or canon, or catalogue of books authorized to be read in the church," and recognized as inspired, and therefore authentic. The Church of Rome admits into the canon several books which neither the Primitive Church nor the Church of England accepts as canonical. Cyril, Bishop of Jerusalem in the 4th century, in speaking of the canonical books, mentions all those in the English Bible, except the book of Revelation. The Council of Laodicea, in 366, forbids any but the canonical books to be read in the Church, and gives the following list of them:—Genesis, Exodus, Leviticus, Numbers, Deuteronomy, Joshua, Judges, Ruth, Esther, four books of Kings, two of Paralipomena or Chronicles, two of Esdras, the book of 150 Psalms, Proverbs, Ecclesiastes, Canticles, Job, 12 Prophets, Isaiah, Jeremiah, Lamentations, and epistles of Baruch, Ezekiel, Daniel, the four Gospels, the Acts of the Apostles, the seven catholic epistles; 14 epistles of St. Paul. "Where none of the apocryphal books," says Bingham, "nor the Revelation, are mentioned; which is a plain evidence that none of them were read in the churches of that district." Ezra collected the books of the Old Testament about B.C. 444; and Simon the Just, who died about B.C. 291, added the two books of the Chronicles, Ezra, Nehemiah, Esther, and Malachi; and this closed the canon of the Old Testament. With respect to the canon of the New Testament, Townsend (The Holy Bible in Historical and Chronological Order, vol. ii. p. 439) remarks:—"As the canon of the Old Testament was completed by Simon the Just, the last of the great Sanhedrin, so it is probable the canon of the New Testament was completed either by St. John, or that disciple who might be the survivor of the 120, the number of the Sanhedrin, who met at the day of Pentecost. It is not probable that any of these outlived St. John, who died nearly 70 years after the ascension of his Divine Master." The following is a list of the canonical books of the Old and New Testament, with the supposed date of their composition. This is, however, in some cases uncertain:—

OLD TESTAMENT.

When composed.	Book.	Author.	Chapters.
B.C.			
Before 1451	Genesis	Moses	50
,, 1451	Exodus	,,	40
,, 1451	Leviticus	,,	27
,, 1451	Numbers	,,	36
,, 1451	Deuteronomy	,,	34
,, 1443	Joshua	Joshua	24
,, 1406	Judges	Samuel	21
,, 1406	Ruth	,,	4
,, 1406	1 Samuel	,,	31

95-97	Revelation	John	22

(*See* APOCRYPHA, BIBLE, PENTATEUCH, &c.)

CANONIZATION. — Milman (Lat. Christianity, book xiv. ch. 2*n*) remarks, "Canonization has been distributed into three periods. Down to the 10th century the saint was exalted by the popular voice, the suffrage of the people with the bishop. In the intermediate period the sanction of the Pope was required, but the bishops retained their right of initiation. Alexander III. seized into the hands of the Pope alone this great and abused prerogative." The first recorded canonization by the Pope is that of Ulric, Bishop of Augsburg, who received the title of saint from John XV. or XVI., in 995. In 1176, during the supremacy of Alexander III., the privilege of adding to the calendar of saints was vested in the Pope alone.

Beatification, an inferior degree of canonization, was introduced into the Roman Catholic Church in the 12th century. Twenty-three monks who visited Japan as missionaries in the 16th century, and suffered death in the Philippine Islands, were canonized at Rome with great pomp, June 8, 1862.

CANONS of the Church of England, 141 in number, were drawn up by Bancroft, Bishop of London, accepted by Convocation in 1604, and assented to by the king. They were chiefly compiled out of the synodical acts passed in 1571—1597, a few new ones being introduced. They never received the sanction of Parliament, and are considered by the courts of common law to be binding on the clergy only. Though these are generally called the canons of 1603, they were not ratified until 1604. In 1640 Convocation formed a new body of canons. The House of Commons voted them unlawful Dec. 16, and Archbishop Laud, their author, was committed to the custody of the Usher of the Black Rod, Dec. 18. Thirteen bishops were impeached for their share in drawing up these canons, Aug. 13, 1641.

CANONS (Apostolical). — These ancient canons, 76 or 85 in number, according to different modes of division, are attributed by Baronius, Bellarmin, and other Roman Catholic writers, to the apostles. Other authorities ascribe them to St. Clement, whilst some declare that they are the forgeries of some heretic in the 6th century.

CANONS (Regular and Secular). — Mosheim states that this new species of priests, at first called the Lord's Brethren, and afterwards canons, was instituted by Chrodegang, Bishop of Metz, in the 8th century. They formed an intermediate class between monks and regulars, and although they followed the discipline and mode of life of monks, took no vows upon them. Canonesses were added in the 9th century. By the 11th century they had, like the other orders, become corrupted, and several efforts were made to effect reforms. Nicholas II. was, at the Council of Rome, April 13, 1059, to a certain extent successful in this object; but some communities would not proceed so far in this direction as others. Hence arose the distinction between *regular* and *secular* canons, the former having all things in common, whilst the latter had nothing in common but their dwelling and table. The term canon is now applied to a prebendary of a cathedral.

CANONS (Scottish).—The book of canons for the Church of Scotland, drawn up by the Scottish bishops, was confirmed by letters patent under the great seal, May 23, 1635. It was very unpopular in Scotland, and was withdrawn by Charles I. Sep. 9, 1638.

CANOPUS, or CANOBUS (Battle).—The battle of Alexandria (*q. v.*), March 21, 1801, is sometimes called Canopus, from the ruins of an ancient town of that name about 15 miles from Alexandria, and three from Aboukir. It is also called the battle of Rhamanieh.

CANOSA (Italy), the ancient Canusium, in Apulia, which is said to have been founded by the Pelasgi, submitted to the Romans B.C. 318, whereupon the Canusians renounced their alliance with the Samnites, and remained faithful to Rome for many years. Having revolted, their city was besieged and their territory ravaged B.C. 89. During the civil war, Sylla gained a battle here B.C. 83. The modern city occupies the site of the citadel of Canusium. At a very early period of the Christian æra, it became the seat of a bishopric, which was united to that of Bari in 845. It was besieged by the French July 2, 1502. After repulsing two assaults, the Spanish garrison capitulated on honourable terms.

CANOSSA (Italy).—This fortress, near Reggio, in Modena, was the scene of Henry the Fourth's humiliation to Pope Gregory VII. (Hildebrand), in Jan., 1077. The Pope had summoned the emperor to appear before him at Rome to answer some charges brought against him by his subjects. Henry IV., in an assembly held at Worms, Jan. 23, 1076, declared that Gregory VII. was no longer pope. Gregory VII. immediately called a council in the Lateran, excommunicated Henry IV., deprived him of the kingdoms of Germany and Italy, and released his subjects from their allegiance. The emperor, at first bent upon resistance, was frightened by some disaffection that revealed itself at home, and he crossed the Alps to submit and seek absolution. Gregory VII. was at the time in the castle of Canossa, with the Countess Matilda. Henry IV. arrived at its gates in the depth of a winter of unusual severity, Jan. 25, 1077. Three successive days he remained in an outer court, without food, in a woollen shirt and with bare head and naked feet, and only on the fourth would Gregory VII. admit him to his presence. Absolution was then granted. The emperor's friends, disgusted at this base humiliation, deserted him Jan. 28, and, goaded by the insolence of Gregory, he renounced his treaty. At a diet held at Forcheim by the rebel princes, Henry IV. was deposed, and Rodolph of Swabia elected in his stead, March 15, 1077. Gregory VII., who endeavoured in vain to act the part of arbitrator, excommunicated Henry IV. at a council at Rome, March 7, 1080, and acknowledged Rodolph. The emperor summoned a council at Brixen, June 25, 1080, deposed Gregory VII., and elected Guibert in his stead, under the title of Clement III., June 25. Success crowned Henry's efforts in the field; he entered Rome, June 9, 1083, after a siege of three years' duration, and was crowned by the new Pope. Gregory VII. took refuge, first at Monte Casino, and then with Roger Guiscard, at Salerno, where he died, May 25, 1085.

CANOUJ (Hindostan).—(*See* KANOGE.)

CANTABRI.—This tribe, inhabiting part of northern Spain, was the last in the peninsula that submitted to the Roman yoke in the reign of Augustus, by whom they were subdued, B.C. 25. Agrippa suppressed an insurrection among them B.C. 19, when the greater part of the nation perished by the sword, the survivors being driven from their mountain fastnesses, and compelled to reside in the valleys, where they were kept in awe by strong garrisons erected by Tiberius. The Basques are regarded as the descendants of this fearless and warlike people.

CANTERBURY.—This city in Kent, the

Roman Durovernum, is said by Geoffrey of Monmouth to have been founded by Hudibras, who reigned about B.C. 900. It existed at the time of the Roman conquest of Britain, as it is mentioned in the Itinerary of Antoninus, written about A.D. 320. At the commencement of the Heptarchy, in 455, it ranked as the chief city of Kent, and continued the residence of the king till Ethelbert gave up his palace to St. Augustine and withdrew to Reculver in 597. Christ's Church, which became the cathedral, was consecrated in 597. In the time of Theodore, who occupied the see from 668 to 693, the city was the seat of an important public school, which declined in consequence of the ravages of the Danes. Augustine became first Archbishop of Canterbury in 597. In 754 the town was nearly destroyed by fire, and in 851 it was taken by the Danes. Archbishop Odo (942—960) restored the walls and roof of the cathedral, which was, however, much damaged by the Danes, who again sacked the town in 1011, putting Elphege, the archbishop, to death, on Easter Eve, March 24. The cathedral suffered from a fire in 1066, and on St. Nicholas Day (Dec. 6), 1067, and the work of restoration was carried on by Archbishop Lanfranc (1070—1093) and his successors, by whom the new edifice was finished in 1130. Becket was killed in the cathedral Tuesday, Dec. 29, 1170, and the city became a resort for pilgrims. The choir was burned in 1174. Canterbury was represented in Parliament in 1265. The city remained unpaved till 1477. In 1542, Henry VIII. remodelled the cathedral and school, giving to the latter the title of King's School, which it has since retained; and in 1561 Queen Elizabeth permitted the Protestant refugees from the Low Countries to worship in the undercroft of the cathedral. Cromwell passed through the town in 1651, when the cathedral was used as a stable by his troops. The hospital was founded June 9, 1791. Thom's riots at Boughton, near Canterbury, May 28—31, 1838, led to a sacrifice of several lives. (*See* THOMITES.)

CANTERBURY (Archbishopric) was founded by Ethelbert in 597, when Augustine became the first archbishop, formally establishing his see in 602. After a long contest with York, the primacy of the archbishops of Canterbury was established at a council held in England from Easter to Pentecost, in 1072. Lanfranc, at that time archbishop, laboured diligently in order to secure this result. The archbishop is primate of all England and metropolitan. Augustine quitted Rome in 596, landed in England in 597, went to France, and was consecrated by the Bishop of Arles, Sunday, Nov. 17, 597; returned to England in 598, received the pallium from Rome in 601, and fixed the see at Canterbury in 602. In the following list, the date of the appointment of each archbishop is given :—

ARCHBISHOPS OF CANTERBURY.

A.D.	
597.	Augustine.
604.	Laurentius.
619.	Mellitus.
624.	Justus.
627.	Honorius.
655.	Deusdedit, or Adeodatus.
668.	Theodore.
693.	Brihtwald.
731.	Tatwine.

ARCHBISHOPS OF CANTERBURY—*continued.*

A.D.	
735.	Nothelm.
741.	Cuthbert.
759.	Bregwin.
766.	Jaenbert.
793.	Ethelhard.
805.	Wulfred.
832.	Feologild.
833.	Ceolnoth.
870.	Ethelred.
890.	Plegmund.
914.	Athelm.
923.	Wulfhelm.
942.	Odo.
960.	Dunstan.
988.	Ethelgar.
990.	Siric.
995.	Elfric.
1006.	Elphege.
1013.	Living.
1020.	Ethelnoth.
1038.	Eadsige.
1051.	Robert.
1052.	Stigand.
1070.	Lanfranc.
1093.	Anselm.
1114.	Ralph of Escures.
1123.	William of Corbeuil.
1139.	Theobald.
1162.	Thomas à Becket.
1174.	Richard.
1185.	Baldwin.
1191.	Reginald Fitz-Jocelin.
1193.	Hubert Walter.
1207.	Stephen Langton.
1229.	Richard Grant.
1234.	Edmund Rich.
1245.	Boniface.
1273.	Robert Kilwardby.
1279.	John Peckham.
1294.	Robert Winchelsey.
1313.	Walter Reynolds.
1328.	Simon Mepeham.
1333.	John Stratford.
1349.	Thomas Bradwardine.
1349.	Simon Islip.
1366.	Simon Langham.
1368.	William Whittlesey.
1375.	Simon Sudbury.
1381.	William Courtenay.
1397.	Thomas Arundel.
1398.	Roger Walden.
1399.	Thomas Arundel (again).
1414.	Henry Chicheley.
1443.	John Stafford.
1452.	John Kemp.
1454.	Thomas Bourchier.
1486.	John Morton.
1501.	Henry Deane, or Denny.
1504.	William Warham.
1533.	Thomas Cranmer.
1556.	Reginald Pole.
1559.	Matthew Parker.
1576.	Edmund Grindal.
1583.	John Whitgift.
1604.	Richard Bancroft.
1611.	George Abbot.
1633.	William Laud.
1660.	William Juxon.
1663.	Gilbert Sheldon.
1678.	William Sancroft.
1691.	John Tillotson.
1695.	Thomas Tenison.
1716.	William Wake.
1737.	John Potter.
1747.	Thomas Herring.
1757.	Matthew Hutton.
1758.	Thomas Secker.
1768.	Hon. Frederick Cornwallis.
1783.	John Moore.
1805.	Charles Manners Sutton.
1828.	William Howley.
1848.	John Bird Sumner.
1862.	Charles Thomas Longley.

CANTERBURY (New Zealand).—This settlement was founded in 1850, by a society of gentlemen connected with the Church of England, and incorporated under the style of the Canterbury Association. The local government was constituted in 1853.

CANTIRE, or KINTYRE (Scotland).—This peninsula of Argyleshire was subdued in 210 by Scots from Ireland, who having been expelled in 446, returned in 503, and established a government at Campbelton. From the 8th to the 13th century it was occupied by the Northmen; it then fell into the possession of the Macdonalds of the Isles, and lastly of the Campbells.

CANTON (China) is said by native historians to have been founded about B.C. 200. Its importance as a seat of foreign trade dates from about A.D. 700, when it was appointed the residence of an imperial commissioner of customs. In 1517 the Portuguese obtained permission to trade here, and in 1634 the English made an ineffectual attempt to secure the same privilege. The original city was destroyed in 1650, after a siege of 11 months. The East India Company established a factory in 1680. In 1755 European intercourse with China was restricted to Canton, which was nearly destroyed by fire Nov. 1, 1822, and greatly injured by a flood in Sep., 1833. The forts fired on two English ships-of-war, Sep. 7, 1834; but they were speedily silenced, and amicable relations re-established. Canton, the centre of operations

during the Chinese war of 1839—1841, was made, by the treaty of Nankin (Aug. 29, 1842), one of the five ports opened to British commerce. The factories, however, were burned down soon afterwards, and the English suffered greatly until April 6, 1847, when, having threatened to bombard the town, they obtained the execution of four murderers of their countrymen. The *Arrow*, a lorcha manned by Chinese, but commanded by an Englishman, was boarded by order of Commissioner Yeh, Oct. 8, 1856, and as compensation was refused, Sir M. Seymour seized the forts Oct. 24, and bombarded the town Oct. 28 and 29. The foreign factories were burned by the natives Dec. 14. An allied English and French force captured it Dec. 29, 1857, and the governor and Yeh were taken prisoners Jan. 5, 1858. Yeh was sent to Calcutta Jan. 8. A French cathedral was founded in 1863. (*See* CHINA.)

CAOUTCHOUC.—(*See* INDIA RUBBER.)

CAP.—The ancient Greeks and Romans usually left the head uncovered, and regarded the Phrygian cap as a mark of barbarism. The Romans gave their slaves a cap when they made them free. Hence the origin of the cap as a symbol of liberty. According to Diodorus Siculus (B.C. 44), the ancient Britons used a conical cap, which was discontinued during the Roman supremacy, and resumed under the Saxons, who wore head-coverings of felt, wool, and skin. After the Norman conquest, skull-caps were introduced, and during the 14th century both sexes adopted head-dresses of most extraordinary forms. It is usual to refer the general use of caps to the year 1449, when Charles VII. of France entered Rouen; but the change was probably very gradual. The cap was sometimes used as a mark of infamy; and in the 16th and 17th centuries bankrupts in France were compelled to wear a green cap. (*See* MAINTENANCE.)

CAPE ANNE (N. America).—This promontory of New England, forming the north-east point of Massachusetts Bay, was discovered in 1614 by John Smith, who named it Tragabigsanda, after a Turkish lady whose slave he had formerly been. The title was changed by desire of Prince Charles, afterwards Charles I., in honour of his mother Anne of Denmark.

CAPE BLANCO.—*See* BLANCO.)

CAPE BRETON (N. America).—This island is supposed to have been discovered by Cabot in 1497. In 1632 it was ceded to France by the treaty of St. Germain; but the French did not form a settlement until 1712, when they called it Ile Royale. They fortified Louisbourg in 1720, which was taken by the English June 15, 1745, but restored to France by the treaty of Aix-la-Chapelle, Oct. 18, 1748. The English recaptured Louisbourg July 26, 1758, and the island was finally ceded to them by the fourth article of the treaty of Paris, Feb. 10, 1763. Sydney, the capital, was founded in 1823. It forms part of the colony of Nova Scotia.

CAPE-COAST CASTLE (Africa).—This settlement in Guinea was established by the Portuguese in 1610; taken in 1643 by the Dutch, who established a colony in 1650, and by the English in 1661. In 1665 it was besieged, though unsuccessfully, by the Dutch under De Ruyter. It was finally ceded to the English by the treaty of Breda, July 10 (O. S.), 1667.

CAPE COD (Massachusetts) was discovered, according to some authorities, in 1004, by Thorwald, son of Eric the Red, who named it Kial-Arnes or Keel Cape, and according to others by Thorhall, the companion of the Danish voyager Thorfenn, in 1007. It was re-discovered in 1602, by Capt. Gosnold, who gave it its present name, and in 1614 was explored by John Smith, who named it Cape James in honour of King James I. It was the first land sighted by the Pilgrim Fathers in the *Mayflower* in 1620.

CAPE COMORIN (Hindostan) is first mentioned in the "Travels of Marco Polo," circulated in 1298, and called by him Komari.

CAPE FINISTERRE (Sea-fight). — Lord Anson and Admiral Warren defeated and captured a French fleet and convoy, consisting of 32 sail, under Admiral de la Jonquière, off this cape, May 3, 1747 (O. S.).

CAPE GIRARDEAU (Battle).—The Confederates, under Gen. Marmaduke, having vainly demanded the surrender of the Federal depôt at this place in Missouri, April 25, 1863, were defeated by Gen. McNeil, April 26, and compelled to retreat into Arkansas, which they reached May 2.

CAPE OF GOOD HOPE (S. Africa) was discovered by Bartholomew Diaz in 1487, and first doubled by Vasco de Gama Nov. 19, 1497. The English took possession in 1620, but neglected to plant a settlement, and it remained abandoned by Europeans till colonised by the Dutch in 1650. Diaz named it the Stormy Cape, which the King of Portugal changed to its present appellation. It was explored by Barrow in 1797. (*See* CAPE TOWN.)

CAPE HAYTIEN (Hayti).—Capt. Wake, of the *Bulldog*, having run his ship aground during an attack on the forts of this sea-port, formerly called Cape Français and Cape Henri, burned her to prevent her falling into the power of the enemy, Oct. 23, 1865. The forts were subsequently destroyed by H. M. S. *Galatea* and *Lily*, Nov. 9.

CAPE HORN, or HOORN (S. America), is supposed to have been sighted by Sir Francis Drake in 1578. Some authorities contend that it was first doubled by Le Maire and Schouten in 1616, and named after the birthplace of the last mentioned.

CAPE LA HOGUE (France).—The north-west part of a promontory which runs into the English Channel about 16 miles N.W. of Cherbourg. The eastern extremity of the same promontory is called Cape La Hague. (*See* LA HOGUE.)

CAPE ST. VINCENT (Sea-fights). — Sir George Rooke, with 23 men-of-war and the Turkish fleet under convoy, was attacked near this promontory, in Spain, by a force of 160 vessels, under Admiral De Tourville, June 16, 1693. The French captured or destroyed 12 English and Dutch men-of-war, and above 80 of the merchantmen. —— Admiral Rodney gave chase to a Spanish

fleet in these waters, Jan. 16, 1780, and succeeded in capturing one 80 and five 74-gun ships, Jan. 17.——Sir John Jervis, with 15 ships of the line and a few frigates, defeated a Spanish fleet of 27 men-of-war, four of which he captured, besides sinking others, Feb. 14, 1797.

CAPE TOWN (S. Africa) was founded by the Dutch in 1650, and remained in their possession till captured by the English under Admiral Elphinstone and Gen. Clarke, Sep. 16, 1795. A Dutch squadron, sent to recapture it, was taken by Elphinstone, Aug. 17, 1796. At the peace of Amiens (March 25, 1802), England restored it to the Dutch. It was again taken by Sir Home Popham and Sir David Baird, Jan. 10, 1806, and was finally ceded to England by the treaty signed at London, Aug. 13, 1814. The bishopric of Cape Town was founded in 1847. An attempt made by government in 1849 to convert the colony into a penal settlement was abandoned, owing to the opposition of the inhabitants. The constitution granted to the colony of Cape Town was officially proclaimed July 1, 1853. The judicial committee of the Privy Council decided that the Bishop of Cape Town had no jurisdiction over the Bishop of Natal, March 20, 1865. (*See* CAFFRE WAR.)

CAPE VERDE (Africa) was discovered by Dinis Fernandez, a Portuguese, in 1445. It is believed to have been the Arsinarium Pr. of the ancients.

CAPE VERDE, or DE VERDE ISLANDS (North Atlantic Ocean), were known to the ancients as the Gorgades. Though the re-discovery is usually attributed to the Genoese navigator Antonio de Noli, sailing in the service of Portugal, in 1449, Nuno Tristan is supposed to have discovered some of them two or three years earlier. Different authorities refer the discovery to 1450, 1460, and 1462. Pope Clement VII. erected them into a bishopric in 1532.

CAPET (House of).—Hugh Capet, Count of Paris, seized the crown of France on the death of Louis V. in 987, and founded the third dynasty of French monarchs. He was crowned at Noyon by the Archbishop of Rheims, July 1, 987. Fourteen kings of this line reigned before 1328, when Philip VI. vested the power in the house of Valois.

CAPITAL PUNISHMENT. — Among the ancient Jews, stoning, burning, and crucifixion were the chief capital penalties. Draco, B.C. 621, endeavoured to repress crime among the Greeks, by visiting every offence with death; but Solon, B.C. 594, limited the extreme sentence of the law to murder (*q. v.*), and a few other heinous offences. The Romans inflicted it on murderers, traitors, violators of public morals, and vestals who broke their vows of chastity. By the codes of Theodosius and Justinian, promulgated in 438 and 528, capital punishment was chiefly confined to murder, treason, adultery, forgery (*q. v.*), if committed by a slave, and man-stealing. Under the Anglo-Saxons, it was almost limited to theft; other offences, including murder, being dealt with by fines. William the Conqueror 1066—1087 abolished it altogether as a system, and substituted mutilation. Nevertheless, the first instance of decapitation for treason, in this country, occurred in his reign, Waltheof, Earl of Northumbria, having been beheaded at Winchester, May 31, 1076. Henry I. revived the capital penalty in certain kinds of theft in 1108, and in 1241 hanging, drawing, and quartering were first inflicted on a pirate named William Marsh or Maurice. The punishment of death subsequently became much more common, and in the time of Edward II. (1307—1327) was awarded to traitors, who were drawn and hanged; to murderers, robbers, and incendiaries, who were hanged; to heretics, who were burned; and to offenders against nature, who were buried alive. A "Society for the diffusion of knowledge upon the punishment of death," was established in London about 1808. By 4 & 5 Vict. c. 56 June 2, 1841, it is limited to the crimes of treason, murder, unnatural offences, setting fire to the queen's ships or stores, injuring life with intent to murder, burglary accompanied with attempts to murder, robbery accompanied with stabbing or wounding, setting fire to a dwelling-house having any person therein, setting fire to, casting away, or otherwise destroying ships with intent to murder, exhibiting false lights with intent to bring ships into danger, and piracy, accompanied with stabbing, &c. A commission, which was appointed in 1864, presented its report in 1865. (*See* BOILING TO DEATH, BURNING ALIVE, BURYING ALIVE, CRUCIFIXION, DROWNING, EXECUTIONS, GAROTTE, HANGING, &c.)

CAPITATION TAX.—(*See* POLL TAX.)

CAPITOL (Rome).—According to the legend, as the workmen were digging on the Saturnian, afterwards called the Capitoline Hill, the foundations for the temple, which Tarquin, in the Sabine campaign, vowed to erect to Jupiter, Juno, and Minerva, they came upon a human head. The augurs declared it to be an omen that the spot was destined to become the head of the whole world. It was founded by Tarquinius Priscus B.C. 615, completed by Tarquinius Superbus B.C. 533, and dedicated to Jupiter by the consul Horatius B.C. 507. It was destroyed by lightning July 6, B.C. 183, by fire B.C. 83, rebuilt by Sylla, again destroyed by fire Dec. 19, A.D. 69, and rebuilt by Domitian the same year; again burned 80, and restored 82. During the sack of Rome by Genseric, in June, 455, the Capitol was stripped of its gold ornaments and roof, and abandoned to decay. Petrarch was crowned here April 8, 1341.

CAPITOLINE GAMES, instituted B.C. 387, to commemorate the preservation of the Capitol from the Gauls, were revived by the Emperor Domitian, A.D. 86.

CAPITULARIES, a term derived from *capitula*, "little chapters," is applied to all laws passed by the Frankish kings. Guizot enumerates 60 of the first race, and 152 of the second. Of these, no less than 65 were passed during the reign of Charlemagne (768—814). The Capitularies of Charlemagne and of Louis I. were collected by Angesius in 827, and another collection was made by royal authority in 847. Hallam considers the last Capitularies to be those of Carloman in 882, though two have been attributed to Charles III. (the Simple), who died Oct. 7, 929. They have been published at

Paris, the best editions being by Baluze, in 1677 and 1780.

CAPPADOCIA (Asia Minor).—The early history of this ancient state is involved in obscurity. Pharnaces, who held it as a fief of the Persian empire, is said to have founded the kingdom B.C. 744.

B.C.
521. Assassination of the Magi Smerdis by seven nobles, one of whom, Anaphas, is descended from Pharnaces.
342. Perdiccas, Regent of Macedon, subdues Cappadocia, puts to death King Ariarathes I., and invests Eumenes with the government.
290. Mithridates III., King of Pontus, seizes Cappadocia and Paphlagonia.
288. Cappadocia becomes subordinate to the Seleucidæ.
260. Seleucus Nicator is slain, and Cappadocia regains its independence.
192. Ariarathes IV. marries Antiochis, daughter of Antiochus the Great.
158. Ariarathes V., dethroned by Holophernes, is restored by the Romans.
130. Ariarathes V. is slain with Crassus, in battle against Aristonicus of Mysia. Five of his sons are poisoned by their mother Laodice, but the youngest escapes, and succeeds to the crown.
96. Ariarathes VI. is put to death by his brother-in-law Mithridates VI., King of Pontus. He is the last king of the original dynasty.
93. The Romans appoint Ariobarzanes I., King of Cappadocia, but he is immediately expelled by Mithridates VI.
92. Sylla restores Ariobarzanes I.
88. Ariobarzanes I. is again expelled.
84. Ariobarzanes I. is again restored.
66. Mithridates VI. again seizes Cappadocia, which he is compelled to evacuate by Pompey.
42. Ariobarzanes II. assists Pompey against Cæsar, and is slain by Cassius.
36. Mark Antony deposes and puts to death Ariarathes VII., and appoints Archelaus king in his stead.
20. Augustus confers new territories on Archelaus.

A.D.
15. Tiberius invites Archelaus to Rome, and detains him prisoner.
17. Death of Archelaus at Rome. Cappadocia is made a Roman province.
370. A famine prevails in Cappadocia.
515. It is invaded by the Huns.
717. It is conquered by the Saracens.
856. It is reunited to the empire by Basil I.
1074. It is conquered by the Seljukian Turks, under Soliman.
1360. It is added to the Ottoman empire.

KINGS OF CAPPADOCIA.

B.C.
Datames.
Ariamnes I.
Ariarathes I. (died B.C. 322.)
315. Ariarathes II.
Ariamnes II.
Ariarathes III.
220. Ariarathes IV.
B.C.
162. Ariarathes V. Philopator.
130. Ariarathes VI.
93. Ariobarzanes I.
63. Ariobarzanes II.
42. Ariarathes VII.
36. Archelaus.

CAPPEL, or KAPPEL (Battle), between the Roman Catholics in Switzerland, and the Zurichers, was fought at this village in Zurich, Oct. 12, 1531. The latter were defeated, and their leader, Ulric Zwingli, was slain.

CAPPIANO (Battle).—Castruccio of Lucca defeated and captured Raymond of Cordova, the Florentine general, at this place, Monday, Sep. 23, 1325.

CAPRI (Mediterranean), the ancient Capreæ, the "island of the wild goats," between the bays of Naples and Paestum, is celebrated in ancient history as the retreat chosen, A.D. 27, by Tiberius, who spent the last 10 years of his life here, dying March 15, 37. He built 12 villas in different parts of the island. It has two towns, one called Anacapri, 1,600 or 1,700 feet above the level of the sea. The inhabitants communicate with those of the other town, called Capri, by a flight of 538 steps. Christianity was planted in Capri in the earliest times, and it was made a bishopric in 987. The island was wrested from Napoleon by Sir Sydney Smith, May 12, 1806. Sir Hudson Lowe and the garrison capitulated to Murat, Oct. 16, 1808.

CAPRERA (Mediterranean). — This island, situated to the north-east of the island of Sardinia, was the haunt of a bandit from Porto Vecchio, who erected the first house here about 1750. Garibaldi settled at this place in 1854.

CAPS AND HATS.—On the assembling of the Swedish diet, May 30, 1738, the house divided into two hostile parties, the *Hats*, who opposed, and the *Caps* or *Nightcaps*, who favoured the alliance with Russia. Owing to the ascendancy of the former faction, war was declared in Aug., 1741, and continued till the peace of Abo, Aug. 17, 1743. Both parties were suppressed by Gustavus III. in 1772.

CAPSTERN, or CAPSTAN.—This apparatus for working the anchors of ships was invented by Sir Samuel Morland, who died Dec. 30, 1695.

CAPUA (Naples).—The ancient Volturnum, was taken from the Etruscans by the Samnites, B.C. 423. Hannibal made it his winter quarters after the battle of Cannæ. The Romans, who regained the city after a siege of two years' duration, B.C. 211, wreaked their vengeance on the inhabitants, all the senators and nobles being put to death, and the other citizens banished beyond the Tiber. By the *Lex Julia Agraria*, passed B.C. 59, Capua was made a Roman colony, and regained a portion of its ancient splendour. Genseric, King of the Vandals, took it A.D. 456, and reduced it to a very low condition; but it was not destroyed till 840, when it was captured and burned by the Saracens. The modern town was built in the 9th century, at about two miles distance from the original site, and was fortified in 1231. Capua was made a bishopric about 46, and was erected into an archbishopric in 968. Councils were held here in Dec., 391, March 21, 1087, and in 1118. It was for many years a republic, under the nominal sovereignty of the Eastern empire, and afterwards formed part of the kingdom of Sicily. Cæsar Borgia captured it, and put 5,000 of the inhabitants to the sword, July 24, 1501. Capua was occupied by a French force Jan. 23, 1799, and July 28 it surrendered to the British. The French took possession of it in 1806. It capitulated to the Sardinian forces Nov. 2, 1860.

CAPUCHINS.—These friars, of a reformed order of St. Francis, were established by Matthew de Baschi in 1525. In 1528 they obtained a bull from Clement VII., and the order was fully established in 1529. This branch of the Franciscans derived their name from the cowl (*caputium*), but were at first called Friars Hermits Minor. Paul III. confirmed the order in 1536, and gave them the name of Capuchins of the order of Friars Minor. The right of preaching, taken from them in 1543, was restored in 1545. They

were introduced into France in 1573, and into Spain in 1606, but had no houses in England. On the establishment of peace between England and France, April 14, 1629, Louis XIII. arranged that 10 Capuchins of Paris should go and serve Henrietta Maria, Queen of Great Britain, in the capacity of confessors. Accordingly 12 friars, of whom Father Leonard, of Paris, was the chief, left Calais Feb. 24, 1630. The queen laid the foundation-stone of a Roman Catholic chapel, to be presided over by the Capuchins, Sep. 24, 1636, and mass was publicly celebrated in presence of the queen and court Dec. 10. On the departure of the queen to Holland, in 1642, the Parliament imprisoned the Capuchins and closed the chapel.

CARABINE, or CARBINE.—This fire-arm, a small musket, was used by light cavalry as early as the 16th century. A corps of carabiniers was raised in France in 1560.

CARABOBO (Battle).—This strong position in Venezuela, held by 4,000 Spaniards, was assailed by Bolivar's army, containing a force of English auxiliaries, June 24, 1821. The armies were nearly equal in numbers, and the latter gained a complete victory.

CARABUSO (Mediterranean).—This pirate stronghold was attacked and destroyed by the English fleet Jan. 31, 1828.

CARACAS (South America).—This part of the country was discovered by Columbus during his third voyage, in 1498. The colony was afterwards sold by Charles V. to the Welsers, a company of German merchants, who ruled so tyrannically that they were dispossessed in 1550, when a governor was appointed. In 1810 the colony declared its independence, and took the name of Venezuela (*q. v.*), which was formally acknowledged by the Spanish Cortes, July 5, 1811. Santiago de Leon de Caracas, the chief city, built by Diego Loseda in 1567, possesses a university, founded in 1778, and is the seat of an archbishopric, established in 1803. A disastrous earthquake, which occurred March 26, 1812, laid the city in ruins, and destroyed numbers of the inhabitants, which so excited the superstition of the survivors, that they soon afterwards surrendered to the royalists. Independence was re-established by Bolivar, Aug. 26, 1813; and New Grenada and Venezuela were united into a single state, under the name of Columbia (*q.v.*), Dec. 17, 1819. They separated again in 1831, and Caracas is now the capital of Venezuela. (*See* ARAGUA.)

CARAÏTES, KARAÏTES, or READERS, a Jewish sect that adhere closely to the text of the Scriptures, and are distinguished from the Rabbins by their rejection of traditions. They pretend to be descendants of the 10 tribes led captive by Shalmaneser, B.C. 721; while others trace their descent from Ezra, B.C. 458, though it is generally believed that they did not make their appearance till the 8th century. The Caraïtes exist in Turkey, Poland, Syria, and some parts of the East.

CARALIS.—*See* CAGLIARI.)

CARAVAGGIO (Lombardy) was taken by the Venetians in 1431. In 1448 Francis Sforza laid siege to it, and, after a hotly-contested battle, effected its capture Sep. 15. The Venetians regained possession in 1499. After the battle of Agnadel, May 14, 1509, Caravaggio and other places surrendered to the French. Michael Angelo Amerighi, or Merighi da, an Italian painter, who was born here in 1569, bears the name Caravaggio.

CARAVAN.—In countries in which neither facility nor security is afforded to the traveller, a number of merchants or pilgrims form themselves into a company for mutual protection. This is more particularly the case in the East. Joseph was sold by his brethren, about B.C. 1728, to some merchants belonging to a caravan. It consisted of a company of Ishmaelites, coming from Gilead, "with their camels bearing spicery and balm and myrrh, going to carry it down to Egypt." (Gen. xxxvii. 25.)

CARBERRY HILL (Battle). — Lord Hume encountered Bothwell's army at this place, about six miles from Edinburgh, June 15, 1567. Bothwell took to flight without striking a blow, and Mary Queen of Scots was taken prisoner.

CARBONARI, or "CHARCOAL-BURNERS."—The name given to a secret political association, formed in Italy at the commencement of the present century, its professed aim being the reorganization and reform of the government of Italy. Members of all classes are found in its ranks. In 1814 they formed a plan, subsequently abandoned, of creating a revolution in Naples. The scheme was not relinquished, but deferred, and June 2, 1820, a constitution was proclaimed at Nola. The same thing occurred at Naples and other places. Ferdinand I., King of the Two Sicilies, made concessions; the forces of the Carbonari, under Gen. Pepe, entered Naples July 9, and the king swore to observe the new constitution July 13. The emperors of Austria and Russia, and the Prince of Prussia, met at Troppau, in Oct., and by letters dated Nov. 20, invited Ferdinand I. to meet them at Laybach, to which town the congress was transferred in Jan., 1821, where measures were determined for an armed interference for the suppression of the revolution. The Austrians entered early in 1821. Naples capitulated March 20, and the revolutionary parliament was closed March 24. By an ordinance dated April 10, any person attending the meetings of the Carbonari was to be punished capitally. The society continued to exist, and, spreading through France, caused insurrections at Rochelle, Colmar, Toulon, and Marseilles, in 1821; and its influences are supposed to have contributed to the revolution of 1848 in France and Germany. The numerous outbreaks that have occurred in the Italian peninsula since 1821 may all be traced, directly or indirectly, to the machinations of the Carbonari. The Calderaii, tinkers or braziers who use the coals, is the name given to a loyal society that opposed the Carbonari.

CARBUNCLE. — This gem, a variety of the garnet, was, according to Eastern legends, employed by Noah to illuminate the ark during the deluge. It ranked third on the breastplate of the Jewish high-priest, and was therefore known as early as B.C. 1491.

CARCANET, a kind of chain or necklace manufactured at Venice in the 15th century.

CARCANO (Battle).—The Emperor Frederick I. of Germany was defeated at this place by the republican forces of Milan and Brescia, Aug. 9, 1160.

CARCASS.—This missive of war is said to have been first employed by the Bishop of Münster against Groll, in 1672.

CARCASSONNE (France), the ancient Carcaso, made a bishopric in the 6th century, was captured and pillaged Aug. 15, 1209, during the Albigensian crusade, and the inhabitants were expelled. The Inquisition was established here in 1230.

CARCHEMISH (Battle).—Nebuchadnezzar, son, and afterwards successor, of Nabopolassar, King of Babylonia, defeated the army of Pharaoh Necho at this city on the Euphrates, B.C. 605.

CARDIFF (Wales).—The castle is supposed to have been commenced in 1080 and completed in 1110. Robert, eldest son of William I., taken prisoner Sep. 28, 1106, is said to have remained in the castle until his death, Feb. 10, 1135, though the story is discredited by some writers. Its first charter was granted by Edward III., in 1338. Cromwell obtained possession of the castle by treachery in May, 1648. The Glamorganshire Canal was finished in 1798, and the Taff Railway in 1840.

CARDIGAN (Wales).—The name is said to be derived from "Caredigion," signifying the territory of Caredig, the first king. Its king is said to have become King of all Wales in 834, but little is known of its early history. It was assailed by Saxons, Danes, and Normans, and was, with the whole of Wales, annexed to England in 1283. Cardiganshire has returned one member to Parliament since 1536. The castle of Cardigan, the chief town, was founded in 1160, and strengthened in 1240. A French expedition, 1,200 strong, landed in Cardigan Bay Feb. 22, 1797. They surrendered without offering any resistance, Feb. 24, while two frigates that had accompanied the expedition were captured on the way back to France. (*See* FISHGUARD.)

CARDINAL.—This title, in early times, was applied to any bishop, priest, or deacon in office. It probably commenced with the cardinal priest or presbyter, and, though modest in its origin, has, as Gibbon remarks, "aspired to emulate the purple of kings." There were several cardinal presbyters in the same church, and they are not noticed before the time of Gregory I. (the Great), (590—604). The word cardinal was long of dubious import. Stephen IV. (768—772) is said to have elected seven bishops, to whom he gave the title of cardinal. Nicolas II., at a council at Rome, April 13, 1059, ordered that cardinals should elect the Pope, though he did not exclude the clergy, &c., from a share in the election. The cardinals, however, struggled to obtain the sole power, and, after various altercations, Alexander III., at the third council of Lateran (the 11th general council), March 5–19, 1179, transferred the election of a pope to the college of cardinals. (*See* CONCLAVE.) From this time the cardinals have gradually attained the supremacy they now exercise as princes of the Church. The number of cardinals having before varied considerably at different periods, was fixed by the bull of Sixtus V., in Dec., 1586, at 70; 6 being bishops, 50 priests, and 14 deacons. Louis XIII. gave them precedence in France over bishops and abbots in 1614. The red hat was first assumed at the 13th general council, held at Lyons, May 7—July 17, 1245, by permission of Innocent IV. Boniface VIII. (1294—1303) allowed them to wear the purple cloak, and Paul III. (1534—1549) allowed them to wear the red cap. Their style was altered from "Most Illustrious" to "Eminence" by Urban VIII., Jan. 10, 1631. The body of cardinals is called the Sacred College. Moreri's Dictionary contains a list of cardinals from 1119 to 1724.

CARDINALISTS AND ROYALISTS.—These parties arose in France in 1642. The former sided with Richelieu, who advocated the prosecution of the war against Spain, and the latter with King Louis XIII., who desired to bring it to a termination.

CARDIS, or KARDIS (Treaty), by which peace was concluded between Russia and Sweden July 1, 1661. A truce for three years had been signed in 1658, and the treaty of Cardis was a renewal of the treaty of Stolbova, Jan. 26, 1617.

CARDS.—(*See* PLAYING CARDS.)

CARELIA (Russia).—This province, conquered by the Swedes in 1580, and restored to Russia in 1595 by the treaty of Teusin (*q. v.*), was ceded to Sweden in 1609 by the treaty of Wibourg (*q. v.*), which was confirmed Jan. 26, 1617, by the treaty of Stolbova (*q. v.*). It was finally restored to Russia Aug. 30, 1721, by the peace of Nystadt (*q. v.*).

CARIA (Asia Minor).—The Carians claimed to be the original inhabitants of the country. This view is, however, disputed. They are supposed to have been subject to Minos, King of Crete. The Dorians and the Ionians formed colonies on their territory. The Carians contributed 70 ships to the great armada of Xerxes, B.C. 480. The country was ruled over by the Lydians, the Persians, the Greeks, and the Romans, who divided it, giving part to the King of Pergamus and the remainder to the Rhodians, B.C. 190. The Romans added Caria to their province of Asia, B.C. 129. Caria was the sixth ecclesiastical province of Asia Minor. St. John the Evangelist is said to have converted its inhabitants to Christianity. It now forms part of the Ottoman empire.

CARIBBEE ISLANDS (Atlantic).—The Windward and Leeward Islands, called also the Lesser Antilles, are known by this name. It is derived from the Caribs, Caribbees, or Charaibes, an aboriginal tribe of America, distinguished from the other tribes by their athletic stature and superior courage. (*See* WEST INDIES.)

CARICAL (Hindostan).—This strong fortress, held by the French, was invested April 2, 1760, and surrendered April 5. By the 14th article of the treaty of Versailles (Sep. 3, 1783), Carical was delivered up and guaranteed to France, in the possession of which country it still remains.

CARICATURE was practised by the Egyptians, whose sculptured monuments present many examples of this grotesque species of

art. It was also used by the Greeks and Romans, who frequently adorned their pottery and the walls of their houses with caricatures and parodies of mythological and heroic incidents, and after the fall of the Western empire it was revived by the builders and sculptors in their designs for the details of Gothic architecture. Caricature is also exemplified in many of the Anglo-Saxon MSS. and in the monkish illuminations of the Middle Ages; and it generally entered largely into the representations of the popular subject of the Dance of Death (*q. v.*), which was first painted in 1312. The "Ship of Fools" of Sebastian Brandt, published in 1494, contained vigorous caricatures of contemporary follies. Political caricature dates from about 1499, when an engraving entitled "the Political Game at Cards" was published in France. In 1506 Thomas Murner produced the "Conspiracy of Fools," a satire levelled against the proposed reformations of Martin Luther, which showed considerable advance in artistic ability upon the work of Brandt, of which it was an imitation. In retaliation for this and similar productions, the Protestants strengthened their attacks upon the papal system by a free use of caricatures, a curious collection of which, dated 1545, is preserved in the British Museum. Jacques Callot, a French artist, who died March 28, 1635, did much to raise the art of caricature, which became fashionable in England about the year 1640, when it was employed by the Puritans to ridicule their opponents. After the Restoration in 1660, it was chiefly used by the Cavaliers, who embellished their playing cards with satirical portraits of the parliamentary leaders. Romain de Hooghe, a Dutch artist who published a series of engravings in 1672, proved a formidable opponent to Louis XIV. by the vigour of his pictorial satire, which made Holland for many years celebrated for caricature. In 1710 the art returned to England during the agitation in reference to Dr. Sacheverell, when it was extensively used by both parties, and in 1720 it was employed to ridicule the notorious Mississippi scheme. William Hogarth, who commenced his career as a caricaturist in 1728 by the publication of some burlesque illustrations of the Beggar's Opera, became in 1754 a frequent subject of the satirical pencil of Paul Sandby and other artists, by the announcement of his much ridiculed theory of the line of beauty. Bunbury (1750—1811), Rowlandson (1756—1827), Gillray (1757—June 1, 1815), and Leech (1817—Oct. 29, 1864), are the most celebrated of recent English caricaturists.

CARIGNAN, or CARIGNANO (Italy).—This town was besieged by the French early in the spring of 1544, and surrendered after the victory over the Imperialists, gained near Cerisoles, April 14.

CARINTHIA (Austria). — This province, having belonged successively to the Romans, the Heruli, the Ostrogoths, and to Charlemagne, was erected into a duchy by Arnulph I. in 880, and annexed by him in 888 to Bavaria, from which it was again separated in 977. It subsequently passed in 1058 to the house of Zæringen, in 1073 to the house of Murzthal, in 1127 to that of Ortenburg, and in 1268 to Premislaus Ottocar II., King of Bohemia. The family of Gœrz obtained possession in 1282, and the counts of the Tyrol in 1286; and in 1337 it was finally annexed to Austria.

CARISBROOK CASTLE (Isle of Wight).—A castle was built at Carisbrook, formerly the capital of the island, according to Dr. Stukeley, by Carausius, about B.C. 290. This was rebuilt by Richard de Rivers, Earl of Devon, in the reign of Henry I., and Elizabeth repaired it in 1598. The French, who had taken possession of the island, besieged it in vain in 1377. Charles I., was imprisoned here Nov. 14, 1647. He endeavoured to escape, Dec. 28, but was prevented, and remained in the castle till Nov. 30, 1648, when he was removed to Hurst Castle (*q. v.*). Elizabeth, his daughter, died here of a broken heart, Sep. 8, 1650, in her 15th year. A tablet to her memory has been erected in Newport church by Queen Victoria.

CARISMIANS, or KHARIZMIANS. — This tribe, dwelling from time immemorial on the borders of the Caspian Sea, was noticed by Herodotus (B.C. 484—408), and under Sultan Gelaleddin gained great renown early in the 13th century. Expelled from their native haunts by the Mongols in 1229, they crossed the Euphrates to the number of 10,000 horsemen in 1244, and at the call of the Sultan of Cairo pillaged Syria, massacred 7,000 Christian men and women at the pass of Ramah in Palestine, and seized and profaned Jerusalem. Having defeated the Christians at Carita (*q. v.*), Oct. 18 and 19, they vainly laid siege to Jaffa in Nov., seized Damascus after a six months' blockade, and having deserted the Sultan of Cairo and formed an alliance with his Syrian enemies, were defeated in two great battles in 1247, and expelled from the Holy Land.

CARITA, or KARITA (Battle).—The Christians, under Walter de Brienne and the Emir Bibars, attacked the Carismians (*q. v.*) at this place near Gaza, Oct. 18, 1244. The result of the first day's battle was in favour of the Christians. The conflict was renewed on the following day, Oct. 19, when the Carismians, having received reinforcements, gained a complete victory. Upwards of 30,000 Christians were slain, and Walter de Brienne and the chiefs of the Hospitallers and Templars, with the Archbishop of Tyre, were made prisoners. The Mohammedan historian, Ibn-ghiousi, says of this fight:—"Never was there so glorious a day for Islam, not even under Noureddin and Saladin."

CARLAVEROCK, or CAERLAVEROCK (Scotland).—This castle, on the Nith, was captured by Edward I., between July 6–12, 1300. The siege forms the subject of a contemporary poem, of which Sir N. H. Nicolas published a translation in 1828.

CARLEON.—(*See* CAERLEON.)

CARLISLE (Bishopric) was established April 11, 1132, and the first bishop was consecrated in Aug., 1133. The church, restored about 1092, and dedicated by Henry I. in 1101, was much damaged by fire in 1292. Cromwell destroyed the nave of the cathedral in 1648. The wooden tower was removed in 1661, and the restoration

of the cathedral commenced in 1853. It was reopened in 1856.

CARLISLE (Cumberland) was destroyed by the Danes about 900 A.D. William II. restored it in 1093, and founded its castle. Carlisle suffered greatly during the border wars, was destroyed by fire in 1292, and resisted a siege by Robert Bruce in 1315. A parliament was held here July 1, 1300. Richard III. extended the castle, and Henry VIII. ordered the citadel to be built. Mary Queen of Scots was imprisoned here after the battle of Langside (*q. v.*). Carlisle remained faithful to the cause of Charles I., was repeatedly assailed by the republican forces, and captured, after a long siege, July 2, 1645. It was retaken by the Royalists, from whom it was wrested by Cromwell in 1648. The Pretender's forces obtained possession Nov. 15, 1745, the garrison having capitulated the day before. It was retaken by the Duke of Cumberland Dec. 30, 1745. The foundation stone of a new church was laid by Miss Burdett Coutts, March 2, 1864.

CARLISLE ADMINISTRATION.—The Earl of Carlisle was appointed First Lord of the Treasury, May 23, 1715, to supply the vacancy caused by the death of the Earl of Halifax. The other members of the Halifax administration continued in office. The Duke of Montrose gave up the seals of office Aug. 5; the Earl of Sunderland was made Lord Privy Seal Aug. 20; and the Dukes of Argyle and Roxburgh were appointed members of the cabinet council Aug. 31, 1715. It was dissolved in Oct., 1715. (*See* WALPOLE ADMINISTRATIONS.)

CARLISLE PROVINCE.—(*See* ANTIGUA.)

CARLISTS.—The supporters of Charles X. of France, after the Revolution of 1830, were called Carlists. On the death of Ferdinand VII. of Spain, Sep. 29, 1833, two parties contended for the succession, his brother Don Carlos, and his daughter Isabella II. (born Oct. 10, 1830), in anticipation of whose birth the Salic Law, which prohibited the succession of females, had been abolished, by a Pragmatic Sanction published March 29, 1830. The supporters of the former were termed Carlists, and of the latter Christinos. The Carlist war lasted from 1833 to 1840.

CARLOVINGIANS.—(*See* CAROLINGIANS.)

CARLOW (Ireland).—The castle was founded by the English in 1180. Carlow was made a borough in 1208, and fortified in 1362. It was captured by Gen. Ireton in 1650. The rebels were defeated near this town with great slaughter, May 24, 1798. The railroad from Dublin was opened Aug. 10, 1846.

CARLOWITZ (Treaty), concluded at this town in Austria, Jan. 26, 1699, between Turkey and Germany, Poland, Russia, and Venice. The Turks, for the first time, sought to enter into diplomatic relations with the European powers, and ambassadors from Austria, Poland, and Russia assembled at Constantinople to ratify this treaty.

CARLSBAD (Bohemia).—This town has been celebrated for its mineral springs from a very early period. The first spring, the Sprundel, was, according to tradition, discovered by Charles IV. in 1370, during a hunting excursion. A congress of German powers was held at Carlsbad, Aug. 1, 1819, for the purpose of considering what measures were necessary to prevent the spread of revolutionary principles in Germany. It endeavoured to suppress secret societies and to establish the censorship of the press. This town is also called Kaiser Carlsbad.

CARLSCRONA (Sweden), built by Charles XI. in 1680, suffered severely from a fire in 1790.

CARLSRUHE (Germany), the capital of the grand duchy of Baden (*q. v.*), was founded by the Margrave Charles William, who made it his hunting-seat in 1715. A new palace was commenced in 1751. A revolution occurred at Carlsruhe May 14, 1849. The town was occupied by the troops of the confederacy, June 23, when the insurrection was suppressed.

CARLSTADT (Croatia). — A fortress was erected at this spot in 1579 to resist the inroads of the Turks, and the town was founded by the Archduke Charles, from whom it receives its name. In 1809 it fell into the power of the French, who retained possession till 1814.

CARLSTAD (Sweden).—This town, founded in 1584 by Charles, Duke of Sudermania, afterwards Charles IX. of Sweden, suffered severely from fires in 1616, 1660, 1719, and 1752. The cathedral was erected in 1730.

CARLTON CLUB (London), founded by the Duke of Wellington, held its first meeting in Charles Street, St. James's, in 1831. In 1832 it removed to larger premises in Carlton Gardens, and in 1836 a club-house was erected in Pall Mall, which was enlarged in 1846, and taken down in 1854. The present house was opened early in 1855.

CARMAGNOLA, or CARMAGNOLE (Italy). —This town of Piedmont was taken by Catinat in 1691. It was also captured in 1796.

CARMAGNOLE.—This song and dance, said by some authorities to have been introduced into France by Savoyards from Carmagnola or Carmagnole, and by others to have commemorated a victory of Francis Carmagnole (1390—1432), were popular among the people of Paris during the first French Revolution. The name was also given to the costume adopted by the Jacobins in 1793, "consisting," says Dyer (Modern Europe, iv. 132), "of enormous black pantaloons, a short jacket, a three-coloured waistcoat, and a Jacobite wig of short black hair, a terrible moustache, the *bonnet rouge*, and an enormous sabre."

CARMARTHEN.—(*See* CAERMARTHEN.)

CARMATHIANS.—A branch of the Shiites, founded by an Arabian preacher, who assumed the name of Carmath. He first appeared in Cufa about 890. Gibbon says (ch. lii.) that he "assumed the lofty and incomprehensible style of the Guide, the Director, the Demonstration, the Word, the Holy Ghost, the Camel, the Herald of the Messiah, who had conversed with him in a human shape, and the representative of Mohammed the son of Ali, of St. John the Baptist, and of the angel Gabriel." The Carmathians, after a sanguinary struggle, obtained the supremacy in the province of Bahrein, in 900. They conquered Syria and Mesopotamia in 902, pillaged Mecca in 929, and carried away the Caaba. The Carmathians soon after separated into factions, and their power declined. (*See* ASSASSINS.)

CARMEL.—*See* MOUNT CARMEL.)

CARMELITES.—This religious order of St. Mary of Mount Carmel was founded in the 12th century. The Carmelites themselves claim an unbroken succession from Elijah, and speak of the Virgin Mary as a Carmelite nun. About 1205, Albert, Patriarch of Jerusalem, prescribed a rule for them, which was confirmed by Honorius III. in 1226. They were driven from Syria by the Saracens in the 13th century, and became mendicant friars in 1247. They came to England in 1240, and had 40 houses in this country. Gregory XIII. divided them into two branches in 1580, according to a reform projected by St. Theresa in 1540, the more rigid being called Barefooted Carmelites, because they went barefooted. During the latter half of the 17th century the antiquity of the order was disputed by the Jesuits; and the quarrel became so violent that Innocent XII. put an end to it, Nov. 20, 1698. The Carmelite nuns, or Carmelitesses, were instituted in 1452. The first stone of a Carmelite church was laid at Kensington by Dr. Manning, July 17, 1865.

CARMINE, discovered by a Franciscan monk at Pisa, was first made in 1656.

CARNARVON.—(*See* CAERNARVON.)

CARNATIC (Hindostan).—This province was conquered by the Mohammedans in 1310. Nizam ul 'Mulk wrested it from the Mongol empire in 1717. Anwar ud Deen was made Nabob of the Carnatic by Nizam ul Mulk, and his son, Mohammed Ali, was put in possession of part of his father's territories by the British in 1754, after a hard struggle with opposing claimants, who were aided by the French. After various reverses, it was again surrendered to Mohammed Ali in 1763, and in 1783 it was wrested from Hyder and Tippoo Saib by the British, who obtained the whole province by treaty July 31, 1801. The last nabob died without issue in 1855, and with him was extinguished one of the Hindoo Mohammedan dynasties.

CARNI.—This ancient Alpine tribe, inhabiting part of the modern province of Carniola (*q. v.*), was subdued by M. Æmilius Scaurus, B.C. 115.

CARNIOLA, or KRAIN (Austria).—This province, which takes its name from its ancient inhabitants, the Carni (*q. v.*), was wrested from the Slavonic Wends by Charlemagne (800—814), who bestowed it upon the dukes of Friuli. In 972 it was erected into a margraviate, and on the extinction of the male line of margraves in the 13th century, part of it passed into the possession of the dukes of Austria, who acquired the whole in 1336. Ceded to France in 1809, it was restored to Austria in 1814.

CARNIVAL, or "FAREWELL TO FLESH," a festive season observed in Roman Catholic countries. It formerly commenced on the day of the Epiphany (Twelfth-day), and terminated on Ash-Wednesday, but is now confined to a few days before Ash-Wednesday. It is an imitation of some portion of the pagan festival of the Saturnalia, and has existed from a remote period.

CARNUTES.—This Celtic people of Gaul having rebelled against Cæsar, B.C. 54, and put to death Tasgetius, whom he had appointed their governor, were speedily reduced to subjection. Another insurrection, begun B.C. 52, by Gutruatus, whom Cæsar subsequently flogged to death, extended to all the Gallic tribes, and cost the Romans much trouble before it was suppressed.

CAROLINA (United States) is supposed to have been discovered by John Ponce de Leon in 1512, though some writers say that its coasts were explored by Sebastian Cabot in 1498. In 1564 the French built a fort here; but they were expelled by the Spaniards. The colony of Roanoake was planted in this part of America under Raleigh's patent in 1584. The experiment having failed, another attempt was made in 1587, with no better results. In 1630 Sir Robert Heath, attorney-general of Charles I., obtained from that monarch a grant of the district of Carolana, which, though distinct from Carolina, included most of that province in its limits. The first settlements were made in 1660, by emigrants who fled from Virginia to escape religious persecution: and from them the colony received the name of Albemarle. By a charter of March 24, 1663, Charles II. conferred it upon Lord Clarendon and others, from whom it received the name "Carolina," about 1675. Charleston (*q. v.*) was founded in 1672. The original constitution of the colony, which had been prepared by John Locke, was abandoned in 1693. The culture of rice was introduced in 1695. The Church of England was established by law in 1704. In 1719 the colonists threw off the proprietary government, and in May, 1729, the English Parliament purchased the province of the lords proprietors for the sum of £17,500. In virtue of this arrangement, George II. immediately divided it into the two governments of North and South Carolina (*q. v.*).

CAROLINE BOOKS.—These four books were written by order of Charlemagne against images, to refute the decree on this subject of the Council of Nicæa, in 787. They were read before the council at Frankfort-on-the-Maine in 794, by order of Charlemagne. Roger Hoveden attributes the authorship to Alcuin (725—April 18, 804). They were first published at Paris in 1549.

CAROLINGIANS, erroneously styled Carlovingians, ruled over France (*q. v.*) from 715 to 987.

CAROOR (Hindostan).—This fortress was taken by Col. Lang April 2, 1783; and by Gen. Meadows in June, 1790.

CARP is mentioned as a scarce fish in this country by Dame Juliana Barnes, Bernes, or Berners, in her "Treatise on Hawking, Hunting, and Fishing with an Angle;" published by Wynkyn de Worde in 1496.

CARPENTARIA (Australasia).—This gulf, discovered about 1627, was named by Tasman in 1642, in honour of Carpenter, a governor of the Dutch Indies, who had returned to the Netherlands in 1628. The story of its having been discovered by Pierre Carpenter in 1627 or 1662 is incorrect.

CARPET was in use from the earliest times, and is frequently mentioned in the Bible. Plato (B.C. 428—347) draws the distinction between the coverings placed round the couch

and under it, whilst Plautus (B.C. 254—184) speaks of "purple-cushioned couches." Athenæus (*fl.* A.D. 200) states that the art of weaving embroidered cloths was in great perfection about this time. Carpets were found in the ruins of Pompeii. Carpets were introduced into Spain from the East, and from Spain they passed into France and England. When Eleanor of Castile, wife of Prince Edward, afterwards king, arrived in London, 1255, the rooms of her abode were covered with carpet. They were used generally in the palace during the reign of Edward III. This is spoken of as a Spanish custom, and one that excited much ridicule among the English people. Bedroom carpets occur in 1301. Turkey carpets were advertised for sale in London in 1660. The manufacture of carpets was introduced into France by Colbert in 1664. A manufactory was opened in England during the reign of Henry VIII.; but this branch of industry was not permanently established until 1685, by artisans driven from France by the revocation of the edict of Nantes (*q.v.*). Brussels carpets were introduced into Kidderminster from Tournay in 1745.

CARPI (Battle).—Prince Eugène, at the head of the imperialists, defeated Marshal Catinat and the French army at this place, in Italy, in Aug., 1701.

CARPOCRATIANS.—The followers of Carpocrates, a native of Alexandria, who in the 2nd century revived several Gnostic errors. He rejected the Old Testament and the gospels of St. Matthew and St. Luke; denied the resurrection of the dead; and advocated the most licentious mode of life. Mosheim calls him "the worst of all the Gnostics."

CARRARA (Italy).—This city owes its celebrity to the adjacent quarries of white marble which supplied material for Roman builders in the reign of Augustus (B.C. 27—A.D. 14). The finer quality, discovered in the time of Pliny the Elder (A.D. 23—79), was adopted by sculptors in preference to that procured from Paros. On the overthrow of the Roman empire the quarries fell into neglect until the 12th century, when they were again worked by the citizens of Pisa. The collegiate church of Carrara, founded in the 13th century, was completed in the 15th.

CARRHÆ (Mesopotamia).—The modern Harran, is supposed to be the Haran whence Abraham departed, B.C. 1921 (Gen. xii. 4). Crassus was defeated here by the Parthians, B.C. 53, with the loss of the larger part of the Roman army. Caracalla was assassinated on a pilgrimage he had undertaken from Edessa to the celebrated temple of the Moon at Carrhæ, March 8, 217 A.D.

CARRIAGES of various kinds were used by ancient nations. The horse litter preceded the introduction of carriages into this country. The earliest carriages used by the ladies of England were called *whirlicotes*. Long waggons, for the conveyance of passengers and goods, went between London and some large towns in 1605. They were, however, even at this time but little used, the principal traffic of the country being carried on by means of pack-horses. The long waggons, or machines, were followed by the waggon-coach, which was superseded by stage-coaches (*q. v.*). The principal modern vehicles are noticed under their ordinary names. (*See* CHARIOT and ROYAL CARRIAGE DEPARTMENT.)

CARRICKFERGUS (Ireland). — John de Courcy planted a colony here in 1182, and built a castle; and the church is said to have been founded in 1164. The town was taken and burned by Niall O'Neill in 1384. In 1497 a monastery of Franciscans was founded. The English suffered a defeat here in 1503. The wall round the town, commenced in 1575, was completed in 1608. In 1597 the governor, with many others, was slain by some Scottish troops under Sir James MacDonnell. William III. landed here June 14, 1690. Commodore Thurot took the town Feb. 28, 1760; but was very soon compelled to evacuate it; and Paul Jones captured a British sloop of war in the bay April 24, 1778.

CARRICK'S FORD (Battle).—Capt. Bonham and Gen. Morris overtook and defeated the retreating Confederate forces of Gen. Garnett at this place on the Cheat River, Virginia, July 13, 1861. Gen. Garnett was killed, and many of his men were made prisoners.

CARROCIUM.—The invention of this vehicle is usually ascribed to Eribert, Archbishop of Milan, about 1040 A.D. It was drawn by oxen, had a lofty pole, surmounted with a golden banner, and decorated with a white banner. A crucifix was fixed in the middle of the pole. The carrocium, used at first in the civil wars of Milan, was adopted throughout Italy, and appeared in every army, guarded by a chosen band, to inspire courage in the combatants. The Milanese lost their carrocium at the battle of Cortenuova (*q. v.*).

CARRON (Stirlingshire).—The first furnace was blown at the iron works in this village Jan. 1, 1760.

CARRONADE, or SMASHER.—This piece of carriage ordnance, invented by Gen. R. Melville, takes its name from the Carron ironworks, where it was first cast in 1779. A trial of a 100-pounder carronade was made at the Leith battery, Oct. 6, 1781. The result was satisfactory. The carronade was first used in action by Lord Rodney, in his contest with De Grasse, April 12, 1782. Allen (Battles of the British Navy) remarks, under 1800, that "at the commencement of this century, carronades were in general use in all classes of ships."

CARROT was introduced into England from Flanders at the commencement of the 16th century.

CARROUSEL, or knightly exercise in imitation of the old tournaments, originated in Italy, and was introduced into France in 1605, during the reign of Henry IV. A carrousel was held at Paris in honour of Madlle. de la Vallière by Louis XIV. in 1662, and another at Versailles in 1664. The Place du Carrousel at Paris received its name from the first of these. An attempt was made to revive the carrousel at Berlin in 1750, and one was held at Saumur in honour of the Duchess de Berry in 1828. (*See* EGLINTON TOURNAMENT.)

CART.—A carriage on two wheels was used for agricultural purposes in very early times,

and appears to have been introduced into this island by the Romans. Carts of war, a peculiar kind of artillery, are described in an act of the parliament of Scotland in 1456; and by another act, in 1471, the chieftains are ordered to provide them for use against the English.

CARTAGENA, or CARTHAGENA (South America), the capital of a province of the same name, in New Granada, was founded by Pedro de Heredia, in 1532. An episcopal see, under the metropolitan of Santa Fé, was established here in 1537. The town was taken by Sir Francis Drake in 1586. The bucaneers seized it in 1697. Admiral Vernon attacked it March 9, 1741. After some temporary success, the siege was raised April 14. The town was again cannonaded without any decisive result April 16. A large portion of the town was destroyed by an earthquake, Nov. 9, 1761. During the revolutionary war in South America, Carthagena was captured by the royalists, after a siege of four months' duration, Dec. 6, 1815. It was retaken by the republicans Sep. 25, 1821.

CARTHAGE (Africa). — According to the legend followed by the poet Virgil in the Æneid, Carthage was founded by Dido, or Elissa, daughter of a king of Tyre. Her brother Pygmalion, at that time king, murdered her husband for the sake of his treasures, with which Dido, accompanied by several noble Tyrians, managed to escape. Having touched at Cyprus, from which island her followers carried off 80 maidens to be their wives in their new home, they landed on the coast of Africa, near Utica, a Phœnician city. From the natives they obtained for an annual tribute as much land as a bull's hide would encompass. Dido cut the bull's hide into small shreds, and thus obtained a large tract of territory. The new city, called Byrsa, was afterwards the citadel of Carthage. This event has been assigned to different periods, ranging from 140 to 65 years before the foundation of Rome. There can be little doubt that Carthage was a colony of Tyre. It may, as some authorities suppose, have been at first an emporium established by the merchants of Utica and of Tyre.

B.C.
878. Dido founds Carthage.
503. A commercial treaty is concluded with the Romans.
480. Gelon defeats the Carthaginians at Himera (*q. v.*).
410. The Carthaginians again invade Sicily.
406. They take Agrigentum (*q. v.*).
398. The Carthaginians are defeated in Sicily, and return to Carthage.
396. The Carthaginians, under the younger Hamilcar, return to Sicily, and, after many victories, lay siege to Syracuse (*q. v.*).
394. Dionysius defeats the Carthaginians in Sicily, and compels them to sue for peace.
373. Sicily is again invaded by the Carthaginians, who effect a landing in Italy.
348. A second commercial treaty is concluded with the Romans.
340. Discovery and suppression of Hanno's conspiracy to massacre the senate and establish a despotism.
339. Timoleon defeats the Carthaginians on the banks of the Crimisus (*q. v.*).
310. Agathocles, Tyrant of Sicily, defeated at Himera, invades Carthage.
308. Revolutionary conspiracy of Bomilcar.
306. A third commercial treaty is concluded with Rome.
264. The first Punic war.
260. The sea-fight off Tyndaris (*q. v.*).
255. Regulus is defeated and made prisoner in Africa, by the Carthaginian leader Xantippus, the Spartan.
B.C.
251. Metellus defeats Hasdrubal, and the Carthaginians send Regulus to Rome to sue for peace.
250. Regulus urges his countrymen to prosecute their conquest of Carthage and returns to his captors, by whom he is cruelly executed. Defeat of the Romans at Lilybæum (*q. v.*).
247. Hamilcar Barcas becomes the Carthaginian leader Birth of Hannibal.
241. Lutatius defeats the Carthaginians, who are compelled to sue for peace, which ends the first Punic war. The mercenary troops rebel, and are defeated by Hamilcar.
238. Hamilcar Barcas invades Spain, and subjects many of the native tribes to Carthage.
229. Hamilcar falls in battle against the Vetrones. His son-in-law Hasdrubal succeeds him.
221. Assassination of Hasdrubal, who is succeeded by Hannibal.
219. Hannibal is victorious in Spain.
218. Hannibal invades Italy, and begins the second Punic war. He defeats the Romans in two battles near the rivers Ticinus and Trebia (*q. v.*).
217. Battle of Thrasymene (*q. v.*)
216, Aug. 2. Battle of Cannæ (*q. v.*).
210. Publius Scipio takes Carthagena, or New Carthage.
207. Battle of the Metaurus (*q. v.*).
206. Scipio expels the Carthaginians from Spain.
204. Scipio besieges Utica.
203. Hannibal returns to Carthage.
202. Battle of Zama (*q. v.*) and end of the second Punic war.
174. Roman embassy at Carthage, to inquire into the conduct of Masinissa, King of Numidia.
149. The third Punic war.
146, July. Scipio Africanus destroys Carthage by order of the Roman senate.
123. Carthage is rebuilt, and established as a Roman colony.
46. Julius Cæsar plans the restoration of Carthage.
19. Augustus sends thither 3,000 colonists.
A.D.
123. It is visited by Hadrian.
200. It is erected into a bishopric.
439, Oct. 9. It is taken by the Vandal Genseric.
533. It is recaptured by Belisarius, by whom it is named Justiniana.
647. It is destroyed by the Arabs.
698. It is taken and destroyed by the Saracens under Hassan.
1270, July. Louis IX. of France lands at Carthage. (*See* CRUSADES.)
1841. A chapel in memory of Louis IX. is erected by Louis Philippe.

Councils were held at Carthage in the following years:—200, 217, 251, 252, 253, 254, 255, 256, 312, 330, 348 or 349, 386, 390, 397, 398, 401, 403, 404, 405, 407, 408, 409, 410, 411, 412, 416, 417, 418, 419, 425, 484, 525, and 535.

CARTHAGE (Battle).—Col. Sigel attacked the Confederates at this place in Missouri, July 5, 1861. The Federals lost 13 killed and 31 wounded.

CARTHAGENA (Spain), the ancient Carthago Nova, or New Carthage, was founded by Hasdrubal, the son-in-law of Hamilcar Barcas, B.C. 242. It was celebrated for the rich silver-mines in the neighbourhood. Hannibal made it his winter quarters B.C. 218. P. Scipio (Africanus) took it B.C. 210, and celebrated games in honour of his father and uncle B.C. 206. Christianity was introduced into this city during the 1st century. Among the signatures at the first Council of Tarragona, A.D. 516, is that of Hector, Bishop of Carthagena. The Vandals devastated the place in 428, and the Goths destroyed it in the 6th century; after which the see was removed to Bigastro. It was, however, restored, and in 1291 the bishop obtained permission to transfer it to Murcia. The modern Carthagena was taken by Sir John Leake, June 13, 1706 (O.S.), but was retaken by the Duke of Berwick, Nov. 18 (N.S.), in the same

year. The port was blockaded by an English fleet in 1758, and again in 1805. The French took possession of Carthagena in 1823.

CARTHUSIANS.—This order of monks, a branch of the Benedictines, was instituted by Bruno of Cologne, Canon of Rheims, in 1084. Their first monastery was at Chartreux, or La Chartreuse, near Grenoble, in France, and from this their establishments in England were called Chartreuse or Charter-houses. The customs and usages of the order were committed to writing by Guigo in 1110, and were confirmed by Alexander III., about 1174. They were frequently altered, and a complete code was compiled in 1581, and this was approved by Innocent XI. in 1688. All houses of the order were placed under the control of the prior of the Grand Chartreuse in 1508. The Carthusians came into England in 1180 or 1181, and their first house was at Witham, in Somersetshire. They had only nine houses in this country. The Charter-house in London was one of their monasteries. It is the only order which has never required reform. In 1775 they had, however, but five houses in the world, viz., at Prémol, near Grenoble, founded in 1234; at Melan, in Savoy, in 1288; at Salette, on the Rhone, in 1299; at Gosné, in the diocese of Arras, in 1308; and at Bruges, in 1344. The nuns of this order arose at Salette in 1229.

CARTOONS are large drawings made in chalk, &c., preparatory to the completion of any important work in oil or fresco. The most celebrated are those of Raphael, executed as designs for tapestry by order of Leo X., during the last two years of the painter's life (1519–20). They were originally 25 in number, but only seven remain; of which the subjects are, "Christ's Charge to St. Peter," "The Miraculous Draught of Fishes," "Elymas struck Blind," "The Healing of the Cripple at the Beautiful Gate," "The Death of Ananias," "The Sacrifice at Lystra," and "Paul preaching at Athens." On the recommendation of Rubens, Charles I. purchased them in Flanders in 1629. William III. built a gallery for them at Hampton Court, and they were removed to the South Kensington Museum in 1865. The cartoons for the new Houses of Parliament were exhibited in Westminster Hall, July 3, 1843.

CARVING.—(*See* IVORY and WOODCUTS.)

CARWAR (Hindostan).—The English established a factory here in 1663. It did not, however, prove prosperous. The fort of Carwar was taken by Carpenter in 1783.

CASA LANZI (Convention), concluded by the Austrian generals and the English minister at Naples, with the commander-in-chief of the Neapolitan army, May 20, 1815, for the surrender of that city, which was to be restored to Ferdinand IV., who returned June 17.

CASBIN, or CASWEEN (Persia), was founded by Shapoor Zoolactaf, A.D. 154. Until the accession of Shah Abbas, in 1582, it was the capital of the Suffide dynasty, and it is still a town of considerable size and commerce.

CASHEL (Bishopric) was founded at a very early period, but no certain record of the episcopal succession remains earlier than 901. The cathedral is said to have been built in the 11th century. In 1152 the see was made archiepiscopal by Pope Eugenius III.; and in 1172 the great synod of Cashel acknowledged the civil authority of the King of England and the ecclesiastical superiority of the Anglican Church. In 1492 the Earl of Kildare set fire to the cathedral, in consequence of a disagreement with the archbishop. The cathedral was unroofed in 1752, and is now a ruin. By s. 32 of the Church Temporalities Act, 3 & 4 Will. IV. c. 37 (Aug. 14, 1833), the see was reduced to a bishopric in connection with Waterford, Lismore, and Emly, and on the death of Archbishop Lawrence, in 1838, the proposed change was carried into effect.

CASHEL (Ireland), destroyed in 1179, was soon afterwards rebuilt, and erected into a borough in 1223. Charles I. erected the borough into a city in 1640, and the inhabitants espoused his cause until 1647, when the Royalist garrison was expelled with great slaughter.

CASHMERE (Asia).—This country, in the valley of the Himalaya, called the "paradise of the Indies," supposed to be the ancient Caspiria, in which the city of Caspatyrus, mentioned by Herodotus, was situated, according to Hindoo chronicles constituted a regular monarchy in the earliest period of the world, and was ruled by Hindoo and Tartar dynasties from B.C. 2666 to A.D. 1024. Its first Mohammedan king, "Sikunder," ascended the throne in 1341, and the province was annexed by Akbar in 1586. The Mongol emperors paid occasional visits to Cashmere, which was desolated by a famine in 1752. It was annexed to the Affghan empire in 1752. Runjeet Singh, who invaded it without success in 1813, conquered it in 1819, and the Sikhs ceded it to the East India Company by the fourth article of the treaty of Lahore, concluded March 9, 1846. It was transferred to the Maharajah Gholab Singh, who was made an independent prince as a reward for his fidelity, by a treaty concluded at Neuritzur, March 16, 1846. Cashmere is celebrated for its shawls, which are of beautiful texture, and have been sold in London at prices as high as from 400 to 500 guineas each. They are made from the hair of the Thibet goat. The capital of the country, also called Cashmere, or Sirinugger, *i.e.*, the "city of the sun," the ancient Caspatyrus, is said to have been founded by Pravarasena, who reigned from A.D. 128 to 176. It stands on the river Jhelum. Its temples, of which many remains exist, are said to have been destroyed by Sikunder about 1396. Abul Fazl says that some were in perfect preservation in 1580, and Ferishta speaks of many as having been in existence about 1600.

CASILINUM (Italy).—This town, situated on the river Vulturnus, was occupied by Fabius B.C. 217, and held by the Romans after their defeat at Cannæ, until the garrison was reduced by famine, B.C. 215. The Romans regained possession B.C. 214. Narses defeated the Franks and Alemanni at Casilinum A.D. 554. The modern town of Capua is built upon its site.

CASINO.—(*See* MONTE CASINO.)

CASPIAN SEA was explored by Antony Jenkinson in 1558 and 1561.

CASSANO (Battles).—Prince Eugène, at the

head of the Imperialists, encountered the French, led by the Duke Vendôme, at this town, on the Adda, Aug. 15, 1705. Both sides claimed the victory.——Suwarrow, with an army composed of Russian and Austrian troops, assailed the French in the neighbourhood of Cassano, April 24, 28, and 29, 1799. The latter lost 2,000 killed and 3,000 prisoners, with 30 guns, and Moreau at once withdrew from Lombardy.

CASSATION (Court).—The highest court of judicature in the kingdom, appointed to revise the sentences of inferior courts, was established at Paris by a decree of the National Assembly, Nov. 27, 1790. The chamber in which it is held was redecorated by Peyre in 1810. The order of advocates at the council of state, and of the College of Advocates at the Court of Cassation, were united by ordinance Sep. 10, 1817.

CASSEL (Germany).—The capital of Hesse-Cassel, existed under the name of Chassala in the 10th century. It was fortified in 1526, though a place of little importance until it became a refuge for the French Protestants, who commenced the Ober Neustadt, or New Town, in 1688. In 1760 it was taken by the French; was besieged by Count Lippe in 1761; and Prince Ferdinand, by whom it was taken Nov. 1, 1762. The fortifications were destroyed in 1767. It was occupied by the French in 1806, and formed the capital of the kingdom of Westphalia, under Jerome Bonaparte, from 1807 to 1813. Its academy was founded in 1775, and its palace, commenced in 1820, is in an unfinished state.

CASSITERIDES.—These islands, famous for their tin-mines, are first mentioned by Herodotus (B.C. 484—408), though he admits that he could furnish no information respecting them. Aristotle (B.C. 384—322), and Polybius (B.C. 204—122), also allude to these islands. Strabo (B.C. 60—A.D. 21) describes them as being inhabited by men in black cloaks, with tunics reaching to their feet, carrying staves in their hands, and bearded like goats. This group is now generally believed to be the Scilly Isles.

CASTEL-BOLOGNESE (Italy), so called from a castle built by the Bolognese in the 14th century, was the scene of a defeat of the Florentines by the Milanese in 1434.

CASTEL FIDARDO.—Cialdini, the Sardinian general, defeated the papal army, led by Lamoricière, at this place, near Loretto, Sep. 18, 1860. Lamoricière took refuge in Ancona.

CASTELLA (Battle).—Suchet attacked the English and Spanish in this strong position, in in the south of Spain, April 13, 1813. The allied army consisted of 17,000 men, while the French, who were completely defeated, only mustered about 15,000.

CASTELLAMMARE, or CASTEL-A-MARE (Italy).—This town of Naples, occupying the site of the ancient Stabiæ (*q. v.*), derives its name from the castle erected on the shore by the Emperor Frederick II. (1215—1246). It was sacked by the forces of Pius II. in 1461, and by the Duke of Guise in 1654. The Duke de Richelieu defeated the Spanish fleet here in 1648, and in 1799 Macdonald gained a victory over the Anglo-Neapolitan army.

CASTELLAMMARE (Sicily) was nearly destroyed by a waterspout in Dec., 1851.

CASTELNAUDARY (France).—A battle was fought here between Simon de Montfort and Count Raymond in 1212, and the town was deprived of its walls in 1229 by the Count of Toulouse, and was taken and burned by the Black Prince in 1355. It was rebuilt in 1366. The battle of Castelnaudary, in which Marshal Schomberg defeated the Duke of Montmorency, who was taken prisoner and afterwards executed at Toulouse, was fought in 1632.

CASTELNUOVO (Battles.)—After the victory of Arcola, Napoleon Buonaparte defeated the rear-guard of the Austrian army, under Gen. Davidovich, at Castelnuovo, and made 1,200 prisoners, Nov. 21, 1796. The French, under Gen. Marmont, defeated the Russians at the same place, Sep. 29, 1806.

CASTIGLIONE (Battle).—The French army, 28,000 strong, commanded by Gen. Augereau, defeated the Austrian general Wurmser, whose force consisted of 18,000 men, at this town, near Mantua, Aug. 5–9, 1796. A pageant, representing the battle of which Castiglione had been the theatre, took place here in 1805. Napoleon I. and the empress, seated on a lofty throne, witnessed the display.

CASTILE (Spain).—The Christian inhabitants of Spain, compelled to retire before the Saracen invaders in the 8th century, took refuge in the mountains, where they maintained their independence. Their descendants gathering strength, advanced into the open country, and for the protection of the territory which they wrested from the Moors, constructed forts, called in Spanish *castillos*. From this circumstance, the name Castile was applied to a portion of the country rescued from the grasp of the invaders. Castile, governed at first by counts dependent on Leon, was erected into a kingdom by Ferdinand, son of Sancho III. (the Great), King of Navarre.

A.D.

860. Rodrigo, first authentic Count of Castile.
762 (about). Castile declared independent under Count Rodrigo Fruelaz.
791. Alphonso II., surnamed the *Chaste*, becomes King of the Asturias, Leon, and Castile.
950. Ramiro II. abdicates in favour of his son.
970. Death of Gonsales, Count of Castile.
995. Don Sancho Garces rebels against his father, Don Garcia Fernandez, Count of Castile, who is defeated and taken prisoner by the Cordovans.
1026. Sancho III. (the Great) conquers Castile, and becomes its king.
1037. Ferdinand I., King of Castile, becomes King of Leon.
1065. Death of Ferdinand I., King of Castile, and consequent separation between Castile and Leon.
1072. Sancho II. of Castile is assassinated at Zamora, and Alphonso VI., of Leon, reunites the kingdoms.
1135. Alphonso VIII., King of Castile and Leon, assumes the imperial title.
1157. On the death of Alphonso VIII., the two kingdoms are again separated, Sancho III. becoming King of Castile.
1169. The Cortes assemble at Burgos.
1170. Marriage of Alphonso III. of Castile with Eleanor, daughter of Henry II. of England.
1230. Ferdinand III. of Castile seizes Leon, and reunites the two kingdoms.
1252. Death of Ferdinand III., who is canonized by Clement X. in 1671.
1256. Alphonso X., of Leon and Castile, is elected Emperor of Germany, the honour being contested by Richard Earl of Cornwall, brother of Henry III. of England.
1275. Death of Fernando de la Cerda, heir of Castile and Leon, which occasions disputes respecting the succession.

A.D.
1291. Restoration of peace.
1308. The Pope orders the suppression of the Castilian Templars.
1327. Alphonso XI. confiscates the estates of John, Lord of Biscay.
1366. Peter I. is opposed by his brother Henry, who invades Castile, of which he is solemnly proclaimed king.
1367. Edward the Black Prince, who goes to the assistance of Peter I., penetrates into Castile.—April 3. He utterly defeats Henry and his army at Najara.
1369. Henry again invades the kingdom.—March 23. He defeats Peter I., and puts him to death at Montiel (*q. v.*).
1381. John I. repels the Portuguese fleet which was sent to invade Castile.
1386, July. John of Gaunt, Duke of Lancaster, invades Castile, and is proclaimed king at Santiago.
1387. John of Gaunt foregoes his claim to the crown of Castile, on condition that Henry, son of John I., marries his daughter Catherine.
1390, Oct. 9. Death of John I., in consequence of a fall from his horse. His infant son, Henry III., succeeds him.
1407. Accession of John II., under the regency of his uncle Ferdinand.
1439. Revolt of the Castilians, who demand the permanent expulsion of Don Alvaro de Luna from the court.
1469, Oct. 19. Marriage of Isabella of Castile and Ferdinand II. of Aragon.
1474. Ferdinand and Isabella are proclaimed sovereigns of Castile.
1479. Ferdinand becomes King of Aragon, which is thus united to Castile.

SOVEREIGNS OF CASTILE.

A.D.		A.D.	
1035.	Ferdinand I.	1252.	Alphonso X.
1065.	Sancho II.	1284.	Sancho IV.
1072.	Alphonso VI. of Leon.	1295.	Ferdinand IV.
1109.	Urraca and Alphonso VII.	1312.	Alphonso XI.
1126.	Alphonso VIII. of Aragon.	1350.	Peter I. the Cruel.
1157.	Sancho III. and Ferdinand II.	1369.	Henry II.
1158.	Alphonso IX.	1379.	John I.
1214.	Henry I.	1390.	Henry III.
1217.	Ferdinand III.	1406.	John II.
		1454.	Henry IV.
		1474.	Ferdinand and Isabella I.

CASTILLEJOS (Africa).—Gen. Prim, at the head of the Spanish army, defeated the Moors at this place, Jan. 1, 1860.

CASTILLON (France).—Charles VII. of France defeated John Talbot, Earl of Shrewsbury, near this town, in Guienne, July 7, 1453. Talbot was slain in the battle, in which the French were greatly superior in point of numbers. Castillon surrendered to the French July 16. The result was that Guienne passed out of the possession of the English. Admiral Penrose destroyed a flotilla at Castillon, April 6, 1814.

CASTLE.—The ancient Greeks and Romans erected castles, and Gildas, who flourished in the 6th century, relates that the aboriginal British built very strong tall houses on the tops of hills, which were fortified for purposes of defence. Perhaps the oldest castle, the date of which is determined, is the Roman fortress at Richborough, in Kent, which was commenced in 43, and completed by Severus about 205. Anglo-Saxon castles consisted of a round or square tower-keep, ascended by a direct flight of steps in front. One was erected at Bamborough, by Ida, King of Northumberland, about 548, though they appear not to have become common till the reign of Alfred. The chief alteration introduced by the Normans, was an enlargement and elaboration of the keep, which was built of prodigious strength and security. One of the most famous is that at Rochester, built by Bishop Gundulph, about 1088.

CASTLEBAR (Battle).—Gen. Humbert, at the head of a French force of 1,150 men, defeated Gen. Lake near this town, in Ireland, Aug 27, 1798. The former, who had landed at Killala Aug. 22, were afterwards surrounded, and laid down their arms at Ballinamuck, Sep. 8.

CATACOMBS, called *cryptæ* and *arenaria*, says Bingham, from their being digged *privately* in the *sand* under ground, were the places used for Christian burial during the first three centuries of our æra. The catacombs in the Via Appia, near Rome, extend for six miles under ground, and are supposed to have been quarries. The bodies of St. Peter and St. Paul are said to have been interred in these catacombs. They were, it is believed, used as places of interment by the pagans before they were thus employed by the Christians, who often assembled in them for the celebration of divine worship. Catacombs are found in various countries. The catacombs of Egypt, explored by Belzoni in 1815–17, were found to contain vessels of various kinds, works of art, deeds, and other documents. Romanelli discovered in a catacomb at Naples inscriptions recording the ravages committed by the plague in that city in 1020. The catacombs at Paris are the quarries out of which materials were excavated for the building of the city. The victims of the massacres of Sep., 1792, were interred in these crypts, to which the remains of human beings taken from the Paris cemeteries, suppressed in 1784, had been removed. Several persons were lost in these labyrinthine chambers, which, on account of their dangerous nature, are closed to the public.

CATALAUNIAN PLAIN (France), near Châlons-sur-Marne, where Aetius defeated Attila and the Huns in 451.

CATALOGUES OF BOOKS.—George Willer, a bookseller at Augsburg, who frequented the fairs at Frankfort, first published a catalogue of new books, with titles and size. There is a difference of opinion respecting the date of his first catalogue, some authorities placing it in 1554, and others in 1564. Hallam is in favour of the latter. The earliest known catalogue of English books for sale was published by Andrew Maunsell, in 1595.

CATALONIA (Spain).—This province, forming part of the Roman Tarraconensis Provincia, the new name given to Hispania Citerior by Augustus, was, on the decline of the Roman power, invaded by the Goths and the Alani, about 409, and a settlement formed by them was called Goth-Alania. The Saracens conquered it in 712, and it was wrested from them by Charlemagne in 788, and included in his Spanish march. Catalonia was annexed to Aragon by the marriage of Queen Petronilla with Raymond Berenger, Count of Barcelona, in 1137. Philip III. of France invaded it in 1273. A general insurrection against the Aragon dynasty broke out in Catalonia in 1461, and the inhabitants, in 1466, elected René the Good, of Anjou, king. He was, however, unable to accept the proffered crown, and an accommodation was made with the King of Aragon, who swore to respect the laws and constitution of Catalonia,

Dec. 22, 1472. Both Aragon and Catalonia were united with Castile by the marriage of Ferdinand II. and Isabella, Oct. 19, 1469. Ferdinand emancipated the serfs of Catalonia in 1486, and transferred his court to this province in Oct., 1492. The inhabitants of Catalonia revolted in 1640, and entered into a treaty of alliance with Louis XIII., Dec. 16, converted into a treaty of union Jan. 23, 1641. The Spaniards recovered Barcelona Oct. 12, 1652, and Catalonia was soon afterwards re-united to Spain. The people rose against the French in 1808; but after a desperate struggle, it was subjugated and again annexed to France in 1812. The war was renewed, and, with the assistance of the English, the French were expelled in 1814.

CATAMARAN.—During the invasion panic of 1804, some projector induced Lord Melville o countenance a plan for the destruction of the flotilla at Boulogne by means of catamarans, being copper vessels of an oblong form, containing a quantity of combustibles, and so constructed as to explode in a given time by means of clockwork. They were to be towed and fastened under the bottoms of the enemy's gunboats, by a small raft rowed by one man, who, being seated up to his chin in the water, would, it was hoped, escape detection in a dark night. Fire-ships were also to be employed. Lord Keith anchored at about a league and a half from Boulogne Oct. 2, for the purpose of trying the experiment. Operations commenced at a quarter after nine the same evening, and terminated at a quarter after four on the morning of Oct. 3. No damage was, however, done to the enemy's fleet, and their loss was only 25 in killed and wounded. The catamaran project proved a failure.

CATANIA (Sicily), the ancient Catana, founded about B.C. 730, by a Greek colony. The original inhabitants were expelled by Hieron of Syracuse, B.C. 476, and a colony of Syracusans and Peloponnesians introduced, the name of the city being changed to Ætna. The original inhabitants were restored B.C. 461. Dionysius of Syracuse captured it, and sold the people to slavery, B.C. 403. It submitted to the Romans B.C. 263, was injured by an earthquake B.C. 121, and having been restored was captured by the Goths, and was wrested from them by Belisarius, A.D. 536. Richard I. held a conference with Tancred here in 1190. This city, situated close to Mount Ætna, has frequently been partially destroyed both in ancient and modern times. The earthquakes of Feb. 4, 1169, March 8, 1669, and 1694 committed the greatest havoc. Catania, however, rose from the ruins, and is considered the finest city in Sicily. It was made a bishop's see at an early period, but remained vacant for nearly 200 years, from the close of the 9th century, about which time Catania was captured by the Saracens, from whom it was wrested by the Normans. The nave of the celebrated cathedral, constructed from the ruins of an ancient pagan temple, was completely destroyed by the earthquake of 1693. The university was founded in 1445. During the Sicilian rebellion, it was captured by the royal troops, April 2, 1849. Garibaldi seized the town Aug. 20, 1862. Several villages near Catania were destroyed and many persons killed by an earthquake, July 18 and 19, 1865.

CATAPHRYGIANS.—The followers of Montanus, who founded his new Church at Pepuza, a small town of Phrygia, in 171 or 172, were also called Pepuzians and Montanists (*q. v.*).

CATAWBA.—This light, sparkling wine is produced on the banks of the Catawba River, near Cincinnati, U.S.

CÂTEAU-CAMBRÉSIS, or LE CÂTEAU (Treaties).—The conferences for peace between England, France, and Spain, opened at the abbey of Cercamp, near Cambray, in Oct., 1558, were brought to a sudden close by the death of Queen Mary, Nov. 17, 1558. The commissioners, however, met again, first at Cercamp, and afterwards at Câteau-Cambrésis, in Feb., 1559, and the peace known by this name was concluded between England, France, and Spain, April 2, 1559. The French called it the Unfortunate Peace. Two treaties were signed; the one between England and France, April 2, and the other between France and Spain, April 3. By the latter, the contracting parties engaged to maintain the Roman Catholic worship inviolate, and restore the conquests made by each country during the previous eight years. Henry II., of France, renounced all claims to Genoa, Corsica, and Naples. His sister Margaret was given in marriage to the Duke of Savoy, with a dowry of 300,000 crowns; and his daughter Elizabeth, betrothed to the Infant Don Carlos, was given to Philip II., of Spain, with a dowry of 400,000 crowns. By the treaty with England, Henry II. engaged to restore Calais within eight years, and to give security for the payment of 500,000 crowns in case of failure; the queen's title to Calais to remain unaffected by this payment. This was a general peace, to which all the principal powers of Europe acceded.

CATECHISM.—Bingham (book x. ch. 1, s. 6) shows that the subjects of the ancient catechisms were as follows:—The doctrine of repentance and remission of sins; the necessity of good works; the nature and use of baptism; the explanation of the several articles of the Creed; the nature and immortality of the soul; and an account of the canonical books of Scripture. The first were compiled in the 8th or 9th centuries. Luther published a short catechism in 1520, and his Larger and Smaller Catechisms in 1529. The Geneva Catechism appeared in 1536. The Catechism of the Church of England was published in 1551; the Heidelberg or Palatinate Catechism in 1563; the Tridentine Catechism in 1566; and Noel's Catechism in 1570. James I., at the Hampton Court conferences, recommended additions that were adopted in 1604. The Catechism of the orthodox Greek Church was published in 1642; the Shorter Catechism, prepared by the Assembly of Divines, in 1647; and the Longer in 1648.

CATHARISTS, or CATHARI.—This word, signifying pure, was applied to several sects in the early Church. The Apostolians (*q. v.*) and the Montanists, and especially the followers of Novatus, who separated from the Church in 251, were called Cathari. The appellation

was subsequently assumed by the descendants of the Paulicians, who appeared during the 11th century. Mosheim represents these Catharists as proceeding from Bulgaria, and spreading over Europe. He says they were divided into two principal parties, the one holding two first causes, and the other but one; and of the last-mentioned he makes the Albigensians a branch. There is much confusion in the accounts of these sects.

CATHAY.—(*See* CHINA.)

CATHEDRAL. — This name, given to the episcopal church of every diocese, because it contains the *cathedra*, or bishop's seat, was not used, in its present sense, before the 10th century, and is confined to the Western Church.

CATHERINE (Knights of St. Catherine of Mount Sinai).—This order of knights was instituted in 1063, for the protection of pilgrims to the shrine of Catherine, saint, virgin, and martyr, who suffered at Alexandria, under Maximin, in 307, and whose relics are said to have been miraculously conveyed to Mount Sinai, where they are preserved in a monastery. Landon (Eccles. Dict.) remarks: "She is said to have been put upon an engine made of four wheels joined together and armed with spikes, which, when the wheels were moved, were intended to lacerate her body; but at the instant at which the machine was put into motion, her bonds were miraculously broken, and she was released, only, however, to be instantly beheaded. Hence the name of *Catherine-wheel*."

CATHERINE, ST.—The earliest record of this religious order, which was originally for monks only, occurs in 1183, when it is mentioned as connected with the hospital of St. Opportune. The title was changed to St. Catherine in 1222, and nuns were admitted about the year 1328. In 1558 the order became exclusively one of nuns, who received a new constitution and regulations from Eustace du Bellay, Bishop of Paris, about 1564.

CATHERINE, ST. (Order), for females only, was instituted by Peter I. the Great of Russia, or, as some say, by his wife Catherine, in 1714, in memory of his escape from the Turks in 1711.

CATHERINE (ST.) DOCKS.—(*See* KATHARINE (ST.) DOCKS and HOSPITAL.)

CATHERINE'S (ST.) COLLEGE or HALL (Cambridge) was founded by Dr. Woodlarke, Chancellor of the University, in 1473.

CATHOLIC LEAGUE.—(*See* ROMAN CATHOLIC LEAGUE.)

CATILINE'S CONSPIRACY was formed by Lucius Sergius Catilina, a Roman patrician, born B.C. 108. He was elected prætor B.C. 68, governor of Africa B.C. 67, and intended to offer himself for the consulship B.C. 65; but the senate declared him ineligible, because he was under an accusation for misconduct in his African administration. Annoyed at this, he entered into a conspiracy with P. Autronius Pœtus and Cn. Calpurnius Piso to murder the new consuls on the day of their inauguration, Jan. 1. Piso was to be sent with an army to secure Spain, and the other two conspirators intended to seize the consulship. Suspicion having been excited, the execution of the plan was postponed until Feb. 5, and several senators were included in the list of proposed victims. Catiline gave the signal too soon, and the scheme miscarried, though its authors were not molested. Soon after, Catiline was brought to trial for alleged misconduct in Africa, and acquitted. In B.C. 64 he formed plans for a second revolution on an extended scale. Cicero, who was consul, obtained some intimation of his proceedings, and informed the senate of what he had learned, Oct. 21. They made the usual provision to avert the peril, and Catiline, who was again a candidate for the consulship, was rejected. His agents took up arms in Etruria, and attempted to assassinate Cicero, who called a meeting of the senate in the temple of Jupiter Stator on the Palatine Hill, Nov. 8, B.C. 63, and denounced Catiline, who in vain attempted to reply, and was compelled to quit Rome. Catiline left some of his associates behind, who, on a certain day, were to set fire to the city in several places, murder the magistrates and leading men, whilst Catiline was to be ready in the neighbourhood with an army to complete the massacre and put the finishing stroke to the revolution. By the vigilance of the authorities, the principal conspirators were arrested, Dec. 3, B.C. 63, and executed Dec. 5. Catiline's followers rapidly deserted him, and he was slain in a conflict with the army of the republic in Jan. B.C. 62. Some critics question the accuracy of the account of this conspiracy given by Sallust and Cicero. Smith (Hist. of the World; Ancient Hist., vol. iii. ch. 34, p. 189) gives the following as the dates, with the corrections required by the disordered state of the Roman Calendar, of the four Catilinarian orations:—

1. Ad Senatum, Nov. 8, B.C. 63, for Jan. 12, B.C. 62.
2. Ad Populum, Nov. 9, B.C. 63, for Jan. 13, B.C. 62.
3. Ad Populum, Dec. 3, B.C. 63, for Feb. 5, B.C. 62.
4. Ad Senatum, Dec. 5, B.C. 63, for Feb. 7, B.C. 62.

CAT ISLAND (Atlantic).—(*See* SALVADOR, ST.)

CATO-STREET CONSPIRACY, so called from the place, near the Edgeware-road, London, where the conspirators assembled to arrange their plans, was formed by one Arthur Thistlewood, who had imbibed revolutionary projects during a residence in France just after the fall of Robespierre. He had collected a few associates, and Saturday, Feb. 19, 1820, they finally resolved to murder the ministers separately in their own houses, to seize the Bank, and set fire to London in several places, on the following Wednesday. Finding that a cabinet dinner was to be given at Lord Harrowby's, in Grosvenor-square, on the day they had fixed for carrying out the plot, they determined to obtain entrance by stratagem, and to murder the whole party. Information was given to Government by one of the conspirators, and several of them were arrested in Cato-street, at eight on the Wednesday evening. Thistlewood, the leader, escaped; but he was taken on the following day in bed, in a house near Finsbury-square. They were found guilty. Thistlewood and four of his fellow-conspirators were executed, May 1, 1820; five were transported for life, and one was pardoned.

CATTARO (Dalmatia).—The ancient Cattarus, was a Roman colony. The modern town

was probably founded in the 6th century. It suffered from earthquakes in 1563 and 1667. Formerly the capital of a small state, it was ceded to France by the treaty of Presburg, Dec. 26, 1805, to be given up in three weeks from that date. The Austrian garrison, however, surrendered it to the Russians, March 4, 1806, who held it till the next year, when they relinquished it to France by the treaty of Tilsit, July 7, 1807. An English squadron captured Cattaro Jan. 5, 1814, and it was ceded to Austria at the general peace of 1814–15.

CATTI, or CHATTI.—This German tribe, inhabiting the modern Saxony, Hesse, and Nassau, was attacked by Germanicus, who destroyed their capital, Mattium, A.D. 15. Their territory was invaded by Domitian in 84, and in the 4th century they disappeared from history.

CATTLE PLAGUE.—A "very grievous murrain" constituted one of the 10 plagues inflicted by Jehovah on the obstinate Egyptians, B.C. 1491 (Exod. ix. 1—7), and Plutarch mentions a severe cattle pestilence B.C. 753. Violent epidemics raged among the herds of Europe in 376 and 592, and in 1316 protracted rains occasioned a destructive malady in England. In 1711 epizootic typhus spread from Hungary to Venice, whence it extended into Piedmont, destroying 70,000 cattle, and into France and Holland, which lost in each instance 200,000. It subsequently reached England and diffused itself over Western Europe, carrying off, before its termination in 1714, 1,500,000 horned cattle. A still more fatal epidemic broke out about 1745, and raged for 10 years, destroying in Central and Western Europe alone 3,000,000 cattle. This visitation was studied by the English physicians, Malcolm Flemming and Peter Layard, who, in 1757, introduced the practice, since carried out with good results in Russia, of preventing the malady or mitigating its effects by inoculation. Typhoid contagion broke out in Holland in 1768, 1769, and 1770, in French Flanders in 1771, in Hainault in 1773, and in the south of France, and again in Holland, where the government vainly offered a reward of 80,000 florins for a remedy, in 1774. The destruction effected by this epidemic since its great outbreak in 1711 was estimated by Dr. Faust in 1796 at no fewer than 200,000,000 of bovine cattle. During the early part of the 19th century, though constantly carried from its home in the steppes of Russia and Hungary, in the train of the armies that made Europe the theatre of war, it never effected any great destruction. In 1832, under the name of the Delombodera, it ravaged the South American Republics, and between 1841 and 1844 it destroyed 400,000 oxen in Egypt, having, it is alleged, been occasioned in both cases by the importation of infected cattle from Europe. In 1853 the Russian government commenced experiments to test the efficacy of inoculation, which was found in most cases to prevent contagion, and in 1857 the English and Irish Agricultural Societies sent out Professor Simonds to investigate an epidemic said to be raging in Mecklenburg. The outbreak in England of the steppe murrain, or Rinderpest, originated, it is alleged, in the sale at the Metropolitan Cattle Market, June 19, 1865, of two infected cows that had just been imported. One of them being found ill, June 24, both were sold, and the disease was at once propagated. A meeting of the London cow-keepers, held July 31, established the National Association for the Prevention of Cattle Diseases; and the Privy Council issued several recommendations, which were ultimately consolidated into an Order, Sep. 22. A Royal Commission, appointed Oct. 4, published its first report on the plague Nov. 13, and an Order in Council, consolidating all previous Orders upon the subject, was issued Nov. 24. By an Order issued Dec. 22, local authorities received power to regulate the removal of cattle. Measures for the prevention of contagious disorders among sheep and cattle were imposed by 11 and 12 Vict. c. 107 (Sep. 4, 1848), which was continued by several acts, the last being 28 & 29 Vict. c. 119 (July 5, 1865). The plague, which spread with fearful rapidity at the commencement of 1866, occupied the attention of the Legislature, and a very stringent act was passed in March.

CATTLE-SHOW.—(*See* AGRICULTURAL HALL and SMITHFIELD.)

CAUDEBEC-LÈS-ELBŒUF (France).—This town, captured by the English under Talbot, after a six months' siege, in 1419, suffered severely during the religious wars of the 16th and 17th centuries.

CAUDINE FORKS.—In the valley of Caudium, in the Apennines, supposed to be the modern Arpaia, the Romans were completely surrounded by the Samnites in the spring, B.C. 321. Half their number were cut to pieces on the spot, and the remainder capitulated to the Samnite general, C. Pontius. The treaty was, however, rejected at Rome B.C. 320. The name of the pass into which the Roman army had been allured was *Furculæ Caudinæ*. According to Livy (b. ix. 2), it consisted of two narrow defiles, which opened into a plain, surrounded, excepting at these outlets, by mountains. The Romans advanced through the first defile, and found the second blocked up to oppose farther progress, and their vigilant enemy at once closed the one through which they had entered. Hence retreat was impossible.

CAULIFLOWER was brought from the Levant to Italy about the end of the 16th century, and was introduced into Germany and into England at the end of the 17th. Alpinus mentions that it was very plentiful in Egypt in 1588.

CAURSINES, or the POPE'S MERCHANTS, Italian usurers who came to England early in the 13th century. They practised the most flagrant extortion, and are denounced by Matthew Paris as "a horrible nuisance." Roger, Bishop of London, expelled them from the city of London in 1235. They obtained the protection of the Pope, and became numerous. To such a height did they carry their extortion, that, in 1251, many of them were prosecuted in the civil courts and punished. They managed, by the payment of a large sum of money, to obtain permission to pursue their nefarious traffic, but were at length expelled.

CAUTIONARY TOWNS.—In July, 1585, Queen Elizabeth accepted the protection of the Netherlands, repeatedly urged upon her by their inhabitants. She engaged to supply them

with 5,000 infantry and 1,000 cavalry, for which they were to pay at the close of the struggle with Spain. As security for this repayment, Briel, Flushing, Rammekins, and Walcheren were placed in her possession; and these were called the Cautionary Towns. The Dutch refunded only a third of the sum due to England, but the Cautionary Towns were, notwithstanding, delivered to them May 27, 1616, the treaty for the purpose having been signed May 22.

CAVALIERS.—The apprentices of London published and circulated a petition against popery and prelates in 1641. Seditious cries having been raised, and the bishops assaulted on their way to Parliament, skirmishes between the malcontent apprentices and their followers, and many gentlemen who voluntarily offered their services to form the king's body-guard, were of almost daily occurrence. "And, from these contestations," says Clarendon, "the two terms of *roundhead* and *cavalier* grew to be received in discourse, and were afterwards continued for the most succinct distinction of affections throughout the quarrel: they who were looked upon as servants to the king being then called *cavaliers:* and the other of the rabble contemned and despised, under the names of *roundheads.*"

CAVALRY.—The ancients appear to have used horses in warfare. The Canaanites, whom Joshua defeated at the waters of Merom, are said to have assembled "with horses and chariots very many," B.C. 1445 (Josh. xi. 4). The Jews, however, possessed no cavalry till the time of David, who took from Hadadezer, King of Zobah, 1,000 chariots. David houghed all the chariot horses except sufficient for 100 chariots B.C. 1040 (2 Sam. viii. 4). Alexander III. used cavalry to great advantage in his various conquests, and Scipio's victory at Zama, B.C. 202, is attributed to his superiority in this force. Edward III. divided the English cavalry into small bodies commanded by *constables*, in 1324. The word *troop*, as applied to a body of horse-soldiers, first appears in an army list for 1557.

CAVAN (Ireland).—Part of Cavan was formed into a county of Ulster in 1584, and the remainder was escheated to the crown in 1610, in consequence of the rebellion of the O'Reillys. The chief town, Cavan, was burned in 1690.

CAVENDISH CLUB (London) was established Jan. 1, 1855.

CAVENDISH SOCIETY (London) was established in 1846, for the promotion of chemical science by the translation and publication of valuable works and papers.

CAVINIANO (Battle).—The Florentine forces, under Francesco Ferrucci and Malatesta Baglioni, were defeated at this place in Italy by the Imperial army under the Prince of Orange, Aug. 2, 1530. Ferrucci and the prince were both slain. Florence capitulated Aug. 12.

CAWNPORE (Hindostan), the chief town of a district of the same name, was founded in the 18th century. The district belonged to Oude in 1777, and was ceded to the East India Company in 1801. On the breaking out of the Sepoy revolt in 1857, the English residents of Cawnpore were placed in the greatest peril. Their efforts to obtain reinforcements failed, and the 2nd regiment of native cavalry revolted June 5. Their example was speedily followed by the native infantry. The English, their wives and children, with native servants, amounting to nearly 900 persons, were besieged within a narrow entrenchment, by the rebel soldiers commanded by Nana Sahib. They defended themselves heroically against overwhelming numbers. Death, however, rapidly thinned their ranks, and, June 24, Nana Sahib sent a message to Sir Hugh Wheeler, offering to allow the English to proceed unmolested to Allahabad, provided they gave up the public treasure, the guns, and ammunition. A contract to this effect was signed on the following day, and the remnant of the 900 besieged at Cawnpore embarked in boats prepared to convey them to Allahabad, June 27. No sooner, however, had they quitted the shore, than the treacherous sepoys opened fire upon them, following them along the banks in order to insure their destruction. The boats were sunk, many of the men killed, and the survivors, with the women and children, carried back to Cawnpore. Other prisoners, male and female, were brought in, and all who survived were barbarously slaughtered July 15. Gen. Havelock defeated Nana Sahib near Cawnpore, July 16, and entered the town on the following day, when the horrors that had been enacted there became known. The Gwalior rebels defeated Gen. Windham near Cawnpore, Nov. 27 and 28, 1857. Sir Colin Campbell soon after reached the scene of action, and completely routed the rebels, 25,000 strong, at Cawnpore, Dec. 6.

CAXTON SOCIETY (London), established about 1844, for the publication of chronicles, &c., illustrative of the literature and history of the Middle Ages.

CAYENNE (South America), in Guiana, was settled by the French in 1604, and again in 1635. In 1654 the English supplanted them, and retained the colony till 1664. The Dutch seized it in 1676, but were compelled to restore it to the French in 1677. The British took Cayenne Jan. 12, 1809, and relinquished it to France at the peace of Paris, May 30, 1814. During the revolution of 1789, many persons were transported to Cayenne. Many of the insurgents who fought at the barricades in Paris, June 22–26, 1848, were also sent there. Numerous political prisoners have been transported to this colony by the French government.

CAZAN, or KAZAN (Russia).—Batou, a celebrated khan of the Golden Horde, founded this town in 1265. It was taken and completely destroyed, its inhabitants having been cruelly massacred, by the Russians, about 1405. The town was rebuilt by another khan of the Golden Horde in 1445. The Russians sent several expeditions against it, and committed great ravages. Ivan IV. captured it Oct. 2, 1552, when the town was burned and the dominion of the khans overthrown.

CECROPIA.—(*See* ATHENS.)

CECRYPHALEA (Battle).—The Athenians defeated the Corinthian and Epidaurian forces in a sea-fight off this island B.C. 457.

CEDAR.—The wood of this tree, much esteemed by all ancient nations, was used by Solomon in the construction of his temple

(B.C. 1011—1004), by the classic nations for shipbuilding, in the erection of sacred edifices, and for other purposes requiring durability. The red cedar, the wood of which is employed in the manufacture of pencils, &c., was introduced into this country from North America before 1664: and the cedar of Goa, the Bermudas cedar, and the cedar of Lebanon, before 1683, when a number of cedars were planted in the royal garden at Chelsea. The duty on cedar wood was repealed by 8 Vict. c. 12 (May 8, 1845).

CEDAR CREEK, or RUN (Battle).—The Federals, attacked by the Confederates at this place in Virginia before daybreak Oct. 19, 1864, and driven back four miles with the loss of 24 cannon, were rallied at midday by Gen. Sheridan, who converted the defeat into a complete victory, seizing 54 guns, including those taken from him in the morning, and making from 1,500 to 2,000 prisoners.

CEDAR MOUNTAIN (Battle). — At this place in Virginia Gen. Lee's artillery opened fire on the Federals Saturday, Aug. 9, 1862. Later in the day Gens. Ewell and Jackson advanced upon Gen. Banks, who was forced from his position about a mile and a half. The Confederates fell back two miles Aug. 10, and retired across the Robertson River Aug. 11. The Federal loss in killed, wounded, and missing was 1,500 men, with several guns and a large quantity of ammunition. The Confederate casualties were also severe, including Gens. Winder and Trimble.

CELEBES (Indian Archipelago).—The Portuguese occupied this island in the 16th century, and were followed by the English and the Dutch. The latter entered into treaties with the native rulers, and formed permanent settlements. The English wrested Celebes from the Dutch in 1811, but restored it at the general peace, and the Dutch returned in 1816. The harbour of Macassar, on the west coast, was, by a decree dated Oct. 7, 1846, made a free port from Jan. 1, 1847.

CELESTINES.—(*See* CŒLESTINES.)

CELIBACY. — Under the law of Moses, priests were allowed to marry, and the office was confirmed to the descendants of one particular family. The vow of perpetual celibacy, or abstinence from conjugal society, was not required of the clergy during the first three centuries. "For the contrary is very evident," says Bingham (Antiq. b. iv. c. 5, s. 5), "from innumerable examples of bishops and presbyters, who lived in a state of matrimony without any prejudice to their ordination or function. It is generally agreed by ancient writers that most of the apostles were married. Some say all of them, except St. Paul and St. John. Others say, St. Paul was married also, because he addresses *his yoke-fellow*, whom they interpret *his wife*." (Phil. iv. 3.) A life of celibacy began to be extolled in the 2nd century, and the withdrawal of ascetics and hermits to desert places, and the subsequent introduction of monasteries, tended to bring it into repute. A proposal for compelling the clergy to abstain from all conjugal society with their wives, was rejected by the Council of Nicæa in 325. The Council of Gangra, between 325 and 380, anathematized Eustathius, the heretic, because he taught men to separate from those presbyters that retained the wives to whom they had been married while they were laymen. Pope Siricius, in a decretal epistle addressed to Himerius, Bishop of Tarragona, in 385, ordered the clergy under certain circumstances to separate from their wives. It was not, however, until the time of Gregory VII., 1073—1085, that the system of the celibacy of the clergy was fully established. He issued a decretal in 1074 which met with much resistance, and the question was re-opened at the Council of Trent, which, by the ninth canon of the 24th session, decreed that persons in holy orders, and regulars who had made a vow of chastity, were incapable of contracting marriage, and that such marriages are null and void (1545—1563). Anselm, in 1102, introduced the practice into the English Church. Convocation, in 1547, passed a law allowing the English clergy to marry.

CELTÆ, CELTS, or KELTS. — Turner (Anglo-Saxons, vol. i. b. i. c. 2) says: "The tendency of the notices of the Kelts, by Herodotus, Aristotle, and Ephorus, is to show, that in their times, this people lived in the western parts of Europe, about Gaul and Spain. They are spoken of as being in the same places by later writers." About B.C. 600 they invaded Italy, and at a subsequent period attacked Rome itself, which they sacked B.C. 390. They invaded Greece about B.C. 280. The earliest inhabitants or settlers in Britain were Celts. The origin and history of the Celts have given rise to much controversy amongst learned men. The general opinion is that they formed a branch of the great Aryan or Indo-Germanic race, which migrated from the East at an early period.

CELTIBERIANS.—The inhabitants of Celtiberia, an extensive inland division of ancient Spain, were known by this name. They are supposed to have arisen from a union of the aborigines, the Iberians, and their Celtic invaders. Various limits have been assigned to their country by ancient writers. Hannibal subdued the Celtiberians, and they afterwards passed under the Roman yoke. They revolted B.C. 181, and were subdued by Tiberius Gracchus, B.C. 179. Another struggle, called the first Celtiberian War, commenced B.C. 153. About B.C. 143 it took the name of the Numantine War, and was not brought to a close till B.C. 133. Quintus Sertorius raised his standard against Sylla B.C. 80. In this, the second Celtiberian, sometimes called the Sertorian War, the Celtiberians at first gained several advantages, but the assassination of Sertorius, B.C. 72, proved fatal to their cause. The Roman authority was completely re-established, and the Celtiberians, as an independent people, do not again appear in history.

CELTIC SOCIETY (Dublin).—Founded in 1847, publishes documents relating to the history, language, and antiquities of Ireland.

CEMETERY.—Ornamental burial-grounds existed in Turkey previous to their introduction into Western Europe. The National Assembly, in 1790, prohibited burial in churches, and ordered that public cemeteries should be

formed. The ground for the Père la Chaise cemetery, at that time consisting of 42 acres, was purchased by the municipality of Paris, in 1800, to form the first national cemetery. It was consecrated in 1804, and the first grave was opened May 21. It has been since increased in size, and at present consists of 112 acres, surrounded by a wall. Regulations for Metropolitan Interments were introduced by 13 & 14 Vict. c. 52 (Aug. 5, 1850). It was amended by 14 & 15 Vict. c. 89 (Aug. 7, 1851). Both acts were repealed by 15 & 16 Vict. c. 85 July 1, 1852). Burials in the provinces are regulated by 16 & 17 Vict. c. 134 (Aug. 20, 1853), amended by 17 & 18 Vict. c. 87 (Aug. 10, 1854); by 18 & 19 Vict. c. 128 (Aug. 14, 1855). All the Burial Acts relating to London and the provinces were amended by 20 & 21 Vict. c. 81 (Aug. 25, 1857), which was amended by 22 Vict. c. 1 (March 25, 1859). Burials in Scotland are regulated by 18 & 19 Vict. c. 68 (July 23, 1855), and in Ireland by 19 & 20 Vict. c. 68 (July 29, 1856), both amended by 20 & 21 Vict. c. 81 (Aug. 25, 1857). In consequence of these regulations the practice of intramural interments has been discontinued. Bunhill Fields, opened as a suburban burial-place in 1665, was closed in 1850.

CENIS MONT.—(*See* ALPS, TUNNEL.)

CENOBITES.—(*See* CAMALDULENSIANS.)

CENSORS.—Two Roman officers of state, first appointed B.C. 443. The office was the highest in the commonwealth after the dictatorship, and had been exercised from an early period, first by the kings and afterwards by the consuls, until two patricians received the appointment, B.C. 443. The censors attended to numbering the people. Public morals and the finances of the state were also placed under their control. The office was filled by patricians until B.C. 351, when C. Martius Rutilus, a plebeian, was elected. It was provided, B.C. 339, that one censor must be selected from the plebeians, and two plebeians were appointed B.C. 131. The duration of office, fixed at five years, was reduced to a year and a half by the lex Æmilia, B.C. 433. The office having ceased under the emperors, B.C. 22, was revived by Decius A.D. 251, Valerian, afterwards emperor, being unanimously appointed censor Oct. 27. Gibbon (c. x.) remarks, "A censor may maintain, he can never restore, the morals of a state."

CENSORSHIP OF THE PRESS.—(*See* BOOK CENSORS.)

CENSUS.—God commanded Moses to number the Israelites (Numbers i. and ii.), B.C. 1490. David was punished for having numbered Israel (2 Sam. xxiv. 1), B.C. 1017. A census was taken at Athens B.C. 317, when the population was found to consist of 127,660 citizens and 400,000 slaves. The term census originated at Rome, where the first took place B.C. 566, when the city was found to contain 84,700 citizens. After B.C. 432, it was held in the Campus Martius, and was generally taken every five years at Rome. The first census of Great Britain was made in 1801; the act of Parliament ordering a census to be taken every 10 years, 41 Geo. III. c. 15, having passed Dec. 31, 1800. Ireland was not included in this return, and the census for that portion of the United Kingdom was first taken in 1813. (*See* POPULATION.)

CENTENARIANS.—(*See* LONGEVITY.)

CENTRAL AMERICA.—This country, lying between N. and S. America, occupied by various states, was discovered by Columbus in 1502. In 1821 the Spanish American states asserted their independence and established a confederacy entitled the "Republic of Central America," which was, however, dissolved by reason of internal dissensions in 1839. Ineffectual attempts were made to restore union in 1842 and in 1847. In 1849 commissioners from the different states assembled at Leon, in Nicaragua, and agreed upon a basis of union, to be called the "National Representation of Central America." This assembly met at Tegucigalpa, in Honduras, in 1852, but was dissolved owing to the refusal of some of the states to send delegates. By a treaty concluded between Great Britain and the United States, June 29, 1850, both parties agreed "not to occupy, fortify, or colonize any part of Central America," an exception being made, however, in the case of Belize, which still remained a British dependency. (*See* BELIZE, COSTA RICA, GUATEMALA, HONDURAS, NICARAGUA, SALVADOR, SAN, &c.)

CENTRAL CRIMINAL COURT.—This criminal tribunal, with authority to hear and determine all treasons, murders, felonies, and misdemeanors committed in London or Middlesex, and some parts of the adjacent counties, and all offences committed within the jurisdiction of the Admiralty of England, was established by 4 Will. IV. c. 36 (July 25, 1834). It meets at least 12 times in the course of the year.

CEPHALONIA (Mediterranean).—The ancient Cephallenia, the largest of the Ionian Islands, became subject to Rome B.C. 187. On the division of the empire, it passed under the rule of the emperors of the East, and was taken by the Franks in the 12th century. The princes of Achaia held it until 1224, when it came into the possession of the Venetians. The Turks took Cephalonia in 1479, but it was retaken in 1500 by the Venetians, who held it until the overthrow of their republic in 1797. By the treaty of Campo-Formio (Oct. 17, 1797) it was ceded to France. (*See* IONIAN ISLANDS.) Cephalonia was a bishopric of the early Church, and was united to the see of Zante in 1621. It was ravaged by an earthquake in 1767, and was captured by an English squadron in Oct., 1809. It is called by Homer Same or Samos (*q. v.*).

CEPHISUS (Greece).—On the banks of this river, in Attica, Walter of Brienne, Duke of Athens, was defeated and slain by the Catalans, in March, 1311. The Greeks defeated the Turks with great slaughter whilst passing this river, July 5, 1823.

CERCAMP (France).—At this abbey, near Cambray, the envoys from Spain, France, and England assembled in the middle of Oct., 1558, for the purpose of negotiating a peace. The proceedings were suspended by the death of Queen Mary of England, Nov. 17, and the congress afterwards re-assembled at Câteau-Cambrésis (*q. v.*).

CERDAGNE (France).—This province of the

Pyrenees was governed by independent counts from the 9th to the 12th century. Having been pledged to Louis XI. in May, 1462, in return for assistance rendered by him to Juan II. of Aragon, the populace revolted in Feb., 1473, and massacred the French garrisons. Juan II. having failed to pay the stipulated amount, the province passed in 1475 into the possession of Louis XI., whose son, Charles VIII., ceded it to Ferdinand and Isabella I. by the treaty of Barcelona, Jan. 19, 1493. It was finally annexed to France by the treaty of the Pyrenees, Nov. 7, 1659.

CERDICSFORD (Battle).—At this place, supposed to be Charford, in Hants, Cerdic and Cynric defeated the Britons in 519.

CERDICSORE (Battles).—The Saxons frequently landed at this port, supposed by some writers to be Yarmouth, in the 5th and succeeding centuries. They defeated the Britons in great battles in the neighbourhood, in 495 and 514.

CERDONIANS, the followers of Cerdo or Cerdon, a Gnostic of Syria, who advocated the Persian doctrine of the two principles of good and evil. He abjured his errors at Rome, in 140, but afterwards relapsed, and was expelled from the Church. Tertullian says that Marcion borrowed many of his errors from him.

CEREMONIES.—(*See* MASTER OF THE CEREMONIES.)

CERET (France).—The plenipotentiaries of France and Spain assembled at this town, in the Pyrenees, to settle the boundaries of their respective kingdoms, in 1660. During the revolutionary war, the Spaniards seized the town, and resisted several attempts of the French to recover it (1793). Having been defeated in a battle fought here April 30, 1794, the Spaniards withdrew.

CERIGNOLA (Battle).—Gonsalvo de Cordova, at the head of the Spanish troops, defeated the French under the Duke of Nemours, at this town, in Italy, Friday, April 28, 1503. Each army consisted of about 6,000 men, and while the Spanish loss was small, 3,000 of the French were killed.

CERINTHIANS.—This sect was founded by Cerinthus, a Jew, who lived at the close of the apostolic age. He studied at Alexandria, and afterwards taught in Palestine. Irenæus says that he appeared in 88, and that St. John wrote his gospel to refute his errors, which were a strange mixture of Judaism and Gnosticism. He inculcated the greatest laxity in morals. The sect was not of long duration, though the doctrines were reproduced in an altered form.

CERISOLES (Battle).—The imperialists, commanded by the Marquis of Guasto, were defeated by the French, under the Count d'Enghien, at this place, in Piedmont, April 14, 1544. The French captured tents, baggage, and artillery, and 10,000 of the imperialists were killed. It is also called the battle of Ceresola. (*See* CARIGNAN.)

CERIUM.—This metal was discovered by Hisinger and Berzelius, in a Swedish mineral called carite, in 1803. It is named after the planet Ceres.

CERNE.—(*See* ARGYLL.)

CERRO GORDA (Battle).—The Americans defeated the Mexicans on this plateau, in Mexico, April 18, 1847.

CEUTA (Africa), the ancient Septem or Septa, was taken during the campaign of Belisarius in Africa, in 534, and was afterwards fortified and adorned by Justinian. The Goths captured it in 618, and the Moors in the following century. John I. of Portugal wrested Ceuta from the Moors in 1415, and it passed under the Spanish rule in 1580. The Africans have frequently attempted to regain possession of this fortress.

CEUTLA (Battle).—During his expedition for the discovery of Mexico, Cortes defeated the Indians in the plain of Ceutla, near Tabasco, Lady-day, March 25, 1519. The town of Santa Maria de la Vitoria was founded on the spot where the battle took place.

CEVENNES (France).—In this mountain-range, the ancient Cebenna, and the adjoining districts, the Reformed doctrines first took root in France. They afterwards became the arena of religious warfare. The Huguenots took refuge in those retreats in times of persecution, and heroically resisted many attempts at their extermination. (*See* CAMISARDS.)

CEYLON (Indian Ocean).—This island, the ancient Taprobane, was made known to the Greeks by the conquests of Alexander III. (the Great) B.C. 325. Pliny relates that ambassadors from Ceylon visited Rome and did homage to the emperor, in the reign of Claudius (A.D. 41—54). Christianity was preached in India, and a church founded at Ceylon. Marco Polo, in 1298, referring to it under its name of Zeilan, says it produces many precious and costly stones, and speaks of a ruby a span in length, and the thickness of a man's arm, brilliant beyond description, and without a single flaw. It was in the possession of the king, who being offered the value of a city for it by the great khan, replied that he would not sell it for all the treasure in the universe, nor allow it to go out of his dominions, because it was a jewel that had been handed down to him by his predecessors. Ceylon is said to have been described by the Portuguese Thome Lopez in 1502. Its re-discovery by Europeans is usually ascribed to Lorenzo de Almeida, who was driven to the port of Galle by stress of weather in 1506. [The student is referred to Sir J. E. Tennent's "Ceylon Past and Present" (1859), and "The Natural History of Ceylon" (1802).]

B.C.

543. Ceylon, having been thrice visited by Godama, the founder of Buddhism, is invaded in the year of his death by Wijayo, son of a petty sovereign in the valley of the Ganges, who lands upon the western coast and establishes a dynasty.
307. The inhabitants are converted to Buddhism.
289. They commence the erection of the *dagobas* or brick monuments enclosing relics of Godama.
237. King Suratissa is deposed and slain by Sena and Guttika, who, after reigning for more than 20 years, are put to death and succeeded by the lawful heir.
205. Ceylon is invaded by Elala, a native of Malabar, who slays King Asela and seizes his throne.
161. Elala falls in battle against Dutugaimunu, a prince of the Wijayo dynasty.

B.C.
104. King Walagam Bahu is expelled by another Malabar usurper, but regains the crown after living some years of exile.
62. Accession of his grandson Naga, surnamed, from his opposition to Buddhism, "the Marauder."
50. Naga is poisoned by his queen Anula.
47. After murdering her son Kuda Tissa, she succeeds to the throne.

A.D.
110. The Malabars invade the island in great force, returning to Mysore with 12,000 slaves.
113. The territory of the Malabars is ravaged by Gaja Bahu, who recovers the captives and takes many prisoners.
309. A violent religious controversy commences.
301. Extinction of the pure lineage of Wijayo, and commencement of the "lower dynasty;" composed, according to native chronicles, of the children of parents only one of whom "was descended from the sun."
400. The Singhalese commence political relations with China.
433. The Malabars seize the capital, whence they are expelled after several years by the King Dhatu Sena.
459. Dhatu Sena is built up alive in a wall by his son Kasyapu I.
515. The Malabars returning in great force, many of the people migrate to Bahar and Orissa.
633. Sanghatissa is deposed and murdered by Seneriwat, who soon meets with a similar fate, after which civil war commences, in which the Malabar mercenaries are defeated and employed as slaves in the temples.
840. The King of Pandya devastates the northern shores, and compels the government to conclude an alliance with him.
954. The Pandyan sovereign, deposed by the King of Chola, and forced to seek shelter in Ceylon, is expelled for conspiring against the government.
990. A Malabar invasion is repulsed by the mountaineers of Rohuna.
1023. The Cholians invade Ceylon, carry the king prisoner to India, and establish a Malabar viceroy, who governs for nearly 30 years.
1071. Accession of Wijayo Bahu, who expels the Malabars, and extends his empire over the whole island.
1186. The death of Wijayo Bahu is the signal for a long civil war.
1153. Coronation of the victor, his nephew Pakrama Bahu, a prince learned in every science and accomplishment of his age.
1197. Five successors having been forced by assassination or disease to relinquish the sceptre, he is succeeded by his widow Lilí-Wati, who is deposed after a reign of three years.
1211. The Malabars return with an army of 24,000 men.
1214. Having reconquered the island, the Malabars raise their leader, Magha, to the throne.
1235. Many of the Malabars are expelled by Wijayo Bahu III., who establishes a government near Colombo.
1266. Pandita Pakrama Bahu III. expels the Malabars from the northern shores.
1267. The island, seized by the Malays, is never afterwards free from foreign domination.
1506. Lorenzo de Almeida, a Portuguese, is driven into Galle.
1517. The Portuguese obtain permission to erect a fort or factory, and found Colombo (*q. v.*).
1527. The encroachments of the Portuguese are resisted by the mountaineers of Kandy, who, with the help of the native princes, subdue them.
1541. Franciscan missionaries are allowed to establish themselves in the island.
1542. The King of Cotta, with many of his court, embraces Christianity.
1550. The King of Kandy professes a desire for spiritual instruction, but treacherously attacks and routs the missionaries.
1586, Aug. Rajah Singha besieges Colombo (*q. v.*).
1509, March 5. Ralph Fitch, the first Englishman to visit Ceylon, lands at Colombo.
1594. The entire island is seized by Wimala Dharma, who wages war for many years against the Portuguese.
1597, May. Death of the lawful Emperor of Ceylon, who bequeaths his territories to the King of Portugal.

A.D.
1602, May 30. The Dutch land in Ceylon.
1609. The Dutch conclude a treaty with the native rulers.
1612. The Dutch erect a fort at Cotta, thereby provoking a war with the Portuguese, in which the former are aided by the native rulers.
1630, Aug. The Portuguese are defeated with great slaughter.
1638. The Portuguese are again defeated by the Kandyans, who erect a pyramid of the skulls of the vanquished.
1656. Hostilities commence between the natives and the Dutch, who contrive to maintain their footing.
1664. Trade is restored and carried on with great spirit.
1763. Friendly relations are established between the British and the Kandyans. Intercourse is broken off on account of the indifference of the English Government.
1795, Aug. 26. The British take Trincomalee (*q. v.*).—Oct. 1. The whole island is reduced to subjection.
1796, Feb. 15. The Dutch, by the treaty of Colombo, cede all their fortified stations in Ceylon to the British.
1802. War commences between the British and the natives.
1803, June 24. A massacre of the English takes place at Kandy.
1815, Jan. 10. The British proclaim war at Colombo.—March 2. The king is deposed and his territories are ceded to the English crown by a treaty signed at Kandy.
1817. A rebellion breaks out.
1818. Order is restored. The first English church is erected.
1820. Sir Edward Barnes becomes governor. Under his jurisdiction a military road is made into the interior of the island.
1845. The bishopric of Colombo is founded.
1850, Aug. 1. News of the resignation of Lord Torrington, the governor, is received in England.
1851, May 29. The House of Commons rejects a series of resolutions condemnatory of Lord Torrington's government.
1865, March 31. Sir Hercules Robinson is sworn in as governor.

CEZIMBRA (Battle).—Alphonso Henriques defeated the Moors at this town of Portugal in 1165.

CHÆRONEA (Greece).—This town was situated on the river Cephisus, in Boeotia. There was another town at no great distance from it named Coronea, and battles fought in the neighbourhood of these places are sometimes mentioned under one and sometimes under the other name. Philip II. defeated the united Athenian and Boeotian forces near Charonea, Aug. 7, B.C. 338; and here Sylla defeated the generals of Mithridates VI. B.C. 86. Plutarch was born at this place A.D. 46.

CHAIN BRIDGE.—Suspension-bridges of five parallel chains, on which a light bamboo flooring is laid, have been long used in China, though they were not introduced into Europe till 1741, when one of very primitive construction was built across the Tees, in England. Finlay commenced the erection of a bridge of this kind in America in 1796, and took out a patent for their construction in 1801. Little progress was made, however, till 1814, when Telford commenced his experiments on the tenacity of iron. Capt. Brown patented his invention of bar-chain bridges in 1817, and completed the first structure of the kind, across the Tweed, in July, 1820. The act for erecting the Menai Bridge was passed in July, 1819; and the bridge was opened Jan. 30, 1826. (*See* SUSPENSION BRIDGES.)

CHAIN CABLE.—Cæsar (Bell. Gal. iii. 13) relates that when he was in Gaul, B.C. 57, the Veneti, who inhabited the coast of Britanny, used iron chains instead of ropes for their

anchors. In 1771, M. Bougainville suggested the idea of substituting iron for hemp; and in 1808 Mr. Slater, a surgeon in the navy, took out a patent for a chain cable. The chain cable was introduced into the royal navy in 1812.

CHAIN-SHOT.—This invention, of two iron balls linked together by a chain eight or ten inches long, was made by John de Witt, in 1666.

CHAINS.—(*See* HANGING IN CHAINS.)

CHALCEDON (Bithynia) was founded directly opposite Byzantium, by a colony from Megara, B.C. 684. Darius captured it B.C. 505, and it came into the possession of the Romans B.C. 74. It was plundered by the Goths A.D. 259. Chosroes II. captured it after a long siege in 616. Chalcedon was repeatedly ravaged by the barbarians, and the Turks employed the materials of the ancient city for their mosques and other edifices in Constantinople. It was made a bishopric in the 4th century. The fourth general council assembled at Chalcedon Oct. 8, 451, and above 600 bishops were present. It held its last session Nov. 1.

CHALCIS (Greece), the capital of the island of Eubœa, was, according to tradition, founded before the Trojan war, and is mentioned by Homer. It became the seat of an Ionic colony, and flourished greatly. The Athenians landed here and defeated the Chalcidians B.C. 506; when Chalcis fell under their yoke. The people rebelled several times and became independent B.C. 411, but they were again subdued by the Athenians. After various vicissitudes, it passed under the rule of Macedon, and was unsuccessfully assailed by the Romans B.C. 207. Maximus destroyed the ancient city B.C. 146. (*See* NEGROPONT.)

CHALCOGRAPHY.—(*See* ENGRAVING ON COPPER.)

CHALDÆA (Asia).—The boundaries of this, in point of time the first monarchy of the ancient eastern world, were, according to Rawlinson 'Ancient Monarchies, i. 4', "the Persian Gulf on the south, the Tigris on the east, the Arabian desert on the west, and the limit between Upper and Lower Mesopotamia on the north." "These," he adds, "were never greatly exceeded, and never much infringed upon, . . . though the northern only is invariable." The same author (i. 31) enumerates the following as the chief cities during the Chaldæan period:—"Babylon, Ur or Hur, Larrak or Larsa, Erech or Huruk, Calneh or Nopher, Sippara, Duraba, Chilmad, and the places now called Abu Shahrein, and Tel Sifr." "The capital of the whole region was at first Ur or Hur, but afterwards became Nipur, and finally Babel or Babylon." "Ur, the first capital," he believes to have been "a great maritime emporium; and if so it can scarcely be doubted that to commerce and trade, at the least in part, the early development of Chaldæan greatness was owing." The original inhabitants, who were subdued at an early period by Median and Turanian invaders, subsequently gave place to the Cushite or Ethiopian descendants of "Nimrod, the mighty hunter before the Lord," the beginning of whose kingdom was "Babel, and Erech, and Accad, and Calneh, in the land of Shinar" (Gen. x. 9, 10), and who is the founder of the kingdom of Chaldæa, and the first of its historic characters. Smith 'Hist. of the World, vol. i. ch. ix.' terms it the Old Babylonian or Chaldæan monarchy. Chaldæa, in a more restricted sense, was a province of Babylon.

B.C.

2458. Chaldæa is conquered by the Burburs, a Turanian people of Armenia, supposed to be identical with the Zoroastrian Medes mentioned by Berosus as early occupants of the country.

2234. Commencement of the series of Chaldæan astronomical observations, recorded upon tablets of baked clay, and supposed by Rawlinson to have originated in some great national event occurring this year, probably the foundation of the kingdom by Nimrod.

2093—2070. Reign of Urukh or Urkham, the great Chaldæan architect, many of whose buildings still exist, bearing his name. He is regarded as identical with Orchamus, mentioned in Ovid's "Metamorphoses" as the seventh king in succession from Belus.

1976. Supposed accession of Kudur-Lagamer, a Susianian conqueror of Chaldæa, regarded by Rawlinson (i. 219) as the Chedorlaomer of Scriptures (Gen. xiv. 1—7), and "the forerunner and prototype of all those great Oriental conquerors who from time to time have built up vast empires in Asia, out of heterogeneous materials, which have in a longer or shorter space successively crumbled to decay."

1850. Reign of Ismi-dagon, who extends his empire into the upper part of the Mesopotamian valley, especially into Assyria (*q. v.*), which he governs by viceroys.

1500. The Chaldæans are subdued by the Arabians, who establish a dynasty, change the languages, and entirely destroy the ancient characteristics of the nation.

CHALEB, or CHALYBON (Syria).—Of this ancient town little is known. Aleppo (*q. v.*), which occupies the site, was named Berœa about B.C. 209, and resumed its ancient name of Chaleb or Chalybon when captured by the Arabs A.D. 638.

CHALGROVE (Battle).—On this plain, in Oxfordshire, an encounter occurred between the Royalists, commanded by Prince Rupert, and the Parliamentary forces, June 18, 1643. The latter were defeated, with a loss of 200 prisoners. In this action John Hampden received a wound which caused his death, June 24. The Hampden Memorial, erected on the field of battle, was inaugurated June 19, 1843.

CHALONS-SUR-MARNE (France), the ancient Catelauni, where Aurelian defeated Tetricus, A.D. 272 or 273; Jovinus overcame the Alemanni in 368; and Aëtius and his allies defeated Attila and the Huns in 451. Chalons was made a bishopric at an early period, and a council was held here in 813. Its cathedral was founded in 450, and having suffered greatly from fire, was rebuilt in 1672. This place must not be confounded with Chalons-sur-Saône.

CHALONS-SUR-SAÔNE (France) occupies the site of the ancient Cabillonum, or Caballinum. A council was held here in 649. In 968 it was the capital of a county, united to Burgundy in 1267.

CHALUS (France).—Richard I. (Cœur de Lion) was wounded by an arrow, March 26, 1199, whilst reconnoitring this castle, which belonged to the Viscount of Limoges, who had refused to surrender some treasure which he had found. Richard I. lingered 12 days, expiring April 6.

CHAMBERLAIN. — (*See* LORD CHAMBERLAIN OF THE HOUSEHOLD, and LORD GREAT CHAMBERLAIN.)

CHAMBERS OF AGRICULTURE, for the promotion of agriculture, formed in many parts of France, were placed on nearly the same footing as Chambers of Commerce by a law passed March 20, 1851. Their privileges were abridged by another law passed March 25, 1852.

CHAMBERSBURG (Pennsylvania) was occupied by Gen. Stuart, with 2,500 Confederate cavalry, who burned the government storehouses, &c., Friday, Oct. 10, 1862. It was occupied by Gen. Ewell Jan. 23, 1863, and was burned by southern soldiers July 30, 1864.

CHAMBERS OF COMMERCE. — The first institution of this kind was formed at Marseilles early in the 15th century, and after various changes it was established on a permanent footing in 1650. A chamber of commerce was opened at Dunkirk in 1700, and during the 18th century similar institutions were established in the principal commercial towns of France. They were suppressed in 1791, restored in 1802, and have since been extended and organized. A chamber of commerce was established at Glasgow in 1783, at Edinburgh in 1785, at Manchester in 1820, and at Hull in 1837. They have been introduced into several of our important commercial centres.

CHAMBERY (Savoy), the chief town of the ancient duchy, came into the possession of the French in 1690, but was restored to the Duke of Savoy by the treaty of Utrecht in 1713. The French republicans took the town in Sep., 1792, and a Jacobin club, consisting of 1,200 members, was immediately formed. Chambery, with the whole of Savoy, was annexed to France Nov. 27, 1792. The Austrians took possession of Chambery in 1814, but were soon after expelled by the French. Chambery was restored to the house of Savoy in 1815. Sardinia ceded it to France by a treaty signed March 24, 1860, and a detachment of French troops entered the town March 28. The theatre and town-hall were destroyed by fire Feb. 13, 1864.

CHAMBORD (France).—This Gothic castle, which gives the title of count to the last descendant of the elder branch of the Bourbons, was founded by Francis I. in 1526, and completed by Louis XIV. It is in the department of Loire-and-Cher, and about 12 miles from Blois. The treaty between Henry II. of France, and Maurice, Duke of Saxony, was ratified at Chambord Jan. 15, 1552.

CHAMBRE ARDENTE. — (*See* FIERY CHAMBER.)

CHAMPAGNE (France).—This old province, wrested from the Romans about A.D. 486, was long ruled by its own counts, and was annexed to Navarre in 1234. Philip IV., by his marriage, Aug. 16, 1284, with Jeanne, heiress of Navarre, Champagne, and Brie, united it to France, with which kingdom it was formally incorporated in 1316.

CHAMPAGNE WINE. — Until the commencement of the 18th century, the effervescent tendency of this wine was regarded as a defect, and as late as 1780 an Epernay wine-merchant excited astonishment by his enterprise in producing from 5,000 to 6,000 bottles of sparkling champagne. In 1787 the firm of Moet prepared 50,000 bottles. As a proof of the immense development that has ensued in the production of this class of wine, it may be stated that the cellars of the celebrated champagne house, Piper and Co. of Rheims, erected at a cost of £60,000, contained, as the produce of the single year 1865, 7,300 casks, or 1,752,000 bottles. For the preparation of these wines, when ready for bottling, were 75 casks, each holding 4,000 bottles, 12 large vats, called Apostles, each holding 9,000 bottles, and two enormous casks, each holding 25,000 bottles; so that this firm can prepare and bottle a *cuvée* of 1,000,000 bottles at one time. The annual returns of the champagne trade, which exhibited a total of 9,213,390 bottles as the produce of the year ending April, 1845, had increased to a total of 18,471,618 bottles for the year ending April, 1864.

CHAMPARTY, or CHAMPERTY. — This was a bargain between the plaintiff or defendant in a suit with a third party, generally a lawyer, whereby the latter was to divide the land or matter sued for in case of success, and was to carry on the action at his own expense. Though prohibited in 1275, by 3 Edw. I. c. 25, it was still practised, as the acts 13 Edw. I. c. 49 (1285), 28 Edw. I. c. 11 (1300), 7 Rich. II. c. 15 (1383), and 32 Hen. VIII. c. 9 (1540), are all directed towards its suppression.

CHAMP DE MARS (Paris).—In this celebrated area, used by the garrison of Paris for military exercises, the Fête de la Fédération was held on the anniversary of the taking of the Bastille, July 14, 1790. Deputies from the provinces and the Parisians assembled in great numbers. Talleyrand, Bishop of Autun, performed a solemn mass. Louis XVI. and all the principal authorities took the oath of allegiance to the new constitution framed by the republicans. The leaders of the Jacobin, Cordelier, and other clubs, brought a petition to the Champ de Mars, calling upon the king to abdicate, July 14, 1791; and an effort on their part to create an insurrection was suppressed July 17. Louis XVI. again went in procession to the Champ de Mars to celebrate the taking of the Bastille, July 14, 1792. At a fête held in honour of the Supreme Being, June 7, 1794, the people marched in procession to this spot. Napoleon I. distributed eagles to his army on the Champ de Mars the day after his coronation, Dec. 3, 1804. It has since been the scene of many grand commemorations and festivals, and here Napoleon III. distributed eagles to the army, May 10, 1852.

CHAMPION OF THE KING. — Taylor, in "The Glory of Regality," terms this "the most perfect, perhaps, and most striking relic of feudalism that has come down to us from the ages of chivalry." The office of champion existed under the Norman kings, and was originally held by the family of Marmion. It is supposed that they held the barony of Fontney, in Normandy, by the service of being hereditary champions to the dukes of that province, and that William I. granted the castle of Tamworth and the manor of Scri-

velsby, in Lincolnshire, to William of Marmion, one of his followers, on the same tenure. Philip, the last lord of Marmion, died without male issue in 1292, when the castle of Tamworth passed by his elder daughter and co-heir to the family of Frevile, and the manor of Scrivelsby, with a younger daughter, to Sir Thomas Ludlow, from whom they descended to the family of Dymoke. This led to a contest; the championship, at the coronation of Richard II., July 16, 1377, having been claimed by Sir John Dymoke, as possessor of Scrivelsby, and by Sir Baldwin de Frevile, as lord of Tamworth. It was then decided that the office was attached to the manor of Scrivelsby, and it continued in the family of Dymoke. The last appearance of the champion was at the coronation banquet of George IV., July 19, 1821. Taylor says: "The duty of the champion is to ride into the hall where the feast of coronation is held, during dinner, (before the second course is brought in,) mounted on one of the king's coursers, and clad in one of the king's best suits of armour; he is attended by the lord high constable and the earl marshal, and by the mouth of a herald is to proclaim a challenge to any who shall deny that the king is lawful sovereign; which being done, the king drinks to him from a gold cup, which, with its cover, he receives as his fee, and also the horse, saddle, suit of armour, and furniture thereto belonging." This officer has been sometimes erroneously styled Champion of England.

CHAMPION'S HILL, or BAKER'S CREEK (Battle).—After a contest of several hours, the Confederates were driven from their position at this place in Mississippi by Gen. Hovey's division of Grant's army, May 16, 1863.

CHAMPLAIN LAKE (United States).—The English defeated an American squadron on this lake Oct. 11–13, 1776. The Americans escaped during the night Oct. 11. The English went in pursuit, and captured and destroyed most of the flotilla. The Americans, in much superior force, overpowered an English squadron in these waters, Sep. 11, 1814. The want of support from the land forces contributed to this result.

CHANCEL.—This part of the church was separated from the rest of the building by rails of wood, curiously and artificially wrought in the form of net-work, called *cancelli*. Hence the origin of the term chancel. The thrones of the bishop and of his presbyters were in early times fixed in the apse in the upper chancel. In 1641 the Long Parliament resolved that the chancels should be levelled.

CHANCELLOR.—(*See* LORD HIGH CHANCELLOR.)

CHANCELLOR OF THE EXCHEQUER.—(*See* EXCHEQUER.)

CHANCELLORSVILLE (Battle).—Gen. Hooker having crossed with the army of the Potomac from the north to the south bank of the Rappahannock, April 29, 1863, took up his position at Chancellorsville, a large house near Fredericksburg, Virginia, Thursday, April 30. Here he received a furious flank attack from Gen. "Stonewall" Jackson, May 2, which put Gen. Schurz's division to flight, and spread consternation through the Federal ranks. Gen. Lee renewed the battle Sunday, May 3, and compelled Gen. Hooker to retreat. Gen. Sedgwick, having meanwhile occupied the heights above Fredericksburg with 30,000 men, was dislodged by Lee, May 4, and, with Hooker, compelled to recross the river, the passage of which was completed Wednesday, May 6. Gen. Hooker's official statement admitted a loss of 11,030 in killed and wounded. The prisoners were estimated by the victors at 8,000. The Confederate casualties were much less severe, but the victory was dearly purchased, with the loss of Gen. Jackson, who was mistaken for a Federal, and wounded by his own men, while returning from the battle of May 2. After undergoing amputation of the left arm he died May 10. (*See* STONEWALL BRIGADE.) This battle is sometimes referred to as the second battle of Fredericksburg (*q. v.*).

CHANCERY (Court of).—The rise of the power of this, the highest court of judicature in the kingdom, is thus described by Hallam (Eng. i. ch. vi. p. 344): "The equitable jurisdiction, as it is called, of the Court of Chancery appears to have been derived from that extensive judicial power which, in early times, the king's ordinary council had exercised. The chancellor, as one of the highest officers of state, took a great share in the council's business; and, when it was not sitting, he had a court of his own, with jurisdiction in many important matters, out of which process to compel appearance of parties might at any time emanate. It is not unlikely, therefore, that redress, in matters beyond the legal province of the chancellor, was occasionally given through the paramount authority of this court. We find the council and the chancery named together in many remonstrances of the Commons against this interference with private rights, from the time of Richard II. to that of Henry VI. It was probably in the former reign that the chancellor began to establish systematically his peculiar restraining jurisdiction." The famous Berkeley suit, which lasted 190 years, commenced soon after the death of the fourth Baron Berkeley, in 1416, and terminated in 1609. It arose out of the marriage of the fourth Baron Berkeley's only daughter and heiress, Elizabeth, with Richard Beauchamp, Earl of Warwick. The castle and heirship of Berkeley was the object of the suit. The abolition of the Court of Chancery was voted by Barebone's Parliament, in 1653. The Court of Chancery was entirely remodelled and its practice amended by 15 & 16 Vict. cc. 86 & 87 (July 1, 1852); 16 & 17 Vict. c. 98 (Aug. 20, 1853); and 21 & 22 Vict. c. 27 (July 23, 1858).

CHANDERNAGORE (Hindostan).—The French established a factory at this place on the Hooghley, above Calcutta, in 1676. They fortified it soon after, and it was for some years a formidable rival to Calcutta. Clive took it March 23, 1757, and it was restored to France, by the 11th article of the treaty of Paris, Feb. 10, 1763. The English captured it again in July, 1778, and restored it to France at the end of the war, by the 13th article of the treaty of Versailles, Sep. 3, 1783. It was taken again at the outbreak of war between France and Eng-

land in 1793; relinquished by the third article of the treaty of Amiens, March 25, 1802; recaptured in 1803, and restored by the eighth article of the treaty of Paris, May 30, 1814.

CHANDORE (Hindostan).—This fortified town surrendered to the English in 1804, was restored to Holkar, and finally ceded to the East India Company by the treaty of Mundisore, in 1818.

CHANDOS CLAUSE.—This name was given to the 20th clause of the Reform Bill (2 Will. IV. c. 45, June 7, 1832), which gave the right of voting to the occupiers of lands or tenements of a rent of not less than £50 per annum. It had been moved as an amendment in committee of the Reform Bill of 1831, by the Marquis of Chandos, afterwards Duke of Buckingham, and was carried against the government by a majority of 84, Aug. 18, 1831. Ministers incorporated it in their measure, and although that Reform Bill was rejected by the House of Lords, the clause was introduced in the bill of 1832, and was carried, on a division, by a majority of 240.

CHANNEL ISLANDS (English Channel).—These islands, situated within a few miles of the coast of France, came into the possession of England as a portion of the duchy of Normandy, during the reign of Henry I. Queen Victoria and Prince Albert visited these islands in Aug., 1859. (*See* ALDERNEY, GUERNSEY, JERSEY, and SARK.)

CHANTING is supposed to owe its origin to the want of power in the voice for making itself heard in the large open buildings and amphitheatres of the ancients. It was first introduced into Christian worship between 347 and 356. St. Ambrose brought it from the Greeks to Milan, whence it passed to Rome, France, &c. (*See* AMBROSIAN CHANT.)

CHANTRY.—Hallam (Eng. i. ch. ii. p. 94) remarks:—"There was a sort of endowed colleges or fraternities, called chantries, consisting of secular priests, whose duty was to say daily masses for the founders." The English chantries, amounting to 2,374 in number, were suppressed at the Reformation by 37 Hen. VIII. c. 4 (Dec. 15, 1545), and by 1 Edw. VI. c. 14 (1547). They generally consisted only of a little chapel or altar placed in a church. Here the priests offered daily prayers for the soul of the founder, and for the souls of the deceased members of the family.

CHAOS, or BIRD ISLANDS (Algoa Bay), were discovered in the 15th century. Bartholomew Diaz was wrecked on one of the group May 29, 1500.

CHAP BOOKS.—Tracts, or little books printed for chapmen, or pedlars, and sold by them about the country in the 16th and 17th centuries, formed the popular literature of those times. The typography and paper were of an inferior kind. Ballads, songs, legends, biographies, tales of wonder, and theological tracts, were circulated in this manner. Penny chap books appeared at a later period.

CHAPEL.—In olden times the French kings always took with them St. Martin's hood when they went forth to war, and the place where it was watched over by an attendant priest was called *capella*. The word is a diminutive from *capsa*, which signifies a chest or coffer, where the relics of saints were kept. Hence the origin of the application of the word chapel to private oratories. Several kinds of chapels exist now; such as parochial chapels, chapels of ease, chapels of colleges, and private chapels. The places of worship used by dissenters generally bear this designation. Chapels were formerly built upon bridges, which the priests were bound to keep in repair from the benefactions received. Such a chapel existed on old London Bridge.

CHAPEL (Knights of).—(*See* POOR KNIGHTS OF WINDSOR.)

CHAPLAIN.—By 21 Hen. VIII. c. 13, §§ 14, 15, 16, 17, 18, 19, and 24 (1529), the number of chaplains allotted to various dignitaries was as follows:—Archbishop, 8; baron, 3; baroness, 2; bishop, 6; chancellor, 3; chief justice, 1; comptroller of the household, 2; countess, 2; dean of the chapel royal, 2; duchess, 2; duke, 6; earl, 5; king's almoner, 2; king's secretary, 2; knight of the garter, 3; marchioness, 2; marquis, 5; master of the rolls, 2; treasurer, 2; viscount, 4; warden of the cinque ports, 1. Army chaplains were appointed in early times, and the system was remodelled in 1796. Naval chaplains were first appointed in 1626.

CHAPTER.—The canons in the cathedral or conventual churches began to form what was called a chapter in the 8th century. This was a kind of council for the bishop. Chapter-houses built for these meetings were generally contiguous to the cathedral.

CHAPTER COFFEE-HOUSE CLUB.—(*See* WITENAGEMOT.)

CHARADE.—Disraeli (Curiosities of Literature) says:—"The charade is of recent birth, and I cannot discover the origin of this species of logogriphes. It was not known in France so late as 1771; in the great Dictionnaire de Trévoux, the term appears only as the name of an Indian sect of a military character." A new species of charade, of a dramatic character, called the Acting Charade, has of late years become popular. The word charade is said to be taken from the name of the inventor.

CHARING CROSS (London).—Edward I. erected a marble cross, adorned with divers figures, in memory of Queen Eleanor, at every station where her body rested on its way from Herdeley, in Lincolnshire, where she died, Nov. 28, 1290, to Westminster. According to some authorities the crosses were erected by her executors. The last resting-place was the village of Charing, where a cross was erected in 1291, and from this the name is derived. This cross was destroyed by the Long Parliament in 1641. The equestrian statue of Charles I. was cast in bronze by Le Seur, in 1633, by order of Thomas Howard, Earl of Arundel. The Long Parliament ordered it to be broken up after the execution of the king. John River, a brazier, purchased it, concealed it in his garden, in Holborn, and, at the Restoration, presented it to Charles II., who ordered it to be erected upon a pedestal at Charing Cross. The hospital was instituted in 1818. The Charing Cross station of the South Eastern Railway was opened for traffic Jan. 11, 1864. The old cross was restored by the Company in 1865.

CHARIOT.—This kind of vehicle is frequently mentioned in Scripture, as well as in the works of the ancient poets and historians. The Greeks attributed the invention to Minerva; Virgil to Erichthonius, a mythical king of Athens; and Pliny states that four-wheeled carriages were invented by the Phrygians. (*See* WAR CHARIOT.)

CHARIOT RACES.—Said to have originated in Persia, where they formed part of the Mithraic festivals held in honour of the sun, appear to have been afterwards introduced among the Jews, as it is written (2 Kings, xxiii. 11) that Josiah "took away the horses that the Kings of Judah had given to the sun," and that he "burned the chariots of the sun with fire," B.C. 624. They were also common among the Greeks, who practised them at the Olympic games (*q. v.*); and in the time of Pompey, who died Sep. 29, B.C. 48, they were introduced at Rome, where they speedily became a favourite amusement. Nero (A.D. 54—68) is stated to have driven as many as 10 horses abreast at the Olympic games.

CHARITABLE BEQUESTS were placed under the care of commissioners appointed to inquire into the misemployment of property bequeathed or otherwise devoted to charitable purposes by the Statute of Charitable Uses, 43 Eliz. c. 4, s. 1 (1601). The Irish act, 4 Geo. III. c. 18 (1764), orders that a return of all such property bequeathed in Ireland be handed in to the bishop of the diocese or the Archbishop of Armagh. This having been found ineffectual to secure the proper application of such bequests, the Roman Catholic Bequests Act, 7 & 8 Vict. c. 97 (Aug. 9, 1844), laid down more stringent regulations. The Charitable Trusts Act, 16 & 17 Vict. c. 137 (Aug. 20, 1853), instituted a board empowered to inquire into the condition and management of charities, to examine accounts, to hear witnesses, and to report their proceedings annually to Parliament. This act was amended by 18 & 19 Vict. c. 124 (Aug. 14, 1855), and certain charities were temporarily exempted from its operations by 20 & 21 Vict. c. 76 (Aug. 25, 1857). Further regulations for the conveyance of land for charitable uses were made by 24 Vict. c. 9 (May 17, 1861).

CHARITABLE INSTITUTIONS.—According to the report of the commissioners appointed to investigate this subject, the following are the oldest charitable institutions in England: St. Bartholomew, Guildford, founded in 1078; Cirencester, in 1100; Ripon, in 1109; St. Bartholomew, London, in 1122; in Northampton, in 1138; and St. Katherine, London, in 1148. (*See* ALMS-HOUSES.)

CHARITY (Brothers of).—This religious order, established at Seville by John di Dio in 1540, received the papal sanction in 1572, and was invested with all the privileges of the mendicant orders in 1624. They attend the sick, and were introduced into France in 1601. (*See* SISTERS OF CHARITY.)

CHARITY SCHOOLS.—The sixth general council, held at Constantinople 680–81, by one of its canons ordered charity schools to be established in connection with country churches; and further regulations were, from time to time, issued on the same subject. William Blake, a woollen draper of Covent Garden, about the year 1685 is said to have projected the first charity school in England, and to have purchased Dorchester House, Highgate, for that purpose. Franck, a German divine, laboured for the same object at Glaucha, in 1698. Another, which claims to be the first, was established in London in 1693, and the movement was prosecuted with zeal in 1698. The trustees of the then existing schools formed themselves into a voluntary association in 1700.

CHARLEROI (Belgium).—A fortress was erected in 1666, by Rodrigo, Spanish governor of the Low Countries, who named it in honour of Charles II. of Spain. By the peace of Aix-la-Chapelle (May 12, 1668), it was ceded to the French. The Prince of Orange besieged it in 1672, but was obliged to raise the siege. Louis XIV. of France added the lower and middle town in 1676. In 1677 the Prince of Orange again made an unsuccessful effort to take the town, which was restored to Spain by the treaty of Nimeguen, Sep. 17, 1678. In 1690 it was again taken by the French, and again restored to Spain by the peace of Ryswick, Sep. 20, 1697. The French captured it Aug. 2, 1746, Nov. 12, 1792, and June 26, 1794. In 1795 the walls were destroyed, but they were rebuilt in 1816, by order of the Duke of Wellington. The railroad from Charleroi to Paris was completed in 1856.

CHARLESTON (Battle).—The Confederates, under Gens. Longstreet, Hill, and Huger, foiled in an attack upon the Federal batteries at this place in Virginia, were afterwards rallied by Gen. Hill, and gained a complete victory, June 30, 1862.

CHARLES THE FIRST, the second son of James I. of England and Anne of Denmark, was born at Dunfermline, Nov. 19, 1600. He ascended the English throne March 27, 1625, and married Henrietta Maria of France, June 13 in the same year. They had three sons and four daughters; the eldest ascended the throne as Charles II. (*q. v.*), and the third child and second son succeeded his brother as James II. (*q. v.*). Their eldest daughter, Mary, was born Nov. 4, 1631. She married Prince William of Nassau, and died Dec. 24, 1660. Their fourth child, Elizabeth, was born Dec. 28, 1635, and died Sep. 8, 1650. Their fifth child, Anne, born in 1637, died young. Their sixth child, Henry, born July 8, 1640, died Sep. 13, 1660; and their seventh child, Henrietta Maria, born June 16, 1644, married Philip, Duke of Anjou, and died June 30, 1670. Charles the First was seized at Holmby House June 4, 1647, and taken to Childersley, near Cambridge, whence he was removed to Hampton Court. He made his escape Nov. 12, and was confined in Carisbrook Castle, Isle of Wight, Nov. 14. After the Newport conferences Charles I. was imprisoned in Hurst Castle Nov. 30, 1648, removed to St. James's Dec. 18, to Windsor Dec. 22, and brought back to Whitehall Jan. 19, 1649. His trial lasted three days, Jan. 20, 22, and 23; he was sentenced to death Jan. 27, and beheaded at Whitehall Jan. 30, 1649, and buried at Windsor Feb. 8.

CHARLES THE SECOND, the eldest son of

Charles I. and Henrietta Maria, was born at St. James's, May 29, 1630. He succeeded to the throne, *de jure*, on the death of his father, Jan. 30, 1649, but did not become king *de facto* until May 29, 1660. He married Catherine of Portugal, May 20, 1662. Charles II., who left no legitimate issue, died Feb. 6, 1685, and was buried at Westminster Feb. 14.

CHARLESTON (United States).—The inhabitants of old Charlestown (*q. v.*), preferring the situation of Oyster Point, at the confluence of the Ashley and Cooper, removed thither in 1680, and founded a town to which they gave the name of their former settlement. It was immediately attacked by the Westoe Indians, with whom peace was concluded the following year. The first English church was erected in 1681. In 1690 it received a colony of French Protestant refugees, and in 1700 it was nearly destroyed by a hurricane and fire, which were succeeded by a frightful pestilence. In 1706 it was attacked by the Spanish and French, who were repulsed and defeated. A furious hurricane, in Aug., 1728, occasioned an inundation, which did considerable injury to the town, and a visitation of the yellow fever in the same year carried off multitudes of the inhabitants. In 1740 and 1778 great damage was caused by fires. The garrison at Sullivan's Island under Col. Moultrie repulsed a British squadron, June 28, 1776, but after a siege of some months the town was surrendered by Gen. Lincoln to Sir H. Clinton May 12, 1780. It was held by them till Dec. 14, 1782, when it was evacuated. In 1783 it was incorporated by the name of the city of Charleston by the legislature of S. Carolina, and in 1787 the seat of state government was removed to Columbia (*q. v.*). In 1796 about a third of the city was burned, and another fire effected destruction to the value of $5,000,000, April 27, 1838. A negro conspiracy was discovered and suppressed here in June, 1822. The college was founded in 1785, the Medical College instituted and the Charleston and Hamburg Railway completed in 1835, and the high school established in 1839. The civil war commenced here at half-past four o'clock on the morning of Friday, April 12, 1861, with the bombardment by the Confederate Gen. Beauregard of Fort Sumter, which was surrendered by Major Anderson, Sunday, April 14. Later in the year Charleston was strictly blockaded by the Federals, who sank 17 vessels laden with stone at the entrance of the harbour Dec. 21. An engagement between the Federal and Confederate fleets resulted in the retirement of the former Jan. 31, 1863. Gen. Beauregard declared the blockade raised, a statement denied by Admiral Dupont Feb. 10. A naval attack on Fort Sumter and the other defences, begun April 7, was abandoned April 12, in consequence of the tremendous fire of the Confederates. Operations by sea and land were, however, commenced by Gen. Gillmore, who occupied Folly Island July 3, and seized the southern part of Morris Island July 10. Repulsed in an assault upon Fort Wagner July 11, he renewed the attack, with the assistance of the fleet, July 18, and sustained a second defeat, with a loss of 1,530 killed and wounded. Having advanced his works to within 420 yards of Fort Wagner, Aug. 13, he opened fire on Fort Sumter Aug. 15, and after completing his batteries commenced a regular bombardment Aug. 17. A demand for the surrender of this stronghold being refused Aug. 21, he commenced shelling the city Aug. 22. Morris Island, on which were Fort Wagner and Battery Gregg, was evacuated Sep. 7, but an attempt made the same day to carry Fort Sumter by storm was defeated with a loss of 80 men. The siege continued till Feb. 17, 1865, when Charleston was evacuated by the Confederate Gen. Hardee, who was succeeded, Feb. 18, by the Federals under Gen. Gillmore.

CHARLESTOWN (Massachusetts), founded at Mishawum in June, 1629, was burned by the British in the early part of the battle of Bunker's Hill (*q. v.*), June 17, 1775. A monument in commemoration of the battle, of which the first stone was laid by the Marquis La Fayette June 17, 1825, was inaugurated June 17, 1843. The navy yard was established about 1798, and the dry-dock completed in 1833. Charlestown was incorporated a city in 1847.

CHARLESTOWN (S. Carolina), called Old Charlestown, was founded on the banks of the Ashley by Governor Sayle in 1670, and named Charles Town in honour of King Charles II. In 1680 its inhabitants removed to Oyster Point, where they erected a new town. (*See* CHARLESTON.) The original site formed in 1802 part of a plantation known as Old Town, though no traces of the first settlement then existed.

CHARLOIS (Holland).—At this village, in 1512, a religious procession having attempted, in spite of the prohibition of the authorities, to cross the Maas on the ice, 8,000 persons were thrown into the water.

CHARMOUTH (Battles).—Egbert is defeated by the Danes at Carrum, supposed to be this place, in Dorsetshire, in 833. The invaders had disembarked from 35 ships. His successor, Ethelwulph, was defeated by the Danes at this place in 840.

CHARTER.—"Nearly all the nations," says Sir Harris Nicolas, "which established themselves upon the ruins of the Roman empire, gave to their charters the form of epistles, in imitation of the Romans." The most ancient Anglo-Saxon charters extant are of the 7th century. It is believed that the earliest known is of the time of Ethelbert, King of Kent, and was granted in full council April 29, 619. The charters of the Anglo-Saxon monarchs were generally in Latin. Public liberties were secured by the early charters. They were renewed and confirmed so frequently, that between the reign of Edward I. and Henry IV. Sir Edward Coke reckons 32. These were termed royal charters. A calendar of the Charter Rolls in the Tower, extending from 1199 to 1483, which contain grants of privileges to cities, corporations, guilds, religious houses, and individuals, has been published by the government. Charters were frequently forged.

CHARTER-HOUSE (London).—This is a corruption of Chartreuse, the name given to a house of Carthusian monks, established by Sir Walter Manny in 1371. Before that time the site had been used as a burying place for

the poor. Its last prior was hanged and quartered for denying the king's supremacy, May 3, 1535. After the suppression of the monasteries by Henry VIII., it was purchased by Thomas Sutton, whom Stow calls "the right Phœnix of charity in our times," from the Earl of Suffolk, in 1611, to be converted into an hospital, "consisting of a master, governor, a preacher, a free school, with a master and usher, eighty poor people, and forty scholars." The benevolent founder died Dec. 12, 1611, before his work was completed; but he had provided amply for the endowment, and the hospital was opened Oct. 3, 1614. An attempt having been made by one of Mr. Sutton's relatives to obtain possession of the property, the foundation was confirmed by 3 Charles I. c. 1 (1627). Sutton's tomb, which is in the chapel, was opened in 1842.

CHARTER-PARTY.—Agreements between merchants and seamen respecting their ships and cargoes, were regulated by the law of Rhodes as early as B.C. 916. The Scottish parliament passed several acts for their regulation in 1467, which were ratified in 1487.

CHARTISTS.—The first demonstration, on a large scale, made by the political agitators called Chartists, because they clamoured for what they termed the six points of the People's Charter, was held in the open air at Birmingham, Aug. 6, 1838. The six points were, 1. Universal suffrage; 2. Vote by ballot; 3. Paid representatives in Parliament; 4. Equal electoral districts; 5. Abolition of the property qualification for members of Parliament; and 6. Annual parliaments. Large bodies of the Chartists, armed, assembled at night in various parts of the country, and a proclamation was issued declaring all such meetings illegal Dec. 12, 1838. The National Convention elected by Chartists in different parts of the kingdom commenced its sittings at Birmingham in May, 1839. The agitation continued, and an enormous petition, signed, it was said, by 1,200,000 Chartists, was presented to Parliament by Mr. Attwood, June 14, 1839. The Chartists attacked Newport Nov. 4, 1839, and were, after some resistance, dispersed by the troops, the leaders being taken and afterwards tried. Chartist riots occurred in various parts of the kingdom in 1842. Another petition, presented in 1843, was said to contain 3,500,000 signatures. In 1848 Chartist disturbances occurred in various parts of the kingdom, and a meeting was summoned by the Chartist leaders to take place on Kennington Common April 10. They avowed their intention of going in procession to the House of Commons with a petition, which, they boasted, contained above 5,000,000 signatures. Every preparation was made by the authorities to preserve the public peace, 170,000 special constables were organized, and the Duke of Wellington, as commander-in-chief, was at his post. When the Chartists assembled, their leaders were informed by the police that any attempt to pass the bridges in procession would be resisted. The Chartists gave way, and consigned the petition to three cabs for conveyance to the House of Commons. On examination, it appeared that, instead of 5,706,000, only 1,975,400 names were appended to the monster petition, and of these a large number had been fabricated. Prince Albert and the Queen figured amongst the names in the document. The name of the Duke of Wellington was signed 30, and that of Colonel Sibthorp 12 times. This exposure, coupled with the determination evinced by the public to repress agitation, proved fatal to the cause, and from that day Chartism rapidly declined.

CHARTRES (France), the ancient Autricum, was the capital of the Carnutes, from whom it received its modern name. The Northmen ravaged it in 852 and 872. Rollo received a check here in 912. Henry I. of England entertained Innocent II. at Chartres Jan. 13, 1131. It afterwards fell into the power of the English, and was recovered by surprise in 1432. The Huguenots failed in an attack upon it in 1568. Henry IV. seized it in 1591. Having been long ruled by its own counts, it was sold to Philip IV. in 1286, was united to France in 1349, and having been again separated, was purchased in 1623 by Louis XIII. Louis XIV. made it a duchy and bestowed it upon the Duke of Orleans. The cathedral was founded in 1020, and dedicated in 1260. The roof having been destroyed by fire in 1836, a metal one was erected in 1841.

CHARTREUSE (France).—This monastery, called La Grande Chartreuse, was founded near Grenoble, by St. Bruno of Cologne, in 1084. It was several times injured by fire, and the present building dates from about 1676. St. Bruno followed the rule of St. Benedict, with certain modifications. It was called the order of the Chartreux, or the Carthusians. The monks were expelled during the Revolution, but they returned in 1826, and Chartreuse is still the chief monastery of the Carthusians.

CHARTS.—(*See* MAPS.)

CHASIDIM.—On the return of the Jews from the Babylonish captivity, B.C. 536, a code of civil and religious laws was introduced among them by the Persian government, which embodied several innovations on the Mosaic law. Those who adopted these novelties were styled Chasidim or Pietists, while those who refused them called themselves Zadikim, or "upright." The modern sect of the Chasidim was founded in Poland in 1740, by Israel Baalsham, and numbered at his death, in 1760, 40,000 converts. Their ceremonies, remarkable for their wild and noisy character, resemble those of the Jumpers (*q. v.*).

CHASSEURS D'AFRIQUE.—Three regiments of the French army, formed since the conquest of Algeria in 1830, have received this name.

CHASSEURS DE VINCENNES.—A corps of riflemen enrolled about 1835, and stationed at Vincennes, proved so efficient that a whole battalion was organized in 1838. They are also called tirailleurs, or sharpshooters.

CHATHAM (Kent).—Queen Elizabeth established a dockyard at Chatham in the 16th century, a little before the time of the invasion projected by Spain. It was removed to its present site in 1622. The Dutch fleet entered the Medway and destroyed several ships June 12, 1667. The "Chest" for the relief of wounded and superannuated seamen, established at Chatham by Queen Elizabeth, was removed to

Greenwich by 43 Geo. III. c. 119 (July 29, 1803). The school for engineers was established in 1812. Additional fortifications were ordered to be erected by Parliament in 1860. An explosion occurred in one of the workshops Jan. 21., 1861. A revolt of the convicts was suppressed Feb. 9–11, 1861.

CHATHAM (FIRST) ADMINISTRATION.—(*See* NEWCASTLE and PITT ADMINISTRATION.)

CHATHAM (SECOND) ADMINISTRATION.—William Pitt, the elder, created Earl of Chatham July 30, 1766, presided over two administrations, the first formed in 1757, and called the Newcastle and Pitt *q. v.*) administration; and the second, designated after his title, the Chatham administration, formed July 30, 1766, on the dissolution of Lord Rockingham's first cabinet. Lord Chatham's ministry was thus constituted :—

Treasury	Duke of Grafton.
Lord Chancellor	Lord Camden.
President of the Council	Earl of Northington.
Privy Seal	Earl of Chatham, First Minister.
Chancellor of Exchequer	Hon. Charles Townshend.
Principal Secretaries of State	Earl of Shelburne and Gen. Conway. The latter leader of the House of Commons.
Admiralty	Sir Charles Saunders.
Board of Trade	Lord Hillsborough.
Secretary at War	Viscount Barrington.
Ordnance	Marquis of Granby.
Paymaster General	Lord North.

Sir Edward (afterwards Lord) Hawke succeeded Sir Charles Saunders at the Admiralty Dec. 13, and the Hon. Robert (afterwards Lord) Nugent replaced Lord Hillsborough at the Board of Trade Dec. 16, 1766. The Hon. Charles Townshend, who died Sep. 4, 1767, was succeeded by Lord Mansfield Sep. 12. The Earl of Chatham's health rendered him incapable of taking part in public affairs; and towards the end of 1767, the whole power fell into the hands of the Duke of Grafton. Lord North accepted the Chancellorship of the Exchequer Dec. 1. Mr. Thomas Townshend succeeded Lord North as Paymaster General. Lord Chatham finally resigned the privy seal Oct. 14, 1768. (*See* GRAFTON ADMINISTRATION.)

CHATHAM ISLANDS (South Pacific).—Lieut. Broughton discovered these islands Nov. 29, 1791, and named them after H. M. S. *Chatham*, in which he sailed. The group consists of three large and several small islands. A whaling station was established at Otnga by Capt. Richard in 1840.

CHÂTILLON-SUR-SEINE (Congress).—Proposals of peace were made whilst the allied armies were advancing upon Paris in 1814, and Châtillon was fixed upon as the place for the congress, which opened Feb. 4. England sent three plenipotentiaries, Austria, Prussia, Russia, and France each one to the conferences. The allies demanded that France should be restricted to the limits she had attained before the Revolution. Some temporary successes gained in the field induced Napoleon I., Feb. 17, to send instructions to Caulaincourt, the French plenipotentiary, to sign nothing without his orders. Early in March, Caulaincourt announced to Napoleon I. that the allies had determined to break up the conference if the fundamental principle of reducing France to its ancient limits was not accepted. Caulaincourt delivered a counter-project March 15, from which it became evident that Napoleon was not sincere in his desire for peace, and the congress broke up March 18.

CHAT MOSS (Lancashire), supposed to have formed in 669 part of the estate of St. Chad, Bishop of Mercia, was partially reclaimed by Mr. Roscoe of Liverpool, at the end of the 18th and beginning of the 19th century. Operations for bringing it under cultivation were undertaken in 1828. George Stevenson commenced his process for constructing the permanent way of the Manchester and Liverpool Railway across this bog in June, 1826. After difficulties which had worn out the patience of nearly every person connected with the work except himself, a road formed of hurdles, &c., covered with gravel, was floated on the Moss, and the first experimental train passed over it in safety Jan. 1, 1830.

CHATSWORTH (Derbyshire), conferred by William the Conqueror upon his natural son William Peveril, was purchased by Sir William Cavendish, who commenced the erection of the mansion-house in 1570. It became the same year the prison of Mary Queen of Scots, who was also detained here in 1573, 1577, 1578, and 1581. In Dec., 1643, it was taken by the Earl of Newcastle from the Parliamentary leader Sir John Gell. The present building, commenced by the first Duke of Devonshire, April 12, 1687, was surveyed by Sir Christopher Wren in May, 1692. The east front and north-east corner were completed in 1700, and the entire palace in 1706. The great stables were erected in 1706, and a northern wing has been added since 1820.

CHATTANOOGA (Battle).—The Confederate Gen. Bragg was defeated with great loss in prisoners and ammunition at this place in Tennessee by Gens. Sherman and Thomas, Nov. 25, 1863.

CHAUMONT (Treaty).—The insincerity displayed by Napoleon I. during the negotiations at Châtillon-Sur-Seine, induced the great powers whose plenipotentiaries were engaged at that congress, to enter into more solemn obligations for the energetic prosecution of the war, in case France should reject their proposals. With this view, treaties were signed by each of the four powers, England, Austria, Russia, and Prussia, separately with the three others at Chaumont, March 14, 1814. The four treaties were, of course, substantially the same. Each treaty consisted of 17 articles, and provided the number of men to be maintained in the field by each power, and the amount of subsidies to be paid by England. By the second article, each contracting power engaged not to enter into separate negotiations, nor to conclude a separate peace without the consent of the others. The treaty was to remain in force for 20 years, and not to be renewed before the expiration of that period.

CHÉBRÉISSE (Battle).—At this place in Egypt Napoleon I. defeated the Mamelukes July 13, 1798.

CHEDUBA (Bay of Bengal).—This island was taken by the Burmese in the 17th century. The English captured it in May, 1824;

and it was ceded to the East India Company by the third article of the treaty of Yandaboo, Feb. 24, 1826.

CHEESE was known to the Greeks and Romans much earlier than butter, according to Beckmann, who could find no notice of the latter substance in Aristotle (B.C. 384—322), though he frequently mentions cheese. Athenæus (circ. A.D. 200) speaks of a celebrated Achaian cheese. The inhabitants of the island of Cynthus excelled in the preparation of this article of food, which was stamped upon their coins. In the Middle Ages it was made from deer's milk. The Artotyritæ from ἄρτος, bread, and τυρὸς, cheese) offered cheese with their bread in the Eucharist, in the 2nd century. They pretended that the first inhabitants of the world offered, as oblations, the fruits of the earth and of sheep.

CHELMSFORD (Essex).—In the reign of Edward the Confessor this town formed part of the possessions of the bishops of London, but it attained no importance till the time of Henry I., when a stone bridge was erected over the Cann. The ancient parish church was rebuilt in 1424, and the grammar-school was founded by Edward VI. in 1552. The old prison, erected on the system of John Howard, was built in 1777, and the present bridge over the Cann in 1787. Part of the church, which fell in, in June, 1800, has since been restored. In 1805, a line of fortified embankments was erected to defend the approach to London from the threatened French invasion. The new prison was built in 1828, and the large fountain in the market-place was restored in 1841.

CHELSEA (Middlesex).—Some authorities are of opinion that this is the place called Calcuith, at which a council was held July 27, 816, when it was ordained that all bishops should date their acts from the year of the Incarnation. It was designated Chelc-hethe in 1291. Sir Thomas More, who lived there, wrote Chelcith; and as late as 1692 it was called Chelchey. Stow describes it as "a town not large, but graced with good well-built houses." During the 16th and 17th centuries it was a favourite place of residence for noblemen and wealthy persons. Chelsea College, for the study of polemical divinity, was projected, in 1609, by Dr. Matthew Sutcliffe, Dean of Exeter, who endowed it, though not sufficiently. James I. granted it a charter in 1610, and gave it the name of the College of King James in Chelsea. In 1616, James I. issued a declaration, setting forth the reasons which induced him to erect the college. The scheme did not, however, succeed, and it was converted into an hospital for invalid and decayed soldiers by Charles II., who laid the foundation stone of the new building, designed by Sir Christopher Wren, in 1682. The good work, carried on by James II., was completed by William III. and Mary, in 1690, at a cost of £150,000. The Royal Military Asylum in connection with the hospital was founded in 1801. The china works, founded by Mr. Dwight, Dowolt, or De Witt, of Fulham, about 1640, and much encouraged by George II., were taken down in 1784. The body of the Duke of Wellington was removed from Walmer Castle, Nov. 10, to this hospital, where it lay in state Nov. 13–15, 1852. The suspension bridge was opened March 28, 1858.

CHELTENHAM (Gloucestershire).—Doctor Short discovered the medicinal properties of the water at this place in 1740; the first spring having been found in 1716. George III. visited Cheltenham in 1788, and a spring found on the estate where he resided is called the King's Well. A salt spring was discovered in 1803. Cheltenham was enfranchised in 1832, and returns one member to Parliament. The Proprietary College was opened in June, 1843, and the chapel in 1758. The Cheltenham Normal College, for the training of schoolmasters, the first stone of which was laid in 1849, was opened in 1851. The Grand Stand fell during a race Friday, April 13, 1866, when many of the spectators received serious injuries.

CHEMICAL SOCIETY (London), was instituted Feb. 23, 1841.

CHEMISTRY.—Ample evidence may be found in the Old Testament to show that the ancient Egyptians possessed a knowledge of chemistry; and from them the Saracens, to whose industry the origin and improvement of the science are attributed by Gibbon, derived much information. Geber, who flourished in the 9th century, admits that he derived most of his knowledge on the subject from the early ages. (*See* ALCHEMY.) Little real progress was made for several centuries. "Chemistry," says Hallam, "as a science of principles, hypothetical, no doubt, and, in a great measure, unfounded, but cohering in a plausible system, and better than the reveries of the Paracelcists and Behmenists, was founded by Becher in Germany, by Boyle and his contemporaries of the Royal Society in England." Becher published his "Physica Subterranea" in 1669, and he died in London in 1685. Boyle's "Sceptical Chemist" appeared in 1661. George Ernest Stahl, who died in 1734, originated the phlogistic theory of combustion, and Dr. S. Hales, who died Jan. 4, 1761, stands first as a pneumatic chemist. Dr. Priestley, 1733—1804, first obtained oxygen gas, Aug. 1, 1774, and Mr. Cavendish discovered the composition of water in 1784. Lavoisier, who died May 8, 1794, threw considerable light on the theory of combustion, and proved the chemical identity of the diamond and common charcoal. Dalton explained the Atomic Theory (*q. v.*) in 1803.

CHEMISTRY (College).—The Royal College of Chemistry was founded in London in July, 1845.

CHEMITYPE, the art of producing by a chemical process engraving in relief, on a metal plate, invented by C. Pül, a Dane, was practised by him from 1843 to 1846 at Copenhagen, then at Leipsic, and since 1850 at Vienna.

CHEPSTOW CASTLE (Monmouthshire) is said to have been founded in the 11th and rebuilt in the 13th century. It was taken by the Parliamentary forces Oct. 10, 1645, and surprised by the Royalists early in Oct., 1648. Cromwell, who failed in an attempt to retake it by storm, ordered it to be besieged, and the small garrison, having exhausted all their provisions, surrendered May 25. The iron bridge

over the Wye, which joins the Severn two miles below Chepstow, was constructed in 1816.

CHEQUE.—The first cheque by an English king was the following, given by Edward I. to Bourunonio de Luk, or Luke, a Florentine merchant:—"Whereas, our beloved Robert de Brus, Earl of Carrick, is in present need of money, we request that you will cause to be advanced or lent to the said earl or his attorney, for his occasion, forty pounds, and we will cause them to be repaid to you. And when you have lent to him the aforesaid money, you shall take from him his letters patent testifying his receipt of the same. Witness our hand, Windsor, Sep. 10, 1281." A stamp duty of one penny was placed upon all drafts or cheques by 21 Vict. c. 20 (May 21, 1858). An ancient book, preserved in the Chapel Royal St. James's, containing entries respecting the establishment, is called the Cheque Book, and the gentleman appointed to keep it was called "Clerk of the Cheque."

CHERASCO, or CHIERASCO (Treaty), by which the Duke of Nemours obtained possession of his territories in Mantua, was concluded at Chierasco, in Piedmont, between Louis XIII. of France, and Victor Amadeus I. of Savoy, April 6, 1631. Napoleon I., by an armistice concluded here with the Sardinian commissioners, obtained free passage for his troops through Sardinian territory. This truce was preparatory to the treaty of Paris (*q. v.*), May 15, 1796.

CHERBOURG (France), the ancient *Cherburgum*, *Caroburgum*, or *Cæsaroburgus*, received a visit from Harold of Denmark, about 945. The castle is mentioned in an act of 1026, and its chapel and the town hospital were founded by William the Conqueror between 1060 and 1064. On the conquest of Normandy by Philip Augustus in 1203, Cherbourg fell under French domination, and in 1295 it was pillaged by the English. Charles the Bad, of Navarre, obtained possession in 1355, and in 1489 it was taken by the English under Henry V., after a three months' siege. Charles VII. retook it Aug. 12, 1450. Louis XIV. conceived the idea of erecting Cherbourg into a naval fort and arsenal about 1687, and Vauban was appointed to superintend the improvements; but the project was abandoned, and the defences were demolished in 1689. Some of these were restored in the beginning of the 18th century, and the town was of sufficient importance to receive an attack from the English, who effected an entry Aug. 6, 1758, and after destroying the works and seizing all the stores, re-embarked Aug. 15. In 1781 Louis XVI. resumed the attempts to establish a naval station here, and in 1784 M. Cessart commenced the breakwater, which is acknowledged to be one of the finest in the world. The outbreak of the Revolution of course suspended its progress, but it was resumed by Napoleon I. in 1803, and inaugurated in 1813. Since then additions have been continually made. In 1828 the foundations were found to have shifted very considerably from their original position. Louis Philippe restored them on a new principle in 1832; but even now the dyke is liable to serious injury from every violent tempest. The military strength of the place has been prodigiously increased by Napoleon III., who opened the railway and the Grand Basin of the Napoleon Docks Aug. 4 and 5, 1858, in presence of Queen Victoria, the English court, and many distinguished visitors. The sea-fight between the *Alabama* (*q. v.*) and the *Kearsage* took place off this port June 19, 1864. The English fleet reached Cherbourg Aug. 14, 1865.

CHERRY.—"Lucullus, after the war with Mithridates," says Isaac Disraeli, "introduced cherries from Pontus into Italy (circ. B.C. 74); and the newly imported fruit was found so pleasing, that it was rapidly propagated." Pliny states that the cherry-tree was introduced into Britain about 120 years afterwards, that is, A.D. 45. This stock of cherry-trees, so called from Cerasus, now Keresoun, was lost in the Saxon period, and some more were brought from Flanders by the gardener of Henry VIII., and planted in Kent in 1540. Native cherries were, it is said, known in Norfolk in the 13th century. The Cornelian cherry was introduced into England from Austria in 1596; and the American Bird cherry from America in 1629.

CHERRY ISLAND (Arctic Sea) was discovered by the Dutch pilot Barentz, June 9, 1596. It was at first called Bear Island, because the Dutch sailors killed a bear, the skin of which measured 12 feet in length. The Muscovy Company took formal possession of the island in 1609.

CHERSON (Crimea), an ancient city, near the site of which Sebastopol now stands, is supposed to have been built about the 5th century. It formed for many years a republic, and joined the alliance against Pharnaces I. about B.C. 184. The inhabitants assisted Constantine I. against the Goths, who were defeated A.D. 334. Justinian II. was banished to this city in 695. He made his escape in 705, and having been restored to the imperial throne, sent an expedition against Cherson in 709. The youth of both sexes were reduced to servitude, seven of the principal citizens were roasted alive, 20 drowned in the sea, and 42 taken in chains to receive sentence from the emperor. On the return voyage, the fleet was wrecked on the coast of Anatolia, when conquerors and captives perished. Justinian II. sent another expedition in 711. The people of Cherson prepared for resistance. The army sent against them revolted, elected Bardanes emperor, under the title of Philippicus, returned to Constantinople, and put Justinian II. to death in Dec., 711. Theophilus reduced Cherson to subjection in 831. Vladimir of Russia was converted to Christianity and baptized at this city in 988, and at the same time married to Anna, a Christian princess. The baptism of Vladimir and his marriage were celebrated at the same time, and to the desire of obtaining a Roman princess for his bride his conversion is attributed by Gibbon. Alexis I. of Trebizond annexed Cherson to his empire about 1210.

CHERSON, or KHERSON (Russia), the capital of a province of the same name, was founded in 1778, and fortified in 1780. John Howard, the philanthropist, died in this city Jan. 20, 1790, and the Emperor Alexander I. erected a monument over his grave. Catherine

II. of Russia made a triumphant entry into Cherson in 1787, passing under an arch bearing the inscription, "The Way to Byzantium." Joseph II. of Germany met her here, and entered into an alliance against Turkey. During the war with Russia, an allied fleet appeared in the neighbourhood of Cherson in Oct., 1855; but no attack was made upon that city, which must not be confounded with the ancient city of the same name in the Crimea.

CHESAPEAKE.—This frigate, belonging to the United States, was captured by Capt. Broke in the British frigate *Shannon*, June 1, 1813. The action, which only lasted a quarter of an hour, was fought near Boston, in the presence of a large number of Americans who lined the shore. The strength of the rival frigates was as follows:—

	Tons.	Guns.	Crew.
Chesapeake	1135	50	376
Shannon.....	1066	49	330

The former had 46 men killed and 106 wounded, and the latter 24 killed and 59 wounded.

CHESAPEAKE BAY (North America) was first explored by Capt. John Smith, who arrived with colonists in April, 1607. The squadron of three vessels was commanded by Capt. Newport, and carried 110 settlers.

CHESMEH.—The Russian fleet, under Admiral Spiridoff, having defeated the Turks off Chios, completed the victory by burning their enemies' vessels in the bay of Chesmeh, near Smyrna, July 5, 1770.

CHESS.—The Chinese are said to have invented chess; but Sir William Jones is of opinion that the game was invented by the Hindoos. He says: "We may be satisfied with the testimony of the Persians, who, though as much inclined as other nations to appropriate the ingenious inventions of a foreign people, unanimously agree that the game was imported from the west of India in the 6th century of our æra. It seems to have been immemorially known in Hindostan by the name of *chaturanga*, *i.e.* the four *angas*, or members of an army: which are these, elephants, horses, chariots, and foot-soldiers; and in this sense the word is frequently used by epic poets in their descriptions of real armies." Gibbon states that it was introduced into Persia in the reign of Chosroes I., or Nushivran (531—579). Tamerlane, or Timour, who died Feb. 18, 1405, was fond of the game, which he is said to have improved. The Saracens introduced it into Spain in the 8th century, and it gradually spread over Europe. The date of its introduction into England has not been clearly ascertained. It was known here in the 11th century, as Canute is represented as having played it in 1028. Caxton published "The Game and Playe of the Chesse" in 1474. The British Chess Association held its first meeting at Leeds, Jan. 18, 1841, when it was called the "Yorkshire Chess Association." The title was changed to the "Northern and Midland Counties Chess Association," Oct. 21, 1852, and to the "British Chess Association," Aug. 5, 1857.

CHESS CONGRESS commenced in London under the auspices of the British Chess Association, with a preliminary meeting held at St. James's Minor Hall, June 13, 1862. Play began at the various clubs and divans June 16, and a public contest, lasting a week, commenced in St. James's Hall June 30. A banquet was held at Willis's Rooms July 10, a meeting to revise the laws of the game took place July 17, and the last game was played Oct. 2. The committee met at the London Club to award the prizes Nov. 25.

CHESTER was called Deva by the Romans, who formed a colony here, and were not expelled until A.D. 476. The Britons called it Caerleon. St. John's Church is said to have been founded in 698. Chester was taken by the Saxons in 828; was destroyed by the Danes in 894, and rebuilt by Edelfleda in 904. The Welsh ravaged it in 1255. Richard II. made Chester a principality in 1389. Henry VII. separated it from Cheshire by letters patent, dated April 6, 1506, and made it a county of itself. The county hospital was founded in 1756, and opened in 1761. Some portion of the cathedral was finished in 1485, and the west end was commenced in 1508. It has been represented in Parliament since 1549. The city was taken by the Parliamentary forces, after a long siege, in 1645. The race for the cup was established in 1824. The jurisdiction of the county palatine of Chester was abolished by 1 Will. IV. c. 70, s. 14 (July 23, 1830). The town-hall and exchange were destroyed by fire Dec. 30, 1862.

CHESTER (Bishopric).—At a council held in London in 1078, it was determined to establish this bishopric. The recommendation was not carried into effect until 1534.

CHESTERFIELD (Battle).—King Henry the Third's troops defeated the forces of the rebellious barons at this place Whitsun-eve, May 15, 1266.

CHESTER-LE-STREET (Bishopric).—The see, founded at Holy Island (*q. v.*) in 635, and removed in 875 to this place in Durham, was permanently transferred in 995 to Durham (*q. v.*).

CHEVY CHASE (Battle).—(*See* OTTERBURN.)

CHIARI (Battle).—At this town in Brescia, Prince Eugène of Savoy defeated the French under Marshal Villeroi, who lost 4,000 men, Sep. 1, 1701.

CHICAGO (United States).—The name of this city of Illinois, situated on the south-western shore of Lake Michigan, is of Indian origin, and was first mentioned by Perrot, who visited the site in 1671. In 1803 the United States government erected a stockade named Fort Dearborn. Having been abandoned in 1812, it was destroyed by the Indians and was rebuilt in 1816. Chicago was first settled in 1831, and contained about a dozen families in 1832. It was first organized by the election of a board of trustees, Aug. 10, 1833, and large additional territory was acquired by a treaty concluded with the Pottowautomy Indians Sep. 26. Incorporated in 1836, the first charter of the city was passed March 4, 1837. The Illinois and Michigan Canal, by which Chicago communicates with the coal-fields of Illinois and with the Mississippi, was finished in 1848. The Michigan Central and Michigan Southern Railway were completed to this place in 1852.

CHICHESTER (Bishopric).—The see was removed from Selsey about 1078.

CHICHESTER (Sussex) was taken by Ella the Saxon in 480, and, having been destroyed by the South Saxons in 491, was rebuilt in 538 by Cissa, from whom the name is derived. A wooden cathedral, completed in 1108, was burned May 5, 1114, and rebuilt in 1125. It was again destroyed by fire in 1187, and the rebuilding commenced in 1199. The present edifice was completed in the 13th century. The Parliamentary forces captured the city in 1643, and the fortifications were destroyed by order of the Long Parliament in 1648. The grammar-school was founded in 1497. The spire of the cathedral was blown down Feb. 21, 1861.

CHICKAHOMINY (Battles).—The advanced guard of the Federal army, under Gen. Casey, was attacked by the Confederates under Gen. Lee at Fair Oaks, on the Chickahominy, about seven miles from Richmond, May 31, 1862. The Federals, who were totally defeated, lost all their baggage and camp-equipage, with 10 guns. They pushed forward fresh bodies of men, and compelled the Confederates to seek shelter in their entrenchments before Richmond, June 1. A second series of battles, sometimes styled the "Seven Days of Richmond," and fought near the same river later in the year, are also called the battles of the Chickahominy. They commenced Wednesday, June 25, 1862, when the Federal left wing, under Gen. Hooker, attacked the Confederates at White Oak swamp, and encountered a vigorous resistance. Gen. "Stonewall" Jackson attacked the right wing of the Federals at Mechanicsville, June 26, driving them across the river to Powhite swamp. Gens. Hill and Longstreet crossed the river June 27, and being joined by Lee and Jackson, took up their position at Gaines's Mill, where a desperate encounter took place, which resulted in the defeat and further retreat of McClellan. Gen. Lee occupied the Federal head-quarters at White House, June 28, and McClellan commenced a retreat towards the James River. He was again attacked, June 29, by the Confederate Gen. Hill, at Savage's Station, and another severe encounter took place on the James River June 30. The next battle, fought July 1, and known as the battle of Malvern Hill, terminated the series of contests, McClellan having taken up a position at Harrison's Bar, or Turkey Bend, where he was protected by the Federal gunboats. The total loss of the Federals in these engagements was 20,000 men.

CHICKAMAUGA (Battle).—Gen. Bragg defeated the Federals, under Gen. Rosencrantz, on the banks of Chickamauga Creek, a tributary of the Tennessee River, on Saturday and Sunday, Sep. 19 and 20, 1863. The Federals lost 8,000 prisoners, 15,000 stands of arms, and 51 cannon, besides killed and wounded. Gen. Bragg estimated his losses at two-fifths of his army, several Confederate generals being among the slain.

CHIEF BARON.—(*See* EXCHEQUER.)

CHIEF JUSTICE.—(*See* KING'S or QUEEN'S BENCH.)

CHIEF JUSTICIARY.—(*See* JUSTICIARY, CHIEF.)

CHIERASCO.—(*See* CHERASCO.)

CHIERI, or QUIERS (Italy).—This ancient town of Piedmont, called Carea during the later years of the Roman empire, became, in the 6th century, a small independent republic governed by one Balbus, whose descendants maintained their supremacy till 1347, when the inhabitants transferred their allegiance to Amadeus V. or VI., Count of Savoy. The church of St. Dominico was built in 1260, and the church of Santa Maria della Scala in 1405. Its manufacture of fustians, &c., dates from 1422. The fortress, called La Rochetta, was destroyed in the 16th century.

CHIETI.—(*See* THEATINES.)

CHILDERMAS.—(*See* INNOCENTS' DAY.)

CHILDREN'S CRUSADE.—(*See* PILGRIMAGES.)

CHILI (South America).—This country, the name of which is supposed to be derived from the Peruvian word *Tchili*, signifying "snow," was under the rule of the Incas when the Spaniards commenced the conquest of Peru. Pizarro sent Almagro to subdue Chili in 1536, but the marshal, as he was called, returned without having effected his object. Pedro de Valdivia went by Pizarro's order in 1540. He overran the country, founded the city of Santiago in 1541, and remained there 12 years. The people maintained a struggle against the Spaniards for nearly two centuries, and the war was terminated by a treaty in 1722.

A.D.
1772. The Chilians or Chilenos expel the Spaniards from a large part of the country.
1810, Sep. 18. They declare their independence.
1814. The Spaniards regain the ascendancy.
1817, Feb. 12. The Chilians are victorious at Chacabuco.
1818, Feb. 12. National independence is proclaimed at Santiago.—April 5. The Spaniards are defeated at Maipu (*q. v.*).
1823. Mr. Canning recognises the independence of Chili.
1833, May 22. The constitution is promulgated.
1844. April 25. A treaty is signed at Madrid by which Chilian independence is recognized by Spain.
1848. Attempts are ineffectually made to abolish restrictions on the franchise.
1861, Sep. 7. José Joaquin Perez is elected president.
1863, Dec. 8. Several lives are lost in the burning of a church at Santiago (*q. v.*).
1864, March 1. Cessation of diplomatic relations with Bolivia in consequence of a dispute respecting the Mejillones or Guano Islands.
1865, May 13. Señor Tavira, Spanish minister at Santiago, complains of Chilian sympathy with Peru. (*See* CHINCHA ISLANDS and PERU.)—May 16. The Chilian foreign minister presents his explanation.—May 20. It is declared satisfactory by S. Tavira.—July 25. The Madrid Cabinet repudiates this settlement, and recalls S. Tavira.—Sep. 18. Admiral Pareja, on the anniversary of Chilian independence, presents an insulting ultimatum to the Government.—Sep. 23. It is finally rejected.—Sep. 24. Pareja declares Valparaiso and the other ports of the republic in a state of blockade.—Sep. 29. Chili declares war.—Dec. 5. A treaty of alliance with Peru is signed at Lima.—Dec. 30. It is ratified at Santiago.
1866, Jan. 2. The Chilians capture the crew of the storeship *Salvador Vidal*. (*See* PERU.)

CHILIASTS.—(*See* MILLENARIANS.)

CHILLIANWALLAH (Battle).—Lord Gough, at the head of 22,000 men, with 125 guns, encountered the Sikh army, 60,000 strong, at this village, near the river Chenab, Jan. 13, 1849. The English remained masters of the

field, though their loss was severe, amounting to 2,269 in killed and wounded. The Sikhs lost 3,000 killed and 4,000 wounded.

CHILLON (Switzerland). — This fortress, erected in 1238 by Amadeus III., Count of Savoy, on a rock in the eastern part of the lake of Geneva, was the scene in 1273 of a Savoyard victory over the Imperialists. Bonnivard, Prior of St. Victor, having incurred the displeasure of Charles III., Duke of Savoy, by his exertions to free the Genevese from the Savoyard yoke, was seized by the ducal emissaries in 1530, and secretly confined in the deepest dungeon of the castle, whence he was released in 1536, when Chillon was besieged and taken by the Swiss. The castle became a state prison in 1733. Lord Byron's poem of "The Prisoner of Chillon" was written at the village of Ouchy, near Lausanne, in June, 1816, he being detained there for two days by stress of weather. It does not relate to the history of Bonnivard, with which, at the time of writing, the poet was only slightly acquainted.

CHILTERN HUNDREDS.—The forests on the Chiltern Hills, in Buckinghamshire, were in olden times infested with banditti, and an officer called the steward of the Chiltern Hundreds was appointed to prevent their depredations, and protect the people in the neighbourhood. This office, which no longer exists, now serves to enable a member of Parliament, in certain cases, to vacate his seat. May (Parliamentary Practice) thus explains the practice:—"It is a settled principle of parliamentary law, that a member, after he is duly chosen, cannot relinquish his seat; and in order to evade this restriction, a member who wishes to retire accepts office under the crown, which legally vacates his seat, and obliges the house to order a new writ. The offices usually selected for this purpose are those of steward or bailiff of her Majesty's three Chiltern Hundreds of Stoke, Desborough, and Bonenham, or of the manors of East Hendred, Northstead, or Hempholme, which, though sometimes refused, are given by the Treasury in ordinary cases to any member who applies for them; and are resigned again as soon as their purpose is effected." The legality of the practice, which sprang up in 1750, is doubted, as the office is not one of those for which the occupant is required to vacate his seat.

CHIMNEY.—Beckmann contends that the Greeks and Romans were not acquainted with the use of chimneys. None are found at Herculaneum. They appear to have warmed their rooms by means of a large fire-pan, or portable stove, and this, filled with wood well ignited, or burning coals, was brought into the apartment. Hot air, conveyed by means of pipes, seems also to have been employed. There were no chimneys in the 10th and 11th centuries. In the Middle Ages a fire was made in a hole or pit in the centre of the floor, and the smoke escaped through an opening in the roof. A fireplace occurs in Rochester Castle, built about 1130, but some believe the first authentic account of chimneys is to be found in an inscription at Venice, relating that in the year 1347 many chimneys were thrown down by an earthquake. The first chimneys at Rome were erected by order of Francesco de Carrara in 1368. In a manuscript giving an account of manners and customs in England, written about the year 1673, it is stated that, before the Reformation, "ordinary men's houses, as copyholders and the like, had no chimneys, but flues like louver holes; some of them were in being when I was a boy." Chimneys did not come into general use in France until the middle of the 17th century.

CHIMNEY TAX, or HEARTH-MONEY (*q. v.*), was levied by 13 & 14 Charles II. c. 10 (1662). It proved so obnoxious, that it was abolished by 1 Will. & Mary, sess. 1, c. 10 (1689).

CHIMNEY-SWEEPERS.—Chimneys were at first swept with a little brushwood fastened to a rope. As the flues were made narrower, boys began to be employed. The first chimney-sweepers were lads from Savoy and Piedmont. In consequence of the numerous accidents that happened to boys, a machine for sweeping chimneys was introduced into England towards the close of the 18th century, and a society formed for encouraging the sweeping of chimneys without the use of boys. By 3 & 4 Vict. c. 85 (Aug. 7, 1840), any person compelling or allowing a child or young person under the age of 21 years to ascend or descend a chimney after July 1, 1842, was made liable to a penalty of not more than £10 or less than £5. It was amended by 27 & 28 Vict. c. 37 (June 30, 1864), which took effect from Nov. 1, 1864.

CHINA (Asia). — The annalists of this country, called the "Celestial empire," trace its history to the remotest antiquity. Rémusat, accepting their statements, expresses his belief that it goes back with certainty to the 22nd century before our æra, and that the date of its commencement, according to traditions worthy of credit, may be fixed even earlier, namely, at B.C. 2637. Gibbon (ch. xxvi.), who says the æra of the Chinese monarchy has been variously fixed from B.C. 2952 to B.C. 2132, adds that the historical period does not ascend above the Greek Olympiads. This, however, is considered much too early, and the best authorities fix the commencement of the historical period at the beginning of the Han dynasty, B.C. 203. The northern and southern empires, the former ruled by the Great Khan, and the latter by the Chinese, from 1234 to 1279, were called Cathay and Magni. In the Middle Ages the name Cathay was sometimes applied to the whole country. China is the most extensive empire in the world. Mr. S. Wells Williams (The Middle Kingdom) gives the following estimates of the amount of population, at different periods, according to undermentioned authorities:—

	Inhabitants.
1711. Chinese Repository	28,605,716
1736. Grosier, De Guignes	125,040,345
1743. Ditto	157,343,975
1753. Chinese Repository	103,050,060
1760. Yih-tung-chi	143,125,245
1760. De Guignes	203,916,477
1761. Ditto	205,293,053
1762. Allerstain, Grosier, De Guignes	198,214,553
1790. Chinese Repository	155,249,847
1793. Dr. Morrison	307,467,200
1792. Macartney	333,000,000
1812. Chinese Repository	362,467,183

B.C.
2700. The first Chinese cycle.
2357. Accession of the Emperor Yao, who is said to have reigned 100 years.
2217. Commencement of the Hia dynasty, according to Du Halde.
2198. Commencement of the Hia dynasty, according to "L'Art de Vérifier les Dates."
- 651. Earliest date in Se-ma-tsein's History of China.
550. Birth of Confucius.
246. All Chinese books are ordered to be burned.
211. Completion of the Great Wall of China.
202. Printing is known in China.
200. A Jewish settlement is made in China.
170. It is invaded by the Tartars.
24. Supposed Chinese embassy at Rome.
15. The Taou-tse sect of philosophers attain great influence.

A.D.
65. The religious belief in Boodh, or Fo, is introduced into China.
94. The Emperor Hoty sends an envoy to Arabia.
166. Chinese historians report the arrival at the Chinese court of an embassy from Anthon, who is supposed to be the Emperor Antoninus.
184. China is divided into three separate states.
265. China is reunited into one kingdom, under the Tsin dynasty.
420. The seat of government is established at Nankin.
635. Christianity is preached by the Nestorian bishops.
845. Expulsion of the Nestorian Christians.
851–877. China is visited by Arab travellers.
1234. The Mongols obtain possession of the northern half of China.
1245. The first European mention of China is made by friar John de Plano Carpini, missionary to the Mongols.
1253. Rubuquis is sent by Louis IX. of France as missionary to the court of the Great Khan.
1260. Kublai Khan rebuilds Pekin (*q. v.*), and makes it his capital.
1278. The grand canal is commenced.
1280. Kublai Khan obtains possession of the whole empire, and founds the Mongol or Yuen dynasty.
1288. Giovanni di Monte Corvino, papal legate at the court of the Grand Khan, dies at Pekin.
1295. Marco Polo arrives in Venice, after having resided 17 years in China.
1317. Odérico de Pordenone travels in China.
1324. The Arab Ibn Batatu arrives in China, of which he publishes a correct description.
1368. Restoration of a Chinese dynasty by Choo, who commences the Ming family of emperors.
1405, Feb. 18. Timour the Tartar, who set out to invade China, dies on the march.
1420. A Persian embassy arrives in China.
1517, Aug. 15. The Portuguese, under Andrade, arrive at the island of Tamang, three miles from the mainland.
1521, Jan. Thomas Pires, Portuguese ambassador at the Court of China, falls into disgrace, and is imprisoned at Canton. His countrymen are forbidden to enter the empire.
1537. The Portuguese obtain a footing at Macao.
1543. A Spanish colony is established at Manilla, and intercourse commenced with Chinese merchants.
1556. Friar Diego Bernardo conducts a religious mission into China.
1565. A Spanish fleet arrives at the island of Zebu.
1575, July 5. The Jesuit missionaries, Martin de Herrada and Geronimo Marin, land at Gan-hai.
1576, June 21. Alvaro and other Augustine monks arrive at Canton.
1581. Martin Ignatius conducts a Franciscan mission to China.
1596. Queen Elizabeth despatches a fleet to China. The vessels are wrecked on the voyage out.
1600. The Jesuit Matteo Ricci obtains the emperor's permission to settle in Pekin.
1624. The Dutch open a trade with China. (*See* FORMOSA.)
1637, May 28. The British attempt to trade at Macao, but are prevented by the Portuguese.
1649. Li Kong deposes the last Ming sovereign, and establishes the Mantchoo Tartar dynasty.
1664. The British again attempt to trade with China, but in vain.
1680. The East India Company open a factory at Canton.
1689. Trade is opened with Russia.

A.D.
1692. In consequence of the exertions of the Jesuits, the Emperor Kanghy issues a decree permitting Christianity.
1693. A Russian embassy arrives in China.
1700. Limpo, Amoy, and Canton are opened to British commerce.
1708, July 4. The Jesuits commence a survey of China.
1718. They complete a general map of the empire, which they present to the emperor.
1719. Peter the Great despatches Ismaloff on an embassy to China.
1723. Christianity is prohibited by the Emperor Yoong-tching, who expels the Jesuits.
1727. Catherine I. of Russia concludes a treaty with the emperor, and forms an ecclesiastical establishment and regular embassy at Pekin.
1755. European intercourse is restricted to Canton.
1784, Nov. 24. A Chinese is killed by a loaded gun accidentally fired as a salute.
1785, Jan. 8. The gunner is seized, and strangled.
1792, Sep. 26. Lord Macartney sets sail from Portsmouth.
1793, July. Lord Macartney arrives at Chusan.—Sep. 14. He has an interview with the emperor at Zhehol.
1794, March 17. Lord Macartney sets sail for England.—Sep. 6. He lands.
1800. An affray takes place between the crew of H. M. S. *Providence* and some Chinese, in which one of the latter is wounded.
1803. The first American consul in China is allowed to reside at Canton.
1807. Trade with England is stopped for a time, in consequence of the death of a native in a skirmish with the crew of the ship *Neptune*.
1814, Oct. 20. Sir George Staunton compels the imperial viceroy to allow the English to correspond under seal and in Chinese with the government, and also to promise that British factories shall not be entered by Chinese officers without previous permission.
1816, Feb. 10. Lord Amherst's embassy leaves England.—Aug. 12. It reaches Tien-tsin, where his lordship refuses to perform the humiliating *ko-tow*, or prostration, before the emperor, and consequently returns without accomplishing the results of the mission.
1821, Dec. 15. The crew of H.M.S. *Topaze* are attacked by the Chinese, who lose two men in the struggle, and attempt to put a stop to trade in consequence.
1822, Feb. 23. Trade is recommenced on its old footing.
1834, April 22. Termination of the East India Company's monopoly of the trade with China.—July 25. Arrival at Canton of Lord Napier, chief commissioner, to superintend British trade with China.—Sep. 5. Lord Napier sends for a guard of marines, in consequence of the injuries inflicted on his residence, &c., by the natives.—Sep. 7. The forts at Canton, which fire on two English men-of-war, are soon silenced.—Oct. 11. Death of Lord Napier at Macao. He is succeeded by Mr. (afterwards Sir) J. F. Davis.—Nov. 3. An imperial edict, prohibiting the opium trade, is issued.
1835. Jan. 31. The Chinese seize a boat and its crew belonging to the British merchant-ship *Argyle*.
1837, March 18. The emperor allows the residence of a British commissioner at Canton.—Nov. 29. Capt. Elliot strikes the British flag at Canton, and retires to Macao.
1838, Jan. The insurrection of the Meaou-tsze is suppressed by the imperial troops.—July 12. Admiral Sir F. Maitland arrives at Tunkoo.—Dec. 4. Disturbance and stoppage of trade in consequence of persistence in the opium traffic.
1839, March 10. Arrival of Commissioner Lin at Canton.—March 18. He issues an edict for the seizure of opium.—March 19. The British are forbidden to leave Canton.—March 27. Capt. Elliot requires the surrender of all opium in the possession of British subjects, and promises that they shall receive its full value from Government.—April 8. Half the opium is given over to the Chinese.—May 5.—Passage from Canton is open to all English merchants, except 16, who are detained as hostages.—May 21. The remaining 20,283 chests of opium are delivered up.—May 24. Capt. Elliot and the British merchants leave Canton.—June. The Chinese destroy the opium.—July 7. A Chinaman is killed in a fray with British and American seamen.—Aug. 17. The Chinese attack and

A.D.

murder the crew of the British schooner *Black Joke*.—Aug. 26. British residents at Macao are ordered to quit in 12 hours.—Sep. 4. Sea-fight between the British and Chinese in the bay of Coulloon. No decisive result.—Nov. 3. War is commenced by the naval action at Chumphee. The *Volage* and *Hyacinth* disable 29 war-junks, sinking three and blowing up one.—Dec. 6. Edict of the emperor, prohibiting all intercourse with England.

1840, Jan. 5. Imperial edict, declaring the English outlawed.—Jan. 14. Projected massacre of the English.—Feb. 28. Attempt to burn the British fleet in Tongkoo Bay by means of fire-junks.—May 22. The *Hellas* is attacked by pirates.—June 9. Another unsuccessful attempt to burn the British fleet at Capsingmoon.—June 28. Canton is blockaded by Sir Gordon Bremer.—July 3. The *Blonde*, with a flag of truce hoisted, is fired on by the Chinese at Amoy.—July 5. Capture of Chusan (*q. v.*).—Aug. 6. Mr. Stanton is seized by the Chinese, and carried prisoner to Canton.—Sep. 16. Seizure of Capt. Anstruther, and wreck of the *Kite*, the crew of which, with the captain's wife, are made prisoners, and treated with great cruelty.—Oct. 17. Lin receives orders to hand over his seals of office to Commissioner Keshen.—Nov. 6. A truce is proclaimed.—Nov. 10. Release of Mr. Stanton.—Nov. 29. Admiral Elliot resigns the command of the fleet.

1841, Jan. 6. The negotiations are broken off, owing to the procrastination of the Chinese.—Jan. 7. Two of the Bogue forts are taken by the British.—Jan. 20. Keshen cedes Hong-Kong (*q. v.*) to the British, and agrees to pay an indemnity of 6,000,000 dollars.—Jan. 27. The emperor disavows the treaty.—Feb. 22. Recommencement of hostilities.—Feb. 26. Destruction of the Bogue forts by Sir Gordon Bremer. Keshen is degraded by an imperial edict, and ordered to be conveyed to Pekin for trial.—March 1. The English fleet ascends the Pekiang to Canton.—March 3. Sir Hugh Gough assumes command of the forces.—March 3. Another truce.—March 13. The defences of Canton are seized by the British.—March 18. The forts and factories at Canton are seized by the British, and a Chinese flotilla is destroyed.—March 20. A truce is agreed upon between Capt. Elliot and the imperial commissioner Yang.—April 14. Arrival of Yihshan, the new imperial commissioner.—May 21. The Chinese attempt to burn the fleet at Canton with fire-rafts.—May 24. The British, under Sir Le Fleming Senhouse, attack Canton, and gain the heights behind the city the next day.—May 27. Capt. Elliot abandons the attack, and a ransom of 6,000,000 dollars is paid to the British Government.—June 14. Death of Sir Le Fleming Senhouse.—July 16. An imperial proclamation re-opening British trade is issued.—Aug. 10. Sir H. Pottinger, the new British plenipotentiary, lands at Macao, and soon after captures Amoy (*q. v.*), Chusan (*q. v.*), Chin-hae (*q. v.*), and Ningpo (*q. v.*).—Dec. 28. Capture of the district cities of Yuyao, Tsikee, and Funghwa.

1842, March 10. The Chinese make a futile attempt to recover Ningpo and Chin-hae.—March 15. Sir Hugh Gough defeats a Chinese force of about 8,000 men at Tse-kee.—May 7. Evacuation of Ningpo by the British.—May 18. Capture of Chapoo.—June 16. Capture of Woosung, on the Yang-tze-kiang.—June 19. Capture of Shang-hai.—July 21. Storming and capture of Chin-keang-foo.—Aug. 6. The English fleet takes its station before Nankin (*q. v.*).—Aug. 15. Arrival of Ke-ying, the imperial commissioner, with powers to treat for peace.—Aug. 29. The treaty of Nankin (*q. v.*) puts an end to the first Chinese war.—Sep. 10. H.M.S. *Auckland* leaves Nankin with the emperor's ratification of the treaty.—Oct. 17. Dedication at Hong-Kong of the first Protestant place of worship in China.—Dec. 7. Riots at Canton, and destruction of the European factories.

1843, June 26. Hong-Kong is placed under the governorship of Sir H. Pottinger.—July 27. Canton is opened to the British, under the regulations of the treaty of Nankin.—Oct. 8. Supplementary treaty of Honnum-Chae.

A.D.

1844, May 7. Arrival at Hong-Kong of Mr. Davis, Sir H. Pottinger's successor as British governor-general in China.

1846, April 4. Treaty of Bocca Tigris.—July 8. Fracas at Canton between the natives and English residents.

1847, April 3. The English residents at Canton present a list of their grievances to Sir John Davis.—April 5. A British force, under Gen. d'Aguilar, destroys the Bogue forts, threatens Canton, and compels the Chinese commissioner, Ke-ying, to accede to the demands of the governor.—Dec. 5. The natives seize and murder six English residents. Sir John Davis afterwards obtains the execution of the criminals.

1850, Oct. 3. The first battle of the Tae-ping rebellion is fought.—Oct. 20. The great piratical fleet of Shapng-tsai is destroyed in the bay of Touquin, by H.M.S. *Columbine* and *Fury*, and the E.I.C. steam-sloop *Phlegethon*.—Nov. 5. Commissioner Lin, who is despatched against the Tae-pings, dies on the journey.

1851, April 11. Defeat of the rebels at the Kew-heen-hen ferry.—Nov. 30. Organization of the Tae-ping army.

1852, May 19. The rebels raise the siege of Kweilin.—Dec. 30. They extend their conquests to the Yang-tze-kiang.

1853, Jan. 12. They take Woo-chang.—March 18. Amoy submits to the Tae-pings.—March 19. Capture of Nankin by the rebels.—May 22. Kae-fung successfully resists a siege by the rebels.—Sep. 7. They enter Shang-hai.—Nov. 1. The Tae-ping army is besieged in Tsing-hae.

1854, June 26. The rebels retake Woo-chang.

1856, Oct. 8. The Chinese board the *Arrow* lorcha. (*See* CANTON.)—Nov. 12 and 13. Sir M. Seymour captures all the Bogue and the Annunghoy forts.—Dec. 14. The foreign factories at Canton are burned by the natives.

1857, Jan. 15. An attempt is made to poison the British residents at Hong-Kong, by mixing arsenic with bread.—May. Commodore Elliot and Sir M. Seymour destroy the Chinese fleet of war-junks in the Canton waters.—June 12. A British squadron sets fire to the suburbs of Canton, and retires to the lower part of the river.—July. Lord Elgin, the British plenipotentiary, arrives at Hong-Kong.—Oct. Baron Gros, the French plenipotentiary, arrives at Canton.—Dec. 28. Bombardment of Canton (*q. v.*).

1858, Jan. 5. The victors enter Canton, and capture Yeh, Peh-kwei, the governor, and Tsang-keun, the Tartar general.—May 19. The allied squadrons force an entrance into the Peiho River, in spite of the fire of the Chinese forts.—June 26. The treaty of Tien-tsin (*q. v.*).—Aug. 11. Capture and destruction of Fort Namtow.

1859, May. The Hon. Mr. Bruce arrives at Hong-Kong, as her Majesty's minister at the court of Pekin.—June 13. A commercial treaty is made with Russia.—June 24. (*See* PEIHO.)

1860. Expeditions fitted out by England and France sail for China.—March 8. An ultimatum is sent by Mr. Bruce to the Chinese government.—June 21. Lord Elgin and Baron Gros reach Hong-Kong.—Aug. 21. Capture of the Taku forts at the mouth of the Peiho.—Aug. 23. Tien-tsin is occupied.—Sep. 9. The expedition leaves Tien-tsin, and advances on Pekin.—Sep. 18. Mr. Parkes, Mr. De Norman, and party, consisting of 26, including Sikhs and Europeans, who had started for Tang-chow under a flag of truce, are treacherously made prisoners.—Oct. 6. The emperor's summer palace is captured and sacked by the French.—Oct. 8. Mr. Parkes and some other prisoners are restored.—Oct. 12. The allies prepare to open fire on Pekin, when the Chinese government grant all their demands.—Oct. 24. A convention is signed at Pekin.—Nov. 5. The allied forces evacuate Pekin.—Nov. 14. A treaty is made between Russia and China.—Dec. 27. The conclusion of peace is proclaimed in the city of London.

1861, Aug. 22. Death of the Emperor Hien-fung at Ye-hol. He is succeeded by his only son Tsai-sun, aged six years, who assumes the name of Ki-tsiang.—Sep. 2. A treaty of friendship, commerce, and navigation is concluded at Tien-tsin with Prussia, the Zollverein, and the Hanse towns.

A.D.
1861, Oct. 15. The allies quit Tien-tsin.—Oct. 21. They leave Canton.—Nov. 2. Prince Kung suppresses the council of regency, and places himself at the head of the cabinet.—Dec. 9. Ningpo is seized by the rebels.

1862, March 1. The imperialist forces, assisted by the English and French, defeat the Tae-ping rebels, near Shang-hai.—May 3. The Tae-pings are defeated with great loss.—May 17. The city of Nekio is taken by the allies, the French Admiral Protet being killed in the assault.—May 21. Nangpo and Trangpon are recovered from the Tae-pings by the imperialists.—Aug. 13. Macao is ceded to the Portuguese.—Oct. 23. The imperialists expel the Tae-pings from Kah-sing.

1864, March 31. The Tae-pings evacuate Hang-tcheou-fou, which is occupied by the imperialists.—July 19. Capture of Nankin by the imperialists, and death of the Tae-ping leader Tieng-Wang.—Oct. 10. A commercial treaty is concluded at Tien-tsin with Spain, which is permitted to send a diplomatic agent to the court of Pekin, and to trade with the Philippine islands.

1865, Jan. 15 and 16. The Dounganes, Mohammedan insurgents of north-western China, seize Tarbagatai or Tchougoutchak.—March 31. Prince Kung is relieved of his functions as minister president of the council of state.—May. He is restored to office.—June. The imperialists take Tchang-tcheou, and subdue the Tae-pings in the province of Fukieou. The Nien-fei, or northern rebels, aiming at the subversion of the reigning dynasty, advance upon Pekin.—Dec. Resignation of the empress dowager.

CHINA or CHINESE APPLE was introduced into England in 1780.

CHINA ROSE was first grown in England in the year 1789.

CHINA-WARE.—The art of making porcelain was known in China nearly two centuries before the Christian æra. For a long time the Chinese supplied Europe with this ware, whence its name. The ships of the East India Company first imported it in 1631.

CHINCHA ISLANDS (Pacific Ocean), situated off the coast of Peru, and valuable for their immense deposits of guano, were seized by the Spaniards, April 14, 1864. The Spanish admiral's ship was burned and foundered here, Nov. 26, 1864. Peace having been concluded at Callao, Jan. 28, 1865, between Spain and Peru, the islands were restored Feb. 3. The Chinese labourers rebelled in Feb., 1866.

CHINESE YAM.—This esculent root, the *Dioscorea batatas* of naturalists, was introduced into England by the Acclimatisation Society in May, 1801.

CHINGLEPUT (Hindostan).—This town, near Madras, was taken by the French in 1751. Clive retook it after a short siege, Oct. 31, 1752. Hyder Ali besieged it in 1780, and was driven away by Sir E. Coote Jan. 18, 1781.

CHIN-HAE (China).—This town was taken by the English army Oct. 9, 1841, when 157 guns were captured. An attack made by the Chinese on the gates of the city, March 10, 1842, was repulsed.

CHIN-KEANG-FOO (China).—This city was taken by the English, after a gallant defence, July 21, 1842. The rebels took the city April 1, 1853, and evacuated it early in 1857.

CHINON (France).—Geoffrey of Anjou, imprisoned in the castle of Chinon by his brother Fulk, in 1068, remained there until 1096. Henry II. of England died at Chinon July 6, 1189. His son, King John, concluded a truce for five years with Philip II. of France at this place, Sep. 18, 1214. Joan of Arc, the Maid of Orleans, arrived at this town, where Charles VII. was holding his court, Feb. 24, 1429. She appeared before Charles VII. Feb. 26, and announced her mission to raise the siege of Orleans and crown him king at Rheims.

CHINSURA (Hindostan).—The Dutch, who formed a factory at this place on the Hooghley near Calcutta in 1656, were soon after expelled by the native authorities. They returned in 1686. The English took it in 1795, and restored it to the Dutch in 1814. By the 8th and 9th articles of a treaty concluded between Great Britain and the Netherlands, March 17, 1824, it was, with other places, ceded to England in exchange for some possessions in Sumatra. The Hooghley College was established in 1836.

CHIOGGIA, or CHIOZZA (N. Italy).—This town was besieged in 1366. An engagement took place between the Genoese and Venetian fleets off the coast in May, 1379. The latter were defeated with great loss. The island and city of Chioggia fell into the hands of the Genoese. Their fleet was blockaded by the Venetians in the port, and the Genoese were compelled to surrender in 1380, when the island was restored to Venice.

CHIOS (Ægean Sea).—This island was, according to tradition, peopled by the Pelasgians. Its inhabitants joined the Ionic confederation. The Persians invaded Chios and committed great devastation B.C. 493. The Chians revolted from the Athenians B.C. 412, and the latter ravaged the island. They again threw off the Athenian yoke B.C. 357. Philip V. captured Chios B.C. 201. The Chians remained in friendly alliance with the Romans for many years. Their island is supposed, however, to have been included in the Insularum Provincia, established by Vespasian. The chief city, also called Chios, claims the honour of being the birthplace of Homer. Its modern name is Scio (*q. v.*).

CHIPPAWA (Battles).—Gen. Riall, at the head of 1,500 regular troops, besides militia and 300 Indians, sustained a defeat at this place from an American army 6,000 strong, with a numerous train of artillery, July 5, 1814.—Gen. Riall having been reinforced and supported by Gen. Drummond, advanced against the Americans, who had established themselves

at Chippawa. A severe action took place July 25, in which Gen. Riall was wounded. The Americans were, however, defeated, and abandoned their camp, throwing the baggage and provisions into the Rapids. The Americans had 5,000 men engaged, and the English 2,800 of all descriptions. Several hundred prisoners were taken.

CHIPPENHAM (Wilts) was a place of importance in the time of the Anglo-Saxon kings, some of whom resided here. Ethelwulph celebrated the marriage of his daughter Athelswitha with Burrhed, King of Mercia, in this town, in 853. In 878 it was seized by the Danes, who, after having committed great ravages, were expelled by Alfred. In Domesday Book (1086), it is mentioned as forming part of the royal possessions both before and after the Conquest, but in the reign of Richard II. it belonged to the Hungerford family. Chippenham sent two members to Parliament in the reign of Edward I. Its charter, dated May 2, 1554, was abolished by Charles II. in 1684. James II. restored the old privileges of the borough by another charter, granted March 13, 1685. Chippenham cloth won the first prize in the Great Exhibition of 1851.

CHISWICK (Middlesex).—The church of this suburban village is supposed to date from the 12th or 13th century, though the greater part of the existing structure was not erected till the 15th. The charity schools were established in 1707. Chiswick House, the seat of the Duke of Devonshire, was built on the site of an Elizabethan mansion pulled down in 1788. The Botanical Gardens were established in 1822 (*see* HORTICULTURAL SOCIETIES), and the British Schools in 1836. The poet Pope and his father resided here from 1716 till 1719, when they removed to Twickenham. Chiswick was also the residence of William Hogarth, who died Oct. 26, 1764, and whose tombstone in the churchyard bears an epitaph by David Garrick.

CHITORE (Hindostan).—This fortified town, seated on the summit of a precipice, was at one time the capital of Odeypoor. The Mohammedan emperor of Delhi seized it in 1303, and the Rajpoots recovered it in 1312. The King of Guzerat took it in 1533, and the Emperor Akbar in 1567. After having undergone various vicissitudes, it was, in 1790, restored to the ruler of Odeypoor.

CHITTAGONG (Hindostan).—The revenues of the district of Chittagong, and of other districts, were ceded to the East India Company by a treaty concluded with Mir Casim, Sep. 27, 1760, and confirmed by Shah Allum in 1765. Its capital, of the same name, was conquered by Aurungzebe, who called it Islamabad.

CHITTLEDROOG (Hindostan).—Hyder Ali failed in an attack upon this strong fortress in 1776, but obtained possession in 1779. In this fortress Tippoo Saib imprisoned Gen. Matthews, made prisoner at the capitulation of Bednore, April 30, 1783. The troops stationed here seized the military treasure Aug. 6, 1809.

CHITTOOR (Hindostan).—Hyder Ali took this place, in Arcot, in Oct., 1780. Sir E. Coote laid siege to it Nov. 8, 1781, and it capitulated Nov. 10. It came under British rule in 1802, and the native chiefs were expelled in 1804.

CHIVALRY.—"It appears probable," says Hallam, "that the custom of receiving arms at the age of manhood with some solemnity was of immemorial antiquity among the nations that overthrew the Roman empire." And to this he traces the origin of chivalry, adding that "proofs, though rare and incidental, might be adduced to show that in the time of Charlemagne, and even earlier, the sons of monarchs at least did not assume manly arms without a regular investiture. And in the 11th century it is evident that this was a general practice." The custom for feudal tenants to serve on horseback, equipped with the coat of mail, in the reign of Charlemagne, in his opinion gave birth to the institution. The connection of chivalry with the Crusades gave it a strong religious tinge, and to this, devotion to the female sex was added, so that the love of God and of the ladies constituted a single duty. Its chief virtues were loyalty, courtesy, and munificence. "The young man, the squire," says Guizot, "who aspired to the title of knight, was first divested of his clothes, and put into the bath, a symbol of purification. Upon coming out of the bath, they clothed him in a white tunic, a symbol of purity; in a red robe, a symbol of the blood which he was bound to shed in the service of the faith; in a saga, or close black coat, a symbol of the death which awaited him as well as all men." Hallam is of opinion that the invention of gunpowder eventually overthrew chivalry.

CHIVALRY (Court of) existed at a very early period, though no records of its history remain. Its jurisdiction extended over matters of honour and courtesy, and its severest penalty was degradation from knighthood, which it only decreed in three cases; that of Sir Andrew Harclay in 1322 being the first. In consequence of abuses, its authority was defined by 13 Rich. II. stat. 1, c. 2 (1389).

CHIZÉ, or CHIZEY (Battle). — Sir John Devereaux, who came to the relief of the English garrison of this town and castle in France, was defeated and taken prisoner by Bertrand du Guesclin in a battle fought March 21, 1373. The French had a great superiority in points, and the town and castle of Chizey surrendered after the battle.

CHLORINE.—This elementary gaseous body was in 1774 discovered by Scheele, who called it "dephlogisticated muriatic acid." Sir Humphry Davy corrected some errors that prevailed respecting its nature in 1809, and gave it the name of chlorine on account of its greenish hue. Mr. F. Smith introduced an apparatus for making chlorine in 1847.

CHLOROFORM.—This fluid, regarded as a compound of chlorine and formyle, whence the name, was discovered by Soubeiran in 1832. Its true composition was ascertained by Dumas and Peligot in 1835. The vapour of chloroform was first applied as an anæsthetic agent by Dr. Simpson, of Edinburgh, Nov. 20, 1847. It is considered the safest of all anæsthetics.

CHOBHAM CAMP (Surrey).—An encampment on a small scale was formed at Chobham, June 14, 1853, for exercising the troops in

military evolutions. Queen Victoria reviewed the troops June 14, and the camp broke up Aug. 20.

CHOCOLATE.—Prescott (Mexico, vol. i. b. 1, c. 5) speaking of the products of Mexico, remarks:—"Another celebrated plant was the cacao, the fruit of which furnished the chocolate,—from the Mexican *chocolatl*,—now so common a beverage throughout Europe." When Cortes was at the capital, in 1519, the Emperor Montezuma took no other beverage, 50 jars or pitchers being prepared for his daily consumption. Two thousand pitchers were allowed for his household. It was brought from Mexico into Europe by the Spaniards in 1520, and was in use in France in 1661. Chocolate-houses were introduced into London early in the 18th century.

CHOCZIM, CHOTYN, KHOTIN, or KOTZIM (Battles).—The Ottoman Emperor Osman II. was defeated by Ladislaus VII. of Poland at this town of Bessarabia in 1621.—The Poles, under John Sobieski, gained a great victory over an immense army of Turkish invaders, of whom more than 30,000 perished, Nov. 11, 1673.—The Turks sustained a calamitous defeat from the Russians at the same place, April 30, 1769.—The Russians gained another victory over the Turks, near Choczim, July 13, 1769.

CHOCZIM, CHOTYN, KHOTIN, or KOTZIM (Russia).—This town, in Bessarabia, was taken from the Turks by the Russians in 1739; but the former soon after regained possession. After the battle of Choczim the Russians laid siege to the town, but were compelled to retire. They returned, and it fell into their hands in the autumn of the same year, but was restored to Turkey in 1774. The Austrians and Russians captured it, after a gallant defence, Sep. 29, 1788. Though restored by the treaty of Jassy, Jan. 9, 1792, it was finally ceded to Russia in 1812.

CHOLERA.—This disease was prevalent in 1669, but the most malignant form, known as Asiatic cholera, first made its appearance amongst some troops stationed at Ganjain, in Hindostan, in 1781, on which occasion several men were carried off in a few days. Occasional outbreaks afterwards occurred in other parts of India, and in 1817 the cholera appeared, in an epidemic form, spreading over different parts of Asia. It reached the Mauritius in 1819, visited the islands of the Indian archipelago, broke out at Canton in 1820, at Pekin in 1821, at several places in the Persian Gulf in the same year, and at Aleppo in 1822, where it spread along the shores of the Caspian Sea, and parts of Russia. For a time its ravages ceased, but in 1829 it again broke out near the Caspian. It appeared in Moscow, St. Petersburg, and other Russian towns, in 1830, at Vienna, and in parts of Germany, Hungary, Poland, Turkey, &c., in 1831, and travelling to England, burst forth at Sunderland Oct. 26, 1831. It visited Edinburgh in Jan., 1832, London Feb. 14, Dublin March 22, and gradually extended over the United Kingdom. France and America were devastated by this terrible scourge in the same year; Spain and Portugal in 1834; and different parts of Italy in 1835, 1836, and 1837. In the last-mentioned year it passed over to Algiers, and, after an outbreak at Malta, disappeared. The second visitation broke out in Asia in 1845, and after visiting many places in Asia, and on the continent of Europe, reached England in Oct., 1848. This attack seems to have died out somewhere in America in 1849. The third visitation appeared in England for a short time in 1853, again burst forth in Sep., 1854, and after spreading over other parts of Europe, ceased in 1856. It broke out again in Egypt in the summer of 1865, and spread over Europe, appearing at Paris in Sep. Two cases occurred at Southampton Oct. 24. The Cholera Conference at Constantinople was formally opened Feb. 13, 1866.

CHOLET, or CHOLLET (Battle).—The royalists of La Vendée were defeated by the republicans at this place in France, Oct. 17, 1793.

CHONDA (Battle).—Sir Hugh, afterwards Lord Gough, gained a decisive victory over the Mahrattas at this town in Gualior, Dec. 29, 1843.

CHOTUSITZ.—(*See* CZASLAU.)

CHOUANS.—This name, given to bands who fought against the republicans in Britanny and La Vendée, during the French Revolution, is said to have been derived from their leader, Jean Cottereau, who went by the name of Chouan, or from the watchword "chou, chou," which was their battle-cry. Lord Stanhope says, "The insurgents of Britanny were known by that name, a word of doubtful origin, and said to be corrupted from *chat-huant*, the night-owl, to denote their secret signal in their nightly expeditions." The rebellion commenced in 1792, and in Oct., 1793, they defeated the republican forces at Laval, in Britanny. Their leader Cottereau fell in an engagement at Misdon, July 28, 1794, and they sustained a serious defeat at Quiberon, July 20, 1795, but their cause was not finally lost till Nov. 9, 1799, when Napoleon Buonaparte substituted his despotism for the government of the Directory. At the time of their greatest power the Chouans numbered 100,000 armed men. It broke out again in 1803 and in 1814, but was speedily suppressed.

CHRISM.—The oil consecrated by the bishop, and used in the Greek and Roman Catholic churches in baptism, confirmation, ordination, and extreme unction. It was prepared on Holy Thursday. Taylor (Glory of Regality, p. 347) remarks, "The distinction between the oil and the chrism of our rituals may be explained by showing their respective uses in the ceremonies of the Christian Church. In the earlier ages three kinds of unction were employed in the offices of religion: 1st, that for sick persons; 2nd, that for the *catechumeni*, or persons not yet baptized or confirmed; and 3rd, that used in baptism, confirmation, or consecration. The former of these were with oil consecrated for the two several purposes by the priest, but the latter with an unguent of oil mingled with balm, which was prepared at a particular season, and always consecrated by a bishop, by whom only it could be used, except in cases of necessity in the rite of baptism." Our sovereigns down to Elizabeth were anointed with this last-mentioned chrism at the coronation.

Bingham Antiq. xi. ch. i. s. 3 says, "And because the divine operations of the Holy Spirit in sanctifying grace are sometimes in Scripture called *the unction* or *anointing of the Spirit*, therefore baptism had also the name of *chrism* or *unction*, from this noble effect attending it."

CHRIST (Order of).—On the abolition of the Templars by Clement V. in 1312, King Dionysius of Portugal preserved the order in his dominions, but changed its title in 1317 to that of "The Knights of Christ," or "The Order of our Lord Jesus Christ." This arrangement was sanctioned by Pope John XXI. or XXII. in 1319. The seat of the order was transferred from Castro-Marino to Tomar in 1366. The new order afterwards attained such power that King John III. was obliged to obtain an edict from Pope Hadrian VI. by which the grand mastership of the order became vested in the kings of Portugal in 1522.

CHRISTAUDINS, or CHRISTODINS.—This name was in the 16th century applied to the Protestants in France, to render them contemptible, because, as their enemies pretended, they could only talk about Christ.

CHRIST CHURCH (Oxford).—This college, called Cardinal College, was founded by Wolsey, who in 1524 obtained permission to convert the priory of St. Frideswide into a seminary. On Wolsey's death it reverted to Henry VIII., who re-established it as King Henry's College Sep. 27, 1532. It received further endowments, was changed into a cathedral church, and called Christ Church, in 1546, the dean and canons being required to maintain the school. The library was annexed in 1716, and completed in 1761. A fire broke out in the hall March 3, 1809. It was fortunately extinguished, though the damage amounted to £12,000.

CHRISTIAN ÆRA — *See* ANNO DOMINI.)

CHRISTIAN CHARITY (Order).—This order of knighthood was founded by Henry III. (1574—1589) of France, for the support of maimed officers and soldiers who had done good service in the wars. It was completed by Henry IV. (1589—1610), and was superseded by the Hôtel des Invalides, founded by Louis IV. in 1671.

CHRISTIAN CONNECTION. — This sect, whose members deny the divinity of Christ, arose in the United States early in the 19th century.

CHRISTIANIA (Norway), the capital, was founded by Christian IV. in 1624, on the site of the ancient city of Opslo, destroyed by fire May 24 in that year. Charles XII. advanced to Christiania in 1716, and laid siege to the castle, supposed to have been built about 1302; but he was compelled to retire. It is the seat of a bishop. The university was founded in 1811, and the observatory in 1833. A fire occurred at Christiania April 13, 1858, when the Exchange, the Bank, other public buildings, and a large part of the city were destroyed.

CHRISTIANITY.—The religion professed by all believers in Jesus Christ, being the fulfilment and completion of the Mosaic dispensation. The disciples of our Saviour were first called Christians at Antioch (Acts xi. 26), in 42; and the word occurs but twice more in the New Testament, namely, in the address of King Agrippa to Paul (Acts xxvi. 28), in 60, and in Peter's (1 Epist. iv. 16 exhortation, "If any man suffer as a Christian, let him not be ashamed." This epistle was written about 59. Though Christian was the name to which the primitive Church adhered, its followers were known under various designations; amongst which may be mentioned, Believers, Brethren, Chrestians, Elect, Gnostics, Jesseans, Nazarenes, and Theophori.

CHRISTIANSAND (Sweden), founded by Christian IV. in 1641.

CHRISTIANSFELD (Schleswig).—The Moravian brethren formed a settlement here in 1772.

CHRISTINOS.—(*See* CARLISTS.)

CHRISTMAS BOX.—The practice of giving presents on Christmas Day arose out of the Pagan custom of the Paganalia, instituted by Servius Tullius B.C. 550. On these festivals, celebrated at the commencement of the year, an altar was erected in every village, when each person (man, woman, and child) was expected to contribute a coin. From this primitive mode of counting the population, new year's gifts, of which the English Christmas boxes are a modification, arose. Aubrey speaks of a pot, in which Roman coins were found, resembling the earthen boxes formerly used by our apprentices. A circular against the practice of giving Christmas boxes to the messengers of the Foreign Office and other government servants was issued in 1836.

CHRISTMAS CAROLS were first sung in celebration of the Nativity in the 2nd century. The first collection of English Christmas Carols was published in 1521.

CHRISTMAS DAY.—The Nativity was not celebrated on the same day by all the primitive Churches. For two or three centuries the Eastern Church kept the feast Jan. 6, whilst the Latin Church observed it Dec. 25. The festival is believed to have originated in the 2nd century. Dionysius Exiguus, a Scythian monk, about 527, first fixed as an æra the birth of Christ, Dec. 25, in the year of Rome 753, when Lentulus and Piso were consuls. This computation has been followed up to the present time, though the best authorities are agreed that this is neither the month nor the year in which the Saviour of mankind became incarnate. The date generally received is Friday, April 5, B.C. 4.

CHRISTMAS ISLAND (Pacific Ocean) was discovered by Capt. Cook in his last voyage, Dec. 23, 1777. He landed Dec. 25, and named the island after the day.

CHRISTOPHER'S, ST. (Atlantic). — This island, vulgarly called St. Kitts, and named by the natives "Liamuiga, or The Fertile Isle," was discovered by Christopher Columbus in 1493. Warner, an Englishman, formed a settlement in Jan., 1623, the buccaneers landed in 1625, and the French and English, having quarrelled, occupied different portions. An English expedition landed June 21, 1690, and the island capitulated July 14. It was again taken from the French July 15, 1702, and was ceded to England by the treaty of Utrecht in 1713. The French landed 8,000 men here Jan. 11, 1782,

during the American war, and the small garrison, only 600 strong, retired to a strong position, called Brimstone Hill. An English squadron sent for its relief, under Admiral Hood, engaged with the Count de Grasse's fleet Jan. 26, 1783. Brimstone Hill, closely besieged, capitulated Feb. 13. The island was restored the next year.

CHRIST'S COLLEGE (Cambridge).—A college called God's House, founded by Bingham in 1439, was removed in 1446 by Henry VI. and named Henry the Sixth's College. Margaret, Countess of Richmond and Derby, in 1505 obtained a license from her son Henry VII. to re-establish it under the name of Christ's College. The Tancred Studentships were founded in 1721.

CHRIST'S HOSPITAL, or the BLUECOAT SCHOOL (London), the site of the monastery of the Grey Friars, was granted by Henry VIII. to the city of London, for relieving and succouring the poor, in 1547. In 1552 the city of London fitted up a part of the monastery for the reception of children, and 340 were received in Nov. Their dress, at first russet cotton, was at Easter, 1553, changed to blue; whence the present name of the school. The patent of foundation by Edward VI. bears date June 26, 1553. The school was almost destroyed in the fire of 1666. Charles II. added the mathematical school in 1673. The branch establishment at Hertford was founded in 1683, and the writing-school was endowed by Sir John Moore in 1694. Owing to the decay of great part of the original erection, it has been rebuilt. The new infirmary was completed in 1822, and the first stone of the hall was laid by the Duke of York in April, 1825.

CHRIST'S THORN.—The *Zizyphus paliurus*, supposed to be the same from which the crown of thorns was made, was brought to this country from Africa in 1596.

CHROMIUM.—This metal was discovered in 1797 by N. L. Vauquelin, a distinguished anatomical chemist, born in Normandy.

CHRONICLES (First and Second Books).—(*See* CANON OF SCRIPTURE.)

CHRONOGRAMS, or CHRONOGRAPHS, numerical anagrams, were much used in the Middle Ages for inscriptions, especially by the Germans. An early example occurs on a bell in the Tour de l'Horloge at the Tuileries, which bears three French lines purporting chronogrammatically that it was cast in 1371. Michael Stifelius, a Lutheran minister at Würtemberg, foretold from the Latin text of John xix. 37, that the world would come to an end at 10 o'clock on the morning of Oct. 3, 1533; the words in question being "VIDebVnt InqVeM transfIXerVnt," the capital letters of which make, when transposed, MDXVVVVIII., or 1533. It is related that the pastor was severely beaten by his congregation for having misled them by this prediction. The following chronogram on Queen Elizabeth indicates MDCIII., or 1603, the year of her death:—My Day Is Closed In Immortality.

CHRONOLOGY.—Sir Isaac Newton maintained that Europeans had no fixed chronology before the conquest of Babylon by Cyrus, B.C. 538, and that all dates assigned to previous events have been since deduced by calculation and reasoning. Eratosthenes (B.C. 274—194) is styled the father of chronology. Julius Africanus, who flourished early in the 3rd century, was the first Christian systematic chronologist. Sir Isaac Newton's "Chronology of Ancient Kingdoms Amended" was published in 1728. "L'Art de Vérifier les Dates," by the Benedictines Maur d'Antine, Durand, and Clemencé, originally appeared in one volume in 1750, but has been extended in subsequent editions until the last, published at Paris, 1818—1831, contained 38 volumes. Blair's Chronology first appeared in 1754. Playfair's "System of Chronology" in 1784, Dr. Hales's "New Analysis of Chronology" 1800—1812, and Clinton's "Fasti Hellenici" and "Fasti Romani" 1824—1850. The "Chronology of History" of Sir Nicholas Harris Nicolas first appeared in 1832. The Chronological Institute of London was established in 1852. (*See* ÆRA, CALENDAR, OLYMPIAD, &c. &c. &c.)

CHRONOMETER.—Gemma Frisius, about 1530, proposed a horological machine for ascertaining the relative longitude of ships at sea, which was described in Carpenter's Geography in 1635. Dr. Hooke constructed a marine pendulum clock for a similar purpose about 1662, and Huyghens contrived an instrument combining the principles of the spring and the pendulum, which was tested with favourable results in 1664. The English Government having in 1714 offered liberal sums for methods of determining the longitude at sea, James Harrison constructed chronometers in 1726, 1739, 1749 or 1758, and 1761, receiving various rewards, which amounted in 1774 to £20,000. (*See* CLOCK, WATCHES, &c.)

CHRONOSCOPE. — This instrument, in which galvanism is employed for the measurement of very small intervals of time, was invented by Wheatstone in 1840.

CHRYSOPOLIS.—(*See* SCUTARI.)

CHUMPANEER (Hindostan) was taken by Mahmoud, King of Guzerat, in 1483, after a siege of 12 years. The Emperor Humayun seized it in 1534, and it subsequently formed part of the Mahratta territory. The British took it Sep. 17, 1802, and in 1803 it was annexed to Scinde.

CHUNAR, or CHUNARGHUR (Hindostan), was held by the Emperor Baber in 1529, and taken by the Affghan Shir Khan in 1530. Humayun, the successor of Baber, regained possession in 1538, after a siege of six months. In 1763 the town was taken by the British, to whom it was formally ceded in 1768. A treaty was concluded here between Warren Hastings and the Nabob of Oude in 1781.

CHUPAS (Battle).—During the civil wars amongst the Spanish conquerors of Peru, Vaca de Castro defeated Almagro's army after a hotly-contested battle in the plains of Chupas, Sep. 16, 1542. Almagro escaped to Cuzco, where he was immediately made prisoner and executed.

CHUQUISACA (South America), the capital of Bolivar, was founded by one of Pizarro's officers in 1539. It was at first called the "Villa de la Plata," or "City of Silver," in allusion to the mines in the vicinity.

Chuquisaca was made a bishopric in 1551, and erected into an archbishopric in 1608. The city is sometimes called Sucré, from the general who secured the deliverance of the country by his victory at Ayacucho, Dec. 9, 1824.

CHURCH.—Bingham supports Mr. Mede's view that churches, or buildings for the performance of divine services, existed in the 1st century. St. Paul (1 Cor. xi. 22) speaks of the church as a place set apart for sacred duties. Towards the end of the 2nd century Clemens Alexandrinus used the word *ecclesia* for the place of assembly; and Eusebius, referring to the peace enjoyed by the Christians from the persecution of Valerian to that of Diocletian (253—303), declares that the Christians had increased so greatly in that half-century, that "their ancient churches were not large enough to receive them, and therefore they erected from the foundations more ample and spacious ones in every city." St. Austin, moreover, founds the use and building of churches on 1 Tim. ii. 1, and declares that as soon as the Christian religion was planted in the world, then churches were built. Churches existed in this island at a very early period of the Christian æra. Gildas speaks of the restoration of those destroyed during the Diocletian persecution. The Emperor Constantine I. built several new churches, and repaired and beautified others in the East. In 326 he laid the foundation of the temple called Sancta Sophia, which was completed by his son Constantius in 360. The first English churches were made of wood. During the 4th century Bishop Ninias built a stone church in Galloway, and on account of its extreme rarity the place was called Whitchurch.

CHURCH CONGRESS.—A church congress was held at Manchester Oct. 13–15, 1863, at Bristol Oct. 11–14, 1864, and at Norwich Oct. 3–7, 1865.

CHURCH OF ENGLAND.—The early history of the Church in this island is given under BRITISH CHURCH (*q. v.*). Many laws for the regulation of the Church were made by the Anglo-Saxon kings. Its right of sanctuary was rigidly enforced. Attempts at encroachment by Rome were frequently opposed, and the first article of Magna Charta (1215) provided that the Church of England should be free, and enjoy her whole rights and liberties inviolable. This was confirmed by subsequent acts. The connection with the Church of Rome was entirely severed at the Reformation. In 1530, the clergy in convocation acknowledged Henry VIII. as supreme head of the English Church; and by 25 Hen. VIII. c. 21 (1534), the papal power in England was abrogated. The king was appointed supreme head of the Church by 26 Hen. VIII. c. 1 (1534). The Articles were drawn up in 1551, and published in 1553. They were 42 in number. They were revised and reduced to 39 in 1562. At the Union in 1800, the Church of Ireland was united with that of England, under the title of the United Church of England and Ireland. (*See* EPISCOPACY, HIGH and LOW CHURCH, and PRESBYTERIANISM.)

CHURCH-RATES.—This charge for maintaining the fabric of the Church, &c., existed in England in very early times. One of Alfric's canons, issued in 970, and an act of a witenagemot, held by Ethelred II. in 1014, are supposed to refer to Church-rates. Several bills have been introduced into the House of Commons for the abolition of Church-rates.

CHURCH OF SCOTLAND.—The General Assembly which met at Glasgow abolished episcopacy, and deposed the bishops, Dec. 20, 1638; from which time Presbyterianism has been adopted as the religion of that part of the United Kingdom. The Presbyterians quarrelled in 1843, when the Free Church (*q. v.*) was established.

CHURCHWARDENS.—These officers are said to have been first appointed by an African council about 425. In England, where they were anciently called church reeves, they were sometimes appointed by the clergyman of the parish, and sometimes by the clergyman and the parish, according to custom. The 89th canon of 1603 directs that "churchwardens shall be chosen yearly in Easter week by the joint consent of the minister and parishioners, if it may be; and if they cannot agree, the minister shall choose one, and the parishioners another." From a communication in *Notes and Queries*, it appears that three churchwardens have been chosen annually at Attleborough, in Norfolk, since 1617.

CHURCHYARD.—The practice of interring the dead in churchyards arose in the 6th century. The Council of Braga, in 563, allowed men to be buried in the churchyard, under the walls of the church, but prohibited burial within the church. The French, however, retained the ancient practice until permission was accorded for interment in churchyards by the Council of Nantes in 660. In former times churchyards were privileged places, and property was often carried to them for safety. (*See* BURIAL and CEMETERY.)

CHUSAN (China Sea).—The principal island of this group, called Chusan, was captured by the English July 5, 1840; and evacuated Feb. 25, 1841. Its chief city was again captured, and the island re-occupied, Oct. 1, 1841. By the treaty of Nankin, Aug. 29, 1842, the English were to hold this island until the indemnities had been paid, and certain ports opened. It was restored to the Chinese in 1846, again occupied in 1860, and again restored in 1861.

CIBALIS (Battle).—During the civil war between Constantine and Licinius, the latter was defeated near this city, in Pannonia, Oct. 8, 314 A.D. Licinius abandoned his camp and magazines, and retreated with great expedition.

CIGAR-SHIP.—An iron screw steam yacht, constructed at Millwall in the form of a cigar, was launched Monday, Feb. 19, 1866, and named the *Ross Winans*.

CILICIA (Asia Minor).—This country was originally inhabited by a Phœnician tribe. Sennacherib subdued Cilicia about B.C. 680. Syennesis, King of Cilicia, is said to have assisted in a mediation for peace between Cresus, King of Lydia, and the Medes, B.C. 610. Cilicia was afterwards subject to Persia, and supplied 100 ships for the invasion of Greece,

B.C. 480. The inhabitants indulged in piracy, and the Romans sent several expeditions against them. M. Antonius overran the country B.C. 102, and it was finally conquered by Pompey B.C. 66, and was made a Roman province B.C. 64. It was overrun by the Saracens in the 7th century. They were expelled by Zimisces in 964. It underwent various changes, and was finally conquered by Amurath I. in 1387.

CIMBRI.—This Celtic tribe, inhabiting Jutland, having joined with the Teutones, entered Illyria, where they defeated Cn. Papirius Carbo, at the head of a consular army, B.C. 113. After this triumph they advanced into Gaul, B.C. 112, passed into Spain, and, reappearing on the frontiers of Transalpine Gaul, defeated two Roman armies B.C. 109 and 107. They inflicted a terrible defeat at Arausio on another Roman army, led by two consuls, Oct. 6, B.C. 105, after which they withdrew into Spain. The Celtiberians drove them out B.C. 103; whereupon the Cimbri returned into Gaul. Marius collected a large army and went to oppose them. The Cimbri and Teutones separated into two bodies, the former taking the road through Helvetia, and the latter pressing forward to assail the Roman army. Their intention was to reunite their forces on the Lombard plains. The Teutones were attacked and overwhelmed by the Romans, and 100,000 men are said to have perished on that occasion, B.C. 102. The Cimbri in the meantime had reached the valley of the Adige (*q. v.*), where they defeated the Roman army under Quintus Catulus. He formed a junction with Marius and allured them into an unfavourable position, in which they were defeated and exterminated, B.C. 101. (*See* CAMPUS RAUDIUS.) The women, having put their children to death, committed suicide. A distinct tribe was discovered, in the middle of the 18th century, inhabiting the villages in the mountains near Verona and Vicenza, and speaking the Danish language. Some writers endeavoured to prove that these people were a remnant of the Cimbri defeated by Marius.

CIMMERII, or CIMMERIANS.—This nomadic race, inhabiting the Crimea, and parts of the neighbouring country, having been expelled by the Scythians, passed along the shores of the Euxine, invaded Asia Minor, and pillaged Sardis, the capital of Lydia, B.C. 635. In this country they are said to have remained until about B.C. 617, when they were defeated and driven out of Asia Minor. Little authentic is known of this people. Homer refers to another people of the same name, fabled to have dwelt in a land of perpetual darkness. Hence the term "Cimmerian gloom."

CINCINNATI, or CINCINNATUSES. — A society or order established by the Americans during the revolutionary war, about 1783, was for a time very popular.

CINCINNATI (United States), the metropolis of Ohio, first settled by the name of Losantеville, Dec. 28, 1788, was attacked in 1790 by the Indians, who killed about 20 of the inhabitants and proved formidable enemies for several years. It was incorporated a city in 1819. The Medical College of Ohio was chartered in 1819, Lane seminary was founded in 1829, a law school was established in 1833, and the first stone of the observatory was laid by J. Quincy Adams, Nov. 9, 1843. The Melodeon, a public hall for musical performance and other purposes, was erected in 1846, and the first stone of the Ohio Female College was laid Sep. 21, 1848.

CINNAMON.—The Hebrews used this spice in their religious ceremonies B.C. 1496 (Exod. xxx. 23). It is also mentioned in the Song of Solomon (iv. 14), and in Prov. vii. 17. The tree flourishes best at Ceylon, from which island Europe has derived its principal supplies from the earliest times. The Society for the Encouragement of Arts, Manufactures, and Commerce in 1773 awarded a gold medal to Dr. Young for introducing the culture of the cinnamon-tree into St. Vincent. A few plants found in a French ship bound from the Isle of France to Hispaniola, and captured by Rodney, were presented by him to the Jamaica planters in 1783, and thus the cultivation of the tree was introduced into that island. No sooner had the passage round the Cape of Good Hope been discovered than the Portuguese endeavoured to get the cinnamon trade, which had before that period been monopolized by Arab merchants, into their hands. They established a factory at Ceylon, and concluded a treaty with the King of Kandy, who engaged to furnish them with 124,000 lb. annually, in return for their assistance against his enemies. The Dutch became the rivals of the Portuguese, and in 1612 the King of Kandy engaged to deliver to them all the cinnamon he could collect. This led to a struggle, which was terminated in 1644 or 1645, by an agreement between the Dutch and the Portuguese to share the produce between them. War broke out again in 1652; the Dutch captured Colombo in 1656, and in 1663 the Portuguese were finally excluded from all participation in the trade. Ceylon was captured by the English in 1795, when the trade passed from the control of the Dutch.

CINQUE CENTO, an abbreviation for five hundred, applied to a style of art that arose in Italy early in the 16th century.

CINQUE PORTS.—The commencement of this system of defence against invasion may be traced to the period of the Roman occupation of England. Jeake states that the five ports, Hastings, Hythe, Sandwich, Dover, and Romney, were enfranchised in the time of Edward the Confessor, although only three, Sandwich, Dover, and Romney, are mentioned in Domesday Book. William I. erected the district of the Cinque Ports into a kind of palatine jurisdiction under a warden, in whom the military, naval, and civil authority was combined. Richard I. admitted Rye and Winchelsea to the privileges of the Cinque Ports, by a charter dated March 27, 1191. The number was thus increased to seven principal ports, whilst smaller places were attached to them as subordinate ports. They were required to furnish a fleet for the defence of the sea, and, according to an ordinance of Henry III. in 1229, in the following proportions:—Dover and Hastings, each 21 ships, carrying 21 men and one boy; Winchelsea, 10 ships; and Hythe, Sandwich, and Rye, 5 each. These vessels were to serve

15 days at the expense of the towns, but were paid for any service beyond that time. The Cinque Ports received their charter of confirmation from Edward I. in 1278, and all their liberties and free customs were secured to them by 25 Edw. I. c. 9 (1297). The jurisdiction of the constable of Dover Castle was defined by 28 Edw. I. c. 7 (1300). By an act passed in 1689, the right of nominating the members for the Cinque was taken from the lord warden, in whom it had been vested. The number of members returned by the Cinque Ports was reduced from 16 to 8 by the Reform Bill in 1832. The jurisdiction of the lord warden in civil suits, &c., was abolished by 18 and 19 Vict. c. 48 (July 2, 1855), amended by 20 and 21 Vict. c. 1 (June 26, 1857).

CINTRA (Convention).—The day after the battle of Vimeira, Gen. Kellermann proposed an armistice, which was signed at Cintra, in Portugal, Aug. 22, 1808. The convention, erroneously called the convention of Cintra, was finally concluded at Lisbon, Aug. 30, and consisted of 20 articles, to which three additional articles were appended. The French by this convention agreed to evacuate Portugal. Their soldiers were allowed to disembark with arms and baggage, and were not to be considered prisoners of war, the English Government furnishing the necessary transports to convey them to their own country. They were, however, compelled to relinquish all their spoils. This agreement excited so much discontent in England, that a board of inquiry was summoned by a warrant dated Nov. 1, 1808. In the report, issued Dec. 22, the Board declared that no further military proceeding was necessary on the subject, and, Dec. 25, a majority of the Board voted approval of the armistice of Aug. 22, and of the convention of Aug. 30.

CIPHER.—The Spartan *Scytale* was in use at least as early as B.C. 400, and is supposed by some authors to be the earliest attempt at writing in cipher. Æneas Tacticus, who was contemporary with Aristotle, and flourished about B.C. 350, was one of the most eminent ancient masters of the art of writing in secret characters, having collected about 20 different modes, all which were unintelligible, except to those who knew the key. The first modern author who described this art was the Abbé Trithemius, whose "Polygraphia" appeared in 1499; since which period many writers have directed attention to the subject.

CIRCASSIA (Asia) was conquered by the Huns in the 5th century, by the Chazars in the 11th century, and at the commencement of the 13th century fell under the Mongol Emperor of Kaptchak. Timour, or Tamerlane, invaded it in the 14th century, but was unable to effect a permanent conquest. Its first intercourse with Russia took place in 1555. It afterwards submitted to the khans of the Crimea, but, owing to their tyranny, the Circassians revolted in 1708, and applied for protection to the Ottoman Porte. At the peace of Belgrade, Sep. 18, 1739, Circassia was declared independent, but it soon returned to its dependence on Turkey, which did not renounce all right to exercise authority over it till the peace of Kutschouc-Kainardji, July 10, 1774. In 1783 Circassia was claimed as part of the Russian empire, but it was not finally incorporated therewith till the treaty of Hadrianople, Sep. 14, 1830. The Circassians strenuously resisted Russian domination under their leader Schamyl, who was captured Sep. 7, 1859. Vaidar, the last stronghold of the Circassians, capitulated to the Russians April 28, 1864; three of the tribes accordingly left their country for Turkey. Starting to the number of about 300,000, many died from hardships on the shores of the Black Sea, and many more perished at Trebizond, from fever occasioned by over-crowding.

CIRCASSIANS.—(*See* BORGITES.)

CIRCELIONES, or CIRCELLIONES.—(*See* AGONISTICI.)

CIRCLES OF GERMANY.—Maximilian I. in 1501 carried into execution the design of Wenceslaus, attempted by Albert II., of dividing Germany into circles. The empire, the electorates and the dominions of Austria excepted, was divided into six circles; viz., Bavaria, Franconia, the Upper Rhine, Lower Saxony, Swabia, and Westphalia. In 1512 four more were added—Austria, Burgundy, the Lower Rhine, including the three ecclesiastical electors and the elector Palatine, and Upper Saxony, including the electorates of Saxony and Brandenburg. "It was," says Hallam, "the business of the police of the circles to enforce the execution of sentence pronounced by the Imperial Chamber against refractory states of the empire." The circles were abolished by the Confederation of the Rhine, concluded at Paris, July 12, 1806, and each German prince resumed such of his titles as referred to his connection with the German empire, Aug. 1.

CIRCUITS.—In a great council held at Northampton Jan. 26, 1176, Henry II. divided England into six districts, to each of which he appointed three itinerant judges, who were to make their circuit round the kingdom once in seven years, for the purpose of trying causes. Various changes in the number of the circuits, &c., were afterwards made. England and Wales are now divided into eight circuits, to which the judges go twice a year.

CIRCULATING LIBRARY.—Jerome relates that Pamphilius, Bishop of Cæsarea (put to death Feb. 16, 309) collected 30,000 religious books, for the purpose of lending them; and this is the first notice of a circulating library. In 1342 the stationers of Paris were compelled to keep books to be lent on hire. This was intended for the benefit of poor students, before printing had been invented. Merryweather (Bibliomania in the Middle Ages) remarks: "The reader will be surprised at the idea of a circulating library in the Middle Ages; but there can be no doubt of the fact that they were established at Paris, Toulouse, Vienna, and other places." Catalogues, with the charge for reading, were exhibited in their shops. A circulating library was established at Edinburgh in 1725. A prospectus for establishing one in some convenient place near the Royal Exchange, London, appeared June 12, 1740. There were, however, only four in the

metropolis in 1770; but since that period the number has rapidly increased.

CIRCULATION.—(*See* BLOOD.)

CIRCUMCELLIONES.—(*See* AGONISTICI.)

CIRCUMCISION.—The practice of this rite amongst the Hebrews was instituted by Abraham in accordance with the divine command, B.C. 1897 (Gen. xvii. 10—14). It existed amongst other nations previous to that time. Rawlinson considers that it was practised by the Egyptians long before the birth of Abraham, or B.C. 1996. The custom, followed by the Mohammedans, prevailed amongst many nations, and has been found to exist in the islands of the Pacific.

CIRCUMNAVIGATION OF THE GLOBE.—The first ship by which the circumnavigation of the world was accomplished was the *Victoria*, forming one of the expedition that sailed from San Lucar under Ferdinand Magalhaens, or Magellan, a Portuguese commander, Sep. 20, 1519. With three out of the five ships that formed the expedition, he passed through the straits which bear his name, connecting the Atlantic and Pacific Oceans, Nov. 28, 1520. Magellan was killed in an encounter on the Philippine Islands in 1521. Sebastian del Cano, in the *Victoria*, the only ship which returned to Europe, sailed round the Cape of Good Hope, and arrived at San Lucar Sep. 6, 1522, having achieved for the first time the circumnavigation of the globe. The following are the most celebrated expeditions:—

Date of Departure.	Date of Return.	Navigator.
1519, Sep. 20 or 21	1522, Sep. 6	Magellan.
1577, Dec. 13	1580, Sep. 26	Sir Francis Drake.
1586, July 21	1588, Sep. 9	Cavendish.
1598, Sep. 13	1601, Aug. 26	Van Noort.
1614, Aug. 8	1617, July 1	Spilbergen.
1615, June 14	1617, July 1	Schouten and Le Maire.
1623, April 29	1626, July 9	L'Hermite
1703, Sep. 11*	1706, July	Dampier.
1708, Sep. 1	1711, Oct. 14	Rogers.
1719, Feb. 13	1722, July 30	Shelvocke.
1721, Aug. 21	1723, July 28	Roggewein.
1740, Sep. 18	1744, June 15	Anson.
1763, Sep. 15	1769, Mar. 16	Bougainville.
1764, July 3	1766, May 7	Byron.
1766, Aug. 22	1768, May 20	Wallis.
1766, Aug. 22	1769, Mar. 20	Carteret.
1768, Aug. 26	1771, June 12	Cook.
1772, July 13	1775, July 30	Cook.
1776, July 12†	1780, Oct. 4	Cook.
1790, Aug.	1792, June 19	Edwards.
1822, Aug. 11	1825, Mar. 24	Duperry.
1838, Aug. 18	1842, June 10	Wilkes.
1857, April 30	1859, Aug. 26	Wullerstorf-Urbair.

CIRCUS, called by the Greeks Hippodrome, was devoted by the Romans to horse and chariot races. The most celebrated and the earliest was the Circus Maximus, said to have been built by Tarquinius Priscus, B.C. 605. There were several of these buildings in Rome. The Circus Flaminius was erected B.C. 220. The founder is supposed to have been Caius Flaminius, who was defeated by Hannibal at Thrasymene, B.C. 217. Gladiatorial shows were first exhibited B.C. 264. The Goths abolished the games A.D. 410. (*See* AMPHITHEATRE.)

CIRCUS FACTIONS.—The race, at its first institution, was a contest between two chariots, distinguished by *white* and *red* colours. To these *green* and *blue* were afterwards added; the four colours, according to some authorities, being intended to represent the four seasons. So excited did the people become in these contests, that the supporters of the different candidates degenerated into factions, and frequently provoked tumults that ended in sanguinary conflicts. Even princes shared in this folly, and Gibbon (ch. xl.) relates that Caligula, Nero, Vitellius, Verus, Commodus, Caracalla, and Elagabalus were enrolled in the blue or green factions of the circus. The system, with its abuses, was transferred to Constantinople, in which two factions, the green and the blue, contended for supremacy. Justinian I. favoured the former, and during the celebration of the festival of the Ides of January, in the fifth year of his reign, A.D. 532, a quarrel arose between them. For five days the city was in their power, and the cathedral of St. Sophia, the baths of Zeuxippus, part of the palace, and many edifices, were destroyed by fire. Their watchword was *Nika*, "Vanquish," by which name the contest is sometimes designated. The outbreak was suppressed by Belisarius, when much slaughter ensued; and though the circus was closed for several years, the fury of the factions again burst forth at its restoration.

CIRCUTORES.—(*See* AGONISTICI.)

CIRENCESTER (Gloucestershire).—This ancient city was a station of the Romans, which they called Corinium. The Danes captured it in 878, and Guthrum wintered here in 879. Canute held a council at Cirencester in 1020. Henry I. founded its abbey in 1117. The inhabitants assailed and expelled the earls of Huntingdon, Kent, and Salisbury, who had formed a plot to restore Richard II., Jan. 6, 1400, and were rewarded for this service by Henry IV. Prince Rupert captured the town in Feb., 1643. It surrendered to the Parliamentary army during the same year. A fine mosaic pavement was found in 1723, and many antiquities have been from time to time discovered. The grammar-school was founded in 1750, and the Agricultural College in 1846.

CIRRHA (Greece).—This town of Phocis, the sea-port of Delphi and Crissa, with the latter of which it is often confounded, was of ancient origin. Its inhabitants levied exorbitant tolls on pilgrims passing through on their way to the temple of Delphi, and committed other outrages, on which account the Amphictyonic council declared war against them B.C. 595. This, the Cirrhæan or first Sacred War, was carried on by a joint force of Athenians, Sicyonians, and Thessalians, and after a long siege Cirrha was taken and razed to the ground, B.C. 586. The assailants are said to have poisoned the spring which supplied the town with water. All the males were put to the sword, the women and children sold to slavery,

* Only part of Dampier's expedition returned in 1706, the remainder, with the commander, having been detained in the East Indies, as prisoners, by the Dutch.

† Capt. Cook was killed by the Sandwich Islanders, Feb. 14, 1779. He was succeeded in the command by Capt. King.

and the Pythian Games were founded with the spoils.

CISALPINE REPUBLIC was formed by the union of the Cispadane and Transpadane republics, by Napoleon Buonaparte, in 1797. By the eighth article of the treaty of Campo-Formio, Oct. 17, 1797, the Emperor of Germany recognized this new state, which was therein stated to comprehend "Austrian Lombardy, the Bergamasque, the Bressau, the Cremasque, the city and fortress of Mantua, Peschiera, part of the Venetian states, the Modenois, the principality of Massa and Carrara, and the three legations of Bologna, Ferrara, and Romagna." By a decree dated Oct. 10, 1797, Napoleon annexed the Valteline to this republic. Constitutions were made and abrogated in rapid succession, and the interference of Napoleon became intolerable. Treaties of alliance and commerce were concluded between France and this republic in 1798, by which the last vestige of independence was destroyed. Austria refused to recognize its envoy, sent to Vienna in 1798, and its fortunes declined, owing to the reverses sustained by the French. It was, however, once more recognized by the Emperor of Austria, by the treaty of Luneville, Feb. 9, 1801; its independence was guaranteed, and some alterations were made in its limits, and it received an addition in the duchy of Modena. Other changes were made, and Napoleon nominated himself president, and changed its name to that of the Italian Republic, Jan. 26, 1802. It was merged in Napoleon's Italian kingdom in 1805.

CISPADANE REPUBLIC.—In 1796 Napoleon Buonaparte conceived the design of forming two republics from the Italian territories wrested from Austria and other states. They were called the Cispadane and Transpadane republics, and were both merged in 1797 in the Cisalpine Republic (*q. v.*).

CISTERCIANS.—This religious order was founded in 1098, by Robert, a Benedictine abbot of Molesme, in Burgundy, and received its name from Citeaux, in which forest, near Dijon, the first convent was situated. Its members increased rapidly, although their rules were extremely severe. They had a dispute with the Cluniacs or Cluniacensians, who accused them of too great austerity, whilst the Cistercians taxed the Cluniacs with having abandoned their regular discipline. The Cistercians followed the rule of St. Benedict, and having been reformed early in the 12th century by Bernard, Abbot of Clairvaux, were afterwards called Bernardines. They were introduced into England in 1128, and their first house, at Waverley, in Surrey, was completed in 1129. There were nuns of this order. (*See* BERNARDINES.)

CITATE (Battle).—The Russian troops occupied a strong position at this village on the Danube in the winter of 1853–4. Several skirmishes between the Cossacks and the Turkish cavalry took place near Citate towards the end of Dec., 1853, and the beginning of Jan., 1854. The Turks assailed the lines at Citate Jan. 6, and, after a desperate combat, expelled the Russians.

CITEAUX (France).—The seat of the abbey founded by Robert of Molesme in 1098, in which originated the order of the Cistercians. Part of the buildings of this abbey were converted in 1849 into a reformatory for juvenile delinquents. (*See* CISTERCIANS.)

CITY.—In Kerr's "Blackstone" a city is described as "a town incorporated, which is or hath been the see of a bishop: and though the bishopric be dissolved, as at Westminster, yet still it remains a city." The term is, however, applied to many large towns that have not enjoyed this distinction. Alphonso V. granted a charter to Leon in 1020, and Berenger, Count of Barcelona, in 1025, confirmed to the inhabitants of that city all the franchises they already possessed. Charters as old as 1110, though the precise date has not been ascertained, granted to French cities, are in existence. Lord Lyttleton states that in England many cities and towns were bodies corporate and communities long before the alteration introduced into France by Louis le Gros.

CITY CLUB (London).—In Old Broad Street, occupying the site of the Old South Sea House, was built in 1833.

CITY OF LONDON LIBRARY, in Guildhall, was founded in 1824, and is rich in works relating to the city of London, the borough of Southwark, and the county of Middlesex.

CITY OF LONDON THEATRE (London), situated in Norton Folgate, was opened early in 1837.

CITY OF REFUGE.—(*See* ASYLUM and SANCTUARY.)

CIUDAD RODRIGO, or RODERIC'S TOWN (Spain).—A strongly-fortified town which has sustained several memorable sieges. Henry II. of Castile failed in an attempt to wrest it from the Portuguese in 1370. Lord Galway captured it May 26 (O.S.), 1706. The French invested it June 1, 1810, and their breaching batteries commenced fire June 25. The Spanish garrison, after a gallant defence, surrendered July 11. Wellington invested it Jan. 8, 1812, and carried it by storm Jan 19. Its cathedral was built in the 12th century.

CIVIL CLUB (London) was established in 1669. Two carved chairs of that date are used by the stewards. This club has a chaplain.

CIVIL LAW.—(*See* ROMAN LAW.)

CIVIL LIST.—All the expenses of the English Government, including military charges, were formerly comprehended in one list, and defrayed out of the royal revenue. At the Restoration, in 1660, a division took place between the military expenses and those incurred for ordinary purposes. The revenues employed for the last-mentioned were termed the hereditary or civil-list revenues. The civil-list revenues averaged, during the reigns of William III. and of Queen Anne, £680,000 per annum. They were raised to £700,000 under George I.; to £800,000 under George II.; and in 1812 had reached £1,080,000. By the settlement of the civil-list, made by 1 Will. IV. c. 25 (April 22, 1831), a net yearly revenue of £510,000 was allotted to the king. Queen Victoria surrendered the hereditary revenues of the crown by 1 Vict. c. 2 (Dec. 23, 1837), receiving a clear yearly sum of £385,000 for the support of the royal household, and of the

honour and dignity of the crown. The following is the distribution of the money, according to the act :—

1. For her Majesty's privy purse	£60,000
2. Salaries of her Majesty's household, and retired allowances	131,260
3. Expenses of her Majesty's household	172,500
4. Royal bounty, alms, and special services	13,200
5. Pensions to the extent of £1,200 per annum.	
6. Unappropriated moneys	8,040
Total	£385,000

CIVIL SERVICE.—This term is applied to the large body of men by whose labours the executive business of the country is carried on. In its widest sense the civil service has been said to consist of above 50,000 persons. There are about 17,000 civil servants, exclusive of 17,000 inferior revenue officers, postmen, &c., 15,000 artificers and labourers in the government dockyards, and 4,000 office-keepers and messengers. By an order in council, May 21, 1855, a civil service commission was appointed to examine candidates for this service.

CIVIL SERVICE CLUB (London), for gentlemen holding, or having held, civil appointments under the crown, at home or abroad, was established April 5, 1865.

CIVIL SERVICE ESTIMATES.—The general expenditure of the state, exclusive of the sums required for the army and navy. For the financial year 1866–7, those estimates were :—

Public works and buildings	£993,906
Salaries and expense of public departments	1,585,056
Law and justice	2,675,344
Education, science, and art	1,387,515
Colonial and consular services	506,408
Superannuation and retired allowances and gratuities	344,766
Miscellaneous and special	166,841
Total	£7,856,836

CIVITA CASTELLANA (Battle).—Macdonald defeated the Neapolitans, at this town, in Central Italy, occupying the site of the Etruscan city Falerium Vetus, Dec. 4, 1798.

CIVITA VECCHIA, or OLD TOWN (Italy), is built on the site of the Centum Cellæ of the Romans. Trajan constructed the port A.D. 103. It was captured by Belisarius in 539; by Totila in 544, and by Narses in 552. The Saracens destroyed Centum Cellæ in 812, and the remnant of the inhabitants formed a settlement in the interior; from which circumstance the town was called Civita Vecchia, or Old Town. Clement XII. made it a free port. An English fleet appeared off Civita Vecchia in 1780, and threatened to destroy it on account of the assistance rendered to the cause of the Pretender by Clement XI., and another threat of the same kind was made in 1743. It capitulated to an English squadron Sep. 30, 1799. Capt. Louis, of the *Minotaur*, rowed up the Tiber in his barge, hoisted the English colours in the Eternal City, and was made provisional governor of Rome. The French expedition to Rome landed here May 25, 1849.

CIVITELLA DEL FRONTO (Battles).—Robert Guiscard defeated the united forces of the Emperor Henry III., Pope Leo IX., and the Greeks, at this place in Naples, in 1053. The castle, held by the forces of Philip II. of Spain, was besieged in 1557 by the French under the Duke of Guise, who, having vainly expected reinforcements from the Pope, and being unwilling to risk an encounter with the Duke of Alva, who was advancing against him with 22,000 men, raised the siege after three weeks and retired towards Rome.

CLACKMANNAN (Scotland).—In 1195, the church of this town, with its chapels, belonged to the abbey of Cambuskenneth. The castle, said to have been built by King Robert I. (Bruce) 1306—1329, and which was the residence in 1330 of King David II., was conferred by him upon Sir Robert de Bruce and his descendants in 1358–9. Clackmannan is mentioned as a royal burgh in acts of the Scotch parliament in 1540 and 1543.

CLAIRAC (France).—This town grew up round a Benedictine abbey founded about the 8th century. It was one of the first places in France to receive the principles of the Reformation, the abbot, Gerard Rousselle, having embraced Protestantism in 1527. It was taken by Louis XIII. in 1621.

CLAIRVAUX (France).—St. Bernard, who established a monastery at this village, near Bar-sur-Aube, in France, in 1114, died here Aug. 20, 1153, and was buried in the church. The abbey was converted into a prison about 1815.

CLANS.—Chalmers (Caledonia, vol. i. b. iv. c. 7) has the following observations respecting the Scottish clans :—"During Gaelic times, there existed, in every part of North Britain, clanship, from blood. Throughout the whole Scoto-Saxon period, as we have seen, there existed, from conquest and birth, universal villeynage, which disappeared during the 15th century. Amidst the anarchy of subsequent times, there arose various clans, which were divided, in the policy of those ages, into the clans of *the borders* and the clans of *the highlands*. From this state of society, and the want of employment, we may account for the facility with which great bodies of men could then be brought into action. In 1587, the chiefs of all those clans were obliged to give sureties for their quiet conduct, and were made answerable for their wrongs. The union of the two crowns dissolved the clans, and established the quiet of the borders : several of the other clans remained to our own times, often disturbing domestic tranquillity, and sometimes defying the mandates of law." The following list of the clans is given at the end of the statutes of the 11th parliament of James VI. (July 29, 1587) :—

MIDDLE MARCHE.

Elliottes	Nicksonnes.
Armestrangis.	Crosers.

WEST MARCHE.

Scottes of Eusdaill.	Carrutheres.
Beattisonnes.	Grahames.
Littles.	Johnstones.
Thomsonnes.	Jardanes.
Glendunninges.	Moffettes.
Irvinges.	Latumers.
Belles.	

HIE-LANDS AND ILES.

Buchannannes.	Clan-Mak-Thomas in Glenesche.
Mak-farlanes of the Arroquhair.	Fergussonnes.
Mak-knabbes.	Spaldinges.
Grahames of Monteith.	Makintoshes in Athoill.
Stewartes of Balquhidder.	Clan-Chamron.
Clan-Gregoire.	Clan-Rannald in Loch-Aber.
Clan-Lauren.	Clan-Rannald of Knoydert, Moydert, and Glengarrey.
Campbelles of Lochinel.	Clan-Lewid of the Lewis.
Campbelles of Innerraw.	Clan-Lewid of the Harrich.
Clan-Dowall of Lorne.	Clan-Neill.
Stewartes of Lorne, or of Appin.	Clan-Kinnon.
Clan-Mackeane Awricht.	Clan-Joane.
Stewartes of Athoill and partes adjacent.	Clan-Chattane.
Clanne-Donoquhy in Athoill and partes adjacent.	Grantes.
Meinzies in Athoill and Apnadull.	Fraseres.
	Clan-Keinzie.
	Clan-Avercis.
	Munroes.
	Murrayes in Southerland.

The act (20 Geo. II. c. 43) for abolishing heritable jurisdictions in Scotland, passed in 1747, put an end to the legal authority of the chiefs of clans.

CLARE COLLEGE (Cambridge).—University Hall, founded in 1326, having been destroyed by fire in 1342, was rebuilt and endowed in 1347 by Elizabeth de Burgh, one of the sisters and coheirs of Gilbert, Earl of Clare. From this benefactress it received its new name. The present hall was built in 1638. The old chapel, built in 1535, was never consecrated. The new chapel was commenced in 1763 and consecrated in 1769. Chaucer calls it Solere Hall.

CLARE, or CLAIRE, ST., or CLARISSES (Order).—This religious order was founded by St. Clare, with the aid of St. Francis of Assisi, in 1212. The order was confirmed by a bull of Innocent IV. At first the nuns followed the rule of St. Benedict; this was, however, modified by St. Francis in 1224, and by Urban IV. in 1264. Those who follow the modification of the rule by Urban are called Urbanists, and those who observe the original rule Damianists. Brought into England in 1293, under a license from Edward I., they had only four houses in this country. They were called Poor Clares.

CLAREMONT (Surrey) was built by Vanbrugh in the reign of Queen Anne, and named after the Earl of Clare, who became Duke of Newcastle in 1715. It was sold in 1769 to Lord Clive, by whom the house was rebuilt and the grounds newly arranged. On the death of Clive, in 1774, the house and estate passed into the hands of Lord Galway, and subsequently of the Earl of Tyrconnel, who sold them to Mr. Ellis in 1807. By 26 Geo. III. c. 25 (1816), the property was purchased by Government as a residence for the Princess Charlotte, who died here Nov. 6, 1817. Louis Philippe, King of the French, lived at Claremont on his retirement to England, March 4, 1848; and died here Aug. 26, 1850. His widow, Queen Marie Amelie, also died here, March 24, 1866.

CLARENCIEUX (King-at-Arms). — This name was given to a herald of the Duke of Clarence during the reign of Edward III. (1327—1377), and was confirmed by Edward IV., at whose funeral in 1483 Clarencieux king-at-arms was present.

CLARENDON CONSTITUTIONS.—A council was held at Clarendon, near Salisbury, Jan. 25, 1164, when these laws, defining the limits between the civil and ecclesiastical jurisdiction, and regulating certain church matters, were passed. Thomas Becket, Archbishop of Canterbury, having refused to sign them, withdrew from the kingdom in disguise, and landed at Gravelines Nov. 3. He excommunicated many of the bishops, clergy, and influential laymen, who had subscribed them, June 12, 1166; whereupon Henry II. banished 400 of the archbishop's supporters. The king and archbishop met at Fretville, in Touraine, July 22, 1170, and were reconciled. Soon after his return to Canterbury, Dec. 3, he excommunicated several nobles, and was assassinated before the altar of St. Benedict, in the cathedral, Dec. 29, 1170. These constitutions, most of which were annulled by the Pope, are given in Roger of Wendover's "Flowers of History," Lord Lyttleton's "Life of Henry the Second," and other works.

CLARENDON-DALLAS TREATY, intended to settle difficulties that had arisen between England and the United States, respecting the interpretation of the Bulwer-Clayton Treaty of April 19, 1850, was signed in London Oct. 17, 1856. It was altered in the United States, and signed in the new form March 12, 1857. To one of the amendments the British Government objected, and the treaty was never ratified.

CLARENDON PRESS (Oxford).—The design of establishing a press for the use of Oxford University was formed in 1672, at which time the business was carried on at the Sheldonian Theatre. From the profits arising from the sale of Lord Clarendon's "History of the Rebellion," the university was enabled, in 1711, to erect a special building for the purpose, after the designs of Vanbrugh. In 1721 the statue of Lord Clarendon was placed over the south entrance. The present university printing-office was commenced by Robertson in 1825, and completed by Blore in 1830, when the business was transferred from the Clarendon, which was converted into a museum, lecture-hall, &c. The new building was damaged by fire to the amount of £2,000, Feb., 1838.

CLARINET, or CLARIONET. — This wind instrument was invented by Christopher Denner, at Nuremberg, in 1690.

CLASTIDIUM (Battle).—Marcellus defeated the Gauls at this place, in Cisalpine Gaul, B.C. 222, whereupon they sued for peace. The modern town of Casteggio occupies its site.

CLAUSENBERG.— (*See* KLAUSENBERG.)

CLAVICHORD, or CLARICHORD. — This musical instrument is mentioned by Ottomarus Luscinus in 1536; but its invention may be referred to an earlier date. It was much used by nuns in convents.

CLAVIJO (Battle). — Ramiro defeated the Moors at Clavijo in 844. No less than 60,000 of them are said to have perished in the conflict and the retreat.

CLAZOMENÆ (Asia Minor).—This city, originally founded on the mainland by Ionian and other colonists, but subsequently removed,

for fear of the Persians, to an island in the bay of Smyrna, became a dependency of Athens, and was made tax-free by the Romans, B.C. 188. With other cities on the borders of the Ægean Sea, it was plundered by pirates B.C. 84.

CLEARING-HOUSE (Banking).—This establishment, for enabling bankers easily to interchange bills, cheques, &c., originated about 1775, when a building in Lombard Street was set apart for the purpose, under the direction of a committee chosen by the chief banking firms, and managed by two inspectors.

CLEARING-HOUSE (Railway).—For railway companies in England and Scotland to transact the business of their through traffic of goods and passengers passing over the lines of different companies, was regulated some time after its establishment, by the Railway Clearing Act, 13 & 14 Vict. (Local and Personal) c. 33 (June 25, 1850). The Railway Clearing-house in Seymour Street, London, was much enlarged in 1865.

CLEMENTINE, or HOLY LEAGUE.—(*See* Cognac.)

CLEMENTINES.—These spurious writings, amongst which are two epistles to the Corinthians, represented as the works of Clement, Bishop of Rome in the 1st century, are supposed to have been concocted by one of the sect of the Ebionites. This father of the Church is generally believed to be the Clemens mentioned by St. Paul (Phil. iv. 3). He died in 100 or 102. Some apostolic canons, constitutions, recognitions, &c., are included in the Clementines.——The constitutions of Pope Clement V. (1305—1314) are also called Clementines.

CLEMENTINES AND URBANISTS.—Gregory XI. returned to Rome, after a long residence at Avignon, in April, 1377, and thus terminated what is called the Babylonish Captivity of the popedom. He died March 27 or 28, 1378. An outcry was immediately raised for the election of an Italian pope, and Bartholomew Prignani, Archbishop of Bari, was chosen, April 9. He took the title of Urban VI. The French cardinals at Anagni declared the election void, Aug. 9, and elected Robert of Geneva pope, who took the title of Clement VII., Sep. 20. Such was the commencement of the schism by which the Latin Church was agitated and divided for 38 years. Each pope had his followers, and these were known by the names of Clementines and Urbanists.

CLEMENT'S INN (London).—This inn of Chancery is said by Dugdale, on the authority of an ancient record, to have been in existence long before 1479. The hall was built in 1715.

CLEOBURY (Battle).—Leofgar, Bishop of Hereford, having led an army against the Welsh king Griffith, was defeated and slain at this place, in Herefordshire, June 17, 1056. Several of his priests who had accompanied him to the field of battle fell at his side. The chroniclers do not agree respecting the name of the place at which the battle was fought. Roger of Hoveden says it was Glastonbury.

CLEOMENIC WAR.—(*See* Achæan League.)

CLEPSYDRA, or WATER-CLOCK.—The Chaldæans and the Egyptians are said to have made use of some ingenious invention of this kind in order to measure time. Vitruvius ascribes the invention to Ctesibius of Alexandria, who flourished about B.C. 250. P. C. Scipio Nasica introduced them at Rome B.C. 159. There can be no doubt that they were used by the Greeks at an early period. They were known in India in the 12th century. Modern water-clocks, invented during the 17th century, were introduced from Burgundy into Paris in 1693.

CLERGY.—Bingham (Antiq. b. i. ch. v. § 8) says: "As to the reason of the name *clerici* and *clerus*, St. Jerom rightly observes, that it comes from the Greek κλῆρος, which signifies *a lot;* and thence, he says, 'God's ministers were called *clerici*, either because they are the lot and portion of the Lord, or because the Lord is their lot, that is, their inheritance.' Others think some regard was had to the ancient custom of choosing persons into sacred offices by lot, both among Jews and Gentiles; which is not improbable, though that custom never generally prevailed among Christians." The distinction between the clergy and the laity commenced at the foundation of the Christian Church. The name clergy was at first given to the bishops, priests, and deacons, the only orders in the Church. In the 3rd century subdeacons, acolythists, readers, and other inferior orders were appointed; and these were also styled clerici. The clergy were afterwards divided into the regular and secular, the former living under some religious rule, such as abbots and monks, and the latter mingling with the people and having the care of parishes, as bishops and priests. The term clergy is applied in England to all persons in holy orders belonging to the Established Church. A clergyman is exempted from serving on a jury, or as a bailiff, reeve, constable, &c., is incapable of sitting in the House of Commons, or of being a councillor or alderman in a borough, is free from arrest in a civil suit whilst engaged in divine service, or whilst going to or coming from the performance of this duty, by 9 Geo. IV. c. 31, s. 23 (June 19, 1828). The mode of proceeding against the clergy for ecclesiastical offences is regulated by the Church Discipline Act, 3 & 4 Vict. c. 86 (Aug. 7, 1840). At one time the clergy engrossed every branch of learning, and were remarkable for their proficiency in the study of the common law. The judges were selected from their ranks, and from the lower clergy the inferior offices were supplied. Hence the term clerk. (*See* Benefit of Clergy.)

CLERGY (Sons of).—The festival of the Sons of the Clergy, celebrated every year at St. Paul's Cathedral, was instituted in 1655, and the first sermon was preached in St. Paul's Cathedral Nov. 8 in that year. The society's charter of incorporation is dated July 1, 1678.

CLERGY CLUB (London).—The club-house of this institution for "promoting the association of clerical and lay members of the United Church of England and Ireland, in Great Britain, and in her possessions abroad, as also of the Scottish Episcopal Church," situated in Charles Street, St. James's, was opened Jan. 15, 1866.

CLERK.—(*See* CLERGY.)

CLERK OF THE CLOSET, or CONFESSOR TO THE SOVEREIGN, usually a bishop, whose duty it is to attend the sovereign in the royal closet, during Divine Service, to resolve all doubts concerning spiritual matters, is mentioned by Chamberlayne in his "State of England," published in 1673.

CLERKENWELL (London) is called by Stow "Clarkes-Well, or Clarken-Well." The same writer adds, the well "took name of the parish clarks in London, who (of old time) were accustomed there yearly to assemble, and to play some large history of Holy Scripture. For example of later time, to wit in the year 1390, the 14th of Richard the Second, I read, that the parish clarks of London, on the 18th of July, plaid interludes at Skinners' Well, near unto Clarks'-Well, which play continued three days together, the king, queen, and nobles being present." Dugdale records the foundation of a nunnery about 1100, and the erection of the priory of St. John of Jerusalem about 1110. In Fitz-Stephen's "Description of the most noble City of London" (1190), Clerkenwell is named as one of the spots where "the scholars, and youth of the city, do take the air abroad in the summer evenings." In 1563 the locality was still unoccupied, except by the monasteries and St. John's Street and Cow Cross; but the number of houses was much increased before 1598. The Bridewell was erected in 1615; Sadler's Wells Theatre was built as a music-house in 1683; the Workhouse was erected in 1790; the Middlesex House of Correction in 1794; and the New Prison, or House of Detention, was built on the site of the Bridewell in 1818, and rebuilt in 1844.

CLERMONT FERRAND (France), the ancient Augustonemetum, was sacked by the Vandals in 408, and by an army under Honorius in 412. Thierry captured it in 507, and it became the capital of Auvergne. It was frequently besieged. The Northmen took it in 853 and in 916, committing great ravages on each occasion. It was the seat of the bishopric of Auvergne, founded about 250. Since 1160, the occupants of the see have taken the title of bishops of Clermont. Parts of the church of Notre Dame du Port were built in 863, and the cathedral was founded in 1248. In the Middle Ages, Clermont, called *Clarus Mons*, or Clarimontium, was the scene of two celebrated councils. The first, which led to the first crusade, was summoned by Urban II., and lasted from Nov. 18 to 28, 1095; and the second was held in 1130.

CLEVELAND (UNITED STATES).—This city of Ohio was founded in 1796.

CLEVES (Germany).—This district was ruled by counts from the 9th century until 1419, when Thierry VIII. was made duke by the Emperor Sigismund. It passed into the possession of the house of Brandenburg in 1609; the French seized it in 1794, united part of it to Berg in 1806; but it was restored to Prussia in 1815. (*See* BERG.) The town of Clèves is pleasantly situated about two miles from the Rhine. The cathedral was built in 1346, and the castle in 1439. It was the birthplace of Anne of Clèves, married to Henry VIII. Jan. 6, 1540. The marriage was abrogated by act of Parliament July 24, 1540.

CLIFF.—(*See* CLOVESHOO.)

CLIFFORD STREET CLUB (London).—A debating society, which met once a month, in the last century, at Clifford Street Coffee-house. George Canning was a member.

CLIFFORD'S INN (London) received its name from the De Clifford family, who granted it to students-at-law in the reign of Edward III., about the year 1344, when it was made an inn of Chancery.

CLIFTON.—(*See* BRISTOL.)

CLIFTON MOOR (Battle).—During the retreat of the Pretender, Charles Edward, from England, the English were repulsed in an attack upon the Scottish rear-guard, at Clifton Moor, Dec. 18, 1745. The former lost 100 men in killed and wounded, and the latter only 12.

CLISSAU (Battle).—Charles XII. of Sweden having invaded Poland, gained a complete victory over Augustus Frederick III., King of Poland, on this plain, between Warsaw and Cracow, July 20, 1702. Charles XII., in pursuit of the King of Poland, fell from his horse and broke his collar-bone.

CLOACA MAXIMA.—(*See* SEWERS.)

CLOCK.—Sun-dials and clepsydræ (*q. v.*), or water-clocks, preceded clocks moved by wheels and weights. Beckmann assigns the invention of the last-mentioned to the 11th century. The first public clock was erected at Padua. Others were put up at Westminster in 1288; at Canterbury in 1292; at Dover in 1348 (the oldest extant); at Bologna in 1356; and at Paris in 1364. Their general introduction into England may be referred to 1368, in which year Edward III. invited three Dutch clockmakers from Delft to settle in the country. A clock was erected at Strasburg about 1370. The Duke of Burgundy removed the clock from Courtrai to Dijon in 1382. A public clock was set up at Spires in 1395; and another at Nuremberg in 1462. Balance clocks were used by Walther for astronomical observations as early as 1484. A clock was erected at Venice in 1497. Portable clocks are supposed to have been invented about 1525, in order to be used at sea in computing the longitude. The first English clock that measured time with accuracy is said to have been that at Hampton Court, which bears date 1540. Charles I. incorporated the company of Clockmakers Aug. 22, 1632. The invention of pendulum clocks is claimed for three persons—Richard Harris in 1641; Vincenzio Galilei, who is said to have rendered his father's discovery of practical utility in 1649; and Huygens in 1657. Repeating clocks were first constructed by Barlow in 1676; the anchor escapement was introduced by Clement in 1680; and equation clocks, whose inventor is unknown, some time previous to 1699. Jewelled pallets and pivot-holes were introduced by De Baufre about 1704, and the compensation pendulum by Graham and Harrison in 1715. The electric clock was first exhibited to the Royal Society by Professor Wheatstone in 1840, and was much improved by Messrs. Bain, Appold, and Shepherd, the last of whom supplied the clock at the Exhibition of 1851.

By 37 Geo. III. c. 108 (July 19, 1797), an annual duty of 5*s.* for each clock, or 2*s.* 6*d.* for each silver or metal watch, was levied. These were repealed by 38 Geo. III. c. 40 (May 10, 1798). Clocks formerly paid a duty of 25 per cent., which was reduced to 10 per cent. by 5 & 6 Vict. c. 47 (July 9, 1842), and still further diminished by 16 & 17 Vict. c. 54 (Aug. 4, 1853).

CLOGHER (Ireland) was erected into a bishopric in 493 by St. Macartin, who founded a monastery, and died in 506. The cathedral was rebuilt in 1041, and again in 1295. The first Protestant bishop of Clogher was Miller Magrath, whom Queen Elizabeth appointed Sep. 10, 1570. Charles I. erected this town into a borough, and it returned two members to the Irish parliament till its disfranchisement at the Union. On the death of the Right Hon. Lord R. P. Tottenham, Bishop of Clogher, April 28, 1850, the see was united to Armagh according to the provisions of the Church Temporalities Act, 3 & 4 Will. IV. c. 37 (Aug. 14, 1833).

CLOGS.—(*See* ALMANACK.)

CLONARD (Bishopric).—This Irish diocese, founded by St. Finian about 520, was, with several other minor sees, merged in 1174 in the diocese of Meath (*q. v.*).

CLONFERT (Ireland).—St. Brendan founded a monastery here in 558, and became the first bishop of the diocese. In 1602 the see was united to Kilmacduagh, and to the sees of Killaloe and Kilfenora, by 3 & 4 Will. IV. c. 37 (Aug. 14, 1833).

CLONMEL, the Vale of Honey (Ireland), was incorporated at a very early period, but did not receive its charter till 1608. The manufacture of woollen goods, introduced in 1667, declined at the Revolution. The trial of Smith O'Brien for high treason commenced here Sep. 28, and terminated Oct. 9, 1848.

CLONTARF (Battle).—Brian Boru, King of Ireland, with a force of 20,000 men, defeated 21,000 Danes, under King Sitric, on the plains of Clontarf, near Dublin, Good Friday, April 23, 1014. Seven thousand Irish, including Brian and his son Murrogh, fell in the action. The Danish loss amounted to 13,000.

CLOSET.—(*See* CLERK OF THE CLOSET.)

CLOSETINGS.—The name given to the private conferences to which James II. in 1687 and 1688 summoned members of Parliament and various public functionaries, for the purpose of winning them over to his plan for the re-establishment of the Roman Catholic religion and other arbitrary measures.

CLOSH, or CLOSSYNGE.—An old game of ninepins, prohibited by 17 Edw. IV. c. 3 (1478). The penalty for a person allowing this and several other games to be played in his house, was three years' imprisonment and a fine of £20, the players to be imprisoned two years and to forfeit £10. By 33 Hen. VIII. c. 9 (1542), any person keeping a house or place for the practice of this and other games mentioned in the statute, was to forfeit £2 per diem, and those using or haunting the place 6*s.* 8*d.* for every offence.

CLOSTER-SEVEN (Convention).—The Duke of Cumberland, at the head of 38,000 Hanoverians, Hessians, and other Germans, being hardly pressed by the French army, at the intervention of the Count de Lynar, the Danish ambassador at Hamburg, signed a convention at this village of Hanover, which must not be confounded with Kloster Seyvern (*q. v.*), near Munich, Sep. 8, 1757. It consisted of five articles, to which three separate articles were annexed. The troops laid down their arms and were dispersed. George II., as Elector of Hanover, disavowed the authority of his son, the Duke of Cumberland, to sign it, and the latter resigned all his commands. It led to innumerable difficulties and disputes.

CLOTH.—The manufacture of woollen cloth was practised in Tyre B.C. 588, and its invention may no doubt be referred to a still earlier period. Plaids were made in England about 500. In 960 the business became considerable in Flanders; whence it was introduced into England in 1111. The first exportation of British cloth occurred in 1189, in which year the manufacture appears to have spread widely in England. Broadcloth was made in 1197. In 1261 all Englishmen were commanded to wear British cloth; but, after the arrival of the Flemish weavers, in 1331, an exception was made in favour of their goods. The manufacture had obtained a firm footing in Yorkshire before 1461, and on the passing of the act to confine the manufacture to towns, and limit the number of looms allowed to each weaver (2 & 3 Phil. & Mary c. 11, ss. 9 & 10), in 1555, this county was exempted from all restrictions. Medley cloths were invented in 1614. In 1643 cloths were fully finished in England, although some kinds were still sent to Holland to be dyed. The art was, however, introduced in 1667. In 1698 both houses of Parliament petitioned William III. to diminish the Irish manufacture of woollen cloth and substitute that of linen in its stead; and measures were afterwards taken with this view. The Clothworkers' Company was incorporated April 28, 1482, and confirmed by Henry VIII. in 1528. It was re-incorporated and named Clothworkers by Elizabeth, whose charter was confirmed by Charles I. in 1634.

CLOTH, GREEN—(*See* MARSHALSEA COURT.)

CLOUD, ST. (France).—The name is said to be derived from St. Clodoald, a son of Clodomir, who became a monk and founded a monastery at this place, about five miles from Paris, in 551. The palace was built in 1572 by Jerome de Gondy, a rich financier. Henry III. was assassinated here Aug. 2, 1589. Louis XIV. purchased it in 1658, and presented it to the Duke of Orleans, and it remained the seat of that family until 1782, when Louis XVI. purchased it for Marie Antoinette. The sittings of the Councils of the Ancients and of the Five Hundred were transferred to St. Cloud, Nov. 9, 1799. The capitulation of Paris in 1815, and the ordinances of Charles X., July 25, 1830, were signed at this palace. The palace and the park have been embellished and improved by successive sovereigns of France.

CLOVESHOO (Kent).—A celebrated council was held at this place, supposed to be Cliff, near Rochester, though some authorities are in favour of Abingdon, Berks, and others Clifton

Hoo, Beds, in Sep., 742 or 747. Twelve English prelates assembled, with the nobility and clergy, under the sanction of Ethelbald, King of the Mercians. Thirty canons were passed, relating to the government and discipline of the Church. Councils were held here in 800; Oct. 12, 803; in 822; and in Aug., 824.

CLOYNE (Ireland) was erected into a bishopric by St. Colman, who died Nov. 24, 604. In 1490 the see was united to Cork, but was separated in 1638. The celebrated Dr. Berkeley was Bishop of Cloyne from 1733 to 1753. On the death of Bishop Brinkley, in 1835, this see was permanently united to Cork and Ross, by 3 & 4 Will. IV. c. 37 (Aug. 14, 1833).

CLUB, THE (London).—Dr. Johnson and Sir Joshua Reynolds formed a small circle of friends, which was called "The Club." It was founded in 1764, and the original members were nine in number, Edmund Burke and Oliver Goldsmith being included in the list. The number was increased to 12 soon after its establishment; to 20 in 1773; to 26 March 11, 1777; to 30 Nov. 27, 1778; to 35 May 9, 1780; and finally to 40. They first met at supper, but in 1772 they resolved to dine together once every fortnight during the session of Parliament. The first meeting recorded in their books took place at the "Turk's Head," Gerard Street, April 7, 1775, from which they removed in 1783, and after various changes settled at the Thatched House, St. James's Street, Feb. 26, 1799. At Garrick's funeral, Feb. 1, 1779, it took the title of the Literary Club. On the removal of the Thatched House, the Club was held at the Clarendon Hotel, where its centenary was celebrated June 6, 1864. Its title has been again changed to that of the Johnson Club.

CLUB OF KINGS.—(*See* KING CLUB.)

CLUB OF 1789.—Sieyès, Talleyrand, Lafayette, and others, not approving of the violent course adopted by the Jacobin Club, founded a new club under the above title in the spring of 1790.

CLUBMEN.—During the Great Rebellion, bands of armed men, bearing this title, opposed the military oppression to which they were subjected by both armies. In 1645 they petitioned Prince Rupert against their grievances, but, not receiving the satisfaction they required, they harassed the Royalist forces, and, in the words of Clarendon, "did him (Gen. Goring) more mischief than all the power of the rebels."

CLUBS.—Dr. Johnson defined a club to be "an assembly of good fellows, meeting under certain conditions." A club of this kind, under the name of "La Court de bone Compagnie," was established during the reign of Henry IV. Occleve was one of its members; and Chaucer is supposed to have belonged to it. Sir Walter Raleigh established the celebrated club at the Mermaid, in Bread Street, about the beginning of the 17th century. This was the scene of the wit-combats between Shakespeare and Ben Jonson, described by Beaumont:—

> "What things have we seen
> Done at the Mermaid! heard words that have been
> So nimble and so full of subtile flame,
> As if that every one from whom they came
> Had meant to put his whole wit in a jest."

Ben Jonson founded another club in Fleet Street. These, however, were social clubs, and the political club did not come into existence until a later period. Lord Stanhope, in commenting upon the formation of the Rockingham administration in 1765, says, "It was at this period and under such a condition of parties that rival clubs for politics were formed, and rose into great vogue and importance. Under Lord Bute the Ministerial Club, as it was at first termed, used to meet at the Cocoa Tree Tavern, from which it soon derived its name." Gibbon describes it in his journal for Nov., 1762. Mr. Gladstone's proposal, April 16, 1863, to make clubs pay a license duty, was soon after withdrawn. A list of the principal clubs is given in the Index. (*See* BENEFIT SOCIETIES, WORKING MEN'S CLUBS, &c.)

CLUBS (Foreign).—The Société d'Entresol, in imitation of an English Club, which began to meet every Saturday at the lodgings in Paris of the Abbé Alari in 1724, was suppressed by Cardinal Fleury in 1731. Political societies, established in Paris in 1782, were suppressed by the police in 1787. The Breton Club, formed at Versailles in 1789, changed its name to that of the Jacobin Club. The "Club des Feuillants," of which Lafayette was a member, was founded in 1791; that of the Réunion was commenced by the Girondins, but suppressed Aug. 10, 1792. All these French clubs were abolished Sep. 4, 1797. An attempt was made to revive them during the revolution of Feb., 1848, but they were totally prohibited in 1849. During the first revolution several female clubs were formed in Paris, and the number of members at one time amounted to 6,000. They led to such grave disorders that they were closed by the Convention. Clubs were prohibited in Germany in 1793, and by an act of the Confederation in 1832.

CLUGNI, or CLUGNY (France), celebrated for its Benedictine abbey, founded by William I., Count of Auvergne, in 910. Louis IX. of France and Pope Innocent IV. held a conference here in 1245. The monastery was frequently assailed by the Huguenots, and was almost entirely destroyed during the revolution in 1789. (*See* CLUNIACS.)

CLUNIACS, or CLUNIACENSIANS.—Monks of the abbey of Clugny received this name. They were a branch of the Benedictines. Odo, Abbot of Clugny, in 927, reformed their rule, and the Cluniacs became renowned throughout Europe. William of Warrenne, made Earl of Surrey by William II., introduced the Cluniacs into England, and gave them their first house, at Lewes, in Sussex, in 1077. They had 42 priories and cells in this country, the last having been established at Sleveshohn, Norfolk, in 1222. Wolsey dissolved four of their establishments in 1525, and the rest were suppressed at the Reformation. There were also nuns of this order.

CLUSIUM (Italy).—One of the 12 cities of which the Etruscan confederation was composed. Its original name was Camars. Porsenna, who is represented, by tradition, as having besieged Rome B.C. 508, was ruler of Clusium. It was besieged by the Gauls B.C. 390, B.C. 295, and B.C. 225. It became the seat

of a bishopric at an early period, and is known under the modern name of Chiusi.

CLYDE CANAL.—The act for making this important communication between the rivers Forth and Clyde was obtained early in 1768, and the works were commenced by Sir Laurence Dundas, June 10. Mr. Smeaton was the chief engineer, and under his direction the works were completed July 28, 1790.

CLYST, ST. MARY'S (Battle), was fought between the Protestant forces under Lord Grey and the Roman Catholic peasantry of Devonshire, on the evening of Saturday, Aug. 3, 1549, when the latter were defeated. Miles Coverdale, who afterwards translated the Bible into English, preached a thanksgiving sermon for the victory on the battle-field.

CNIDUS, or GNIDOS (Asia Minor).—This city, in Caria, was the metropolis of the Dorian confederacy. It is celebrated for the victory gained by Conon over the Lacedæmonian fleet, commanded by Pisander, B.C. 394. The inhabitants carried on a flourishing trade with Egypt at an early period. Aphrodite was the great object of worship amongst the Cnidians.

CNOSUS (Crete), also written Cnossus and Gnosus, was founded, according to tradition, by Minos, the mythical king of Crete. It was colonized by the Dorians, and, in alliance with the cities of Gortyna and Cydonia, ruled over the whole of the island. The Romans captured it and planted a colony in it, B.C. 67. The celebrated Labyrinth of Crete, in which the Minotaur was confined, is always represented as having been situated in this city.

COACH.—The precise period at which coaches were introduced is not known; but Italy, France, Spain, and Germany all claim the honour of the invention. Towards the end of the 13th century, the queen of Charles of Anjou entered Naples in a *caretta*, which appears to have borne some resemblance to our carriages, and to have been regarded with favour by the French ladies, as Philip IV. (the Fair) prohibited the use of similar vehicles to citizens' wives in 1294. The Emperor Frederick III. visited Frankfort in a covered carriage in 1474, and in 1509 the Elector of Brandenburg possessed a coach gilt all over. The first carriage seen in England was introduced by the Earl of Arundel in 1580, but they were not generally used till about 1605. The first who drove six horses in his coach was the Duke of Buckingham, in 1619; and his example was immediately emulated by the Earl of Northumberland, who set up a team of eight. A glass coach was used in Spain in 1631. Hackney coaches were first let for hire in London in 1625, in Paris in 1650, and at Edinburgh in 1673. Stage-coaches were introduced into England during the 17th century, but the earliest public notification of their establishment is dated April 26, 1658. One was started between London and Edinburgh before 1754; and in 1784 mail-coaches were instituted. Mr. Josiah Child brought the first cabriolet from Paris in 1755, and Horace Walpole states that every man of fashion soon set up a similar conveyance. Cabs were introduced into London in 1820, and cabriolets were first let for hire in 1823. The Coachmakers' Company was incorporated by Charles II. in 1671, as the Coach and Harness Makers'.

COAL is supposed to have been known to the Britons before the arrival of the Romans, and to have been used in England in 852. The earliest document in which it is mentioned is Bishop Pudsey's Boldon Book, dated 1180, in which we read of colliers established at Escomb and Bishopwearmouth. Newcastle coal is first mentioned in 1234, when Henry III. granted the inhabitants a charter to dig it; and sea-borne coal was sold in London before 1245, though at first only employed in the arts and manufactures. The Chinese used it in 1295. In consequence of a petition presented by Parliament to Edward I. in 1306, the use of coal in London and the suburbs was prohibited by proclamation as a nuisance. In 1321 the palace was warmed by coal. The exportation of coal from Newcastle commenced in 1325, in which year several cargoes were conveyed to France. A tax of twopence per chaldron on all coals sold to persons not franchised in the port of Newcastle was imposed in 1421, and made payable to the king; but the payment being very irregular, such large arrears were claimed by Queen Elizabeth, in 1599, that the town voluntarily agreed to pay a duty of 1*s.* per chaldron. Coal was first employed in the manufacture of glass and iron in 1624; and in 1638 its sale was made a monopoly by Charles I. The duty of 1*s.* per chaldron was granted by Charles II. to the Duke of Richmond, in 1677; whence it became known as the Richmond shilling. Its existence in Newfoundland was discovered in 1763, and mines were opened in Cape Breton in 1767. The production of tar from coal was discovered in 1779. The impost of the Richmond shilling was finally relinquished March 1, 1831; at which time the arrears, in consequence of which it was first claimed, were redeemed, with an overplus of £341,900, and the export duty, reduced by 1 & 2 Will. IV. c. 16 (Aug. 23, 1831), was entirely repealed by 8 Vict. c. 7 (April 24, 1845).

COAL EXCHANGE (London).—In 1807 the corporation possessed a coal exchange, which was converted into a market in 1831. The first stone of a new building was laid Dec. 14, 1847. It was opened by Prince Albert Oct. 30, 1849.

COAL HARBOUR, or GAINES'S MILL (Battles).—The Confederates, under Gens. Jackson and Stuart, gained a complete victory over the Federals, led by Gen. McClellan, at this place in Virginia, June 27, 1862. The Federals had 60,000, and the Confederates 40,000 men.—Gen. Grant attacked the Confederate position here June 3, 1864. After having lost nearly 7,000 in killed, wounded, and prisoners, he was compelled to retire.

COALITION (NORTH AND FOX) ADMINISTRATION.—The vote of censure on the preliminaries of the peace of Versailles, passed Feb. 21, 1783, induced the Earl of Shelburne and his colleagues to resign office. Mr. Pitt, then only 23 years of age, was requested by George III. to form a ministry; but he declined, and a long interregnum ensued, which was

brought to a close by a coalition between Mr. Charles James Fox and Lord North, under the premiership of the Duke of Portland. The new ministry kissed hands April 2, 1783. The cabinet was thus constituted:—

Treasury	Duke of Portland.
President of the Council	Viscount Stormont.
Privy Seal	Earl of Carlisle.
Chancellor of Exchequer	Lord John Cavendish.
Home Secretary	Lord North.
Foreign Secretary	Mr. C. J. Fox.
Admiralty	Viscount Keppel.

The cabinet consisted of only seven persons. The great seal was placed in commission. Viscount Townshend was Master-general of the Ordnance; Edmund Burke, Paymaster-general; Mr. Richard Brinsley Sheridan, Secretary to the Treasury; and Mr. Charles Townshend, Treasurer of the Navy. Mr. Fox's India Bill was rejected on its second reading, in the House of Lords, Dec. 17, 1783; and Dec. 18 George III. sent a messenger to Lord North and Mr. Fox, requesting them to deliver up the seals of their offices, which they did Dec. 19. (*See* PITT (FIRST) ADMINISTRATION.)

COALITION MINISTRY.—(*See* ABERDEEN ADMINISTRATION and ALL THE TALENTS.)

COAST-GUARD.—This force, at first formed for the prevention of smuggling, and afterwards organized for defensive purposes, was transferred from the Customs department to the Admiralty by 19 & 20 Vict. c. 83 (July 29, 1856).

COAST VOLUNTEERS.—(*See* ROYAL NAVAL COAST VOLUNTEERS.)

COASTING TRADE of Great Britain was thrown open to all nations by 17 Vict. c. 5 (March 23, 1854).

COBALT.—"The name Cobalt," says Beckmann, "is given at present to that metal, and its ores, the oxides of which are largely employed in the manufactures of glass, porcelain, and pottery, for the production of a blue colour." It was not known to the ancients. In 1754 the Society for the Encouragement of Arts and Sciences offered a premium for the discovery of a cobalt-mine in the south of England. One was found at Gwennap, in Cornwall, to the proprietor of which the premium was awarded in Dec., 1754. The word cobalt is said to be derived from the *kobold*, goblin, a term applied to it by the German miners, because, as they assert, more valuable metals are never found where it occurs.

COBALT BLUE.—This pigment was discovered by the French chemist Thénard, in 1802.

COBLENTZ (Prussia), the Confluentes of the Romans, is a town of great antiquity. The church of St. Castor, consecrated in 836, is the spot where the grandsons of Charlemagne met when they divided his empire into Germany, France, and Italy, in 843. At a council held here June 5, 860, peace was concluded between Lothaire, King of Lorraine, and the sons of Charles II. (the Bald). Another council took place in 922, and a third in 1012. Edward III. of England had an interview here with the Emperor Louis of Bavaria in 1338. The palace, built by the Elector of Trèves in 1779, was used by the French as barracks during their occupation of the town in 1792. The Russians occupied Coblentz in 1814. A wooden bridge was built over the Rhine in 1819. In the spring of 1830, the waters of the Moselle thawed before those of the Rhine, and, being stopped by the ice, occasioned a destructive inundation. The millennial jubilee of the church of St. Castor, built in 836, was celebrated with great solemnity in 1836. The railway bridge over the Rhine was opened by the King and Queen of Prussia, May 9, 1864.

COBURG (Germany).—The palace at this town, the capital of Saxe-Coburg Gotha, was built in 1549. Wallenstein made an unsuccessful effort to besiege the castle during the Thirty Years' war (1632). The gymnasium was founded in 1604. The memorial to Prince Albert was unveiled in the presence of Queen Victoria and the royal family of England, Aug. 26, 1865.

COCCEIANS.—The followers of John Coccéius or Coeken, born at Bremen, Aug. 9, 1603. He was appointed Hebrew professor at Bremen in 1630, and at Franeker in 1636. In 1650 he became professor of divinity at Leyden, where he died Nov. 4, 1669. He taught that the whole of the Old Testament "was a kind of emblematic history of *Christ*, and of the Christian Church; that the prophecies of the ancient prophets, in their literal import, treated of *Jesus Christ*; and that whatever was to occur in the Christian Church, down to the end of time, was all prefigured in the Old Testament, in some places more clearly, and in others less so." He believed in a visible reign of Christ upon earth, after the conversion of the Jews.

COCHEREL (Battle).—Bertrand du Guesclin defeated John, King of Navarre, at this hamlet, near Evreux, Thursday, May 16, 1364. Although the forces of the latter were much inferior to those of the former in number, the struggle was maintained with great resolution. By this victory nearly the whole of Normandy was brought under subjection to Charles V. of France.

COCHIN (Hindostan).—This native state was made tributary by Hyder Ali in 1776. Treaties were concluded by the East India Company with the Rajah of Cochin in 1791 and May 6, 1809, by which, on the payment of an annual tribute, it was placed under British protection. The sea-port town of Cochin was founded by Albuquerque in 1503, being the first Portuguese establishment. The Dutch captured it in 1663. It was wrested from them by the English in 1796, and was, with its dependencies, ceded to England, in exchange for the island of Banca, by the second and third articles of the convention between England and the United Netherlands, signed at London Aug. 13, 1814.

COCHIN CHINA (Asia) formed part of the Chinese empire till a few centuries after our æra, but little is known of its early history.

A.D.
1626. Cochin China is visited by some Italian Jesuits, who introduce Christianity.
1666. A French priest arrives on a missionary visit.
1774. The reigning family is expelled, and the country divided between three brothers.

A.D.
1776. The number of native Christians is estimated at 300,000.
1778. Warren Hastings fails in an endeavour to establish commercial intercourse with Cochin China.
1787. The French conclude a treaty with the native Government, but it is not carried into effect.
1790. The rightful heir recovers his possessions from the usurpers.
1797. With the assistance of a French missionary he commences the introduction of many European arts.
1798. The Christians are subjected to a severe persecution.
1801. Gia-long, aided by the French, recovers his kingdom from a Tonquin usurper.
1802. Gia-long conquers Tonquin, and assumes the title of Emperor of Anam.
1804. The East India Company fail in an attempt to open trade.
1822. Mr. Crawfurd visits Cochin China with a letter from the Governor-General of India, but is refused an audience with the king.
1825. The Christians are subjected to persecution.
1838, Nov 30. M. Marchand, a French Christian, is put to death with shocking barbarity.
1841. During the war of the English in China, the persecution relaxes in rigour.
1847. Sir John Davis, Governor of Hong-Kong, accredited British Plenipotentiary at the Cochin Chinese Court, visits the country with a letter from Queen Victoria, but is refused an audience. Commodore La Pierre destroys the batteries and native fleet at Tourann.
1856. Tu-Duk, Emperor of Anam, contemptuously refuses permission to land in his territories to an envoy from Napoleon III.
1857. Bishop Diaz, the Spanish vicar-apostolic, is beheaded after being cruelly tortured.
1858, Aug. Admiral Rigault de Genouilly, at the head of a French squadron, enters Tourann Bay.—Sep. 1. He attacks the forts, and, meeting with a vigorous resistance, takes up an entrenched position, in which his troops suffer severely from the climate.
1859, July 30. The French having gained a victory at Saigon, an armistice is concluded, and negotiations for peace commence.—Sep. 15. De Genouilly having discovered that the negotiations were merely a *ruse* to enable the Cochin Chinese Government to employ their army in suppressing an internal rebellion, attacks the enemy, and seizes their position.—Oct. De Genouilly, relieved by Admiral Page, sails for France.
1860, Jan. 1. The French having transferred their operations to Saigon, that port and river are thrown open for trade.
1861, April 12. The French capture the fort of Mytho.
1862, June 3. Peace is concluded.—Aug. 15. The French establish a lighthouse on Cape St. James, Saigon river.—Dec. 17. The Emperor of Anam repudiates the peace, and the people of Saigon rise against the French, but are repulsed by the European troops.
1863, Jan. 1. Saigon is proclaimed French territory.—Feb. 26. Admiral Bonard captures Gokoud and Fort Traica.
1864, July 15. Capt. Aubaret, French agent in Cochin China, concludes a treaty with the Imperial Government at Hué, the capital.
1865, March. The French Government refuses to ratify this treaty. (*See* ANAM, CAMBODIA, and TONQUIN.)

COCHINEAL was discovered by the Spaniards in Mexico, in 1518. The insect from which the dye is obtained was introduced into St. Domingo by Thierry, a French naturalist, in 1777, and into India in 1795. Only an inferior quality of dye is produced there. Prescott says that the rich crimson of the best kinds is the modern rival of the famed Tyrian purple. The excise duty on cochineal, reduced to a shilling the hundredweight in 1842, was finally repealed by 8 & 9 Vict. c. 90 (1845).

COCKADE.—The ancient custom of wearing badges in the bonnet is generally considered to have given rise to the modern cockade. As worn by officer's servants, it is supposed to have originated during the wars of the Roses. In later times the black cockade was the Hanoverian badge, the white that of the Stuarts.

COCK-CROWER (the King's).—This officer during Lent crowed the hour every night within the precincts of the palace. George II., then Prince of Wales, was sitting down to supper on Ash-Wednesday, March 2, 1715 (the first Lent after the Hanoverian accession), when the occupant of the office entered the apartment, and performed his peculiar duty. The prince, mistaking it for an intended insult, was greatly incensed, and the custom was from that time discontinued.

COCK-FIGHTING was established at Athens as a public or solemn pastime by Themistocles, previous to B.C. 465. The Romans received the custom from the Greeks, although they appear to have preferred quail-fighting. The date of its introduction into England is uncertain, but may probably be referred to the period of Roman supremacy. The earliest record on the subject occurs in a work of Fitz-Stephen's, who died in 1191. He mentions that it was the practice of schoolboys to bring their cocks to the master on Shrove-Tuesday, and devote the morning to an exhibition of their prowess. The sport was prohibited in France in 1260, and in England by Edward III. in 1365; again by Henry VIII.; by Elizabeth in 1569; and by Cromwell, March 31, 1654. The cock-pit in St. James's Park was removed in 1816, and the sport was prohibited in England by the Cruelty to Animals Act, 5 & 6 Will. IV. c. 59 (Sep. 9, 1835). This Act was extended to Ireland by 1 Vict. c. 66 (July 15, 1837). These acts were repealed and the law was made more stringent by 12 & 13 Vict. c. 92 (Aug. 1, 1849). Cock-fighting is common in Asia, is a fashionable pastime with the ladies of Peru, and is carried to a great height in Ceylon.

COCK-LANE GHOST.—This famous deception, practised in a house in Cock Lane, West Smithfield, in the years 1760, 1761, and 1762, created considerable sensation. The second and most notorious visitation commenced in Jan., 1762. A child about 11 years of age was thrown into violent fits by scratchings and knockings heard in different parts of the room, and communications were held with the supposed ghost who produced these noises. The case was taken up by several influential persons. The child was removed to the house of the Rev. S. Aldrich, rector of St. John's, Clerkenwell, and an investigation took place in the presence of several influential persons, on the night of Jan. 31. Measures had been taken to prevent any collusion, and the result was that the people assembled were unanimously of opinion, that "the child has some art of making, or counterfeiting, particular noises; and that there is no agency of any higher cause." The girl was moved from house to house, and was ultimately detected in an attempt to play off a trick upon her auditors. William Parsons, the officiating clerk of St. Sepulchre's, the father; Elizabeth, his wife; Mary Frazer, a girl who assisted in the deception; a clergyman, and a tradesman, were tried at Guildhall, July 10, by a special

jury, before Lord Mansfield, and convicted of a conspiracy against the life and character of Mr. K——. Sentence having been deferred for seven or eight months, the clergyman and the tradesman paid Mr. K—— between five and six hundred pounds, and were dismissed with a severe reprimand. The father was sentenced to stand in the pillory three times in one month, once at the end of Cock Lane, and after that to be imprisoned two years; his wife to one year's imprisonment, and Mary Frazer to six months in Bridewell, with hard labour.

COCKERMOUTH (Cumberland).—The castle of this town, erected in the 11th century, sustained a month's siege from the Royalists in 1648. The church, founded in the reign of Edward III., rebuilt in 1711, and enlarged in 1825, was destroyed by fire in 1850. The free school was founded in 1676, the dispensary established in 1793, and the bridge over the Derwent was erected in 1822. The court-house was built about 1830. The Cockermouth and Workington Railway was opened throughout April 28, 1847. The poet Wordsworth was born here April 7, 1770.

COCKLE Order).—This military order was founded by Louis IX. of France in 1269, to induce his nobles to join in the disastrous invasion of Africa, which cost him his life. (*See* CRUSADES.) It was also called the order of the Double Crescents and of the Ship, all three titles being taken from its decorations, which comprised a collar composed of escallop shells alternated with double crescents, and a badge adorned with the picture of a ship.

COCKNEY.—The origin of this term, as well as the reason for its application to a native of London, is involved in obscurity. In 1517, Henry VIII. made an order with reference to the feast of the King of the Cockneys, held on Childermas-day. The term Cockney School was in 1817 applied to a literary coterie consisting of Hazlitt, Keats, Leigh Hunt, Shelley, &c.

COCOA.—The properties of the kernel or seed of the cocoa-tree were known to the Spaniards and Portuguese before other Europeans. In 1649 only one cocoa-tree existed in all the Windward Isles, and that was grown as a curiosity in the garden of an Englishman. The tree was discovered in Martinico in 1655, and the cultivation was commenced in 1660. The use of the beverage called cocoa did not become general till the end of the 17th century.

COCOA-TREE CLUB (London), the Tory chocolate-house of Queen Anne's reign, is mentioned by Addison in the first number of the *Spectator*, Thursday, March 1, 1711. A club called the "Cocoa-tree Club," from the place of meeting, was formed here about 1747.

CODE NAPOLEON.—The commission for the formation of a new civil code was appointed by Napoleon Buonaparte in 1800. The code was promulgated in 1804 as the "Code Civil des Français." It was afterwards greatly extended. Napoleon I. introduced it into Italy in 1805, into Portugal in 1808, into the Papal States in 1809. It was afterwards adopted in other countries.

CODES.—A collection or system of law made by order of Theodosius II., was promulgated in the Eastern empire in 438, and in the Western empire by Valentinian III. in the same year. This was called the Theodosian code. Justinian appointed a commission in Feb., 528, to compile one code from those of Gregorianus, Hermogenianus, and Theodosius. It was promulgated April 7, 529. The institutes were completed Nov. 21, 533, and the Pandects, or Digest, Dec. 16, 533. A second edition of the code appeared Nov. 16, 534. This formed the celebrated Justinian code. Other systems of laws, framed in different countries, are also called codes. (*See* CODE NAPOLEON, &c.)

CODEX ARGENTEUS.—(*See* SILVER BOOK.)

COD LIVER OIL.—Percival in 1771 advocated the use of this remedy in cases of chronic rheumatism. In 1815 its properties were highly spoken of in Westphalia, the Rhine country, and Scotland, and in 1822 its composition was first chemically analyzed by Wurtzer. In 1830 it was admitted into the pharmacopœia, and in 1833 Hankel discovered its virtues in cases of tubercular consumption. Dr. de Jongh's treatise was first published in Latin in 1844.

COEL (Hindostan).—This town was captured by the Mohammedan leader, Kutb-u-din, in 1193. It possesses a mosque built about 1254, and was a place of some importance in 1582. The English took possession in 1803.

CŒLESTINES, CŒLESTINIANS, or CELESTINES.—This religious order was founded near Sulmona, in the Abruzzi, by Peter Morone, afterwards Cœlestine V., in 1254; was approved by Urban IV. in 1264, and called the order of the hermits of St. Damien, or Moronites. Raised to the pontificate in 1294, Peter of Morone favoured the new order, and they took the name of Cœlestines. They spread through Italy and France, and were suppressed in the latter country in 1778.

CŒLICOLÆ, or HEAVEN-WORSHIPPERS.—This sect, complained of by St. Augustine (354—430), as having instituted a new baptism, and mentioned in the Theodosian Code (*q. v.*) in 438, professed doctrines characterized both by Jewish and Christian peculiarities.

COFFEE was introduced into Arabia from Persia in the 15th century, and brought to Constantinople in 1554. The Venetians were the first Europeans acquainted with its use. It was brought to Marseilles in 1644, to London about 1650, and to Paris in 1657; but until 1660 its use was restricted to those who had travelled in the East. In 1690 the plant was reared at Amsterdam; it was planted at Surinam in 1718, at Cayenne in 1722, at Martinico in 1727, and before 1732 formed one of the staple productions of Jamaica. Various acts encouraging the growth of British plantation coffee were passed in 1781, 1783, 1788, and 1796. Prosper Alpinus, the botanist, who spent several years in Egypt, and who died in 1617, is said to have been the first European author who mentioned coffee. By 12 Charles II. c. 24 (1660), a duty of fourpence on every gallon of coffee made and sold was granted to the king.

COFFEE CLUB.—(*See* ROTA.)

COFFEE-HOUSES were established at Constantinople in 1554. One was opened at Oxford by Jacobs, a Jew, in 1650, at London in 1652, at Paris in 1662, and at Marseilles in 1671. By a proclamation of King Charles II., issued in Dec., 1675, they were suppressed; but were soon re-opened by request of the tea and coffee merchants. For many years the use of coffee and the coffee-houses were assailed by various writers.

COFFINS are said to have been invented by the Egyptians, who made them of stone and of sycamore-wood. Joseph was embalmed and placed in a coffin (Gen. l. 26) in that country B.C. 1635. Coffins were made of lead, of iron, and of wood, at a very early period. Bede states that the Saxons buried their dead in wood.

COGERS' SOCIETY (London).—This political debating club, founded in 1755, derived its title from the Latin *cogito*, the members professing to be great *thinkers*. They held their meetings at Cogers' Hall, a public-house in Bride Lane, Bridge Street, Blackfriars.

COGGLESHALL, or COGGESHALL (Essex).—King Stephen founded a Cistercian abbey in this place in 1142, and some remains exist at this day. It was once celebrated for the manufacture of white baize, called "Coggleshall whites."

COGNAC (League), called the Clementine or Holy League, because the Pope was at the head of it, was concluded between Clement VII., the Venetians, the Duke of Milan, and Francis I. of France, at this place in France, May 22, 1526. The objects were to compel the Emperor Charles V. to release the French king's sons, on the payment of a reasonable ransom, and to re-establish Sforza in the possession of the Milanese. Henry VIII. of England was made protector of the league; a principality in the kingdom of Naples, with an annual revenue of 30,000 ducats, was to be settled upon him, and lands to the value of 10,000 ducats given to Wolsey. Cognac was one of the cautionary towns granted to the Huguenots by the peace signed Aug. 11, 1570.

COIF.—Serjeants-at-law first adopted the coif as their badge during the reign of Henry III. (1216—1272). They used it to conceal their baldness, as there were then few lawyers who were not also priests, and, consequently, obliged to shave their heads. When it became incumbent on judges to have passed through the degree of serjeant-at-law, they retained the coif in their higher dignity, as appears from Sir John Fortescue's discourse *De Laudibus Legum Angliæ*, written between 1461 and 1470. On the appointment of official legal costume by the decree of the Westminster judges, subscribed June 4, 1635, the coif became an established portion of judicial uniform. As a portion of female attire, coifs were introduced early in the 17th century. The use of the coif in the coronation has been discontinued since the reign of George II.

COIMBATORE (Hindostan).—This state, annexed to Mysore in 1746, was taken by the English in 1783, and was formally incorporated with the British possessions in India in 1799. The town of Coimbatore, captured by the English Nov. 26, 1783, was restored at the peace concluded in 1784. It was retaken July 21, 1790. Tippoo Saib invested it June 13, 1791, and, having summoned it in vain, made a general assault, which was repulsed Aug. 11. Having received reinforcements, Tippoo Saib compelled the garrison to surrender Nov. 3, 1791.

COIMBRA (Portugal), the Conembrica of the Romans, was erected into a bishopric during the 6th century. It was taken from the Moors in 872, recovered by them in 982, and finally reconquered by Ferdinand (the Great) and the celebrated Cid in 1064. The monastery of Santa Cruz was founded June 28, 1131. When Portugal was made a kingdom in 1139, Coimbra became the capital, and in 1308 the university was temporarily removed here from Lisbon by King Dionysius. The murder of Inez de Castro by Alphonso IV. took place Jan. 7, 1355. The seat of government was transferred to Lisbon by John I., in 1433. The plague carried off many of the inhabitants in 1423. The university was finally transferred to Coimbra in 1537. The aqueduct was built in 1568. Coimbra suffered much from an earthquake in 1755. It was occupied by the Portuguese militia under Gen. Trant, who defeated the French and seized the city, taking 5,000 prisoners, Oct. 7, 1810.

COIN.—Herodotus (i. 94) states that the Lydians were the first who coined gold and silver money, but the Parian chronicle attributes the invention to Pheidon of Argos, B.C. 895. (*See* COPPER, GOLD, and SILVER COINAGE.) The Romans substituted a silver for a copper coinage, B.C. 269. A metallic currency existed in Britain previous to the Roman occupation, after which the coin resembled that of Rome. The Saxons introduced money of a totally different character. (*See* SCEATTÆ and STYCAS.) The gold byzant (*q. v.*) constituted the chief medium of circulation during the Anglo-Saxon and Norman periods, no English coinage of repute having been used until the reign of Henry III., since which the history of the national coinage is much better defined.

A.D.
689–728. The penny is mentioned in the laws of Ina.
838. The gold mark (*q. v.*) is introduced.
1210. Round farthings (*q. v.*) are first coined.
1247. Henry III. calls in the debased money and orders a new coinage.
1279. Circular coin are struck in large numbers by Edward I., who introduces many improvements.
1344. Coinage of florins (*q. v.*) and nobles (*q. v.*).
1465. Introduction of angels (*q. v.*) and ryals (*q. v.*).
1489. Henry VII. orders the issue of double ryals or sovereigns (*q. v.*).
1504. Coinage of testoons or shillings (*q. v.*).
1543. Introduction of the tester (*q. v.*).
1551. Edward VI. coins crowns (*q. v.*), half-crowns, and sixpences.
1560. Elizabeth withdraws the base coinage of former sovereigns.
1562. Milled money is first coined by Elizabeth.
1663. Charles II. introduces guineas (*q. v.*).
1672, Aug. 16. Copper coinage (*q. v.*) is permanently established.
1797. George III. issues dollars (*q. v.*) and coins, copper two-penny pieces.
1817, July 1. The new sovereign of 20 shillings is issued.
1849. Silver florins (*q. v.*) are coined.
1860. A bronze coinage is issued.

COIN-CLIPPING.—This crime was of frequent occurrence in early times. The custom of cutting the silver penny into halves and quarters served to encourage it. Henry III. prohibited the circulation of clipped coin, by letters dated Merton, Nov. 17, 1248, and in 1278, 280 Jews were hanged in London for coin-clipping. By 7 & 8 Will. III. c. 1 (1696), £1,200,000 was raised by a house-duty to defray the expense of withdrawing the clipped coin. Scarcely any of the coin in circulation was worth half the nominal value.

COINING.—The coining of money is the exclusive prerogative of the Crown. The privilege was in early times occasionally granted to bishops and abbots. During the Middle Ages the right of coining was considered the best guarantee of independence. The citizens of Lucca, in the 13th century, by way of asserting their independence of Pisa, went and coined money at the gates of that city. By the common law of England, and in many statutes, the crime of counterfeiting the money of the realm was declared high treason. By 27 Edw. I., *de Falsâ Monetâ* (1299), the importation of false money was made a capital crime. The counterfeiting of foreign coin current in England was declared high treason by 1 Mary, st. 2, c. 6 (1553), and as such rendered the offender subject to all the penalties used and ordained in that case. By 8 & 9 Will. III. c. 26, ss. 1 & 4 (1697), the mere possession of coiner's tools, as well as the colouring, gilding, &c., any coin resembling the current money, was made high treason. This was continued in 1702 by 1 Anne, c. 3. All former acts were, however, repealed by 2 Will. IV. c. 34 (May 23, 1832), which made the manufacture, purchase, or importation of false money, and the wilful injury of good money, punishable by transportation, since altered to penal servitude; while those guilty of uttering such coin were liable to imprisonment. The provisions of this act were extended to the colonies by 16 & 17 Vict. c. 48 (Aug. 4, 1853). Attempts having been made to use coin for advertising purposes, by stamping names upon it, this was declared to be a misdemeanour by 16 & 17 Vict. c. 102 (Aug. 20, 1853). The process of coining was, in early times, accomplished by hammering bullets of metal flat, and placing them between two dies; these were struck with heavy mallets until the impression was obtained. The French made an improvement upon this process about the middle of the 16th century, by the application of the screw. Antoine Brucher invented the coining-press in 1553, and milled money was coined by Elizabeth in 1562, though it was not general in England until 1662. Boulton invented his coining-machine in 1788, and the greater part of the coinage of the realm was carried on at his works at Soho, Birmingham, till the Mint was established in 1810.

COLAPOOR (Hindostan).—This Mahratta state was founded by Sumbajee, the grandson of Sevajee, who overran the country in 1670. At the commencement of the century, pirates from several of its ports infested the seas, and by treaty concluded Oct. 1, and ratified Nov. 13, 1812, the seaboard was ceded to the East India Company. The rajah was assassinated in 1821, and such confusion prevailed, that the state was for some time occupied by English troops.

COLBERG, or KOLBERG (Pomerania).—This town was besieged by the Poles in 1102. The Russians having besieged this place for 29 days, retired Oct. 31, 1758. They returned in 1760, with a fleet of 27 ships and an army of 15,000 men. Gen. Werner came to the assistance of the garrison, who held out bravely, Sep. 18, and in a few days dispersed both fleet and army. The Russians returned in 1761, and Prince Eugène of Würtemberg, at the head of the army sent for its relief, cut his way through the Russians Nov. 14, and the place, long defended with wonderful heroism, surrendered Dec. 16. The French, under Marshal Mortier, laid siege to Colberg in Dec., 1806, but its defender, Gen. Gneisenau, maintained his position till peace was restored by the treaty of Tilsit (*q. v.*).

COLBERG (Sea-fight).—Christian IV. of Denmark, commanding his fleet in person, defeated the Swedish admiral Claes Flemming, after an obstinate combat of 10 hours, off this town of Pomerania, July 1, 1644.

COLCHESTER (Essex), the Camelodunum of the Romans, and the Caer Colun of the Britons, is said to have been the birthplace of the Emperor Constantine in 272, and to have sent a bishop to the Council of Arles, 314. Neither of these stories is supported by trustworthy evidence. It was seized by the Danes in 838, and was not finally retaken till 921, when Edward the Elder expelled the foreigners and rebuilt the fortifications. Richard I. granted the first charter Dec. 6, 1189. The castle was besieged and the town plundered by the barons in 1215. The plague prevailed here in 1348 and 1360. Henry VI. visited the town Aug. 5, 1445, and Catherine of Aragon in 1516. The Dutch and Flemish exiles settled here in 1571, and established the manufacture of various woollen goods. Colchester was besieged and taken by the Parliamentarians during the civil war, the defence lasting from June 13 to Aug. 27, 1648. Between Aug., 1665, and Dec., 1666, the plague carried off 4,731 of the inhabitants. Colchester was deprived of its charter in June, 1684, but recovered it in 1693. The theatre was built in 1812; and the Essex and Colchester Hospital in 1820.

COLCHIS (Asia).—This country, celebrated in mythical history, is said by Herodotus to have been peopled by the remnant of the army led by Sesostris into Scythia. Xenophon attacked and defeated the Colchians during his celebrated retreat, B.C. 401. Colchis, long subject to Persia, became independent before the time of Alexander III. (B.C. 336—323). It was subjected by Mithridates VI. of Pontus, from whom it was wrested by Pompey, B.C. 65; but the Romans did not reduce the country into the form of a province. Gibbon remarks (ch. xlii.) that "the riches of Colchis shine only through the darkness of conjecture or tradition; and its genuine history presents an uniform scene of rudeness and poverty." In early times the Colchians were noted for their manufacture of linen and knowledge of navi-

gation. Colchis is the scene of the exploits of the fabled Argonautic expedition, the first attempt of the Greeks at distant navigation, said to have been undertaken B.C. 1263. Its original name was Æa, and it comprised the modern Mingrelia, and part of the neighbouring country.

COLDINGHAM (Berwickshire).—This place is celebrated for a nunnery, founded as early as the 7th century. In 679 it was destroyed by lightning, and in 870 seized by the Danes. The nuns cut off their noses and lips, in order to disfigure themselves, which so infuriated their brutal captors, that the whole sisterhood perished in the nunnery. King Edgar founded a Benedictine priory on the same site in 1098.

COLDSTREAM GUARDS.—This regiment was enrolled in the town of Coldstream, Berwickshire, by Gen. Monk, Jan. 1, 1660, and on the disbanding of the army in Jan., 1661, was retained by Charles II. in his special service.

COLENSO CASE.—John William Colenso, D.D., appointed Bishop of Natal in 1853, having in 1862 commenced the publication of a critical commentary on the Pentateuch and Book of Joshua, in which he expressed many opinions deemed hostile to the inspiration of Scripture, legal proceedings on a charge of heresy were commenced against him in the court of the Bishop of Cape Town, in Nov., 1863. These resulting in the deposition of Dr. Colenso from his bishopric, he appealed to the Judicial Committee of the Privy Council, which decided, March 20, 1865, that the Bishop of Cape Town had no jurisdiction over the Bishop of Natal, and that the previous proceedings were consequently void in law. Sentence of excommunication was, however, passed upon him by Dr. Robert Gray, Bishop of Cape Town, Dec. 16, 1865, and formally proclaimed in the cathedral at Maritzburg Sunday, Jan. 7, 1866.

COLERAINE (Ireland) was originally the seat of a bishop's see, founded by St. Cabreus about 540. In 1171 it was plundered by the King of Down, and again in 1213 by Thomas MacUchtry, who used the stones of the abbey as materials for a castle which he erected here. A monastery for Dominican friars was founded about 1244. James I. granted Coleraine and the surrounding districts to a company of London merchants, known as the "Governor and Assistants of the New Plantation in Ulster," in 1613, and in 1614 the town was incorporated by the same monarch.

COLIN (Battle).—(*See* KOLIN, Battle.)

COLISEUM.—This celebrated amphitheatre at Rome was commenced by the Emperor Vespasian in 75, and completed by Titus in 80. It received the name of Coliseum on account of its magnitude. Gibbon (ch. xii. thus describes the magnificent edifice:—"It was a building of an elliptic figure, five hundred and sixty-four feet in length, and four hundred and sixty-seven in breadth, founded on fourscore arches, and rising, with four successive orders of architecture, to the height of one hundred and forty feet. The outside of the edifice was encrusted with marble and decorated with statues. The slopes of the vast concave, which formed the inside, were filled and surrounded with sixty or eighty rows of seats, of marble likewise, covered with cushions, and capable of receiving with ease above fourscore thousand spectators." A bull-fight was celebrated in the Coliseum, Sep. 3, 1332. Eugenius IV. (1431—47) surrounded it with a wall, and it was consecrated by Benedict XIV. (1740—58).

COLLAR.—The use of collars of gold and jewellery is of the greatest antiquity. They were worn by the ancient Babylonians, Egyptians, Jews, Greeks, and Romans. Manlius Torquatus, who was consul at Rome B.C. 287, received his surname from a collar he took from a Gaul whom he slew in fight. Collars were afterwards used as part of the insignia of the various orders of knighthood. The collar of SS. is said to have been adopted in honour of the two martyrs Simplicius and Faustinus, who were thrown into the Tiber with stones and chains round their necks, by order of Diocletian; but this and other explanations of its origin do not rest upon good authority. This subject has been discussed in "Notes and Queries" (vol ii.). Boutell gives the following explanation:—"Next to the Garter itself, the most celebrated knightly decoration of this class is the Collar of SS. introduced by King Henry IV., apparently as a memorial of the success with which his aspiring ambition had been crowned: this letter S, repeated either in links of gold, or in gold embroidery, worked upon a fillet of blue, is the initial of the word 'Souveraine,' Henry's motto, which he bore while Earl of Derby." It was originally the livery of John of Gaunt, adopted by Henry IV. as part of the royal livery in 1399. Previous to the battle of Agincourt, Oct. 25, 1415, Henry V. permitted all the untitled members of his retinue to wear this collar; thereby conferring upon them the privileges of nobility. The collar of the order of the Garter was granted by Henry VII. some time between the years 1496 and 1502.

COLLAR (Order).—(*See* ANNUNCIADA.)

COLLECTS were introduced by Pope Gelasius I. between 492 and 496. The collects for the day of the Church service appeared in the first prayer-book of Edward VI., in 1548. Many are very ancient, some being the composition of St. Jerome, and even of Gelasius himself.

COLLEGE OF ARMS.—(*See* HERALDS' COLLEGE.)

COLLEGES, or associations of men employed in the same works, were established at Rome by Numa Pompilius (B.C. 715—B.C. 673). Educational colleges existed among the Jews and the Egyptians, and after the establishment of Christianity were generally attached to monasteries.—(*See* CAMBRIDGE UNIVERSITY, LION COLLEGE, MORDEN COLLEGE, OXFORD UNIVERSITY, PHYSICIANS, SURGEONS, VETERINARY SCIENCE, &c. &c. &c.)

COLLEGIANTS, or COLLEGIANS.—This sect was formed in Holland in 1619. Its members were thus named because they called their assemblies, or sacred conventions, held twice a year at Rheinsburg, near Leyden, colleges.

Three brothers, John-James, Hadrian, and Gisbert Koddeus, were its authors. Mosheim describes them as "a very large society of persons of every sect and rank, who assume the name of Christians, but entertain different views of Christ; and which is kept together neither by rulers and teachers, nor by ecclesiastical laws, nor by a formula of faith, nor, lastly, by any set of rites, but solely by the desire of improvement in scriptural knowledge and piety." In 1686 the Collegians split into two opposing sects, but the breach was healed early in the 18th century.

COLLIERY.—The earliest mention of collieries occurs in 1239, in a charter of Henry III., granting to the burgesses of Newcastle permission to dig for coal. In 1330 they were regarded as valuable property. The employment of females in collieries is regulated by 5 & 6 Vict. c. 99 (Aug. 10, 1842), which ordered that no new female workers should be engaged at all; that in three months after it was passed no female under 18 should be so employed; and that after March 1, 1843, female service in mines should be totally abolished.

COLLODION.—The iodized collodion now so largely employed for photographic purposes, was discovered by Mr. S. Archer, who published an account of its preparation and properties in the "Chemist" for March, 1851.

COLLOQUY OF POISSY.—This term was applied to a conference between the Huguenots and the Roman Catholics held in the refectory of the Benedictines at Poissy in Sep., 1561. Instead of settling their differences, both parties became more incensed and took up arms.

COLLYRIDIANS.—Arabian heretics, who "invested the Virgin Mary with the name and honours of a goddess." Epiphanius, Bishop of Constantia, who died May 12, 403, says they were all females, and that they sacrificed to the Virgin Mary. They arose towards the close of the 4th century, and received their name from the collyrides, or little cakes, which they offered to the Virgin Mary. They came from Thrace and parts of Scythia. Some sectaries that arose about the same time took the name of Antidicomarianites, or Adversaries of Mary, because they refused to honour Mary.

COLMAR (France), near the site of the ancient Argentaria, was raised to the rank of a town in 1220. It was made a free imperial city in the 13th century, and was fortified in 1552. The Swedes captured it in 1632, and Louis XIV. took it and destroyed its fortifications in 1673. It was ceded to France by the treaty of Ryswick, Sep. 10, 1697. The plague committed great ravages in 1541. Its cathedral was founded in 1363.

COLOGNE (Prussia), the Colonia Agrippina of the Romans, received its name from the Empress Agrippina, who was born here. The town was founded B.C. 37. Claudius established a Roman colony A.D. 51. It was erected into an archbishopric before 314.

A.D.
508. Clovis I. is declared King of the Franks at Cologne.
511. Cologne forms part of Austrasia.
700. The church and nunnery of Santa Maria in Capitolio are founded.
715. Charles Martel sustains a defeat near Cologne.
792. Charlemagne holds a council.
814. The old cathedral is founded.
870. Sep. 26. A council is held on discipline.
873. Sep. 26. A council is summoned.
887. April 1. A council is held against robbers of churches.
957. Cologne is declared an imperial town.
980. Archbishop Bruno founds the church of St. Pantaleon.
1057. A council for the reformation of the clergy is held.
1066. The church of St. Gereon is founded.
1110. A council is held.
1115. The Emperor Henry V. is excommunicated at a council.
1119. The excommunication of Henry V. is published at a council.
1164. The relics of the three kings are removed to Cologne.
1185. The outer walls are built.
1186. A council is held.
1187. A council is held.
1248. Destruction of the old cathedral by fire.
1259. All ships trading to the neighbourhood are compelled to unload here.
1261, March 12. A council is held.
1266. A council is held.
1270. The cathedral is commenced.
1281, March 9. A council on discipline is held.
1307, Feb. 22. A council against the Beghards is held.
1310. The year is ordered by a council to commence at Cologne at Christmas, instead of at Easter, according to their custom.
1322, Oct. 31. A council is held.
1388. The university is founded.
1390, Sep. 16. The ancient statutes of the province are renewed at a council.
1424, April 22. A council is held on discipline.
1425. Persecution and expulsion of the Jews.
1452, March 3. A council on discipline.
1536. A council on the duties of ecclesiastics, &c.
1571. The town-hall is built.
1577. Birth of Rubens at Cologne.
1579. A congress of European powers is held at Cologne.
1618. Expulsion of the Protestants.
1636. The church of the Jesuits is founded.
1642. Mary de Medicis dies at Cologne.
1655, Sep. Prince Charles, afterwards Charles II. of England, arrives at Cologne.
1787. The Protestants are allowed to erect a place of worship and a school.
1795. Cologne is seized by the French.
1801. It is made the capital of the French department of La Roer, and the archbishopric is secularised.
1814. It is restored to Prussia.
1815. The fortifications are rebuilt.
1837. The navigation of the Rhine is opened, which enables Cologne to carry on a direct foreign trade.
1841, Sep. 1. The railroad to Aix-la-Chapelle is opened.
1842, Sep. 4. The King of Prussia lays the foundation-stone of the new transept.
1848, Sep. The newly-finished parts of the cathedral are thrown open to the public.
1855. A permanent bridge over the Rhine, for railway and common traffic, is commenced.
1859. The south portal of the cathedral is completed.
1860. The central spire is added to the cathedral.
1865, June 2. An exhibition is opened by the Crown Prince of Prussia.

COLOGNE-SUR-SPRÉE (Treaties).—Frederick William, Elector of Brandenburg, by a treaty concluded at this place, which forms part of Berlin, April 26, 1672, agreed to assist the Dutch against Louis XIV. with 20,000 men. He also signed an alliance here with the Emperor Leopold I., Charles II. of Spain, and the States-General, July 1, 1674. A third treaty, concluded Feb. 10, 1682, established union and engagements to supply mutual aid between the said Elector and Christian V. of Denmark. Louis XIV. here signed an agreement with Frederick William of Brandenburg relative to the fulfilment of the truce of Ratisbon (*q. v.*),

Nov. 4, 1684. A convention of boundaries was signed here by the Duke of Pomerania (Charles XII. of Sweden) and Frederick, Elector of Brandenburg, March 31, 1699.

COLOMBIA (South America).—The ancient vice-royalty of New Granada and Quito, and the state of Venezuela, having thrown off the Spanish yoke, formed themselves into a republic under the name of Colombia, in 1819.

A.D.
1820, July 13. The Congress express willingness to enter into negotiations with Spain, if their republic is acknowledged independent.
1821, June 24. The republican troops, under Gen. Bolivar, defeat the royalists at Carabobo (*q. v.*).—Dec. Spain loses all power in the new republic.
1822, Nov. 13. Battle of Maracaibo, in which the republicans are defeated by the royalists, under Gen. Morales.
1823, March 8. Treaty of alliance between Colombia and Buenos Ayres.—Nov. 6. The Colombians take Puerto Cabello.
1824, Feb. 10. Bolivar is elected dictator by the Congress of Peru.—June 30. An alliance is formed between Colombia and Mexico.
1825, Jan. 1. Great Britain recognizes the independence of Colombia.—March 15. A treaty of alliance is concluded with Guatemala.—May 28. A treaty of friendship and commerce is made with the United States.—Nov. 7. A treaty of friendship and commerce is made with Great Britain.
1826, Aug. 19. The Congress at Lima declares Bolivar president for life.—Sep. 1. Bolivar appoints Santa-Cruz his deputy during his absence in Peru.—Nov. 14. Bolivar returns to Santa Fé de Bogota.—Nov. 23. He accepts the dictatorship.
1828, April 18. Insurrection of Colombian troops.—April 23. The Congress of Ocana declares Ignacio Marquez president.—Sep. 25. Santander excites a revolt against Bolivar, who escapes assassination, and quells the insurrection.
1829. Venezuela constitutes itself a separate republic.
1830, Jan. 20. Bolivar tenders his resignation of the presidentship, and retires to Cartagena shortly afterwards. Venezuela again joins New Granada.—Dec. 17. Death of Bolivar.
1831, Nov. 17. Venezuela, New Granada, and Colombia again become separate states. (*See* VENEZUELA.)

COLOMBO (Ceylon), called by the Moors Kalambu, and mentioned by them in 1340, was fortified by the Portuguese in 1517. Cotta (*q. v.*) having been dismantled in 1564, Colombo was made the capital of Ceylon. Rajah Singha laid siege to it in Aug., 1586, but was forced to withdraw the following year. The Dutch wrested it from the Portuguese in 1656, and retained possession till, by a treaty signed here Feb. 15, 1796, they ceded all their fortified towns and stations in Ceylon to the English. Colombo was made a bishopric in 1845.

COLONIA.—(*See* CAMELODUNUM.)

COLONIAL BISHOPRICS.—The bishops of the Scotch Episcopal Church consecrated the Rev. Dr. Seabury, of Connecticut, first bishop in America, at Aberdeen, Nov. 24., 1784. Bishops for New York and Pennsylvania were consecrated at Lambeth, Feb. 4, 1787, and bishops were afterwards appointed for other parts of the United States. Nova Scotia, the first colonial see, was erected Aug. 11, 1787. By 15 & 16 Vict. c. 52 (June 30, 1852), extended by 16 & 17 Vict., c. 49 (Aug. 4, 1853), colonial bishops are empowered to exercise all episcopal functions in the United Kingdom except that of jurisdiction. The following are the colonial sees, with the date of erection:—

A.D.
1787. Nova Scotia.
1793. Quebec.
1813. Calcutta.
1824. Barbadoes.
1824. Jamaica.
1833. Bombay.
1833. Madras.
1836. Australia, afterwards Sydney.
1839. Newfoundland.
1839. Toronto, Canada West.
1841. New Zealand.
1842. Antigua.
1842. British Guiana.
1842. Gibraltar.
1842. Tasmania.
1845. Colombo, Ceylon.
1845. Fredericton, New Brunswick.
1847. Adelaide, South Australia.
1847. Cape Town, Cape of Good Hope.
1847. Melbourne, Victoria.
1847. Newcastle, N. S. Wales.
1847. Sydney.
1849. Victoria, Hong-Kong.
1850. Montreal, Canada.
1850. Prince Rupert's Land.
1850. Sierra Leone.
1853. Graham's Town, Cape of Good Hope.
1853. Natal, Cape of Good Hope.
1854. Mauritius.
1855. Labuan, Borneo.
1856. Christchurch, New Zealand.
1856. Kingston, Jamaica.
1856. Perth, Western Australia.
1857. Huron, Canada West.
1858. Nelson, New Zealand.
1858. Wellington, New Zealand.
1858. British Columbia.
1859. Brisbane, Moreton Bay.
1859. St. Helena.
1859. Waiapu, New Zealand.
1861. Nassau, Bahama Islands.
1861. Ontario, Canada.
1863. Goulbourn, N.S. Wales.
1865. Dunedin, New Zealand.
1865. Grafton and Armidale.
1865. New Westminster, British Columbia.

—(*See* MISSIONARY BISHOPS.)

COLONY.—The Phœnicians and the Carians planted several colonies in the Mediterranean, and the Greeks followed their example. The Romans began to establish colonies during the monarchical period. In modern times, the Venetians, the Portuguese, the Spanish, the French, the English, and the Dutch, have been distinguished by their attempts to form colonies. England has succeeded in establishing the most extensive colonial empire of ancient or modern times. The following list of colonies, which are more fully described under their titles, contains the date of the first connection of England with each, whether by conquest, settlement, or treaty:—

A.D.
1536. Newfoundland.
1579. Moluccas.
1609. Bermudas.
1618. African Forts.
1618. Gambia.
1618. Gold Coast.
1620. Cape of Good Hope.
1621. Nova Scotia.
1623. St. Christopher's.
1624. Barbadoes.
1628. Nevis.
1630. Bahama Islands.
1632. Antigua.
1632. Montserrat.
1632. Anguilla, or Snake Island.
1634. Bengal.
1634. Berbice.
1639. Madras.
1651. St. Helena.
1655. Jamaica.
1661. Cape Coast Castle.
1662. Bombay.
1666. Tortola, Virgin Isles.
1668. Dominica.
1674. Belize, or British Honduras.
1704. Gibraltar.
1713. New Brunswick.
1745. Prince Edward's Island.
1745. Cape Breton.
1759. Lower Canada.
1760. Upper Canada.
1762. Grenada.
1762. St. Lucia.
1763. Tobago.
1763. St. Vincent.
1763. Ceylon.
1766. Falkland Islands.
1770. New South Wales.
1785. Penang, or Prince of Wales Island.
1787. Sierra Leone.
1791. Vancouver Island.
1796. Demerara.
1796. Essequibo.
1797. Trinidad.
1798. Gozo.
1800. Malta.
1803. Port Phillip.
1803. Tasmania, or Van Diemen's Land.
1807. Heligoland.
1809. The Ionian Islands.
1810. Mauritius.
1814. New Zealand.
1815. Ascension Island.
1844. Natal.
1827. Fernando Po.
1829. Western Australia, or Swan River.
1831. British Guiana.
1834. South Australia.
1837. Victoria, Australia.
1841. Hong-Kong.
1848. Labuan.
1851. Lagos.
1858. British Columbia.
1859. Queensland, or Moreton Bay.

COLOPHON (Asia Minor).—An Ionian city, founded, according to tradition, by Andræmon. It was a flourishing city as late as B.C. 66. Strabo says that the Colophonians were celebrated for the excellence of their cavalry. It was, in fact, considered invincible, and gave rise to the proverb, "He has put the Colophon to it," or given the finishing stroke, used to show that a matter had been brought to a certain termination. Old works, before the introduction of a title-page, had title, date, &c., printed at the end; and this, as the last thing printed, was termed a colophon.

COLORADO, or COLERADO (United States).—This district was separated from Utah and Kansas, and organized as a distinct territory by act of Congress, Feb. 28, 1861. It maintained the Federal interests during the civil war. A proposal to erect it into a state of the Union was rejected in March, 1866. Important gold fields have been discovered.

COLOSSÆ (Asia Minor).—This city of Phrygia, first mentioned by Herodotus (B.C. 484—408), was visited by Xerxes with his army B.C. 481, and by Cyrus the Younger B.C. 401. In the time of Strabo (B.C. 60—A.D. 21) it had lost most of its ancient importance, and now scarce a ruin marks its former site.

COLOSSEUM.—(*See* COLISEUM.)

COLOSSIANS (Epistle) was addressed by St. Paul to the Christians of Colossæ, in Phrygia, in 62.

COLOSSUS OF RHODES, a brazen statue of Apollo, commenced by Charès de Lindos B.C. 290, and completed B.C. 280. The statement that one foot rested on each side of the harbour of Rhodes, and that ships passed under it in full sail, does not rest on good authority. It was 105 feet in height, and was ascended by a winding staircase. It was overthrown by an earthquake B.C. 224 or B.C. 222, and was never re-erected. The remains were sold to a Jewish merchant of Edessa in 672, and 900 camels were laden with the brass. It was one of the seven wonders of the world.

COLUMBIA (S. Carolina), the capital of the state, was founded in 1787, when the seat of government was removed hither from Charleston. The S. Carolina college was founded in 1804, and the Presbyterian theological seminary in 1831. It was occupied by the Federals under Gen. Sherman Feb. 17, 1865.

COLUMBIA DISTRICT (United States), originally containing about 100 square miles, was ceded to the United States Government by the states of Virginia and Maryland in 1790. Washington (*q. v.*), the capital, was surveyed in 1791. The annexation of the county of Alexandria to Virginia in 1846 reduced the area of the district to 60 square miles. The senate of the United States abolished slavery in this district April 3, 1862.

COLUMBIA RIVER.—(*See* OREGON.)

COLUMBIUM, or TANTALUM.—This metal was discovered by Mr. Hatchell in a ferruginous mineral from North America in 1801. Eckeberg, who afterwards found it in a Swedish mineral, gave it the name of Tantalum.

COLUMBUS (United States).—This, the chief town of Ohio, was founded in 1812 and incorporated in 1816. The state-house, erected in 1814, was burned Feb. 1, 1852. The institution for the blind and the lunatic asylum were founded in 1836.

COMBS were made by the Greeks and Romans, and during the Middle Ages, of boxwood, ivory, and other materials. They often occur in early barrows, British, Roman, and Saxon; and were buried with both pagans and Christians. Some were found at Pompeii like the modern small-t oth combs. In the 13th century combs were sometimes made of gold and set with jewels. The Comb-makers' Company was incorporated in 1636.

COMEDY was introduced at Athens by Susarion and Dolon, B.C. 578. Epicharmus, born at Cos B.C. 540, composed the first regular comedies. Thespis, the "father of comedy," performed on a waggon B.C. 535. A decree for its prohibition was passed B.C. 440, but was evaded, as performances are recorded to have taken place B.C. 439 and B.C. 437. Aristophanes, the chief poet of the old comedy, exhibited his first production B.C. 427. The middle comedy commenced B.C. 375, and was supported by 35 poets, none of whom are of great repute. The new comedy, which began about B.C. 335, owes its chief celebrity to the productions of Menander, who commenced his theatrical career B.C. 321. The principal Latin comedy writers are Plautus, who died B.C. 184, and Terence, B.C. 159. Some difference of opinion prevails respecting the origin of English comedy. Hallam (Lit. vol. ii. pt. ii. ch. 6) speaks of "Ralph Roister Doister, written by Udal in the reign of Henry VIII., as the earliest English comedy in a proper sense, so far as our negative evidence warrants such a position." This comedy, probably written before 1540, was first printed in 1565. Hallam believes it to be "the earliest lively picture of London manners among the gallants and citizens, who furnished so much for the stage down to the civil wars." For a long time "Gammar Gurton's Needle," supposed to have been written by John Still, afterwards Bishop of Bath and Wells, was considered the first English comedy. It was represented at Christ's College, Cambridge, about 1565, and the earliest edition is that of 1575. "Misogonus," written by Thomas Rycharles, another comedy, is known to have been written before 1560. In France, Jodelle's comedy of "La Rencontre" was represented before Henry II. in 1552; and his comedy of "L'Abbé Eugène" was published about the same time. Hallam terms the "Le Menteur" of Corneille "the first French comedy written in polite language, without low wit or indecency." The comedies of Larivey were published in 1579; and Molière began to write in 1653. Ariosto wrote the first regular Italian comedies in 1495, and Machiavelli composed his "Mandragola" before 1520. Flaminio Scala first published the outline of a series of extemporaneous comedies in 1611, and they afterwards became the most popular branch of the Italian drama. Spanish comedy commenced in the latter portion of the 16th century, and was chiefly supported by Lope de Vega, who flourished in 1600, and by Calderon, who published 12 comedies in 1635. The German theatre is not

very rich in comic authors. Hans Sachs, who died Jan. 25, 1578, probably supplied its earliest comedies.

COMETS.—Humboldt (Cosmos, vol. i. p. 84) remarks, that "Kepler, with his usual animation of expression, said that there were more comets in the regions of space than fishes in the depths of ocean. As yet, however, there are scarcely 150 whose paths have been calculated, if we may assume at 600 or 700 the number of comets whose appearance and passage through known constellations have been ascertained by more or less precise observations." The Chinese observations, which commence B.C. 500, are of great value. Mr. John Russell Hind has published a history of comets; and in his work much of the information given in the following list will be found :—

B.C.
370. A comet is mentioned by Aristotle. It is calculated by Pingré.
136. A comet is mentioned by Justin, and observed in China.
52. A comet, supposed by Arago to be Halley's, is observed in Europe.
44. A comet is seen at Rome.

A.D.
178. A comet is observed by the Chinese.
349. A comet is mentioned by contemporary historians as of extraordinary brilliancy and size, and as a cause of much terror.
531. A comet, supposed to be the same as that which appeared B.C. 44, is visible.
583. A comet is recorded in the Chronicle of Idatius.
615, July. A comet is observed in China. First mention of coruscations in the tail of a comet.
685. A comet, said by Arago to be *Halley's Comet*, is observed.
891, May. A comet is observed in Europe and in China.
989. A comet is observed in China, and supposed to have been *Halley's Comet*.
1006. A comet, probably Halley's, is observed by Hali Ben Rodoan.
1066. A comet is observed in Europe, and considered ominous, as it occurred in the year of the Norman conquest.
1106. A comet, supposed to be the same which appeared B.C. 44 is visible.
1230. A comet, probably Halley's, is observed.
1264. A comet, calculated by Pingré, is supposed to be identical with that of 1556.
1305. A comet, probably Halley's, is observed.
1337. A fine comet is described by Nicephorus Gregoras and in the Chinese annals.
1378. A comet, afterwards found to be *Halley's Comet*, is observed by the Chinese.
1402. A very splendid comet is visible in Europe and Asia.
1456. *Halley's Comet* is observed in Europe and China.
1472. A very splendid comet, with a prodigiously long tail, is observed in Europe and China.
1527. A comet appears.
1531. Apian observes a comet (Halley's) at Ingolstadt.
1556. A comet, supposed to be that of 1264, is visible.
1607. A comet (Halley's) makes its appearance.
1618, Nov. A comet is discovered by Kepler, Gassendi, and others, and observed by Harriott.
1680, Nov. 14. A comet, discovered by Godfrey Kirch, at Coburg, directed Newton's attention to cometary astronomy. This comet is supposed to be identical with that which appeared B.C. 44 and A.D. 531 and 1106.
1682. *Halley's Comet*, discovered by him to be identical with that of 1456 and succeeding years, and to be periodical in its return. This was the first demonstration of the periodical return of comets.
1707, Nov. 25. A comet is discovered by Manfredi and Stancari, at Bologna.
1744. The finest comet of the 18th century appears, and is observed by almost every astronomer of the age.
1759. *Apian* or *Halley's Comet* returns.
1772. *Biela* or *Gambart's Comet* appears

A.D.
1786, Jan. 17. *Encke's Comet* is discovered by Mechain.
1811, March 26. The *Grand Comet* is discovered by Flaugergues, at Viviers.
1815, March 6. *Olbers' Comet* is discovered by Olbers, at Bremen.
1819. *Encke's Comet* is discovered by Pons. During this appearance its periodicity was detected by Encke.
1823, Dec. A comet with two tails, one turned from the sun, and the other towards it, is seen in various parts of Europe.
1825, July 15. The *Great Comet* of 1825, discovered by Pons is calculated by Hansen.
1826, Feb. 27. *Biela* or *Gambart's Comet* is discovered by Biela, at Josephstadt. During this appearance its recurrence at short periods was ascertained.
1835. *Apian* or *Halley's Comet* reappears.
1843, Feb. 28. The *Great Comet* of 1843 is discovered in America, Italy, and at the Cape.
1844, Nov. 22. *Faye's Comet* is discovered by Faye, at Paris, and ascertained to be periodical.
1846. *Biela* or *Gambart's Comet* reappears.
1851, June 27. *D'Arrest's Comet* is discovered by D'Arrest, at Leipsic, and ascertained to be periodical.
1852. *Biela* or *Gambart's Comet* is again visible.
1858, June 2. *Donati's Comet* is discovered by Donati, at Florence. It was seen in Great Britain in Sep. and Oct.
1860, Oct. M. Tempel discovers a comet at Marseilles.
1861, June 30. A brilliant comet is first visible in England.—Dec. 29. Mr. Tuttle discovers a telescopic comet at Harvard College, Cambridge, U.S.
1862, July 2. Schmidt discovers a comet at Athens.—July 18. A comet, discovered at Cambridge, U.S., is afterwards observed at Rome by Prof. Rosa.
1863, Oct. 9. Bäcker, a watchmaker of Leipsic, discovers a small comet.—Nov. 4. Tempel discovers a comet visible to the naked eye.—Dec. 28. M. Respighi, of Bologna Observatory, discovers a comet.
1864, Jan. 1. A new comet is observed by M. Bäcker, of Nauen, near Berlin.—July 6. A comet is observed by Tempel, at Marseilles, and Respighi, at Bologna.
1865. A comet is visible in Australia.

COMFITS.—During the reign of Henry III. of France (1574—1589) an excessive use of comfits was one of the flagrant follies of fashion. Disraeli (Curiosities, i. 221) says, "All the world, the grave and the gay, carried in their pockets a *comfit-box*, as we do snuff-boxes. They used them even on the most solemn occasions; when the Duke of Guise was shot at Blois, he was found with his comfit-box in his hand."

COMMAGEN, or COMMAGENE (Syria).—This little kingdom, which during the supremacy of the Seleucidæ (B.C. 323—B.C. 65) formed part of the Syrian territory, became subsequently an independent state. Its king, Antiochus, besieged in his capital, Samosata (*q. v.*), by Ventidius, B.C. 38, was put to death at Rome, B.C. 29. Augustus conferred Commagen upon an infant prince named Mithridates, B.C. 20, and on the death of King Antiochus III., A.D. 17, it became a Roman province. In 38 it was given to Antiochus IV., son of the former king, and in 73 was again reduced to the state of a province. This district, united with Cyrrhestica (*q. v.*) by Constantine I. (323—337), received from him the name of Euphratensis. It was ravaged by the Persians under Chosroes I. in 543.

COMMANDER-IN-CHIEF.—This officer acts as the immediate deputy of the sovereign in controlling the *organization*, &c., of the land forces of the country: their *employment*, &c., being regulated by the Secretaries of State. The following is a list of the commanders-in-chief :—

A.D.
1674, March 30. James, Duke of Monmouth.
1690, June 3. John Churchill, Earl, afterwards Duke of Marlborough.
1691, April 30. Meinhardt Schomberg, Duke of Leinster, afterwards Duke of Schomberg.
1711, Jan. 1. James Butler, Duke of Ormond.
1744, May. John, Earl of Stair.
1745, March. Field-Marshal George Wade.
1757, Oct. 24. John, Viscount, afterwards Earl Ligonier.
1766, Aug. 13. John, Marquis of Granby.
(1770. At his death the office remained some time vacant.)
1778, March 19. Jeffrey, Lord Amherst.
1782, March 29. Hon. Henry Seymour Conway.
1793, Jan. 21. Jeffrey, Lord Amherst, again.
1795, Feb. 11. H.R.H. Frederick, Duke of York.
1809, March 25. Sir David Dundas, Bart.
1811, May 29. H.R.H. Frederick, Duke of York.
1827, Jan. 22. Arthur, Duke of Wellington.
(1827, May 6. The office is vacant.)
1827, Aug. 27. Arthur, Duke of Wellington, again.
1828, Feb. 25. Rowland, Viscount Hill.
1842, Aug. 15. Arthur, Duke of Wellington.
1852, Sep. 28. Henry, Viscount Hardinge.
1856, July. H.R.H. George, Duke of Cambridge.

COMMENDATORY ABBOTS.—(*See* ABBA-COMITES.)

COMMERCE.—The Phœnicians, who were the most ancient nation of traders on the earth, are called the inventors of commerce and navigation. Their ships traded with Greece as early as B.C. 1800, and they founded many colonies as centres of trade B.C. 1450. The chief commercial nations of the Middle Ages were the Venetians, whose importance commenced about 722; the Pisans, who reached the culminating point of their prosperity about 1063; and the Genoese, who rose to great power and affluence in 1064. The Hanseatic league, a confederacy of towns for the protection of trade, became influential about the year 1140. In 1252 Flanders attained a high position from the success of its merchants, and the Florentine republic was one of the chief commercial powers in 1298. The commercial importance of England was considerably improved by Edward I., who granted a charter on behalf of foreign merchants in 1302. From this charter it appears that the British then had intercourse with Germany, France, Spain, Portugal, Flanders, Lombardy, Florence, and other smaller states. France was so poor in 1360, that a leather currency was adopted, and long afterwards commerce was in a very languishing state. Jacques Coner, however, who held some financial office under Charles VII., was said to be the wealthiest merchant in the world in 1449. The discovery of America by Columbus in 1492, and the other results of the marine enterprise of the 16th century, developed new fields for commercial activity.

COMMISSARIAT. — In the Roman armies the office of superintending the food, &c., of the troops, was performed by the quæstors (*q. v.*). During the Middle Ages, under the feudal system, this important department of military economy was so inefficiently discharged that many common soldiers perished from starvation during the Crusades, and at all times the lower ranks of the army were mainly dependent upon plunder for their support. A proviant-master was appointed during the reign of Queen Elizabeth (1558—1603), to regulate the supplies of the English army, and in the time of Charles I. (1625—1649) commissaries were established in the various counties. In 1793 a commissary-general was appointed, to control all contracts for food and forage. In consequence of mismanagement during the Crimean war, this department was newly organized in 1858 and 1859.

COMMISSION.—(*See* HIGH COMMISSION COURT.)

COMMISSIONNAIRES. — This corps was founded in London in 1859 for the employment as porters, messengers, &c., of wounded soldiers and sailors of good character.

COMMITTEE.—(*See* GENERAL SAFETY and PUBLIC WELFARE.)

COMMON COUNCIL (London).—This arose out of the folk-mote, a general *mote*, or meeting of the people, an institution of Anglo-Saxon origin. It was held at a much earlier date than 1208, the year mentioned by many authorities as the first in which a folk-mote was summoned. There were three principal folk-motes in the year; one at the feast of St. Michael (Sep. 29), to appoint a sheriff; the second at Christmas, to arrange the wards; and the third at the feast of St. John (June 24), to protect the city from fire, by reason of the great drought. Each citizen neglecting to attend was fined 40 shillings, a large sum in those days. Stow relates that in the time of Edward II. the citizens claimed the east part of St. Paul's churchyard to be the place of assembly of their folk-motes; and that "the great steeple, there situate, was to that use, their common bell; which being there rung, all the inhabitants of the city might hear, and come together." The same author refers to a solemn meeting or common council held Oct. 11, 1190, in St. Paul's churchyard, and adds, "it is likely in that place where the folk-mote used to assemble." The meetings in the open air were discontinued, and in 1347 each ward was instructed to send delegates according to its extent. The common council now meets in the Guildhall every Thursday, and the annual elections occur on St. Thomas's day (Dec. 21).

COMMON LAW.—Concerning the unwritten law of England, Dugdale observes (Origines, c. 3), "The *common law* is, out of question, no less ancient than the beginning of differences betwixt man and man, after the first peopling of this land." It has been handed down by the Britons, Romans, Saxons, and Danes, and was digested into a code by Edward the Confessor (1042—1066). This code was confirmed by William I. about 1070; and the statute of Merton, enacted Jan. 23, 1236, declared the intention of the nobles not to change laws which had been so long used and approved.

COMMON LOT.—(*See* BRETHREN OF SOCIAL LIFE.)

COMMON PLEAS (England). — Originally the trial of common causes was referred to the *aula regia*, or court of exchequer, which followed the king in all his progresses: but Magna Charta, c. 11, June 15, 1215, ordered that they should be tried in a court always held at one place. Westminster Hall was fixed upon, and a chief-justice of the Common Pleas was appointed, with power to hear and decide

all civil cases between subject and subject. Formerly no barrister below the rank of serjeant could plead in this court, although all were permitted to move or show cause against a rule for a new trial; but by 9 & 10 Vict. c. 54 (Aug. 18, 1846), all barristers practising in the superior courts at Westminster were made eligible. The following is a list of the chief justices of the Common Pleas given by Foss in his Tabulæ Curiales:—

EDWARD I.

A.D.
1272, Nov. Gilbert de Preston.
1273-4 Roger de Seyton.
1277-8 Thomas de Weyland.
1289, Sep. 4. Ralph de Sandwich.
1290, Feb. John de Methyngham.
1301, Sep. 19. Ralph de Hengham.

EDWARD II.

1307, July 8. Ralph de Hengham.
1309, March 15. William de Bereford.
1326, July 18. Hervey de Staunton.

EDWARD III.

1327, Jan. 25. William de Herle.
1329, Sep. 2 and 3. John de Stonore.
1331, March 2. William de Herle (again).
1335, July 7. John de Stonore (again).
1341, Jan. 8. Roger Hillary.
1342, May 9–16. John de Stonore (again).
1354, Feb. 20. Roger Hillary (again).
1356, June 27. Robert de Thorpe.
1371, April 14. William de Fyncheden.
1374, Oct. 10. Robert de Bealknap.

RICHARD II.

1377, June. Robert de Bealknap.
1378, Jan. 30. Robert de Charleton.
1396, Jan. 15. William Thirning.

HENRY IV.

1399, Sep. 30. William Thirning.

HENRY V.

1413, May 2. William Thirning.
June 26. Richard Norton.

HENRY VI.

1423, May 5. William Babington.
1436, Feb. 9. John Juyn.
1439, Jan. 20. John Cotesmore.
Oct. 14. Richard Newton.
1449, June 16. John Prisot.

EDWARD IV.

1461. Robert Danby.
1471, May 29. Thomas Bryan.

RICHARD III.

1483, June 26. Thomas Bryan.

HENRY VII.

1485, Aug. Thomas Bryan.
1500, Oct. 28. Thomas Wood.
1502, Sep. 30. Thomas Frowyk.
1506. Robert Read.

HENRY VIII.

1509, April. Robert Read.
1519, Jan. 27. John Ernle.
1521, April 13. Robert Brudenell.
1531, Feb. Robert Norwich.
1535, April. John Baldwin.
1545, Nov. 6. Edward Montagu.

EDWARD VI.

1547, Jan. Edward Montagu.

MARY.

1553, Sep. 5. Richard Morgan.
1554, Oct. 8. Robert Brooke.
1558, Oct. 5. Anthony Browne.

ELIZABETH.

A.D.
1558, Nov. 17. Anthony Browne.
1559, Jan. 22. James Dyer.
1582, May 2. Edmund Anderson.

JAMES I.

1603, March. Edmund Anderson.
1605, Aug. 26. Francis Gawdy.
1606, June 30. Edward Coke.
1613, Nov. 26. Henry Hobart.

CHARLES I.

1625, March 27. Henry Hobart.
1626, Nov. 28. Thomas Richardson.
1631, Oct. 26. Robert Heath.
1634, Oct. 14. John Finch.
1640, Jan. 27. Edward Lyttelton.
1641, Jan. 20. John Banks.
1648, Oct. 12. Oliver St. John.

INTERREGNUM.

1649, Feb. Oliver St. John.

CHARLES II.

1660, Oct. 22. Orlando Bridgeman.
1668, May 23. John Vaughan.
1675, Jan. 23. Francis North.
1683, Jan. 22. Francis Pemberton.
Sep. 29. Thomas Jones.

JAMES II.

1685, Feb. Thomas Jones.
1686, April 21. Henry Bedingfield.
1687, April 16. Robert Wright.
April 22. Edward Herbert.

WILLIAM III. AND MARY—WILLIAM III. ALONE.

1689, May 4. Henry Pollexfen.
1692, May 3. George Treby.
1701, June 28. Thomas Trevor.

ANNE.

1702, March 8. Thomas Trevor.
1711, Dec. 31. Created Lord Trevor.

GEORGE I.

1714, Aug. Lord Trevor.
Oct. 14. Peter King.
1725, June 3. Robert Eyre.

GEORGE II.

1727, June. Robert Eyre.
1736, Jan. Thomas Reeve.
1737, Jan. John Willes.

GEORGE III.

1760, Oct. John Willes.
1762, Jan. 23. Charles Pratt.
1765, July. Created Lord Camden.
1766, Aug. 21. J. E. Wilmot.
1771, Jan. 25. William de Grey.
1780, June 9. Alexander Lord Loughborough.
1793, Jan. 28. James Eyre.
1799, July 18. John Lord Eldon.
1801, May 30. Richard Pepper, Lord Alvanley.
1804, May 8. James Mansfield.
1814, Hil. Vac. Vicary Gibbs.
1818, Nov. Robert Dallas.

GEORGE IV.

1820, Jan. Robert Dallas.
1824, Jan. 9. Robert Lord Gifford.
April 15. W. D. Best.
1829, June 9. Nicolas Conyngham Tindal

WILLIAM IV.

1830, June. N. C. Tindal.

VICTORIA.

1837, June. N. C. Tindal.
1846, July 7. Thomas Wilde.
1850, July 15. John Jervis.
1856, Nov. 21. Alexander J. E. Cockburn.
1859, June 24. William Erle.

COMMON PLEAS (Ireland).—The constitution of this court is similar to that of the court of Common Pleas in England. The following is a list of the chief justices of the court of Common Pleas in Ireland from 1532:—

HENRY VIII.

A.D.
1532, Aug. 22. Richard Delahyde.
1534, Oct. 17. Thomas Luttrell.

EDWARD VI.

1547, Jan. Thomas Luttrell.

MARY.

1553, July. Thomas Luttrell.
1554, July 7. John Bathe.

ELIZABETH.

1558, Nov. John Bathe.
1559, Sep. 3. Robert Dillon.
Nicholas Nugent.
1581, June 28. Robert Dillon.
1593, Oct. 10. William Weston.
1594, March 15. Robert Dillon (again).
1597, Nov. 15. Nicholas Walshe.

JAMES I.

1603, March. Nicholas Walshe.
1610, Nov. 28. Dominick Sarsfield.

CHARLES I.

1625, March. Dominick Sarsfield.
1634, April 24. Gerard Lowther.

INTERREGNUM.

1649, Jan. Gerard Lowther.
1660, Jan. 19. James Donelan.

CHARLES II.

1660, May. James Donelan.
1665, Jan. 27. Edward Smith.
1669, March 17. Robert Booth.
1679, May 3. John Keating.

JAMES II.

1685, Feb. John Keating.

WILLIAM AND MARY.

1689, Feb. John Keating.
1690, Jan. 22. Richard Pyne.
1695, June 7. John Hely.
1701, May 16. Richard Cox.

ANNE.

1702, March. Richard Cox.
1703, Feb. 1. Robert Doyne.

GEORGE I.

1714, Aug. Robert Doyne.
1714, Oct. 14. John Forster.
1720, Dec. 5. Richard Levinge.
1724, Nov. 9. Thomas Wyndham.
1740, Feb. 10. William Whitshed.

GEORGE II.

1727, June. William Whitshed.
1727, Nov. 24. James Reynolds.
1740, May 30. Henry Singleton.
1753, Feb. 19. William Yorke.

GEORGE III.

1760, Oct. William Yorke.
1761, May 21. Richard Aston.
1765, March 19. Richard Clayton.
1770, July 4. Marcus Patterson.
1787, May 10. Hugh Carleton (afterwards Lord Carleton).
1800, Dec. 20. John Toler (afterwards Lord Norbury).

GEORGE IV.

1820, Jan. John Toler.
1827, June 18. Lord Plunkett.

WILLIAM IV.

A.D.
1830, June. Lord Plunkett.
1832, Dec. 23. John Doherty.

VICTORIA.

1837, June. John Doherty.
1850, Oct. 22. James Henry Monahan.

COMMON PRAYER.—The first proposition to revise and correct the Roman Catholic church services was made in 1542, when it was ordered that the names and titles of the popes and of Thomas Becket should be rigorously expunged. The Litany was published in its present form June 11, 1544, and commanded to be used in churches by Henry VIII.; and the Order of Communion was substituted for the Mass, April 1, 1548. The Book of Common Prayer was completed and presented to the king the same year, and the Act of Uniformity, 2 & 3 Edw. VI. c. 1. (Jan. 15, 1549), ordered that all public service should be celebrated according to the ritual there prescribed. (*See* THIRTY-NINE ARTICLES.)

A.D.
1549, June 9 (Whitsunday). The first prayer-book is used.
1550, Feb. The English Ordinal is published.
1551, The Prayer-Book is revised.
1552, Nov. The second Prayer-Book is published and used.
1558, Dec. Two editions of the Litany are published.
1559, June 24. Queen Elizabeth's revised Prayer-Book is published, and ordered to be used.
1560, Haddon's Latin translation of the Prayer-Book.
1571, A correct Latin version of the Prayer-Book is published.
1578, The Puritan Prayer-Book is published.
1604, James the First's Prayer-Book is published.
1637, Charles the First's Prayer-Book for Scotland is published.
1643, The use of the Book of Common Prayer is prohibited by the Long Parliament.
1661, The Prayer-Book is revised.
1662, Charles the Second's Prayer-Book is published.
1689, An attempt is made to revise the Prayer-Book.
1859, Jan. 17. Warrant under the royal sign manual for discontinuing the special services for Jan. 30, May 29, and Nov. 5, and for omitting them in the Book of Common Prayer, is signed at St. James's. Jan. 18. The warrant is published in the *London Gazette*.

COMMONS.—(*See* HOUSE OF COMMONS.)

COMMONWEALTH.—(*See* INTERREGNUM.)

COMMUNION SERVICE.—The early Church was exceedingly strict in the administration of the Eucharist, and during the 3rd century denied the privilege of communication to a converted sinner who twice relapsed into error. Communion in two kinds was enjoined by Leo I. (the Great) in 445, in order to discover Manichæans, who objected to take wine. The Council of Agda in 506 enacted that clergy not communicating at Easter, Whitsuntide, and Christmas, should no longer be regarded as Catholics; and the Lateran (twelfth general) council, held Nov. 11, 1215, ordered all the faithful of both sexes to confess and communicate at Easter. Communion in one kind only was instituted by Pope Urban II. at the commencement of the Crusades in 1096, but it was not rendered imperative till 1414, when the Council of Constance forbade the clergy to administer wine to lay communicants, under pain of excommunication. The Romish Church has ever since administered the communion in one kind. The communion service of the Church of England was adopted in 1552.

COMMUNISTS.—The followers of Robert Owen, Saint Simon, Fourier, and Proudhon are distinguished from other Socialists, of which they form a branch, by this name. Communism was explained and advocated by Robert Owen in "A New View of Society, or Essays on the Principle of the Formation of the Human Character, and the Application of the Principle to Practice," published in 1813. He attempted to form a communist society in 1825, but this failed; and "Harmony Hall," established in Hampshire in 1843, did not prove more successful. Similar attempts made on the continent have also failed. Owen died Nov. 17, 1858.

COMO (Italy), the Comum Novum of the Romans, who planted a colony here B.C. 188. It was erected into a bishopric by St. Felix, in 379. In 1127 it was besieged and burned by the Milanese, who did not finally annex it to their territories till 1335. The cathedral was commenced in 1396.

COMORN, or KOMORN (Hungary), a town of great antiquity, was taken and burned by Soliman I. in 1543. It was soon rebuilt; but the Turks returned and captured it in 1594. The Imperialists obtained possession in 1597, and in 1598 it again fell under Turkish power. Comorn was erected into a royal town in 1751. The fortress was rebuilt in 1805. During the Hungarian revolution, the Austrians were defeated in a battle near this place, July 11, 1849. The town was given up to the Austrians Oct. 1, 1849.

COMPANIES.—Trade guilds are mentioned in *Judica Civitatis Londoniæ*, compiled by King Athelstan, and other Anglo-Saxon laws; and they therefore existed as early as in 939. The company of Steelyard Merchants settled in England before 967, and the original foundation of the Saddlers' Company is referred to the same period. Henry I. (1100—1135), granted a charter to the weavers, and is supposed to have established the first Anglo-Norman guild. In the reign of Henry II. trade guilds were common institutions, and their formation was encouraged by that king and his successors John and Henry III.

	Woolmen.

(*See* AFRICAN COMPANY, FINANCIAL COMPANIES, FREE COMPANIES, GUILDS, JOINT-STOCK COMPANIES ACTS, &c. &c.)

COMPASS.—(*See* MARINER'S COMPASS.)

COMPIÈGNE (France).—This town, the ancient Compendium, built by the Gauls, was enlarged by Charles II. (the Bald) in 876, and called by him Carliopolis. Councils were held here June 22, 756; in 823; Oct. 1, 833; in 861; in 871; May 1 and Dec. 8, 877; in 1085; Nov. 4, 1198; Aug. 5, 1235; May 19, 1270; April 9, 1278; Jan. 4, 1303; and Sep. 8, 1329. It was taken from the Burgundians by Charles VI. in 1415, and besieged by the English, who took Joan of Arc prisoner here, May 26, 1430. Napoleon I. met the Archduchess Maria Louisa of Austria at this town in 1810. A statue to Joan of Arc was erected in 1860.

COMPLUTENSIAN BIBLE.—This polyglot Bible was projected by Cardinal Ximenes, or Jimenez de Cisneros, who spent 52,000 ducats in forwarding the work. It was printed at the Spanish town Alcala, from the Latin name of which, Complutum, it derives its name. The idea first occurred to Cardinal Ximenes in 1502, when the work was commenced. The New Testament was completed Jan. 10, 1514, and the Old Testament in July, 1517, when Ximenes, who died Nov. 8, 1517, was on his death-bed. It was not published till 1520.

COMPLUTUM.—(*See* ALCALA.)

COMPOSTELLA.—(*See* JAMES, ST. (Order), and SANTIAGO.)

COMPREHENSION SCHEME.—This measure for the enlargement of the basis of the Church of England, by making certain alterations in the liturgy, in order to admit Dissenters, passed the House of Lords in 1689. The Commons presented an address to the king, requesting him to summon a convocation, and this having been done, discussions arose, which ended in the abandonment of the plan. An attempt to pass a similar scheme in Scotland in 1678 also failed.

COMPROMISE (The).—A document promulgated by a league of Flemish nobles at a

meeting held at Breda in Jan., 1566, denouncing the tyranny of the Spanish Government, received this name. In the course of two months it received 2,000 signatures. It was presented to the regent, Margaret, sister of Philip II. (*See* GUEUX.)

CONCEPCION (South America), the capital of a province of the same name, in Chili, was built in 1763. It was destroyed by an earthquake Feb. 20, 1835.

CONCEPTION BAY (Newfoundland), was first settled by about 40 colonists in 1640.

CONCEPTUALISTS.—(*See* NOMINALISTS.)

CONCERT.—This entertainment originated in Italy, and the earliest on record is that of the Filarmonici, which was established at Vicenza as early as 1565. The Academy of Ancient Music, founded in 1710, introduced concerts into England. The Concerts Spirituels were established at Paris in 1725, and the Gewandhaus Concerts at Leipsic in 1742.

1848. London Sacred Harmonic.
1849. Bach Society.
1851. English Glee and Madrigal Union—Réunion des Arts.
1852. New Philharmonic Society—Musical Institute—Musical Winter Evenings—Tonic Sol-fa Association.
1856, May 22. Henry Leslie's Choir—Vocal Association—London Polyhymnia Choir.
1858, April 30. Musical Society of London—English Orchestral Association.
1859. Monday Popular Concerts—Amateur Musical Society.
1860. National Choral Society.
1862. Pianoforte Quartet Association.
1863. Polyhymnian Choir.

CONCHOLOGY.—Pliny divided shell-covered animals into soft, crustacean, and testaceous: but no correct system for their classification was known till Dr. John Daniel Major, of Kiel, published his tables of Ostracology in 1674. Martin Lister announced another arrangement in 1678, and published his great work in 1685; and Philip Bonanni published his system in 1684. George E. Rumphius in 1701, and Nicholas Languis in 1722, contributed to bring the science to its present state of accuracy.

CONCLAVE.—The assembly of the cardinals, by which, when a vacancy occurs in the papal see, a new pope is elected, was instituted by Alexander III. in 1179, and regulated by a bull published by Gregory X. at the 14th general council held at Lyons, May 7—July 17, 1274. It received its name from a gloomy apartment in the Vatican, called the Conclave, in which the cardinals were shut up to nominate the new pope, within nine days of the death of the former occupant of the see. If the election was not made in three days the cardinals were only allowed a single dish at dinner and at supper, and after the eighth day received only a small allowance of bread, water, and wine. John XXI. or XXII. suspended the operations of the Conclave, and after the death of Nicholas IV. an interval of two years and three months elapsed before a successor was elected in the person of Peter Morone, who took the title of Cœlestine V., July 5, 1294. The Conclave was, however, re-established. Gregory XV. in 1621, and Urban VIII. in 1625, issued bulls for its regulation.

CONCORD (Battle).—The first struggle between the revolted Americans and the English troops occurred near this town, in Massachusetts, April 19, 1775. The latter, after having destroyed three guns and all the military stores, withdrew to Lexington. This is sometimes called the battle of Lexington.

CONCORDANCE.—The first concordance or verbal index to the Bible, was drawn up by Anthony of Padua, who flourished from 1195 to 1231. It was entitled *Concordantiæ Morales*, and was the basis of the more important concordance of Cardinal Hugo de Sancto Caro, who died in 1262. Mordecai Nathan's Hebrew Concordance appeared at Venice in 1523. Calasio published an improved edition at Rome in 1620. Buxtorf's Concordance was published in 1632, and the abridgment by Pavius in 1677. Thomas Gybson's "Concordance to the English New Testament" appeared before the year 1540, and Marbeck's, who was organist to the royal chapel at Windsor, Concordance to the whole Bible in 1550. Several books of the kind followed. The first edition of Cruden's work appeared in 1737. Ayscough published a concordance to Shakespeare in 1790; Twiss another in 1805; and Mrs. Cowden Clark the "Complete Concordance to Shakespeare" in 1847. A concordance to Milton appeared at Madras in 1856 and 1857.

CONCORDAT.—This term is generally applied to a treaty or agreement between the Pope and any foreign sovereign for the regulation, in the dominions of the latter, of matters relating to the Roman Catholic religion. The following are the most celebrated concordats mentioned in history:—

A.D.
1122, Sep. 8. Between Callixtus II. and the Emperor Henry V., concluded at Worms.
1448, Feb. 17. Between Nicholas V. and the Emperor Frederick III., concluded at Vienna. It was first settled at Aschaffenburg, and is sometimes called the Concordat of Aschaffenburg.
1516, Aug. 18. Between Leo X. and Francis I. of France.
1529. Between Clement VII. and the Emperor Charles V., concluded at Barcelona.
1753. Between Benedict XIV. and Ferdinand VI. of Spain.
1801, July 15. Between Pius VII. and Napoleon I.
1813, Jan. 25. Between Pius VII. and Napoleon I., concluded at Fontainebleau.
1817, Nov. 22. Between Pius VII. and Louis XVIII., concluded at Paris.
1855, Aug. 15. Between Pius IX. and Francis Joseph I. of Austria, concluded at Vienna.

CONDÉ, or CONDÉ-SUR-ESCAUT (France).—This city of Hainault, anciently possessed by the Counts of Flanders, was taken in 1478 by

Louis XI. of France, and was seized by the Prince of Orange in 1580. In 1649 it surrendered to the French, and in 1655 was taken by Turenne. The Prince of Condé captured it for the Spaniards in 1656, and in 1676 it was retaken by Louis XIV., to whom it was confirmed by the treaty of Nimeguen, Sep. 17, 1678. In 1794 it was taken by the Austrians, who retained it for some months. During the French Revolution its name was changed to Nord-Libre. (*See* BOURBONS, COLLATERAL BRANCHES.)

CONDOTTÏERI.—Though the word signifies chiefs or leaders, it was applied to the mercenaries, or soldiers of fortune, who, during the Italian wars in the 13th and 14th centuries, took service under any prince or government that chose to engage them. They consisted exclusively of heavy-armed cavalry, and for a long period the wars of Italy were left entirely to them. Prescott remarks (Ferdinand and Isabella, pt. ii. ch. i.), "The common interests of the *condottieri* being paramount to every obligation towards the state which they served, they easily came to an understanding with one another to spare their troops as much as possible; until at length battles were fought with little more personal hazard than would be incurred in an ordinary tourney." Machiavelli refers to two battles at Anghiari and Castracaro, of which the shortest in duration lasted four hours, at the former of which not a single soldier was killed, and at the latter only one, who was crushed beneath the weight of his own armour. (*See* FREE COMPANIES.)

CONDUITS, or cisterns, of stone or lead, were formerly used for the conveyance of water. The great conduit in West Cheap was commenced in 1285, the Little Conduit in 1442, the conduit at Holborn Cross in 1498. This was repaired in 1577 by Mr. William Lamb, and named after him. Lamb's conduit was taken down in 1746. The conduit at Bishopsgate was made about 1513, at London Wall about 1528, at Aldgate about 1535, and at Lothbury in 1546. On festive occasions the conduits were often made to flow with wine.

CONFEDERATE STATES (North America).—For several years a large section of the United States had shown a desire to separate from the Union, and the election of Abraham Lincoln to the presidency, Nov. 6, 1860, brought matters to a crisis. Mr. Buchanan, the retiring president, in his message to Congress Dec. 4, deprecated the threatened secession, and recommended changes in the constitution which he thought likely to prevent a rupture. His advice was not followed, and civil war ensued. The following states joined the new confederacy:—

A.D.
1860, Dec. 20. South Carolina.
1861, Jan. 9. Mississippi.
Jan. 10. Florida.
Jan. 11. Alabama.
Jan. 19. Georgia.
Jan. 26. Louisiana.
Feb. 1. Texas.
April 17. Virginia.
May 6. Arkansas.
May 21. North Carolina.
June 8. Tennessee.

1861, Feb. 4. A congress of delegates from the seceded states of South Carolina, Mississippi, Florida, Alabama, Georgia, and Louisiana meets at Montgomery, Alabama, to organize a Southern Confederacy.—Feb. 8. The Montgomery congress adopts a provisional constitution.

A.D.
1861, Feb. 9. Jefferson Davis, of Mississippi, is elected provisional President, and Alexander H. Stephens, of Georgia, provisional Vice-President.—Feb. 18. Inauguration of President Davis.—March 2. Deputies from Texas are admitted to the Montgomery congress.—March 5. Three commissioners from the seceded states arrive in Washington to settle the questions in dispute with the Federal Government.—March 7. Congress authorizes the raising of an army of 100,000 men.—April 8. Mr. Seward, Assistant Secretary of State of the United States, declines to hold official intercourse with them.—April 12. The civil war commences at Charleston (q.v.). (For the Military History of the War, *see* UNITED STATES.)—April 17. President Davis publishes a proclamation authorizing the issue of letters of marque and reprisal.—April 26. The Southern congress passes an Act to allow the President to borrow 15,000,000 dols. on the credit of the Confederate States.—April 29. President Davis announces the ratification of a permanent constitution.—May 21. Congress meets for the last time at Montgomery.—July 20. Congress assembles at Richmond, Virginia, which becomes the capital of the Confederacy.—Oct. 16. The Confederates issue their first postage-stamp.—Sep. 3. Congress closes its third session.—Nov. 18. Commencement of the fourth session.—Nov. 30. Mr. Davis is elected President for six years.

1862, Feb. 17. Closing of the provisional congress.—Feb. 22. The permanent government of the Confederacy is organized.—April 16. A conscript act is passed, whereby all men between the ages of 18 and 35 years are rendered liable to serve in the Confederate armies.—April 21. The first congress of the Confederacy closes its first session.—Aug. 12—Oct. 13. The second session of congress.

1863, Jan. 12. Commencement of the third session of congress.—March 27. The Confederates solemnize a fast.—May. The third session terminates.—July 18. President Davis issues a conscription proclamation requiring all men between the ages of 18 and 45 years to bear arms.—Aug. 4. Mr. Mason, the Confederate commissioner to Great Britain, is recalled by President Davis.—Dec. 7. Commencement of the fourth session of the first congress.

1864, Feb. The second conscription bill is passed.—Feb. 18. Dissolution of the first congress.—Feb. 19. Assembly of the second congress.—March 11. General orders are issued directing the enrolment of free negroes to serve in the army.—June 15. The second congress closes its first session.—Nov. 7. Commencement of the second session.

1865, Feb. 3. Vice-President Stephens, Judge Campbell, and Mr. Senator Hunter, envoys from the Confederate States, have an interview with President Lincoln and Mr. Seward on board the U.S. steamer *River Queen*, in Hampton Roads, Virginia, which produces no result.—Feb. 23. A bill for enlisting negro slaves as soldiers passes the congress.—March 13. President Davis sends his last message to the congress.—April 3. Richmond is occupied by the Federal forces, President Davis, with his cabinet, removing to Danville, Virginia.—May 10. President Davis, with his family and some members of his government, are captured by Lieut.-Col. Pritchard at Irwinsville, Georgia.

CONFEDERATION OF THE RHINE.—On the overthrow of the old German empire, Napoleon I. induced several rulers of German states to separate themselves from the Germanic body and to enter into a confederation of which he was named protector. The act of this confederation, signed at Paris July 12, 1806, was ratified at Munich July 25. It consisted of 40 articles. The contracting parties were Napoleon I., the Kings of Bavaria and Würtemberg, the Archbishop of Ratisbon, the Elector of Baden, the Duke of Berg, the Landgrave of Hesse-Darmstadt, the Princes of Nassau-Weilburg and Nassau-Usingen, of Ho-

henzollern-Hechingen and Hohenzollern-Sigmaringen, Salm-Salm, and Salm-Kyrburg, Isenburg-Birchstein and Lichtenstein, the Duke of Aremburg, and the Count of Leyen. In accordance with the 3rd article of the act of the confederation, these princes declared their entire separation from the German empire, at the diet of Ratisbon, Aug. 1, 1806. By the 38th article the contingents fixed for the several states were as follows :—

	Men.
France	200,000
Bavaria	30,000
Würtemberg	12,000
Baden	3,000
Berg	5,000
Darmstadt	4,000
Nassau, Hohenzollern, and others	4,000
Total	258,000

The Grand-duke of Wurzburg joined the confederation Sep. 30, 1806; the King of Saxony Dec. 11, 1806; the King of Westphalia and other German princes joined in the next and following years. The Emperor of Russia recognized it by the 15th article of the treaty signed at Tilsit, July 7, 1807; and the King of Prussia by the 4th article of the treaty signed at the same place July 9, 1807. Russia and Prussia issued a proclamation for its dissolution Feb. 23, 1813, and in 1815 it was replaced by the Germanic Confederation (*q. v.*).

CONFESSIONAL.—(*See* AURICULAR CONFESSION.)

CONFESSIO TETRAPOLITANA, or the Confession of the Four Towns, is the term applied to the confession presented to the diet at Augsburg in 1530, by Constance, Lindau, Memmingen, and Strasburg. It only differed from that of Augsburg (*q. v.*) in a word or two respecting the Lord's Supper.

CONFESSOR.—(*See* CLERK OF THE CLOSET.)

CONFIRMATION, or imposition of hands, is a ceremony that dates from the apostolic age (Acts viii. 17, and xix. 5 & 6). In the primitive Church "this was always," says Bingham (Ecc. Antiq. xii. ch. i. sec. 1.), "administered together with baptism, if the bishop, who was the ordinary minister of it, were present at the action. But if he were absent, as it usually happened to be in churches at a distance from the mother church, or when persons were baptized in haste upon a sick bed, then confirmation was deferred till the bishop could have a convenient opportunity to visit them." It is one of the seven sacraments of the Roman Catholic Church.

CONFLANS (Treaty) was concluded at this castle, near Paris, between Louis XI. and the Count of Charolois, afterwards Charles the Bold of Burgundy, on account of his father, Philip the Good, and the chiefs of the League of the "Public Good," Oct. 5, 1465. Normandy was ceded to the Duke of Berri. It was confirmed by the treaty of Peronne, Oct. 14, 1468. Louis XI. having induced the estates assembled at Tours, in the spring of 1470, to release him from the engagements of these treaties, they were again confirmed by the treaty of Crotoy, Oct. 3, 1472.

CONGÉ D'ÉLIRE, or leave to elect, the king's writ or license to a dean and chapter to elect a bishop, when a vacancy had occurred in a see, was first established by King John, and was confirmed by Magna Charta in 1215. By 25 Hen. VIII. c. 20 (1533), the ancient right of nomination was restored to the crown.

CONGO (Africa).—The name is applied to an extensive tract of country lying between the rivers Congo or Zaire and Dando, portions of which were visited by Diego Cam in 1484 and 1489, by Ruy de Souza in 1490, by Battel in 1607, by Gattina and Piacenza in 1666, by Sorrento in 1682, by Daffer in 1686, by Barbot in 1688, and many enterprising missionaries and travellers. It is the seat of several European settlements described under their designations.

CONGO, or ZAIRE RIVER (Africa).—This river, discovered by Diego Cam in 1484, was supposed in 1518 to flow from a lake in the interior of Africa. In 1816 it was partially explored by Capt. Tuckey, but little is known respecting its source and actual course.

CONGREGATIONALISTS.—(*See* INDEPENDENTS.)

CONGREGATIONAL LIBRARY (London) was established in Blomfield Street, Finsbury, for the use of the Independents, in 1831.

CONGREGATION OF THE LORD.—During the regency of Mary Stuart an attempt was made to restore the Roman Catholic religion in Scotland by the aid of French mercenaries. The reformers took up arms in 1557, and demanded aid from England, styling themselves "the Congregation of the Lord." Their leaders assumed the title of Lords of the Congregation. Their bond of union, sometimes called the First Covenant, was signed at Edinburgh Dec. 3, 1557.

CONGRESS.—This term is applied to an assembly of sovereigns or their representatives convened for the settlement of international questions. The following are the most celebrated congresses :—

B.C.		A.D.	
432.	Congress of Lacedæmon.	1793.	At Antwerp.
		1797-99.	Radstadt.
A.D.		1813.	Prague.
897.	Congress at Pavia.	1814.	Chatillon.
1644.	At Münster.	1814-15.	Vienna.
1668.	Aix-la-Chapelle.	1818.	Aix-la-Chapelle.
1676-78.	Nimeguen.	1820.	Carlsbad.
1697.	Ryswick.	1820.	Troppau.
1713.	Utrecht.	1821.	Laybach.
1722.	Cambray.	1822.	Verona.
1728.	Soissons.	1856,	Feb. 25. Paris.
1790.	Jan. 7. Brussels.	1863.	Frankfort.

(*See* AMERICAN CONGRESS.)

CONGRESS OF LADIES, for the consideration of plans to improve feminine education and extend the circle of employments open to women, held a preliminary meeting at Leipsic, Oct. 15, 1865, and commenced its formal sittings Oct. 16.

CONGREVE ROCKETS, so called from Sir William Congreve, Bart., born May 20, 1772, who invented these destructive engines of warfare in 1804. They were first employed in the attack upon Boulogne, Oct. 8, 1806, and, having been found effective, were used at the siege of Copenhagen, Sep. 2—5, 1807, and at other places. They proved so effective at the battle of Leipsic, in Oct., 1813, that the Emperor of Russia bestowed the order of St. Anne of the second class on their inventor.

They have, however, been, to a certain extent, superseded by more recent inventions.

CONI, or CUNEO (Italy).—The French besieged this strong town, but without success, in 1691. The French and Spaniards, who besieged it in 1744, were ultimately compelled to withdraw. It was surrendered to Buonaparte April 29, 1796. The French surprised it Dec. 5, 1798, and they surrendered it to the Austrians Dec. 4, 1799. It was ceded to France by the convention of Alessandria in 1800. The Austrians concluded a treaty with Piedmont, July 26, 1821, by which Coni and other places were to be occupied by their troops until Sep. 1822. Coni was made the seat of a bishopric in 1817.

CONIC SECTIONS were first investigated by Aristæus, the mathematician, by whom they were made known to Euclid, who flourished circ. B.C. 300. Apollonius of Perga collected all that previous mathematicians had written on the subject, and wrote his work, in eight books, B.C. 250. He first named the three sections *parabola*, *ellipse*, and *hyperbola*. Galileo, who died Jan. 8, 1642, discovered the parabola to be the natural direction of a projectile flying in unresisting space; and Kepler, in 1609, identified the ellipse as the curve of the planetary orbits.

CONJEVERAM (Hindostan). — This town was taken from the French by Clive in Dec., 1751. The English having retired, it fell into the hands of the French, from whom it was again wrested April 18, 1759. The French surprised it Jan. 12, 1760. Hyder Ali defeated the East India Company's army near this place Sep. 10, 1780.

CONNAUGHT, mail steamer, left Galway on her second voyage to the United States Sep. 27, 1860, with a crew consisting of 124 officers and men and 467 passengers, and was destroyed by fire Oct. 7, when about 300 miles from Boston. The passengers and crew were rescued by a Yankee brig.

CONNAUGHT (Ireland).—The division of Ireland into the provinces of Ulster, Munster, Connaught, and Leinster, was made by Pope Eugenius II. in 1152. Until 1590 Connaught constituted a kind of independent kingdom; but in that year it was divided into counties and rendered directly subject to the English crown. Clare county was separated from Connaught in 1602.

CONNECTICUT (United States).—Two settlements, formed in Connecticut, in 1635 and 1638, were united by a charter granted by Charles II. in 1665. This state adopted the constitution of the United States Jan. 9, 1788.

CONNOR (Ireland). — This bishopric was founded about 500, by Aengus Mac Nisse, a pupil of St. Patrick, who erected a church, of which he became bishop, and where he was buried in 514. On the death of James Saurin, last Bishop of Dromore, April 9, 1842, his see was united to Down and Connor by the Church Temporalities Act, 3 & 4 Will. IV. c. 37 (Aug. 14, 1833).

CONRAD POOR.—(*See* PEASANTS' WAR.)

CONSARBRUCK (Battle).—The Duke of Lorraine defeated the French, under Marshal Crequi, at this place, near Trèves, in 1675.

CONSCIENCE.—Courts of conscience, or of requests, for the recovery of small debts, were established in London as early as 1517, by an act of the Common Council. It was dated Feb. 1, and ordered that two aldermen and four discreet commissioners should be appointed to sit on Wednesdays and Saturdays to determine cases in which the debt or damage did not exceed 40 shillings. The power of the court was confirmed by 2 James I. c. 14 (1604), which ordered all inhabitants of the city of London, who had debts owing them not exceeding 40 shillings, to sue for their recovery in the Court of Requests at Guildhall. This statute was enforced by 3 James I. c. 15 (1605), which enacted that all creditors living in London who sued for the recovery of such debts in any other court, should not only lose the suit, but pay all the expenses. These courts, which were afterwards introduced in other parts of the kingdom, were superseded by 9 & 10 Vict. c. 95 (Aug. 28, 1846), which established the county courts for the recovery of small debts.

CONSCIENCE CLAUSE.—This clause, based upon the Endowed Schools Act, 23 Vict. c. 11 (March 31, 1860), was introduced by the Committee of Council on Education in order to relieve the children of Dissenters from the obligation to learn the Church catechism, &c., Nov. 29, 1863.

CONSCRIPTION.—This mode of obtaining recruits was practised by the Romans, and introduced into France in the 8th century. Gen. Jourdan proposed in the Council of the Five Hundred the law of the conscription, which was approved and adopted Sep. 5, 1798. Every Frenchman from the age of 20 to 45 was liable to serve. Alison gives the following table of the levies made in France during the revolutionary war, compiled from Capefigue and the *Moniteur*:—

A.D.	Men.
1793	300,000
1793	1,200,000
1798	200,000
1799	200,000
1801	30,000
1805, Jan. 17	60,000
1805, Sep. 24	80,000
1806, Dec. 4	80,000
1807, April 7	80,000
1808, Jan. 21	80,000
1808, Sep. 10	160,000
1809, April 18	30,000
1809, April 18	15,000
1809, Oct. 5	30,000
1810, Dec. 13	120,000
1810, Dec. 13	40,000
1811, Dec. 20	120,000
1812, March 13	100,000
1812, Sep. 1	137,000
1813, Jan. 11	250,000
1813, April 3	180,000
1813, Aug. 24	30,000
1813, Oct. 9	280,000
1813, Nov. 15	300,000
Total	4,103,000

The standard of height was gradually lowered and the age reduced, in order to supply the necessary number of conscripts. In 1813 boys little above 17 years of age were compelled to serve, and the height required was not much above five feet. A new law was promulgated

March 21, 1832. A similar system prevails in Russia, Prussia, and other continental states.

CONSECRATION.—The first-born of man and beast were ordered to be consecrated to God B.C. 1491 (Exod. xiii. 2, 12, 15). The family of Aaron and the tribe of Levi (Num. i. 49, and iii. 12 & 13) were set apart B.C. 1490. The Hebrews consecrated both cattle and fields to the Lord (Lev. xxvii. 28 & 29); Solomon dedicated the temple B.C. 1004 (1 Kings viii.); and Nehemiah (xii. 27, &c.) describes the ceremonies practised at the dedication of the walls of Jerusalem B.C. 445. On the introduction of Christianity, churches were consecrated. Bingham (bk. viii. ch. ix. sec. 1) says, —"Anciently, when churches were finished and adorned, it was then usual to proceed to a dedication or consecration of them." This ceremony, which signified the devoting, or setting them apart peculiarly for divine service, consisted during the first three centuries only of particular prayers and thanksgiving to God. In the 4th century churches were consecrated with great solemnity. The church built by Constantine I. over the Saviour's sepulchre at Jerusalem was consecrated in a full synod of all the bishops of the East, in 335. The Council of Antioch, Aug., 341, was summoned on purpose to dedicate the famous church in that city commenced by Constantine I. A canon passed at a British council in 450, ordered that "a presbyter, though he builds a church, shall not offer the oblation in it, before he brings his bishop to consecrate it, because this was regular and decent;" and the first Council of Braga, in Portugal, May 1, 563, makes it deprivation for any presbyter to consecrate an altar or a church, declaring that the olden canons forbade it also. The distinct consecration of altars is first mentioned at the Council of Agda, Sep. 11, 506. The water in baptism was consecrated in the early Church. (*See* NAG'S HEAD CONSECRATION.)

CONSEGUINANA (Nicaragua). — This volcano was in a state of eruption in 1835.

CONSERVATIVE CLUB (London). — This club was founded in 1840. The house, situated on the west side of St. James's Street, was built between the years 1843–45, and was opened Feb. 19, 1845.

CONSERVATIVES. — This term was first applied to a political party about 1830. By some authorities its origin is attributed to John Wilson Croker, who in an article on internal policy, published in the *Quarterly Review* (vol. xlii. No. 83, p. 276) for Jan., 1830, declared,—"We despise and abominate the details of partisan warfare; but we are now, as we always have been, decidedly and conscientiously attached to what is called the Tory, and which might with more propriety be called the Conservative, party."

CONSERVATOIRE.—This term was applied by the Italians to schools established for the cultivation of music. According to some authorities they were instituted by St. Ambrose, Bishop of Milan (347—397), and according to others by St. Leo, who flourished in the 5th century. A new conservatoire was established at Milan in 1808, and the Neapolitan conservatoires were united in the Real Collegio di Musica in 1818. The Ecole Royale de Chant et de Déclamation, established in Paris in 1784, was changed into the Institut National de Musique in 1793, and into the Conservatoire de Musique in 1795. It has been regulated by royal ordinances promulgated in 1817, 1819, 1828, 1829, 1839, 1840, and 1848. The conservatoire at Vienna was established in 1816, that of Leipsic in 1842, and of Cologne in 1849.

CONSERVATORS, WARDENS, or KEEPERS OF THE PEACE, were appointed by the common law of England. The power of trying felonies was given them by 34 Edw. III. c. 1 (1360), when they received the title of Justices of the Peace (*q. v.*).

CONSISTORY.—The place of meeting of the cabinet of the Roman emperors was called a consistory, and the name is applied to the council which meets in the Vatican to advise the Pope in ecclesiastical and temporal affairs. A court under this title, for the regulation of discipline and worship, composed of civil and ecclesiastical jurists, was established by the Lutheran princes of Germany at the time of the Reformation. The earliest was that of Wittenberg, founded in 1542. Others were instituted after 1555.

CONSISTORY COURT, which has jurisdiction in all ecclesiastical causes arising within the diocese, was separated from the hundred court by William the First's charter for the separation of the ecclesiastical from the civil courts, in 1085. By 24 Henry VIII. c. 12 (1533), an appeal to the archbishop of the province from the Consistory Court was established.

CONSOLIDATED FUND. —Three capital funds, the Aggregate Fund, the General Fund, and the South-Sea Fund, constituting the revenue of the country, were united in 1786, under the title of the Consolidated Fund. By 56 Geo. III. c. 98 (1816), the Consolidated Fund or revenue of Great Britain, was combined with that of Ireland, forming "the Consolidated Fund of the United Kingdom," pledged for the repayment of the interest of the consolidated national debt of the United Kingdom.

CONSOLIDATION ACTS.—The chief of these statutes, for shortening acts of Parliament relating to certain undertakings, by grouping into one act the formal clauses necessary to all statutes referring to such undertakings, are the Companies Clauses Consolidation Act, 8 Vict. c. 16 (May 8, 1845); the Lands Clauses Consolidation Act, 8 Vict. c. 18 (May 8, 1845), amended as to Ireland by 14 and 15 Vict. c. 70 (Aug. 7, 1851); and the Railway Clauses Consolidation Act, 8 and 9 Vict. c. 20 (May 8, 1845).

CONSOLS.—(*See* FUNDS.)

CONSPIRACY.—(*See* PLOT.)

CONSPIRACY TO MURDER BILL.—(*See* ORSINI CONSPIRACY.)

CONSTABLE.—The statute of Winchester (13 Edw. I. st. 2, c. 6), passed Oct. 8, 1285, enacted that two constables shall be chosen in every hundred or franchise. This is the first authentic record of the appointment in this country of high constables. Inferior officers, called petty constables, subordinate to the high constable of the hundred, were first appointed in the reign of Edward III. Justices

of the peace are empowered, in cases of necessity, to swear in householders as special constables, by 1 & 2 Will. IV. c. 41, passed Oct. 15, 1831, and by 5 & 6 Will. IV. c. 43, passed Aug. 31, 1835. (*See* SPECIAL CONSTABLES.)

CONSTABLE OF ALL ENGLAND.—(*See* LORD HIGH CONSTABLE.)

CONSTANCE (Council).—The 17th general council held its first sitting Nov. 16, 1414. Nicolas says, "In the second session, 2nd of March, 1415, the Pope solemnly published his act of cession; in the third session, on the 26th of the same month, the council was declared to be lawful: the fourth session was held on the 30th of March; in the fifth, held on the 6th of April, all persons were enjoined to obey the decrees of the council. On the 29th of May, Pope John XXIII. was deposed. Gregory XII. abdicated 4th of July. The errors of Wycliffe were condemned in the seventh session, 2nd of May, 1415: in the fifteenth session, held 6th of July, 1415, John Huss was condemned to be burned: in the forty-first session, held 11th of November, 1417, Otho Colonna was elected pope, under the name of Martin V. The council ended 22nd of April, 1418." It established the authority of a general council above that of a pope, and is by some authorities said to have terminated the Papal Schism.

CONSTANCE (Germany).—Peace was concluded at this town in 1183, between the Emperor Frederick and 24 Lombard cities; by which the freedom of the latter was secured. John Huss, condemned by the council, suffered at the stake here July 7, 1415. By another treaty, signed here March 30, 1474, the contest between Austria and the Swiss was brought to a close. Charles V. issued the ban of the empire against Constance, Oct. 15, 1548; and Ferdinand I. of Austria annexed it to his dominions in the following year. It was transferred to Baden by the 8th article of the treaty of Presburg, Dec. 26, 1805. In addition to the 15th general council (*q. v.*), from 1414—18, councils were held here in 1005, in 1043, in 1094, and in 1153. Its bishopric, transferred from Windich about 570, was suppressed in 1802.

CONSTANTIA.—(*See* ARLES.)

CONSTANTINA, or CONSTANTINE (Africa), the ancient Cirta, was the residence of the kings of the Massylii, and the chief city of Numidia. The Romans, in the time of Julius Cæsar, sent out a colony to this place, which was destroyed in 311. It was rebuilt by Constantine I. The French captured it Oct. 13, 1837, and it is now the capital of the province of Constantina, in their colony of Algiers.

CONSTANTINOPLE (Æra) was adopted in Constantinople before the middle of the 7th century, and commences with the creation of the world, B.C. 5508, according to this calculation. It is still used by the Greek Church, and the Russians followed it until the time of Peter the Great. The civil year commenced Sep. 1, and the ecclesiastical March 21, and sometimes April 1.

CONSTANTINOPLE (Turkey), the ancient Byzantium, named Constantinople after its founder, Constantine I., who determined to make it the seat of the empire in 324. The new city, called Second or New Rome, was dedicated May 11, 330. Gibbon (ch. xvii.) says, "As often as the birthday of the city returned, the statue of Constantine, framed by his order, of gilt wood, and bearing in its right hand a small image of the genius of the place, was erected on a triumphal car. The guards, carrying white tapers, and clothed in their richest apparel, accompanied the solemn procession as it moved through the Hippodrome. When it was opposite to the throne of the reigning emperor, he rose from his seat, and with grateful reverence adored the memory of his predecessor." The rites of inauguration lasted 40 days. The Turks call the city Istamboul or Stamboul.

A.D.
- 365. Constantinople is seized by Procopius.
- 378. It is threatened by the Goths.
- 381. Nectarius becomes the first patriarch.
- 395. It is again besieged by the Goths, under Alaric.
- 413. Theodosius II. (the Younger) surrounds it with walls.
- 441. It is attacked by the Huns.
- 447. The walls are destroyed by an earthquake.
- 465. A fire consumes nearly half the city.
- 507. Anastasius builds the long wall.
- 532. Jan. The Nika sedition. (*See* CIRCUS FACTIONS.)
- 537. Dedication of St. Sophia
- 559. Belisarius saves Constantinople from the Bulgarians.
- 616. It is threatened by Chosroes II.
- 626. Heraclius compels the Persians and the Avars to raise the siege.
- 668. Arrival of the Saracens, who lay siege to the city.
- 675. The Saracens raise the siege.
- 695. Revolution at Constantinople, and dethronement of Justinian II.
- 716. It is again besieged by the Saracens.
- 718. The Saracens raise the siege.
- 865. It is unsuccessfully attacked by the Russians.
- 907. Second attack of the Russians.
- 941. Third attempted capture by the Russians.
- 1203, July 18. It is taken by the Latins. (*See* CRUSADES.
- 1204, April 9. It is again taken by the Latins, and abandoned to pillage.
- 1261, July 25. It is recovered by the Greeks under Michael Palæologus, who restores the walls.
- 1394. It is besieged by the Turks.
- 1422, June 10. It is besieged by the Turks, under Amurath II.—Aug. 24. The siege is raised.
- 1453, April 6. It is besieged by Mohammed II.—May 29. Mohammed II. effects its capture.
- 1590. An English embassy arrives at Constantinople.
- 1705. A revolt of the Janissaries is suppressed.
- 1729. A calamitous fire does considerable injury.
- 1756. A fire consumes 8,000 houses and 200 mosques.
- 1778, Sep. 4. The city is again devastated by fire.
- 1782. It is visited by plague and fire.
- 1808, Nov. 14 and 15. Revolt of the Janissaries, who massacre the regular troops.
- 1821. Massacre of the Christians.
- 1822, March 25. Second massacre of the Christians.
- 1826, June 14 and 15. Insurrection of the Janissaries (*q. v.*).
- 1854, March 12. The tripartite treaty between England, France, and Turkey is signed.
- 1857, Dec. 5. The final act settling the Asiatic boundaries between Russia and Turkey is signed.
- 1858. Conference between the representatives of Great Britain, France, Austria, Prussia, Russia, and Turkey relative to the Montenegrin territory.
- 1864, Dec. 11. The palace of the grand vizier is destroyed by fire.
- 1865, Sep. 6. A fire destroys 5,000 houses.
- 1866, Feb. A cholera conference holds its sittings at Constantinople.

PRINCIPAL COUNCILS HELD AT CONSTANTINOPLE.

A.D.
- 336. By the Eusebians in favour of Arius.
- 339. By the Arians.
- 360. By the Arians against the Semi-Arians.
- 381. May—June 30. The second general council, by Theodosius and Damasius, against heretics.

A.D.
382. To reconcile differences in the Churches.
383. For the reunion of schismatics.
394. Sep. 29. To settle a dispute respecting the Arabian bishopric of Bostra.
403. In favour of St. John Chrysostom.
404. To depose St. John Chrysostom.
426, Feb. 28. To ordain Sisinnius.
448, Nov. 8–22. By which Eutyches was condemned. (*See* EUTYCHIANS.)
449. April 13. To confirm the condemnation of Eutyches.
450, Aug. Against Eutyches and Nestor.
459. Against the Simoniacs.
478. To depose Peter the Fuller and others.
492. To confirm the Council of Chalcedon.
495 or 496. To depose and excommunicate the Patriarch Euphemius.
516. Against the Council of Chalcedon.
518, July 20. In favour of certain exiles.
519, March 28. Wherein John of Constantinople was reconciled to the Pope.
520, Feb. 25. To appoint Epiphanius patriarch.
531. To suspend Stephen, Bishop of Larissa.
532. Between the Catholics and the Severians.
536. To condemn certain heretic bishops.
543. Against Origen.
551. To depose Theodore of Cæsarea.
553, May 4—June 2. The fifth general council against Origen and the three chapters.
565. At which the Patriarch Eutychius was condemned.
588. Which tried and acquitted Gregory of Antioch.
626. In favour of the Monothelites.
638. To confirm the edict of Heraclius in favour of the Monothelites.
680–1, Nov. 7.—Sep. 16. The sixth general council against the Monothelites.
691. To consider matters of discipline. Called "in Trullo," from the palace in which it was held, and "Quinisextum," because supplementary to the fifth and sixth general councils on discipline.
712. By the Monothelites, against the sixth general council.
715. Against the Monothelites, in favour of the sixth general council.
730, Jan. 7. To depose St. German.
754, Feb. 10—Aug. 8. Against image-worship.
786, Aug. 1. Dissolved in consequence of violent opposition.
806. To regulate the consecration of an archimandrite.
809, Jan. Which declared the marriage of the Emperor Constantine valid.
812, Nov. 1. To consider a proposed peace between the Bulgarians and the Emperor Michael.
814, circ. Christmas. By Nicephorus, against the Iconoclasts.
815, Feb. By the Iconoclasts, who depose Nicephorus.—April. Against the Catholics and decorations of churches.
821. Wherein the Catholics refuse to confer with the Iconoclasts.
829. Against the use of images.
842, Feb. 19. Against the Iconoclasts.
847. To depose the Bishop of Syracuse.
858. To reinstate Ignatius in the patriarchy.
861, May 25. Which again deposed Ignatius, and decreed in favour of images.
867, Jan. To depose and excommunicate Pope Nicholas I.—Nov. 23. Which deposed Photius.
869, Oct. 5—Feb. 28. The eighth general council, which anathematized the heretics, and opposed the seven general councils.
879, Nov. — March 13. Concerning Photius, the Nicene creed, and the general councils.
906, Jan. Against the marriage of the Emperor Leo VI.
906. The Patriarch Nicholas is deposed.
911, May. Whereby Nicholas is restored.
920, July. To heal schism.
931, Sep. 2. To receive the abdication of the Patriarch Tryphon.
963. To confirm the marriage of the Emperor Nicephorus II. (Phocas).
1027. To consider donations to monasteries.
1029. Against the Patriarch of Antioch.
1054, June. Wherein the papal legates were anathematized.
1066. Against incestuous marriages.
1067. Against breach of promise of marriage.
1110. Against the heresy of the Bogomiles.
1140, May. To condemn the books of Constantine Chrysomale.
1143, Aug. 20. Against the ordination of two bishops.—Oct. 1. Against Niphon, a monk.
1144, Feb. 22. Against Niphon.
1147, Feb. 26. To depose the Patriarch Comas.
1157, Jan. 26. On the celebration of divine service.
1166, April 11. Concerning marriage, discipline, and certain doctrinal points.
1170. To reject a proposal to reunite the two Churches.
1186. On the irregular election of certain bishops.
1222. On the differences between the Greek and Latin bishops of Cyprus.
1275, May 26. To elect John Veccus patriarch.
1277, April. To make a creed like that of Rome.—July 16. To excommunicate those unwilling to reunite the two Churches.
1280, May 3. On doctrinal matters.
1283, Jan. To condemn Veccus.—Easter Monday. To condemn the promoters of the proposed union.
1285. On doctrinal points.
1297. To consider Athanasius's anathema of the emperor.
1299. To consider the marriage of Alexis, nephew of the emperor.
1341, June 11. On doctrinal points.
1345. Against the Palamites.
1347. To depose the Patriarch John of Apri.
1450. Against the reunion of the Churches.

CONSTELLATIONS, or groups of stars, are mentioned in the book of Job, written, according to the best authorities, by Moses, B.C. 1520. Arcturus, Orion, and Pleiades, are noticed Job ix. 9, and again, with the addition of Mazzaroth, ch. xxxviii. 31 & 32. Eudoxus of Cnidus, who flourished B.C. 366, wrote an account of the constellations.

CONSTITUENT ASSEMBLY. — (*See* NATIONAL ASSEMBLY.)

CONSTITUTIONISTS.—(*See* ACCEPTANTS.)

CONSUL, as the representative of the commercial interests of England in foreign countries, was first officially appointed by Richard III. in 1485, when Laurentio Strozzi, of Florence, was by patent of the king made consul and president of the English merchants in Italy. The custom originated in Italy in the 12th century.

CONSULATE was established in France by the influence of Buonaparte, Nov. 10, 1799. The new constitution was proclaimed Dec. 24, when three consuls were appointed, the chief authority being vested in one of them, called the First Consul. Napoleon Buonaparte, Cambacères, and Lebrun, were the consuls named; and, Aug. 4, 1802, the former was made first consul for life. The consulate was, however, superseded by the empire, May 18, 1804.

CONSULS.—On the expulsion of the kings, B.C. 509, two chief magistrates of the Roman republic were appointed. Their tenure of office was for one year only. Decemvirs were appointed B.C. 451, three military tribunes B.C. 444, two censors B.C. 443, a dictator obtained the chief authority B.C. 391, and a pretor was appointed B.C. 366. Although the direction of affairs was occasionally vested either in decemvirs, military tribunes, or a dictator, the consulship was the office generally adopted. A plebeian was elected one of the consuls B.C. 366, and the office was often held by a plebeian until B.C. 172, when both consuls were plebeians. After the appointment of an emperor, B.C. 31, it became a nominal dignity, and continued as such, with certain interruptions. Decimus Theodorus Paulinus, in 536, was the last consul at Rome, and Flavius Basilius Junius, in 541, the last at Constantinople. Milan proclaimed itself a republic, and elected two consuls in 1107, and

other Italian cities immediately followed its example.

CONTI.—(*See* BOURBONS, Collateral Branches.)

CONTINENTAL SYSTEM.—This name has been given to the plan adopted by Napoleon I. for cutting off England from connection with the continent of Europe, and thus destroying her maritime supremacy. It was first enunciated in the armistice of Foligno (*q. v.*), Feb. 18, 1801, but it was not prominently put forward till the publication of the Berlin Decree (*q. v.*), Nov. 19, 1806, which declared the British Islands in a state of blockade, and prohibited all trade in English goods. The British Government, in retaliation, issued, Jan. 7, and Nov. 11, 1807, the celebrated Orders in Council (*q. v.*), which elicited the Milan Decree (*q. v.*), Dec. 17, 1807, and another similarly prohibitive proclamation, dated from the Tuileries, Jan. 11, 1808. The tariff of Trianon, introduced Aug. 3, 1810, and supported by a decree of Sep. 12, 1810, and the Decree of Fontainebleau, Oct. 18, 1810, were also aimed at the establishment of this system by the burning of English goods, and the destruction, by all possible means, of British commerce.

CONTINENTS.—(*See* ENCRATITES.)

CONTRACTORS.—By 22 Geo. III. c. 45, s. 1 (1782), government contractors are disqualified from holding a seat in the House of Commons. A similar bill had passed the Commons in 1780, but was rejected by the Lords. The law was extended to Ireland by 41 Geo. III. c. 52, s. 4 (1801).

CONVENT.—(*See* ABBEY, &c.)

CONVENTICLE.—This term, derived from the Latin *conventiculum*, an assembly, was, in the early period of Christianity, applied to the building in which the Christians worshipped. It was afterwards used to describe the meetings of heretics, and is, in this country, applied to the meeting-places of Dissenters from the Established Church. By 35 Eliz. c. 1 (1593), persons attending any assemblies, conventicles, or meetings, under colour or pretence of any exercise of religion, were to be imprisoned until they conformed. If they did not conform in three months, they were to abjure the realm, and if they refused to do so, or returned after abjuration, they were to be hanged. It was enacted by the Conventicle Act (16 Charles II. c. 4), passed in 1664, that wherever five persons above those of the same household assembled in religious congregation, every one of them was liable to three months' imprisonment, or a fine of five pounds for the first offence: the penalty was doubled for a second, and increased to transportation for seven years, or a fine of £100, for the third. This act was only temporary, and a second Conventicle Act, in which the penalties were modified (22 Charles II. c. 1), was passed in 1670. It was repealed by the Toleration Act (1 Will. & Mary, st. 1, c. 18), passed May 24, 1689.

CONVENTION PARLIAMENTS.—This term is applied to two English parliaments, called in times of great emergency, without the usual authority of the king's writ. The first convention parliament, summoned by order of Gen. Monk, met April 25, 1660, and having completed the work of the Restoration, was dissolved by Charles II., Dec. 29. The second, convened by William III., then Prince of Orange, met Tuesday, Jan. 22, 1689 (O.S.), and established William and Mary on the throne. A bill to convert the convention into a parliament passed through both branches of the legislature, and received the royal assent Feb. 23, 1689. It was dissolved by William III. Feb. 6, 1690.

CONVENTIONS.—(*See* TREATIES.)

CONVICTS.—(*See* TRANSPORTATION.)

CONVOCATION, or a general assembly of the clergy of the kingdom, was summoned by the king's authority, for the purpose of assessing themselves in levies of taxes. The clergy assembled for this purpose in Anglo-Saxon times; but the first attempt to establish a convocation of this character by royal authority was made by Edward I. in 1294, in which year Convocation met at Westminster by his order, Sep. 21. The Convocation is divided into the Upper and Lower House. Richard III., on the petition of both houses of Convocation, relieved them from the jurisdiction of the secular courts, by charter dated Feb. 23, 1484. It was deprived of the power of performing any act whatever without the king's license by 25 Hen. VIII. c. 19 (1534). This act was repealed by 1 & 2 Phil. & Mary c. 8 (1554), and re-enacted by 1 Eliz. c. 1 (1559). By 16 & 17 Charles II. c. 1 (1665), the clergy, as well as the laity, were bound by the act, which was for the raising of a tax, and were discharged from the payment of subsidies levied in Convocation. Its business was confined to the granting of subsidies, except in 1603 and 1640, and it ceased to meet from 1717, until revived for a formal sitting at the commencement of each session in 1854.

CONVOLVULUS.—The Canary convolvulus was introduced into England in 1690, and the many-flowered convolvulus in 1779. They were both brought from the Canary Isles.

CONVULSIONISTS, or CONVULSIONARIES.—This sect of the Jansenists arose in 1730, and were so called because they threw themselves upon the ground and went into convulsions. An order for the imprisonment of these fanatics was issued in 1733. The Dancers of the 14th century, and the Jumpers of the 19th, indulged in similar extravagances.

CONWAY, CONWY, or ABERCONWAY (Caernarvonshire).—One of the Welsh princes founded a Cistercian monastery at Conway in 1185. Edward I., who built a castle at this ancient town in 1283, was besieged here by the Welsh in 1290. Richard II. fled to this place in 1399. It suffered severely from the plague in 1607. It was taken by the Parliamentary army in 1646. The suspension bridge, commenced by Telford in 1822, was completed by him in 1826.

COOCH BEHAR, or KOOCH BEHAR (Hindostan).—The rajahs of this small state trace their descent from Viswa Singh, who began to reign, according to the native chroniclers, in 1509, though this date is probably too early. In 1582 it possessed considerable influence, and in 1661 was conquered by Meer Jumla, and annexed to the empire of Aurungzebe. With the rest of Bengal it passed in 1765 to the East

India Company, but it received little notice till 1772, when its rajah applied to the British for aid against the Bhotanese, by whom his territory had been invaded. A force was accordingly despatched under Capt. Jones, who expelled the marauders, and in 1773 attacked them in the hill country, where they had sought refuge. The internal affairs of the state having fallen into great confusion in 1787, the government was vested, in 1789, in a commissioner who, after collecting the revenues and paying the tribute, &c., retained the surplus for the use of the youthful rajah. That potentate attaining his majority in 1801, the office of commissioner ceased, but owing to the renewal of the former abuses, which the native government refused to reform, in spite of strong representations made by the English in 1805, it was re-established in 1813.

COOKERY. — When Abraham entertained the three angels, he took a calf, had it dressed, and, with butter and milk, set it before his guests, B.C. 1897 (Gen. xviii. 6—8). Disraeli (Curiosities of Literature, vol. ii. p. 246) remarks: "The numerous descriptions of ancient cookery which Athenæus has preserved indicate an unrivalled dexterity and refinement: and the ancients, indeed, appear to have raised the culinary art into a science, and dignified cooks into professors." Fitzstephen, the monk of Canterbury, who died in 1191, in his description of London says: "There is in London upon the river's bank, a public place of cookery, among the wines to be sold in the ships, and in the wine cellars. There every day, ye may call for any dish of meat, roast, fried, or sodden; fish both small and great; ordinary flesh for the poorer sort, and more dainty for the rich, as venison and fowl." And after some further remarks, adds: "This is the public cookery, and very convenient for the state of a city, and belongs to it. Hence it is, we read in Plato's Gorgias, that next to the physician's art is the trade of cooks, the image and flattery of a fourth part of a city." The cooks having formed an ancient brotherhood, were incorporated July 11, 1472, confirmed by Elizabeth, and again by James I., May 19, 1615. "This is the Boke of Cokery" was printed in London in 1500.

COOK ISLANDS, or HARVEY ARCHIPELAGO (Pacific Ocean.)—This group, comprising five principal islands, situated between the Society and Navigator Islands, was visited by Capt. Cook in 1769.

COOLIES.—This name, originally the title of one of the hill tribes of Hindostan, has, from the circumstance that these people are commonly employed as labourers in the cities of India, been applied to Hindoo labourers in general, and especially to the Indian and Chinese emigrants, who have in large numbers superseded negroes since the abolition of slavery in the British West Indian territories. They appear to have been employed in the Mauritius as early as 1834, and since that year have been introduced into other colonies.

COOPER.—The art of the cooper is of great antiquity. The company of Coopers was incorporated in 1501.

CO-OPERATIVE SOCIETIES.—The earliest institution of this kind appears to have been at Rochdale, where a few labouring men joined together in 1844, to purchase in wholesale markets the goods necessary for themselves and their families. The Leeds Industrial Co-operative Flour and Provision Society was established in 1847, and the Bradford Industrial Co-operative Society in Dec., 1860. There are similar associations in almost all the manufacturing towns of Lancashire and Yorkshire. The "Co-operator," a journal devoted to the interest of these societies, was first published in 1860. Co-operative societies are registered pursuant to 13 & 14 Vict. c. 115 (Aug. 15, 1850). By 18 & 19 Vict. c. 63 (July 23, 1855), a member can own shares to the value of £200.

COORG (Hindostan), under the government of independent princes in 1583, preserved its freedom till 1779, when Hyder seized Beer Rajindra, the heir, and excluded him from the succession. In 1787, however, he escaped from his prison, and recovered his hereditary possessions. He died in 1808, and bequeathed his dominions to his infant daughter, from whom they were wrested by Linga in 1810. In 1832 hostilities broke out between the rajah and the British Government, in consequence of the protection afforded by the latter to some political fugitives, and an army was despatched under Col. Lindsay, which entered Mercarah, the capital, April 6. The rajah was deposed April 10, 1834, and his territories were permanently annexed to the British empire in India. Coorg is also called Caduga.

COPENHAGEN (Denmark).—Absolon, Bishop of Roskild, and afterwards Archbishop of Lund, erected a castle here in 1168. In 1254, Bishop Erlandsen of Roskild granted certain rights to the town that had grown up beneath the protection of the castle, and these were extended by King Eric in 1284. In 1443 Copenhagen was made the capital of Denmark. It has suffered greatly from conflagrations, and was almost completely destroyed in 1795. Nelson captured the city April 2, 1801; and it surrendered, after three days' bombardment, Sep. 5, 1807. The Danish Royal Society was founded in 1742, the Academy of Arts in 1754, and the Bank in 1762. The Casino was built in 1846. A deputation consisting of above 2,000 inhabitants of Schleswig and Holstein was received here with great enthusiasm Sep. 2, 1865.

COPENHAGEN (Treaties). — A treaty between Denmark and Holland, for the navigation of the Baltic, was concluded here Aug. 26, 1656. An alliance between the same powers was signed here June 27, 1657. A peace between Sweden and Denmark was concluded here June 5, 1660. A second alliance between Denmark and the States was signed May 20, 1673; and an alliance between Denmark and the Emperor Leopold I., Jan. 26, 1674. An alliance between Denmark and Frederick William, Elector of Brandenburg, was concluded Dec. 27, 1676; and a convention between Denmark and Sweden May 8, 1680. Denmark signed an alliance with Augustus II. of Poland at the same place, March 24, 1698; and an alliance with Russia Oct. 22, 1709. The Em-

peror Charles VI. joined this Russo-Danish alliance May 26, 1732. Conventions between France and Denmark were signed July 11, 1757, and May 4, 1758; a convention between Denmark and Sweden March 27, 1794; and others between Denmark and Great Britain Aug. 29, 1800, and April 9, 1801. An alliance between Denmark and Napoleon I. was signed July 10, 1813.

COPERNICAN SYSTEM.—Hallam (Lit. Hist. pt. i. ch. ix.) says, "It appears to have been about 1507 that, after meditating on various schemes besides the Ptolemaic, Copernicus began to adopt and confirm in writing that of Pythagoras, as alone capable of explaining the planetary motions with that simplicity which gives a presumption of truth in the works of nature." It was completed in 1530, and published at Nuremberg in 1543, just before the death of Copernicus, which occurred May 24. Pope Paul V. condemned it in 1616, but Pius VII. in 1818 repealed the prohibitory edicts against Galileo and the Copernican system. Nicolas Copernicus was born at Thorn, Feb. 19, 1473, and died May 2, 1543.

COPPER.—This metal was known in the earliest times, and is frequently noticed in the Bible. Thus, the fetters with which Samson was bound (B.C. 1117) were in reality of this material (Judges xvi. 21). Ezekiel (xxvii. 13), B.C. 588, speaks of Tyre as trading in vessels of brass or copper; and Ezra (viii. 27), B.C. 458, speaks of "two vessels of fine copper, precious as gold," which formed part of the treasure of the temple. The origin of the art of smelting and working copper was attributed by the Egyptians to Osiris. Cadmus conveyed it to Greece B.C. 1313. Cyprus and Rhodes were celebrated as early manufactories of copper. It subsequently became one of the most important metals known to the ancients. Copper mines were worked in England in 1189. They are first mentioned in Sweden in 1396; and in 1399 one was discovered in Shropshire. A mine of pure copper was discovered in Cumberland in 1561; but the art of working the metal made little progress till 1689, when it was carried on with success in Cornwall. It afterwards increased to a prodigious degree, and in 1721 employed 30,000 people. Copper was first used to sheathe ships in 1758, and the demand for it increased so much that its exportation was prohibited by 20 Geo. III. c. 59, s. 1 (1780). In 1783 all the ships of the royal navy were ordered to be sheathed. The Burra-Burra mines of South Australia, discovered about 1843, are perhaps the richest copper-mines in the world.

COPPER COINAGE.—The Romans used copper as a circulating medium prior to the reign of Numa, B.C. 715, but it was not coined, being measured by weight. The square "as" of copper was struck some time before Servius Tullius, B.C. 578, and the circular "as" about B.C. 385. The first Greek copper money was that of Æropus, King of Macedonia, struck B.C. 397. Copper never became a chief medium with the Greeks. Cunobelin, King of Britain, is known to have coined copper about A.D. 40, as pieces still remain bearing his mark. It was made and circulated in Ireland in 1339, in France about 1580, and in Scotland before 1603. Copper tokens were coined in England in 1609 and patented in 1625; but the first real coinage was by Charles II., who failed in an attempt to establish a copper currency in 1665, but succeeded in 1672. In 1722 George I. granted a patent to Mr. Wood to coin copper halfpence and farthings for Ireland; but the measure was very unpopular, and was so vehemently opposed by Dean Swift, who published his Drapier letters in consequence, that it had to be abandoned. The English copper coinage was so defective in 1792, that a large number of tradesmen's tokens were issued; but these were superseded in 1797 by the coinage of 500 tons of copper pence, struck by Mr. Boulton, at Soho. A new bronze coinage was issued in 1860 to supply the deficiency of copper money.

COPPERHEADS.—This name, derived from the copperhead, a venomous snake which gives no warning of its attack, was applied to a party in the Northern States of America supposed to favour the secessionists during the civil war which divided the United States from 1861 to 1865.

COPPER-PLATE.—(*See* ENGRAVING ON COPPER.)

COPTS.—These people, descendants of the ancient Egyptians, with whose language their speech was radically identical, translated the Bible into their own dialect between 200—300, and at an early period embraced Christianity, which, under a very imperfect form, they still profess. Their language, superseded by that of their Arab conquerors, has not been spoken in Lower Egypt since the 10th century, and was entirely extinguished, except as a written dialect, in the 17th century. Their doctrines resemble those of the Jacobites (*q. v.*), and in their religious peculiarities they somewhat approximate to the Abyssinian Church (*q. v.*).

COPYRIGHT IN BOOKS was established by 8 Anne c. 19 (1709). From April 10, 1710, the copyright of all new works was vested in the author for 14 years. At the expiration of that term it was renewed for another 14 years, if the author was then living. In the case of works that had been printed, but of which the copyright had not been sold, authors were to have the sole right of printing them for 21 years. The act was extended to the whole of the United Kingdom by 41 Geo. III. c. 107 (July 2, 1801). By 54 Geo. III. c. 156 (July 29, 1814), the copyright was to last for 28 years certain, and for the remainder of the author's life if he outlived that term. By 5 & 6 Vict. c. 45 (July 1, 1842), called Talfourd or Lord Mahon's Act, the copyright was extended for the duration of the author's life and seven years from the day of his death. In case the seven years expired before the book had been published 42 years, the copyright was to last until that period had elapsed. The copyright of works published after the death of the author was also fixed at 42 years. The privilege was extended by this act to all British colonies. (*See* INTERNATIONAL COPYRIGHT.)

COPYRIGHT IN DESIGNS for manufactures

was fixed at three years by 5 & 6 Vict. c. 100 (Aug. 10, 1842), which repealed all former acts on the subject, and came into operation Sep. 1, 1842. It was extended to designs not ornamental, but having reference to some purpose of utility, by 6 & 7 Vict. c. 65 (Aug. 22, 1843). The Board of Trade received authority to extend the copyright in ornamental designs for an additional term not exceeding three years, by 13 & 14 Vict. c. 104 (Aug. 14, 1850).

CORAL was much valued by the ancients, who procured it from the Red Sea, and the northern shores of Africa. The Gauls used it to adorn their weapons and armour.

CORAL ISLANDS (Pacific Ocean).—Coral-reefs, which exist in great numbers, have been known to rise several feet in the course of a few months. A group was discovered by Bougainville in 1768, the chief of which is Bow Island (*q. v.*).

CORBACH (Battle), fought between the French army and the allied English and Germans at this place, in Westphalia, July 10, 1760. The former were victorious. The allied army was saved from a total rout by a charge of British dragoons.

CORBEY (Treaty) was signed at the abbey of Corbey, in Picardy, Oct. 26, 1513, between Louis XII. of France and Pope Leo X. The former agreed to abandon the Council of Pisa and conform to the decrees of the Lateran, and the Pontiff recalled the censures that had been pronounced upon France by his predecessor Julius II., the founder of the Holy League (*q. v.*).

CORBIE, CORBEY, or CORVEI (Saxony).—The Benedictine abbey of this place, founded in 822 by monks from a monastery of the same name in Picardy, is the oldest and most famous establishment of the kind in Saxony, and was the seat of the school of Anagar, or Anscarius, (the Apostle of the North, who died Feb. 3, 864), which attained great celebrity during the 9th and 10th centuries. In 1794 Corvei was made a bishopric by Pius VI. In 1803 it was annexed to Nassau, and ceded in 1807 to Westphalia, passing finally into the possession of Prussia in 1815. In 1822 the lands of the ancient abbey were transferred to Count von Helsen-Rheinfels-Rotenburg, and became a mediate principality of the Germanic empire.

CORBIESDALE, CORBISDALE, or KERBESTER (Battle.)—The Marquis of Montrose was defeated at this place in Ross-shire by the Covenanters, Saturday, April 27, 1650. The Marquis, captured a few days after the battle, was put to death with "every circumstance of ignominy and cruelty," May 21.

CORCYRA.— *See* CORFU.)

CORDELIERS, or CORD-WEARERS, so called from their girdle of knotted cord, a minor order of Franciscan or Grey Friars, was founded by St. Francis d'Assisi in 1223, and was sanctioned by Pope Honorius III. in a bull published Oct. 30, 1223.

CORDELIERS CLUB.—This society of republicans, formed at Paris in Dec., 1790, received this name because their meetings were held in a chapel which had been built by the Cordeliers. Danton was the first president, and amongst the more celebrated members were Marat, Camille Desmoulins, Fabre d'Eglantine, Robert, and Hébert. The Cordeliers demanded the abolition of royalty in 1791. A most powerful body, assembled at this club, took part in the insurrection of Aug. 10, 1792. They clamoured for the death of the king in 1793, and, in conjunction with the Jacobins, conspired for the overthrow of the Girondists in the same year. It was dissolved in 1794.

CORDOVA (South America), the capital of a province of the same name, a member of the Argentine Confederation, was founded by Jerome Cabrera in 1573.

CORDOVA, or CORDOBA (Spain), the Corduba of the Romans, was founded by M. Claudius Marcellus, who wintered here B.C. 132. It was nearly destroyed by Cæsar B.C. 45, in consequence of its fidelity to Pompey, and when rebuilt was peopled by the pauper gentry of Rome. It was erected into a bishopric in 264, and fell under the Gothic sway in 572. The Moors seized it in 711, and made it the capital of their empire in Spain in 756. The great mosque was begun by Abderahman in 786. A fire which raged for three days in 917, laid waste much of the city, but it was soon rebuilt more magnificently than ever. Soliman took the town in 1012, after a siege of about three years. In 1091 it fell into the hands of the Almoravides, who retained it till its capture by the Almohades in 1148. St. Ferdinand, King of Castile, took it June 30, 1235, and it has ever since been under Christian domination, although the Moors tried to retake it in 1280, and in 1365. The French, under Gen. Dupont, seized Cordova June 7, 1808, when the city was abandoned to pillage for three days, and the populace cruelly massacred. The town was again plundered in 1836 by the Carlists under Gomez, who took possession Oct. 1, and carried off booty to the amount of £200,000.

CORDWAINERS.—The name was formerly applied to shoemakers in this country. Stow says the term cordwainer or cobbler was not then a name of contempt for a man of less skill in that mystery, or only a mender, but for a maker and seller of that commodity. The Cordwainers were incorporated in 1410, confirmed by Mary in 1558, by Elizabeth in 1562, and by James I. They built a new hall, which was opened Tuesday, July 23, 1577. (*See* SHOEMAKERS.)

COREA (Asia) is said to have been civilized by the Chinese about B.C. 1120. In 1692 it became subject to Japan; but the Coreans having requested aid from China, the emperor delivered them from Japanese tyranny in 1698, and substituted his own dominion. Some French missionaries who had penetrated into the country were expelled in 1839. Corea has since formed part of the Chinese empire.

CORFE CASTLE (Dorsetshire), in the Isle of Purbeck, was the scene of the assassination of Edward the Martyr by his stepmother Elfrida in 978; and in the disputes between King John and his barons was the depository of the British regalia. In 1642 it was defended for six weeks against the troops of Charles I., by Lady Bankes, and in 1645 it was destroyed by Fairfax.

CORFU (Ionian Sea).—This island, the ancient Corcyra, was colonized by the Corinthians B.C. 734. The first sea-fight on record is said to have taken place between the fleets of Corcyra and of Corinth, B.C. 664. The two states were continually at war. The Corcyreans defeated the Corinthian fleet B.C. 435, and again B.C. 432. A massacre of the aristocratic party, which lasted seven days, occurred B.C. 427. The Spartans captured the island B.C. 303, and the Romans B.C. 229. After passing through various vicissitudes, Corfu was taken by the Venetians in 1386. The Turkish fleet was defeated by the Venetians near Corfu in July, 1716. The Turks returned, and after besieging the town of Corfu for 42 days, retired Aug. 18, 1717. By the fifth article of the treaty of Campo-Formio, Oct. 17, 1797, the Emperor of Germany allowed it to pass to the French. The allied Turkish and Russian forces wrested the island from the French, March 3, 1799. It was, with other islands, formed into the republic of the Ionian Islands (*q. v.*). Having again fallen into the hands of the French, they were recovered by the English in 1809, and placed under British protection in 1815. A conference respecting the affairs of Greece was held by the plenipotentiaries of Great Britain, France, and Russia, at Corfu in 1828. Ninety soldiers and 47 of the inhabitants were killed, and upwards of 200 persons wounded, by a powder explosion, which also destroyed many buildings and much property, June 5, 1864.

CORINGA (Hindostan).—The English took possession of this place, and established a factory in the neighbourhood, in 1759. A great inundation, in May, 1787, swept away all the houses, and destroyed nearly the entire population, besides extending far inland. The total loss of life was estimated at about 15,000 people, besides more than 100,000 head of cattle. A similar calamity happened in 1832.

CORINTH (Battles).—This town of Mississippi was the theatre of several important operations during the American civil war. Defended by Gens. Beauregard and Bragg, it was besieged by the Federals under Gen. Halleck, who advanced to within eight miles of the town, May 3, 1862. He arrived within three miles, May 21, and having driven the enemy from their position, May 28, compelled them to evacuate it, May 29. Occupied by Gen. Rosencrans, Sep. 26, 1862, Corinth was attacked by the Confederates, who killed Gen. Hackelman, and drove the defenders into their intrenchments, Oct. 3. The battle was renewed Oct. 4, when the assailants were compelled to retreat.

CORINTH (Greece).—Some authors are of opinion that Corinth was originally the seat of a Phœnician colony. According to the traditional account, it was founded B.C. 1520, under the name of Ephyre, which was exchanged for that of Corinth at a subsequent period. Sisyphus seized the place B.C. 1326, erected it into a kingdom, and founded the Isthmian games. The first event in its history that has been ascertained with any degree of accuracy is its conquest by the Dorians, B.C. 1074. Aletes was the first Dorian king, and the dynasty, which lasted 327 years, consisted of 12 monarchs.

B.C.
945. Reign of Bacchis, a descendant of Aletes. His successors take the name of Bacchidæ.
786. The Corinthians invent triremes.
745. The Corinthians depose their king Telestes, and elect Automenes prytanis, or annual magistrate.
734. The Corinthians found Syracuse and Corcyra.
664. Corcyra revolts, and defeats the Corinthians in a naval engagement.
655. Cypselus expels the Bacchidæ, abolishes the dignity of prytanis, and begins to reign at Corinth.
625. Reign of Periander, who reduces Corcyra to its old obedience, and encourages learning and the arts.
585. Death of Periander, who is succeeded by his nephew Psammetichus.
581. End of the Cypselian dynasty, and establishment of a republic.
457. The Corinthians are defeated in a war with the Athenians.
435. The Corcyreans again defeat the Corinthians in some naval engagements, and capture Epidamnus.
395. The Corinthian war (*q. v.*).
387. Peace of Antalcidas, which puts an end to the Corinthian war.
344. Timophanes, who attempts to establish a despotism at Corinth, is defeated, and murdered by his brother Timoleon.
338. Congress at Corinth, which declares war against Persia, and appoints Philip V. of Macedon the Greek generalissimo. Corinth falls into the power of the Macedonians.
243. Aratus delivers Corinth from the Macedonian sway, and annexes it to the Achæan League (*q. v.*).
228. First arrival of Roman ambassadors at Corinth.
223. The Achæans surrender Corinth to Antigonus Doson.
197. Battle of Cynoscephalæ (*q. v.*).
146. Sack of Corinth by L. Mummius, who slaughters all the male inhabitants, sells the women and children for slaves, conveys the art treasures of the city to Rome, and, having abandoned it to pillage destroys it by fire.
44. Corinth is restored by Julius Cæsar.
A.D.
393. The Isthmian games are celebrated under the Emperor Julian.
396. Corinth is taken by Alaric.
532. Justinian rebuilds the walls and fortifications.
1146. Corinth is plundered by Roger, King of Sicily.
1205. The Crusaders lay siege to Corinth.
1209. It is besieged by Geoffrey Villehardoin.
1210. It is erected into an archbishopric.
1247. It is taken by William Villehardoin, Prince of Achaia.
1358. It is granted to Niccolo Acciaiuoli.
1422. It is ceded to the Venetians.
1453. The Turks seize Corinth.
1687. It is taken by the Venetians.
1714, June 20. It is retaken by the Turks.
1822, Oct. 2. The Greeks capture the fortress.
1823. The city is taken by the Greeks, and added to their newly formed kingdom.
1858, Feb. 21. Corinth is nearly destroyed by an earthquake.

CORINTHIAN ORDER of architecture was invented by Callimachus B.C. 540.

CORINTHIAN WAR.—Corinth, Athens, Argos, Thessaly, and Thebes, entered into an alliance against the Spartans, B.C. 395, and the war was prosecuted with great vigour, until brought to a conclusion by the peace of Antalcidas, B.C. 387. As hostilities were, for the most part, waged on the territory, or in the vicinity of Corinth, it was called the Corinthian war.

CORINTHIANS (Epistle).—Two letters written by St. Paul to the church which he had founded at Corinth during his stay there in 51 and 52. The first epistle was written by

St. Paul from Ephesus in 57 or 58, and the second from Philippi in 57 or 58.

CORIOLI (Italy) was taken from the Latins by the Volscians, from whom it was wrested by the Romans B.C. 493. All traces of the town had disappeared by B.C. 443. The story of Coriolanus in connection with this city is not considered authentic by Niebuhr and other writers.

CORK (Bishopric) was founded by St. Barr, or Finnbarr, about 606. In 1490 it was united to Cloyne by Pope Innocent VIII., and in 1586, May 17, the see of Ross was also added. Cloyne was separated from Cork and Ross between 1638 and 1660, and in 1678 Cork was again made distinct. The three sees were ordered to be permanently united by Act 3 & 4 Will. IV. c. 37, s. 32 (Aug. 14, 1833), which came into operation at the death of Bishop Brinkley in 1835.

CORK (Ireland) is said to owe its origin to St. Barr, who founded a cathedral and monastery here in the beginning of the 7th century. It was laid waste by the Danes in 832. A fire destroyed the greater part of the town in 978, and it was again reduced to ashes during another Danish invasion in 1013. In 1172 it surrendered to Henry II., who established an English garrison; but the Irish besieged it in 1182 and in 1185, and finally effected its capture in 1195. King John granted Cork its first charter in 1185. The Franciscan monastery of Grey Friars was founded in 1214, and that of the Dominicans in 1229. This city was represented in the Irish Parliament in 1359. In 1493 the charter was forfeited, in consequence of the favourable reception given to Perkin Warbeck; but it was restored by James I. in 1609. In 1612 and 1622 fires destroyed great part of the city, and a flood swept away some public buildings and bridges in 1633. Cork was besieged in 1642, and in 1643 all its Irish inhabitants were expelled. The Parliamentary forces seized it in 1649, and during the Protectorate it suffered much oppression in consequence of its adherence to the royalist cause. James II. landed here in 1689, and in 1690 the forces of William III., under Marlborough, took the town after a spirited resistance. The Northgate bridge over the Lee was erected in 1712. The cathedral was taken down in 1725, in consequence of the injuries it had sustained during Marlborough's siege; and a new one was commenced on the original site in 1735. The Mansion-House was erected in 1767, the library was established in 1792, the house of correction built in 1818, and the city and county court-house was completed in 1835. Riots, caused by scarcity of food, broke out June 10, 1842; and Daniel O'Connell held a monster meeting in the neighbourhood June 8, 1845. Queen Victoria landed here Aug. 3, 1849, and desired that the town should henceforward be called Queenstown in consequence. In 1850 Cork and Dublin were united by railway, and an industrial exhibition was opened June 10, 1852. New Northgate Iron Bridge was opened by the mayor March 16, 1864. The statue of Father Mathew was inaugurated Oct. 8, 1864.

CORK-TREE.—The bark of this tree, a kind of oak, was used by the Greeks and Romans for various purposes; and amongst others, to make floats to their nets, anchor-buoys, swimming-jackets, and soles for their shoes. Beckmann contends that the Romans also used it to stop vessels of every kind. Cork was first employed for this purpose in Europe on the invention of glass bottles, in the 15th century. The cork-tree was introduced into England from the south of Europe in 1699.

CORN.—Jacob sent his ten sons into Egypt to buy corn (Gen. xlii.) during the great famine, about B.C. 1707. According to the Arundelian marbles, Ceres taught the art of sowing corn at Athens B.C. 2409. Some authorities declare that Triptolemus first cultivated corn. Corn was regularly distributed to the citizens of Rome, of Constantinople, and other towns, in ancient times. Greece was supplied with corn from the countries bordering on the Black Sea in the time of Xerxes. Corn was imported to Rome from Sicily B.C. 486.

CORN EXCHANGE (London) was projected and opened in 1747. Alterations were commenced in 1827, and the new building was opened June 24, 1828.

CORN LAWS.—The exportation of corn from England, except in certain cases, was prohibited by 34 Edw. III. c. 20 (1361). The law was modified, and in 1436 exportation was permitted by 15 Hen. VI. c. 2, provided the home price did not exceed 6*s.* 8*d.* per quarter. Dealers were first allowed to engross their corn, *i.e.* to buy in one market with intent to sell at a profit in another, by 15 Charles II. c. 7 (1663). The importation of corn, unless the price of wheat exceeded 6*s.* 8*d.* per quarter, that of rye 4*s.*, and of barley 3*s.*, was prohibited by 3 Edw. IV. c. 2 (1463), the preamble of the statute stating, "Whereas, the labourers and occupiers of husbandry within this realm be daily grievously endamaged by bringing of corn out of other lands and parts into this realm, when corn of the growing of this realm is at low price." Further regulations on the subject followed, and the importation of corn was heavily taxed by 22 Charles II. c. 8 (1670), and also by 1 Will. & Mary c. 12 (1689), which substituted a bounty for the previous duty on exported corn. The rapid increase of population, however, and the extended commerce and manufactures of the country, led to alterations in the regulations respecting importation; and by 13 Geo. III. c. 43 (1773) foreign wheat was admitted on payment of a duty of 6*d.* per quarter, when the home price was not less than 48*s.* The same statute ordered the bounty on exportation to cease when corn was at or above 44*s.* These regulations were again modified by 31 Geo. III. c. 4 (1791), which increased the duties on imported corn. Mr. Robinson's act, 55 Geo. III. c. 26 (March 23, 1815), removed all restrictions on foreign corn imported in order to be warehoused, and permitted its importation for home consumption when at 80*s.* per quarter. This bill was very unpopular, and occasioned serious riots in London and Westminster, March 6–9. By 3 Geo. IV. c. 60 (July 15, 1822), the importation price

was reduced to 70*s.* per quarter, and for corn from British North America to 59*s.* per quarter. Mr. Canning's Corn Bill, proposed March 1, 1827, passed the House of Commons, but was rejected by the Lords. Several modifications were embodied in 9 Geo. IV. c. 60 (July 15, 1828), which is known as the Sliding Scale, because the duty varied; being 25*s.* 8*d.* when the home price was 61*s.* and under 62*s.* per quarter, 16*s.* 8*d.* when it was 68*s.* and under 69*s.*, and 1*s.* when it was at or above 73*s.* By the second Sliding Scale act (5 Vict. c. 14, April 29, 1842) the duty ranged from £1 when corn was under 51*s.* per quarter to 1*s.* when it reached 73*s.* Sir Robert Peel's Corn Importation Bill, 9 & 10 Vict. c. 22 (June 26, 1846), reduced the duty on all corn imported at 53*s.* per quarter to 4*s.*, until Feb. 1, 1849, when the duty was permanently reduced to 1*s.* per quarter on all grain imported. (*See* ANTI-CORN-LAW LEAGUE.)

CORNET.—This officer, occupying in cavalry regiments the same position which the ensign (*q. v.*) holds in the foot service, is mentioned in a list of the army in Ireland under the Earl of Essex, signed by Queen Elizabeth, March 24, 1598. Cornets received at that time two shillings a day.

CORNETO (Italy), built on the site of the ancient Tarquinii, was erected into a city by Pope Eugenius IV. in 1432.

CORNWALL (Bishopric), founded in 909, was united to Devonshire in 1040, and fixed at Exeter (*q. v.*) in 1046.

CORNWALL (England) is said to have been governed by a prince named Corineus (whence its name) as early as B.C. 1145. Vespasian is supposed to have been its Roman conqueror, about A.D. 41; but little is known of its history till a much later period. Vortigern, Earl of Cornwall, became King of Britain in 425, and his earldom formed part of the kingdom till about 460, when the Saxons murdered 300 of the British nobility and compelled the rest to seek retirement in the mountainous wilds of Wales and Cornwall, where they re-established an independent kingdom. Arthur, who began to reign in 517, and ultimately extended his dominions much beyond their original limits, is the most celebrated of the Cornish sovereigns. Cuthred, King of Wessex, annexed a portion of Cornwall to his territories in 753, and in 835 Egbert gained the whole kingdom at the battle of Hengstone Hill. Alfred erected Cornwall into an earldom before 901, and the earls continued in uninterrupted succession from the old British kings of the country till 1066, when William the Conqueror substituted in their place his half-brother Robert. The dignity remained in the royal family till the death of the last earl, Edmund, in 1300, when it reverted to the crown. In 1337 Edward III. created the Black Prince Duke of Cornwall, and the title has since formed part of the style of the Prince of Wales. In 1497 one Thomas Flammock incited the Cornishmen to rebellion, and led them in arms to Blackheath, where they were defeated by Lord Daubeny, June 22, 1497. In June, 1549, the people rose on account of the imposition of the prayer-book, and the rebellion was quelled at the battle of Sampford-Courtenay (*q. v.*). In 1595 the Spaniards made a descent on the Cornish coasts, and committed several depredations. The Prince and Princess of Wales visited Cornwall in 1865.

CORONATION.—Justin II., who succeeded Justinian I. Nov. 15, 565, was the first emperor crowned with ceremony by the Patriarch of Constantinople. Charlemagne adopted the custom, and was crowned by the Pope, at Rome, Dec. 25, 800. Edward I. (the Elder), crowned Whitsunday, 902, is said to have been the first English monarch to adopt the ceremony. The custom for the queen to be crowned originated here before the Conquest. The French queens were for a long time crowned at the abbey of St. Denis, near Paris. Kingston-on-Thames, London, Westminster, and Winchester, were chosen by different English kings, in early times, for their coronation. Edward the Confessor, who was crowned at Winchester, formally fixed the monastery founded by him at Westminster as the place for the ceremony (Dec. 28, 1065).

CORONATION BANQUET. — The feast usually held in Westminster Hall on the day of the coronation, was omitted by William IV. on his coronation, Sep. 8, 1831, and has not been revived.

CORONATION OATH.—The oath taken in Sweden before the conversion of the country to Christianity is still extant. It contains the name of Odin, and was accommodated to the Christian faith by Eric in 1156. The Greek emperors, in their coronation oath, which consisted of six articles, professed, amongst other things, their acceptance of the Apostles' Creed and of the apostolical traditions, confirmed the rights of the Church, and acknowledged the constitutions of the seven œcumenical councils. The oath taken by Ethelred II., who was crowned in 979, is extant. The oath of the kings of France was similar to that of Ethelred II., King of England. The next oath of which a copy exists is that taken by Henry I. in 1100, and it agrees exactly with the former. The office used by Ethelred II. appears to have been adopted by his successors to the reign of Edward II., when some slight alterations were made. One of the articles of impeachment against Archbishop Laud was the charge of having altered the coronation oath for Charles I. By 1 Will. & Mary, c. 6 (1689), a new coronation oath was framed, the former oath containing, according to this statute, "doubtful words and expressions with relation to ancient laws and constitutions now unknown." This was altered at the union with Scotland.

CORONATION STONE. — "The legends of the old historians," says Taylor (Glory of Regality, p. 53), "inform us that this is the very stone on which the patriarch Jacob laid his head in the plain of Luz; that it was brought from Egypt into Spain by Gathelus the supposed founder of the Scottish nation; that it was thence transported into Ireland, 'amongst other princelie iewells and regall monuments,' by Simon Brech, who was crowned upon it about B.C. 700, and that it was thence carried to Scotland by King

Fergus, B.C. 330." The real history is that it was transferred from Ireland to Scotland at an early period, and was placed in the abbey church of Scone in 850. The Scottish kings were crowned here until 1296, when Edward I. carried it to England. It was agreed by the treaty of Northampton, in 1328, that the stone should be returned to Scotland, but this was not done. It is called the "Stone of Destiny," and is fixed under the seat of the coronation chair, which is made of oak.

CORONEA (Battles).—The Boeotians defeated the Athenians on this plain in Boeotia, B.C. 447. Agesilaus, at the head of the Spartans, during the Corinthian war, defeated the Thebans and their allies here B.C. 394. Several battles were fought in the vicinity. (*See* CHÆRONEA.)

CORONER.—This office is of very ancient institution, and is said by Ducange to be peculiar to the English. It is mentioned in a charter of King Athelstan in 905, and the laws of Malcolm II., who began to reign in 1004, contain many regulations respecting the authority of this officer in Scotland. The lord chief justice of the Queen's Bench is the chief coroner in the realm; but there are, besides, particular coroners for every county, who were first appointed in 1275 by the statute of Westminster I. (3 Edw. I.). Originally none but knights were permitted to hold the office; but it has gradually become sufficient that a man possess landed property worth £20 per annum. Coroners are chosen for life; but by 25 Geo. II. c. 29 s. 6 (1752), extortion, neglect, or misbehaviour, are made reasons for removal. In case of sickness or other sufficient cause, coroners are allowed to act by deputy by 6 & 7 Vict. c. 83 (Aug. 22, 1843). The law relating to election, duties, and payment was amended by 23 & 24 Vict. c. 116 (Aug. 28, 1860).

CORONET. — The exact period at which coronets were used by the different orders of the nobility is not known. Henry III. granted them to earls, James I. to viscounts, and Charles II. to barons. Dukes and marquises also wear coronets. The coronet was originally a circlet or garland, worn as an ornament. Some authorities say it was not used by knights before the reign of Edward III., and then indiscriminately by princes, dukes, earls, or knights.

CORPORATIONS are of two kinds, aggregate or sole; the first consisting of many persons united together into one society, and kept up by a perpetual succession of members; the second of one person only and his successors. The invention is attributed to the Romans. (*See* MUNICIPAL CORPORATIONS.)

CORPULENCE. — In Sparta, citizens who grew too fat were soundly whipped. Nauclis, the son of Polytus, was brought before the Ephori, and his excessive corpulence was exposed to the public. He was, moreover, threatened with perpetual banishment if he failed to reduce his body within reasonable dimensions. Sennertus mentions a man and a woman who weighed respectively 600 and 450 lb. Bright, of Essex, who died in 1750, weighed 588 lb. Daniel Lambert, who died June 21, 1809, weighed, a few days before his death, 52 stone 11 lb., or 739 lb.

CORPUS CHRISTI.—This festival of the Romish Church, in favour of the doctrine of transubstantiation and the adoration of the host, was first celebrated at Liège in 1241, by the canons of St. Martin. Urban IV. published a bull in favour of it between 1262 and 1264; but it did not become general until the order was repeated by Clement V. in 1311, and it was strictly enjoined by the 15th general council, held at Vienne, in 1311 and 1312. It is celebrated on the Thursday after Trinity Sunday, and is called in France the *Fête Dieu*.

CORPUS CHRISTI or BENEDICT COLLEGE (Cambridge) was founded in 1352, by the brethren of the guilds of Corpus Christi and the Virgin Mary. The old building was replaced by a new one in 1823. The chapel was built by Sir Nicholas Bacon in 1578.

CORPUS CHRISTI COLLEGE (Oxford) was founded by Richard Fox, Bishop of Winchester, in 1516. An additional building was erected by Dr. Turner in 1706.

CORRESPONDING SOCIETY.—In 1794 two political societies, one styled the Society for Constitutional Information, and the other, the most numerous, the Corresponding Society, established in 1791, attracted considerable attention in England. The professed object of both was reform in the parliamentary representation of the people; but they cherished designs of a dangerous character. The latter, in particular, denounced the war with France, and corresponded extensively with the leading republicans in France. The London Corresponding Society and four other societies forwarded a sympathetic address to the French National Convention, bearing date Sep. 27, 1792. A proclamation against seditious meetings had been issued May 21, 1792, and in 1794 the secretaries to the two societies, Horne Tooke and others, were arrested on a charge of treasonable practices, and committed to the Tower. The trials came on before a special commission at the Old Bailey, Oct. 25, and having in three cases resulted in an acquittal, the prosecution was abandoned. The London Corresponding Society held open-air meetings near Copenhagen House, Oct. 26, Nov. 13, and in Marylebone Fields Dec. 9, 1795, and again in the fields near Copenhagen House, Nov. 12, 1796. Bills for the safety and preservation of his Majesty's person and government, and to prevent seditious assemblies, were passed late in 1795. The London Corresponding Society called a meeting in a field near St. Pancras, July 28, 1797, when their proceedings were interrupted by the authorities, and several of their leaders kept in custody until they procured bail. The mutiny at the Nore, Sep. 1, 1797, was stirred up by emissaries from these societies. Prompt measures were adopted by the government, and although the London Corresponding Society ceased to exist, its members formed other associations, which continued to create discontent during this critical period.

CORRUPTIBLES and INCORRUPTIBLES. —Two factions into which the Monophysite Church at Alexandria was divided. Mosheim gives the following account of their origin. Julian of Halicarnassus, in 519, maintained

that "the divine nature had so insinuated itself into the body of Christ, from the very moment of conception, as to change its nature, and render it incorruptible." Hence the schism, which lasted many years, and even produced contentions that ended in bloodshed.

CORRUPT PRACTICES.—Various statutes to repress bribery at elections were consolidated and amended by the Corrupt Practices Amendment Act, 17 & 18 Vict. c. 102 (Aug. 10, 1854), which was amended and continued by 21 & 22 Vict. c. 87 (Aug. 2, 1858). The law as thus established has been continued by subsequent acts. (*See* BRIBERY.)

CORSICA (Mediterranean Sea).—This island, called by the Greeks Cyrnos, became, B.C. 564, the seat of a colony of Phocæans, who were expelled by the Tyrrhenians. The Romans attacked the inhabitants B.C. 259, but they were not finally subdued until B.C. 231. The Vandals overran Corsica A.D. 456, and it fell into the power of the Saracens in 852. In 1077 the Pope ceded it to the Pisans, and in 1297 it was given to James II., of Aragon, by Boniface VIII. James II., however, made no effort to secure it, and it remained in the hands of the Pisans till they were expelled by the Genoese in 1312. The French and Turks made an attempt to conquer the island in 1553. It was finally secured to the Genoese by the treaty of Câteau-Cambrésis in 1559. A revolt broke out in 1729; and in 1755 Gen. Paoli delivered a great part of the country from the Genoese yoke. Unable to reduce the inhabitants to subjection, the republic of Genoa ceded Corsica to France by the treaty of Compiègne (Aug. 5, 1768). Napoleon Buonaparte was born at Ajaccio (*q. v.*) Feb. 5, 1768. In 1793 Paoli renewed his efforts to liberate his country, and succeeded in delivering it from French domination. The Assembly unanimously voted the union of Corsica to the crown of Great Britain, June 19, 1794. Lord Minto ruled as viceroy till 1796, when the island was recaptured by a French force under Gentili. Under the republic, Corsica formed the two departments of Golo and Liamone. In 1811 they were united. The British attempted its recapture in 1814. Since the peace of Paris, May 30, 1814, it has remained in undisturbed possession of France. A statue of the Emperor Napoleon I. was inaugurated at Ajaccio, by Prince Napoleon, May 15, 1865. (*See* FRANCE.)

CORTENUOVA (Battle).—Fought between the Emperor Frederick II. and the Lombard League, at this place, near Milan, Nov. 27, 1237. The conflict was sustained with great vigour, but the Italians were at length defeated.

CORTES.—The name given to the national assembly in Spain and in Portugal. The commons were admitted by representation in the Cortés of Aragon in 1133, and in the Cortés of Castile in 1169, or, according to some authorities, in 1160. The convocation of the states in Aragon was made annual, instead of biennial, in 1307. About 90 towns sent 192 representatives to the Cortés of Burgos in 1315; and 50 towns sent 126 to the Cortés of Madrid in 1391. Charles V. dismissed them in Feb., 1539. The Spanish Cortés assembled at Cadiz in 1810, after a long interval, and opened Sep. 24. They drew up a constitution, which was finally accepted March 19, 1812. Ferdinand VII. suppressed the Cortés in May, 1814, but restored them, and took the oath of allegiance to the constitution of 1812, March 8, 1820. They were again suppressed Oct. 1, 1823, and a decree was issued for their restoration April 13, 1834, and they reassembled July 24. The Portuguese Cortés, remodelled in 1826, were suppressed by Don Miguel in 1828, and restored in 1842.

CORTICELLA (Battle).—The tyrant Eccelino defeated the papal forces at this place, in Italy, Aug. 30, 1258.

CORTONA (Italy), the Corythus of Virgil (*Æn.* iii. 167; vii. 206), is supposed to have been founded by the Umbrians, from whom it was wrested by the Pelasgians. Situated on a lofty hill between Arretium and Clusium, in an almost impregnable position, it was one of the most important cities of Etruria, and formed one of the 12 of the Etruscan confederation. It afterwards fell under the power of the Romans, but the exact period when this happened has not been ascertained. The modern Cortona was one of the earliest bishoprics of the Christian Church. The Bishop of Arezzo claimed spiritual jurisdiction over it in the 13th century. This led to a war, and Cortona was taken and its castle destroyed in 1258. It was sold to the Florentines in 1411, and has since remained in their possession. The Academia Etrusca was established in 1726.

CORUNDUM.—The identity of this mineral, long known under the name of adamantine spar, with the sapphire, pointed out by Pelletier and De Lamethérie in 1787, was confirmed in an account read before the Royal Society of London, by Mr. Greville, June 7, 1798.

CORUNNA (Battle).—Gen. Soult having followed the British in their retreat from Spain, came up with them near this seaport town, in the night, Jan. 16, 1809. The English general, Sir John Moore, made preparations for the embarkation of the troops; but the transports had not arrived, and he was compelled to give battle. The action commenced at two in the afternoon, Jan. 16, and though the English were at first repulsed, by dint of great exertion they defeated their opponents. Sir John Moore fell in the hour of victory; and Sir John Hope, on whom the command had devolved, succeeded in embarking the army during the night. The French army amounted to 20,000 and the English to about 14,000 men. The loss of the former was 2,000, and that of the latter nearly 1,000 in killed and wounded. Corunna is called by English sailors "The Groyne."

CORUNNA, CORUÑA, or THE GROYNE (Spain).—This city, founded by the Phœnicians, was taken in the 1st century B.C. by the Romans, who gave it the name of Ardobrica. In 1386 John of Gaunt landed here as claimant of the crown of Castile, and in 1554 Philip II. embarked at this port for England, to marry Queen Mary. The Spanish Armada (*q. v.*), driven by stress of weather into the harbour of Corunna, set sail thence on its fruit-

less mission, July 22, 1588. The town was seized by the French Jan. 19, 1809, and again in 1823.

CORVÉE.—Turgot issued a decree for the abolition of the system of forced labour in France in 1775; but it was not carried out. It was, however, abolished in 1789. Baron Stern abolished it in Prussia in Oct., 1807.

CORVEI.—(*See* CORBIE.)

CORWEN (Battles).—Henry II. was defeated near this town, in Wales, by Owen Gwynneth, in 1165.——Henry IV. sustained a reverse in the same locality, from Glendower, in 1402.

CORYGAUM (Battle).—A detachment consisting of 500 native infantry, 26 European artillerymen, and a small number of auxiliary horse, was assailed at this village, in Hindostan, Jan. 1, 1818, by the Peishwa, with an overwhelming force. The former maintained its ground, and the Peishwa made a precipitate retreat.

COS (Archipelago), the capital of a small island of the same name, the ancient Meropis, was destroyed by an earthquake during the Peloponnesian war, B.C. 431—404. It belongs to Turkey, and is called Stanko, or Stanchio.

COSA, or COSSA (Italy).—This city of Etruria received a Roman colony B.C. 273.

COSENZA (Italy), the ancient Consentia, the chief city of the Bruttii, was taken by the Carthaginians and surrendered to Rome, B.C. 204. Alaric I. died in this city in 410. The course of the Busento, a small river that washes its walls, was diverted, and in its bed, the body of the hero, with the spoils and trophies of Rome, was interred, when the waters were restored to their natural channel. Consentia, destroyed by the Saracens in 988, is an archbishopric.

COSMOPOLITAN CLUB (London) was established in 1852. A city club with the same name was founded in 1842.

COSSACKS.—The term Kosack, or Cossack, is of Turkish origin, signifying robber. The generally received opinion is, that they are a native Russian race, intermixed with Calmucks and Tartars. They are divided into two principal classes, the Cossacks of the Don, and the Cossacks of Little Russia or the Malo-Russian Cossacks. The latter are first mentioned in the 14th century, during the Polish invasion of Russia. They were not known by the name of Cossacks until 1516. Stephen Bathori, King of Poland, formed them into regiments, under the control of a hetman, or headman, in 1592. They placed themselves under the protection of Russia in 1654, and revolted in 1708. The Cossacks of the Don entered the service of Russia in the 16th century. Tscherkask, their capital, destroyed by fire in 1744, was rebuilt in 1805.

COSSIMBAZAR (Hindostan).—The East India Company established a factory here in 1706. Surajah Dowlah seized it in June, 1756.

COSSIO, or COSSIUM.—The site of this town of the Vasates, an Aquitanian people, is occupied by Bazas (*q. v.*).

COSSOVA (Battles).—The Sultan Amurath I. defeated a combined army of Albanians, Dalmatians, Hungarians, and Wallachians, on the Amselfeld, or plain of Cossova, in Servia, in Sep., 1389. A Servian soldier, lying wounded on the field of battle, stabbed Amurath in the belly, and the wound proved mortal.——Amurath II., one of his successors, defeated John Corvinus Huniades at the same place, Oct. 17, 1448. The Turkish army amounted to more than 100,000, whilst Huniades could only muster 24,000 men.

COSTA RICA (Central America) formed part of the kingdom of Guatemala, until the declaration of independence by the Spanish colonies in South America, in 1821, when it was united to the Mexican kingdom of Iturbe. It formed one of the Central American Confederacy in 1823, and was constituted an independent republic Nov. 22, 1848. A commercial treaty between England and Costa Rica was signed at San José Nov. 27, 1849, and ratifications were exchanged in London, Feb. 20, 1850. It consists of 16 articles. Costa Rica was recognized by Spain, and a treaty concluded at Madrid, May 10, 1850. The rich gold mines in the forest of Aguacate were first worked in 1821.

COSTROMA (Russia), the capital of a province of the same name, was founded in 1152. The monastery of Ipatskoi, from which the founder of the Romanoff dynasty emerged in 1613, was established in 1330. Costroma is the seat of a bishopric.

COSTUME.—(*See* DRESS.)

COTEREAUX.—(*See* BRABANÇONS.)

COTERIE CLUB (London).—This association, founded by people of quality about 1770, became notorious for the debaucheries practised by its members.

CÖTHEN.—(*See* ANHALT.)

COTTA (Ceylon).—This city, the capital in 1527 of King Dharma Prakrama IX., was besieged in 1536 and in 1540 by insurgent Singhalese under Maaya Dunnai, who was repulsed on each occasion by the Portuguese. In 1542 its sovereign with his court embraced Christianity. Rajah Singha, "the Lion King," son of Maaya Dunnai, attacked Cotta with such vigour in 1563, that the defenders were compelled to salt the bodies of their slain comrades as a resource against famine. The fort having been proved indefensible, was dismantled in 1564, when the court removed to Colombo (*q. v.*), the modern capital.

COTTAGE.—By 31 Eliz. c. 7 (1589), no cottage was to be erected unless four acres of land were attached to it, and only one family was allowed to inhabit it. The act did not apply to towns or to places on the coast; nor did it interfere with the erection of cottages for miners, or keepers in parks, forests, &c. It was repealed by 15 Geo. III. c. 32 (1775).

COTTON.—This useful material, obtained from the cotton-plant, which Linnæus subdivided into five species, has been grown in India from time immemorial, and is mentioned in the annals of Egypt.

A.D.
1252. Cotton goods are made in Persia.
1253. Flemish weavers make linen in England.
1338. A species of woollen goods, called "Manchester cottons," is made at Manchester by Flemish emigrants.
1368. Cotton is manufactured in China.
1390. Cotton (woollen) first made at Kendal.
1497. First European manufacture of cotton goods is attempted in Spain and Italy.
1590. Cotton cloth is brought to London from Guinea.

A.D.
1634. The linen trade is commenced in Ireland.
1650. Very fine calicoes are made at Calicut, in India.
1756. Cotton velvets are first made in England.

(*See* COTTON TRADE AND MANUFACTURE.)

COTTON FAMINE.—The distress in Lancashire and the other seats of the cotton manufacture in England, consequent on the dearth of the raw material, though dating from the bombardment of Fort Sumter, April 12, 1861, and the blockade of the Southern ports instituted by the Federal Government April 19, owing to the overstocked condition of the market, did not commence till nearly a year later. On account of an unprecedented advance in the price of cotton, many factories worked short time in Oct., and in Dec. it was found necessary to organize systems of relief.

A.D.
1861, Jan. 3. A meeting is held in the Moot Hall, Wigan, at which a committee is formed. Similar measures are adopted at Blackburn and Preston. The famine extends to Oldham, Bury, Rochdale, and over all the manufacturing districts, whence many operatives remove into other parts of the country. — April 29. The Central Relief Committee of Manchester is established.—May. The London Mansion House Committee is formed.—May 14. Mr. H. B. Farnall is appointed special commissioner by government to make inquiries as to the operation of the Poor Laws in the distressed districts, &c.—July 19. The Cotton District Relief Fund originates at a meeting held under the presidency of Lord Derby at Bridgewater House, where £11,000 are subscribed.—Aug. The operatives having objected to the labour test prescribed by the Poor Laws, which, consisting chiefly of stone-breaking, injured the health of men accustomed to work within doors at a high temperature, the Manchester Board of Guardians suggests the establishment of schools for reading and sewing, which men, women, and children should be required to attend as the condition of receiving relief.—Aug. 7. The Union Relief Aid Act (25 & 26 Vict., c. 110) enables boards of guardians in Lancashire, Cheshire, and Derbyshire to obtain by loans the means of meeting the extraordinary demands upon them.—Aug. 13. A conference on the cotton-supply question, held in the council-room of the Horticultural Society, is attended by a deputation from the Cotton Supply Association (*q. v.*), and by the foreign commissioners to the International Exhibition.—Sep. 8. Twenty-four Poor-Law Unions in the distressed districts afford out-door relief to 140,165 persons, at a weekly cost of £7,922, being nearly 100,000 persons in excess of the number for the corresponding period of 1861.—Dec. 2. At a meeting held in Manchester Town Hall, attended by Lords Derby, Sefton, Egerton of Tatton, and some of the principal landowners in the county, £70,000 are subscribed, which sum is afterwards raised to £130,000.—Dec. 27. The distress reaches its climax. 496,816 persons are dependent on charitable or parochial funds.

1863, Feb. Three American vessels, the *George Griswold*, the *Achilles*, and the *Hope*, freighted with goods contributed by the people of the United States for the relief of the sufferers, anchor at Liverpool.—March. In consequence of a reduced rate of relief, and a resolution to pay the grants in provision tickets instead of money, riots, unaccompanied by loss of life or bloodshed, occur at Staleybridge.—June 30. The distress is on the wane. At this date a total of £1,974,203 has been contributed to the various relief funds, of which the Central Relief Fund received £892,279; the Mansion House Fund, £503,131; the Cotton Districts and Liverpool Relief Funds, £254,380; and the Local Relief Funds, £324,413.—July 21. The Public Works in Manufacturing Districts Act (26 & 27 Vict., c. 70) empowers local boards to borrow funds for the construction of public works in the cotton districts, on which able-bodied operatives are to be employed.

A.D.
1865, Dec. 4. The final meeting of the Executive Central Committee is held under the presidency of Lord Derby, in Manchester Town Hall. The committee declare that they have a balance in hand of £37,456 18*s*. The Cotton District Relief Fund closes operations with a balance of £5,967 5*s*. 3*d*.

COTTON SUPPLY ASSOCIATION, formed at Manchester for the encouragement of the growth of cotton in India and other countries, was established in 1857. In consequence of its recommendations, the governor-general in council promulgated a resolution, Aug. 9, 1861, whereby prizes were offered to successful growers of cotton, and other encouragements afforded to its cultivation in India.

COTTON TRADE AND MANUFACTURE.—The first mention of the cotton trade of Great Britain occurs in Lewis Roberts's "Treasury of Traffic," published in 1641, where Manchester is named as receiving cotton-wool from Smyrna and Cyprus, and manufacturing it into "fustians, vermillions, dimities, and other such stuffes." In 1660 all colonial cotton was ordered to be sent to England for manufacture, and in 1760 the annual value of the trade was estimated at only £200,000. A machine for spinning by rollers was patented by Messrs. Wyatt and Paul as early as 1738; but the inventors were unable to render it of practical utility, and it was subsequently abandoned. The first great improvement in the manufacture was Hargreave's invention of the spinning-jenny, which was perfected in 1767. Sir Richard Arkwright's spinning-frame, patented in 1769, and improved and again patented in 1775, completely superseded the laborious process of spinning by hand. The mule-jenny was invented by Samuel Crompton in 1775, and was immediately substituted for the previous machine of Hargreave. The expiration of Arkwright's patent in 1785 gave an impetus to the ingenuity of inventors; and the power-loom, which was patented by the Rev. Mr. Cartwright in 1787, wonderfully increased the rate of manufacture. Importation of the raw material from America commenced in 1791, when 189,316 lb. were received. The invention of Eli Whitney's machine for separating the wool from the seed, which was completed in 1793, added so much to the facility of transportation, that in 1794 the amount received was 1,601,760 lb.

COTTONIAN LIBRARY.—This collection, formed by Sir Robert Bruce Cotton (born Jan. 22, 1570, died May 6, 1631), was largely augmented by his son and grandson. It was for some time kept at Cotton House, Westminster, and regulations for its better preservation were enacted by 12 & 13 Will. III. c. 7 (1700). By 5 Anne c. 30 (1706) authority was given for purchasing Cotton House and gardens for £4,500, and for building a convenient room for a library. In 1730 the library was removed to Ashburnham House, Westminster, and Oct. 23, 1731, it suffered greatly from a fire that broke out in the building. The number of manuscript volumes contained in the library before the fire was 958. Of these 114 were either destroyed or rendered useless, and 98 damaged. With other collections it, in

1756, formed the commencement of the British Museum (*q. v.*).

COUNCIL, or SYNOD.—The chief authorities of the Church assembled in the 2nd century, in council or synod, to regulate ecclesiastical affairs. The assembly at Jerusalem of the apostles and elders (Acts xv. 4), about 49, is the first on record. Nicolas ("The Chronology of History") gives a list of these councils, commencing with that of Pergamus, in Asia, in 152, and ending with that of Trent (*q. v.*). Landon has compiled a Manual of Councils from the best authorities. (*See* GENERAL COUNCILS.)

COUNCILS, in which persons assembled to deliberate on public affairs, existed in very early times. The Roman *concilium* was an assembly of the people from which the patricians were excluded. *See* AMPHICTYONIC COUNCIL; ANCIENTS (COUNCIL OF); BLOOD (COUNCIL OF); FIVE HUNDRED (COUNCIL OF THE); PRIVY COUNCIL; SIXTEEN (COUNCIL OF); TOWN COUNCIL, &c.

COUNT.—This title, under its Latin equivalent *comes*, dates from the reign of the Emperor Augustus. He conferred it upon the senators who surrounded him most nearly. It was used in Spain about 650, and for a long period seems to have been of equal dignity with that of duke, no distinction being made till 1297. During the Norman period in England, count and earl were titles of equal rank.

COUNTIES, or SHIRES.—Hume states that Alfred (871–901) divided all England into counties. The system certainly did not originate with him, as the shire-man is mentioned in the laws of King Ina, who died in 727. Knights of the shire were first summoned to Parliament in 1258.

COUNTY COURTS.—These tribunals for the recovery of debts under £20 were established by 9 & 10 Vict. c. 95 (Aug. 26, 1846), being "An Act for the more easy Recovery of Small Debts and Demands in England." This act was amended by 12 & 13 Vict. c. 101 (Aug. 1, 1849), and the jurisdiction of the county courts was extended to suits for sums not exceeding £50 in amount by 13 & 14 Vict. c. 61 (Aug. 14, 1850). Amendments were made in certain details relating to these courts by 15 & 16 Vict. c. 54 (June 30, 1852), by 17 Vict. c. 16 (June 2, 1854), by 19 & 20 Vict. c. 108 (July 29, 1856), and by 20 & 21 Vict. c. 77 (Aug. 25, 1857). By 22 & 23 Vict. c. 57 (Aug. 13, 1859), the power of committal vested in the county-court judges by 9 & 10 Vict. c. 95, ss. 98, 99, 100 (Aug. 26, 1846), was only to be exercised in cases in which credit had been obtained by fraud or breach of trust. England and Wales, exclusive of London, were divided into 60 districts, to be enlarged or diminished by the sovereign in council; and the courts are held in the most important towns in each district, once in every calendar month. The County Courts Equitable Jurisdiction Act, 28 & 29 Vict. c. 99 (July 5, 1865), conferred upon county courts all the powers of the Court of Chancery, in suits by creditors, legatees, devisees, heirs-at-law or next of kin, and also in other cases of legal procedure, concerning estates not exceeding the value of £500. This act came into operation Oct. 1, 1865. For particulars respecting the county courts that existed in the Saxon period of English history, *see* SCHYREMOTES.

COURIERS.—Xenophon says they were first employed by Cyrus. Herodotus (viii. 98) speaks of the Persian cassids or foot-messengers, who travelled with great rapidity. They were stationed on the road, one man and one horse to each day's journey; and by these messengers Xerxes sent the news of his defeat to Persia, B.C. 480. Gibbon bears testimony to the rapidity with which communication was carried on in the Roman empire by the regular institution of posts. "Houses," he says (ch. ii.), "were everywhere erected at the distance only of five or six miles; each of them was constantly provided with 40 horses, and by the help of these relays it was easy to travel an hundred miles in a day along the Roman roads." The couriers could, therefore, travel at great speed. Prescott speaks of the Mexican couriers, who travelled with incredible swiftness. The Peruvian chasquis, or runners, carried government despatches at the rate of 150 miles a day. Prescott says it is remarkable that this important institution should have been known to both the Mexicans and the Peruvians without any correspondence with one another, and that it should have been found among two barbarian nations of the New World long before it was introduced among the civilized nations of Europe.

COURLAND (Russia).—This province was conquered by the Danes in 1218, and by the knights of the Teutonic order in 1239. In 1561 it was rendered tributary to the King of Poland, who erected it into a duchy, and invested the grand master of the order with the title of duke. Till 1737 Courland was governed by hereditary dukes; but it was then agreed that the dignity should become elective. Numerous complications resulted; Russian troops occupied the duchy in 1786, and the inhabitants ultimately petitioned the Empress Catherine II. to unite their country to the Russian empire, which was accomplished March 28, 1795. Alexander I. liberated the serfs of Courland Sep. 24, 1818.

COURT BARON.—The court of civil jurisdiction within a manor was anciently held once every three weeks, its chief business being the settlement of questions relative to the right of lands within the manor. By 20 Geo. II. c. 43 (1747), its jurisdiction was limited to the right of recovery of rent, &c., and of deciding civil questions in which the damage did not exceed 40 shillings. Its operation was still further restricted by 3 & 4 Will. IV. c. 27, s. 36 (July 24, 1833), and it has now fallen into disuse in consequence of the permission granted to lords of manors by 9 & 10 Vict. c. 95, s. 14 (Aug. 28, 1846), to surrender their right of holding these courts to the crown. It also had jurisdiction in criminal matters, and this, by 20 Geo. II. c. 43 (1747), was limited to assaults, batteries, and smaller offences, for which a fine of not more than 20 shillings, and in default of payment one month's imprisonment, might be inflicted.

COURT-LEET and VIEW OF FRANKPLEDGE.—This court of record, established in

the Anglo-Saxon period, dealt with all crimes punished by the common law. Its original intent was to view the frank pledges, *i.e.* the freemen within the liberty, who, according to the institution of King Alfred, were all pledged for each other's good behaviour. By 52 Hen. III. c. 10 (1267), prelates, peers, and clergymen were exempted from attendance at this court. A portion of the business of the court was transferred to quarter sessions by 1 Edw. IV. c. 2 (1461), and this statute materially reduced its functions.

COURT-MARTIAL.—During the Tudor supremacy, military causes were decided by courts of war, held at stated periods, under the presidency of the Earl Marshal of England. Courts-martial, as now constituted, were distinguished into general and regimental in 1686, and their power regulated by the Mutiny Act, 2 Will. III. c. 6 (1690). Naval courts-martial are regulated by 22 Geo. II. c. 33 (1749).

COURT OF REQUESTS.—(*See* CONSCIENCE, COURTS OF.)

COURTRAI (Belgium) was a municipal city in the 7th century. The fortifications were built in 1290, the castle in 1385, and the citadel in 1647. The battle of the Spurs (*see* GUINEGATE, Battle), in which the French army, amounting to 47,000 men, was defeated by 20,000 Flemings, was fought near this place July 11, 1302. Courtrai was captured by the French in 1643, 1646, 1667, 1683, and May 17, 1744. They obtained possession of it again towards the end of June, 1792, but were compelled to evacuate it June 30. Gen. Beaulieu completely routed the French near this city in 1793. The church of Notre Dame was founded in 1238, and the town hall in 1526. The first cloth manufacture in Flanders was commenced at Courtrai in 1260.

COURTS for the administration of justice are referred to in Exodus xviii. 25 & 26, in which the measures adopted by Moses about B.C. 1491, for the judicial government of the Israelites, are described. The ancient Hebrews had two kinds of courts,—the Great Sanhedrim, or Great Consistory, and the Council, or Lesser Court. The court of the Areopagus is said to have been established at Athens B.C. 1556. The Cretan courts of justice, attributed to Minos, were celebrated. Suits in courts in this country were first regulated by the provisions of 43 Hen. III. (1259). The Irish law-courts were confirmed in their independent rights by 23 Geo. III. c. 28 (1783). (*See* CHANCERY COURT OF; COMMON PLEAS; EXCHEQUER COURT OF; HIGH COMMISSION COURT; MARSHALSEA COURT, &c.)

COURTS OF LOVE.—These assemblies, common in the age of chivalry, though little is known of their origin or nature, are believed to have existed in the 12th century. In the 13th century numerous institutions, called Poetical Societies, arose in Northern France, which, assembling once a year to discuss the merits of songs submitted for their approval, were frequently called upon to decide questions of love casuistry. These and similar societies appear to have been common in the 14th century. In 1410 Charles VI. and his consort, Isabella of Bavaria, are said to have established a court of love. Martin Franc, of Arras, in his "Champion des Dames," written about 1440, ridicules these assemblies. The "Good King René" of Anjou, who died July 10, 1480, established an annual procession of the Prince of Love, which was celebrated on Corpus-Christi Day until 1791. It had little or nothing in common with the old courts of love.

COUTRAS (Battle).—During the war of the three Henries in France, the Roman Catholic army, led by the Duke of Joyeuse, was defeated and almost annihilated near Coutras, in Perigord, Oct. 20, 1587, by the Huguenot forces, led by Henry of Navarre.

COVELONG (Hindostan).—This fortified town was taken by stratagem by the French in 1750. Clive besieged and captured it in Sep., 1752, when the fortifications were destroyed.

COVENANTERS.—The National Covenant, professing to be based upon a document which James VI. of Scotland had signed in 1580, was drawn up and published by the Four Tables in Edinburgh, March 1, 1638. The Four Tables, as they were called, consisted of—1. Nobility; 2. Gentry; 3. Ministers; and 4. Burgesses; and in their hands the whole authority of the kingdom was vested. They elected a general assembly, which met at Glasgow Nov. 21, 1638, and abolished episcopacy; ordering that every person should sign the Covenant on pain of excommunication. The Covenanters prepared for war, and though a treaty of peace was concluded June 18, 1639, they entered England Aug. 20, 1640. An agreement was signed at Ripon, Oct. 26, 1640, by which commissioners were to be appointed, to whom the settlement of the points in dispute was referred. This covenant, under the name of the Solemn League and Covenant, was received by the parliament of the Assembly of Divines, Sep. 25, 1643. It differed essentially from the Covenant of 1638, and according to Hallam (Eng. ch. x. pt. 1), "consisted in an oath to be subscribed by all sorts of persons in both kingdoms, whereby they bound themselves to preserve the reformed religion in the Church of Scotland, in doctrine, worship, discipline, and government, according to the word of God and practice of the best reformed churches; and to endeavour to bring the churches of God in the three kingdoms to the nearest conjunction and uniformity in religion, confession of faith, form of church government, directory for worship, and catechizing; to endeavour, without respect of persons, the extirpation of popery, prelacy (that is, church government by archbishops, bishops, their chancellors, and commissaries, deans and chapters, archdeacons, and all other ecclesiastical officers depending on that hierarchy), and whatsoever should be found contrary to sound doctrine and the power of godliness; to preserve the rights and privileges of the parliaments and the liberties of the kingdoms, and the king's person and authority, in the preservation and defence of the true religion and liberties of the kingdoms; to endeavour the discovery of incendiaries and malignants, who hinder the reformation of

religion, and divide the king from his people, that they may be brought to punishment; finally, to assist and defend all such as should enter into this covenant and not suffer themselves to be withdrawn from it, whether to revolt to the opposite party, or to give in to a detestable indifference or neutrality." This document was signed by members of both houses, and by civil and military officers. A large number of the beneficed clergy, who refused to subscribe, were ejected. Charles II. signed it very reluctantly at Spey, June 23, 1650. A majority in the House of Commons ordered it to be burned by the common hangman, May 17, 1661. In the same year the Scottish parliament renounced the Covenant, and declared the king supreme. Heavy fines were imposed on many of the Covenanters.

COVENT GARDEN (London), originally called Convent Garden, because it occupied the site of the garden and fields of the abbey at Westminster, was, with the lands, granted by Edward VI. to the Duke of Somerset, and after his attainder was granted to John, Earl of Bedford, by patent dated May, 1552. The square was formed about 1631, from designs by Inigo Jones, and the church of St. Paul's, erected by the same architect, was consecrated Sep. 27, 1633. It was repaired in 1727, and having been destroyed by fire Sep. 17, 1795, was rebuilt. Covent Garden was made a parish by an ordinance of Lords and Commons, Jan. 7, 1645; and the bounds of the parish were more clearly defined in 1660. Covent Garden Market, which originated about 1656, at first consisted of a few temporary sheds. Charles II. made a grant of it to William, Earl of Bedford, May 12, 1671, and from that time it gradually increased in importance. The present building was erected by Mr. Fowler in 1830.

COVENT GARDEN THEATRE (London) was opened by John Rich, the harlequin, Dec. 7, 1732; rebuilt by Henry Holland, 1792; and destroyed by fire Sep. 20, 1808. The first stone of the second theatre was laid by the Prince of Wales Dec. 31, 1808, and the building, designed by Sir Robert Smirke, opened at increased prices Monday, Sep. 18, 1809. A riot ensued, known as the "Old Prices," or "O. P." riot, which lasted 67 nights, and terminated in a compromise. During the years 1843–45, this theatre was leased by the members of the Anti-Corn-Law League, and used for public meetings. After having been altered and decorated by Mr. Albano, it was opened for Italian opera, April 6, 1847. This theatre was burned down March 5, 1856, during a *bal masqué*. The present edifice, from the designs of Mr. E. M. Barry, was opened May 22, 1858.

COVENTRY (Warwickshire). — Canute founded a nunnery here, which was burned by the traitor Edric in 1016. Leofric, Earl of Mercia, who died in 1057, founded a monastery on the ruins of the old nunnery, and granted the town a charter of immunity from taxation, at the intercession of his wife Godiva. Edward III. granted a charter of incorporation in 1344, and in 1355 the city was surrounded by walls. In 1404, Henry IV. held here the *Parliamentum Indoctorum*, or Parliament of Dunces, so called because lawyers were excluded from it. Henry VI. erected it into a separate county in 1451; and in 1459 a second parliament was held, which received the epithet of *Parliamentum Diabolicum*, because it passed attainders against the Duke of York and his chief supporters. In 1607 an inundation destroyed 257 houses; and in 1641 Charles I. made an unsuccessful attempt to take the city by storm. The walls were destroyed in 1662, by order of Charles II. The manufacture of silks and ribbons was introduced in 1685, and soon became the chief employment of the inhabitants. The procession in honour of the Countess Godiva, who is said to have induced her husband, Earl Leofric, to release the inhabitants from a tax by riding through the city with no covering but her own hair, is believed to have originated in the reign of Charles II. (1660—1685). In consequence of the commercial treaty with France, concluded at Paris Jan. 25, 1860, the Coventry weavers were thrown out of employment, and reduced to great distress. Efforts to relieve them were made in the early part of 1861; and the proceeds of several musical performances, held in the more important English towns, were devoted to this object. St. Michael's church (1313—1395) is said to be the largest parish church in England. St. Mary's Hall was built in 1450.

COVENTRY ACT.—Sir John Coventry, K.B. and M.P., was attacked and maltreated in the streets of London, Dec. 21, 1670, by Sir Thomas Sandys and other members of the royal guard. The attack was provoked by some remarks made by Sir John Coventry on the life led by Charles II., and is said to have been instigated by the Duke of Monmouth. In consequence of this outrage, malicious wounding and maiming was made a capital offence by 22 & 23 Charles II. c. 1 (March 6, 1671), and the measure received the name of the Coventry Act. It was repealed by 9 Geo. IV. c. 31, s. 1 (June 27, 1828).

COVENTRY or AMBASSADORS' CLUB (London). — This exclusive club, instituted about 1853, was closed in March, 1854.

COVERPAUK (Battle).—Clive defeated the French at this town, near Arcot, in the Carnatic, March 3, 1752.

COWES (Isle of Wight).—(*See* EAST COWES and WEST COWES.)

CRACOW (Poland), the ancient capital of the country, was founded by Cracus about 700. It was taken by the Bohemians in 1005, and by the rebellious subjects of Ladislaus II. in 1146. In 1189 it was the scene of a council for the reform of the clergy. The Mongols ravaged it about 1240. It was besieged in 1279 by the discontented nobles of Lesko VI. (the Black), but opposed a gallant and successful resistance. It became the capital of Poland in 1320, and remained so until 1609, when Sigismund III. made Warsaw the capital. The university was founded in 1364 by Casimir III., enlarged in 1401 by Ladislaus V. (Jagellon), and remodelled in 1817—1833. In 1655 the city was taken by the Swedes under Charles X. (Gustavus), and again in 1702 by Charles XII. The Russians

took it in 1768, and Kosciusko delivered it from them March 24, 1794. It was seized by the Prussians June 15, and at the final partition of Poland, in 1795, was allotted to Austria. In 1809 it formed part of the duchy of Warsaw, but according to the provisions of the congress of Vienna, subsequently became a republic under the protection of Russia, Austria, and Prussia, June 20, 1815. In Sep., 1831, it was occupied by 10,000 Russians; and was seized by the Emperor of Austria Nov. 16, 1846, to whom it has since belonged. A fire which broke out at noon, July 18, 1850, laid a large portion of the city in ruins. A state of siege was proclaimed Feb. 29, 1864.

CRAMP RINGS are said to have originated in the middle of the 11th century.

CRAMPTON'S GAP (Battle).—Gen. Franklin drove the Confederate forces of Gen. Howell Cobb from their position at this pass in Virginia, Sunday, Sep. 14, 1862.

CRANGANORE (Hindostan).—According to a Jewish tradition, the descendants of those Jews who escaped, on the destruction of Jerusalem, obtained permission from the native sovereign to settle at this seaport, on the coast of Malabar, about 490. The Portuguese captured it in 1505, and the Dutch wrested it from them in 1663, and erected fortifications. Hyder Ali obtained possession in 1780; but the Dutch recovered the place, which they sold to the Rajah of Travancore, an ally of the British Government, in 1788. Tippoo Saib having failed in an attempt to capture it Dec. 29, 1789, was more successful in 1790, and the town fell May 8. The East India Company's forces recovered it in 1791, and it was ceded to them by the treaty of peace, of which the preliminaries were signed Feb. 24, 1792, and the treaty itself March 17.

CRANIOLOGY.—*See* PHRENOLOGY.)

CRANNOGES.—These fortified islands in lakes, frequently of artificial construction, and used as dwelling-places in early times, are mentioned by Herodotus (B.C. 484—408). The Irish annals refer to them in 848 and 933; and as late as 1641 Sir Phelim O'Neil used the crannoge of Roughan Lake, near Dungannon, as a retreat. In 1645 the crannoge of Loughinsholin, Londonderry, was destroyed by fire. Remains of ancient crannoges of great antiquity were discovered in Ireland in 1839. In 1853–4 similar structures were discovered in several Swiss lakes, and in 1857 they were found in Scotland. Subsequent researches have revealed their existence in Denmark, Savoy, Northern Italy, Hanover, and Prussia.

CRANNON (Battle).—The confederated Greeks were defeated by the Macedonians at Crannon during the Lamian war, Aug. 7, B.C. 322.

CRAON (Battle).—An army of French, German, and English troops, commanded by the Duke of Montpensier, was defeated near this city, in Anjou, in 1592, by the Duke of Mercœur, at the head of the Spanish troops and those of the League.

CRAONNE (Battle).—A great battle was fought at this place, near Laon, in France, March 7, 1814, between the French under Generals Ney and Victor, and the Prussians and Russians led by Blücher and Woronzow. The former had 29,000, and the latter 21,000 men engaged; but the strength of the position counterbalanced this numerical superiority. The French retained possession of the field of battle. There were, however, no trophies, and the losses on both sides were severe.

CRAVANT, or CRÉVANT (Battle).—The Earl of Salisbury defeated the allied French and Scottish army at this place, near Auxerre, in Burgundy, in July, 1423.

CRAWFORD PRAIRIE (Battle).—The Confederates, under Gen. Hindman, attacked Gen. Herron at this place in Arkansas, Dec. 7, 1862, and were held in check by him till their rear was assailed by Gen. Blunt, when they retreated across the Boston mountains.

CRAWLEY COURT-MARTIAL.—Lieut.-Col. Thos. R. Crawley, of the Inniskillen Dragoons, charged with cruelty and tyranny in having placed under close arrest at Mhow, in Hindostan, Sergeant-Major Lilley, who died May 25, 1862, after a month's confinement, was tried at Aldershot by a court-martial which commenced Nov. 18, 1863, and terminated in his acquittal Dec. 23.

CRAYFORD (Battle).—Hengist defeated the Britons, led by Vortimer, near this place, in Kent, at that time called Creccanford, in 457.

CRAYONS of various colours were used in France early in the 15th century. Conté crayons were invented in France in 1795, and named after their inventor, Conté.

CREATION OF THE WORLD.—The learned Dr. Hales, in his work entitled "A New Analysis of Chronology and Geography, History and Prophecy" (vol. i. p. 210), remarks: "In every system of historical chronology, sacred and profane, the two grand *æras*, of the *Creation of the World*, and of the *Nativity of Christ*, have been usually adopted as standards, by reference to which all subordinate epochs, æras, and periods have been adjusted." This author gives a list of 120 dates, commencing B.C. 6984, and terminating B.C. 3616, to which this event has been assigned by different authorities, and he admits that it might be swelled to 300. Dr. Hales places it at B.C. 5411. The date commonly adopted is B.C. 4004; being that of Usher, Spanheim, Calmet, Blair, &c., and the one used in the English Bible. The following are some of the principal variations:—

B.C.		
6984	Alphonso X.	Muller.
6484	Alphonso X.	Strauchius.
6204	Indian chronology	Gentil.

CRÉCY, or CRESSY (Battle).—Edward III. landed at La Hogue, July 10, 1346, and ravaged the country on the left bank of the Seine, as far as Paris. On his return he halted at Crécy, a village near Abbeville, Aug. 25. Philip VI. of France, who followed with an immense army, came up with the English at this place, and the battle commenced about four in the afternoon of Saturday, Aug. 26. The French army amounted to 130,000, whilst Edward III. could only muster 36,800 men. The king divided this small force into three lines. The first was commanded by the Prince of Wales (the Black Prince), who distinguished himself greatly in that well-fought field, and the second by the Earl of Arundel. Edward himself led the third. After a severe struggle, the French were completely routed. They lost 30,000 of their infantry, 4,000 men-at-arms, 1,400 gentlemen, 1,200 knights, and several nobles; whilst the Kings of Bohemia and Majorca were slain in the fatal fray. The English loss did not amount to a hundred of all ranks. Hallam attributes the result to "the yeomen, who drew the bow with strong and steady arms, accustomed to use it in their native fields, and rendered fearless by personal competence and civil freedom." Some continental writers attribute this extraordinary victory to the effect of cannon, which they pretend was used by the English for the first time on this occasion. The statement is not supported by satisfactory evidence. The battle was fought during a thunder-storm, and, according to some authorities, an eclipse.

CRÉDIT FONCIER.—This system of borrowing money on the security of landed property, repayment to be made by instalments, was established in France by edict, Feb. 28, 1852.

CRÉDIT MOBILIER.—This company, constituted on the limited liability principle, was created by a decree Nov. 18, 1852. Its head quarters are in Paris, and its operations consist in the undertaking or origination of public enterprises, such as railroads, canals, and mines.

CREDITON, or KIRKTON (Devonshire).—A collegiate church was founded at this town in 905. It was the seat of the bishopric of Devonshire (*q. v.*) from 909 to 1046. The grammar-school was founded in 1547. Crediton has frequently suffered from extensive conflagrations, and in 1743 the greater part of the town was destroyed. Another occurred in 1769.

CREEDS, or CONFESSIONS, anciently termed *symbola*, as the standard and rule of faith, existed in the primitive Church. Bingham (Antiq. b. xvi. ch. i., s. 1) says, "For as to fundamental articles of faith, the Church had then always collected or summed up out of Scripture in her creeds, the profession of which was ever esteemed both necessary on the one hand and sufficient on the other, in order to the admission of members into the Church by baptism; and consequently both necessary and sufficient to keep men in the unity of the Church, so far as concerns the unity of faith generally required of all Christians to make them one body and one church of believers." The Apostles', the Nicene, and the Athanasian, the most ancient creeds extant, are described under their respective heads. The Augsburg Confession was drawn up in 1530, and modified in 1579. Forty-two articles of the Church of England, afterwards reduced to 39, were drawn up in 1551. The creed of Pope Pius IV. was promulgated in 1564. Mogila, Metropolitan of Kiow, drew up the creed for the Russian branch of the Greek Church in 1642. The Confession of the Assembly of Divines, passed in 1643, was ratified by act of Parliament in 1660.

CREMA (Italy).—This town of Lombardy, founded by the Longobards in the 6th century, was captured in 1160 by the Emperor Frederick I., who, having permitted the inhabitants to withdraw, abandoned it to the flames. It was much injured from the explosion of a powder-magazine and a fire that followed, April 13, 1768. In 1797 the inhabitants were incited by French emissaries to throw off the yoke of Venice, and declare in favour of the Cispadane republic; and it was made part of the Cisalpine republic by the treaty of Campo-Formio, Oct 17, 1797.

CREMATION.—The custom of burning the dead originated at an early period, and is frequently referred to by Homer (B.C. 962—927). The Romans, who adopted this practice in imitation of the Greeks, discontinued it during the 4th century A.D. Henry Laurens, the first President of the American Congress, whose infant daughter had narrowly escaped burial while in a state of suspended animation, and who held peculiar views on the subject of the purifying powers of fire, directed by his will that his remains should be burned. He died in 1792, and his body was disposed of according to his desire. Cremation is still common in parts of Hindostan and other Oriental countries.

CREMERA (Italy).—On the banks of this small river, which flowed into the Tiber near Rome, the 300 Fabii established a fortified post, and carried on hostilities against the Veientines. They were surprised July 16, B.C. 477, and not one of the band escaped.

CREMONA (Italy), the capital of a Lombard province of the same name, was the seat of a Roman colony B.C. 221. The Gauls were defeated in a great battle under its walls B.C. 200, and it received a new colony B.C. 190. Cremona suffered during the civil wars. The vanquished legions of Vitellius, after his defeat by the generals of Vespasian, A.D. 69, having

taken refuge here, carried the city by assault. It was given up to pillage, and completely destroyed. Though rebuilt by Vespasian, it did not recover its former prosperity, and was again destroyed by the Lombards in 605. The inhabitants erected their city into a republic in 1107, which joined the Lombard League in 1176. The Emperor Henry VII. imprisoned many of the inhabitants, abolished their privileges, and destroyed the ramparts of the city, in 1311. After this time it often changed masters, and was ceded to Venice in 1428. Louis XII. took it in 1499, and bestowed it upon the Swiss, in return for their alliance. He obtained possession of it in 1509, and the inhabitants threw off the French yoke in 1512. The Venetians recovered it for France in 1515. It shared the varied fortunes of the Italian cities, submitted to Buonaparte in 1796, and its incorporation with the Cisalpine republic was recognized by the Emperor Francis II. in the treaty of Campo-Formio, Oct. 17, 1797. It was recovered by the allies in 1799, but the French regained possession in 1800. It was ceded to Austria at the settlement of Europe in 1814–15, and remained in its possession, with the exception of a short interval in 1848–49, until it was incorporated with Sardinia by the treaty of Zurich, Nov. 10, 1859. Cremona is the seat of a bishopric.

CREMORNE GARDENS (London) were opened in 1847. Ashburnham House was opened in 1860, and the first dog-show took place in 1861. Carlo Valerio fell during a performance on the wire rope June 23, 1863, and died the following morning.

CRESCENT.—Gideon took from Zebah and Zalmunna, kings of Midian, B.C. 1245, "ornaments like the moon," that hung on their camels' necks (Judges viii. 21—24). The Midianites were Ishmaelities, and it is therefore probable that the Turks derived the use of the crescent, as one of their standards, from their ancestors, though some authorities state it was first used by them in 1446, after the taking of Constantinople. Warburton (Crescent and the Cross) says, "The crescent was the symbol of the city of Byzantium, and was adopted by the Turks. This device is of ancient origin, as appears from several medals, and took its rise from an event thus related by a native of Byzantium. Philip, the father of Alexander the Great, meeting with great difficulties in carrying on the siege of this city, set the workmen one dark night to undermine the walls. Luckily for the besieged, a young moon suddenly appearing, discovered the design, which accordingly miscarried; in acknowledgment whereof the Byzantines erected a statue to Diana, and the crescent became the symbol of the state." Philip II. of Macedon besieged Byzantium B.C. 340.

CRESCENT (Orders).—Charles I., King of Naples and Sicily, instituted an order of knighthood of the Crescent, in 1268.——René, Duke of Anjou, instituted an order of the Crescent at Angiers in 1448.——Selim III. established an order of the Crescent in 1801, in honour of the battle of Aboukir (*q. v.*). (*See* COCKLE.)

CRESPY (Treaty), between Francis I. of France and the Emperor Charles V., was signed at this small town, near Meaux, in Valois, Sep. 18, 1544. They agreed, among other things, to restore all conquests made subsequent to the truce of Nice in 1539, and to join in making war against the Turks. Charles V. renounced his claim to Burgundy, and Francis I. renounced all pretensions to the kingdom of Naples, the duchy of Milan, and the suzerainty of Flanders and Artois.

CREST.—The custom of adopting the figure of some animal as a cognizance is of great antiquity. Herodotus (i. 171) attributes to the Carians the invention of crests for helmets, devices for shields, and handles for bucklers. Alexander III. the Great is said to have assumed a ram's head as his device, and Julius Cæsar a star. Richard I. of England is believed to have been the first to revive the practice, as his image on a seal of the period is represented in a helmet adorned with a sprig of the plantagenista, or broom, from which the name of his family was derived. Edmund Crouchback, Earl of Lancaster, is represented with a crest before 1286; and Baron de Spencer, in 1296, adorned his horse with the same embellishment. These earlier crests were mostly plumes of feathers. In 1322, the Earl of Leicester assumed a dragon as his cognizance. Edward III. originated the custom of conferring crests as military honours in 1333.

CRETE, or CRETA (Ægean Sea).—The Egyptians, the Phœnicians, and the Phrygians are said to have founded cities in this island, the modern Candia (*q. v.*). The Dorians settled in it before the return of the Heraclidæ.

CRÉVANT (Battle).—(*See* CRAVANT, Battle.)

CREVELDT (Battle).—Prince Ferdinand of Brunswick defeated the Count of Clermont, at the head of the French army, on this plain, near Clèves, June 23, 1758.

CRIBBAGE.—This game is believed to be identical with the old game of Noddy, which was played at the English court and is referred to by Sir John Harrington 1561—1612). John Hall of Durham, in his "Horæ Vacivæ," published in 1646, speaks of "cribbidge" as a game played with cards; and an anonymous work called "Wit's Interpreter," published in 1670, enumerates it among a list of "courtly games." It is also mentioned in 1709.

CRICKET.—Although a game with bat and ball, somewhat similar to the modern pastime, was played in England as early as the 13th century, the name of cricket first occurs in the "Mysteries of Love and Eloquence," by Edward Phillips, Milton's nephew, published in 1685. Fosbroke states, that club-ball, a game played in the time of Edward III., was its ancestor. The game was much improved in 1774, when Sir Horace Mann, the Duke of Dorset, and Lord Tankerville, formed a committee, Sir William Draper being chairman, and drew up the first collection of rules, which fixed two as the number of the wickets. In 1775 a middle stump was added; and in 1709 the White Conduit Club was formed. Thomas Lord established his cricket-ground in 1780, when the Marylebone Club was instituted. A match was played at Moulsey Hurst, between

six unmarried and six married women, Aug. 3, 1775. The former proved victorious. One of the fair cricketers scored 17 runs. In 1849 the "Eleven of All England" visited the United States and Canada, and exhibited the perfection of the game to American players. In 1862 they paid a similar visit to Australia. The Prince of Wales headed a subscription for preserving Lord's cricket-ground from builders with a donation of £100, April 30, 1864.

CRIMEA (Russia), the ancient Tauric Chersonese, was peopled originally by the Tauri. The Greeks formed settlements towards the middle of the 6th century B.C., and founded the little kingdom of Bosporus (*q. v.*) about B.C. 480. The Goths descended on its shores in 250, and during the 4th century it submitted to the Huns, who were expelled by Justinian I. (527—565). In 679 it was seized by the Chazars, and after various reverses of fortune, submitted to the Tartars in 1237. In 1261 the Genoese obtained considerable trading privileges, and ultimately seized the country; but, in 1475, Mohammed II. overthrew their power, and subjected the Crimea to the Turkish yoke. It afterwards existed for about three centuries as a dependency of the Sultan, under the nominal government of native khans. In 1696 it was invaded by the Russians under Peter the Great; and again in 1736, under Count Munnich, who defeated the Tartar forces sent against him, but failed to accomplish any signal success. A third Russian army of 40,000 men, led by Dolgoruki, entered the Crimea July 26, 1770, and reduced the whole peninsula to subjection within a month; and in 1771 a new khan was chosen, who owed his elevation to Russian influence. In 1783 the khan abdicated, and an imperial manifesto was issued, stating the intended incorporation of the Crimea with the Russian empire; to accomplish which, more than 30,000 Tartars of every age and sex were massacred. The formal cession of the Crimea by Turkey did not take place till the peace of Jassy, Jan. 9, 1792. During the Russian war of 1853—56, the Crimea was the scene of many of the principal operations. An army of 58,000 men, of whom 25,000 were English, 25,000 French, and 8,000 Turks, landed at Old Fort, 20 miles from Eupatoria, Sep. 14, 1854. The final evacuation of the Crimea by the allies took place July 12, 1856. The Russian Government subsequently strengthened some of the Crimean strongholds, and expended, before the end of 1865, 15,000,000 roubles on the fortifications of the straits of Yenikale alone. Large deposits of mineral oil were discovered in the Crimea in 1865.

CRIMEAN MEDALS.—The public distribution of these medals to the brave men who distinguished themselves in the Crimean campaign against Russia was made by Queen Victoria in St. James's Park, May 18, 1854.

CRIMISUS (Battle).—Timoleon of Corinth, with an army of 11,000 men, defeated the Carthaginians, 70,000 strong, on the banks of the Crimisus, or Crimissus, a river in Sicily, B.C. 339.

CRINOLINE.—(*See* Hoops.)

CRIPPLEGATE (London).—An ancient gate of the city is noticed under this name as early as 1016. It was so called from the cripples who congregated there to seek alms. For some time a part of the postern was used as a prison for debtors and trespassers. The gate was rebuilt by the brewers of London in 1244, and was repaired in 1663. The materials were sold for £91 in 1760, the purchaser agreeing to commence the work of demolition Sep. 1 in that year, and to clear away all the rubbish within one month from that date.

CRISSA (Greece).—This town of Phocis, more ancient than the neighbouring city of Cirrha (*q. v.*), with which it is sometimes confounded, was built, according to tradition, by a colony of Cretans under the personal direction of Apollo. In the time of Homer (B.C. 962—927), it appears to have been a place of considerable importance, but it was subsequently eclipsed by the rising greatness of Cirrha and Delphi, and had fallen into insignificance before the first Sacred War (*q. v.*).

CROATIA (Austria).—This province of the Austrian empire, forming part of the ancient Pannonia, was incorporated with Illyria by Augustus. The Goths settled in it in 509, and the Crotians, a tribe of the Wends, in 640; and from them the country received its name. They conquered several neighbouring states, and erected Croatia into a kingdom in the 10th century. It was incorporated with Hungary in 1100, and with that kingdom passed under the Austrian rule.

CROCKARDS.—Base coin, imported into this country, from Flanders, in large quantities during the reign of Edward I. By 27 Edw. I. (1299), the circulation of this coin was prohibited under severe penalties.

CROCKERY-WARE is supposed to have been invented by the Egyptians, who are said to have introduced it into Greece about B.C. 1490. In 100 years from that time it was in general use. (*See* Earthenware.)

CROCKFORD'S CLUB (London). — This private club and gambling-house, in St. James's Street, was built in 1827. It took its name from one Crockford, who began life as a fish-stall keeper, and after amassing a large fortune in gaming transactions, died in May, 1844. It was sold after his death, and having been redecorated was in 1849 opened as the Naval, Military, and County Service Club (*q. v.*).

CROISIERS.—(*See* Crossed, Crouched, or Crutched Friars.)

CROIX ST. — (*See* Danish America and Santa Cruz.)

CROMLECHS. — These ancient structures, found in different parts of the island, are believed to be sepulchral monuments, though an opinion long prevailed that they were heathen altars or temples. The most celebrated is the cromlech at Plas Newydd, in the island of Anglesey. A cromlech was discovered in removing a large barrow in Phœnix Park, Dublin, in 1838.

CROMWELL GARDENS (London), in Old Brompton, formed a favourite place of public resort in the middle of the 18th century.

CRONSTADT (Russia).—This strongly fortified seaport town was founded by Peter the Great in 1710. Menschikoff wrested the island, on which part of the fortifications stand, from

the Swedes in 1703. It received the name of Cronstadt in 1721. Nelson followed the Russian fleet to Cronstadt in May, 1801. The allied English and French fleets arrived off Cronstadt the last week in June, 1854, and returned June 1, 1855; but on neither occasion were the fortifications assailed.

CRONSTADT (Transylvania) was founded in the 13th century.

CROPREDY BRIDGE (Battle).—The royal troops defeated the Parliamentary army, led by Sir William Waller, at this place, near Banbury, June 29, 1644.

CROQUET.—This game, the name of which is said to be derived from the old word for a shepherd's staff, to which the mallets used in playing bear some resemblance, is alleged to have been introduced into this country from Germany about 1830, although it did not become general till many years after. Capt. Mayne Reid's "Rules," 126 in number, were published in 1863. By some the origin of croquet is traced to the fashionable game pall-mall.

CROSBY HALL (London), in Bishopsgate, formerly called Crosby Place, was built about 1470, by John Crosby, grocer and woolman, knighted by Edward IV. in 1471. It was constructed of stone and timber, very large and beautiful, and, according to Stow, "the highest at that time in London." Richard Duke of Gloucester, afterwards Richard III., lodged here.

CROSIERED ABBOT.—(*See* ABBOT.)

CROSS.—The sign of the cross was used by Christians in the sacrament of baptism in the 2nd century, and the cross was adopted as the standard of Christian warriors by Constantine I. (the Great), who solemnly affirmed that he saw one two miles long shining in the heavens at mid-day, Oct. 26, 312. (*See* LABARUM.) The cross on which our Lord suffered is said to have been discovered by the Empress Helena, mother of Constantine I., in 326. Three crosses having been found buried beneath Mount Calvary, the identity of the true cross was determined by the miraculous cures it wrought on such sick people as touched it. This discovery is commemorated every 3rd of May, by the feast of the "Invention of the Cross." After this event images of the cross were erected on altars, which first took place about 340. In 614, Chosroes II., King of Persia, plundered Jerusalem and carried away the true cross, which was recovered by the Emperor Heraclius, and restored to Mount Calvary, Sep. 14, 629. The festival of the "Exaltation of the Cross," held Sep. 14, is in memory of this event. The worship of crosses was established at the Council of Nicæa in 787. In the 9th century men sang the praises of the cross, as they sang the great deeds of heroes; and Rhaban Maur, Archbishop of Mayence in 847, wrote a poem in its honour. The true cross is said to have been captured by Saladin in 1187 at the battle of Tiberias (*q. v.*). During the Middle Ages crosses were erected to mark the site of any particular event. Thus Edward I. marked the spots on which the bier of his queen, Eleanor, rested, on its way from Herdeby, in Lincoln, to Westminster, by building crosses over them. (*See* PAUL'S (ST.) CROSS, and CHARING CROSS.) Eleanor died Nov. 28, 1291, and was buried Dec. 17. Berry (Encyclopædia Heraldica, I., under "Cross") states, on the authority of Mackenzie, that during the Crusades (*q. v.*) "the Scots carried the cross of St. Andrew; the French, a cross ar.; the English, a cross or; the Germans, sa.; the Italians, az.; and, as Colombiere asserts, the Spaniards, gu.; but the red cross of St. George, the patron saint of England, has long been the standard bearing of this country." (*See* UNION JACK.)

CROSS (Maids of the).—This sisterhood was instituted in 1625, at Roye, in Picardy, by four young women, who resolved to devote themselves to the education of poor girls. In 1636 they were compelled by persecution to remove to Paris, where their society was erected into a regular order by the archbishop in 1640, and confirmed by royal letters patent in 1642.

CROSS-BOW, sometimes called ARBALIST, said by some writers to be of Sicilian, and by others of Cretan, invention. The Crusaders are supposed to have introduced the cross-bow into France, where it was used in the commencement of the reign of Louis VI. (1108—1137). Some historians allege that the arbalist was used in William the Conqueror's army at the battle of Hastings, Oct. 14, 1066. Gibbon speaks of it as employed at the battle of Dorylæum (*q. v.*), July 4, 1097. The French had arbalists at Crécy, Aug. 26, 1346. Their use was prohibited by the council of Lateran, or the 10th general council, April, 1139. Richard I. introduced them into the English army, and he was slain by an arrow from a weapon of this kind, March 26, 1199. Cross-bows mounted on wheels, and called spin-gardas, which shot not only darts or quarrels, but also stones and lighted combustibles, were used at the battle of Mons-en-Puella in 1304; and similar engines formed part of the armoury of Dover Castle in 1344. The use of the cross-bow in the English army ceased in 1515, but it was employed as a weapon of the chase much later.

CROSS-KEYS (Battle).—Gen. Fremont encountered the Confederates under Gen. "Stonewall" Jackson at this place in Virginia, Sunday, June 8, 1862. An indecisive contest ensued, in which Jackson, though forced to retreat, sustained the smallest loss.

CROSS, or STARRY CROSS (Order).—This order of ladies was founded by Eleonora de Gonzaga, wife of the Emperor Leopold I., in 1668, to commemorate the miraculous preservation from fire of a gold cross containing relics of the true cross. It was confirmed by bull of Clement IX., July 27, 1668, and by the emperor Sep. 9. (*See* BETHLEHEMITES.)

CROSSED, CROUCHED, or CRUTCHED FRIARS, also called CROSIERS, or CROZIERS.—Originally three orders of friars were thus called in England, Flanders, and Bohemia, all of whom claimed St. Cletus Pope 78—91 as the founder; and St. Cyriacus, who was Bishop of Jerusalem in 331, as the restorer of their fraternity. The rules and constitution were granted in 1169 by Pope Alexander III.; but the blue robe and silver cross, which distinguished the order in later times, were not

adopted till 1462. Theodore of Celles is said to have been the founder of the order in Flanders in 1211. The Bohemian order was founded at Prague in 1236. In 1568 Pius V. sought to restore the friars to their original sanctity of life by confirming and enlarging their privileges, but apparently with little success, as the order was finally suppressed by Pope Alexander VII. in 1656.

CROTONA (Italy).—This city was founded by a colony of Achæans B.C. 710. War having broken out between the inhabitants and the people of Sybaris, the latter were defeated in a great battle, and their city was destroyed B.C. 510. The elder Dionysius took Crotona B.C. 389, and Agathocles B.C. 299, and it afterwards fell under the power of Pyrrhus. The Romans seized it B.C. 277. A colony of Romans was sent here B.C. 194. It suffered greatly during numerous wars, and the modern town Cotrone, which occupies its site, is a place of no importance.

CROTOY (Treaty), confirming the treaties of Arras (*q. v.*) and Conflans (*q. v.*), was signed at Crotoy, in France, Oct. 3, 1472.

CROUCHED FRIARS. — (*See* CROSSED, CROUCHED, or CRUTCHED FRIARS.)

CROUP.—This disease was first described scientifically by Dr. F. Home in 1765.

CROWN.—The first mention of a king's crown is in 2 Sam. i. 10, which describes the delivery of Saul's crown and bracelet to David, B.C. 1055. At first crowns were plain fillets, bound round the head, though that taken by David from the Ammonites B.C. 1033 (2. Sam. xii. 30), which weighed one talent, or 120 lb., and was adorned with precious stones, was doubtless of a different description. Tarquinius Priscus, B.C. 616, is said to have been the first Roman king who assumed a crown; but as a similar ornament was worn by his officers and magistrates, it cannot be considered a mark of royalty. The use of the modern crown commenced, according to Selden, with Constantine I. (the Great), whose reign began in 306. Crowns were adopted by the Spanish sovereigns about 580; by the kings of Lombardy, who wore iron crowns, about 590; and by the French kings in 768. Egelbert, who became King of Kent in 786, is represented on his coins as crowned. The papal triple crown was originally a plain pointed cap. Pope Hormisdas added the first crown about 523, Boniface VIII. the second (1294—1303), and John XXII. the third 1316—1334).

CROWN (Treaty of the).—By this treaty, concluded at Vienna Nov. 16, 1700, the Emperor Leopold I. agreed to recognize the Elector Frederick III. as King of Prussia. Frederick on his part engaged to assist his ally with 10,000 men, to support Austria in the Diet, and to vote, as elector, for the descendants of the emperor's son, Joseph, King of the Romans.

CROWN AND HALF-CROWN. — Gold crowns were coined by Henry VIII. in 1527. The first commission for coining silver crowns and half-crowns was signed by Edward VI. Oct. 1, 1551.

CROWN, IRON (Order).—(*See* IRON CROWN.)

CROWN POINT (America).—Gen. Johnson defeated the French near this fort, situated on Lake Champlain, Sep. 7, 1755; and they abandoned it in July, 1759. The fort was surprised by the revolted Americans in 1775. They evacuated it Oct. 13, 1776, after the signal defeat of their squadron on Lake Champlain (*q. v.*).

CROWS AND ROOKS.—In consequence of the depredations committed by these birds, an act (24 Hen. VIII. c. 10) was passed in 1532, to compel every one, under penalty of a fine, to do his best to destroy them, and to render it incumbent on all villages and country towns to provide and maintain nets for their capture. This statute was partially repealed by 8 Eliz. c. 15 (1565).

CROXTON PARK RACES.—These annual races, celebrated in the spring at Croxton Park, in Leicestershire, a hunting seat of the Duke of Rutland, were instituted about 1816.

CROYDON (Surrey), called in Domesday Book Croinedone, was given to Lanfranc soon after the Conquest. A palace built of timber was in existence in 1278. Archbishop Parker entertained Elizabeth at the new palace of Croydon in 1575. It was converted into a factory in 1780. Archbishop Whitgift founded the hospital in 1596. The canal was commenced in 1801, and the railroad to London opened June 1, 1839.

CROYLAND, or CROWLAND (Lincolnshire).—Ethelbald, King of Mercia, founded a monastery on this island in 716. The building was completed in 726. The Danes killed the abbot and plundered the monastery in 870. It was restored by King Edred in 948. The abbey was destroyed by fire in 1091, and rebuilt in 1112. It was again burned in 1142, and restored about 1170. Croyland was suppressed with the other monasteries at the Reformation.

CROZIER, the pastoral staff of an archbishop, is distinguished by a cross, and must not be confounded with the staff of a bishop, which terminates in a shepherd's crook. The origin of the crozier is referred to the original staff of the Romans. It was adopted at a very early period in the Church's history, and is known to have been in use about 500. In the 12th century the crozier was appointed to be borne by metropolitans and patriarchs, which privilege was afterwards extended to all archbishops by Gregory IX. (1227—1241). A writer in *Notes and Queries* (ii. 313) states that a crozier was borne at the funerals of Brian Duppa of Winton, in 1662; of Juxon of London in 1663; of Frewen of York in 1664; of Wren of Ely in 1667; of Cosin of Dunelm in 1671; of Trelawney of Winton in 1721; and of Lindsay of Armagh in 1724. It is engraven on the monuments of Goodrich of Ely, 1552; of Magrath of Cashel, 1622; of Hacket of Lichfield, 1670; of Creggleton of Wells; of Lamplugh of York, 1691; of Sheldon, 1677; of Hoadley of Winton; and of Porteus of London.

CROZIERS (Order).—(*See* CROSSED, CROUCHED, or CRUTCHED FRIARS.)

CRUCIFIX.—Although the cross (*q. v.*) was held in reverence from the earliest period of Christianity, the crucifix, or effigy of the Saviour fixed thereto, was not introduced till

the close of the 7th or the commencement of the 8th century.

CRUCIFIXION, "fastening to the cross," was a mode of execution common to most nations of antiquity. The Jews are said to have practised it very early, and the death of Saul's sons, whom the Gibeonites hanged on a tree (2 Sam. xxi. 9), B.C. 1022, is instanced as a proof; but it can scarcely be considered satisfactory. It has long existed in China, was practised by the Carthaginians, and is mentioned as in use in the earliest period of Assyrian history. Amongst the Carthaginians all ranks were liable to crucifixion, but the Roman law restricted it to slaves. Christ suffered this death Friday, April 5, 30.* During the siege of Jerusalem by Titus in 70, the Romans crucified about 500 Jews daily, insomuch that Josephus declares the soldiers were unable to find wood for the crosses, or crosses for the bodies. The Emperor Constantine I. (the Great) abolished death by crucifixion in 325.

CRUELTY TO ANIMALS.—The Society for the Prevention of Cruelty to Animals was established in 1824. The laws on this subject were consolidated and amended by 5 & 6 Will. IV. c. 59 (Sep. 9, 1835), and the provisions of the act were extended to Ireland by 1 Vict. c. 66 (July 15, 1837).

CRUSADES.—These wars, for the recovery of the Holy Land from the Saracens, took place in the 11th, 12th, and 13th centuries. The first Crusade was undertaken in consequence of the appeals of Peter the Hermit, who was so shocked at the barbarous treatment experienced by Christian pilgrims to the Holy Sepulchre, that he resolved in 1093 to preach in favour of a war against the Mohammedan persecutors.

A.D.
1095. Nov. 18—28. Pope Urban II. addresses the Council of Clermont on the sanctity of the enterprise, and announces the first Crusade.
1096. During this year four abortive attempts are made to commence the Crusade by about 275,000 fanatics, nearly all of whom perish on the march. Aug. Godfrey of Bouillon sets out. (*See* JEWS.)
1097, March. Godfrey crosses the Hellespont.—May 8—June 24. Siege and capture of Nicæa, in Bithynia.—Oct. 21. Siege of Antioch.
1098, June 3. Capture and sack of Antioch.—June 28. The battle of Antioch (*q. v.*).
1099, June 7. The Christian army, in number 40,000, invests Jerusalem.—July 15. Jerusalem is taken, and the inhabitants are put to the sword.—July 23. Godfrey of Bouillon is elected King, and the first Crusade ends.—Aug. 12. Battle of Ascalon (*q. v.*).
1146, Easter. St. Bernard preaches the second Crusade, which is conducted by Louis VII. of France and Conrad III. of Germany.
1148. Defeat of the Christians at the siege of Damascus.
1149. Conrad III. and Louis VII. return to Europe. The end of the second Crusade.
1187, Oct. Jerusalem is recaptured by the infidels under Saladin. Battle of Tiberias (*q. v.*).
1188. Philip II. (Augustus) of France and Henry II. of England resolve on a third Crusade.
1189. The Emperor Frederick I. (Barbarossa) joins the enterprise.—Aug. The siege of Acre is commenced by Guy of Lusignan.
1191, March. Philip II. arrives at Acre.—June 8. Richard I. arrives at Acre.—July 12. Capture of Acre.
1192, Oct. 25. End of the third Crusade, and departure of Richard I. for England.

* Clinton (Fasti Romani ii. 243) makes it April 15, 29; Hales gives the year 31; and Usher, Blair, Du Fresnoy, &c., 33.

A.D.
1195. Henry VI. of Germany undertakes the fourth Crusade, at the instigation of Pope Cœlestine III.
1197. The Crusade is abandoned, in consequence of the death of the emperor.
1199. Innocent III. commissions Fulk of Neuilly to preach the fifth Crusade.
1202. Boniface, Marquis of Montferrat, undertakes the command of the expedition, which sets out soon after Easter.—Nov. Capture of Zara (*q. v.*).
1203, June 25—July 18. Siege and capture of Constantinople, and end of the fifth Crusade.
1216. The Germans and Hungarians commence the sixth Crusade.
1218, May. The Crusaders besiege Damietta (*q. v.*).
1228, Aug. The Emperor Frederick II. sails from Brundisium, and arrives at Acre.
1229, Feb. 20. A truce is agreed upon between Frederick II. and the Sultan, for 10 years and 40 days, and Jerusalem is restored to the Christians.
1238. The Turks seize Jerusalem.
1239. Thibaud, Count of Champagne, commences the seventh Crusade.
1241. Richard, Earl of Cornwall, ransoms Jerusalem, and obtains a nominal surrender of Palestine for the Christians.
1244. Jerusalem is besieged and taken by the Carismians (*q. v.*).
1245. The eighth Crusade is determined on by the Council of Lyons.
1248, Aug. Louis IX. of France sets out as leader of the Crusade.
1250. Louis IX. is made prisoner at Mansurah (*q. v.*).—June. He is ransomed, and a ten-years truce is agreed upon.
1254, April. Louis IX. returns to France.
1268. Louis IX. and Edward, Prince of Wales, resolve to undertake a ninth Crusade.
1270. Departure of Louis IX. Aug. 25. Louis IX. dies of the plague at Carthage.
1271, April. Prince Edward arrives at Acre.
1272, July. The English quit Palestine.
1291, May 18. The Mamelukes take Acre, thereby destroying all Christian power in Syria.

CRUSTUMERIUM (Italy), also called Crustumeria or Crustumium, was one of the Latin cities that took up arms against Romulus, to avenge the rape of the Sabine women, B.C. 740. After several conflicts, it was reduced to subjection to Rome, B.C. 499.

CRUTCHED FRIARS. — (*See* CROSSED, CROUCHED, or CRUTCHED FRIARS.)

CRUZADO.—Alphonso V. of Portugal first struck this gold coin, bearing the impression of a cross, about 1457, when Callixtus III. ordered a crusade against the infidels.

CRYOLITE.—(*See* ALUMINIUM.)

CRYOPHORUS.—This instrument, the frost-bearer, or carrier of cold, for freezing water by its own evaporation, was invented by Dr. Wollaston. The "Philosophical Transactions" for 1813 (p. 73) contain Dr. Wollaston's account of the invention.

CRYPTOGRAPHY, or the art of secret writing, was practised at a very early period. (*See* CIPHER.)

CRYSTAL GLASS or STONE, or MAGIC MIRROR.—An old writer, on the authority of Pliny (A.D. 23—79), states that Pyrrhus, King of Epirus (B.C. 295—272) possessed a precious stone in which "(without any helpe, invention or arte of man) was naturally discerned the figures of nine goddesses, and a young naked child standing by them; so that they were censured, by grave opinion, to bee the portraits of the nine Muses and Apollo." Similar crystals, or magic mirrors, formed part of the stock in trade of the necromancers of the Middle Ages. Thus a priest was imprisoned in

the reign of Henry VIII. (1509—1547) for "consecrating of a christal stone wherein a chylde shall lokke, and se many thynga." Rules for such consecration are given in Barrett's "Magus," published in 1801. Lieut. Morrison, proprietor of Zadkiel's Almanack, obtained a verdict and 20*l.* damages against Admiral Sir Edward Belcher for libel in charging him with the exhibition for money of a similar magic crystal, June, 1863.

CRYSTAL PALACE (Hyde Park).—(*See* GREAT EXHIBITION.)

CRYSTAL PALACE (Sydenham).—At the close of the Great Exhibition of 1851, a company was formed, in order to purchase the materials of the building, and to re-erect them on another site. This was registered as the Crystal Palace Company, May 17, 1852. Penge Park and the adjacent property, amounting to 200 acres, were soon after purchased.

A.D.
1852, Aug. 5. Mr. Laing, M.P., erects the first column of the new building.
1853, Aug. 15. Twelve workmen are killed by the fall of a scaffold.—Dec. 31. Mr. Waterhouse Hawkins gives a dinner to 24 scientific men in the body of his model iguanodon.
1854, Feb. 28. The directors announce the intended opening of the Palace in May.—June 10. The Palace is opened by the Queen.—Oct. 28. Military musical fête in aid of the Patriotic Fund.
1855, April 20. Visit of the Emperor and Empress of the French.—Dec. 13. Extraordinary general meeting of the shareholders, who complain of the management.
1856, June 18. First complete display of the waterworks.—Nov. 1. Robson is sentenced to 20 years' transportation for forgery and fraud on the Crystal Palace Company, to the amount of £28,000.
1857, June 15, 17, and 19. Preliminary performances take place in preparation for the Handel festival.—Sep. 2. Tonic Sol-Fa concert, by 3,000 children.
1858, July 2. Second rehearsal for the Handel festival.
1859, Jan. 25. The centenary of the birth of Robert Burns is celebrated, and Miss Isa Craig obtains the prize for the best poem upon the subject.—June 20, 22, and 24. Handel commemoration, or festival (*q. v.*).—Nov. 10. Celebration of the Schiller centenary festival.
1860, May 4. A statue of Mendelssohn is inaugurated by torchlight.—June 25, &c. Concerts by 3,000 Orphéonistes.—July 9. Distribution of prizes to volunteers for proficiency in rifle-shooting.—July 10. Competition of 115 English brass bands.
1861, Feb. 20 and 21. The north wing of the building is blown down.—May 26. The Palace is opened to shareholders and their friends on Sunday.—June 1. First appearance of Blondin.
1864, April 16. Gen. Garibaldi and his son Menotti visit the Palace, and are presented with swords by the Italian committee.—Aug. A model pneumatic railway is established in the grounds.
1865. An Anglo-French Working-Class Exhibition is held. (*See* HANDEL COMMEMORATIONS.)

CTESIPHON (Assyria).—The date of the foundation of this city, also called Al Madain or Madyn, on the eastern bank of the Tigris, and only a short distance from Seleucia, has not been ascertained. It was the favourite winter residence of the Parthian monarchs, was taken by Trajan in 116, and was sacked by the Romans in 161. The Emperor Severus took it by assault in 198, and carried off 100,000 captives. The Persians, defeated by the Emperor Julian, in June, 363, took refuge in Ctesiphon; but the emperor would not undertake the siege. Omar sacked it in March, 637; and from this blow it never recovered. (*See* CUFA.)

CUBA (Atlantic).—This, the largest of the Antilles or West Indian islands, was discovered by Christopher Columbus, Oct. 28, 1492. It was named Juana, then Fernandina, and afterwards Santiago. The natives called it Cuba, which name has since come into general use. Columbus returned to the island April 29, 1494, and again in 1502. The first Spanish settlement was formed in 1511, and the conquest was completed by Velasquez in 1512. The colonists carried on continual war with the aboriginal inhabitants, who were almost exterminated by 1560. The cultivation of tobacco and the sugar-cane was introduced about 1580. Nearly the whole of the island was captured by the English, who landed June 7, 1762; but it was restored to the Spaniards by the 10th article of the treaty of Paris, concluded Feb. 10, 1763. Gen. Lopez, having, in spite of prohibitions from the government of the United States, invaded Cuba at the head of an expedition of American filibusters May 17, 1850, and Aug. 12, 1851, was captured by the Spanish authorities, and executed at Havannah Sep. 1, 1851. (*See* HAVANNAH, UNITED STATES, &c.)

CUBAN, or KUBAN (Russia).—The territory on the banks of the river Cuban was recognized as independent by the Russians and Turks in 1774, but in 1783 the Empress Catherine II. and Prince Potemkin added it to the Russian empire.

CUBIT, the first measure of which we have any record. Noah was ordered to make the length of the ark 300 cubits, its breadth 50, and the height 30, B.C. 2469 (Gen. vi. 15). Authorities are divided respecting the length of the cubit, which was probably about 20 inches.

CUCKING-STOOL, or TUMBREL, an instrument invented for the punishment of scolds, by ducking them in the water, was in use in this country at a very early period. The churchwardens' and chamberlains' accounts at Kingston-upon-Thames for 1572 contain the following:—

	s.	*d.*
The making of the cucking-stool	8	0
Ironwork for the same	3	0
Timber for the same.....	7	6
Three brasses for the same and three wheels	4	10

The punishment was administered in this town in April, 1745. The newspaper of the time thus chronicles the event: "Last week a woman that keeps the Queen's Head alehouse, at Kingston, in Surrey, was ordered by the court to be ducked for scolding, and was accordingly placed in the chair, and ducked in the river Thames, under Kingston Bridge, in the presence of two or three thousand people." Another woman was punished in the same manner at this place as late as 1801.

CUCUMBER.—The Greeks and Romans pickled the cucumber. It is said to have been common in England in the time of Edward III. (1327—1377), and having gone out of culture during the wars of the Roses, was reintroduced in the reign of Henry VIII. (1509—1547).

CUDDALORE (Hindostan).—This seaport

town on the coast of Coromandel was ceded by its native prince to the East India Company in 1681. They built a factory, which was extended and fortified in 1702. The French, who took it in 1758, and abandoned it on the approach of Coote in 1760, assisted by Hyder, captured it April 4, 1782. The English failed in an attempt to retake it in 1783, but it was restored to them by treaty, March 11, 1784.

CUFA (Assyria).—"The name of Cufa," says Gibbon (ch. li.), "describes a habitation of reeds and earth." It was founded by Omar I., after the sack of Ctesiphon (*q. v.*) in 637, and in its construction the ruins of that city were employed. It revolted against Othman in 656, and Ali died Jan. 21, 661, from a wound received two days before in the mosque of Cufa. (*See* CADESIA.)

CUIRASS.—This defence for the breast and back was used by the Egyptians, Persians, Greeks, and Romans, though its form was, of course, subject to many modifications. Its modern name is derived from the French *cuir* or Latin *corium*, both of which signify leather, because that was the material usually employed. Subsequently, rings and scales were added, and at length the cuirass was formed of solid plates of iron and brass, which protected the body, from the neck to the girdle. It became general during the reign of Edward III. (1327—1377). Its use was revived in the English army in 1820.

CUIRASSIER.—Capt. Cruso ("Militarie Instructions for the Cavalerie," 1632) says:—"This sort of Cavallrie is of late invention, namely by the Germanes." Cuirassiers also formed part of the French army, and were retained when it was reorganized in 1791.

CULDEES, or KELDEES.—The name given to the members of a religious order, established in England, Ireland, and Scotland, in the early ages of the Church. The origin of the Culdees is assigned to the 5th century, and St. Patrick, whose mission to Ireland occurred in 432, is said to have been one. Columba, the apostle of the Picts, who landed in Scotland in 562, is also said to have been a Culdee; and the same sect includes Columbanus, who introduced Christianity to the Burgundians, Franks, and Swiss, in 590. The Culdees, who did not acknowledge the papal supremacy, possessed several seats of learning in Scotland. That of Melrose, which was one of the chief, was burned by the Danes in 850. St. Andrew's was so renowned, that King Constantine III. spent the last years of his life there, and died there in 945. The Culdees existed at Bardsey, on the coast of Caernarvon, as late as 1188, and at Iona until 1203. They flourished at Dunkeld until 1127, when King David I. converted their monastery into a cathedral, and took measures for their suppression.

CULLODEN (Battle).—The Duke of Cumberland defeated the Pretender Charles Edward at Culloden or Drummossie Moor, near Inverness (O.S.), April 16, 1746. This victory entirely crushed the rebellion.

CULM, or KULM (Battle).—A battle was fought between the allied Austrians, Prussians, and Russians, and the French, near Culm, in Prussia, Aug. 29 and 30, 1813. The French, who were defeated, lost, in the two days, 18,000 men, whilst the loss of the allies did not exceed 5,000. Sixty pieces of cannon, two eagles, and 300 ammunition waggons, were captured from the French.

CULROSS (Scotland).—This ancient town of Perthshire, the birthplace (circ. 500) of St. Kentigern or Mungo, was the seat in the 6th century of the monastery of St. Serf, who afterwards became the patron saint of the town. A Cistercian abbey was founded in 1217, and Culross Abbey, a seat of the Bruce family, erected late in the 16th, was restored about the middle of the 17th century, and about the end of the 18th became the residence of the ninth Earl of Dundonald. Coal mines were worked here from the reign of James VI. (1567—1625) to the beginning of the present century.

CULVERIN.—A culverin of 4 lb. calibre was made by the Moors in 1132, and called Salamonica; and portable bombards, to which the name of culverins was afterwards given, were constructed in France in 1382. Several instruments of a similar kind were employed at the battle of Tongres in 1468. Hand culverins were introduced about 1440.

CUMÆ (Italy).—This, the earliest Greek colony in Italy, is said by some authorities to have been founded B.C. 1050. From about B.C. 700 to B.C. 450, it enjoyed the highest prosperity. It resisted an invasion of the Etruscans B.C. 522. Aristodemus obtained the supremacy B.C. 505, and was expelled by the nobles after he had exercised it about 20 years. Tarquinius Superbus, the exiled King of Rome, sought refuge at Cumæ B.C. 496. Hiero I., Tyrant of Syracuse, came to the aid of the Cumæans, and defeated the Carthaginian and Tyrrhenian fleet B.C. 474. The Samnites captured Cumæ B.C. 420, put the male inhabitants to death, and established a colony. It was admitted to the Roman franchise B.C. 338. Sylla retired to the neighbourhood of Cumæ after his abdication, B.C. 79. Narses captured the town after a long siege in 553. It was destroyed by an earthquake in 1538. Cumæ was also celebrated as the abode of the fabled Sibyl, and for a long time her supposed cave was shown to visitors. Justin Martyr saw it in the middle of the 2nd century. Cumæ was for some time the seat of a bishop.

CUMÆ (Sea-fight).—Menecrates, Admiral of Sextus Pompeius, defeated the fleet of Octavius in the bay of Cumæ, B.C. 38.

CUMANA (Venezuela), the capital of a province of the same name in Venezuela, is the oldest city founded by Europeans in South America. Diego Castellon commenced it in 1523, and called it New Toledo. It was almost entirely destroyed by an earthquake in 1766. The inhabitants joined in the revolt against Spain, April 19, 1810. It was almost destroyed by an earthquake in 1853.

CUMBERLAND (England) is said to owe its name to the Cimbri or Cumbri, its aboriginal inhabitants. In 945, Edmund I., King of England, gave it to Malcolm I., of Scotland, on condition that the latter should assist him in his endeavours to repel hostile invasions, and in 1032

this arrangement was confirmed by Canute. At the period of the Conquest, Malcolm III. aided the northern rebels in their opposition to Norman tyranny; in consequence of which, William I. led an army against him in 1072, and added Cumberland to his own territories, giving Malcolm some English towns as a compensation. The county remained an object of contention between the two kingdoms for some time, and was ravaged by the Scotch in 1091 and in 1135; on the latter occasion Stephen resigned his claim. Henry II. recovered it in 1157. Cumberland was finally annexed to England in 1237. The Border service was instituted by Edward I. in 1296, when Robert de Clifford was made Lord Warden of the Marches, and appointed to guard the country against Scotch invasion, and to decide disputes between the people of both kingdoms. Edward Bruce ravaged Cumberland in 1315, and in 1322 his brother Robert also entered the county, whence he returned with immense booty; and for a long period the whole border territory was the scene of continual marauding incursions.

CUMBERLAND GAP (N. America).—This pass, separating Kentucky and Tennessee, and important as commanding those states and the line of communication between Richmond and northern Alabama and the towns on the Mississippi, was seized by the Confederates early in the American civil war. It was evacuated by them about June 10, 1862, and occupied by the Federals, who were compelled to abandon it Sep. 17. Gen. Shackelford, who commenced operations against it Sep. 4, 1863, invested it Sep. 7, but its surrender was refused by Gen. Frazier, who delivered it, however, to Gen. Burnside, Sep. 9.

CUMBERLAND PRESBYTERIANS.—This sect originated at Cumberland, in Kentucky, North America, in 1810, in a dispute between the presbytery of that town and the Kentucky synod of the Presbyterian Church in America, relative to the admission to the ministry of persons, who, not having received the usual education, were nevertheless deemed by the presbytery to be required as preachers. They hold the doctrine of universal redemption, and deny the predestination of sin.

CUNAXA (Battle).—Cyrus the Younger was defeated and slain by his brother Artaxerxes II. (Mnemon), King of Persia, at this place, in Upper Asia, B.C. 401.

CUNEIFORM INSCRIPTIONS.—The cuneiform, wedge-shaped, or arrow-headed character, used for monumental records, and read from right to left, "arose," according to Rawlinson (Ancient Monarchies i. 83), "when clay took the place of stone as a material. A small tool, with a square or triangular point, impressed, by a series of distinct touches, the outline of the old pictured objects on the soft clay of tablets and bricks." The earliest inscription yet deciphered is one of Urukh, King of Chaldæa, who reigned from B.C. 2093 to B.C. 2070. From this date they are found written in three alphabets or languages, viz. the Assyrian, the Median or Scythic, and the Persian, till about the time of Alexander III. (the Great) B.C. 336—323. Garcia de Sylva Figuëroa, Persian ambassador of Philip III. of Spain, was the first modern who suggested, in 1618, that these inscriptions were probably records traced in some ancient and lost language. Sir John Chardin, in 1674, published three groups of cuneiforms, copied at Persepolis, which he declared to be writing, adding, "the rest, however, will always be unknown." Karsten Niebuhr, in a narrative of his eastern travels, published between 1772 and 1778, first proved the existence of three cuneiform alphabets; and Dr. Grotefend of Hanover laid the first cuneiform alphabet, with its modern European equivalents, before the Academy of Gottingen, Sep. 7, 1802. Sir H. Rawlinson, writing in 1851 of the Assyrian records, published a list of 246, or, including variants, 366 characters, as occurring in the inscriptions known to him. M. Oppert, in 1858, gave 318 forms as those "most in use" (Rawlinson i. 337).

CUNERSDORF, or KUNNERSDORF (Battle).—Frederick II. of Prussia attacked the allied Austrian and Russian army at this place, near Frankfort, on the Oder, Aug. 12, 1759. The Prussians were at first successful, and a messenger was sent to Berlin, with the following message to the queen:—"Madam, we have driven the Russians from their entrenchments. In two hours expect to hear of a glorious victory." Their opponents, however, renewed the contest with great vigour, and the king was compelled to order a retreat, having lost 30,000 men in killed and wounded, and 200 pieces of artillery.

CUPOLA or TURRET SHIPS.—Capt. Colea, R.N., having been struck by the success of the *Lady Nancy* raft, which carried a 32-pounder, and was used with great effect in the sea of Azof during the Crimean war, directed his attention towards the invention of an iron dome or hemispherical shield to protect the men working guns placed on similar rafts. His designs were favourably noticed by a committee of investigation in Nov., 1855, and, having made fresh experiments and plans, he introduced his views to the public in a lecture delivered before the Royal United Service Institution, June 29, 1860. In 1861 experiments made by government on a cupola erected on the *Trusty*, resulted in establishing the superiority of the new system, which was that used, with some modifications, in the Federal steam raft *Monitor*, which defeated the Confederate *Merrimac*, March 9, 1862.

CURAÇOA (Atlantic).—The Spaniards formed a settlement on this island, one of the Antilles, in 1527. It was taken by the Dutch in 1634. The inhabitants having claimed the protection of England, the island and its dependencies surrendered to an English squadron Sep. 13, 1800. The island, restored by the 3rd article of the treaty of Amiens, March 25, 1802, was, on the renewal of the war, again captured by a British squadron, Jan. 1, 1807. By the treaty concluded in London, Aug. 13, 1814, it was restored to the Dutch, in whose possession it has since remained.

CURATE.—Simon Islip, Archbishop of Canterbury (1349—1366), fixed the yearly salary of a curate at six marks, or £4, which was increased to eight marks or £5 6s. 8d. by Archbishop Sudbury, in 1378. Perpetual curacies

were originated by 4 Hen. IV. c. 12 (1402), which enacted that "in every church appropriated there shall be a secular person ordained vicar perpetual." Curates were first required to be examined and admitted by the ordinary by the canons of 1604, and by 12 Anne, stat. 2 c. 12 (1713), the bishop's licence was declared necessary before they could serve a cure in the absence of the rector. This act, which provided for the salaries of curates, was, with 36 Geo. III. c. 83 (May 14, 1796), and 53 Geo. III. c. 149 (July 20, 1813), relating to the same subject, repealed by 57 Geo. III. c. 99 (July 10, 1817). This was amended by 1 & 2 Vict. c. 106 (Aug. 14, 1838), and by 2 & 3 Vict. c. 49 (Aug. 17, 1839). (*See* QUEEN ANNE'S BOUNTY.)

CURFEW BELL.—The Couvre-feu, or Curfew, was a signal for putting out fires and lights. William I. is said to have introduced it into England in 1068, although it is probable that he only enforced a regulation previously in existence, as a similar custom at that time prevailed in Italy, France, Spain, and other countries. The severity, however, with which William I. enforced it, compelling the people to extinguish both fires and lights when the curfew-bell rang at eight in the evening, caused the introduction of the custom to be attributed to him. In those early times, the fire was generally made in a hole in the middle of the floor, the smoke escaping through an aperture in the roof. When the bell tolled the wood and embers were raked together and the fire was extinguished. The custom was modified by Henry I. in 1103. The Liber Albus contains regulations of the city of London, passed during the reigns of Edward I. and Edward III., by which persons were forbidden to wander about the city armed, after curfew. The practice of ringing the bell at eight o'clock is still kept up in many places in England.

CURIA MURIA ISLANDS (Indian Ocean), on the south coast of Arabia, were visited by Portuguese missionaries in 1588; at which time the population, only one of them being inhabited, consisted of a few savages, who subsisted on fish, which they dried in the sun. In 1819 they were invaded by the Wahabees, who destroyed their houses, killed their goats, and sold some of their children to slavery. The islands, five in number, were explored and described by Dr. Hulton in 1836. They are also called the Kooria Mooria Islands.

CURIA REGIS. (*See* KING'S COURT.)

CURIATII.—(*See* ALBA LONGA and HORATII AND CURIATII.)

CURLING.—This game is said to have been introduced into Scotland by the Flemish emigrants, at the commencement of the 16th century.

CURRANTS, or "raisins de Corinthe," were first introduced into this country in the 16th century, when they were called "Corinthes," from the part of Greece in which they are produced in the greatest abundance. An attempt was made in the reign of Henry VIII. to introduce the culture of this particular vine in England. The duty on currants, which was very high, was reduced in 1834, and by 7 Vict. c. 6 (June 6, 1844).

CURRANT-TREE was first planted in England in 1533. The hawthorn currant-tree was introduced from Canada in 1705.

CURRIERS.—(*See* LEATHER.)

CURSE OF SCOTLAND.—The reason why the nine of diamonds is called the curse of Scotland has been discussed in *Notes and Queries*. Amongst the reasons assigned are the following:—Because the Duke of Cumberland, after the battle of Culloden, April 16, 1746, wrote upon the back of this card a very cruel and inhuman order for the destruction of the persons and property of the rebels. Because the armorial bearings of the Earl of Stair, who was very unpopular in Scotland, on account of the part he took in promoting the Union in 1707, were so arranged as to resemble the nine of diamonds. Because "curse of Scotland" is a corruption of "cross of Scotland," the allusion being to St. Andrew's cross, which is supposed to resemble the nine of diamonds. Because diamonds imply royalty, being ornaments to the imperial crown; and every ninth king of Scotland has been a tyrant and a curse to his country. Because the heraldic bearings of the Dalrymple family are, on a saltire azure, *nine lozenges of the field*; the second Viscount Dalrymple and first Earl of Stair being called the curse of Scotland, from the part he took in the massacre of Glencoe in 1692. Because it is the great winning card at cornette, a game introduced into Scotland in 1538, by the French attendants of Mary of Lorraine, queen of James V., to the ruin of many Scotch families. Because the nine of diamonds is the pope in the game of Pope Joan, originally called Pope Julio, and said to have been played as early as the time of Queen Elizabeth. The latter explanation, from the anti-papal spirit displayed by the Scottish people, is believed to be the true one.

CURSITOR BARON.—Although the functions of this officer originated at the same time as the Exchequer, they did not give rise to a separate dignity till the reign of James I. The first mention of baron-cursitor occurs July 8, 1606, when Nowell Sotherton received the title. By 3 & 4 Will. IV. c. 99 (Aug. 29, 1833), many of the duties of this office were abolished, and it was suppressed by 19 & 20 Vict. c. 86 (July 29, 1856).

CURSUS.—(*See* BREVIARY.)

CURTAIN THEATRE (London), mentioned in 1577, was occupied in 1622 by the servants of Charles, Prince of Wales. In 1678, Aubrey described it as "a kind of nursery or obscure playhouse, called the Greene Curtain, situate in the suburbs towards Shoreditch." It was afterwards used for exhibitions of pugilism.

CURTATONE (Battle).—The Austrians, after a severely contested action, defeated the Italian army at this village, between Mantua and Vicenza, May 29, 1848.

CURZOLA (Adriatic), the ancient Corcyra Nigra, so called from the dark colour of the pines that grow upon it, is said to have been colonized by the Cnidians. It was seized, in 997, by the Venetians, under the Doge Pietro Orseolo II., and in 1298 the Genoese

defeated a Venetian fleet in its vicinity. In 1420 it was retaken by the Venetians, and incorporated with the province of Venetian Dalmatia; and in 1485 it resisted the attempts of Ferdinand II. of Aragon for its capture. The Turkish corsair Uluz-Ali attacked Curzola in 1571, and the governor and garrison having fled, the women put on armour, and saved the place from pillage. The Russians twice seized Curzola in 1806. It was ceded to France by the treaty of Tilsit, July 7, 1807. The English obtained possession in 1813, and retained it till its cession to the Austrians, July 15, 1815.

CUSHEE PIECES were invented by Richard Leake, who was born in 1629, fought in the great sea-fight against Van Tromp in 1673, and died in 1696. Leake held the position of master-gunner of England and storekeeper of Woolwich.

CUSHION-DANCE, also called Joan Sanderson, is a very old round dance. According to Fosbroke, in most ancient dances a man and a woman danced together, holding each other by the hand or arm, and a kiss was the established fee of the lady's partner. One of the characters in Heywood's play of "A Woman killed with Kindness" (1600), remarks, "I have, ere now, deserved a cushion; call for the cushion-dance." Playford's "Dancing-Master," published in 1698, contains a description of this dance, usually introduced at weddings.

CUSTOM-HOUSE (London).—The business of the Customs was transacted at Billingsgate in 979, but no building was especially devoted to this purpose till 1365. In 1559 a larger house was erected, which was destroyed during the Great Fire of 1666: and the new edifice, built by Sir Christopher Wren in 1668, was also burned, in 1718. It was rebuilt by Ripley soon after, and shared the fate of its predecessors, Feb. 12, 1814. The first stone of a new custom-house had been laid in 1813, as the former building was found inadequate to the requirements of the times, and this was opened May 12, 1817. In 1825, owing to the defective manner in which the foundations had been laid, part of the new building fell in, when the whole central portion was taken down and restored.——The custom-house of Dublin was completed in July, 1621, and rebuilt before 1661. In 1707 a new building was erected; but as this was found to be unsafe in 1773, another was commenced in 1781, and completed in 1791. A dreadful fire, which broke out in the sugar and spirit stores, Aug. 10, 1833, destroyed 700 puncheons of spirit, 300 casks of tallow, and nearly 5,000 hogsheads of sugar.

CUSTOMS were paid on vessels and goods at Billingsgate, during the reign of Ethelred II. (978—1016). They were granted to the king in 1274, by 3 Edw. I.; and in 1282, the duty of collecting them was intrusted to foreigners. Queen Elizabeth farmed them to Sir Thomas Smith, receiving at first £14,000, which sum was raised, in 1590, to £42,000, and afterwards to £50,000. In 1666, Charles II. farmed them for £390,000. In 1787 they were regulated by the Customs Consolidation Act (27 Geo. III. c. 13), which has been since amended, by 16 & 17 Vict. c. 107 (Aug. 20, 1853), and 18 and 19 Vict. cc. 96 & 97 (Aug. 14, 1855).

CUSTOS BREVIUM.—This office, in the court of King's or Queen's Bench and in the court of Common Pleas, was abolished by 1 Will. IV. c. 58 (July 23, 1830).

CUSTOS ROTULORUM, or Keeper of the Rolls or records of the session of the peace, was ordered to be appointed under the sign manual, by 37 Hen. VIII. c. 1 (1545), and 1 Will. & Mary c. 21 (1689).

CUSTOZA (Battle).—Marshal Radetsky defeated the Italians at this place, near Mantua, July 23, 1848.

CÜSTRIN.—(*See* KÜSTRIN.)

CUTCH, or KUTCH (Hindostan), was an independent state in 1582, and held possessions in Scinde and other neighbouring territories, all of which were lost by Rao Lacka, who succeeded to power in 1751. Futteh Mohammed, the general of the army, expelled the reigning prince in 1792, and was himself overthrown in 1802; after which Cutch became notorious as the seat of hordes of robbers, who were a source of constant annoyance to the adjoining provinces. Consequently, the East India Company interfered in 1809, and compelled the government of Cutch to promise that the offences complained of should be discontinued. In 1815 it became necessary to enforce this agreement by an appeal to arms; and the result was, that another more stringent treaty was entered into Jan. 16, 1816. In 1819 the Rao was dethroned for misgovernment, and a regency was appointed until his infant heir should be able to rule. A commercial treaty was concluded with England Oct. 13, 1819. Cutch suffered from an earthquake in July, 1819. Another commercial treaty was concluded May 21, 1822. A secret but extensive trade in slave children was discovered and suppressed by treaty Feb. 6, 1836; and other improvements, such as the abolition of suttceism and infanticide, have also resulted from British intercourse.

CUTLERY.—The manufacture of cutlery is an art of great antiquity. The precise period at which it was introduced into Great Britain is not known. Sheffield was famous for its steel manufactures in the 13th century, as Chaucer speaks of the "Sheffield thwytel" as a common article. Henry V. incorporated the London cutlers in 1417. The Sheffield artisans did not receive their charter till 1624. By s. 1 of 59 Geo. III. c. 7 (March 23, 1819), makers of wrought-steel cutlery obtained the privilege of marking them with the figure of a hammer; and by sec. 5, a penalty of £10 per dozen was imposed on all vendors of cutlery falsely stamped "London made."

CUTTACK (Hindostan).—The Mohammedan writers, about 1212, mention this country under the name of Jagepore. It was conquered and annexed to Bengal in 1592. The Mahrattas obtained possession of it in 1751, and it was ceded to the East India Company by the second article of the treaty of Deognum, Dec. 17, 1803. The capital of the district, also called Cuttack, or Royal Residence, sustained a celebrated siege in 1592. It was captured by the East India Company's army Oct. 14, 1803.

CUXAR (Spain). — This strongly fortified post, near Baza, was taken from the Moors by the Spaniards in 1489.

CUXHAVEN (Germany).—This seaport town, belonging to Hamburg, was occupied by the Prussians in 1800. The French took possession in 1804, and evacuated it in 1813, when it was occupied by a British force.

CUZCO (Peru), the capital of the Incas, said to have been founded by Manco Capac, in the 10th or 11th century, was entered by Pizarro Nov. 15, 1533. The siege of Cuzco commenced early in Feb., 1536, when the city, having caught fire in several places, was nearly consumed. The Peruvian army waged the conflict for more than five months, and withdrew in Aug. Prescott says: "It stood in a beautiful valley on an elevated region of the plateau, which, among the Alps, would have been buried in eternal snows, but which within the tropics enjoyed a genial and salubrious temperature. It was, moreover, the 'Holy City;' and the great temple of the Sun, to which pilgrims resorted from the furthest borders of the empire, was the most magnificent structure in the New World, and unsurpassed, probably, in the costliness of its decorations, by any building in the Old."

CYANOGEN is a gaseous compound, discovered by Gay-Lussac in 1815.

CYBELE, or RHEA.—The worship of this goddess, "the great Idæan mother of the gods," which originated at a very early period in Crete, where, according to tradition, she had given birth to Zeus or Jupiter, extended thence to Athens and over the entire eastern world, of which she became the chief divinity. Her image was brought from Pessinus to Rome, about the end of the second Punic War, B.C. 202, and her worship appears to have been naturalized in the empire about the time of Domitian (81—96). Julian the Apostate (361—363) delivered an oration in her honour.

CYCLADES (Ægean Sea).—This group of 12 islands received this name because they lay in a circle around Delos, the smallest of them. Artemidorus increased the number to 15. Originally inhabited by Carians, who were expelled by Minos, they were afterwards colonized by Ionians and Dorians. The Cyclades passed from Turkish rule, and were included in the new kingdom of Greece, formed in 1829.

CYCLE.—The Chinese cycle of 60 years, or 720 revolutions of the moon, was instituted by Hoang-ti, who flourished about 2660 B.C.; and that of Cleostratus, who proposed a cycle of eight years, began about 532 B.C. The Metonic cycle was invented by Meton of Athens B.C. 432, and was superseded by that of Calippus, which commenced B.C. 330.

CYCLONE.—Mr. W. C. Redfield in 1831, and Lieut.-Col. (afterwards Sir William) Reid in 1838, suggested that gales, like hurricanes and whirlwinds, possessed a rotatory action. (*See* CALCUTTA, STORMS, &c.)

CYDER is said to have been first made in Africa, and introduced by the Carthaginians into Spain, whence it passed into Normandy. In addition to the hereditary duty on cyder granted by 12 Charles II. c. 23, s. 4 (1660), a duty of 4*s.* per hogshead was levied by 13 Will. III. c. 5, s. 5 (1701), upon all cyder and perry made in England. A duty of £4 per tun on all cyder and perry imported from foreign countries was imposed by 5 Will. & Mary, c. 7, s. 27 (1694), and continued for 95 years by 4 Anne c. 6, s. 11 (1705). The duties, having undergone various modifications, were repealed by 1 Will. IV. c. 51 (July 16, 1830) from Oct. 10, 1830.

CYMBALS, very similar in form to those of the present day, were used by the ancient Egyptians, Assyrians, and Hebrews. They were also common in Greece, and were introduced by the Etruscans into Rome, where they were used in religious festivals.

CYMRI, CYMRY, or KYMRY.—These ancient inhabitants of Britain, possessing a common origin with the Cimmerii (*q. v.*) and Cimbri (*q. v.*), are supposed to have come into Britain from Asia, at a very early period, under Hu the Mighty, a descendant of Gomer, the son of Japheth. Finding it unoccupied they took possession, and after 150 years a second great chief brought the whole island under one form of government. From the name of this people Wales obtained its Latin title of Cambria.

CYNICS.—These philosophers received this name on account of their snarling disposition, or from the Cynosarges, a gymnasium in the suburbs of Athens, in which their founder Antisthenes, born B.C. 420, used to lecture. Diogenes (B.C. 412—B.C. 323) was one of the most celebrated of this sect. They were sometimes called the School of Barkers.

CYNOSCEPHALÆ (Battles).—Two battles were fought on the hill of Cynoscephalæ, the Dog's Heads, near Scotussa, in Thessaly; the first, B.C. 364, between the Thebans and Alexander of Pheræ, when the former were victorious, though Pelopidas, their leader, was slain.——The second, in which the Roman consul Flamininus defeated Philip V. of Macedon, was fought B.C. 197.

CYNOSSEMA (Sea-fight).—The Athenians defeated Mindarus and the Spartan fleet, off Cynossema, or the Dog's Monument, a mound supposed to mark the tomb of Hecuba, said to have been transformed into a dog, on the coast of Caria, B.C. 411.

CYPRESS, said to be the Tezzah of Scripture, is remarkable for its durability; and on this account was used for statues of the gods and cases of mummies. The gates of St. Peter, at Rome, made of this wood, lasted 1,100 years. It was used for coffins. The common cypress is known to have been cultivated in England as early as 1551, and was probably introduced from Canada about 1548. The deciduous cypress was brought into this country from North America about 1640, and the cedar of Goa in 1683. A common age for the cypress on the American continent is 400 years.

CYPRUS (Knights of).—The order of the Sword, in Cyprus, was instituted by Guy de Lusignan towards the end of the 12th century. It numbered 300 barons, and became extinct when the Turks took Cyprus in 1570.

CYPRUS (Mediterranean). — This island,

which was colonized by the Phœnicians at a very early period, passed successively under the supremacy of the Syrians, the Greeks, the Egyptians, and the Persians. On the death of Alexander III. (the Great), it was incorporated with Egypt. It was made a Roman province B.C. 58. Cæsar gave it to Arsinoë and Ptolemy, the sister and brother of Cleopatra, B.C. 47. It was made an imperial province B.C. 27, but was given up to the senate B.C. 22. Paul and Barnabas visited the island A.D. 44 (Acts xiii. 4). The island was an independent province of the early Church, and was divided into 13, or, according to some authorities, 15 dioceses. The Jews of Cyprus rebelled during the reign of Hadrian (117—138), and massacred above 200,000 of the inhabitants. A council was held in Cyprus in 399. The Saracens took possession of the island in 648, but soon after retired. Haroun al Rashid captured it about 803, and John Zimisces expelled the Saracens in 964. Richard I. of England wrested the island from Isaac Comnenus in 1191, and at first ceded it to the Templars; but in 1192 bestowed it upon Guy de Lusignan. Cyprus was reduced to subjection by the Genoese in 1373, and fell under the power of the Venetians in the 15th century. Selim II. took it in Aug. 1571. It was ceded by treaty March 7, 1573, and has since remained in the possession of the Turks. The Turks massacred several thousands of the Christians in 1821. These outrages commenced in May. Cyprus was not included in the new kingdom of Greece, formed in 1829.

CYR, ST. (France).—Louis XIV., at the instigation of Madame de Maintenon, in 1686, founded at this village, near Versailles, an institution for the education of 250 ladies of noble birth. Madame Maintenon died at this place, April 15, 1719. In 1793 it was converted into a military hospital. Napoleon I. transferred the military school of Fontainebleau to St. Cyr in 1806. It is called the "Ecole spéciale militaire de St. Cyr."

CYRENAICA (Africa). — This district, which received this name from Cyrene, its chief city, was also called Pentapolis, because it contained five principal cities, Apollonia, Arsinoë, Barca, Berenice or Hesperus, and Cyrene. It was colonized by the people of Thera, under Battus, who founded Cyrene B.C. 631. A republic was established in the middle of the 5th century. Ptolemy, son of Lagus, reduced it under subjection to Egypt B.C. 321. It became a Roman province B.C. 74, and was united with Crete B.C. 67. About 3,000 Jews were put to death in Cyrenaica A.D. 73. The Saracens completed the conquest of the country in 647, and it is now inhabited by different Arab tribes. Cyrenaica was explored by Dr. Della Cella in 1817, and by Capt. Beechey, R.N., and H. W. Beechey, in 1821 and 1822.

CYRENAICS. — This ancient school of philosophers was thus named from Cyrene, the birthplace of its founder, Aristippus. He began to teach B.C. 365. They made pleasure the *summum bonum*.

CYRENE, or CYRENÆ (Africa), the chief city of Cyrenaica, was founded by Battus and his followers from Thera, B.C. 631. Seven kings of this race succeeded, and about B.C. 450 a republic was established. It was afterwards made subject to Egypt, and passed under the dominion of Rome, B.C. 74. The ruins of this town, called Ghrennah by the Turks, still exist.

CYROPEDIUM, or CORUPEDIUM (Battle). —Lysimachus was defeated and slain at this place, in Phrygia, by Seleucus, in July, B.C. 281.

CYRRHESTICA (Syria).—This district, the scene of the campaign of Ventidius against the Parthians (B.C. 41—B.C. 38), was united, under the common name of Euphratensis, with the province of Commagen (*q. v.*), by Constantine I. (323—337).

CYTHERA (Mediterranean Sea). — This island, celebrated as the place whence the worship of the Syrian goddess Aphrodite was introduced into Greece, is represented, in the ancient mythological accounts, as the spot which received the goddess when she rose from the foam of the sea. It was long dependent upon Argos, and then passed under the rule of Sparta. The Athenians, under Nicias, seized it B.C. 424. Having reverted to Sparta, the Athenians, under Conon, captured it B.C. 393. It is now Cerigo, one of the Ionian Islands.

CYZICUS (Asia Minor) is said to have been settled by some Pelasgi, driven from Thessaly by the Ionians. At an early period it was subject to Athens, and having revolted, was reduced to submission B.C. 411. Mindarus, the Spartan admiral, was defeated in the neighbourhood of Cyzicus, B.C. 410. It was ceded to Persia by the peace of Antalcidas, B.C. 387. Mithridates VI. laid siege to it B.C. 74; but was compelled to retire B.C. 73, and the Romans made it a free city; of which privilege it was deprived by Tiberius in 37. Christianity was introduced at an early period, and it was made a bishop's see. The Goths ravaged the city in 259, and Procopius seized it in 365. The Mohammedan army besieging Constantinople went into winter quarters at this place in 668, and it soon after declined in importance. In ancient times Cyzicus was seated on an island of the same name; but an isthmus has gradually formed, and what was formerly an island is now a peninsula.

CZAR.—Voltaire considers this title to have been derived from the tzars or tchars of the kingdom of Cazan. It is evidently of oriental origin, and is equivalent to Cæsar. Ivan II. (1533—1584) was the first Russian monarch who assumed the title. The eldest son is called czarowitz, and the empress czarina.

CZASLAU (Battle).—The Austrians, led by Prince Charles of Lorraine, encountered the Prussians at this village, near Chotusitz, in Bohemia, about 35 miles from Prague, May 17, 1742 (O. S.). After a hard-fought battle they were compelled to retire, which they did in good order, carrying away 14 standards, two pairs of colours, and 1,000 prisoners. The Prussians, commanded by Frederick II., took 18 pieces of cannon, two pairs of colours, and 1,200 prisoners. The Austrians had only reached the village of Czaslau, by a forced march, the night before the battle.

CZECHES.—This, the most westerly of the Slavonic nations, which, according to tradition, derived its title from a leader named Czech, seized Bohemia (*q. v.*) about 480, and gained so complete an ascendency that in the 9th century the name was given to the entire Slavonic population.

CZENSTOCHAU, or CZENSTOCHOWA (Poland).—The monastery of this town, in the government of Kalisch, founded in 1382, possesses a famous dark-coloured picture of the Virgin, alleged to have been painted by St. Luke, but probably of Byzantine origin, which has given rise to the worship of the Black Virgin by the Roman Catholics of Poland. In 1655 the town successfully withstood a siege of nearly six weeks by Charles X. of Sweden, and in 1771 it was defended by Casimir Pulawski, chief of the Confederation of Bar (*q. v.*), against the Russians. It was taken by the French in 1812, and its fortifications were destroyed by the Russians in 1813.

CZERNOWITZ (Austria).—This circle, formerly a part of Moldavia, was ceded to Austria by Turkey in 1777, and annexed to Galicia in 1786. By the imperial patent of Dec. 31, 1851, it was constituted a crown land, under the name of Buckowina. The chief city, of the same name, is the seat of a Greek bishop.

D.

DABAN (Battle).—Shamas Iva, King of Assyria, defeated the Babylonian monarch on the shore of this river, supposed to be the modern Upper Zab or Nil, about B.C. 821. The Babylonians lost 5,000 killed, 2,000 prisoners, 100 chariots, 200 tents, and the standard and pavilion of their sovereign.

DACCA (Hindostan) became the capital of the eastern portion of Bengal in 1608, and was confirmed as such by Meer Jumla, the general of Aurungzebe, in 1657. The town reached its greatest prosperity under the viceroyship of Shaista Khan, which terminated in 1689. It afterwards declined, but was partially restored by the establishment of provincial councils in 1774. It became subject to the East India Company in 1765, and was annexed in 1845. A bank was opened at Dacca in 1846, and the Serampore mission established a station in 1816.

DACIA, including parts of Hungary, Transylvania, Wallachia, Moldavia, and Bessarabia, was originally peopled by the Getæ, whom Alexander III. defeated B.C. 335. Lysimachus conducted an expedition into the country B.C. 292. Their retreat having been cut off in the plains of Bessarabia, they were all made prisoners. Valerius Messala attacked the Dacians B.C. 34, and Augustus despatched Lentulus against them B.C. 10. Neither general achieved any striking success. Domitian sent a large force into Dacia under Cornelius Fuscus, in 86, but the expedition proved a failure, owing to the determined valour of the Dacian leader Decebalus. A peace was agreed upon in 91, Domitian consenting to pay tribute to the barbarian monarch, and to acknowledge his regal rights; and these humiliating terms seem to have been fulfilled till 101, when Trajan discontinued the payment, and invaded Dacia. After gaining many victories, he granted peace to Decebalus in 103, and assumed the title of Dacicus; but war was renewed in 104. The final subjugation of the Daci, and the reduction of their territory to a Roman province, did not occur till the death of Decebalus, in 106. Hadrian, who took measures to contract his empire in 117, retained Dacia, and it remained a province of Rome until Aurelian abandoned it to the Goths in 270. In 376 the Goths were expelled by the Huns, and in 379 Dacia was made part of the Eastern empire by Gratian. In 453 Ardaric, King of the Gepidæ, seized the country, and in 566 it was conquered by a colony of Scythians. They were subdued by Charlemagne, and the Magyars overran Dacia in the 9th century. (*See* HUNGARY.)

DADUR Battle).—The Brahoes, 5,000 strong, were defeated, in an attack upon the British forces, near this town, in Beloochistan, Nov. 3, 1840.

DAG.—This weapon, a kind of pistol, was used in the 15th and 16th centuries.

DAGGER.—Gregory of Tours, writing in the 6th century, mentions this weapon as part of the equipment of the Frankish soldiery. It afterwards acquired the name *Misericorde*, "because," says Hewitt, "in the last struggle of contending foes, the uplifted dagger compelled the discomfited fighter to cry for mercy." Under this title, it is mentioned in the Charter of Arras, in 1221, and also by Guiart in 1302. Du Guesclin speaks of its use as a missile in 1368.

DAGHISTAN (Asia).—Peter the Great overran this province of the Caucasus, situated between the Black and the Caspian Sea, in 1722. It was incorporated with Russia, as part of the province of Georgia, in 1801; since which period the inhabitants have waged several contests to recover their independence.

DAGON.—(*See* ASHDOD.)

DAGUERREOTYPE. — This process, by which the pictures of the camera lucida are rendered permanent, was known to Leonardo da Vinci in the 15th century, and was indicated in "Giphantie," a book written by Tiphanie de la Roche, and published at Paris in 1760. Its revival appears to have been suggested by some experiments made by M. Niepce in 1820, and it was brought out by M. Daguerre in 1838. The method, described by M. Arago, at the meeting of the Académie des Sciences, Jan. 7, 1839, was afterwards greatly improved by other scientific men. (*See* PHOTOGRAPHY.)

DAHARA, or DAHRA, MASSACRE.—During the war in Algeria, the Ouled-Riahs, a Kabyle tribe, pursued by a French army led by Col. Pelissier, afterwards Duke of Malakoff, took refuge in the caverns of Dahara, June 18, 1845. The French surrounded the caverns, and as the Ouled-Riahs would not surrender, they placed lighted faggots at the entrance. When the troops obtained admission, June 20, they found 500 dead bodies; and of 150 who remained alive, but few recovered.

DAHLIA. — This flower is indigenous to Mexico, whence it was sent to Spain in 1789.

The Marchioness of Bute introduced it into England the same year. The stock having become extinct, Lady Holland caused new plants to be imported in 1804. The present British stock is chiefly derived from a large assortment of plants brought from France in 1815. This flower received its name from the Swedish botanist Dahl. On the continent it is called Georginia.

DAHOMEY (Africa).—This negro kingdom was founded by Tacoodonon, chief of the Foys, in 1625. It first came under the notice of Europeans early in the 18th century, when King Trudo, who began to reign in 1708, destroyed all the white settlements on the coast. In 1727 the kingdom of Whyda was conquered and annexed, and in 1772 the court of the King of Dahomey was visited by Mr. Norris, who published a very interesting narrative of the cruel customs of the people. The forces of the King of Dahomey have been thrice defeated in attacks upon the independent settlement of Abeokuta (*q. v.*), viz. in 1848, March 3, 1851, and March 16, 1864.

DAINSTADT (Battle).—The Russians, 3,600 strong, were defeated at this place, in Finland, by a Swedish force, amounting to 2,200 men, June 28, 1789. Gustavus III., King of Sweden, served as a volunteer in this action.

DAKOTA (North America).—This territory of the United States, organized by an Act of Congress in 1861, was found, in Aug., 1862, to contain rich gold-fields in its south-western districts. In 1863 and 1864 the settlers were much harassed by the Sioux Indians, who had rebelled against the Federal authorities.

DALLAS (Battles).—Gen. Hooker was defeated, with a loss of about 600 killed and wounded, near this town of Georgia, by the Confederate Gen. Johnston, May 25, 1864. ——Gen. McPherson, attacked here by a heavy force of Confederates, repelled them and inflicted a loss of more than 2,000 men, May 28, 1864.

DALMATIA (Austria) revolted from Illyria, and became an independent state, B.C. 180. C. Marcius Figulus invaded the country B.C. 156, and took Dalminium, the capital, compelling the Dalmatians to purchase peace by the payment of an annual tribute. Another expedition was led against them B.C. 155, and the capital sustained such serious injury that the seat of government was transferred to Salona. L. Cæcilius Metellus headed a third invasion B.C. 119, and was rewarded for his success by a triumph and the surname of Dalmaticus. Gabinius commenced the fourth Dalmatian war B.C. 48, but he was defeated. Octavianus defeated the Dalmatians B.C. 35, and obtained the submission of the country, and its reduction into a Roman province, B.C. 34. Revolts occurred B.C. 16 and B.C. 11, and it continued in a very unsettled state until its subjection by Tiberius, A.D. 9. Diocletian, on his abdication, May 1, 305, retired to Dalmatia, which remained undisturbed till 461, when it was threatened by the Suevi, and saved by the valour of Marcellinus. The Heruli, under Odoacer, effected its conquest in 481; and it remained under Gothic sway till Justinian I. regained possession in 535. In 634 Heraclius invited the Croats to dispossess the Avars, who had attained considerable power; and in five years Dalmatia was occupied by Croatian and Servian vassals of the empire. Christianity was introduced in 640, and in 806 the country submitted to the Franks. They were expelled in 837 by Terpimir, who established the ducal authority. In 887 Dalmatia was plundered by the Narentines, and in 997 the Venetians gained some influence, which they lost in 1052. The Hungarians entered Dalmatia in 1091, and for some time after its history is little more than a record of struggles between these invaders and the Venetians. The latter ceded all claim Feb. 18, 1358. The Turks invaded Dalmatia in 1500, and for 200 years the country was almost incessantly the seat of war. A peace was concluded in 1573, but war was renewed in 1596; and in 1646 Dalmatia was again invaded by an immense Turkish force. Peace was again concluded in 1669, but broken in 1685; renewed Jan. 26, 1698, again violated in 1714, till at length the treaty of Passarowitz, July 21, 1718, restored tranquillity to the country. By the treaty of Campo-Formio, Oct. 17, 1797, Dalmatia was ceded to Austria, which power surrendered it to France by the treaty of Presburg, Dec. 26, 1805. Under French dominion it was first incorporated with the kingdom of Italy, and subsequently, in 1810, with that of Illyria. In 1814 Dalmatia was restored to Austria.

DALTON (United States).—This town of Georgia was surrendered by Col. Johnston to the Confederate Gen. Hood, Oct. 14, 1864.

DAMASCUS (Syria), according to Josephus, was founded by Uz, Noah's grandson, and is first mentioned in the time of Abraham, B.C. 1912 (Gen. xiv. 15). It was taken by David B.C. 1040 (2 Sam. viii. 6), and was the capital of Syria during the reign of Benhadad, B.C. 930 (2 Chron. xvi. 2). Jeroboam restored it to Israel B.C. 822, but Tiglath-Pileser, King of Assyria, took it B.C. 740, and carried its inhabitants captive to Kir (2 Kings xvi. 9). It afterwards remained subject to the Assyrians and Persians till B.C. 333, when it was taken by Parmenio, the general of Alexander III. (the Great). The Romans under Pompey effected its capture B.C. 64. Paul commenced his ministry at Damascus A.D. 33 (Acts ix. 19); and, according to some authorities, Ananias, by whom the apostle was ordained, was the first bishop of the see. The city was taken from the Romans in Jan., 635, and by the Saracens, who made it the seat of their government, in 661, but removed it to Bagdad in 762. In 1006 it was taken by the Ghiznivites, who yielded it in 1075 to the Seljukian Turks. Noureddin (1145—1174) added the kingdom of Damascus to that of Aleppo. The Crusaders laid siege to it in 1148, but without success. The Carismians took it in 1245, and it was sacked by Tamerlane, Jan. 23, 1401. In 1516 it was seized by Selim I. and annexed to the Ottoman empire. In 1832 Damascus was taken by Ibrahim Pasha, and, by a firman, dated May 6, 1833, was granted to Mehemet Ali. In Feb., 1840, it was the scene of a cruel persecution of the Jews. Damascus was

restored to Turkey at the conclusion of peace in 1841. The Druses committed great atrocities here in July, 1860, when about 4,000 Christians perished.

DAMASK.—Rich stuffs of silk and linen were so called because they were originally manufactured at Damascus; whence the trade was carried to Venice, Genoa, and Lyons. In the 15th century most extravagant prices were given for superior qualities, the fashion of wearing it being adopted by Henry V. and Edward IV. Damask tablecloths were first imported from France in 1575.

DAMASK ROSE, so called from Damascus, was introduced into Europe in 1573. It is still largely cultivated in Syria for the purpose of making attar or otto of roses.

DAMIANISTS, the followers of Damianus, the Monophysite Patriarch of Alexandria, arose in the 6th century. They made a distinction between the divine essence and the three persons in the Godhead. Certain nuns of the order of St. Clare (*q. v.*) were called Damianists.

DAMIEN, ST. (Hermits of).—(*See* CŒLESTINES.)

DAMIETTA (Egypt), near the site of the ancient Tamiathis, underwent several sieges by the Crusaders, who took it Nov. 5, 1219; but the infidels regained possession in 1221. Louis IX. captured it in June, 1249, and having been taken prisoner, purchased his freedom, in 1250, by the surrender of the city to the Saracens, who soon afterwards ordered it to be destroyed. The modern town, erected four miles further from the sea, was fortified by Napoleon Buonaparte in 1798. The French evacuated it in 1801. An English force took possession of Damietta in 1807. Dimity was first manufactured here.

DAMME (Flanders).—This once important city of Flanders, founded, about 1189, by the Batavians, was taken and burned by Philip II. (Augustus) in 1213. It was rebuilt in 1238, and in 1384 surrendered to Charles VI., after a long and arduous siege. The Duke of Marlborough took Damme in 1706.

DAMME (Prussia).—This town of Pomerania was ceded by the treaty of Westphalia, Oct. 24, 1648, to Christina, Queen of Sweden. In 1659 it was seized by the Austrians under Count Ratwick de Souches, but it was restored by the peace of Oliva, May 3, 1660. It was taken by Frederick William, Elector of Brandenburg, Sep. 30, 1676, and confirmed in his possession by the treaty of St. Germain-en-Laye, June 29, 1679.

DAMPIER ISLANDS (Indian Ocean).—This archipelago, situated to the north of Australia, was discovered by William Dampier, who anchored off Rosemary Island, the chief of the group, Aug. 31, 1699.

DAMPIERRE (France). — In this château, situated on the Loire, Margaret of Anjou, widow of Henry VI. of England, ended her days Aug. 25, 1481.

DANCE OF DEATH.—This subject, so popular with the artists of the Middle Ages, was painted in 1312, in the church of the Dominicans at Basel. The earliest printed work on the subject which bears a date is "La Danse Macabre," published at Paris in 1485. Holbein's "Dance of Death" was first published at Lyons in 1538. It comprises 41 cuts, each surmounted by a Latin text, and having underneath four French verses. A second edition of this work appeared in 1542, and it has since been frequently reprinted.

DANCERS. — This sect arose at Aix-la-Chapelle in 1373, and spread through various parts of the Netherlands. Its members, of both sexes, hand in hand, danced furiously till they fell upon the ground. They were the forerunners of the Convulsionists (*q. v.*) in France, and the Jumpers (*q. v.*) in England and America.

DANCING is said to have been invented by Athothus, the Egyptian Mercury. The Curetes introduced dancing to time B.C. 1534; and Miriam and the Israelitish women testified their joy at their deliverance from the Egyptians by dancing to the sound of their timbrels, B.C. 1491 (Exod. xv. 20). David danced before the ark of God B.C. 1044 (2 Sam. vi. 14). Æschylus united dancing to the dramatic performances of the Greeks about B.C. 499, and pantomimic dances were introduced on the Roman stage B.C. 22. Dancing was an ordinary recreation at the convivial meetings of the Greeks. Meursius mentions 184 kinds of dancing. Dancing was prohibited in 366 by the Council of Laodicea. The Church Dance, which may still be seen on certain festivals in the cathedral at Seville, was stopped in France in the 11th century. Sir Christopher Hatton, afterwards Lord Chancellor, is said to have ingratiated himself with Queen Elizabeth by his excellence in dancing.

DANEBROG, or DANNEBROG. — Some authorities refer the institution of this order of knighthood to the earliest period of the Danish kingdom, while others say it was founded by Valdemar II., in 1219, in commemoration of a miraculous standard which descended from heaven, and rallied his troops when they were on the point of fleeing before the Livonian pagans. In the 15th century the order fell into decay, but it was revived by Christian V. Oct. 12, 1671, and received new statutes Dec. 1, 1693. The constitution of the order was extended by Frederick VI., who issued letters patent to that effect June 28, 1808.

DANEGELT, or DANE MONEY, a tribute exacted by the Danes in their invasions of England. It was first paid by Ethelred II., or the Unready, in 991, on the advice of Siric, Archbishop of Canterbury, and consisted of 16,000 pounds of silver. Another levy, of 24,000 pounds of silver, was exacted in 1002, and it afterwards became a regular custom for the Anglo-Saxon kings to extort money from their subjects to bribe the Danes. Edward the Confessor abolished the Danegelt in 1051. It was restored by William I. in 1068, and again suppressed at the council held at Oxford by King Stephen in 1136. The last recorded payment of Danegelt took place in 1175. The citizens of London were relieved from the payment of this tax by the 5th article of Henry the First's charter.

DANES.—The Scandinavian tribes, who, in the 8th, 9th, and 10th centuries, invaded many parts of the continent, and of England, were known under this general name. Their ravages

in France and upon the continent of Europe are described under NORTHMEN.

A. D.
787. First appearance of the Danes in England.
793. They pillage Lindisfarne, and ravage Northumberland.
794. The Danes are defeated at Wearmouth.
795. They land in Ireland.
832. They seize Sheppey Island.
833. They defeat Egbert at Charmouth (*q. v.*).
835. Egbert defeats them at Hengstone Hill (*q. v.*).
837. The Danes are defeated at Southampton, but gain a victory on the isle of Portland.
845. They are defeated by Ethelwulph at the Parret.
851. They winter in Sheppey; sail up the Thames with 350 ships; plunder Canterbury and London; and are defeated at Aclea (*q. v.*).
853. They are victorious in Thanet.
860. They land at Southampton, and threaten Winchester; but are driven back by Osric and Ethelwulph.
867. They take York, which is defended by Ella and Osbert, who fall in the battle.
869-70. They subdue East Anglia, and destroy the monastery of Bardney and the abbeys of Croyland, Coldingham, and Ely.
871. They fight nine battles in the country south of the Thames, and conclude peace with King Alfred.
874. They conquer Mercia.
875. Healfden invades Northumberland, and destroys Tynemouth and Lindisfarne. Guthrum and other chiefs seize Cambridge, where they winter.
876. They take Wareham and Exeter, and conclude a second treaty with Alfred.
877. A Danish fleet of 120 vessels is wrecked at Swanscа. A third treaty with Alfred is made at Exeter.
878. They compel Alfred to hide in Athelney. After six months, he collects his forces, defeats them at Ethandune (*q. v.*), and persuades Guthrum to embrace Christianity.
881. The Danes land in Scotland.
884. They renew their attacks, and lay siege to Rochester, which is relieved by Alfred.
894. Alfred defeats Hastings at Farnham, Bamfleet, and Chester.
896. Hastings leaves England.
897. Alfred defeats the Danes near the Isle of Wight.
901. Ethelwald, son of Ethelred I., is defeated in a project to assume the crown, and compelled to seek refuge with the Northumbrian Danes, who elect him king.
911. The Danes suffer a great defeat at Wodensfield from Edward, King of Wessex.
921. The Northumbrian Danes submit to Edward the Elder.
943. The Danes plunder Tamworth.
978. The Danes are defeated by the Irish on Tara Hill.
981. A Danish fleet ravages Devon and Cornwall.
991. Another formidable invasion. The Danes are induced to retire on receiving £10,000 of tribute money. (*See* DANEGELT.)
992. They renew their attacks, and are defeated by Ethelred II. in a naval engagement.
994. Sweyn, defeated in an attempt to take London, ravages Essex, Kent, and the southern counties, and receives £16,000 on condition of his quitting the country.
999. Four thousand Danes are slain at the battle of the Suck, in Ireland.
1002. Danish invasion bought off for £25,000. Ethelred II. orders the massacre of every Dane in England, which is perpetrated on the eve of St. Bride's day, Nov. 13.
1003. Sweyn invades England (*q. v.*).
1005. Sweyn quits England, in consequence of a famine.
1006. Another Danish invasion.
1010. The Danes burn Oxford and Cambridge, and obtain possession of 16 English counties.
1011. They burn Canterbury, and carry away the archbishop, whom they murder the following year.
1012. They receive £48,000 tribute, and disband their fleet.
1013. Sweyn takes London, and asserts his rule over the whole country north of Watling Street.
1014. The battle of Clontarf (*q. v.*) is lost by the Danes.
1016. Canute, son and successor of Sweyn, gains many victories, and obtains from Edmund II. (Ironside) the cession of the northern half of England.

A. D.
1018. Canute exacts a tribute of £80,000.
1047. An invading fleet lands at Sandwich.
1054. The Danes fight against Macbeth, under Siward, Earl of Northumberland.
1066, Sep. 25. They are defeated by Harold II. at Stamford Bridge.
1069. The sons of Sweyn arrive, with 240 ships, in the Humber. They burn York, and slay more than 3,000 of its Norman defenders.
1070. Sweyn arrives in the Humber, and a Danish fleet sails up the Thames.
1075. A Danish fleet, under Sweyn's son, Canute, pillages York, and then withdraws.

DANESMORE (Battle).—(*See* BANBURY.)

DANGER ISLES (Pacific Ocean).—This group was discovered by Com. Byron in 1765.

DANISH AMERICA.—The islands of St. Thomas, Santa Cruz or St. Croix, and St. John, with some small islands, constitute the Danish possessions in America.

DANNEWERK, DANNEVIRKE, or DANEWIRKE (Denmark).—This wall, erected in the 9th century to protect Southern Jutland, was rebuilt and greatly strengthened in 937 by the queen consort Thyra. Gen. Wrangel, at the head of 30,000 Prussians, defeated the Danes, 10,000 strong, after a struggle of eight hours' duration, at this place, near Sleswig, Easter Sunday, April 23, 1848. The Danes abandoned their position behind the Dannewerk to the Austrians and Prussians, Friday, Feb. 5, 1864.

DANTZIC (Prussia), which existed as early as 970, was taken by Mestwin, Duke of Eastern Pomerania, in 1271, and by the Poles in 1294. In 1310 it fell under the domination of the Teutonic Order, who retained it till 1454, when it became a free city under Polish protection. In 1517 it was besieged by the Teutonic Knights, and in 1577 was taken by Stephen Bathori, King of Poland, whose authority it had disputed. Charles X. (Gustavus), of Sweden, invested John II. (Casimir) within its walls in 1656, but without success. In 1709 the plague committed great ravages amongst its population; and, in 1734, it was besieged and taken by the Russians and Saxons. At the second partition of Poland, in 1703, Dantzic was assigned to Prussia. It was taken by the French May 20, 1807, and restored to its former independence by the treaty of Tilsit, July 9, 1807. But though nominally independent, it was really subject to the French, who garrisoned it, and retained it under their authority until they were expelled, after a long siege, by a Russian and Prussian force under Alexander, Duke of Würtemberg, Jan. 2, 1814, since which date it has been restored to Prussia. The principal buildings are the cathedral, commenced in 1343, and finished in 1503; Trinity Church, founded in 1514; the Rath-haus in 1556; and the Hohe Thor in 1588. The city was much injured by the explosion of a powder-magazine Dec. 10, 1815. An inundation, which occurred April 9, 1829, laid the whole city under water, and destroyed many thousand houses and cattle, besides causing considerable loss of life. In July and Sept., 1831, Dantzic was visited by the cholera, which caused 1,028 deaths.

DANUBE, the ancient Danubius, or Ister, was crossed by Darius I. on his expedition into Scythia, B.C. 515, and by the Celtic barbarians previous to their invasion of Greece, B.C. 280.

Trajan built a fine stone bridge across it in 104, which was destroyed by Hadrian in 120, lest it should enable the northern barbarians to invade the Thracian provinces. Charlemagne formed a magnificent project, which was never carried out, of connecting the Rhine with the Danube by means of a canal. Steam navigation was established on the Danube in 1838, when the Austrian Company was formed and incorporated by the emperor. The Bavarian company was established in 1836. The navigation of the Danube was declared free from all impediment or toll by the 15th article of the treaty of Paris, March 30, 1856.

DANUBIAN PRINCIPALITIES.—Moldavia and Wallachia were united under the name of the "United Principalities of Moldavia and Wallachia," by the convention of Paris, signed Aug. 19, 1858. They were placed under the suzerainty of the sultan, but with power to carry on their own administration without his interference, government being administered by a hospodar and an elective assembly in each principality, and a central commission common to both principalities. (*See* MOLDAVIA and WALLACHIA; and ROUMANIA.)

DARA (Mesopotamia) was founded by Anastasius I., in 505, as a bulwark against the Persians. It was frequently besieged, and was taken by Chosroes I. in 572.

DARBYITES.—(*See* PLYMOUTH BRETHREN.)

DARDANELLES.—Xerxes threw a bridge of boats across this channel, anciently called the Hellespont, B.C. 481. The bridge was destroyed by a storm. In consequence of this disaster, the water received 300 lashes, and the next bridge remained secure. Alexander III. crossed the straits B.C. 334 with an army of about 35,000 men. The Saracens, under Soliman, the son of Orchan, crossed this channel in 1360, and first raised the Mohammedan crescent in Europe. In 1465 Mohammed II. erected two forts to defend the passage; and in 1659 two more, named Sestos and Abydos, were added by Mohammed IV. The passage of the Dardanelles was effected by Admiral Sir Thomas Duckworth, Feb. 19, 1807, in spite of the severe fire of the forts. He returned through the channel March 1 the same year, when the squadron sustained much injury, owing to the unfavourable weather and to the immense stone shot used by the enemy. By a secret article of the treaty of Unkiar-Skelessi, between Russia and Turkey, signed at Constantinople July 8, 1833, the latter power agreed to close the Dardanelles against vessels of war belonging to foreign powers. The straits were passed by the allied fleets of England and France at the commencement of the Russian war (*q. v.*), Oct. 14, 1853. The ancient rule of excluding all ships of war in time of peace, confirmed in the convention signed at London July 13, 1841, is recognized by the 10th article of the treaty of Paris, March 30, 1856.

DARDANELLES (Sea-fight).—The Genoese defeated the Venetians, the Catalans, and the Greeks in an engagement in the Dardanelles in 1352.

DARIC, a Persian gold coin, struck by Darius the Mede, B.C. 538. The daric was originally coined at Babylon, whence its circulation extended over all the East, and even into Greece. The device was an archer in the act of drawing his bow. Dr. Bernard estimates the weight of the daric at 15 grs. more than our guinea. Specimens in the British Museum weigh 128·4 and 128·6 grs. Hussey estimates its value at £1 1*s.* 10*d.* 1·76 farthing. There were also darics of silver.

DARIEN (Central America).—This isthmus was discovered by Columbus, who founded Porto Bello in 1502. Vasco Nunez de Balboa crossed it, and discovered the Pacific Ocean, Sep. 25, 1513. A Spanish colony was established on the isthmus in 1510. William Paterson, the originator of the Bank of England, first proposed to form what is known as the Scottish settlement at Darien in 1694. The company was incorporated by an act of Parliament, to which the royal sanction was given June 26, 1695. Three ships and two tenders, having on board 1,200 men, besides women and children, left Leith July 26, 1698. They reached the isthmus Nov. 1. The chiefs of the expedition landed on the following day, and took formal possession of the country, naming it New Caledonia. They built a fort, which they called New St. Andrew, and soon became involved in a quarrel with the Spaniards, who regarded them as pirates and buccaneers. Disease committed great ravages amongst them, and those that remained alive were compelled to embark in three vessels. More than half of them perished during the voyage to New York. A second expedition, consisting of four ships, with 1,300 men, that had left Edinburgh in Aug., 1699, did not reach the colony until four months after its abandonment. They built a new fort, and having been assailed by a Spanish fleet and army, concluded a treaty March 30, 1700, engaging to evacuate Darien in 14 days. They embarked April 11. Two of the ships were lost, and only a small number of the colonists returned to their native land. In Nov., 1827, the isthmus was surveyed by Mr. Lloyd, acting under the orders of Gen. Bolivar, with a view to ascertain the best route, either for a road or a canal, by which it might be traversed.

DARIK (Battle).—Selim I., Emperor of the Ottomans, defeated and slew Ghori, the Mameluke Sultan of Egypt, at this place, near Aleppo, Aug. 24, 1516.

DARJEELING (Hindostan). — This hill station of Bengal was, with the surrounding country, ceded to the British by the Rajah of Sikim, as a sanatarium for Europeans, in 1835. In 1850 the limits were extended. A mission to Bhotan (*q. v.*) left Darjeeling Jan. 4, 1864.

DARLING RIVER (Australia) was discovered by Capt. Sturt in 1829, and was named after the then governor of the colony.

DARMSTADT (Germany) was made a city in 1330, and became the residence of the landgraves of Hesse-Darmstadt in 1567. The grand-ducal palace was commenced in 1568, and the town hall was built in 1580. Darmstadt has been the scene of two conventions: the first, between the Grand-dukes of Hesse-Darmstadt and of Baden, was signed Oct. 5, 1806; and the second, between the Grand-duke and Jerome Buonaparte, June 3, 1810.

DARTFORD (Kent) was either founded by

the Romans, or built on the site of a former Roman town, as numerous remains of Roman furniture, houses, coffins, &c., are found in its vicinity. In 604 Ethelbert founded a nunnery, which was ravaged by the Danes in 790. The marriage by proxy of Isabella, sister of Henry III., to Frederick II. of Germany, was solemnized in Dartford church in 1235. Edward III. held a great tournament in the town in 1330, and founded the priory in 1349. Wat Tyler's insurrection broke out at Dartford in 1381. In 1538 the priory was abolished, and the house converted into a royal palace; and in 1576 the grammar-school was founded. Sir John Spielman erected the first paper-mill in England at Dartford in 1580. In 1780 a camp was formed at Dartford, and in 1790, 1795, and 1805, the powder-mills were blown up, causing, on each occasion, considerable loss of life. The infant-school and mechanics' institute were established in 1843.

DARTMOOR (Devonshire).—This immense tract of moorland, granted by Henry III. in 1238 to his brother Richard, Earl of Cornwall, has, since 1337, formed part of the duchy of Cornwall. The first stone of the prison for prisoners of war was laid March 20, 1806. A serious insurrection of the prisoners took place April 6, 1815, when seven of the insurgents were shot.

DARTMOUTH (Devon) was an important borough, market town, and seaport at an early period. The crusading fleet assembled in its harbour in 1190. The charter for a market and fair at Dartmouth was granted in 1226, and that by which the town was endowed with a corporation in 1342. In 1347 it was the third in the list of seaports which furnished Edward III. with a fleet for the siege of Calais, and in 1377 it was attacked and nearly destroyed by a powerful French army. In 1404 it was again assailed by a French force, under M. du Chastel, whose army was compelled to take flight, after losing its commander and many of the principal officers. Warwick, the king-maker, who had fled to France, landed here Sep. 13, 1470. During the Great Rebellion, Dartmouth was twice taken: by the Royalists, under Prince Maurice, in 1643, after a siege of a month's duration; and by the Parliamentary forces, under Sir Thomas Fairfax, Jan. 18, 1646. The mechanics' institute was established in 1846.

DAUPHIN, the title of the eldest son of the King of France, was first assumed by Charles (grandson of Philip VI.), afterwards Charles V., to whom the province of Dauphiny was ceded by its sovereign, Humbert II., July 16, 1349. The title was permanently attached to the eldest sons of the French kings by John II. in 1356, and was last used by Louis Antoine, who assumed it in Sep., 1824, on the accession of his father as Charles X. The Dauphins quartered on their shields the arms of France and Dauphiny, and only yielded precedence to crowned heads.

DAUPHINY, or DAUPHINÉ (France).—This ancient province of France, formerly peopled by the Allobroges (*q. v.*), passed, about the year 438, into the hands of the Burgundians. In 568 it was seized by the Lombards, and in 733 was invaded by the Saracens, from whom it was delivered by Charles Martel. It was subsequently annexed to Burgundy, and split up into a number of small territories, the most important of which, named Albon, passed in 889 into the hands of Count Guy I., the founder of a long race of rulers. Guy IV., who died in 1142, assumed as his crest the *dolphin*, from the French word for which his country took its name of Dauphiné. In 1325 Count Guy VIII. defeated Edward, Count of Savoy, at Varey; and in 1343 Humbert II. surrendered his estates to Philip, son of Philip of Valois, on condition that he would assume the title of Dauphin, a transfer subsequently confirmed by treaty in 1349. Dauphiny was ravaged by the Duke of Savoy and Prince Eugène in 1690; and was occupied by an Austro-Sardinian army in 1814. (See DAUPHIN.)

DAVENTRY (Battle).—Gen. Lambert, having risen against the government of Gen. Monk, April 9, 1660, was defeated and made prisoner by Ingoldsby at this town in Northamptonshire, April 22.

DAVIDISTS, or DAVID-GREGORIANS.—This sect was founded by David George, or Joris, the son of a market crier, who was born at Delft in 1501. He joined the Anabaptists in 1534, when he began to have visions and revelations. He published his "Book of Wonders" in 1542. In 1544 he repaired to Basel, in Switzerland, and lived in retirement there 12 years. He called himself the third David, another son of God, and held various heretical opinions. His followers existed in Holland till about a century after his death.

DAVID'S, ST. (Wales).—The archbishopric of Caerleon (*q. v.*) was removed to this place, the ancient Menevia, in 521. It was burned in 610, and in 904 and 906 it was taken and ravaged by the Danes. In 930, Sampson, the archbishop, removed to Dole, in Britanny, and the see became merely episcopal, although the bishops still exercised archiepiscopal authority. In 981 the town was again pillaged by Gothrit and Harold, and in 998 by the Danes, who slew the archbishop. The Saxons took it in 1011, and committed great devastation, and in 1020 it was destroyed by Eilaf. About 1115 Bishop Bernard professed his subjection to the Archbishop of Canterbury, and the see lost all archiepiscopal power. The cathedral was founded in 1180. John of Gaunt founded a college here in 1365, of which only the chapel is now in existence.

DAVID'S, ST., DAY.—The Welsh custom of wearing a leek in the cap on the 1st of March, originated in 540, when the Britons, under Cadwallader, defeated the Saxons. St. David ordered the British warriors to wear a leek, that they might be known to each other; whence the present custom is derived.

DAVIS'S STRAITS (North America) were discovered by Capt. John Davis, Aug. 11, 1585, during his first voyage in quest of the north-west passage.

DAVY LAMP, for lighting the miner, without risk from the explosion of fire-

damp, was invented by Sir Humphry Davy, in 1816.

DEACONESSES are of very early origin in the Christian Church, as St. Paul Rom. xvi. 1) speaks of Phebe as "a servant (διάκονος or *deaconess*) of the church which is at Cenchrea," in 58. By a law in the Theodosian Code, published in 438, they were to be widows who had had children and were above 60 years old; but instances were not uncommon in which the office was filled by virgins. Their duties were to baptize and catechise women, to attend the sick and martyrs in prison, and to superintend the behaviour of female worshippers at church. It is doubtful when the office was discontinued; but the Council of Orange, Nov. 8, 441, forbade any more deaconesses to be ordained; which prohibition was repeated by the Council of Albon in 517, and the Council of Orleans June 23, 533. The order did not, however, become extinct till the 11th century, and in the Greek Church deaconesses continued as late as the end of the 12th century.

DEACONS were first appointed by the apostles to superintend the daily ministration to the poor, in 31 (Acts vi. 1—6). The original number was seven; viz. Stephen, Philip, Prochorus, Nicanor, Timon, Parmenas, and Nicolas. Deacons of the Church of England were prohibited from consecrating the Holy Communion by 13 & 14 Charles II. c. 4, s. 14 (1662), under penalty of £100.

DEAF AND DUMB.—The earliest legislation for the deaf and dumb appears in the code of Justinian in 529, which declares persons born thus incapable of making a will, manumitting a slave, and performing other civil offices. The Venerable Bede states that John, Bishop of Hagulstad (Hexham), enabled a deaf man to talk in 685, and Rodolphus Agricola (1443—1485) states the capacity of those born deaf to receive instruction, and mentions instances in which it had been successfully imparted. The art was first reduced to a system by Jerome Cardan (1501—1576), and was successfully practised by the Spanish Benedictine, Pedro de Ponce, who died in 1584. Jean Bonifacio published his work on the language of action in 1616; and John Bulwer's "Philocophus, or the Deafe and Dumbe Man's Friende," published in 1648, is probably the earliest English book on the subject. Dr. Wallis announced his ability to teach the deaf in 1653, and George Dalgarno's manual alphabet, the first published in England, appeared in 1680. The great French teachers of the deaf and dumb are the Abbé de l'Epée (1712—1789), and the Abbé Sicard (1742—1822), who laboured arduously and successfully to establish an effective system of instruction for their unfortunate pupils. The first school for the deaf and dumb was opened in Edinburgh about 1760, by Thomas Braidwood, who removed it to Hackney, London, in 1783. The London Asylum for poor deaf and dumb children was projected and established in 1792, by the Rev. John Townsend, who collected a considerable sum of money for the purpose. The Duke of Gloucester laid the first stone of the new asylum in the Old Kent Road, July 11, 1807. Similar asylums have been established in the following places:—

A.D.	
1810.	Edinburgh.
1812.	Birmingham.
1816.	(Claremont) Dublin.
1819.	Aberdeen.

DEAL (Kent).—This port is one of the places supposed to be the spot where Julius Cæsar landed with his legions, Aug. 26, B.C. 55. Soon after the Norman Conquest it was annexed to the Cinque Ports, and by a decree of Henry III., in 1220, it was declared exempt from taxation. Perkin Warbeck was defeated in an attempt to land here July 3, 1495. (*See* WARBECK'S INSURRECTION.) The castle was erected by Henry VIII. in 1539, the charter of incorporation was granted by William III. Oct. 13, 1699, and the court hall was built in 1803.

DEAN.—This dignitary originated at an early period, in the division of sees, by their bishops, into decennaries or tithings, each of which comprised 10 churches or parishes, and was placed under the government of a dean. Formerly this office was open to laymen, but by 13 & 14 Charles II. c. 4 (1662) it can only be filled by a priest. Deaneries of old cathedrals, except in Wales, were placed under the direct patronage of the crown by 3 & 4 Vict. c. 113 (Aug. 11, 1840).

DEAN FOREST (Gloucestershire) contained iron mines at a very early period of English history, probably before the Roman invasion. Its boundaries were defined by 20 Charles II. c. 3 (1667). The mine law courts, for the protection of the free miners, &c., were abolished in 1777, and the free miners have since lost many of their alleged rights. Riots broke out here June 8, 1831, in consequence of the opposition of the foresters to the inclosure of any part of the forest, when upwards of 2,000 men destroyed the fences, and indulged in other riotous proceedings.

DEATH.—(*See* BIRTHS, DEATHS, and MARRIAGES; BLACK DEATH; CAPITAL PUNISHMENT; and REGISTRATION OF BIRTHS, DEATHS, AND MARRIAGES.)

DEATH BY ACCIDENTS COMPENSATION ACT, or LORD CAMPBELL'S ACT.—This act, 9 & 10 Vict. c. 93 (Aug. 26, 1846), provided that persons causing accidental death by neglect or carelessness, should be liable, at the suit of the executors, to an action for damages, to be paid to the wife, husband, parent, or child of the deceased. It was amended by 27 & 28 Vict. c. 95 July 29, 1864), which, in cases where executors were not appointed, or from any cause did not take measures to obtain compensation, permitted any person beneficially interested to commence legal proceedings.

DEATH'S HEAD.—This order of knighthood was founded by the Duke of Würtemberg in 1652. It is for females only.

DEATH'S HEAD CORPS, or BLACK BRUNSWICKERS.—This regiment, which

derives its names from the black uniform and cap adorned with a silver image of a skull worn by the troopers, was formed by Frederick William, Duke of Brunswick, who first led them against the French about the middle of May, 1809. He entered Dresden, June 11, and penetrated to Leipsic, but being unable to maintain his ground against King Jerome Buonaparte, he cut his way to the coast, and with his force of 1,800 men found refuge in England, where he received from Parliament a pension of £7,000. He was killed while fighting with the Allies at Quatre Bras, June 16, 1815.

DEBT.—(*See* ACTON BURNEL; BANKRUPTCY; COUNTY COURTS; IMPRISONMENT FOR DEBT, &c.)

DECCAN (Hindostan).—The boundaries of this territory have varied greatly at different periods. The term is now usually applied to the southern portion of India, situated between the Nerbudda and Kistna Rivers. Its first independent sovereign was Allah ud Deen, in 1337; and in 1690 it was conquered by Aurungzebe, who divided it into six provinces. In 1717 Nizam al Mulk wrested it from the Mongol sovereigns of Delhi, and rendered it subject to the Mahrattas, who maintained their ascendancy till 1818, when a large portion was ceded to the British. The chiefs of the Deccan were received by Sir Bartle Frere at a great durbar held at Poonah, Sep. 5, 1865.

DECELEA (Greece).—This place, originally one of the 12 cities of Attica, was taken and fortified by the Lacedæmonians B.C. 413, and was retained by them till the end of the Peloponnesian war.

DECEMBER, so called from *decem*, ten, was the 10th month in the year of Romulus, B.C. 753; and became the 12th when Numa Pompilius placed the months of January and February before March, B.C. 713. During the reign of Commodus (180—192) it was called Amazonius, in honour of the Emperor's mistress Martia, who had been painted in the habit of an Amazon.

DECEMVIRS.—The supreme council of ten, appointed at Rome B.C. 451, compiled the laws of the ten tables the same year, and at first governed so as to win the respect of their fellow-citizens. The decemvirate was renewed B.C. 450, when two tables were added, making the Laws of the Twelve Tables. The decemvirs were deposed, in consequence of the tyranny of Appius Claudius towards Virginia, and the consular government was restored B.C. 449.

DECENNALIA.—These festivals were instituted by the Emperor Augustus, B.C. 24, in acknowledgment of the prosperity of his administration during the preceding 10 years. They were continued by the emperors every 10th year of their reign, with games sacrifices, and largesses to the people. The last was celebrated by Theodosius II. in 411.

DECIMAL SYSTEM was applied by the French government to coinage, weights, and measures, in 1792. Sir John Wrottesley introduced it to the notice of Parliament, Feb. 25, 1824, but no measures were adopted for testing its utility. A committee of the House of Commons reported in favour of its adoption, Aug. 1, 1853; and in Nov., 1854, a commission of inquiry was appointed, consisting of Lord Monteagle, Lord Overstone, and Mr. Hubbard. The Decimal Association, formed in June, 1854, and the International Association, instituted at Paris in 1855, both labour for the introduction of the decimal system.

DECIMATION was introduced among the Romans as a military punishment by Appius Claudius, about B.C. 470, and continued in use till it was abolished by Theodosius I. in 383.

DECIMUS (Battle).—Belisarius defeated the Vandals Sep. 14, 533, on a plain 10 miles from Carthage, and on this account the victory received the name of *Decimus*.

DECLARATION.—(*See* ALLIED POWERS.)

DECLARATION OF RIGHTS.—This declaration for vindicating and asserting the ancient rights and liberties of the subject was agreed to by the Lords spiritual and temporal and the Commons, Feb. 12, 1689 (O. S.). It was read before William, Prince of Orange, at Whitehall, and accepted by him Wednesday, Feb. 13 (O.S.). (*See* BILL OF RIGHTS.)

DECORATED STYLE, in Gothic architecture, is, by Button, estimated to have lasted from 1272 to 1461, and by Rickman from 1307 to 1392.

DECRETALS, letters written by the popes to decide questions in ecclesiastical law. Pope Siricius wrote the first, in 385, to Himerius, Bishop of Tarragona, in Spain. A series of forged decretals were written in France between 829 and 845, the aim of which was to exalt the episcopal dignity, and increase the power of the upper magnates of the Church. Gratian published a collection of decretals in 1140, and Gregory IX. compiled five books of them, which were called the Pentateuch, in 1234, to which Boniface VIII. added a sixth in 1298. Clement V. issued his five books, known as the Clementines, in 1308, and John XXI. or XXII. used them as the foundation of the canon law in 1317. This was the last authentic series of decretals. The later ones, called Extravagantes, have only been occasionally preserved, and the latest of these was written by Sixtus IV. in 1483.

DEDICATION OF CHURCHES. — Moses (Exodus xl. 33—8) dedicated the tabernacle in the wilderness, B.C. 1400; and Solomon (1 Kings viii. 1—64) devoted his temple to the service of God, B.C. 1004. The second temple was likewise dedicated (Ezra vi. 16, 17), B.C. 515. According to Bingham, the first authentic accounts of the consecration of Christian churches occur in the 4th century, when, in the words of Eusebius, "it was a desirable sight to behold how the consecrations of the new-built churches and the feasts of the dedications were solemnized in every city." The church of Jerusalem, erected by Constantine I. on the site of the Holy Sepulchre, was consecrated by a full synod of bishops specially convened for the purpose in 335; and in 341 the church of Antioch was also dedicated by a great company of bishops summoned for that end.

DEEDS.—Among the Anglo-Saxons, when title-deeds were lost, new ones were prepared, from memory, of similar effect; an instance of which occurred in 903. Deeds were not gone-

rally dated until the reign of Edward II., although the practice commenced in the time of Edward I. The indenture of deeds was rendered unnecessary by 7 & 8 Vict. c. 76, s. 11 (Aug. 6, 1844).

DEEG, or DIEG (Hindostan), was fortified by Sooraj Mull in 1760. In 1776 it was taken by Nudjiff Khan, after a siege of 12 months. Gen. Fraser defeated Holkar under its walls Nov. 13, 1804; and Lord Lake took the fortress by storm Dec. 14, 1804.

DEERHURST.—(*See* ALNEY, or OLNEY.)

DEFAMATION.—By the laws of Lothaire, King of Kent (673—685), calumny and defamation were visited by severe fines. Under Alfred, Edgar, and Canute, those who spread false reports forfeited their tongues, unless they paid the full amount of their mulct. The law respecting defamation of character was amended by 6 & 7 Vict. c. 96 (Aug. 24, 1843); and the offence was removed from the jurisdiction of the ecclesiastical courts by 18 & 19 Vict. c. 41 (June 26, 1855). (*See* LIBEL.)

DEFENCE OF THE REALM ACT, "to make better provision for acquiring lands for the defence of the realm" (23 & 24 Vict. c. 112), was passed Aug. 28, 1860.

DEFENDER OF THE FAITH.—Leo. X. conferred the title of "Fidei Defensor" on Henry VIII., as a mark of approval of his work against Luther, dedicated to that pontiff. The bull by which it was granted bears date Oct. 11, 1521, and the title was confirmed by 35 Hen. VIII. c. 3 (1543). The title had, however, been assumed by the kings of England previous to the time of Henry VIII. Richard II. used it in his proclamation against the opinions of Wycliffe, dated Westminster, July 3, 1382.

DEFENDERS, and PEEP-O'-DAY BOYS,—two Irish factions, the first being Roman Catholics, and the last Presbyterians, which originated July 4, 1784, near Market Hill, in the county of Armagh. On Whit-Monday, 1785, 700 Protestants, known as the Nappagh fleet, met the Defenders, who had assumed the title of the Bawn fleet, and were on the point of coming to an engagement, when they were induced to separate by some private gentlemen. In Jan., 1793, Ireland was much disturbed by the Defenders, who attacked the houses of Protestants. A battle was fought between these two factions Sep. 21, 1795, at the village called the Diamond, in which 48 Defenders were killed, and many more wounded. To commemorate this battle, the first Orange lodge was formed.

DEFENDERS OF THE CHURCH, laymen, appointed by Pope Honorius in 407.

DEFINITIVE PEACE.—This name has been given to the treaty signed at Paris, Sep. 3, 1783, by which Great Britain acknowledged the independence of the United States.

DEGRADATION.—In the primitive Church this sentence was awarded to all who were guilty of very flagitious crimes. In 767 it was executed upon the Patriarch of Constantinople, who was compelled to leave the church backwards, and was stripped of his pallium, while an anathema was pronounced over him. By 23 Hen. VIII. c. 1, s. 6 (1531), clerks convicted of treason, murder, &c., were to suffer degradation. In chivalry, knights are degraded only for the most heinous offences. Instances occurred as early as 1322, and as late as 1621. The mode of execution was for the culprit's spurs to be hacked off his heels, his sword broken over his head, and himself announced to be "no longer knight, but a scoundrel-knave." Peers can only lose their nobility by death or attainder; though one instance occurs in which Parliament degraded a nobleman for poverty, viz. that of George Neville, Duke of Bedford, who was degraded in 1477.

DEGREES.—(*See* LAMBETH AND UNIVERSITY DEGREES.)

DEGREES OF GEOMETRY were first measured by Eratosthenes, who flourished B.C. 274—194. Hipparchus of Nice, B.C. 162, first determined the relative positions of places by means of their latitudes and longitudes.

DEGSASTAN, or DEGSTAN (Battle).—Ethelfrith defeated the Scots at this place, by some supposed to be Dalston, in Cumberland, in 603.

DEI.—(*See* AGNUS DEI.)

DEI GRATIÂ, by the favour of God. This formula was first used by the bishops at the Council of Ephesus in 431, and was afterwards very generally adopted by temporal and ecclesiastical authorities.

DEIRA.—The territory acquired by Ida, in the north of England, was after his death divided into two states—Deira and Bernicia. Ella became king of the former in 559. At his death in 588, Deira was joined to Bernicia. Oswin seized Deira in 644, and was slain by Oswy, King of Bernicia, Aug. 20, 651.

DEISTS, or THEISTS.—This appellation was assumed in France and Italy about the middle of the 16th century, by persons who acknowledged the existence of a God, though they rejected the Bible. They are mentioned as a new sect in the preface to the second volume of Viret's "Instruction Chrétienne," published in 1563. Lord Herbert of Cherbury, whose work "De Veritate" appeared at Paris in 1624, is one of the earliest English writers who advocated the system. (*See* FREETHINKERS.)

DELAWARE (United States), so called from Lord De la War, governor of Virginia, who was the first to enter the bay, in 1610. It was colonized by the Swedes and called by them New Sweden in 1638; taken by the Dutch in 1655; and seized by the English in 1664. In 1704 it was erected into a separate colony, which rank it maintained till the separation from the mother country. Its constitution was formed in 1776, and amended in 1831.

DELEGATES.—On the prohibition of appeals to the Pope by 24 Hen. VIII. c. 12 (1532), the Court of Delegates was created to exercise the supreme appellate jurisdiction. It generally included the judges of the court of Westminster, and the doctors of the civil law, and was established by 25 Hen. VIII. c. 19 (1533). Its jurisdiction was abolished by 2 & 3 Will. IV. c. 92 (Aug. 7, 1832), which provided that all appeals formerly made to it should in future be laid before the sovereign in council; and this act was amended by 3 & 4 Will. IV. c. 41, s. 3 (Aug. 14, 1833), which ordered all such appeals to be referred to the judicial com-

mittee of the Privy Council. Further regulations were made by 6 & 7 Vict. c. 38 (July 28, 1843).

DELFT (Holland) was founded by Godfrey le Bossu, Duke of Lower Lorraine, in 1074. In 1359 the town was seized by the Kabbeljauwen (*see* HOLLAND), who were besieged and defeated by Count Albert. The new church was erected in 1381; and the town was much injured by a fire in 1536. Here Hugo Grotius was born, April 10, 1583; and William I., Prince of Orange, assassinated by Balthazar Gérard, July 10, 1584. The Hôtel de Ville was built in 1618. A mausoleum was erected in memory of William I., in the new church, in 1620. Delft suffered severely from the explosion of a powder-magazine in 1654.

DELHI (Hindostan), the ancient capital of the Patan and Mongol empires, was an important city, governed by its own rajah, as early as 1008. In 1011 it was taken and pillaged by Sultan Mahmoud, of Ghizni; and in 1193, Cuttub ud Deen wrested it from the Hindoo princes, and founded the Patan, or Affghan empire. Timour crossed the Indus, and captured Delhi, in 1398; and in 1525, Sultan Babor took the city, and abolished the Patan dynasty, establishing in its stead that of the Mongols. Akbar, the greatest of the Mongol emperors of Delhi, who commenced his reign in 1556, invited the Portuguese to establish a mission in his capital in 1568, extended his power over Bengal (*q. v.*) in 1580, and died in 1605. In 1735 the city was partially burned by the Mahrattas, and it was taken by Nadir Shah, March 9, 1739. The Mahrattas obtained possession of Delhi in 1770, and the Rohillas in 1788. Delhi College was founded in 1792. The battle of Delhi was fought Sep. 11, 1803, between the French and Mahrattas, under Bourquin, and the English, under Gen. Lake, and gained by the latter, who entered the city the following day. In Oct., 1804, it was besieged by Holkar, who was compelled to retire, in spite of his superior force. From this period no event of importance occurs in the history of Delhi until May 11, 1857, when it was entered by fugitive rebel sepoys from Meerut, and made the head-quarters of the rebellion. The English laid siege to it June 8, commenced the cannonade Sep. 11, and completed the capture Sep. 20. The king and his two sons were taken Sep. 21, and the latter were immediately shot by Lieut. Hodson. The English troops left Delhi in pursuit of the rebels Sep. 23.

DELICATE INVESTIGATION.—This inquiry into certain alleged improprieties on the part of Caroline Elizabeth, then Princess of Wales, and afterwards Queen of England, as wife of George IV., was conducted by a commission appointed by the king, May 29, 1806, and composed of Lords Spencer, Grenville, Erskine, and Ellenborough. The chief promoters of the investigation were Sir John and Lady Douglas, who laid charges against the princess, of which the committee declared her innocent, although they condemned her for culpable levity of conduct. Sir John and Lady Douglas persisted in their assertions, and in March, 1813, the subject was much discussed in the House of Commons. The bill for the degradation of the queen was proposed by Lord Liverpool, and read for the first time July 5, 1820. The second reading took place Aug. 17, and the case was opened by the attorney-general in support of the bill, Aug. 19. Mr., afterwards Lord Brougham, commenced the defence Oct. 3, and the Lords voted in favour of the third reading of the bill, Nov. 10. In consequence, however, of the strong feeling of the country in favour of the queen, and of the nearly equal state of opinion among the peers—the majority only amounting to 9—the bill was abandoned on the motion of Lord Liverpool.

DELINQUENTS. — All persons assuming powers not authorized by statute were, by the Long Parliament, in 1640, declared to be delinquents. The House of Commons ordered a person to be sent for as a delinquent for speaking scandalous words against a member, Feb. 15, 1641, and that when any man was sent for as a delinquent, and afterwards, by order of the House, was bailed, he should not on that account be discharged of arrest in other suits, June 7, 1641. Hume remarks:—"This term was newly come into vogue, and expressed a degree or species of guilt not exactly known or ascertained." Many of the nobility and gentry, for exercising what they believed to be the legal powers of magistracy, were involved in the crime of delinquency.

DELIUM (Battles).—The Boeotians defeated the Athenians near the temple of Apollo, at Delium, B.C. 424. Socrates, and his pupil Alcibiades, took part in this battle.——The troops of Antiochus (the Great) of Syria defeated the Romans at Delium, B.C. 192.

DELLACRUSCAN SCHOOL. — This term, taken from the celebrated academy, Della Crusca, at Florence, was applied to some English writers residing at Florence in 1785, who formed a new school. William Gifford exposed their absurdities in his satirical poems, "The Baviad," published in 1791, and "The Mæviad," in 1795.

DELOMBODERA.—(*See* CATTLE PLAGUE.)

DELOS (Ægean Sea).—This island, called also Cynthus and Ortygia, the smallest of the Cyclades, is said to have been the birthplace of Apollo, and was one of the chief seats of his worship. It was made the common treasury of the states united against Persia, B.C. 477. The Athenians purified it by removing all its tombs, &c., B.C. 426; and banished all its inhabitants B.C. 422. About B.C. 146 it became important as a seat of commerce, but it subsequently lost all trade, and is now a mere heap of ruins.

DELPHI (Greece).—The celebrated temple and oracle of the Pythian Apollo is said to have been founded by the Amphictyons B.C. 1263. The Pythian Games were first celebrated here B.C. 586. It was destroyed by fire B.C. 548, and some accuse the Pisistratidæ of having burned it; but Herodotus (ii. 180) acquits them of any such intention. It was rebuilt by the Amphictyons, and decorated by the Alcmæonidæ, who so enriched the new edifice that Xerxes sent an expedition in search of plunder, B.C. 480. The Persians, however, were compelled to retreat by the

immense blocks of stone which were hurled upon them, by supernatural means according to the report of the priests. The Phocians seized the temple B.C. 357, and enriched themselves with its immense wealth, which amounted to 20,000 talents of gold and silver. Philip II. of Macedon restored it to the custody of the Amphictyons B.C. 346, and it remained undisturbed until attacked by the Gauls under Brennus, B.C. 279, when the enemy was a second time repelled by the overthrow of huge masses of rock. It was again plundered by Sylla, B.C. 82; and by Nero, who took from it 500 brazen statues, A.D. 67. The temple was suppressed by Theodosius I., who died in 395, and with it the existence of the town may be said to have ceased. Homer calls it Pytho, and it is now known as Castri.

DELPHIN CLASSICS.—This edition, suggested by the Duke of Montausier, was prepared by order of Louis XIV. for the use of the Dauphin, whence the name (*In usum serenissimi Delphini*). Hallam (Lit. Hist., vol. iv. pt. 4, ch. 1) says,—"The choice of authors as well as of editors was referred to Bishop Huet, who fixed the number of the former at 40." The first edition consisted of 64 volumes. Florus and Sallust appeared in 1674, and Ausonius in 1730. Mr. Valpy commenced the republication of the Delphin Classics in 1818. The editions are unequal in merit.

DELUGE.—The first mention of the Deluge occurs in Gen. vi. 7—22, which describes the directions received by Noah relative to the construction of the ark. The commencement of the flood is related Gen. vii. 10—12. The waters increased for 40 days (17), and remained upon the earth 150 days (24), at the end of which time the ark rested on the mountains of Ararat (Gen. viii. 4). The following are some of the dates assigned to this event:—

B.C.		B.C.	
3246.	Septuagint.	2352.	Playfair.
3170.	Jackson.	2348.	Usher and English Bible.
3155.	Hales.	2344.	Marsham.
3146.	Josephus.	2329.	Petavius.
3103.	Persian.	2296.	Irish.
3102.	Caliyuga.	2293.	Strauchius.
3000.	Chinese.	2288.	Hebrew.
2998.	Samaritan.	2104.	Vulgar Jewish.
2698.	Howard.		
2492.	Clinton.		

Besides the general Deluge, there are others recorded by classical authors, of which the chief are those of Ogyges, about B.C. 1760, and of Deucalion, B.C. 1504, the first of which was confined to Attica, and the latter to Thessaly.

DEMBEWIELKIE (Battle).—The Poles defeated the Russians with great slaughter at this place, near Warsaw, March 31, 1831.

DEMERARA AND ESSEQUIBO (South America). — Colonies were planted on the banks of these rivers by the Dutch, about 1580. They were taken by the British under Gen. Whyte, April 22, 1796; and restored to Holland, by the peace of Amiens, March 27, 1802. The English captured them again Sep. 20, 1803. By an agreement, signed in London, Aug. 13, 1814, the Dutch surrendered these possessions to England. (*See* BRITISH GUIANA.)

DEMETRIA.—The Athenians instituted an annual festival under this name in honour of Demetrius Poliorcetes, B.C. 307.

DEMMIN (Prussia). — This, an important town in the time of Charlemagne, was walled in the 12th century, and has sustained several sieges. The Swedes took the garrison prisoners in 1757, and the Prussians regained possession in 1759. The French captured Demmin April 17, 1807.

DEMOCRATS.—(*See* REPUBLICANS.)

DEMOTIKA (European Turkey). — At this town of Roumelia, the seat of a Greek bishop, Charles XII. was detained a prisoner in 1713. (*See* BENDER.)

DENAIN (Battle). — At this village, in France, Marshal Villars, at the head of a French army, defeated the allied Dutch and German troops, commanded by the Earl of Albemarle, July 24, 1712. Prince Eugène, who by some writers is represented as having taken part in the action, was, by the admirable strategy of Marshal Villars, compelled to witness a defeat that he could not avert.

DENARIUS, the standard silver coin among the Romans, was first coined B.C. 269. Its value amounted to 10 bronze ases, or eightpence halfpenny. About B.C. 216 its value was raised to 16 ases, the as being reduced considerably in weight. Gold denarii were struck at Rome B.C. 206.

DENDERMONDE, or TERMONDE (Belgium).—This town, which dates from the 8th century, possesses a citadel erected by the Duke of Parma in 1584. In 1667 it was besieged by Louis XIV., who was compelled to retreat by the floods which the inhabitants brought upon his army by opening their sluices. It was invested by the Duke of Marlborough, who effected its capture Aug. 29, 1706. The French seized it in 1745.

DENGUE, DANDY, BREAK-BONE, or BUCKET FEVER, first appeared in North America and the West Indies in 1827–8.

DENIS, ST. (France).—A chapel in honour of St. Denis was founded at this place, near Paris, in 250. Dagobert was buried here in 580. Dagobert I. founded the abbey in 636, and it has ever since been the place of sepulchre for the French monarchs. The first church was finished in 775, and the present edifice, commenced in 1130, was completed in 1281. A battle between the Roman Catholics and the Huguenots was fought in its vicinity Nov. 10, 1567, when the latter were victorious, De Montmorency, the Roman Catholic leader, being mortally wounded. The abbey was suppressed in 1792. By a decree of the Convention, Aug. 6, 1793, the royal tombs were opened, but they were restored by Napoleon I. in 1806.

DENIZLI (Asia Minor).—This town in Asiatic Turkey was nearly destroyed by an earthquake in 1715.

DENMARK.—The early history of this country is involved in obscurity. Some native writers give lists of its sovereigns from the time of Noah, while others are content with ascribing the foundation of the kingdom and the name of the country to Dan, whose reign, they say, began B.C. 1038. The first inhabitants were probably the Cimbri, or Cimmerians, who

were supplanted by the Goths four or five centuries before the Christian æra.

B.C.
1038. Alleged accession of Dan.
463. Reign of Ruric Slingebrand, during which the events that form the basis of Shakespeare's "Hamlet" are said to have occurred.
70. Arrival of Odin.
40. Death of Skiold, by some authorities considered the founder of the monarchy.

A.D.
794. Ragnar Lodbrog perishes in an attempt to invade Northumberland.
828. Harold I., the first Christian sovereign of Denmark, retires to a monastery.
912. Rollo, the Dane, obtains Normandy.
944. Harold II. assists the Northmen against the French king, whom he makes prisoner.
991. Harold II., famous for his prowess in war and his zealous adoption of Christianity, is assassinated by order of his son Sweyn.
1013. England submits to Sweyn.
1028. Canute the Great conquers Norway, which he governs simultaneously with England and Denmark.
1042. Magnus I., King of Norway, inherits the throne of Denmark.
1047. Separation of Norway and Denmark, Sweyn II. ascending the throne of the latter country.
1087–1095. Reign of Olaf II., surnamed the Hungry, in consequence of a terrible famine which visited his kingdom.
1147. The sovereignty is divided between Canute V. and Sweyn III., who wage a long civil war.
1157. Valdemar I. (the Great) succeeds to the throne.
1250. Murder of Eric VI. by his brother Abel.
1325. Christopher II. is expelled by his subjects.
1326, Aug. 15. Count Gerhard, of Holstein and Stormarn, receives the duchy of South Jutland as an hereditary fief, with royal rights over the inhabitants of Sleswig.
1340. Valdemar III. is elected king.
1397, July 12. The union of Calmar (*q. v.*).
1440. Eric IX. bestows Sleswig on Adolf, Count of Holstein.
1448. Christian I. ascends the throne, and founds the Oldenburg dynasty. Sweden resumes its independence under Charles Knutson.
1457. John Bengston, Archbishop of Upsal, defeats Charles Knutson, and reunites the three kingdoms under one monarch.
1464. Christian I. is made Duke of Sleswig and Count of Holstein.
1477. Christian I. relinquishes his efforts to maintain the sovereignty of Sweden.
1481, May 22. Death of Christian I. He is succeeded on the Danish and Norwegian thrones by his son John.
1497, Nov. 19. Sweden submits to John.
1523. Deposition of Christian II.
1525. Gustavus Vasa becomes King of Sweden, which he renders independent of Denmark and Norway.
1527. Frederick I. declares in favour of Lutheranism.
1533. On the death of Frederick I., the succession is disputed by the deposed Christian II., Christian Duke of Holstein, and Prince John of Holstein. The Duke of Holstein succeeds as Christian III.
1620. Tranquebar, in Hindostan, is ceded to Denmark.
1645, Aug. 14. Treaty of Brömsebro (*q. v.*).
1652. Instigated by the Dutch, Frederick III. seizes and sells 22 English vessels, at anchor in the port of Copenhagen. Cromwell compels the Dutch to make reparation.
1658. Denmark is invaded by Charles Gustavus of Sweden, who threatens Copenhagen, and receives Scania, Blenkingen, Halland, Bornholm, Bahus, Jamtland, Drontheim, and parts of Bremen and Rügen.
1660, Oct. The authority of the king is made absolute and hereditary.
1667. Acquisition of Oldenburg and Delmenhorst.
1720, June 14. Peace of Stockholm, between Denmark and Sweden.
1726. Rantzau is added to Denmark.
1761. Holstein-Plön is added to Denmark.
1772, Jan. 16. Caroline Matilda, Queen of Christian VII., is arrested on a charge of incontinence, and afterwards banished.—April 28. Execution of Counts Struensee and Brandt, for alleged implication in the queen's offence.

A.D.
1773. Holstein-Gottorp is ceded to Denmark by Russia, in return for Oldenburg and Delmenhorst.
1784, March 28. Christian VII. having become insane, his son, Prince Frederick, is appointed regent.
1786. Liberation of the serfs in Denmark.
1795. Establishment of tribunals of conciliation, to adjust law disputes by mediation instead of litigation.
1801, April 2. Bombardment of Copenhagen (*q. v.*), which puts an end to the Armed Neutrality.
1803. The Danish poor-law comes into operation. Its provisions are, the maintenance of the destitute at the public cost, and the total prohibition of begging. The Danes suppress the slave trade.
1806, Sep. 9. Holstein is declared an integral part of the Danish monarchy, distinct from the Germanic empire.
1807, Aug. 16. Copenhagen is invested by the British fleet under Admiral Gambier, and the army under Lord Cathcart. — Sep. 2. Firing commences.—Sep. 5. The town capitulates, and its fleet, consisting of 18 ships of the line, 15 frigates, 6 brigs, and 25 gun-boats, falls into the hands of the English.
1810. The conscription is introduced.
1813, Sep. 5. War is declared against Sweden.—Dec. 16. Holstein is held by the allies.
1814, Jan. 14. Peace of Kiel (*q. v.*).
1815, June 4. Denmark cedes Pomerania and Rügen to Prussia, receiving Lauenburg and a pecuniary compensation as indemnity.—June 8. The king joins the German Confederacy.
1816. Introduction of savings banks.
1820. Introduction of system of mutual instruction.
1824, June 16. Commercial treaty with Great Britain is signed at London.
1825. A violent storm breaks through the isthmus between the North Sea and the Lymfiord, thereby making the north part of Jutland an island.
1831. Frederick VI. institutes provincial states.
1846, July 8. Christian VIII. issues a letter patent, declaring his undoubted right to the duchy of Sleswig, and his intention to submit his claim to Holstein for due consideration.
1848, Jan. 28. Frederick VII. publishes a new constitution, by which Sleswig, Holstein, and Denmark are to be governed by "common states," elected alternately in the duchies and Denmark.—March 24. Revolt of Sleswig and Holstein commences at Kiel. —April 23 (Easter Sunday). The Prussians defeat the Danes, and take possession of Sleswig.—May 1. Jutland is occupied by the Prussian forces.—Aug. 26. Truce of Malmö (*q. v.*).
1849, July 10. The armistice is renewed for six months.
1850, July 2. Peace with Prussia is signed at Berlin.—July 17. The Danish troops enter Flensburg.—July 25. The Danes conquer the troops of Sleswig-Holstein, at Idstedt.—Aug. 17. Cession of the Danish possessions on the coast of Africa to Great Britain.—Oct. 4. The Holsteiners, under Gen. Willisen, attack Friederichstadt, but are driven back.
1851, Jan. 11. Submission of the duchies to Denmark, and reference of the matters in dispute to the arbitration of the Germanic Confederation.
1852, Feb. 18. The government of Holstein is assigned to the Danish minister for Holstein-Lauenburg by the German commissioners. The Prussian and Austrian troops leave the duchy.—May 8. International treaty, relative to the succession of the crown of Denmark, is signed at London.—Dec. 30. The Prince of Augustenburg, in consideration of a sum of 3,500,000 dollars, signs an act renouncing for himself and his family all right to the succession of any part of the Danish dominions.
1855, Oct. 1. The Danish government sends despatches to all the states interested in the question of the Sound dues, inviting them to confer with Denmark relative to a definite arrangement.—Oct. 4. The king publishes a new constitution.
1857, March 14. Abolition of the Sound dues (*q. v.*).
1858, Nov. 6. Great changes in the constitution of Holstein.
1859, July 14. Denmark is connected with Great Britain by submarine telegraph.
1860, May 3. The Prussian diet resolves to assist the duchies of Sleswig-Holstein against Denmark.
